OTTAWA, May 8 .- (Special.) -- That the government contemplates a general lection at an early date is evident from the supplementary estimates which were laid on the table of par-Nament to-day by the minister of finance. The Conservatives say that wholesale debauchery of many constituencies has been thus arranged for. The supplementaries amount to over \$17,000,000, which, with the main estimates, total \$156,000,000, or \$23,000,000 more than last year. Of this huge sum \$23,000,000 will be spent by Mr. Pugsley on public works and \$27,000,000 by Mr. Graham on railways.

The most significant outlays are to take place in Halifax, the constituency of R. L. Borden, leader of the opposition. Mr. Graham will spend one mil-lion there on a branch line, while Mr. Pugsley will spend \$600,000 on docks. These important works have been held until the eve of the general election, and with them a tremendous efwill be made to fill the constituency with solid Liberals for the purpose of defeating Mr. Borden.

It is evident that the government does not consider Ontario so easily reached, for there are only 51 items for harbors and rivers, as against the 120 for Nova Scotia and 104 for Que-, but it is noticeable that they are distributed so as to assist ministers and other prominent Liberals who may be in danger of defeat. This is par-ticularly the case with Hon. George

Government to Guarantee C.N.R. Bonds.

OTTAWA, May 8.-The minister of railways has given notice of the intention of the government to guarantee the bonds of the Canadian Northern Railway over the completed and uncompleted portions of the company's line between Montreal and Port Arthur. This will enable the company to connect up its different sections east and west

and carry out its scheme of a third transcontinental railway.

(1) Montreal to Port Arthur, including the part already constructed, to the extent of \$35,000 per mile at 3½ per cent, interest.

(2) That the company shall give the government a first mortgage on the line from Port Arthur to Montreal, except on the completed portion from Hawkesbury to Rideau Junction, near Ottawa, 62 % miles, and about 10 miles of the company's Hutton branch south of Sollwood Junction, the trustees to be the British Empire Trust Company and the National Trust Company, with which trust companies the company is to deposit bonds to the amount of \$55,000 a mile, being

approximately \$2,585,500.

It is provided that, at the request of the Canadian Northern Railway Company, the government may pay interest on the bonds for the first two years, charging the company therefor at the rate of 31/2 per

It is made conditional to the guarantee that the company shall carry traffic destined to a Canadian port over its own line; that the thru rate on export traffic from the point of origin to the point of destination shall at no time be greater to a Canadian port than to a United States port; that all such traffic shall be carried to Canadian ocean ports, and that the company shall not advise or encourage transportation to foreign ports. The Canadian Northern Railway is bound to construct terminals in Montreal and make arrangements for an interchange of traffic with the Intercolonial Railway.

Successful Inauguration of New Mail and Newspaper Service to Western Ontario -Should Be Extended East Also-First Try-Out in Canada of "Open Mail" System.

Toronto and western Ontario both ook a step in the right direction, a step towards a closer and more intimate knowledge of each other, when, at 2.58 o'clock Monday morning a new newspaper train steamed on her first run westward, bearing the "Daybreak" -or to use the simple yet touching metaphor of The Globe, the "Breakfast Food"-editions of the Toronto morning papers to Brantford, Paris, Woodstock, Ingersoil and London, from these Points to be distributed by a network of lines to the farthest corner of the western portion of the pravince, hours ahead of what was possible before its advent.

It was a step in the right direction a beginning, but only a beginning. It should be followed up by an early fast mail and newspaper train east from Toronto, serving all the important towns along the Montreal line of the G. T. R. as far east 12 Kingston. which at present does not see what a Toronto morning paper looks like until

the afternoon.
One of the most noteworthy features of the new train was the first trial in Canada of the "open mail" system, whereby parcels of papers unbagged, are delivered to newsdealers at the car door, instead of their having to wait

for the papers to be sent to the Post-office for delivery.

Work Well Done. When Superintendent U. E. Gillen of the Grand Trunk, and George Ross. postoffice superintendent, work to-gether to do something, that is equiva-lent to saying that it will be well done. Nevertheless it is seldom that on its inauguration a new scheme works as smoothly as did that of Monday morning. The train pulled out just three minutes behind schedule, and drew into London station sharp on time at 5.55. It, takes a good engine to do this, and No. 215 is one of the best, built in 1911, of the "Pacific type," with six 78-inch driving wheels, of 2100 horse power. of water and 10 tons of coal, the total weight of engine and tender being 360 .-000 pounds. ALL WENT TO THE BALL GAME.

There were no courts at the city hall yesterday and very few of the officials were to be seen at their accustomed places. It is presumed that the members of the city council were fanning themselves at the ball game. Baseball Toronto Defeats Providence Before 23,000 Cheering Fans

Turf O. J. C. Official Entries For Eleven Stake Events

Note and Comment

It was indeed a proud day for the president. A crowd of over 23,000, that included 22,467 paid admissions, saw Collins' clam-diggers of Providence on opening day at the island. The weather was ideal, the visiting players expressing surprise at the summer-like day and the green foliage everywhere that were unknown quantities when they left Rhode Island.

The Island Stadium never looked better, and the thousands who overflowed into the outfield looked as happy as larks on the green sward. Dicky Rudolph was at all times master of the situation, and even when the en- cheered on every occasion possible for emy got two on with no one out in the Leafs. the fifth, they were not dangerous, the star twirler striking out Peterson at the psychological moment.

The new big leaguers, Keeler, Jor dan, Bradley and Phelps, all made good with the fans, three of them by clever fielding, and the backstop coming up with a two-base hit and the bases full. While the new-comers fail. ed to get generally into the hit column, their business would indicate that they would deliver the goods even if there were no past performances. It's a treat to see Keeler step into the ball, tho the wonder is how he works with his hands midway up on the bat.

Mullen had a great day in the field. Vaughn did not play up to his road

After all, it's McCaffery and his as sociates who are to be congratulated. Mine host was here, there and everywhere, always returning a genial smile to the throng that passed the president's box, and wearing gloves thruout the ordeal.

Sporting Editor Perrin of The Providence Journal is here with the Greys. He says Rochester was nothing short of lucky in getting away with their four games. He expects their toam to stay well up in the race, as Collins has collected a fine lot of youngsters. They, however, miss Jakey Atz from the infield. He broke a finger on opening day, and Nill has been working since at second-base.

The firemen have organized their baseball club, with these officers: Honorary president, Chief Thompson; honorary vice-president, Deputy Chief Noble; president, District Chief Villers; manager, Steve Lesslie. They have all the oldeplayers, and several new ones, and promise to treat, their old-time rivals, the police, to a surprise on Friday at Ketchum Park.

ROCHESTER, N.Y., May 8,-A ground rule, which limited hits into the crowd to two bases, was the main factor in destruck out and Lavender was an easy out to O'Hara. Rock got a single in the seventh, but was forced at second. Peterson singled in the eighth, but a fast double spoiled that chance. The same may be said of Nill's single in the ninth; he also died by a double play.

The double spoiled that chance is a couple of pinch hitters for Jersey City and won by 6 to 4. In the fifth they and won by 6 to 4. In the fifth they had wore out, that the contest was sewed up. Brisk Bidding and

Brisk bidding and only fair prices prevailed yesterday at the auction sale at Maher's Horse Exchange. The attendance was large, and during the course of the day's business quite a number of horses were turned over to new owners. The feature of the sale was the way in which the harness, vehicles, etc., of several stable outfit consignments were snapped up. A few of the sales were:

Mr. Alf. Rogers sold his bay mare, basket phaeton and harness for \$50; Mr. R. L. Gibson, city, bought a very fine highstepping chestnut mare for \$32.50; Mr. A. Ballant, city, bought a bay gelding that looked cheap at \$120; Mr. A. Aylmerbought a good worker, harness and wagon; Standard Fuel Co. purchased a fine mare for brood purposes; Hamilton Transfer Co. purchased a chestnut gelding for \$12.50; Mr. J. Wallace bought a bay gelding, with both size and quality, for \$172.50; Mr. Louis Messier of Varennes, Que., bought a carload of mares of the finest quality; Mr. A. R. Speers, Winnipeg, was also on the floor of the exchange and purchased a carload. Mr. H. Field of Lisle, Ont., bought a bay mare, the price of which was not reported. Mr. A. C. Curran bought a pair of very fine bay geldings. F. Rogers & Co, purchased a gelding which looked worth the money. Mr. H. H. It is in Vancouver City, and in its effect upon property development that Large Section of Business Centre the operation of the new tax system has most interest for Toronto and other Ontario citics. Vancouver has grown in ten years from 26,000 to 100,000 most powerful city on the Pacific coast

The several persons having to jump to transition was made without the safety in their night clothing. Three slightest disturbance of any kind, and children of the Gagnon family had everybody is satisfied.

Mr. Nock mentions many instances of vacant lots with fine buildings next them, the taxation in each case being the same, while in other instances the vacant lot pays a higher tax than the one built upon. If you were going to build would you build in Vancouver or Seattle? asks Mr. Nock. He would substitute Toronto for Seattle if he were planos, practically as good as new here in the contrast with Vancouver. An example is given. HAD KIDNEY TROUBLE.

COULD NOT CROSS THE FLOOR PAIN WAS SO GREAT.

Miss Hazel Hess, Winchester Springs, Ont., writes:—"I was troubled with my kidneys for five years. They were so bad, at times, I could not cross the floor for the pain. The doctor could not do me any good and a friend advised me to use Doan's Kidney Pills. I bought six boxes and now I have been cured for over four years. I will recommend them

No woman can be strong and healthy unless the kidneys are well. When the kidneys are ill, the whole body is ill, for the poisons which the kidneys ought to filter out of the blood are left in the system. Then how important it must be to see to it that this system of sewerage be not clogged up.

Doan's Kidney Pills are a vegetable medicine, realizing quick, permanent relief, without any after ill effects. A medicine that will absolutely cure backache and all forms of kidney and bladder trouble.

Doan's Kidney Pills are 50c. per box or 3 for \$1.25, at all dealers or mailed

(Clinton), for executors. W. Proudfoot, K.C., for widow. C. Garrow, for two residuary legatees. Motion by the executors of the will of John Plaetzer, under C. R. 938, for an order constru-ing the will, the question being whether the corpus of his estate is liable for the annuity to his wife or whether the charge is confined to the sum named as that from which the annuity was primarily to be paid. Judgment: I am of opinion that the whole fund, if ne-cessary, is to be available for the pay-ment of the annuity to the widow. The widow should get not only the use of the house for her life, but an annuity of \$150 a year out of testator's estate. This annuity was for her maintenance during her life, something that was necessary and no doubt the testator realized this. The testator's bounty fixed the amount, and that amount should be paid in full before anything is reserved for residuary legatees. The annuity is chargeable upon and pay-able out of the corpus, to the extent necessary, if necessary at all, to make the payment of \$150 a year. The an-nuity ceases upon the death of annuitant, except as to arrears, if any. If the interest on the fund exceeds \$150. such excess is not payable to the an-nultant, unless for payment of arrears. if any. "The whole" means all of testator's estate. When the five beneficiaries named become entitled they are entitled "share and share alike," that is to say, each to one-fifth of the residue. The daughters, Mary and Elizabeth, do not take under the last clause of the will. There is nothing to take, as all had been previously disposed of by the will. They take with their brothers, each of the daughters, one-fifth. The questions b and c can perhaps be made more clearly to express the meaning intended. The money should be properly invested, so as to yield a larger return. Costs of all par-ties out of the estate.

Motion by the West Nissouri Continuation School Board to be allowed to intervene and be heard by counsel in support of the bylaw in question in this appeal.

Judgment: It is quite apparent that the interest of the board in the money (\$7000) to be raised by the debentures under the bylaw is of a sufficiently substantial kind to have justified its being made a party to the application to quash. If not an absolutely neces-sary party, it was at all events a proper party. Probably it will be sufficient for all purposes to order that the school board be at liberty at its own expense to appear and be represented by counsel upon the argument of the appeal and support the present judgment. So many people speak about the good quality of our Drinks and Service at our Soda Fountain. One reason for this is contained in the following set of rules for our Soda Dispensers. They are trained along these lines:

Rules for Our Soda Dispensers' Guidance Sanitation is the one big feature of our business. That means

be clean and stay clean. Never serve a drink that you would not drink yourself. Never serve a drink before lifting all used glasses and dishes

Never serve a drink before cleaning the slab. Never clean anything with a dirty, soggy towel Be sure your glasses are clean. Never serve a drink with the fingers around the rim of the glass.

Grasp the glass with the thumb and second finger, about midway between top and bottom of glass. Never stir a soda with a spoon. Never serve a soda that is not well mixed—see that the syrup

does not stay at the bottom of the glass. Stir an ice-cream soda with the fine soda stream, allowing it to shoot down the side of the glass-PASSING the ice cream and not through it. This is what the fine soda stream is for.

Be liberal with nuts and syrups on sundaes. Give them plenty the trade wants it. Always serve water with sundaes. Never attempt to shake two drinks at once. It is clumsy, and

Be polite and attentive. Say "Thank you" and "Yes, Sir," and 'No, Sir," or whatever the case may be. Politeness costs nothing

Never allow a customer to leave the fountain dissatisfied. Change the drink, even though you know the customer is wrong. We see that our men live up to these rules.

Do you wonder our Soda Fountain is so popular? We invite inspection along these lines. We also appreciate your

A matter of interest in insurance and financial circles has taken place in the resignation of Thomas Bradshaw, F actuary of the Imperial Life Assurray came to death by falling down ance Co. of Canada, to become a part ner in the well-known financial firm of A. E. Ames & Co., of this city. Mr. Bradshaw will continue to act as a director of the Imperial Life. The directors of the Imperial Life have promoted J. R. Pickett, formerly secretary of the company, to the position of manager, and G. C. Moore, A. I.A., formerly associate actuary, to the position of actuary and assistant manager. These gentlemen are well known

in the insurance world, having been prominently identified with the Imperial Life since its organization.

The company is to be congratulated upon having within its own organization men so well qualified to carry on its work. It assures to the policyholders and agency force a continuance of that efficient management which has resulted in such a successful record as resulted in such a successful record as he Imperial Life now holds.

Alumnae Association Passes Reso lution - Strong Plea For Woman's Suffrage

The annual meeting of the McMaster Alumnae Association was held yesterday afternoon, with Mrs. G. H. Campbell in the chair. The feature of the program was an address by Mrs. W. R. Lang, B.A., a graduate of Newnham, College, Cambridge University, England. College, Cambridge University, England, on "Woman Suffrage." In England women, paupers, criminals and lunatics were put in the same class and all were debarred from voting, but women were permitted to teach in the schools and help in training boys and young men who would probabit, as many did, eventually enter the political arena. Mrs. Lang pointed out the woman did the main point part of the canvassmen did the major part of the canvass-ing during election time, assisting in a large degree in political campaigns, and yet they were not allowed to vote themselves. A large number of wo-men dld not want the franchise, but that was no reason why those that wanted it should be debarred. The following officers were elected:

About the Buying of Tuxedo Park Lots

Suppose we exchange a few thoughts on this live subject.

The sale of Tuxedo Park lots is now well under way and commands attention from all parts of the country. Interest in the property is being shown in the most unmistakable, practical shape. Many are buying lots. Many others are making inquiries. The investment spirit is aroused. The disposition to investigate is abroad. Everything promises well for a successful, gratifying selling campaign. And the reason is not far to seek.

Bear in mind that the inducement to buy is a good deal stronger than the obligation to sell.

"Tuxedo Park" has been held intact for several years. The city has now grown up to, around and beyond it. It is now being offered with the Calgary realty market in most buoyant state. Values climb daily. There is no determining their limit in a city growing so tremendously and yet only on the outset of its career. Real estate transactions from day to day show profits almost incredible, and to be accounted for only on the theory of boundless expansion in all that constitutes a great metropolis. Sir Wilfrid Laurier foresees a Calgary of 250,000 within a few years.

So that if there should appear any "urgency" aspect to Tuxedo Park proposition, must it not be looked for rather on the side of the public than of the owners of the property? The Company are willing to sell. The people are eager to buy.

The "Tuxedo Park" situation is this, in brief: Values are increasing, and will continue to increaseto the owners if they don't sell, to the buyers if they do.

And this value increase is not problematical or just possible—it is more than probable—it is absolutely certain.

Does anybody propose to argue that if Tuxedo Park is such a good and sure thing it would pay better to have and to hold than to sell? Well, the same argument could be advanced in the matter of any saleable commodity, in the promotion of any promising enterprise. But wouldn't this "have and hold" policy, if adopted universally, result in a woeful paralyzing of trade and stoppage of development and progress?

As a matter of fact, however, there is nothing at all unnatural or extraordinary in this inviting Tuxedo Park offering, presented on the basis of sure profit to the buyer, because the claim to profit-earning is true, valid, proven in the case of all Calgary realty of this class.

The careful investor will be guided mainly by three things: The experience of others, his own knowledge of the situation, and his estimate of the future.

We meet him readily on all these grounds, as involving "Tuxedo Park."

I.—Calgary realty in the past has made fortunes for men and women shrewd enough to take advantage of the chances offered. And hundreds of investors to-day have discovered that the money-making chances are just as available to them as to their predecessors. It's easy to figure it out before placing your money. When profits have ranged from 100 to 1,000 per cent., with the city merely on the threshold of a phenomenal career, they will scarcely suffer any drop with conditions of growth improved a hundredfold-which is the state of affairs in Calgary to-day, as compared with five years ago.

II.—The reader of this paper will easily recall all the startling facts and figures, presented from time to time, showing the progress of the place from a town of 4,000 in 1901 to a metropolis of 60,000; that its assessment is \$55,000,000 this year, and will be \$100,000,000 next year, while the rate of taxation is only 14 mills; that its clearing house record for 1910 was \$150,000,000, and will probably reach \$200,000,000 this year; that its building expenditure in 1910 was \$10,000,000, and will be \$15,000,000 this year; that it ranks No. 5 among the great cities of Canada in volume of business, and that it is spending this year \$4,000,000 on improved and extended public utilities, not including the railway, water mains and other extensions to "Tuxedo Park," which work is now in progress, and will be completed this summer; that railways have taken hold of Calgary as a centre. That this season will witness operation there of the three great transcontinental lines, the C.P.R., C.N.R. and G.T.R., and a score of radiating branches; that population is increasing thousands a month; that Sir Wilfrid Laurier foresees for Calgary a population of 250,000 within five years. With all this knowledge, no man thinking about Calgary realty in general, and Tuxedo Park in particular, as an invesment will go astray.

III. The investor's own judgment of what the future promises in the light of the present need not be appealed to. There can be only one judgment to form. The Calgary That Is is all the evidence of the Calgary That Will Be that any

early advance being wiped out, and the market closed unchanged.

Oats—Narrow. Climatic conditions are perfect for growing crep. Cash oats are steady. It looks as if the market would work some lower.

Erickson Perkins & Co. received the following:
Wheat-Opening prices were a shade lower. The May delivery was run up sharply on the execution of a few buying orders, easing later quite as readily, with a very light volume of trade in this month. The market continues of a most unsatisfactory character, and of a purely professional one. There is nothing in the news to attract outside trade, and the uncertainty regarding the outcome of the so-called deal in May wheat is causing general apathy and indifference.

are Corn—A generally easier feeling has prevailed in this market, with a co prevailed in this market, with a continuance of liquidation on the part of leading speculative longs. We continue our advices to sall corn on all good rallies.

Oats—Prices held steady, the market showing firmness in the face of the decline in corn. There is nothing in the situation, in our opinion, to warrant any upturn, crop conditions being most favorable.

Montreal Grain Prices. MONTREAL. May 8.—The foreign demand for oats continues good, and in sympathy with higher prices ruling here bids were advanced 3c per quarter. World Office, Monday Evening, May 8.

Monday Evening, May 8.

There was no news of any import to stimulate the tracking in mining stocks in to-day's market, and despite the fact that last week's activity was continued, little of interest was evolved in the dealings.

The Porcupine issues were in good demand at the opening, and in certain instances prices ruled above the close last week. The selling was of a responsible nature, however, and after the week-end accumulation of buying orders was disposed of, prices showed a disposition to shade.

Hollinger touched thirteen dollars in the early dealings, but this price was

Hollinger touched thirteen dollars in the early dealings, but this price was not held when profit-taking came into play, and the shares eased off to \$12.75, closing bid at that figure. dealings in the cheaper Porcupine Issues. Preston East Dome sold as high as 40 1-2, but in the afternoon was back to 39 1-2. Swastika lost 2 points Pearl Lake dropped a point at 57. Vipond touched 65 in the early trading, but was off to 62 later in the day. West Dome dropped 10 points, at

Detroit New Ontario stock was listed to-day and sales were made around 50 1-2, the shares holding remarkably firm at that figure. Only a small allotment of the stock is for sale, consequently brokers are looking for a good market for the security.

Cobalts were under pressure of profit-taking and prices were allowed to sag in various instances, several of the cheaper issues recording small declines, running from small fractions to one and two points. Crown Reserve was a strong point, the shares moving up five points to \$3.55.

The market, while active did not Right-of-Way

display the vivacity which characterized the dealings late last week. A period of resting was only natural after the strenuous operations, however, and traders were unanimous in the opinion that the movement would start up Wettlaufer Apex 221/2

DOME EXTENSION

SUALLY it is not good policy to buy a low-priced mining stock, merely because the property it represents neighbors a proved property which commands a very much higher price. In buying mining securities the better rule is to require each stock to stand or fall by its own in the case of Dome Extension, however, the stock is regarded as a most attractive numbers. to be regarded as a most attractive purchase, because of the merit of the property itself, as well as because of the fact that it neighbors on the north-east, the famous Dome property, which is declared by Prof. Merrill, metallurgist of the Home Stake Mine of South Dakota, to have the makings of the greatest gold mine in the world. The south-west 40 acres of the 200 acres owned by Dome Extension adjoins the north-east 40 acres owned by Dome Mines, Ltd., and since the great Dome formation on the latter property has a north-easterly and south-westerly strike, it is practically certain that into Dome Extension numerous veins off-shoot to the north-east and east from this Dome formation

As a matter of fact, several of these veins have been opened either by trenching or shaft-sinking, and the values disclosed in the shafts at a depth of 50 feet or better are of very high grade character. In his report on the property, James H. Miller, an English engineer, gives the details of one vein which has been traced for 600 feet, which shows a width of 17 feet, and which he declares is of sufficient importance, if proved to depth, to have values of no more than \$7 or \$8 per ton to warrant the erection of a mill of not less than 200 stamps. erection of a mill of not less than 200 stamps.

The Dome Extension property is controlled by practically the same interests that control the famous Dome Mines, W. S. Edwards being president of both companies, and one of the largest stockholders in Dome Extension.

The theory of this ownership doubtless is that, while these The theory of this ownership doubtless is that, while these interests which control both properties have no plans whatsoever for allowing the public to participate in Dome Mines, they are willing that the public should share with them in good fortunes which may result from the ownership of Dome Extension.

The company is capitalized at 2,000,000 shares, of which The company is capitalized at 2,000,000 shares, of which 1,500,000 shares have been issued, 500,000 shares being retained in the treasury. The incorporation is under Ontario laws. There is no indebtedness on account of the purchase price of the property, which was originally included in the Dome staking. and having developed the Dome Mine to its present state of greatness, Captain H. C. Anchor has been detached from the Dome, and is now in charge of the development of Dome Ex-

In this development it is planned to sink the main operating shaft to a depth of not less than 500 feet, cross-cutting on the way down, and with this object in view a steam hoisting plant, a compresser plant, shot drills, pumps, laboratory and an assay office, together with a camp for a full working force of miners and operatives, have been provided on the ground. The Dome Extension is the scene of as vigorous mining activity as is being carried on any place in the Porcupine district, with the exception of the Hollinger and Dome properties. It is our judgment that Dome Extension, purchasable at around prevailing that Dome Extension, purchasable at around prevailing quotations, is a stock which should score an advance of several hundred per cent., coincidently with the development of the greater Porcupine boom which is just now getting under way.

Orders in Dome Extension executed for cash or on margin. Certificates of stock in other companies will be accepted for collateral on the marginal purchase of Dome Extension when

Activity Revived

After the first outburst of activity in PORCUPINE stocks, and extreme advances, it was not to be wondered at that profit-taking brought about a reaction. Speculation is responsible for fluctuations in mining stocks, as in any other securities. Investors form the basis of any market, make the big-profits, and are not concerned on the day-to-day movements in prices. Investors who bought HOLLINGER at \$3.50 are still holding their stock although the price has almost quadrupled. These are the money-makers in

A phenomenal rise of over twenty points in Winnipeg Electric absorbed practically all the interest, speculative and investment, on the Toronto Exchange to-day. Nobody except the directors and a few insiders knows the cause for the advance in Winnipeg Electric. There are two guesses, one that the capital is to be again doubled, and the other that the company is to be taken over by the city at \$250 a share. Commerce was another strong stock, with sales at 236. Strength in Commerce drew more enquiry for some of the other banks, and Imperial advanced a point. Small liquidation in certain speculative shares forced prices a little, but the market as a whole was firm. Specialty movements are thought to be promising, and traders are looking for the next one.

Cotton Gossip.

Erickson Perkins & Co. had the following at the close:
Buying by local bulls followed a lower opening in response to the cables and a renewal of short covering ensued, old crop options advancing sharply with July selling at a new high price for the season. Considerable profit-taking was in evidence on the advance, but not in sufficient quantity to prove a weight on the market; in fact builish control of the near months seems equally as complete the market; in fact builtsh control of the near months seems equally as complete as before with good trade abroad and sensational statistics working for higher prices. Weather conditions now showing considerable improvement over last week and, taking all in all, crop conditions are much improved over last year. The short interest, however, is enormous and local spot interests seem friendly to the new crop. We look for a gradual decline in the way of discounting a javorable June report, but discounting a favorable June report, but advise sales only on bulges.

WALL STREET TRADING

NEW YORK, May 8.-The monthly statement of the copper producers and the government crop report received more attention in the financial community to-day than did the stock market, where trading was so lifeless as to be almost without significance. Publication of the report had little effect on stocks, however, Amalgamated Copper yielding only a fraction. While domestic deliveries fell off sharply, export increased moderately. In the steel trade, also, indications of immediate improvement are few. Shipments of the U. S. Steel Corporation are reported to have fallen to below the April ave-

rage.
Consideration of the "farmers' free list bill" in congress excited little attention in Wall Street, which apparently has made up its mind to take no heed of proposed tariff changes, however sweeping, until it is learned what prospects they have of ultimate success. Atchison was strong toward the close contact when the contact is the contact when the contact is the contact when the contact was the cont strong toward the close on the report from Parls that negotiations for listing 100,000 shares of the stock on the bourse had been virtually completed.

Carrying His Insurance

It's a wise man that recognizes the virtues of a Spring Overcoat to the extent of carrying it with him all through the month of May.

Now that the Island Season has started, many a man will be on the look-out for a smart-looking Light Overcoat at a saving price; let's say that one-third of the season for wearing Spring Overcoats has passed; to-morrow we'll pass up about one-third of the regular price and show you a good one for \$9.95.

There's very little in it for us, and there are many Springs and Autumns to come when you'll still be getting the benefit of this investment.

A SAVING OF \$5.00 ON AN OVERCOAT

150 Men's Spring Weight Overcoats, a clean-up of this season's broken lines, in black and dark Oxford grey cheviot and vicuna cloths, and light and medium grey English tweeds, in fancy stripe and herringbone weave patterns, single-breasted Chesterfield style, tailored in the very best manner, and finished with extra quality linings and trimmings, perfect fitting; sizes 35 to 44. "Close Is My Friend, But Closer Is My Shirt"

This is an old Manx proverb, and has more home truth about it than most.

Let us hope the Manx Shirts are not like their cats, or the Isle of Man must suffer from the cold. We will add a little more wisdom to the proverb to suit the occasion: "Close is my friend, but closer is my shirt, and my undershirt is closer still." You cannot have too many friends, and the same may be said of good underclothes. On Wednesday all our odds and ends of Underwear go on sale at one price .69
