Parliament had a discussion on Spanish affairs.
Lord Palmerston, in answer to a question, said that there was nothing at present which could lead in any way to the interference of the French Government in the affairs of Spain—that Emperor of France, a just man would feel that foreign interference would be unjust. He was also a max of sagacity, and events had shown that interference heretofore in Spanish difficulties had been attended with disaster to those interfering. There was no reason, he said for any apprehension that NapDeon had any such intenton.

THE BAILBOAD.

The second attempt of those engaged in forwarding the Brockville and Ottawa Railroad, was, on Thursday last brought to a crisis by the cry of "breakers ahead." Let us review the cause in a spirit of calmness. Our readers are aware that a new board of Directors was lately appointed. Lanark and Renfrew with their

ed. Lanark and Renfrew with their £200,000, are represented by four mem-bers; Brockville, with its £100,000, being represented by two members—the other six members constituting the board were voted in by the Stockholders. Six mem-bers of the Board belong to Lanark and Renfrew, and six may be said to belong to Brockville, E. H. Whitmarsh, Esq., being the only director of the remaining six not actually residing in or near the town, although his position as Warden of Leeds and Grenville, makes him cling to the Brockville portion of the directorship. the Brockville portion of the directorship Brockville and Lanark and Renfrew may

therefore fairly be stated as having equa control in the Directory. On the 2nd of July, the Directors con-

cluded to place at the disposal of the Hon. James Morriss and George Crawford, Esq., the sum of £48,000 for the purchase of iron. Lanark and Renfrew were called upon for £32,000 as their portion—£16,-000 being the proportion for Brockville. With this sum at their command the Gentlemen named were to proceed to England. Lanark and Renfrew at once responded to the call, and placed then share in the hands of the Directors—Brock

ville only placed at the disposal of the Di-rectors £9,000, being £7,000 short of the required amount. Elizabethtown was also called upon, but did not respond. On the 16th of July, another meeting of the Board was held, when it was thought

best to defer the departure of Messrs. Mor-ris and Crawford, for England and that the £48,000 specially voted for the pur-pose of iron should remain at the credit of the Directors for this special purpose and no other. In order to carry or the work, it was also deemed necessary that a fur-ther call should be made on the Municipalities, Lanark and Renfrew for £16,000 Brockville for £8,000 and Elizabethtown

for £4,000. Lanark and Renfrew again responded to the call—Brockville did not —neither did Elizabethtown. Thus

FEVER AND AGUE.

and MR. EDITOR : I have a few wol say relating to my own experi Last fall I had the fever and agae hard, for a long time, and tried d fferent medicines, all of which said to be unfallible. Most of the me no good; some would break the for a few days. At length I adop system that cured me is a few days

my health has been excellent ever si Many others have tried it by my add and been cared in the same way. mathe disease to de

the is comes on every day; no lood or other drink, medicine than cold water should e the stomach for twelve hours prev to the chills coming on, as the ston at that time is incapable of diges any thing ; nor should any food other drink than cold water be taken til after the fever has passed away ; eat as little as possible of bread in water, or something very plan. the less you eat the better; there. fear of starving anything to death exc the fever. Do not let any one persi you that because you were so sick

terday, and could not eat arything, must have something nice to-day, it will surely feed the fever. the chill comes on, just gratify natur the full extent, and drink all the water you want, and try to drink a more. In addition to this, take a bath an hour previous to the chill ing ou. Auy kind of a bath will but the shower bath is best. Then c yourselt up warm in bed, and you

sweet, and very likely get so m that the sque will not rouble you t the day.

This course of treatment, when idly adhered to, I have never known fuil, and a person once cureil in way, is thoroughly cured, and has of the bad effects of drug medicine combat with, and no doctor's bill jay.
