

MURDERS HIS OWN FATHER AND 3 MORE

Then Insane Nova Scotian Took His Own Life After Dispute Over Mill Dam.

MURDERER KNOWN TO BE UNBALANCED

One Man Slain as Wife Pleaded for His Life—Babes Left Orphans by Tragedy.

Halifax, Sept. 19.—In a fit of demented rage resulting from a long standing dispute as to the location of a mill dam on or near his father's property at Hamford, Lunenburg Co., Havelock Veniot, this morning at that place shot and killed four men, including his father, and one woman and then suicided. The victims of the tragedy are Mr. and Mrs. Archibald Ritchie and Abner Snyder.

William Veniot, father of the murderer, was attacked, but was not mortally wounded and tried to give warning to the others. He failed to get warning or protection to them in time and the son having killed the Ritchies, at their home and Snyder at his, returned to his father's house, shot his father dead, an then went out into the barn and put a bullet through his own head.

Was Mentally Unbalanced

The villagers of Hamford for some time had considered Havelock Veniot as mentally unbalanced. He had on several occasions, in connection with the dispute over the mill dam site, threatened the lives of the three men whose dead today, but his threats were never taken seriously. The Veniot, Ritchie and Snyder families lived within a short distance of one another on the West River. Some time ago Snyder and Ritchie wished to build the dam and asked the older Veniot to agree thereto. He refused but a month ago reconsidered and signed the agreement. His son, who had been opposed to the plan from the first, became enraged and quarrelled repeatedly with him.

Argument Over Mill Dam

Veniot was unmarried and lived with his parents, and at their home last night the argument was revived between father and son. This morning, after the family had risen it was resumed with great heat. The father flatly refused to break the contract, whereupon his son secured his rifle and in a frenzy of passion shot his father in the stomach. He then left the house, threatening to kill the other two men. Fearing for the lives of his neighbors, the elder Veniot, though seriously wounded, made his way to the nearest telephone and gave the alarm. Meanwhile the murderer went to the Ritchie home, forced his way into a bedroom and shot Ritchie and his wife, both in the head. Leaving the two dying he ran to the Snyder and Veniot shot him as soon as he home. Snyder answered his summons opened the door. Snyder stumbled back to his bedroom, followed by the murderer, who shot Snyder again, his fourth victim, almost immediately in the arms of his wife, who had pleaded with Veniot for mercy for her husband.

Killed His Father

Making his way back to his home, he found his wounded father returned from his painful trip on a stretcher to bed. He sent a bullet through his father's heart. He said a few words to his mother and then went to the barn, putting a bullet through his head.

DESCHANEL MUCH BETTER IS REPORT

Ex-President of France Improves Rapidly Since Quitting His Office.

Paris, Sept. 19.—Great improvement in the condition of President Deschanel has been observed since he has definitely tendered his resignation instead of being nervous and feverish, seeking relief in long walks and refusing to talk with his family, he is calm and takes pleasure in conversations with those about him. He works without fatigue for a long time in his study yesterday.

BOMB GANG BUSY IN GENOA SEEKING TO BLOW UP HOTELS

Attempt Was Made to Blow up the Stock Exchange—Bombs in Hotels Too.

Genoa, Sept. 19.—Police officials have ascertained the bomb which exploded in the Stock Exchange here on Friday had been made recently and for this reason there is some suspicion that it was turned off by a plant occupied by workmen. Attempts have been made to blow up several fashionable hotels, one of which was located near the Stock Exchange building. Six Hungarians have been arrested in connection with the plot.

Women Suicides On The Increase

In America One to Every Two Men Takes Her Own Life—Strain Responsible.

London, Sept. 19.—News from America of the increase of suicide among women has aroused much interest here. From the recently published statistics of suicides in America, it appears that during last year more women took their own lives than ever before. The ratio now stands at one woman suicide to every two men, instead of one to three as in the previous year.

SINN FEINERS TOOK TWENTY TOURING CARS

Hundred Masked Men Make Great Raids in Tyrone in Search for Rifles.

MACSWINEY SHOWS SOME IMPROVEMENT
No Hope That British Government Will Reverse Its Policy Re Lord Mayor.

DELFEST, Sept. 19.—With twenty automobiles captured from week-end pleasure seekers Sinn Feiners in mid Tyrone Saturday carried out one of the biggest raids for arms in the history of Ireland early in the afternoon, when large numbers of persons were starting on week-end tours a body of men armed with revolvers stationed themselves at the entrance to Gorton Glenns, a favorite drive and held up all motor cars, the passengers being sent to the farm houses adjacent. When twenty machines had been captured a gang of 100 masked men all heavily armed and led by an officer descended from the adjoining mountains and entered the cars, the drivers of which, with revolvers at their heads, were compelled to drive the raiders around the country visiting houses in search of arms.

MACSWINEY IS BETTER
London, Sept. 19.—Torence MacSwiney, Lord Mayor of Cork, passed a somewhat better night in Brixton jail, having two hours sleep, which seemed to have refreshed him slightly, says a bulletin issued by the Irish Self-Determination League at noon today. The thirty-eighth day of the Lord Mayor's hunger strike. Otherwise the bulletin adds, MacSwiney's condition is much the same today as yesterday. He is extremely weak, but not quite so exhausted and still is conscious.

NO REVERSAL OF COURSE
Belfast, Sept. 19.—Sir Hamer Greenwood, Chief Secretary for Ireland, has informed the magistrates of County Louth that he can hold out no hope that the British government will reverse its decision in the case of Lord Mayor MacSwiney on hunger strike in Brixton jail. The magistrates recently sent a communication to Sir Hamer, demanding full self-government for Ireland, with powers not less comprehensive than those enjoyed by any dominion, and calling for the immediate release of MacSwiney. The chief secretary's reply to the magistrates says: "I can hold out no hope of reversal of the decision of the Government in the case of the Lord Mayor of Cork. I can assure you the government is desirous of granting the fullest possible measure of self-government to the Irish people and would welcome an expression of moderate opinions directed to the unfortunate state of affairs."

WARNS THE BRITISH
Belfast, Sept. 19.—Bishop Fallon, London, Ont., who is visiting Belfast and the surrounding district, has sent a message to Premier Lloyd George on the situation in Ulster, in which he says: "The proposed arming of civilians is an invitation to incitement to civil war in Ulster. Such action makes hopeless the efforts of moderate men throughout the empire. The hidden power that is deterring the present Irish policy is digging the grave of the British Commonwealth."

VERY WEAK IN CORK
Cork, Sept. 19.—The hunger strikers in Cork jail were reported today to be in an exceptionally weakened condition, due to a bad night experienced by all.

CAUGHT AT WAR DRILL
Belfast, Sept. 19.—Soldiers who had been in ambush since early morning surprised a body of Sinn Feiners at bombing practice in the hills today. One Republican was killed, two were wounded.

Church of England Women's Auxiliary

Mrs. G. A. Kuhring Leaving Wednesday for Winnipeg to Attend Annual Meeting.

Mrs. G. A. Kuhring is leaving on Wednesday for Winnipeg where she will attend the annual meeting of the Women's Auxiliary of the Church of England. Mrs. Kuhring is an honorary vice-president of the St. John's (Stone) Church Branch of the W. A. Organizing Secretary of the Diocesan Board and a life member of the Dominion Board. She will visit relatives in Montreal, Whitby and Toronto before proceeding west. Miss Fortia MacKenzie, W. A. Superintendent of Juniors of the Diocese of Fredericton will also attend the annual meeting at Winnipeg.

Last year's meeting was held at Hamilton, Ont., where representatives from the Province were Mrs. George F. Smith, who is a Vice-President of the Dominion Board and a life member and Mrs. W. D. Forster, corresponding secretary of the Diocesan Board. As yet the agenda of the annual has not reached members of the executive in St. John.

On October 11th the executive meetings open while the general meetings are to begin on the 15th.

Centenary Celebrated

While in Winnipeg members of the W. A. will be present at some of the interesting gatherings arranged in celebration of the centenary of the founding of the Church of England in Rupert's Land. One hundred years ago John West, then chaplain to the Hudson Bay Company, extended his mission to the settlers in Rupert's Land, and thus laid the foundation of the church there. A series of meetings are to be held beginning October 10th and lasting until the 17th. A number of eminent speakers are to attend, including the Bishop of Yukon, the Archbishop of Columbia, Rev. Dr. Peck, the veteran missionary, Canon Gould and Rev. Aheba Keu, a native Indian missionary.

The first Sunday is the opening service of the Provincial Synod held at the Pro-Cathedral of St. John, with special services in all city churches. Meetings are held every day but those of particular interest are: Thursday's which commemorates the exact date of the arrival of John West. On this day delegates will visit the historic churches of the Red River district and greetings will be read from the Protestant Episcopal Church of the United States. Friday's when a historic review will be given with addresses from those best qualified to speak, the programme being arranged by various societies; and Saturday's which will take the form of a pageant of Church History arranged by the Woman's Auxiliary and representing scenes in the history of the Church of England, concluding with the arrival in Canada of John West.

Constance Crew At Divine Service

Officers and Men of Warship Heard Sermon at St. John's (Stone) Church.

A very impressive service was held at St. John's (stone) church yesterday morning, when the men of H.M.S. Constance assembled, marching to the church and joining most heartily in the singing and responses. Before the Order of Morning Prayer was said, D. Arnold Fox, organist of the church, gave a short organ recital, which included Rube Brantford. The selections were beautifully rendered and were greatly appreciated by the large congregation which filled the church.

Rev. Canon Kuhring preached an inspiring sermon from the text, Jeremiah 51, "Run ye to and fro through the streets of Jerusalem and see now and know and seek in the broad places thereof if ye can find a man, if there be any that executed judgment that seeketh the truth. The speaker pointed out that it was a time in the history of the nation when a strong man was required and Jeremiah was sent to find the sort of a man who would fulfil the will of God. He said that such a man needed more than mere learning, power and ability in worldly matters. He explained what constituted manhood and showed that the object of man's creation is to do the will of His Maker. Success lies in the fulfilment of God's will.

The prophet was sent to Jerusalem, the centre of wealth and power, and even here it was difficult to find just the right man for the task. God's work is in a way dependent upon man, for it is man who must carry out God's commands. Powers of darkness are taking a large part in the affairs of today, and men must be of strong character to stand against principalities and powers. The contending wills will be such a man as God seeks. Canon Kuhring illustrated the value of manhood by telling of the victory of Zebbrugge and stating that that great battle was won, not by the strength of the ships or the might of the guns, so much as by the valor and power of the seamen.

The address was an excellent one and to men of H.M.S. Constance have expressed great pleasure in being present on this occasion to the Stone church.

ARRIVES TODAY FROM CHINA

An interesting visitor, who is expected in St. John today, is Miss Elizabeth McIntosh, of Kingsport, N. B. Miss McIntosh has been for the past five years a missionary at Honan, China, and is home on furlough. She is one of the missionaries supported by the Woman's Auxiliary of the Anglican church, and has given splendid service in the cause of the spread of the Gospel. After a rest at home, Miss McIntosh will do deputational work for the Woman's Auxiliary among the different branches.

HON. R. W. WIGMORE

A self-made man and a living embodiment of what brains and energy can achieve with the opportunities of a blessed democracy.

When You Vote Today, Men and Women Electors, and It Is Your Duty to Vote, Which Name on the Ballot Will You Choose?

Will it be the name of the man who has spent the best years of his life in the public service, who has won election after election during the last fourteen years and every time with an increasing majority, the name of HON. R. W. WIGMORE?

Or will it be the name of a man whose capacity for public service is still untried, whose one appearance before the electorate was the signal for an humiliating defeat?

Will it be the name of a member of the Dominion cabinet, the head of the greatest revenue-producing department, a member of a Government firmly entrenched in power for the next two years, whose position assures every attention to the needs of St. John as a port, the name of HON. R. W. WIGMORE?

Or will it be the name of a private member of a disorganized and discredited party with an irresponsible leader and its only hope for ultimate victory an alliance with the "forces of disorder" who propose a fiscal policy which would be ruinous to the country?

Will it be the name of one of the Union Government candidates of 1917, elected by an overwhelming majority for the purpose of supporting Canada's men at the front and keeping this British nation in the war until its triumphant close, the name of HON. R. W. WIGMORE?

Or will it be the name of one of the candidates of the opposing party, the policy of which would have weakened the Canadian forces at the front in the critical months of 1918?

YEAST CAKE JAGS JOYS AND DANGERS

One Sup a Source of Inspiration, But Two May Work Real Devastation.

Special to The Standard. Woodstock, Sept. 18.—The lid is on tight in the city. It was slammed down with a bang a week ago, and no one has been able to pry it open. The fumes of the demon rum are dissipated, and "thirsty Witches" know not where to turn to find their quenchers. Thirsty souls who journeyed hither, hither, hither, from the States, thinking to find an "oasis in the desert," were sorely disappointed and returned home with their parched throats craving the prohibition officers, a signpost of them here for the big week, were on the job, and there was nothing doing in the beverage line. The fellow with the habitual glare, however, had to have some cheer for a stimulant, and he found it. As a result of this search, Maine's latest importation, the Yeast Cake Cocktail, got a foothold here. A fellow with a yeast cake jag stepped high and lively here for a time Friday night and had them all gawking at his frothing haire. It looked like a case for the police or the physician, and finally one of the latter was summoned and discovered the cause of the jag.

How It Works.

The formula is an easy one: One yeast cake, price three cents, eaten like candy, followed by a swig of plain soda water. Result: Great expansion in abdominal region, causing access of stomach capacity, vastly increased activity, sudden disposition to seek out enemy and clean him up, hallucination of great wealth, utter disregard of preliminary laws, and general brightened view of the world and its ways.

They fly in the clamour, the only cheer upon the face of the desert, is the dancer, as suggested by the deprecator, that some whose thirst is altogether out of proportion to their unshrinkable capacity may greedily swallow two or three yeast cakes and thus invite an explosion that may result in embolisms. But, then, life is all a gamble. "Try anything once," says the yeast cake wizard, "but beware how you monkey with such things as triple expansion."

"I can't help it. The man who owns this merry-go-round owes me money, and the only way I can get even is by taking it out in rags."

Importance of Sunday School Work

Addresses by Rev. W. C. Neahain, Supt. of Religious Education for Baptists.

Interesting addresses were delivered in three of the city churches yesterday by the Rev. W. C. Neahain, superintendent of Religious Education for the Baptist denomination in the Maritime Provinces. Mr. Neahain spoke in the Main street Baptist church in the morning, in the Larkwood street church in the afternoon, and in the Central Baptist in the evening.

Sunday School Work

In the morning he spoke of the importance of Sunday School work, which, he said, was not to be considered as one of the side issues of the church, but as the most important work in which it was engaged. He dwelt strongly on the importance of the work of the Sunday School in relation to the individual child, and said there were three important factors making up its life. The Secular School in which it was impossible for the child to receive to any large extent religious education, and which depended largely on the character of the teacher. The Home, where the child should ideally receive his religious education, but unfortunately all homes were not Christian, and in such homes it was therefore impossible for the child to receive any Christian education. For this reason the work of the Sunday School was one of the greatest importance, for, without it, many children would grow up in entire ignorance of Christian truth.

Workers Necessary

The speaker pointed out that to carry on the work of the Sunday School, workers were necessary, and that the only way to get true leadership was for Christian men and women to yield themselves up to Christ for service.

Reference was made to the prophet Isaiah who yielded himself up to God's call and allowed God to prepare him for the great service he afterwards rendered.

In all the churches Mr. Neahain said there were many Christians who could render very efficient work as in the Sunday School Department.

POLICE SEEK MAN ALLEGED TO HAVE SLAIN YOUNG BOY

Coroner's Jury Decides One Known as Red L. Davis Responsible for Awful Crime.

Toronto, Sept. 19.—Police detectives of Canada and the United States have been circled to be on the lookout for one known as Red L. Davis, who was on Friday night indicted by a coroner's jury here of one of the most fiendishly strange murders in the criminal records of this city. The jury decided that Phillip Goldberg, aged 12, was cruelly killed by Davis who had purchased liquor illegally sold at the home of the child's parents. It was stated in evidence that Davis said "Jewish liquor would make a man outrage somebody." The doctors found that the Goldberg boy had been violently assaulted. Evidence of the detectives showed that Davis might have been caught before leaving the city had the mother of the murdered boy admitted to the police at the time that Davis had been making visits to her home.

Ogilvie Stock MAY BE DIVIDED

A Split is Still Part of the Plans of the Board of Directors of the Company.

Montreal, Sept. 19.—The annual general meeting of the shareholders of the Ogilvie Flour Mills Company, Ltd., will be held in the head office of the company in Montreal, October 14. In common with other flour mills the Ogilvie company has not had nearly as large a production during the year that ended August 31st as it had the previous year. That was owing to the falling down in export orders for Europe, through the Canadian Wheat Board. Fortunately from the earnings standpoint the Ogilvie Company has fully as large an earning capacity from other sources, such as elevators, of which it owns a large number in the West, so that relatively its statement should be rather better than the average of majority of other companies. Little has been heard during the past year of a splitting up of the capital stock of the Ogilvie Company, but it is understood that this still forms part of the plans of the company, although when it will be carried out still is indefinite.

CANADIAN SHOES FOR CANADIAN PEOPLE

Canada—Why?

IS it really worth while to develop institutions and industries which are distinctively Canadian, and which promote the welfare and prosperity of the Canadian people? Of course it is!

Are we wasting our time and energy in training Canadian ability and encouraging Canadian enterprise? Of course not!

CANADA is more than an accident of geography. The magnificent record of effort made by Canadians in the great European struggle bears witness that the peaceful and unhindered development of the Canadian ideal should be maintained.

The future of Canada depends upon the sincere and earnest self-expression of Canada's millions of workers—at the plough, the loom, the forge—in the factory, the office and the home. And loyalty to Canada is best expressed, not in bursts of patriotic emotion on state occasions, but in supporting and sustaining Canadian enterprise and Canadian industry.

Canada produces footwear of every desirable type, and of standard quality in all grades. Buy Made in Canada Footwear and you are then assured of the utmost that modern skill can produce in Comfort, Fit and Style.

SHOE MANUFACTURERS ASSOCIATION OF CANADA

The New Brunswick Temperance Alliance

To All Who Are Interested In The Progress of Temperance Work:

The aim and object of the New Brunswick Temperance Alliance since its inception has been the promotion of Temperance Principles. Since its organization it has stood for an elimination of liquor for beverage purposes and by education and agitation has endeavored to forward and promote this cause. Measure after measure has been influenced by this organization until in 1916 the present N. B. Prohibitory Act was passed by the House of Assembly. This law became operative on the 1st day of May, 1917. It was adopted and came into force as a war measure and few amendments have been added to it, because of the fact that the people were to be given an opportunity sometime after the war to pass their judgment upon it. On the 10th day of July, last, the Referendum Vote was held and resulted in a tremendous victory being won. The majority favoring the Prohibitory Law was 24,264 and a majority of 18,130 against the sale of light wines and beers. This decisive majority is a clear intimation for the organization to go forward with this work, endeavoring to have the best measure obtainable placed upon the statute books and then insist upon its enforcement. Prohibitory legislation can only be sustained and enforced as full sympathy is established between those who have the laws placed upon the statute books of our land and those who are entrusted with its enforcement.

Never in the history of the Alliance have we had such a challenge as comes to us today. We need a more stringent, a much more comprehensive Act. This is necessary if we are to obtain the success we have in mind.

Then we have the resolution dealing with the referendum, prohibiting the importation of liquors into our province. This should come before the legislature at the earliest part of the first session. This would enable us to have the vote taken sometime the latter part of June, 1921.

To this end all our endeavors should be directed.

The alliance is depending on the voters of this province to elect members to our Legislative Assembly who will uphold the principles of prohibition. It is of the utmost importance that men be returned who will vote for this referendum. The election of true temperance men, who can be relied upon and whose record is clean on this question, is especially necessary to the prosperity of the province. In view of the great industrial development we are now entering upon. We need a sober people to develop our latent resources. We need proper enforcement of our Prohibition Act if we are to develop industrially and morally. The business of the province, our wives and our children demand the upholding of our prohibitory law. God and humanity are urging us to finish the task which was so well begun on July 10th. Your vote will count for much in this election. If the right kind of temperance men are elected an era of prosperity, such as the province has never known before will bless the people. Be sure and vote for true temperance men without regard to party lines. The vote of the women will have much to do in securing legislators favorable to prohibition progress. The Temperance Alliance is grateful for the splendid support the women gave on July 10th, and we are looking for them to elect the right men on October 9th. We are now at a great crisis. If we fail now to elect the right men our cause will experience a set back.

COAL COMPANY DENIES STORY OF W. A. JOHN

Declares Man Who Suicided Here Earned \$30.77 in Eight Days.

Special to the Standard
Gloucester, N. S., Sept. 19.—The Dominion Coal Company has issued the following statement in reply to a letter sent by William Ambrose John, who committed suicide at St. John recently, and also to statements made by his friend, Robert Johnson.

"These two men arrived in Waterford on Tuesday, July 28, but did not commence work until Monday, August 2. For the pay period ending August 8, W. A. John worked five days (one and one-half days of which was on shift work), the remaining three and one-half days being on coast work on coal. His earnings for this period as shown on our pay rolls was \$38.87. For the pay period ending August 13, he worked three days, his earnings being \$12.91, making total earnings for the eight days worked by him \$51.78.

"Robert Johnson worked five days for the pay period ending August 8 and his earnings are shown as \$33.81 for this time, and for the pay period ending August 13, he worked two days, his earnings being \$11.90, making total earnings for the seven days worked by him \$45.71.

Sent to Glace Bay

"The tonnage rate paid in the mines where these men were employed is 54c. per ton for shoveling and loading coal plus extra for number boxes. These men from the fact showed a disinclination to work at Waterford, and arrangements were made to send them to No. 2 Colliery, Glace Bay, where they would get work as hand-pickers, which work they expressed a preference for. They were accordingly sent to Glace Bay by team, but they did not start work there and nothing further was heard or seen of them in this vicinity.

Several other British miners who came over on the "Victorian," and who commenced work at Waterford Colliery at the same time as the above named, are doing well and they have sent for their families to come out and join them.

Our experience has been that new men coming in very often ask to be put on shift work for a week or so in order that they get accustomed to the mines and the working conditions, and for this reason the wages of new men are sometimes below what they would be if the men were on a contract as soon as they arrived.

It is not an exaggeration to say that shooters and loaders in the mines are earning \$6 per day and over, and in numerous cases were much more than this amount is earned.

BRITAIN IN DANGER FROM MOSCOW REDS

Lenine's Envoy Dictated Policy of Labor Council—Lloyd George a Winner.

By CARL W. ACKERMAN.
(Copyright, 1920, by Public Ledger.)
London, Sept. 19.—"Sumner Parliament," reads the heading to the Daily Mail editorial.

"We find it difficult to believe that we are really on the brink of a victory approaching that which we faced in the beginning of August six years ago," says the Daily Telegraph.

"The revolution in Italy was started," according to the Daily Herald.

"These three quotations from London dailies so widely apart as Northcliffe, Lord Burdett and George Lansbury, and their respective owners and editors, are a reflection of the hour in troubled Britain, while from Moscow comes another edict from Lenin to the "workers of the world," urging them everywhere "to destroy parliamentarism."

There is a rashness in the issue in England today of an issue which may be an issue throughout the world in the not far distant future. Russia has declared war on parliamentarism, and the crisis is always here in England and in Italy. But in the meantime in this country parliamentarism is adumbrated and the nation is threatened alike by coal and flour strikes and by the acts of a sinister "laborer."

Krasin's Deals Revealed.

Meanwhile some of the secret political history of the last few weeks—coming to the surface and—British newspapers today contain what has been called respectively in these dispatches, that Krasin and Krasin have been secretly negotiating with the revolutionary leaders in England. Today most of these newspapers openly charge Krasin with having relations with the labor party's Council of Action and with being instrumental in raising the £25,000 (normally \$75,000) fund for the Daily Herald.

In fact, that newspaper, which has always reflected the official viewpoint of the Russian delegates, today prints these facts under the title "George Minnes Krasin; Council of Action Attacks," and adds that Krasin made a "dignified denial."

"In his reply," states the Daily Herald, "that he was responsible to his own government, above or below that, he understood he was neither a court of law or otherwise subject to cross-examination."

Polish Success Defeats Red Trick.

One of the important facts about Krasin which has not previously been revealed is that at the time the Council of Action was formed he was in close touch with its activities. At the time when the Russian armies were sweeping across Poland and the question was raised in England as to whether the Soviet trade delegation should not be sent home, Krasin is said to have consulted the members of the council, who promised to write him a letter asking the trade delegation to remain in the British Premier made any attempt to hand passports to the members. Krasin, it is said, promised on his behalf to write to the Council of Action saying that Russia recognized the Council of Action as the real government of Great Britain and would therefore remain. Poland's successes, however, destroyed that Bolshevik trick.

Lloyd George has known of this from the beginning, but has kept silent until the psychological moment. Today he has rid of Krasin, he has forced the Daily Herald to acknowledge that it has at least an offer of £25,000 money, and what was to have been a clever Bolshevik coup in London to destroy parliamentary government has ended in another victory for Lloyd George.

Lloyd George Trumps Reds.

Today the Prime Minister is perhaps the coolest man in the Empire, and now the Bolsheviks have shown their cards, he is playing his hand and out-trumping them at each turn.

The fundamental issue is by no means settled, but events are so shaping themselves that it may be said tonight that all indications point to a government victory over the revolutionists in England, at least in the first round of the engagement which will come with the coal strike.

London has not forgotten Lloyd George's speech of last April in which he advocated the formation of a new political party to fight Bolshevism in England. The hour seems to be approaching when the Premier will launch his great attack upon the council of action and those who are attempting here to substitute a council government for parliamentary government.

MEN AND BUSINESS

By RICHARD SPILLANE

Francis A. Keller, who has made a life study of tenacious house conditions, immigration and industrial trouble in America, warns employers against hoping or expecting relief from their labor difficulties by increased immigration.

"It is to the interest of every industry," he says in a paper he has issued as Vice-chairman of the International Council and which the Manufacturers' Record prints, "to conserve the present inadequate labor supply and make the best use of it. The tendency of the foreign-born workers to secure their old homes should be checked by every legitimate means. The most powerful inducement to them to remain is, of course, just and humane treatment, with no discrimination in wages, housing, living and working conditions between them and the native-born. Efforts should be made to establish closer relations with the foreign-born workers. If they have legitimate causes for discontent, grievances should be understood, and the same spirit of co-operation that is being secured through enlightened employers and their English-speaking workers should be developed in relation to the foreign-born laborers."

"This is not 'loadling,' not philanthropy, but labor-conservation. As in the early days of America, we were wasteful of our resources, coal and iron, and the result of extravagance, so at present we are as wasteful of our manpower, as if the supply were inexhaustible."

"We should not be deceived by the temporary increase in immigration. The figures that indicate a large number of arrivals at Ellis Island fail to show the fact that the proportion of women, children, professional and clerical workers is so great as to afford little relief to our labor shortage. Of the manual laborers coming in, a large percentage are men who are returning ahead of time and are now retaining their old jobs. Of new workers, there is an exceedingly small percentage of native-born men, and the rest are, while recent correspondence from all parts of the United States indicates serious shortage of labor in almost every section.

"The course of action for the employer is, therefore, first, to conserve labor as carefully as his resources; second, to regard immigration problems with the same interest that he gives the international commerce, realizing that America is no longer isolated, and that what happens in the Old World today will be reflected in his own business tomorrow."

Regulation of Emigration.

She says emigration will be strictly regulated by the countries of Europe in the near future, and is being directed in some lands where the value of the workers is realized.

"This is the case in Italy," she adds, "which has supplied us with such vast numbers of unskilled and semi-skilled laborers. The French Government has offered Italy six tons of coal per month for each Italian miner induced to go to France, and the commission of emigration of Italy is advising its people to emigrate to France. It is asserted that opportunities are better there than in America, both for

study work and high wages.

"Other countries are making efforts to keep their citizens at home. Greece is offering inducements of farms to the people having passed an act by which large land owners were retained only one-third of their estates, while surrendering two-thirds to the peasants. If this offer should not be sufficiently persuasive, emigration from Greece may be prohibited at any time by law. Conditions in that country are being studied at present to determine what action may be necessary to prevent an undue exodus of the population. The extension of Greek territory is a powerful reason for keeping these people in their own country.

"Similar conditions are found in Finland, where areas have been set aside for settlement, and farm implements and supplies are offered to small cultivators on liberal terms.

"These instances show the attitude of foreign governments toward the emigrant. Instead of permitting their men and women to leave at will and select their own destinations, as in the past, emigration will be curtailed by many governments to the extent deemed expedient for their own interests. Instead of the emigrant selecting his own future home, the governments will advise him where to go, and, in some cases, will retain him as a citizen, with voting rights, even while living abroad."

Following the launching of the Hoboken, the Red Hook was launched, seven-year-old Mary A. Carroll, daughter of Michael Carroll, a worker in the Robbins Dry Dock and Repair plant, at Red Hook, Brooklyn, being the sponsor.

Little Miss Carroll stood in the center of a great red hook of roses when she performed the rites of christening the big freighter.

The fathers and mothers of the sponsors were the guests of Mr. Todd on the trans-continental journey, and each of the sponsors received a package of Liberty bonds as souvenirs immediately after the launchings.

FORTY GERMAN SHIPS MAY BE SOLD TO BERLIN

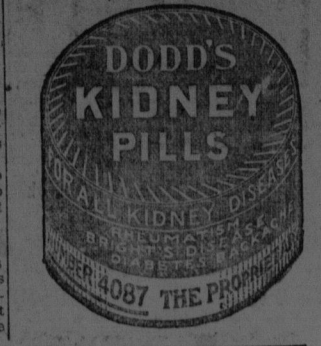

Washington Sept. 19.—Great Britain has under consideration the sale of forty former German liners and a number of cargo vessels to their former owners, according to advice received by the United States Government from London.

The sale of the ships, which were awarded to Great Britain by the reparations committee, practically has been decided upon, these advisers say, but definite action has been held up until existing law can be modified so as to permit of the sale of the craft to the Germans.

See Blow at America.

Some officials of the United States Government profess to say in this plan an attempt to hinder the development of the United States merchant marine, but Chairman Benson, of the

BRITAIN FACES CRISIS LIKE 1914 IS VIEW

(Copyright, 1920, by Public Ledger.)
London, Sept. 19.—Under the title "Parliament or Soviet," Viscount Asquith's journal, the Observer says of the prospective strike of the miners:

"The question for which there shall open in a fortnight from now a decisive struggle between the historic British system and the Russian system of the more or less Bolshevik model, prostrating every liberty and interest of the country to the sheer rule of force wielded by tyrannous minorities and arbitrary systems. The new rule of force would be more grinding than the old discipline by arms, for it would use industrial strangulation of the ordinary means of existence. It would be an internal war equivalent of the blockades of Germany during the war."

That issue is indeed challenged by the miners. It implies the nation's fight for life or less than in August, 1914."

Elders Poisoning Their Families to Prevent Them Suffering Pangs of Starvation.

(Copyright, 1920, by Public Ledger.)
Peking, Sept. 19.—American missionaries and business men in the provinces of Szechuan, Chihai, Honan and Shantung have reported to the American legation that the famine area extends from Peking southward 600 miles, covering 30,000 square miles, and that more than 30,000,000 people are affected. The famine belt's crop is 92 per cent below normal. American, British and Chinese eyewitnesses state that many of the people are dead and dying. The family elders are poisoning their wives and children with arsenic to avoid a death by starvation. A conservative estimate of the relief funds required is \$20,000,000.

Fat That Shows Soon Disappears

Prominent fat that comes and stays where it is not needed is a burden a hindrance to activity, and a curb upon pleasure. Many forms of advice to reduce weight have been advanced, such as dieting, heavy work, excessive exercise, etc., all of which are either unpalatable or dangerous.

The latest, more modern and pleasant way to take off burdensome fat, is to take, after each meal and at bedtime, a Marmola Tablet. These little tablets are an effective and harmless as the famous Marmola Prescription from which they take their name.

To get rid of fat at the rate of two, three or four pounds a week, simply take one of these little tablets after each meal and at bedtime until you have reduced your weight to where you want it. No wrinkles or flabbiness will remain to show where the fat was.

They are for sale by all druggists at 15c for a good size box. If you prefer to have them come to you, send your name, address, and a sealed cover, and amount to the Marmola Co., 100 West 42nd Street, New York, N. Y., and you will receive a box, free of charge, and the Marmola Co. will be pleased to send you a copy of their book, "How to Get Rid of Fat."

St. Peter's Won From St. George

Good Crowd Witnessed the Locals Win With a Score of 8 to 2.

The St. Peter's had little difficulty in defeating the St. George team in Saturday afternoon's exhibition. The visitors came here well recommended but they did not shape up to expectations as the 3 to 2 score shows.

The local team made a bid for runs in the opening but the credited single wasn't forthcoming. With one down O'Regan doubled and Mooney was safe on Campbell's error.

The two run lead did not shake the home team any and before they cleared away they had doubled H. Hansen struck it with a single, but he was caught as the keystone stack trying to stretch it into a double.

The Green Shirts pushed another one across in the seventh. With two out McDevern went to second on another error of Campbell's. A passed ball advanced him to third and he scored when Milan came through with his second double of the game.

Down replaced Dewar in the box in the seventh. He managed to get through with that faster unscathed but the St. Peter's got to him in the eighth for another counter. Dewar was out on a nice play of C. Doyle's.

Score by innings: St. George, 0; St. Peter's, 8. Summary: Two base hits, Campbell, Spear, O'Regan, Dewar, Milan, Hansen, stolen bases, Gordon, O'Regan, Mooney, McGowan, Miller, struck-out, by Hansen 10; by Dewar 4.

Closing Day of Maine State Fair

The Ghost Won Free For All One Thousand Purse in Straight Heats.

Special to The Standard. Lewiston, Me., Sept. 18.—The racing on the closing day of the Maine State Fair was the best of the week, leaving "Potter's" gray pacer, The Ghost won the free-for-all, and Frank Fox took the 2:18 trot with Alfred King in three straight.

The local team made a bid for runs in the opening but the credited single wasn't forthcoming. With one down O'Regan doubled and Mooney was safe on Campbell's error.

The two run lead did not shake the home team any and before they cleared away they had doubled H. Hansen struck it with a single, but he was caught as the keystone stack trying to stretch it into a double.

THE FOSTER GOVERNMENT'S RECORD.

Some year ago there was in power in this country an administration which was known as "the Government of all the talents." Judged by the manifesto just issued by Premier Foster, his administration is also a Government of all the talents and then some. The story is a wonderful record—from his own standpoint; whether the electors take the same view of it remains to be seen. The Premier starts out with the statement that, owing to the war, the period of his administration has been a most difficult one in the history of government. Was it any worse than the period during the earlier years of the war, when the late Government had to face conditions and emergencies absolutely without parallel in the history of the country? Did not the Foster Government come into office when they had the advantage of having had two or three years in which to become conversant with these conditions and to some extent prepared to deal with them? They had had opportunity to familiarize themselves with the extraordinary situation created by the war. They had therefore no excuse for failing in their duty towards Canada and the Empire, which the Premier commends himself and his cabinet for having done so well.

port of St. John, which Dr. Himsy would not be. The latter could not get one dollar's worth of work done to this port if this thing deposited upon it, and for this, among other reasons, his smallness cannot be expected seriously by the electors. St. John wants a real live representative in Parliament, and in Mr. Wignmore it will have just such a man. There can be no doubt, if his election by an enormous majority of electors who have a vote will only come out and cast it; but if those who have votes are going to stay at home and leave it to someone else to do the voting, the majority will not be large enough. IT IS OF THE UTMOST IMPORTANCE THAT EVERY MAN AND WOMAN IN THE CONSTITUENCY WHO HAS A VOTE SHOULD GO TO THE POLL AND CAST IT, so that Mr. Wignmore's majority may make him, in St. John, the representative of its constituents.

A GLOBE MISREPRESENTATION. We very much dislike to have to charge so old and respected a newspaper as The Globe with deliberate misrepresentation, but a statement made by it in Saturday's issue either amounts to that, or our contemporary is so sadly wrong in provincial political affairs as not to be able to express them correctly. The statement we complain of is that "When the old Government went to the hibernation for very many thousands of dollars it was great, pure and simple. Not a dollar of the large amount raised went into the Government treasury."

IN THE EDITOR'S MAIL. Garnett Settlement, St. John's County, N. B., Sept. 18, 1920. To the Editor The St. John Standard: Dear Sir—Would you kindly give me a little space in your paper to answer a statement that was published in the Daily Telegraph, September 17th, saying what a clean record the Foster Government are leaving behind them. It is not clean, by no means, when the men working on the road have received no pay since June 1st, and the commissioner was ordered to stop and let half the road ploughed up. It is about time there was a change in the government. Thanking you for the space in your valuable paper. Yours truly, WORKING MAN.

"At first, she thought he was the pink of perfection, but when the baby came to claim her attention he was just a mere poppy."—Baltimore American. Was He Satisfied. "Martha, dost thou love me?" asked a Quaker youth of one at whose shrine his heart's holiest feelings had been offered up. "Why, Seth," she answered, "we are commanded to love one another, are we not?" "Aye, Martha, but dost thou regard me with the feeling the world calls love?" "I have freely feared that my heart was an erasing one. I have tried to bestow my love on all, but I have sometimes thought, perhaps, that there was getting rather more than thy share."—Public Opinion.

Foot-Rule for Matrimony. The trouble with most marriages is that a man always makes the mistake of marrying the woman who carries him off his feet—instead of trying to find one who will keep him on them.—Los Angeles Express. And This Time It Was. During her vacation the telephone girl was out fishing when someone in another boat sang out "Hello!" Just then she got a bite. "Line's busy," she called back.—Boston Transcript. More Convenient. Little Betty was staying with her grandmother in the country. Just before dinner-time one day she discovered that chicken was to be the principal attraction. "Oh, woe'd you get the chicken, grandma?" Betty asked, very excitedly. "In the poultry-yard," the old lady replied. "You remember the chickens you saw this morning, don't you?" "Do you mean the ones I fed?" "Certainly. Well we killed one of them." "Oh, did you?" exclaimed Betty, in surprise. "We buy our chickens ready made."

Benny's Note Book. BY LEE PAER. He follows was getting on Puds Skinkie steps talking about different things such as what would happen to you if you swam out to the middle of the ocean and suddenly forgot how to swim, and long pasta, and school, and Puds and, O, I don't know, school and so and, I won't be so sorry when vacations over. Mr. Wignmore, and Ed Hunt, vacations all into its way, but it's easy to get tired of, all be kind of glad when school starts again. So will I, I see, all you do on vacation is just get around with you into as well as getting a education. Sure, and Leroy Shooter, you're learning something to school, but all you're doing during vacation is just running extra errands because you can't tell your mother you got lessons to do. And all the fellows and they wouldn't care how soon school started, Skinny Martin saying, You can sleep later in the morning during vacation, but what good is it to sleep late when you ain't getting out of anything? I don't care how soon school starts, that's the way I feel. No too, that's my motto, and Sam Cross. With just then some tall shtake lady came up, saying, Good morning, boys, how many of you would like to come to my summer school and learn something useful during vacation? Just give me your names and I'll go and see your mothers about it. He follows just sitting there without saying anything, and the lady looked at Puds Skinkie, saying, Wouldn't you like to learn something useful instead of wasting your hole vacation? Come on, now, tell me your name and tell me those other boys names. With us other fellows looked at Puds as much as to say he better not if he didn't want to get hurt, and Puds said, I shall go to summer. And he quick jumped up and wanked up the street and us other fellows all jumped up and ran after him, yelling, Hay Puds, wate a minute, wate a minute.

(Copyright, 1920, by Public Ledger.) Kansas City, Mo. Sept. 19.—Hundreds of conscientious objectors from various army camps were sent to the United States disciplinary barracks at Fort Leavenworth in 1918. One hundred and thirteen were freed in December of that year, by order of Secretary Baker, of the War Department, with \$400 to \$600 back pay each, clothing and travel allowance. That move was resented by American generally, but it showed the political prisoners and objectors remaining in the barracks that a great power was operating in their behalf.

Maritime Home For Girls At Truro, N. S.

Rev. V. M. Purdy Tells of Its Origin, Its Work and Its Present Needs.

Rev. V. M. Purdy, B.D., financial agent of the Maritime Home for Girls, Truro, N. S., in the city. He occupied the pulpit in the First Presbyterian church, west side, on yesterday morning, while in the evening he spoke in the Exmouth street Methodist

church. The subject of both of his sermons was the Maritime Home for Girls its origin, its work, and its present needs. He intends to speak on this subject in every Protestant Non-conformist church in the city, and expects to be here several weeks.

Home For Girls
Rev. Mr. Purdy, who is staying at the Victoria, was seen by a Standard reporter yesterday in response to questions, he said that the Maritime Home for Girls was opened in Truro on September 1, 1914. It began on "houses, debts and fears." All hopes have been realized fears dispelled and debts wiped away. Since its opening the institution has had a remarkable history. With a fine property valued at \$75,000 free from debt, another building under construction at present and will be completed some time in November, \$115,000 is needed for additional buildings.

All money in reserve, however, has been paid out, and from the first of the present month on debts will accrue. The total registration since the opening of the institution is one hundred and nineteen girls. There are at present fifty-seven in residence, which is eight beyond the normal capacity of the Home. Moreover there are six cases outside now awaiting commitment, which the Home cannot receive because it lacks accommodation. Of the full number registered, nine came from good homes, fifty-two from bad homes, twenty-two had no homes at all, while fifty-six who had been brought up in different homes, fell into bad companionship.

The institution carries on a purely preventive work in a department of domestic science, and in this respect being committed under sixteen years of age, though they may be retained in the institution past the sixteenth year—in order to effect their reformation. Maternity cases are absolutely not received. The girls receive a practical school course within the institution, and the work of the school compares favorably with that of other public schools.

There are also special classes for domestic science, and in this respect the institution holds a high place. When trained the girls are placed in good foster homes, or returned to their own home, if morally fit, under parole, and to date the institution has enjoyed the remarkable record of having seven out of ten of the girls released make good.

The three provinces stand in precisely the same relation to the institution all having given it legal status by special enactment, and all committing girls by the same processes of law. Each province provides grants for the support of its own girls only. As the institution is for Protestant girls only, it is regarded by the Provincial Government as a purely sectarian one, and they will make grants for capital expenditure. Hence, this

AS A WOMAN THINKETH

By HELEN HOWLAND
(Copyright, 1920, by The Wheeler Syndicate, Inc.)

WHAT A WOMAN CAN DO WITHOUT

The Cynic has said in his heart, "A woman wants EVERYTHING—at least, everything she sees, 'Or happens to think of!'" But it's not true! There are thousands of things that a woman could do without—quite happily!
Oh, thousands of them!
Bridal veils, for instance.
And "kidding," and double chins and jazz!
Those cute, little muscaches the men are wearing—
And the mismatched-kiss!
Dancing men, pure and simple—for though not all of them may be pure, most dancing men ARE simple!
Custard pie motion-pictures,
Beautiful trained-courses,
A jealous disposition,
A jealous husband,
Breakfast-table porridge,
Frockles,
Criticism—especially the home-made kind,
The attentions of married flirts and summer widowers,
Men who "drop in" unexpectedly,
"Fireside companions"—the "come home early and never know when to go home" variety,
Who bring candy—and eat it all up, themselves,
The man who insists on telling how he became "a success,"
The man with the "Uncle Sam" habit,
Egotists, posers, golf-friends, motor-manics, professional cynics,
Men who think a woman is something to be "reformed,"
Men who think a woman is something to be "dodged,"
Men who say, "A woman is only a woman—but a good cigar is a smoke!"—and fancy they are quoting from the Bible or Hamlet,
Sunburn, wind-burn, heartaches, superfluous flesh,
And confirmed bachelors!
These are some of the thousand-and-one things that a woman could do without.
But the things that she CANNOT do without
Are Love, Sympathy, Admiration,
Work, Kisses, the Right Sort of Clothes—
And at least One Husband!
The Seven Keys to Happiness—for Women!
Yes, somehow,
The moment a woman finds one of them, she seems to lose another.
And the woman who holds all Seven Keys, at once,
Is as rare as she is Blessed!
That's why a woman is always "WANTING something,"
No matter what she HAS!
For, alas, it takes AID, seven of these Magic Keys
To open the door to Complete Happiness
For any woman!

MORE WOMEN THAN MEN HEAR FILM'S CALL

The Stage Struck Sex Have Personal Vanity Thinks Peggy Hyland.

(By Peggy Hyland in The London Daily Express.)
There seems to be no more popular calling today than screen acting judging from the number of letters I receive on the subject. The striking point about the universal yearning, however, is that it is almost entirely confined to girls.

Competitions have been organized of late for the purpose of discovering a new film actress, an honor which has been raised on the business world is seeking to achieve. Yet apparently there is to be no search for a masculine counterpart, not because he would be any less welcome to the film stage, but perhaps because there would be little likelihood of much response from male enthusiasts.

Girls are more impressionable, and as their status in the business world is still to a great extent unsettled, more easily affected by glamour. The feminine craving for anything savouring of romance is demonstrated at an early age. Little girls who visit the cinema are intensely thrilled by its tenderer scenes. They select their favorite actresses, whom they adore with all the fervour of their young hearts, giving practical expression to their affections by spending what is left when the cinema seat is paid for in picture postcards of her image. But the boy? He may have a wholesome admiration for the "Bimbos," but his pennies go in candy!

Magnetic Power.
The boy thinks the cinema jolly good for an evening's diversion, but rarely does it hold him with the magnetic power a girl feels. The young woman who has an uninteresting life at home, or is engaged on some dull business work, sees in screen acting a pleasure and lucrative release from the world of tedium.
The girl, too, has a certain personal vanity which men do not frequent possess. I do not mean that it is at all a bad sort of vanity, but simply a justifiable desire that all the world may be familiar with her features and have the chance of calling her beautiful. Most girls would prefer making a fortune of their faces to success by any other road. This feminine instinct to possess it often keeps him out of the limelight.
As long as woman remains woman she will be the screen-struck sex!

Woman Has Become Expert at Earning and Men Have Learned to Keep House.

By LYDIA K. COMMANDER.
(Cross-Atlantic Newspaper Service.)
London, Sept. 19.—In pre-war days she asked, "Can he earn his living?" and he asked, "Can she keep house?"

That is to say they asked these questions when they were not too badly hypnotized by Cupid to ask anything.

But in this topsy-turvy post-war world these questions are apt to get sadly mixed. She has become an expert at earning, and he has become a post-master of housekeeping.

One of the interesting sights of an army training camp used to be the men doing their own and their officers mending, and doing it neatly and well. The 10,000 naval recruits constantly in training at the Crystal Palace, used to produce men who could not only darn socks, but could make beaded bags, embroider doilies, cushion covers and blouses, and crochet or knit socks.

The stories told by on-leave officers of husbands of marvellously efficient but at the front, used to rouse the envy of the wife-at-home, harassed by domestic details forced upon her by the Magic-making-mundane waves that had suddenly swept away all the services.

But now wife-at-home is reaping the benefit of husband's war training. A smiling woman explained the new situation in her home. "I don't mind being without a maid now," she said "because my husband helps. He has learnt so many things in the army that he's quite useful to me. He takes the left of my hands when he's at home, and he does all my shopping. I never could get out before, but now he takes his turn and we are both happier."

Even Artist's Cook.
The wife of another man, a clever artist who does black-and-white work, told me that her husband was now as clever with the brush.

As, later on, we enjoyed some excellent tea-cake of his making and marked how deftly he cleared away and occupied himself in the preparation of a savoury dish for supper, it became evident that he had indeed become domesticated.

"Isn't it lucky," the pretty young wife commented proudly. "They trained him so well in the army that he's not really clever; he can cook anything I want to get a maid," she continued, "but now it does not matter, for he manages the work so well that I've lots of time for myself, and we are getting acquainted again for the first time since our marriage."

On every hand one sees these domestic husbands, not uncommon in the new lands, but hitherto practically unknown in England. They clean stoves, hang out washings, wheel the baby carriage and chase and retrieve the run-away children.

Sometimes one hears them discouraging eloquently on the mysteries of labor-saving household appliances and the fendish possibilities of kitchen sinks. Intimate details of housework of which, formerly, men were not supposed to be cognizant, are now discussed by them with a sang froid embarrassing to persons with weak nerves.

Wife Bread-Winner.
The other side of the picture is filled with wife in her new role of family bread-winner. Many men returned home to find their womenkind earning more than they could hope to command, and these had domestic greivances thrust upon them.

Either proud of their achievements, these women refuse to give up their "freedom," and are in a position to dictate terms to their bewildered husbands. Sometimes this results in an exchange of responsibilities; sometimes in a thorough partnership, both earning, and both sharing the domestic duties.

But back of man's new domestic activities lies the servant problem, once almost unknown in England, but now acute. In so few small households nowadays is any regular domestic help available that the man of the house must perforce turn his hand to domestic duties.

And with his newly acquired training in camp and barracks he is by no means the clumsy helper with whom the careful housewife would not trust her precious dishes, that he was in the days before the war.

author, is spending a month at Cape Vincent, New York, fishing for fish and ideas in the St. Lawrence River. In spare moments, when the bars are not biting, he works on a novel which the Mayflower Photoplay Corporation plans to film. This will be MacGrath's thirteenth book to reach the screen.

FROM HERE AND THERE.

Eleonora Duse, the famous tragedienne, is in financial straits, says the London Daily Express. When the war broke out she had a large fortune, but during its course she lost it. It was Duse who brought fame to d'Annunzio by her interpretation of his first play. She often said hard but true things

about the drama. "Boxes, stalls, evening dress, and late dinners kill the drama. Actors and actresses poison art and make it impossible." When she was once asked if she could live without the stage she replied: "If I had my will I would live in a ship in the middle of the ocean and never be nearer humanity than that."

'WHY CHANGE YOUR WIFE?'

Companion Picture to "Don't Change Your Husband"

PEOPLE IN THE BEST HOMES DISCUSS SUCH SUBJECTS FREELY, press and pulpit continually refer to the marriage relations of people. Now comes a pictorial dissertation upon the matter that will out-sormonize preachers and put into most emphatic and frequent causes of separation—not deliberately scandalous divorces, but those accumulations of misunderstanding which the law terms "incompatibility." The story is highly refined, the treatment of the subject in good taste and delicate. Brainy people produced this object lesson, and talented type-writers enacted it. The disillusionments and fallacies of divorce proceedings are pointed out and real old-fashioned ideas prevail.

The Women's Vote

TO THE WOMEN OF ST. JOHN CITY AND COUNTY AND ALBERT COUNTY:

Many of you were voters in 1917 and supported the Union Government of that date. The reasons for supporting the candidature of Hon. R. W. Wigmore, Minister of Customs and Inland Revenue, in the by-election of Monday next are quite as serious and important as the issues which confronted the electorate three years ago.

Consider the following SIX good reasons for marking a cross opposite the name of Hon. R. W. Wigmore when you go to the polls on Monday:

1. He is a tried and true man, who has served the public with an unblemished record, winning his own way by hard work and honest effort.
2. He represents St. John city in the Dominion cabinet and can do a great deal for the interests of this port during the next two years for which length of time his party is sure to retain power.
3. He is the representative of the Government which gave to the women of all Canada an equal right to the franchise.
4. He stands for the Government which kept Canada in the war until the cause for which our men were fighting was triumphant.
5. He supports the Government which has granted the most generous pensions to dependents and disabled men of any country in the world and which has also given, through the Department of Soldiers' Civil Re-establishment a chance to every returned man to better himself by education and training on returning to civil life.
6. He stands for stable government at a time when the spirit of unrest threatens the welfare of every nation. His opponent is committed to a policy which will shut down industries, throw men out of work and reduce to an even greater extent than at present the value of our Canadian dollar.

FED SAWDUST AND COWS GIVE LOTS OF MILK

Chicago, Sept. 19.—When the dairy farmer of the future needs food for his own he may get a fresh supply by going out in his wood lot and reducing a few stumps to sawdust. By chemical treatment hydrolyzed sawdust may be converted into a nourishing cattle food.

This fact was brought out today at the sectional meeting of industrial and engineering chemists, American Chemical Society, at the University of Chicago. The process of preparing animal food was described by E. C. Sherman and G. W. Bianco.

White sawdust, finely ground, is treated under steam pressure with dilute sulphuric acid in a large boiler. The acid is a detergent. This breaks up the fibre and extrudes the sugar. To prevent injurious effects, the acid is neutralized by adding lime to produce chemical action. The liquid thus obtained, when boiled down, is rich in sugar, and, when mixed with the fibre, produces a moist food containing about 15 per cent of water, in which form it is fed to dairy cows.

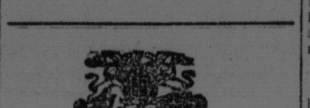

At the Forest Products Laboratory, United States Department of Agriculture, Madison, Wis., experiments proved that three cows thrived on this sawdust ration, and not only gave more milk, but increased in weight.
