STEWART'S Home Made Bread,

THE BREAD MY DADDY LIKES.

Daddy is evidently not one of those back number lords of creation who believes that woman's place is in the home—and only there. His taste in a wife is an up-to-date woman who will prove herself a real companion. He knows that if she is a slave to her kitchen she can't enjoy the poise or have the interest in world affairs that a little extra leisure would make possible; and so he is pleased to eat MRS. STEWART'S HOME MADE BREAD—the loaf with the home made

The smiling, well-nourished kiddie doesn't look as though suffering because mother is progressive enough to buy good bread made by a bread specialist, instead of wearing out her life in the kitchen

Have You a Sacred Goldfish?

If you have, and it is a double-finned one, it should be returned to Japan! Priests from the Far East are searching for these goldfish, for they are sacred to the rites and customs

Nine years ago three of these fish were lent to the Japanese Exhibition at the White City in Lendon. At the close of the exhibition they were sold by an official who was under the impression that they were ordinary goldish. Early this year a pair were seen in a naturalist's shop in London. A orrified Japanese customer, who nolog, communicated the fact to certain eligious authorities in Tokio.

Hence the quest of the priests en ently the three have bred consid rably, for eight double-finned gold-sh have been discovered. Further arch, however, is being made for

Cause of Northern Lights

From many points in Canada and in bulletin of the British Institution of Electrical Engineers.

"Magnetic disturbances and aurora," writes Dr. Chapman, "are produced by the injection into the earth's atmosphere of electric corpuscles projected in confined streams from the disturbed regions of the sun. These streams may be emitted in any direction, so far as we know at present; their existence is made known to terrestrial observers only when a stream is projec ted so that, in the course of the solar rotation, it sweeps over the earth. The streams are often of considerable angular diameter-e. g., 10 degrees or

Priest Declines Banquet While Europe is Starving.

Baltimore-The Rev Charles B Schrantz, president emeritus of St. Charles College, has refused to join in the celebration and banquet in his ordination. He said: "I will not join in any celebration as long as there are starving people in Europe." Because of his attitude, the celebration was abandoned, although the fourteenth who pleaded not guilty priests and bishops were expected from all over the country and 1000 priests who had been under his instruction wished to make a demonstration.

Fr. Schrantz said the times were "too bad and too sad" for the celebration of even a golden jubilee. The money which would be required, he of my dear son, Patrick Walsh, drownployed for the relief of the heart-rending distress of thousands upon thousands of our fellow-men who are literally dying from cold, hunger and

Cooking Eggs by Magic.

Cooking eggs and then returning them to their normal state is a secret trick practised by Indian fakirs. The apparatus consists of a leather boot-tongue and four pieces of string. An egg, after being placed in a sling made from these simple articles, is whisked high above the head and kept whirling at a great speed.

No one can understand how the time required to cook the egg is reckoned, for no clock or watch is used. During the performance, the fakir talks to his admiring audience, and therefore cannot be accused of counting the

Should a customer wish a hardboiled egg to be returned to its soft state, he need only speak. A little more skilful manoeuvring and the egg is as fresh at if it had just been laid!

Spartans Called

"Bricks.

To refer to some one pleased us as a "brick" dates back to very ancient times, and has its origin in a phrase delivered by the King of Sparta and recorded by so famous historian as Plutarch. The Spartans or Lacedaemonians were trained to speak concisely and with a force to every sentence. This became so uniersal that one of our words to-day eaning "such expressed in fev words" was taken from the name of the citizens, to wit: "Laconic," An ambassador from Epirus was being shown over the capital of Sparta by the king himself. Some time prior to this there had been a great argument as to whether Sparta should have walls about its homes and temples, and the project had been frowned upon by the king and his chiefs. "Why are there no walls about the towns of Sparta?" asked one ambassador who had heard of the argument. "Come with me to-morrow and I will show you the walls," said the king. The next day the ambassador was taken to a plain where there were drawn up untold Spartans in battle array. The king waved his hand toward them. "There are the walls of Sparta," he said proudly. "Every man is

> How to Make Pine Cough Syrup at Home equal for prompt results

You know that pine is used in nearly all prescriptions and remedies for coughs. The reason is that pine contains several peculiar elements that have a remarkable effect in soothing and healing the peculiar elements that have a remarkable effect in soothing and healing the membranes of the throat and chest. Pine is famous for this purpose. Pine cough syrups are combinations of pine and syrup. The "syrup" part is usually plain sugar syrup.

To make the best pine cough remedy that money can buy put 23/2, ounces of Pinex in a 16-02-bottle, and fill up with home-made sugar syrup. Or you can use clarified molasses, honey, or corn syrup, instead of sugar syrup. Either way, you make 16 ounces—more than you can buy ready-made for \$2.50. It is pure good and very pleasant—children take it eagerly.

You can feel this take hold of a cough or cold in a way that means business. The cough may be dry, hoarse and tight, or may be persistently loose from the formation of phlegm. The cause is the same—inflamed membranes—and this Pinex and Syrup combination will stop it—usually in 24 hours or less. Splendid, too, for bronchial asthma, hoarseness, or any ordinary throat ailment.

foot from the ceiling, thus permitting the heat from the new stove placed in the outer room to pervade both compartments. Lavatories will shortly be placed in these dressing rooms, and low lockers, which may also be used as seats, will be arranged around the walls. Several new lights have now been added which will help conside ably towards improving the hockey games, as they will be a great convenience to the players. One in par ticular, has been placed over the cen tre of the arena so that there will be no difficulty in seeing the puck when centred. The lighting over the western goal has also been greatly im proved. In all, over 2,000 candle power has been added to the illumination of the rink.

The penalty box will in future b separated from the players' box. The existing boxes, one on each side, will be used by the spares, whilst another box will be made for the time-keepers and those who are penalized during the game. New nets have now been fitted on the goal posts. These nets are the work of ex-Naval Reservist Jack Kennealy, who is now the ice man at the rink. Quite a lot of trou ble was caused last year by defective nets and it is a great satisfaction to know that it will not occur again Yesterday there were eight inches of ice on the rink which is as much as has ever been on it during the hard-

G. W. V. A. Dance.

Preliminary Meeting Held Yesterday. The committee which is arranging the G.W.V.A. Dance, set for February 2nd, met yesterday in the Club Rooms where the preliminary meeting was held. The following ladies, besides various officers of the Association, were present: Mrs. John Browning, Mrs. McKeen, Miss May Furlong and Mrs. Harold Ayre. Particulars of the general scheme which was outlined at yesterday's meeting will be published later. That the dance will be successful cannot for a moment be doubted when it is being organized by a committee of such well known capables in this direction. The dance is in aid of G.W.V.A. funds, and all dancing enthusiasts should make an effort to attend.

Price of Coal Lowered.

We hear that to-day the city cos ealers will reduce the price of that useful commodity to \$20.00 per ton, a decrease of \$1.00 per ton on the provailing price. It has been said the the reduction in freight rates on coa was \$2.00 per ton, whereas it is really only \$1.50 and as an offset to this, cost of the coal at the pit-head has been increased. Nearly two-thirds of the winter's supply of coal was brought in here at the old freight
