

OPPOSITION TO GOV'T OF LLOYD GEORGE

Asquith and Viscount Grey Lead the Opponents of Coalition Government.

ATTACK METHODS OF LLOYD GEORGE

Declares Transacting of Foreign Affairs by Conference is a Dangerous Procedure.

London, Jan. 23.—The Independent Liberals, at a meeting in Central Hall tonight, definitely placed themselves on record as being opposed to the Government of David Lloyd George.

Mr. Asquith eulogized Viscount Grey as the greatest peace-maker of recent times. "The return of such a man at such a moment as this to our public life," Mr. Asquith declared, "is the restoration to us of a national asset of incalculable value."

Viscount Grey, attacking Mr. Lloyd George's method of transacting foreign affairs by conference, asserted that the Supreme Council of the Allies had destroyed trust and confidence between France and Great Britain, and lately had been fatal to a French Prime Minister.

Mr. Asquith vigorously criticized the Government's policies. He declared, among other things, that the Irish peace should have been arranged two or three years ago. What the country needed almost as much as an administration with settled and coherent principles, was a vigilant and well organized opposition.

Viscount Grey was given an ovation when he said his reason for returning to public life was that he felt it absolutely essential to restore wholesome and straightforward politics in this country by reviving the Liberal party.

All the speakers at the meeting paid tribute to the late Viscount Bryce, whose death was announced Saturday night.

H. H. Asquith referred in bitter terms to some of Premier Lloyd George's allegations to himself and said: "I am sorry for old friends, I am too old to look for anything like gratitude in politics, nor, unhappily is it possible to teach some people good taste or good manners."

Mr. Asquith declared the country needed good Government, not Government by spasms or expedients and experiments.

WORLD'S IRISH PARLEY LACKED DEFINITE PLAN

In Absence of Any Concrete Questions Day Spent in Academic Discussions.

WORLD LEAGUE FOR IRISH CULTURE

De Valera Asks Wealthy Irishmen to Endow Professorships in Irish Universities.

Paris, Jan. 23.—The World Irish Congress, in the absence of any concrete questions on its programme spent the first day's session today in academic discussion of education and the spread of Irish culture abroad. Eamon De Valera, former President of the Dail Eireann, made a brief appearance on the platform this afternoon, taking occasion to invite Irishmen in foreign countries to endow professorships in Irish Universities, and to create scholarships for children of the Irish race to complete their education in Ireland.

The slowness of the Congress to crystallize and get to work on definite plans was explained by its organizers as due to the fact that the meeting was planned before Ireland became a "Free State," so that, naturally, the programme had to be radically altered. The idea of the leaders is to make use of the existing Irish organizations in every country to form a world league through which to work for the spread of Irish culture to all Irish descendants everywhere in Irish history, and help in Ireland's economic interests.

Irish Shine in Athletics Mr. De Valera declared it was also through athletics that the Irish people would be able to make their mark in all corners of the world, since most of the great athletic champions bore Irish names. He recommended that an appeal, also, be made to the highest sentiments by popularizing Irish folk dancing.

W. B. Yeats, the Irish poet, presided at the banquet which followed the address of Mr. De Valera with an address on Irish Literature.

Tomorrow's programme calls for the presentation of concrete suggestions for Irish action abroad.

IRISH GOV'T PURSUED BY CRITICISMS

Irish Ministers Now Installed in Offices in Dublin City Hall.

'IRISH REPUBLIC' HOLDS MANSION HOUSE

Dublin Traders Yesterday Resumed Selling of Belfast Goods Long Under Boycott

Dublin, Jan. 23.—The new Irish ministers are now installed in offices in the City Hall. They are there in the capacity of a Provisional Government, but Mansion House continues the headquarters of the "Irish Republic." Arthur Griffith, President of the Dail Eireann, has his offices there. Although he has no post in the Provisional Government, he is keeping in close touch with all of its activities. He spent some time today in the city.

The new Government is being sharply pursued in the newspapers. The Irish Republic, of which Austin Stack is the principal director and editor, and Liam Mellows and Eirakine Childers are inspiring spirits. In the name of tomorrow, the Irish Republic will discuss the legal position of the new Government, after the handing over of the powers at Dublin Castle. It will argue that, unless the Ministers have been sworn in as Eire Councilors and given the powers provided for in the Home Rule Act of 1920 their whole status is illegal.

Belfast Boycott Off

It has been pretty clearly recognized all along by lawyers that the new Government cannot, during the transition period, depend on technical legal powers, but must depend on the willingness of the people to obey it. It has been suggested that later all its proceedings can be validated in an act of indemnity.

Many Irish traders, today, resumed the selling of Belfast goods which had lain in their stocks since the boycott was imposed. In some cases, however, the Republican police prevented them from selling on the ground that in the past they had sought to evade the prohibition and now must obtain permits.

No Bodies Found In Ruins of Harvard Vimy Apartments

Every Occupant of Ill-Fated Block Accounted for Yesterday.

Montreal, Jan. 23.—No bodies were found today in the ruins of the Harvard and Vimy apartments, Sherbrooke street, west, Notre Dame De Grace, by the brumens at work there. Every occupant of the ill-fated block was located today, except one Canadian, who is thought to be somewhere in the city.

All day today the firemen played water on the smoking ruins and outbursts of flame were quickly subdued. An examination of the ruins showed that the explosion, which wrecked the buildings and spread the flames, had blown to bits the entire three floors of the Harvard apartment block on a width of 30 feet.

An inquest into the two killed firemen was held at the morgue, and a verdict of accidental death was returned. The victims were laid out at the Craig street station, and will remain there until their burial tomorrow morning at St. James Basilica.

The funeral will be a civic one, and the bodies will be taken to the church on a horse wagon drawn by four horses.

BRITISH WANT SQUARE DEAL IN SIBERIA FOR ALL

Adequate Protection for Lives and Interests of People Should be Assured.

JAPANESE GIVE SOME ASSURANCES

Pledges to Withdraw Her Troops When Ordinary Conditions Are Restored.

Washington, Jan. 23.—A sweeping disclaimer of any design against the territorial integrity of Russia, coupled with a pledge to withdraw the Japanese troops stationed in Siberia as soon as orderly conditions are restored, was presented to the Arms Conference Far Eastern Committee, today by the Japanese delegation, and was received with a general show of satisfaction by the representatives of the other principal Powers.

Formal discussion of the Japanese proposal was postponed until tomorrow, but there was no indication tonight that any of the "Big Five" delegations would oppose acceptance of today's declaration at its face value, or seriously dispute the plan of continuing the present Japanese occupation of Siberia. The general view was that the whole Siberian problem touched upon today for the first time would be disposed of on the basis of the Japanese pledges.

France Regularly Outvoted in Allied Supreme Council

Given as Reason Why Poincare Prefers Diplomatic Negotiations to Settle Disputes.

Paris, Jan. 23.—The fact that France has been regularly outvoted in the Allied Supreme Council is discussed in many authoritative quarters here as the real reason why Poincare has shown a preference for old-fashioned diplomatic negotiations. Since these negotiations concern all the allies interested in reparations there is no question of secrecy as is pointed out, Italy as well as Japan, having in the past favored the British viewpoint on questions pending before the Supreme Council, France, in the minority, was either obliged to make concessions or take the responsibility of preventing a unanimous agreement. Suggestive concessions to Germany by the council in the past year, in the way of reductions in payments and modification of terms are pointed to as showing that France may expect from confidence of this kind.

CONCILIATION BOARD ENDS ITS ENQUIRY

Concludes Its Hearings Over Wage Dispute Between Steel Corp'n and Mine Workers.

COMPANY CLAIMS REDUCTION NECESSARY

Miners Hold There Has Not Been Corresponding Cut in Prices of Coal.

HRITAF, N. S., Jan. 23.—The Glen Board of Conciliation, appointed by the Dominion Government to enquire into the dispute between the British Empire Steel Corporation and the United Mine Workers of Nova Scotia, concludes its hearings today, but at the Board has a mass of typewritten material presented by both sides to digest, its report is not likely to be made for a week or more.

At the afternoon session, Daniel Livingstone, District Board member of the United Miners' Union, said that while the Company claimed it was necessary to reduce prices of coal in order to meet competition, a wage reduction of 37 1/2 per cent had only been followed by a cut of five or seven per cent in prices. The Company argued a need of increasing production, but a reduction of wages would mean decreased production, because the vitality of the miners would be decreased.

Where Company Fits D. H. McDougall, vice-president of the company, submitted statistics in support of the contention that the Company could not compete against American coal in the Montreal market if the present wage reduction was not maintained. American companies were offering coal in Montreal at 36 1/2 per cent, after paying customs duties and all costs, he said. Mr. McDougall said the average wage of all classes of employees of the Dominion Coal Company, including boys, was \$1,450 in 1920. Of the lowest paid men—those receiving \$2.44 per day—there were a total of 738, subdivided as follows:—

Under 21 years of age, 335. Over 21 years, unmarried, 241. Married men, 152.

Of the unmarried men, fifty would have difficulty finding employment if the company did not retain them on the payroll.

Quebec Province Has Made Rapid Progress In Past Few Years

PUBLIC TAKING MORE INTEREST IN C. N. R. SYSTEM

This Because the People Realize Property Is Theirs, Says Pres. Hanna.

1921 BEST YEAR IN ROAD'S HISTORY

Finding Markets for Lumber and Railroad Ties in Foreign Countries.

Toronto, Jan. 23.—"We are doing better than six months before on account of people realizing that the property is theirs," asserted D. B. Hanna, president of the Canadian National Railways, in speaking before the members of the Young Men's Club of the Board of Trade, at their weekly meeting tonight. He said that, in spite of increased operating costs in many departments, and that the wages bill for the 50,000 persons employed had mounted, the National Railways were steadily progressing in the right direction.

1921 Banner Year. In the year 1919, said Mr. Hanna, the National Railways made a little money. In 1920 they also made a little money, and in 1921 made a little more. In the latter year the C. N. R. were able also to find markets for \$2,000,000 feet of lumber in the Orient, in China, in New Zealand and in Australia. The C. N. R. were also able, in the year 1921, to sell a considerable amount of railway ties in Egypt and in India.

In comparing increases in earnings, Mr. Hanna said, the C. P. R. had advanced its gross earnings from roughly \$100,000,000 in 1913 to \$20,000,000 a month in 1920. The G. T. R. had earnings of \$30,000,000 in 1913, while in 1920 they were \$80,000,000.

Mr. Hanna pointed out that, in operating a railway line between Sydney and Vancouver, a distance of 3,600 miles, they were operating the longest train route of any line.

INTERMENT OF POPE OCCURS WEDNESDAY

Benedict's Wish Not to be Embalmed Necessitates Burial at Early Date.

CONCLAVE OPENS FEBRUARY 2

American Cardinals Will be Unable to Reach Rome for Opening of Sacred College.

Rome, Jan. 23.—The interment of Benedict XV has been tentatively fixed for Wednesday afternoon. The body will lie in state in the Basilica of St. Peter's only a day and a half more, according to the present plans. Benedict's wish not to be embalmed necessitates departure from the custom that the Pope's body lie in state for three days. Final decision will be taken on this question Wednesday morning, but the present view of the Vatican is that it will be impossible to keep the body exposed beyond Wednesday afternoon.

Old Custom Eliminated. The statement was also made tonight, but not officially, that the coffin would be closed within a few hours and that thus the usual ceremony of worshippers filing past kissing the uncovered foot of the dead Pope, would be eliminated. The removal of the body from the Throne Room to the Basilica this morning was the occasion of an imposing ceremony.

The bier was held shoulder-high by ushers clad in costumes of scarlet, flanked by noble guards. The Sacred College followed, headed by the dean, Cardinal Vannutelli, each taking his position according to his rank. Cardinal Gasparri walked a considerable distance behind the dean, although occupying the post of Camerlingo, or keeper of the Roman church during the interregnum.

On reaching the main door of St. Peter's, the funeral party was received by the clergy of the great basilica, who escorted the cortege down the main central aisle to a position in the center of St. Peter's, where, as the statue of St. Peter, Thiers, abbot solution took place. The bier was then raised aloft and was passed into the chapel of the Holy Sacrament where the public can view the body through the immense iron gates.

Participation of the American Cardinals in the conclave, the date for the opening of which has been definitely fixed for February 2, is still possible, but is regarded as doubtful by the Secretary of State. A cable message has been received from Cardinal O'Connell, of Boston, announcing that he was taking passage for Rome tomorrow while Cardinal Dougherty has cabled that he will not reach Philadelphia before Friday.

Monignor Pizzardo, who is acting Secretary of State, said today that Cardinal O'Connell had a possible chance of reaching Rome in time, providing the conclave does not choose a new Pope on the first ballot, but he thought the Cardinal Dougherty's chances were very slim, unless the session of the conclave was long and arduous and many ballots were required.

Asked concerning the postponement of the Conclave to permit the American Cardinals to attend, the Secretary replied that the constitution would have to be amended for that purpose, as the Conclave must be called within ten days after the death of the Pope.

A Consistory, under the presidency of Cardinal Gasparri, met this evening and decided definitely on February 2. The Secretary responded to set right the erroneous impression to the effect that once the Conclave began its sessions the late Cardinal could enter.

"Cardinals O'Connell and Dougherty may enter the Conclave at any time it is sitting," he said, "and may even participate in the last ballot."

Thus, should the Conclave be extended over several days—and some of them have lasted many weeks—both the United States Cardinals may be present. No Cardinal is permitted to leave the Conclave while it is sitting, but a belated Cardinal is permitted to enter. This is the rule.

"A fast torpedo destroyer might bring Cardinal Dougherty in time to attend," Monignor Pizzardo said half-jokingly.

There seems to be a genuine desire in Vatican circles that the United States be represented it is admitted that the Cardinals in Canada and Brazil will be unable to attend.

The secretaries is flooded with thousands of messages of condolence and sympathy from all corners of the globe, signed by the heads of the greatest states and the humblest parish priest, written practically in all modern languages, and many of them in Latin. There has been much speculation on the probable successor of Benedict, but there is no outstanding figure. The Popolo Romano, however, says that Cardinal Madri, Archbishop of Pisa, is the Government's candidate in consequence of his high patriotism.

NEW ABERDEEN RIOTS SEEM TO HAVE SUBSIDED

Authorities Prepared for Fresh Outbreaks Last Night, But None Occurred.

FURTHER TROUBLES WERE ANTICIPATED

Considerable Feeling in Glace Bay Against Hebrew Elements—Mayor Ready to Act

Sydney, N. S., Jan. 23—All was quiet at New Glasgow, Glace Bay, tonight. This is attributed by the police, partly to the fact that the Dominion Coal Company's store there has been pretty well looted of everything worth carrying off, and partly to misgivings among the rioters following announcement that the ring-leaders will probably be prosecuted for their share of the disturbances of Saturday and Sunday, in which goods valued at about \$80,000, were carried off or destroyed.

Alarming rumors of what might be expected tonight caused the authorities to make extra preparations to cope with the situation, but, happily, the threatened outbreak did not occur.

At the present time there is considerable feeling in Glace Bay against the Hebrew element, which largely controls the retail business of the town, and threats to burn out and loot the Jewish shops were frequent today. Up to midnight the programme had failed to materialize.

Mayor Forbes, of Glace Bay, in a statement today, declared the town did not want to call in outside assistance, but would be compelled to do so if the rioting was not stopped. The Mayor personally undertook to see that any persons actually destitute, who apply to him shall at least receive the necessities of life.

Yeast Best When Ironized

The reason IRONIZED YEAST brings such splendid results is simply this—IRONIZED YEAST stands forth among its kind as the best of yeasts as the purified vitamin tonic treatment. It is scientifically correct in every way, containing in highly concentrated form a specially cultured yeast which is grown under the strictest supervision for medicinal purposes—a yeast which is unequalled for its richness in the essential Water Soluble B vitamins. In addition it contains the correct amount of the two other Water Soluble B vitamins, B1 and B2, which are equally important to health.

WARNING!

Due to the marked superiority of IRONIZED YEAST it is being widely imitated. IRONIZED YEAST is entirely different from ordinary combinations of yeast and iron—or yeast and iron taken separately. Certain types of yeast and iron have absolutely no value medicinally. IRONIZED YEAST, on the other hand, means not only specially cultured yeast and other vitamins, but the special process by which these vitamins are preserved. There is only one IRONIZED YEAST. Insist upon it always—no nothing else can be like it.

A keener appreciation of Canada's poets and writers, was brought home to an audience who had the pleasure of hearing Walter McRae lecture in the Natural History Rooms last evening on "A Night With Canadian Poets," which he delivered under the auspices of the Fundy Chapter of the I. O. D. E.

The regent of the Chapter, Miss Alice Fairweather, presided at the meeting, and in introducing the speaker of the evening, pointed his hearers to an intellectual treat. Mr. McRae fully lived up to the promise, and gave a number of readings from the leading Canadian poets in a sympathetic manner that did not fail to bring home to those present the message each had had intended to convey.

Mr. McRae made an eloquent appeal for the more extensive reading of the works of Canadian writers of poetry and prose, so that Canada's literary riches might be introduced to the country which might enjoy the fruits of their genius.

The atmosphere of the entire evening was essentially Canadian. The meeting was opened with the singing of "O Canada," following which Mr. McRae having been introduced to his audience, spoke of the impetus that had been given to the fostering of Canadian literature by the two weeks' drive instituted by the Canadian Authors' Association last Fall.

Mr. McRae said that it was a matter of much regret that a keener appreciation of Canada's poets, he felt, was not instilled in the Canadian schools. Few of our youth, he said, knew anything of Kirby's Golden Dog, (Le Chien Doré), of Gilbert Parker's works, of Charles G. D. Roberts, Ernest Seton-Thompson, or Agnes Laut, and many other native writers of merit.

As the evening was to be devoted more especially to Canada's poets, he said he would first give some readings from Dr. Drummond's "When Albatrosses," following which Mr. McRae referred to Rupert Brooke's eloquent phrase "And if I die think only this of me, that in a corner of some foreign field there is a dust that is forever England."

In closing the speaker read "The Spire of Oxford," the work of an English writer, a tribute to the gallant students who quit their classrooms and lecture halls and died on the field of honor on the Western front.

Mr. McRae allowed dramatic capabilities full scope. "When Albatrosses" and "The Spire of Oxford" were read with a feeling that was truly inspiring.

At the conclusion of the evening programme a hearty vote of thanks was moved by Miss Dodge and seconded by Miss Sandall, passed by a unanimous vote and extended to the speaker by the regent, Miss Fairweather.

PLAYERS WHO HIT THE CYCLE UNIQUE BATTING PERFORMANCE

That unique batting performance, "Hitting the Cycle," which consists of missing a single, a double, a triple and a home run in a single contest, is coming back into the national game. In the fifteen years from 1882 to 1896, inclusive, twenty-nine instances of hitting the cycle were recorded, slightly less than two per year.

Then for a stretch of twenty seasons not a single batsman in any major league accomplished the feat. But in 1920 George Sisler showed that the thing was not impossible, and then George Burns and Bobby Veach assisted in the revival of the long-neglected performance.

The season of 1921 saw Sisler repeat. Also it saw Bancroft, Bob Meusel and Davy Robertson break into the cycle hall of fame. Sisler's repeat performance makes him one of the exalted notables, for, aside from himself, only three men have been able to hit the cycle more than once, and every one of the three was a very king among hitters. Lewis Roger Brown, otherwise known as Old Pater Jimmy Ryan, who was one of Anson's stars, and Tip O'Neill, star batter of Comiskey's St. Louis Browns when that aggregation was winning four successive pennants in the old American Association.

It is interesting to note that on twenty-one occasions the batter just hit the cycle and no more, that is, he made was of "different" length from every other hit. Four men added an extra double for good measure, and three contributed an extra homer. One added an extra triple, and Larry Twitchell came across with two extra triples, thereby giving himself the greatest total of runs scored by a cycle hitter.

Only six men have ever hit the cycle on four times at bat, and only one, Lave Cross, scored more runs than that in his six runs were scored by two men, long John Reilly and Davy Orr. Sisler, Bancroft and Reilly were the only men to be left on base on every hit except their home run. The only man to score exactly as many runs as times at bat was Treadway, the Brooklyn outfielder.

France's Position At Arms Conference Subject of Address

French Relation to Germany Compared to Situation Existing in 1870.

Montreal, Jan. 23.—Maurice Casanave, Minister Plenipotentiary and chief financial adviser of the French delegation to the Washington Disarmament Conference, this afternoon reviewed France's position at the conference before the Canadian Club in the Ritz-Carlton Hotel, in a manner that clarified the attitude of that country in the Limitation of Armaments discussion.

The position of France in relation to Germany, at the present time, was compared by the speaker to the situation in 1870, when Germany was the victor, "Germany," declared M. Casanave, "has not paid us half of what we, in 1870, had to pay to Germany in one year."

"In order to insure by our own means the protection of our frontiers, and to ensure the fulfillment of obligations which were laid upon us by the virtue of the mandates, or which were imposed upon Germany in our favor, we must have an army."

At the conclusion of the evening programme a hearty vote of thanks was moved by Miss Dodge and seconded by Miss Sandall, passed by a unanimous vote and extended to the speaker by the regent, Miss Fairweather.

Thistles Will Play Moncton

Skips Chosen Last Night to Curl in Railway Town — Presentation by Dr. L. A. Langstroth.

The election of skips for the six teams the Thistle Curling Club will send to Moncton to play the newly organized curling club of that city, on Thursday next, and the selecting of sixteen skips who will form the "general staff" of the array of rinks the Thistles, when they next play the St. Andrews Club when the two curling organizations meet in the second of the inter-club matches of the season, formed a part of the considerable amount of business transacted by the Thistle Curling Club at their weekly meeting last night.

A pleasing incident at last night's meeting was furnished by the presentation of a handsome silver brooch to the club by Dr. L. A. Langstroth, the immediate past president of the club.

The center of the brooch is formed of a Scotch thistle at the foot of which are two crossed brooms. These are encircled by a silver scroll on which is engraved "President of the Thistle Curling Club." The brooch will be worn by the club's president at all future meetings and banquets. A hearty vote of thanks to Dr. Langstroth for the handsome donation, was moved by J. C. Chesley, seconded by W. J. Myles and extended to the donor by President Ritchie.

The Thistles will begin playing tonight for the president's trophies, two rinks will play tonight, and four rinks Wednesday night.

A GREAT MAN FALLEN.
Lord Bryce, whose somewhat sudden death was announced yesterday had been variously described as "the greatest" and "the most versatile" of living Englishmen. In many senses this was no doubt true; for certain it is that as a man of letters and a publicist, he had no equal among his own countrymen, and it may be doubted if any other country could produce his peer.

negotiations that would give Europe peace and security. Four times between December 1914 and March 1918 did he approach the belligerents in an endeavor to obtain from them some basis upon which negotiations for peace might be framed, but none of these overtures bringing any response, the Pope finally suggested to President Wilson that the United States might offer to conciliate the warring nations.

As a statesman and diplomat he was no less a success than he was as a man of letters. He filled at different times, various Cabinet offices, the most important of which was that of Chief Secretary for Ireland, a post for which he was well fitted, as he had always been numbered among the friends of Ireland and a firm believer in Home Rule.

As a traveller he visited most parts of the world and his impressions of the countries and peoples he visited, that he has left in book form, comprise some of the most interesting literature of the present day. Some of these are in the form of letters, some in the form of articles, and some in the form of a diary.

BENEDICT XV.
One must go back far in history for a Pontiff who passed through such tragic times as Benedict XV. He became Pope on September 6, 1914, but a month after the outbreak of the European war. From the beginning he devoted himself to the unflinching efforts for peace which will make his name illustrious even though the forces making for war were too powerful to be controlled and the malady had to run its course.

On the subject of keeping a fire over night is one of having a bed of fuel large enough so that at least the center of it can keep red hot without being chilled by the cold sides of the furnace, or cold ash pit below, says he. True without doubt, but the average householder had already arrived at a similar conclusion. "Too much air fed through the fire would burn up the coal and the fire would not keep," he continues. Perfectly obvious, but the fact butters no parson.

can get on a large amount of coal or even ashes. Ashes may be allowed to accumulate in the grate. The check draft can be opened. No exceptions can be taken to the suggestions, but what weary or soul-sick man or woman responsible for a furnace during trying periods like the present hasn't tried them!

St. John is considerably the poorer through the death of Mrs. J. V. Ellis. Ever to the fore in all movements having as their object the amelioration or improvement in conditions affecting the less well-to-do and the suffering, and in any other cause which had the benefit of the community as its object, Mrs. Ellis was untiring in her efforts, and there are few "well-to-do" institutions in the city and district which are not more or less traceable to her initiation or helpful activities.

WHAT OTHERS SAY
Cabinet Choices Should Not Demand Re-election.
L'Evreumont states that it has often had to combat the policy of the United Farmers, because it judges that party's demands to be taken as a whole, but one thing it professes to admire is the energy with which the Progressives have set to work to bring about a reform in the public interest. This is a demand for an amendment to the law which compels a Minister of the Crown to seek re-election if his constituents are not taken as a whole, but one thing it professes to admire is the energy with which the Progressives have set to work to bring about a reform in the public interest.

Address On Musquash Development

Herbert Phillips Before Rotary Club Pointed Out Possibilities in Way of Providing Cheap Power.

The speaker at the Rotary Club luncheon yesterday was Herbert Phillips, C. E., who delivered an address on the Musquash Hydro development and its possibilities in the way of providing cheap power and light for the citizens of St. John.

Mr. Phillips quoted figures which if they are found correct, prove conclusively that rates for electricity can be cut in two if the city takes over and distributes the current from Musquash itself and does not hand the distribution over to the New Brunswick Power Company or some other private corporation.

The price quoted by the New Brunswick Power Commission to the city is 1.02 cents per K.W.H., at the switchboard in Lancaster. His estimate is that a new distribution system can be built for \$500,000, the interest and sinking fund on which would be in the vicinity of 10 per cent, or an annual charge of \$50,000. To this must be added the expenses of operation and when this is all totalled up Mr. Phillips claims the price for the juice for light should be about 5 cents per K.W.H. and at the outside not over 7 cents per K.W.H.
