**Government Up Against Pretty Proposition—No Supplies Until Debate Ends and 40 Good Men Are Ready to Prolong Agony for Many a Moon Yet.**  
Ottawa, April 11.—(Special.)—The situation in the commons to-day was not exciting on the surface, but things were working underneath. It was quite a day for shaping up of the works. Some things are now evident, notably this first of all, that a well-organized movement is in sight to obstruct the school coercion clauses of the bill. The bill cannot possibly get its second reading for another month. There are only six more days until the Easter adjournment, and there are forty or forty more men ready to go into committee on the bill for a week-at-a-time session, for months if it need be. There is an anxiety on the part of the government to get their supplies thru, but there is no prospect of this for many weeks, and there will not be as long as the coercive clauses are before the house. Since the protests are coming in from Ontario and western Liberals against the Quebec Liberals forcing them up against their ever-widening destruction. For instance, why should Mr. Fitzpatrick and Mr. Bonanza move the Campbell, the Mulocks and the Hyman to the immediate closing of their careers?

You would think from the tone of a couple of the speeches this afternoon that Mr. Fitzpatrick had made the balls that were fired, one from one side and one from the other side of the house, in the air over an assembly of the government coming to the idea that there are only two ways out of the situation. First, to read it to the courts for an interpretation of the constitutional duty of parliament in the case; second, to ask the Conservatives for a conference. Outside of this nothing but vigorous obstruction is in sight with a series of roving meetings in Ontario and the west addressed by the men of the house who are actively fighting the coercion clauses in regard to schools.

The situation in Edmonton, where Frank Oliver has gone for re-election counts for little. It is an appeal to the foreign element. Mr. Bonanza has settled a question of burning interest to the Canadian people of the territories, Manitoba and Saskatchewan. Mr. Fitzpatrick and Mr. Bonanza are not to be allowed to do the voting for the east. Mr. Wilford is revising his war maps and his tactics, for a change in his campaign.

**THE RACE AND RELIGION  
OF OLIVER'S CONSTITUENTS**  
70 Per Cent. of Population R. C. and Greek Church—Sample Polling Divisions.

Ottawa, April 11.—(Special.)—A careful estimate of the race and religious composition of Hon. Frank Oliver's present constituency, as it existed in the census returns of 1901, shows as follows:  
Nationality. Number.  
English. 1,800  
Irish. 1,600  
Scottish. 1,600  
French. 1,800  
German. 1,800  
Scandinavian. 1,800  
Russian. 4,400  
Hungarian. 3,300  
Half-bred. 3,300

In religion they show up:  
Roman Catholic. 8,100  
Greek Church. 4,300  
The Roman Catholic and Greek Church make up about 70 per cent. of the total population. The other 30 per cent. is made up of about one-third each of English Church, Presbyterians and Methodists.

There are three polling subdivisions in detail:  
Lac Stanne, 3 English, 4 Irish, 15 Scotch, 7 French, 323 half-bred.  
Brudenell, 13 English, 36 Irish, 23 Scotch, 209 French, 323 Russian, 7 Albanian, 11 English, 3 Irish, 16 Scotch, 2 French, 1 German, 1 Russian, 234 half-bred.

**PERHAPS NEW DEPARTMENT**  
Department of Health and Labor  
Would Suit Him About Right, 'Tis Said.

In connection with the statement of the premier the other day that he had not thought of creating a new department of health and labor a member of the legislature in close touch with the premier said last night that he had no doubt that such a department would be created within the next couple of years. The growth of the province and the importance of instituting a strict supervision of the immigrants from foreign countries pouring into the territory of the province, as well as the increasing importance of the institutions devoted to the care of the unfortunate, would render a re-arrangement of the departments absolutely necessary. There is no department of health, hospitals, jails, and asylums, and the immigration has turned this way there will be more reason than ever to expect the government to create a new department of health and labor.

**Lord Balfour of Burleigh Declares Approval of Country is Wanted Before Negotiating With Colonies.**

(Canadian Associated Press Cable.)  
London, April 11.—A debate of considerable importance took place to-day in the house of lords on the proposed colonial conference. Lord Balfour of Burleigh moved that before the conference is asked to determine on the desirability of such a conference they should be informed under what conditions the conference will be summoned, what colonies and dependencies will be invited to send representatives and how far any decision arrived at will be binding upon the government of the United Kingdom. Lord Balfour reminded the house that Mr. Chamberlain, in 1902, said nothing could be a greater misfortune than that any decision come to by the conference should be afterwards rejected on submission to the country. As he understood it, the government had barred the possibility of any preference on the part of the colonies. Lord Balfour wished to ask another question—What guarantee this country would have that the colonies would come to a free, unfettered conference? The colonies were protectionist, they would have to be protected from the idea that their general system of protection should not be interfered with. He saw no reason why Great Britain should not enter into the conference with the same understanding regarding their system of free trade.

**'That Surplus' Whitties  
Col. Matheson Makes Good**  
Deducting Extraordinary Revenue From Timber Sales There is Really a Deficit.

'Frenzied Finance' as adopted by the late administration was revealed in all its native ugliness by the new provincial treasurer yesterday when he gave the local houses a description of the financial condition of the province. The gallant colonel spoke for two hours and twenty minutes. It was another man's bookkeeping he was passing under review, and he was on the offensive to defend and there will be another time to his voice.

Whether there is a surplus or a deficit depends upon the point of view. Col. Matheson caused the vaulted 'surplus' of the former treasurer to disappear like snow under a spring thaw. Col. Matheson takes the bonus from timber sales from current revenue and as the sales of pine timber during the last couple of years have been unprecedentedly large, to withdraw them from current receipts creates a big deficiency. In this manner the expenditures are shown to be largely in excess of the revenue. According to the Conservative theory of safe financing it would be necessary to dispose of vast areas of timber yearly to provide the province with steady income from this source. But in disposing of this wealth the province becomes poorer in natural resources.

SEE THAT SIGN?

IT swings from over our shop now! It means more comfort for you, better shoes, surer value, safer buying.

It is the symbol of the "Slater Shoe," and a duplicate of the trade-mark on the lining of each pair, where the Makers' price is also branded. "The Slater Shoe" is the only Canadian shoe made in a factory which makes no other grade, price, nor kind. It is the result of specialism, of making but one thing at its very best, and at its lowest possible cost, quality considered.

This means selecting leathers, months ahead, so as to be sure of uniformly good grade. It means hiring, and keeping, the best shoe workmen in the market, because, only a very good workman is quick enough on such critical work to get profitable results for us out of using our costly machinery.

It means charging against the salary of each workman any pair of shoes he makes which is not up to Inspectors' standard, so as to maintain uniform quality.

Then, the Makers' own price being stamped, with his trade-mark, on the lining of each shoe puts responsibility for the hidden wear, and comfort, directly upon the shoulders of the manufacturer.

When a genuine "Slater Shoe" goes wrong, you know that the Makers stand ready to make it good, up to the price they themselves valued it at.

Isn't this shoe-insurance of a tangible kind? There isn't a shoe on this market with so much style combined with so much wear, comfort and fit, as the "Slater Shoe," which is stamped on the lining with the Makers' price, viz. \$3.50 or \$5.00. We want you to come in and see our new stock of "The Slater Shoe," and let us prove this statement.

Alternating Current Generators from 30 K. W. to 10,000 K. W., designed for one, two, three or multi phase; wound for any pressure up to 12,000 volts, operating at speeds from 90 to 1,500 R.P.M.

Direct Current Generators from 1 K. W. to 500 K. W. compound or shunt wound, for any pressure up to 600 volts, designed for any service.

Railway Generators from 100 K. W. to 2,000 K. W. operating at speeds from 90 to 600 R.P.M. Rotary Transformers to suit all conditions of railway and electrolytic work.

## MOTORS

Alternating Current Motors from 1-8 H.P. to 1,000 H.P., designed for one, two or three phase, 25 or 60 cycles, from 110 to 4,400 volts. Powerful when starting and of high efficiency.

Direct Current Motors from 1-4 H.P. to 800 H.P.; shunt series or compound wound, slow and moderate speed, designed for any service. Hoists. Motors, etc.

Railway and Crane Motors of all speeds and capacities. Series-parallel Controllers and Sprague Multiple Control System for Interurban roads.

## LAMPS

Enclosed Arc Lamps for Series Street Lighting.

Enclosed Arc Lamps for Interior Lighting.

Meridian Lamps for Office and Factory Lighting.

Searchlights for Steamers and Yachts.

Incandescent Lamps of all candle powers and voltages for interior lighting, sign and decorative work.

## TURBINES

Curtis Steam Turbines are built in conjunction with Direct Current Generators in sizes from 15 K. W. to 500 K. W. Alternating Current from 500 K. W. to 5000 K. W. They possess high steam and electrical economy under all conditions of load, and occupy very little floor space per K. W. capacity, reducing to a minimum the cost of real estate and buildings.

## STORAGE BATTERIES

Some of the results which may be achieved by using Storage Batteries are:—

Shorter hours of operation, Relief of peak loads, Regulation of extreme fluctuations of load. Also Lighting Country Houses, Railroad Trains, Yachts, Carriages, Operating Electric Vehicles, Launches, Phonographs, Dental Machinery, etc. Railroad Switch and Signal Apparatus, Telephone, Telegraph, Fire Alarm Service, etc.

A 2,400 Horse Power Battery is now in use by the Toronto Railway Company.

## WIRE

Insulated wire of every description.

Rubber covered wire and cable for house wiring and installation of generators and switchboards.

Weatherproof wire for outside construction.

Aerial and Underground Cables.

Silk and cotton covered Flexible Cord for drop lights and fixtures.

Fixture Cord, Annunciator Wire, Bell Wire, Cotton Covered Magnet Wire, Silk Covered Magnet Wire, etc.

## SWITCHBOARDS

High Potential Switchboards, with specially designed switches and instruments to suit modern requirements.

Switchboards for all services, Exciters, Direct and Alternating Current Generators, Transformers, Lightning Arresters, Railway Generators and Feeder Panels, Storage Batteries, Motor-Generator Sets, Rotary Converters, etc., etc.

## TRANSFORMERS

Lighting Transformers from 1/2 K. W. to 50 K. W., 60 and 125 cycles, oil insulated.

Transmission Transformers from 50 K. W. to 5,000 K. W., 25 and 60 cycles, for any pressure up to 60,000 volts, oil insulated, water cooled or air cooled.

Step-up and Step-down Transformers designed and installed complete, including Switchboards, Air Cooling Apparatus, Water Circulating Devices, Lightning Protection, etc., etc.

Self-regulating Transformers for series street lighting circuits.

## SUPPLIES

Meters and Measuring Instruments, Railway Line Material, Rail Bonds, Track Cleaning Devices, Heating and Cooking Apparatus, Fan Motors, Panel Boards, Enclosed Fuses, Cutouts, Rosettes, Knife Switches, Snap Switches.

Sockets and Receptacles, Brackets and Fixtures, Street Fixtures, Shades and Reflectors, Cleats, Porcelain Knobs.

Tubes, Glass Insulators, Annunciators, Bells, Batteries, Push Buttons and General Electric Wiring and Bell Supplies.

## BOILERS

Horizontal return tubular boilers, vertical boilers, locomotive boilers, marine boilers, riveted steel plate work of every description, smokestacks, stand pipes, elevated tanks, flanged heads, domes, manholes, etc., formed in hydraulic presses of special construction and large capacity.

## PUMPS

Direct Acting, Single or Duplex Steam Pumps. Power Pumps, single, duplex or triplex, belt or motor driven.

Single or Multiple Stage, Turbine Power Pumps for any pressure. Centrifugal Pumps, Compound, direct-acting steam pumps, high duty pumps, crank and fly-wheel type, horizontal or vertical. Condensing apparatus for stationary or marine work. Combined air pumps and jet condensers. Surface Condensers.

Edwards' Patent Air Pumps for high vacuum. Pumps for all duties—waterworks, mines, tanneries, fire protection, paper mills, boiler feeding, distilleries, etc.

## STRUCTURAL STEEL

Steel work constructed of any size or design for

Office buildings, warehouses, factories, stores, public halls, railway stations and sheds, round houses, skating rinks, exhibition buildings, etc.

Standard shapes, such as beams, plates, tees, angles, channels, always in stock.

## LOCOMOTIVES

Steam locomotives for express, freight, yard or contractor's use.

Steam shovels, wrecking cranes and railway pile drivers.

Trucks for electric passenger or freight cars.

Marine engines, simple, compound or triple expansion to suit any condition.

## COMPRESSORS

Air compressors for all duties, straight line and duplex types.

Self-contained, self-oiling, simple, cross compound, steam and air, or tandem compound, belted or motor driven.

Christensen air brake equipments for electric and steam railroad service.

## BRIDGES

RAILROAD AND HIGHWAY BRIDGES.

Plate and lattice girders, cantilevers, viaducts, swing spans.

Roof trusses, tank trestles, travelling cranes and gantries.

Steel towers for electric transmission lines.

## PIPE

Cast iron pipe for water and gas.

Elbows, tees and other special castings, valves, flexible joints, valve boxes, drinking fountains, water troughs, hydrants, indicator posts, manhole frames and covers.

Riveted steel pipe for water supply under heavy pressure, steel flumes, penstocks, etc.

## SCREWS AND NUTS

Milled screws and bolts of every kind.

Set screws, cap screws, compiling bolts, boiler patch bolts, planer bolts.

Special-milled work of every description made to sample or drawing.

Square or hexagon cold pressed nuts, rough, semi-finished, finished, case-hardened.

## ORNAMENTAL IRON WORK

Wrought iron fences of all kinds.

Entrance gates, bank railing, office, window, and door grille and railing, elevator cars and enclosures, iron stairs, spiral stairways, fire escapes.

"THAT SURPLUS" VANISHES

Continued From Page 1.

At the present time there are 147 estates not dealt with and about 100 estates are over \$100,000 in arrears. Speaking of the good roads appropriation, Col. Matheson said this government was pledged to carry out the promise of the late government.

The present arrangement between the province and the university was unsatisfactory in this respect, that the province must pay the deficit of the university whatever it may be. Our payments to the university were first \$700,000 annually; then they were given several townships in Northern Ontario from the sales of which they received \$1547.

It was proposed by the university that the government set aside a source of revenue of the province for the benefit of the university, and the treasurer said he believed that this would be preferable to the scheme under which they were working.

With Lavish Hand. He showed the lavish hand of the late government in the expenditures of the past year and of the pledging of the province to the railway.

and surely Ontario had a just claim for a subsidy, since the main object of the Temiskaming extension is to connect with the Grand Trunk Pacific.

The excess of receipts on account of the pine timber sale was \$184,000, this being on capital account. The excess of revenue over estimate on ordinary receipts was, on Crown lands, \$19,000; provincial secretary, \$14,662.50; good roads, \$91,375.41; Trinity memorial building, \$12,022.92; Kingston Training School building, \$72,408.83; ordinary revenue, \$4,433,419.16.

Receipts for 1905. Here is a statement of the estimated receipts for 1905 including cash balances on hand Dec. 31, 1904.

framed to pass the order. In order to save money, they were introducing a new system of accounting. The nature of which would be the presence of a check upon all expenditures, such as was used in all large concerns in the United States.

Only \$10,000 for pulp concessions last year? Mr. Matheson's observation, as he proceeded to read into the policy of the Ross administration regarding the handling of the timber lands, he had great faith in Northern Ontario, but it would take money to develop it.

ROUTINE IN LEGISLATURE. Bills Read a First Time and Reports of Committees Received.

The following bills were read a first time: Mr. Smyth—To incorporate the Lake Superior, Long Lake and Albany River Railway Co. Mr. Downey—To amend the Consolidated Municipal Act.

At the private bills committee meeting the application of William E. Foster, Esq., for a license to practice as a lawyer, was considered.

Two Few Births. The 34th annual report of the registrar-general gives an interesting statement regarding the births, marriages and deaths of Ontario in 1903.

Questionable Debitments. Referring to the various debitments issued by municipalities, Mr. Matheson alluded to certain ones alleged to have been issued by Russell County.

Not a word was said in the house, Col. Matheson continued, against the bonus to the Quebec government road.

**On the early decline the shorts covered freely and on the advance, the shorts advanced and all the close they were long of wheat.**

July and Sept. wheat are very nervous in view of the premium for May wheat, and on any signs of a stiff bid in the wheat the shorts run in the most approved manner.

July wheat has had a big decline and it looks as if the market had turned at last and we would get a good rally.

Corn—There was only a fair trade in corn today and the market was firm in sympathy with wheat. The bull party has the situation in the palm of their hands and can put the price very much higher if they want to, but they show a disposition to sell on bulges.

If wheat should have a good advance corn will sympathize to a certain extent. There were more active today, but there seemed to be a tendency toward lower prices than the day before. The heavy trading made during the past few days being the most active trading among local traders. Many theories are advanced as to its passing, but the general inclination is to keep out of the market until the same has been eliminated as a factor. There was a very weak undertone to the market all day and also there was a little show of strength around 3c for July for a time. It finally accumulated to the feeling, led by a few local speculators. Estimates for the day were about as expected, hence exerted but little influence. Most of the selling has been induced for some time by the anticipated enormous growing crop, and after today's government report is received there will be probably considerable covering of short wheat, which should cause some recovery from lower prices. For a long pull under present outlook, the value of wheat should realize a good profit.

## RIDER HAGGARD COMING ON TOUR OF INSPECTION

Noted Novelist Visits Salvation Army Colonies on Behalf of British Government.

H. Rider Haggard, the novelist, is expected in the city to-day. He is traveling in company with Commissioner Booth-Tucker of the Salvation Army, who, until a year ago, was head of the department which organized large colonies in Colorado, Ohio, California, as well as several lesser ones. On his return to England last year, he reported to the British government the nature of the work the Salvation Army was doing in colonization affairs, and the success attending the British and German governments have found it almost impossible to colonize their South African possessions, and Mr. Haggard, who has seen much of South African life, and is conversant with the United States, was requested by the British government to inspect the Salvation Army colonies in the United States, and report upon it, with a view to adopting a similar system for colonizing South Africa, if considered feasible.

It is not known whether Mr. Haggard and the commissioner will visit Manitoba and the Northwest and report on the colonization of that territory. They will wait upon the Dominion government at Ottawa, and visit the parliament in Ottawa, to learn something of the colonization plans adopted for peopling New Ontario.

Colonies From a City Poor.

In the United States, the colonies are composed of people sent out from the cities after they have been examined, and their fitness proved. They are mostly men who are not skilled in any particular branch of labor, and who, finding no work to do, become a charge on the community. These people are sent out to a colony, given several acres of land, allotted a cow or two, poultry, implements, and every assistance. They then repay the advances made in instalments, and they are able. This scheme has been found very successful, and many persons have been sent out to various livelihood, who, otherwise, would have been a charge on the community. For the Booth-Tucker, who is in charge of the scheme, the Salvation Army received medals and honorable mention at the Paris Exposition and St. Louis World's Fair.

Another system adopted in the States is that of training the young in manual labor and technically educating them in other branches. In England, the Mansion House fund has been diverted to some extent in preparation for colonization. The Haggard farm, not far from London, consists of several hundreds of acres. The farm is taken from the city to this farm, while their families are cared for by the army. The man is sent to a colony, and their passage prepaid for them.

In the United States, the army has a local system for relieving the cities. The army is sent to the cities to advise a year's work with some farmer before taking advantage of the army. The man is sent to a colony, and their passage prepaid for them.

## FOR CONSUMPTIVE HOSPITAL

Councils to Unite in Establishing a Free Sanatorium.

Galt, April 11.—(Special.)—The Councils of Waterloo, Brant, Wellington, Perth and Oxford have in view the establishment jointly of an hospital for incurable consumptives. In October last a meeting was held at which were taken to bring the project formally to an issue. Today the following municipalities expressed their interest: Dr. Radford, county councillor, Waterloo County; John Weir, county councillor, Great Ontario; James McEwen, warden Wellington County; A. McPherson, county councillor, Wellington County; P. H. Stewart, county councillor, Perth County. The County of Oxford is understood to be in sympathy with the project. The project is to be a joint hospital for the care of indigent victims. The undertaking is to be a joint hospital for the care of indigent victims. ## TO LEARN RAILROADING

Detroit, April 11.—The Duke of Manchester, who was in this city today with the duchess, his father-in-law, Eugene Zimmerman, and others of his wife's family, announced that he would take up railroading at an early day and would probably make Detroit his headquarters for some time.

"Unless present plans are changed," said the duke, "I shall become identified with the Great Central. I shall probably spend a year or two in the operating department under Mr. Hartling, and it is very likely that my headquarters will be in Detroit."

"The duchess and myself are now on our way home, where I am going to arrange my affairs so that I can absent myself for an indefinite period if necessary. It is necessary to have your name in order, you know."

## APPENDICITIS VICTIMS, READ.

Johnstown, N.Y., April 11.—Two of the sons of Pierre LaCombe, 52 years old, an old French-Canadian, Tupper Lake guide, recently took him to the Clayton Hospital while he was suffering from appendicitis, which necessitated an immediate operation.

At noon the operation was performed and the sons were making arrangements for the burial of the old man. At 5 p.m. the old man sat up in bed, called for his trousers, took therefrom a plug of tobacco, cut from it a liberal slice and put it in his mouth.

The old fellow went home, and Saturday, five days from the time the operation, he was out of doors walking wood.

## Buyers Farm for Resemblance.

New York, April 11.—That she might acquire property which held a scene resembling one in "The Minister," Maude Adams has purchased a farm at Lake Ronkonkoma, near her country estate.

When Miss Adams strolled thru the farm of Mr. Smith, adjoining her own at Ronkonkoma, she became impressed with a picturesque sketch of woodland that seemed like a scene depicted by Barrie.

## Killed by a Train.

Waterford, April 11.—The dead body of C. E. Leach was found along the Michigan Central tracks at an early hour this morning. He was 45 years of age.

## ONTARIO RAILWAY BOARD TO CHECK ELECTRIC RYS.

Ald. Church Proposes Needed Extension of Power of Present Provincial Committee.

At present there is a sub-committee of the Ontario cabinet on railway matters. Ald. Church would extend the jurisdiction and powers of this committee and make it in power to check the board of railway commissioners who have jurisdiction over street railways.

At present the Ontario legislature is the creator of these electric railways in Ontario, says the alderman, and there is nobody to see that they go on with their charter. The body that creates these companies is the Ontario legislature. Ald. Church proposes that the power of the provincial railway board be increased, and a summary procedure be provided so that when there is a dispute, such as an extension or stopping places, equipment, fenders or brakes for example, the railway can be brought up in a summary procedure before the board.

The alderman will move in council for a committee to be appointed by the courts give little relief in the public is seriously inconvenienced and a lot of paper charters granted to electric railway companies for speculation purposes and thus be wiped out and the city's question of a radial railway settled with despatch.

## SMALLEST DOG IN WORLD IS LOST IN NEW YORK.

New York, April 11.—Have you seen Pinky? He isn't much to see because he is only eight inches high, nine inches long and three inches broad, but he is worth seeing and keeping, too, according to Mrs. S. Deibel, who lives in the Ansonia Apartment Hotel, has lost Pinky and her heart is sore distressed because he is not only the smallest dog in the world, she says, but one of the best belonging to a distinguished family known as "Monkey Griffons."

Pinky wandered away from home the other day while out for an airing with Mrs. Deibel's maid.

## SAT IN ROCKING CHAIR AND INHALED COAL GAS.

Thorold, April 11.—Richard Williams, an old resident of Thorold, committed suicide last night by inhaling coal gas. He set fire to the coal in an iron pot which he had suspended from the ceiling. When found he was sitting in a rocking chair near the pot.

He left two letters addressed to friends in town.

## STRATHCONA LEAVES.

Montreal, April 11.—Lord Strathcona left this evening for New York, whence he will sail for England tomorrow to again take up his position as Canadian high commissioner.

## Bible Class Banquet.

The annual supper given by the members of some ten Bible classes was held in the Central Y.M.C.A. last night. About 60 or 70 sat down, and it was a great success. Professor Tracy of Toronto University gave an address, encouraging the students to a faithful and careful study of the greatest book of books—the Bible. He hoped that the study would go on increasingly, so that the great aim would be achieved, the personality of the Lord and Saviour personified in men. The rest of the evening was given to a conference as to the best ways and means for promoting next year's work.

# SIMPSON'S WALL PAPER COMPANY, LIMITED

H. H. FUDGER, President. J. WOOD, Secretary. Store Closes Daily at 5.30. Wednesday, April 12.

## Simpson's Wall Paper Opening

An Invitation to Lovers of Industrial Design and to all those who confess to an interest in Wall Paper.

Thursday we hold our Spring Demonstration of the new Wall Papers. On Thursday you are invited to witness what the world has produced in Wall Paper. For no less than six great countries have contributed to the exhibition—France, Germany, England, the United States, our own Dominion of Canada and Japan—last but not least. That it is the product of six different industrial and artistic countries forms in itself no criterion as to the merit of the exhibition. That decision rests upon the question of taste almost wholly in the case of Wall Papers. We will guarantee the superiority of technical and mechanical details, but we will not presume to dictate as to the great point of beauty. That point we are anxious that you will come and decide. We have our own opinion, and we hold it to strongly. But we'll not express it until you have passed upon the matter formally at our opening to-morrow.

Now a word or two to satisfy you that you have a morning brimful of interest before you. The prevailing tones of the newest papers appear to be reds, greens and browns. England sends us a large number of characteristically beautiful, if conventional, designs in cheerful pinks and reds. Two-toned effects are largely used in the English papers. The French designs are bold, strong, art nouveau or else revivals of the royal days in France. Then again you may choose delicate, almost tender effects in the French papers for bedrooms and boudoirs.

The German designs are mostly of the new school of design which has arisen in Europe, the effects of which America is now feeling so forcibly. Very beautiful they are, too, though, as a rule, one must have a sure taste and a degree of the courage of conviction in making use of the more extreme designs.

The United States and Canada reproduce some of the best effects in domestic papers, combining colors and designs to suit tastes of the people on this continent.

Japan excels all other countries upon the richness of design and color in her wall covers, the famous Japanese leathers being well represented in this display. Japanese wood fibre, or veneer, a newer development, is here also.

In summing up we find we have a larger stock, a newer stock (almost all our last season's papers are cleared out) and a more varied stock than ever before. If you will pay the department a visit to-morrow we are sure we can interest—nay, delight you.

## Spring Overcoats for Smartly Dressed Men

Men about town like these Topper Coats of ours. There's a certain jaunty, stalwart air about them that a man finds captivating. And the other sex probably admire them for the same reason.

The point in particular to-day, however, is the underpriced part of it. We fell heir to this lot of 75, together with 100 or so that we told you of before. An Eastern manufacturer turned them over to a lump sum for his own reasons and for your benefit.

75 Men's Lightweight Spring Overcoats, topper and full back Chesterfield styles, made from covert cloth, whipcords, chevots and vicunas, assorted shades of light and dark fawn and olive, also plain black and fancy mixed stripe effects, made up in the latest style; most of these are sample garments, well tailored and finished with fine linings and trimmings, sizes 34-44, regular \$10, \$15 and \$15, while they last. **6.95**

See Yonge-street Window.

## Soft Shirts at 98c

You'll need new shirts soon. Why not buy one or two from this lot? There are shirts up to \$1.50 in the collection. Ninety-eight cents is not any evidence of their quality at all. It's a proof of a little Simpson success in buying, that's all.

Pretty shirts, in neat, gentlemanly patterns. See them in the Men's Store.

500 Men's Soft Bosom Neglige Shirts, fancy colors, new spring goods; in the collection are plain white striped and mercerized bosoms, fancy blues, tans and greys, with neat stripes and figures, black and white and blue and white figures, sizes 14 to 17. **.98**

Thursday . . . . .

We have received a shipment of extra large Shirts, fancy colored neglige soft bosoms, made by Williams, Green & Rome, sizes 17 to 19, \$1.00 and . . . . . **1.25**

## Christy's Hats at Simpson's

We sell Christy's famous hats in the Men's Store. That's a hint worth money to a man who has an Easter hat to buy.
