WHOLESALE DRUGGISTS,

481 ST. PAUL STREET MONTREAL.

Common Diseases and Common Remedies.

MOTHER—"John, dear, I have arranged to have parties for the children on the tenth of October, the sixth of November, on Christmas and the 18th of February."

FATHER—"Quite right, dear; and I will just write the doctor to call on the eleventh of October, the seventh of November, the day after Christmas and the 19th of February."

Why did not that thoughtful and kind father save himself all that trouble and the great expense by spending fifty cents for a couple of bottles of Dr. Wilson's Herbine Bitters and giving a dose around on the days he mentioned?

The most probable reason is that he was too busy a man to give the attention he devoted to most subjects to the health of his children, and left all that to his wife and his doctor. Besides, he was a man who thought nothing of expense, and a few five-dollar bills, more or less, didn't trouble him any. This is different with most of us, who have to grub hard for a living, and don't get a too good a one at that. We want something that is right at hand, and that will not cost too much. Such a remedy is Dr. Wilson's Herbine Bitters.

What is Dr. Wilson's Herbine Bitters?

It is just such a remedy as our grandmothers, great-grandmothers and great-great-grandmothers used to concoct out of herbs in the early days of this colony. In those days, when they had to walk or ride twenty, fifty, or more miles for a doctor, and two or three visits meant that the cow would have to go to pay the bill, they were very careful about sending for a physician with titles to his name. Then the people themselves were able to go into the woods and find herbs which would cure the most of the diseases that the people were subject to then. Some of these concoctions were wonderful for their cures. And the people were healthy in those days.

It is fortunate that nature has so provided that districts where certain diseases prevail has at hand—if it were only commonly known—remedies for these diseases. It is said that, where there are poisonous snakes, there are remedies for the poison of snakes. Certainly, the back-woods of Canada contain remedies for indigestion, dyspepsia, and contain blood-purifiers of the greatest efficacy, and everything to make the blood healthy and keep the head clear and the eyes bright.

The most efficacious of these herbs are contained in Dr. Wilson's Herbine Bitters. They are here found in their most concentrated form and purest state, and combined with the highest chemical skill. It is the care and skill shown in this combination which has given these Bitters a reputation

which extends from ocean to ocean, which has given them a place in the prescription books of physicians, and which has enabled them to effect so many wonderful cures.

Perhaps there is no class to whom Dr. Wilson's Herbine Bitters has been more welcome than to the large army of brain workers. Exacting brain work means that the blood is drawn from the digestive and other organs to nourish the brain, which wastes much more of the life-giving qualities of the blood than almost all the other organs put together. When the blood is drawn from the digestive organs they become weakened, and they cannot do their full duty. Then the blood becomes impoverished, the body weak, the brain ill-nourished, and the mind weakens. Peevishness, loss of will power and energy follow very quickly, as well as dizziness, irregularity of the action of the heart and other organs. All brain-workers recognize these symptoms, and dread them. There are two remedies which, fortunately, may be taken at the same time, both with good results, the one helping the other. The first is rest, the second is Dr. Wilson's Herbine Bitters. The effect of the former is to give the brain a chance to recuperate, so that the body may devote itself to the purpose of strengthening its bones and muscles. The second is in purifying the blood, so that the stream of recuperation is a pure one, bringing health and not disease. It also tones up and strengthens the digestive organs, the stomach, liver, bowels and others, so that they do their work promptly and efficiently.

On other pages in this valuable little book are printed a number of letters from those who have used, and have been benefited by, Dr. Wilson's Herbine Bitters. It is a great privilege to be able to bring back strength to the debilitated, to return the flush of health to the pallid cheek. This Dr. Wilson's Herbine Bitters have done, is doing constantly, and will do for many years, so long as it is used by the ailing and retains the great virtues it now possesses, which will be as long as human beings are constructed as they are to-day.

It is well to remember, then, and to tell others who are ailing, that Dr. Wilson's Herbine Bitters positively cure dyspepsia, indigestion and all diseases from similar causes; that they are almost indispensable to students and all who follow sedentary pursuits; that they contain nothing which can injure the most delicate, but that their action is wholly beneficial; that they have been tried and found of advantage by tens of thousands who talk freely of the great benefit received from them, and many of whom have not hesitated to publish the fact of their cures to the world.

WHEN YOU WANT SUCCESSFUL DYEING, USE TURKISH.

ECLIPSES.

- In the year 1892 there will be two eclipses of the Sun and two of the Moon.
- I.—A total eclipse of the Sun, April 26th. Invisible over Canada, Visible over Peru, Chili, the South Pacific Ocean and New Zealand.
 - II.—A partial eclipse of the Moon, May 11th, partly visible in Canada and the West Indies. Begins at 2h. 59m. ev., ends 8h. 57m. eve. Montreal Mean Time.
 - III.—A partial eclipse of the Sun, Oct. 20th, visible over Canada and the West Indies. Begins on the Earth at 11h. 19m. mo., ends 4h. 01m. Montreal Mean Time.
 - IV.—A total eclipse of the Moon, November 4th. Invisible, but visible over Asia, Europe, Australia and Africa.

The Minister's Second Wife.

HOW SHE FELL INTO DISGRACE, AND HOW SHE GAINED THE HEARTS OF HER HUSBAND'S FLOCK.

Great was the excitement at Crump's Corners (popularly called Crumpses Corners), when the minister brought home a new wife. No one exactly objected to his marrying again. Miss Savory Jones had been heard to remark that she would have been the *last* one to say a word if he had only married a person of fitting age and attainments, and, as Miss Savory was well known to be alluding to herself, no one doubted her statement. The Widow Wilkins has also had a matrimonial eye upon the minister for some time. His first wife had been dead two years, and as *the* Widow often said, "Dear knows, the poor children needed some one to do for 'em."

But now all the Crumpian hopes were blasted at a breath. The Rev. Phineas Ford had been absent for a fortnight's holiday, obtained every year by exchanging with the minister of a little mountain village; and when he stepped off the evening train, on his return home, he was accompanied by a girl—a new girl—with dark bright eyes and short curly hair like a boy's. The élite of the Corners were all on hand to see the train come in of course, little expecting the shock that was in store for them. But they had barely time for one horrified look, before the minister, passing through them with a pleasant word and smile, helped his wife into the old buggy sent to meet him, and was gone. The population gasped once or twice at the suddenness of the apparition, put in about ten minutes of uncommonly vicious gossip, and then went home to bed.

"I am sorry, Kitty, my love," said Mr. Ford, as they drove along, his kind, worn face beaming on the little figure at his side, "that I did not spend a little money on the house and the children before you came. I am afraid you will find them much neglected."

"Never mind, Phineas," said the little woman, brightly, "it is only what I expected, and as to the money, I would ever so much rather spend it myself, and I know you don't mind."

"I don't, indeed," said her husband fervently. "But I wish it was more. Thirty dollars is all I have put by for the purpose."

"Well, we will make it go as far as sixty, as you shall see," said Kitty. "And now, here we are at home and all the dear children at the door to meet us."

The next minute Mrs. Ford was in the shabby dining room, talking, laughing, and greeting right and left and carrying the younger children's hearts by storm. The eldest, Jean, a rather pretty girl of fifteen, stood apart and had but little to say, but the young step-mother took no notice, and soon the whole family were gathered round the supper table. Old Debby, the minister's housekeeper, who had lived with his first

wife for years, was an excellent cook, and every one did ample justice to her fragrant coffee, hot biscuits and ham and eggs, followed, on this auspicious occasion, by a great dish of wild raspberries and rich, yellow cream.

It was not until supper was over and the children in bed that Mrs. Ford had time to take a look at things in general. The minister was called away to interview a parishioner in his study, a small, dull room across the hall, and she was quite alone. She walked round the room examining closely.

"Rag carpet," she commented cheerily, terribly old and worn, red table-cloth full of holes, faded out of knowledge, lace curtains old as the hills—may wash once more perhaps—crotone cushions on the chairs perfectly worn out and—well, never mind, we'll see in the morning."

The next day at breakfast, Mr. Ford announced that he had to attend a meeting ten miles off and should not be home before night, and shortly afterwards he tore himself regretfully away. Mrs. Ford busied herself in getting the children ready for their long walk to school, while Debby put up their lunch. The children, like the house, were in the last stage of shabbiness. Debby had kept their clothes mended, but she had no further ideas on the fitness of things, and Mrs. Ford saw at a glance that the dresses of the three little girls were badly made and ill-fitting, as well as old and dingy, their stockings faded to the dullest of hues and their boots unblackened. There was no time to do much more than see that hands and faces were clean and send them off, each with a kiss and a lunch basket, and then the little new mother turned to the ancient handmaiden.

"Now, Debbie," she said gaily, "you and I don't want any particular dinner, and we are the only ones at home, so I want you to finish up your work while I unpack, and then show me all over everywhere."

The grim Deborah looked for a moment at her mistress, and then her hard features relaxed into the semblance of a smile, and she expressed her readiness to do all that was required of her. An hour later the two women stood in the garret, whither they had repaired after a cursory examination of a shabby parlor and shabbier bedrooms.

"Now, then," said Kitty. "First of all, what is in all these boxes? Old clothes, though, I guess." "They're all about gone," said Debby. "They ain't no sort of use."

"Let us see," said Kitty, lifting a cover off a huge old chest. "Ah, I see these things are all cotton, and I suppose you have woollens in the others. What is this?" she went on, lifting out an immense bundle of cotton stockings of all sizes and the most doleful shades.

----	-----	---	------	------	------	------	------	------	------	------	--	---------

PLANETS IN JANUARY, 1892.—The Moon is near Venus on the 1st, and passes Jupiter on the 4th. Mercury is stationary among the Stars on the 8th, and Saturn stationary on the 10th. The Moon is near the latter on the 19th. Mercury is visible in the morning sky around the 19th, when he is at greatest elongation West of the Sun. Luna is close to Uranus on the 22nd, and in Conjunction with Mars on the 24th. Uranus is at Quadrature (90° from the Sun) on the 26th. The Moon is in Conjunction with Mercury on the 27th, and with Venus on the 31st.

NOTE.—The third column gives the Moon's place in the "Signs," the cross heads give the Planets places, "Mars in Libra, etc., which denote the "Constellations."

TURKISH DYES GUARANTEE PERMANENCY OF COLOR.

"Them's the children's old stockings," remarked Debby, rather grimly, "and there ain't no sort of use looking for holes, Mrs. Ford. I know they don't want much mending, but just look at the color! The children *couldn't* wear 'em—no way!"

"Well, not just as they are," said Kitty, "but just throw them into that clothes basket we brought up, Debby, please. And here are some lace curtains, not much worse than in the dining room, are they? They would do nicely for a bedroom."

"They wouldn't hold together two minutes, if you tried to put them onto the stretchin' frame, said Debby, "and if you put them up without starch, they wouldn't be clean a month on this dusty road!"

"Well, I think something may be done with them" said Kitty, "so into the basket with them."

"And now I don't think there is anything more here I want, so let us go to the next box."

This receptacle proved to be full of old woollen garments of different shapes and sizes, some very much worn, others only faded and spotted. Mrs. Ford threw some on one side for rags and put others into the basket, while Debbie looked on wondering and intensely sceptical as to putting such things to any use. At last Kitty untied a bundle and disclosed a thin summer coat of the minister's, of true clerical cut and not much worn, but rusty and brown as only a cheap russel cord can get.

"The very thing!" she exclaimed. "Mr. Ford's thin coat is just gone; this one will tide him over the rest of the summer nicely."

This was too much for the faithful Deborah, and, like the proverbial worm, she turned.

"Now look here, Mrs. Ford," she said decisively, "if this is the way you're goin' to carry on, I don't know what'll come to us. Them old curtains is no use—no use at all! And them stockin's is ten times worse than what the children's wearing now, and they're bad enough, I should say; but when it comes to puttin' that there old brown faded, spotted coat onto the minister"—Debby stopped for want of breath, and Kitty burst out laughing.

"Oh, Debbie," she cried, "I can't help laughing at you. But I should have explained to you that I mean to dye these things;" and she entered into a few details. Now Debbie did not believe in dyeing and did not scruple to say so, but Kitty told her to wait and see. Between them they carried down-stairs a goodly basket of things ("rubbidge" Debbie called it) and spent the rest of the day ripping and washing the old garments, all but the coat which was left entire. "How it's going to turn out, give me a day's dyein. But as for that there coat there's cotton into it—lots of cotton—and no person can dye cotton black; it gets a kind of a grizzly grey."

Kitty explained that there was a black dye expressly for cotton and mixed goods, by which they could be made to look as well as wool. To which Debbie replied "H'm! when I see it I'll believe it!" and bounced into the pantry to make soft gingerbread for tea.

Next Sunday the little Fords went to church in the same clothes as heretofore, but with legs and feet neatly clothed in fresh jet black stockings and shiny well varnished boots, and even this little change was a great improvement. The village was not behindhand in making acrid comments, however.

"Did you see," said the Widow Wilkins that night, as she and Miss Savory Jones were sitting over a dish of tea, "she's been and bought new stockings for all those children; bran new, and the stainless black too, I know by the looks of 'em. Catch her darning up old ones, when she could buy new."

"And their boots," said Miss Savory, "sponge varnished they were, I know, and we all know what a bottle of varnish costs and how soon it goes. Let her use the blacking brush and a little elbow grease, as we do."

These good ladies did not know that from 10 cents worth of Turkish Shoe Dressing, Mrs. Ford had concocted a large bottle of the best of varnish, enough to last the family boots for a long time. That the minister should wear an apparently bran new coat of deepest richest black, roused no one's ire, and his wife soon eyed it with pride as she reflected what new buttons, freshly worked button holes, and last, but not least, Turkish Dyes, had done for it.

Next week came Miss Prissy Wade, the village dress-maker, and she and Mrs. Ford worked from morning till night. There was no lack of material, and nothing was bought but linings and a little trimming of one kind and another for anything that seemed to demand it specially. Miss Prissy was lost in admiration of the beautiful shades of the goods she was working on, and Kitty let her into the secret, but begged her not to mention it. Miss Prissy asked many questions as to the *modus operandi*, but Kitty told her that the directions accompanying each package of Turkish Dye were so clear that any one following them closely could scarcely fail to have the best results, "and in my case," she went on, "I am at a double advantage. I have often dyed before, and when I was married a friend gave me a large box of Turkish Dyes of all the most useful shades, so I am put to no expense at all. Really, though, even if one has to buy the dyes, the expense is nothing compared to the results."

Next Sunday, the two youngest girls, Milly and Nan, came to church in pretty suits of navy blue made from all wool delaine which had been a lightish blue, and which Kitty discovered in a desperately soiled and dingy condition. Two years before the four

PLANETS IN FEBRUARY, 1862.—The Moon is in Conjunction with Jupiter on the 1st. There is a very close approach of Venus to Jupiter on the 6th. Uranus is Stationary on the 9th; Saturn near the Moon on the 15th, and Neptune Stationary the same day. Luna passes Uranus on the 18th, Mars on the 22nd, Mercury on the 27th, and Jupiter for the second time this month, on the 28th.

TURKISH DYES NEVER DECEIVE.

had dresses all alike; for the four were manufactured the two. These suits were corded with satin to match which had once been white pieces of the trimming of their own mother's wedding dress, a skimpy affair of fine white alpaca, which Kitty had found ripped up and rolled in a bundle. Divining what it was, she was about to replace it, when her husband came in, and seeing how matters stood, told her that he knew nothing would have pleased the children's mother more than to see them wearing it. The white satin took a lovely shade of navy blue, and the alpaca was dyed a soft, warm tint of grey and trimmed with crimson cord, for Miss Prissy the third girl, who was a dark little gypsy and looked specially well in it. Jean was made happy with a dress of a really exquisite shade of pale olive, for which Mrs. Ford bought some pretty gimp, which, as the color of the goods, was one of the very newest to be seen anywhere, made the dress look like anything but what it was, viz., an old pale grey beige faded to a mournful yellow tinge. It was very ample though, and made up "very stylish and becoming," as Miss Prissy remarked.

These four dress were a week's work for Miss Prissy and her employer; but the little mother found time in the evenings to attend, as she said, to the family hats. The two youngest had black straw of a pretty good shape, but very dusty-looking and sun-bleached. Mother Kitty, however, to the great amusement of the children, produced her varnish bottle, and after thoroughly brushing the hats, gave them two good coats of shoe polish. The girls exclaimed that they looked like new, but the old trimming was quite worthless and Kitty had to set her brain to work to devise some. From a corner of the inexhaustible garret she exhumed a box filled with old-fashioned finery which had belonged to the children's grandmother. Two pairs of hideous yellow and white checked bonnet strings, of however very good quality, when dipped in the navy dye, came out a very pretty mixture of two shades of blue, in checks so nearly alike in color as to be almost invisible. The black hats were trimmed with well wired bows of this, and looked freshness personified. Jean's last year's chapeau was quite presentable; but poor Madge was found to have no hat at all, so Kitty bought for her a wide grey straw and trimmed it with a frayed bias ruche of thin crimson silk.

"That's very pretty, my love," said Mr. Ford, laying a deferential finger on the soft mass of fluffiness as it lay in his wife's lap. "Where did you get it?"

"Well," said Kitty, "I found it up-stairs. I think it was used formerly to line the book case doors."

"Oh, yes," said Madge, "and then Nan slammed the door one day after getting out a book, and upset a bottle of ink. No one knew it, and it trickled all the afternoon all

over the silk; and then Debbie took it off and now there's none."

"To be sure," said her father, with a glance at the door in question, now blankly exposing its not very presentable contents through the uncovered glass. But I had no idea the old silk was such a pretty color as that. However, I am not a great hand at noticing things."

A smile flickered for a moment round Mrs. Kitty's dimples, as if she could explain matters if she would, but she said not a word.

After making the children temporarily presentable and getting them some plainer clothes made for school, Mrs. Ford's next care was the house, and now she hardly knew where to begin. She had declined taking part in any parish work for a month or two, and Debbie was quite competent to do all the housework, but there was so much lacking that Kitty often doubted whether her \$30 would go any distance at all towards a better state of things. She was just about to make a beginning, when Mr. Ford was called away from home on business to be absent two weeks, and his wife at once made up her mind that all that could possibly be done in the time should be accomplished before he came back.

About a week before, Mrs. Ford told Debbie that she wanted to begin cutting and sewing carpet rags.

"We must have new carpet, Debbie," she said, "and there are plenty of rags. But oh! the cutting and sewing. What a time it will take."

Debbie suddenly wheeled round from the dishpan. "I declare to goodness!" she exclaimed, "if I didn't clean forget." "Forget what?" asked Kitty, wondering.

"Why, up in the left-hand corner of the garret, clear back under the eaves, there's a barrel of rags all ready sewed and wound in two pound balls. Twenty eight of them there is, or I'm mistaken."

"How splendid!" But I don't see, said Kitty, "why in the world you didn't use them. I'm sure you needed carpet."

"Yes," said Debbie, as she meditatively polished a glass, but 'twas this way. A year before the first Mrs. Ford died, she was laid up in the house all winter and took a fit of sewing rags. We had an awful lot and we made quite a bit of carpet, picking out all the best looking rags. But after that, all the others were such mortal sad colors, that we couldn't use 'em no way, 'thout something to brighten them up, and I thought mebber the Turkish Dyes would help us out with 'em." "Of course they will," said Mrs. Ford. "We will skein them up in skeins this evening and dye them to-morrow. The different colored dyes we have left over in bottles will do nicely, and we will open two or three packets of bright colors besides, as we have so many rags."

The two weeks flew quickly by, but Mrs. Ford and Debbie worked almost night and

When you want a dye you can recommend, use Turkish.

PLANETS IN MARCH, 1892. — The Moon is close to Venus on the 1st, and near Neptune on the 4th. Mercury passes behind the Sun (Superior Conjunction) on the 6th, and is in Conjunction with Jupiter on the 12th. The Moon is near Saturn on the 13th. Saturn is at "opposition" and overhead at midnight on the 16th. Uranus is alongside the Moon the same day. The Sun enters Aries and Spring commences on the 19th at 10.28 ev. Jupiter is in Conjunction with the Sun on the 20th. Mars is 90° from the Sun, and overhead at 6 mo. on the 29th, Mercury visible in the Evening Skies about the 31st, when the Moon is close to Venus.

TURKISH DYES GIVE PERFECT SATISFACTION.

and day, and by the time the Rev. Phineas returned all was in readiness for him. His wife met him at the door, all the children in her train, each burning to disclose the wonderful changes that had been made. In a tumult of excitement they hustled the minister into the dining-room and pranced delightedly about to the tune of their father's amazed and delighted comments. What a transformation! The old dingy rag carpet was replaced by another also of rags, but of such bright, cheerful colors and boasting fancy stripes of such gay combinations, that standing out against the back-ground of soft grey, the effect was as pretty as any one could wish. The old bleached, dull wood-work of the chairs was revived with a coat of mahogany shellac stain, and the cushions were recovered with odds and ends of strong woollen goods dyed a warm crimson. At the windows hung the same old curtains, but instead of dirty white they were a beautiful dark shade of old gold. Mrs. Ford had dyed with them some pieces of fine old lace curtain, and with these she had underlaid and mended the numberless rents with patient care, and now they scarcely showed as they hung at the windows.

"You see, dear," she said after matters had been somewhat explained, as her husband investigated and admired the neatly wonderful repairs, "it was well worth the time and trouble, because they will not now need washing (although they *would* wash beautifully as far as color goes) and I feel sure they will hold together for a year, perhaps two."

"I should think they would," said her husband. "And the tablecloth, Kitty. What a pretty soft thing to be sure. Is this bought or dyed?"

"It's a blanket! it's a blanket!" shrieked Nan before Kitty could answer.

"So it is," said the minister admiringly. "Who would have ever thought it, though, with that pretty worked stripe at each end. My dear, you are a wonderful woman!"

Kitty blushed high with pleasure. "It is a blanket," she said. "There were plenty of comforters for the beds, and this was a small blanket and almost new, so I thought I would take it and dye it crimson. That stripe at the ends is a trimming that was on some old green rag curtains up-stairs. I laid on two widths at each end to cover the blanket-looking stripes."

"To be sure, I remember it perfectly now," said the minister. "I never thought any part of those old curtains would be good for anything again. I remember they were faded to a dull yellow."

"Come and see them now," said Kitty, leading the way to the parlor and pointing triumphantly to the chairs and sofa. "I upholstered them myself. I think that dark rich green goes so well with the old green carpet, which is good yet. I rubbed green dye into a lot of the worn spots and up and down the seams. Has it not taken off the

shabby look? The gold and green gimp for the chairs I sent away for, and look, Phineas, we manufactured a piano cover out of the curtain that was left over. It matches the chairs and it is edged with the same gold colored trimming as the dining-room tablecloth. What a good trimming that must have been. The parlor curtains were like the dining-room, only of a much lighter shade, as being in less constant use.

"New loopers, I see," said Phineas, lifting a heavy tassel in his hand from where the curtains fell gracefully over it. "Not at all," said his wife triumphantly. "They're dyed, holms bolus, though I was dreadfully afraid that the pieces of wood over which they are woven would do something dreadful. But they didn't, and now they match the chairs exactly."

It would take too long to accompany the family on their tour of inspection over the rest of the house. Suffice it to say, that in every room were found many traces of cosy brightness, all attributable to the agency of Turkish Dyes in the clean, industrious hands of little Mrs. Ford. One of the bedrooms and the upper hall was covered with new, bright rag carpet, and in the other rooms strips bound at the ends with pretty colored woollen stuff were neatly laid in front of bed, bureau and wash-stand. Nearly every window boasted old gold or golden brown lace curtains so carefully repaired as to betray no trace of their age and weakness. Mary's study-table at her bedroom window was covered with a table-cloth similar to the dining-room, only the table being a small one, a piece of blanket had been used without the striped border, and a strip of pretty carpet binding had been laid on flat about 4 inches from the edge, instead of the handsome trimming down-stairs.

To say that Mr. Ford was delighted with all he saw, would be to mildly express his pride and pleasure on his little wife's achievements. She had great difficulty in persuading him to say nothing about it to anybody.

"I think it will be fun just to let every one who comes look and admire," she said gaily, "and we will tell them some day. But I want to mystify them a little. So please, Phineas, promise."

Phineas promised, of course. Debbie and the children were already bound down to secrecy; but little did Kitty think of the consequence likely to accrue from her harmless concealment.

At the minister's house there was never any lack of callers; and as the reports of refurbishing spread abroad, some one was always finding an excuse to run in for a chat and a further examination of the "new things." No one came more often than the Widow Wilkins, and no one made more acrid comments on the Ford's sinful extravagance. Miss Savory, too, was not behindhand in spreading her views on the subject, and by the time the topic had gone the rounds of the Corners, people began to feel it quite a

WHEN YOU GET TIRED OF COMMON DYES, USE TURKISH.

personal matter. Mother Kitty, quite unconscious of the impression her pretty house was making on the neighbors, kept her harmless secret and continued to enjoy all her little artifices.

The Sewing Circle met at the Parsonage for the first time since the new Mrs. Ford's advent, and a goodly gathering it was. Needles and tongues alike flew fast, and it was not until nearly tea-time that anything occurred to mar the harmony of the meeting. Then some one made an innocently admiring remark about the carpet, and it became for a few minutes a general theme of commendation. At last Widow Wilkins' opinion was asked and the storm broke. What the widow said was short, sharp and to the point, though it need not be noted here; but in less than three minutes poor Kitty, standing among her guests and turning great bewildered dark eyes from one to another, was put in possession of the facts of the case. In a flash it was all revealed to her, and she saw plainly that the coldness which had sprung up between her and many of her husband's flock was simply due to a misunderstanding.

"And so," she said quietly, after a minute or two of silence, "you think I am an extravagant woman?"

"We know you are," said Widow Wilkins grimly. "From the very first I said so, and though 'tis not my affair, Mrs. Ford, I just felt to mention it when it was brought up. We've all seen the children's clothes of new fashionable material, and as for the house 'tis just the same. Rag carpet with half the rags boughten. I knew a woman once bought a dollar's worth of Turkey red for a rag carpet, but that ain't a circumstance to your'n. New covers for the parlor furniture and new curtains all over the house. I want to know how you expect to do it on \$500 a year, even if livin' is cheap up here; and as we pay the salary, we've got some right to see that the minister don't get over head and ears in debt." "Wait until he does, Mrs. Wilkins," said Kitty demurely, her red lips twitching with a mischievous smile.

"Excuse me for a minute please, I have something to show you." She ran up-stairs, and in a moment was down again, flushed and breathless, with a great armful of dresses and a little piece-bag in her hand. "I kept these pieces," she said, "to show my husband; but I can use them now to show you what the children's new things were made of!" She threw the fresh, pretty dresses deftly across the long dining-table in a row, and laid on each a sample of the goods in all its original dinginess. The ladies crowded round eagerly to look, and after the first surprise the air was filled with a buzz of delighted admiration. Kitty explained at full length all her shifts and contrivances, and they listened breathless and entranced. "And what did you say was the name of the Dyes?" asked the doctor's wife. "The Turkish Dyes," said Kitty. "I have used

other kinds again and again, but with no certain prospect of success. Now, with the Turkish, there need never be a failure. Follow closely the directions, which are most clearly stated on every package, and you are sure of success. You can get all the newest and most fashionable shades, which is one thing that misled you all, I expect."

"You could not, I think, name a color, no matter how new, that I could not show you how to produce with the help of my invaluable little friend, 'How to dye well.' Then the dyes are absolutely fast. Many of the shades scarcely color the rinse water, and the goods may be washed with soap times out of number. Black cotton stockings done with Turkish Dyes are absolutely seamless, and old light thread or silk gloves can be dyed without the slightest fear of staining the hands. In fact, besides being the only household dyes in my opinion worth using, they are even superior to very many of the dyes used by the manufacturers. New goods often wash out far worse than those dyed with Turkish Dyes. There is very little trouble in using the Dyes, and many colors set so fast that they do not even stain the hands. Look at this exquisite pink shell nun's veiling; it was cream once, but was terribly yellow and old. It did not lie in the pink dye quite *three minutes*, and look at it now! It is just the color of an oleander blossom."

Kitty paused for want of breath, and the ladies looked at one another in silence. They were beginning to realize how they had misjudged her, but scarcely knew how to offer an apology. At length Miss Savory Jones rose, her tall, angular figure drawn to its full height, and crossed the room to where Kitty stood. "Mrs. Ford," she said, holding out a long yellow hand, "We've all done you a wrong, and I guess we're all sorry. If you think you could just take and forget all about it, we'd like to be your friends." An affirmative murmur ran round the room, and in two minutes' time Kitty's kindness of heart and ready tact had adjusted a matter which might have rankled in some women's hearts forever. From that day the minister's wife took her place in the hearts of her husband's people. Now that they were no longer blinded by prejudice, they saw her in her true colors, and for long years she lived among them on the best of terms.

Not long after the sewing circle, the village store displayed in its window a wonderful revolving stand covered with crescents of all colors of the rainbow, in which the proprietor took such pride that for some weeks he spent all his spare time walking up and down the pavement with his hands behind him admiring it. And many a time, as customers began to pour in and he sold the little magic packets to all the country round as fast as he could order them, did he congratulate himself on possessing the agency for the Turkish Dyes.

When you get tired of dull color dyes, use Turkish.

A Doctor or a Fool.

Every man at forty is a doctor or a fool, is a proverb which states a general truth perhaps a little sharply. Without any exaggeration, the meaning is that every man learns by experience what is good for him: what he can eat and drink and what he cannot; what medicines he can take to his advantage and what he must let alone. In this sense the proverb is true.

Then, what is the experience on this subject of the great bulk of the men and women of Canada. It is that Dr. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS cures pretty nearly every complaint of the stomach, liver, kidneys and bowels. This is a broad statement, but a truthful one, and is vouched for by the experience of tens of thousands of people who have received great benefit from the pills.

It is easy to become a good doctor under these circumstances. During the North-West Rebellion a volunteer took with him a few remedies of this kind, which he used on himself and his comrades as directed. He became famous in his company and regiment for his cures, and, as long as his remedies lasted, he was more sought after than the regimental surgeon. The remedies mentioned in this book are sufficient to provide a medical chest, which cures pretty nearly the whole range of diseases in every household.

And what does DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS do?

They cure Indigestion.

Indigestion which is the seed ground of disease. Indigestion which leads to many others of greater terrors and harder names; but all arising from the same cause. DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS will cure Indigestion.

They cure Liver complaint.

Liver complaint which lurks in Indigestion is cured by DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS. How distressing are the symptoms of this disease; how enervating and how depressing. But DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS relieve them though doing away with the cause.

They cure Diarrhoea.

Diarrhoea, a painful, weakening and dangerous disease, is cured by DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS. This disease should not be allowed to run, lest it should run too far. DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS will stop it.

They cure dysentery or bloody flux.

Dysentery or Bloody Flux is a stage of Diarrhoea further in advance. In it blood is forced through the soft, pulpy coatings of the vessels, so rendered by the irritating mucous. The straining completes the mischief. DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS will cure this disease. But wise men

and wise women will never let Diarrhoea get so far.

They cure Piles.

Piles, so painful, so destructive of peace, is cured by DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS. They will cure either Blind Piles or Bloody Piles. The latter is caused by the knots of vessels at the fundamen- swelling and bursting. Sometimes these are cured by operations. But before the physician's knife is tried, it is better to give DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS a chance. It is seldom that these simple remedies fail.

They cure Jaundice.

Jaundice is dreaded probably as much as any other disease. It is one of the results of imperfect digestion. Everybody knows its symptoms, and many who have made the trial know that DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS cure it.

DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS cure waterbrash.

DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS cure heartburn.

DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS cure colic.

DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS cure pain and flatulence in the bowels.

DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS cure costiveness.

DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS cure sick headache.

DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS cure practically all diseases of the digestive organs.

Then use DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS.

—
WORTH FIFTY DOLLARS A BOX.

CARLETON.

Mr. J. W. Brayley.

SIR,—I have used DR. WILSON'S ANTI-BILIOUS AND PRESERVING PILLS through a period of four years. I have recommended them to many persons afflicted with headache and bilious derangement, and administered them frequently to those about me or under my care with invariably good results. We use little or no drugs besides in our family; by the timely use of these Pills we are, no doubt, saved many a trip for the physician. A friend of mine, who has a good right to know, said to me, "If I was travelling, and had but one box of Dr. Wilson's Pills, I would not part with it for fifty dollars, if I knew I could not get another." I cheerfully endorse his opinion as to their value under the circumstances. My own is, there is no other Pill equal to them.

HENRY G. CASEY.

PLANETS IN APRIL, 1892.—The Moon is in conjunction with Neptune on the 1st, and with Saturn on the 9th. Venus is in conjunction with Neptune on the 12th. The Moon is near Uranus on the 13th and passes Mars on the 19th. Mercury is in Inferior Conjunction (between the Earth and Sun) on the 19th. On the 23rd Uranus is in opposition to the Sun and overhead at Midnight. The Moon is close to Jupiter on the 24th, passes Mercury on the 25th, Neptune on the 28th, and Venus on the 30th, when the latter is at greatest Elongation East, and very brilliant in the Evening Sky.

TURKISH DYES ARE BRIGHT, PURE AND LASTING.

Dr. Howard's Quinine Wine.

Sulphate of Quinine is a standard medicine in all systems of medical treatment. It is an anti-periodic, this quality making it most useful in diseases where symptoms appear at regular periods, such as intermittent fever. It is anti-pyritic, reducing abnormally high fevers. It is anti-neuralgic, relieving the shooting, stabbing, boring, burning, deep-seated pains of neuralgia, which are caused from a molecular change in the nerves or their connections. Under these circumstances, it is not wonderful that Sulphate of Quinine is so highly esteemed by the medical profession.

Probably the most valuable preparation of Quinine for general use is Dr. Howard's Quinine Wine. It is at once an appetizer, a tonic, a nerve-sedative. It not only cures diseases, but fortifies the system against them.

Dr. Howard's Quinine Wine will give sleep, will give an appetite, will strengthen the pulse, will cure neuralgic pains, will do away with twitching of the muscles and trembling of the limbs, will restore the debilitated, "run-down" system to health.

Dr. Howard's Quinine Wine may be taken with benefit by those of a weak constitution without injury. All its actions are beneficial.

The dose of Dr. Howard's Quinine Wine is small, but its good results to mind and body are large. To the taste it is pleasant, but to disease it is destruction.

Nervousness gives way before Dr. Howard's Quinine Wine. You are head-achy, nervous, so that you cannot sleep or rest. A teaspoonful of Dr. Howard's Quinine Wine will set you right.

Do you live in a fever or ague district? Then Dr. Howard's Quinine Wine will prevent, as well as cure, fever. Probably Mark Tapley, who was always jolly even in the swamps of the Mississippi, must have had a secret store of this Quinine Wine.

During convalescence from exhausting diseases Dr. Howard's Quinine Wine is most useful. It gives an appetite, aids the digestion and invigorates the whole system. With fevers lowered, the nerves toned up, the appetite improved, and the digestion made perfect by the use of Dr. Howard's Quinine Wine, there is nothing that can prevent the rapid recovery of the convalescent.

Dr. Howard's Quinine Wine shows its good effects almost as soon as used. You take it, and you feel that you are improving. One bottle usually is sufficient to create a revolution in the diseased body; two or three will effect a cure.

Physicians recommend Dr. Howard's Quinine Wine. If any one does not, it is, most probably, from the reason that he has not tried it, or that his judgment is biased by

his prejudices. But there are few such now, as the merits of this remedy are too well known to admit of ignorance on the part of any prominent physician.

The sum of the whole matter is that Dr. Howard's Quinine Wine contains all the elements of quinine in a pleasant form; the dose is regulated to produce the best results; that it is pleasant; that it is effective in fevers and nervous complaints.

It is not a wise policy when disease attacks the body to neglect remedies, and leave the cure to nature alone. The mere fact that there is disease means that nature requires aid. If it were not so, nature would have not given way before the attacks of the disease. But nature does not require to be clubbed into doing her good work of healing. A gentle assistance in the earlier stages of disease is all that is necessary. A little rest, a little assistance, and, except the gradual loss of vitality through increasing years, the work is done.

Now, Dr. Howard's Quinine Wine is one of these gentle, tonic remedies. It soothes, it reduces excitement through over-work or other causes, it engenders sleep, and the tired, overstrung nerves are given the rest they need, the fever in the blood is reduced, and the one who is threatened with serious illness wakes up a new man or woman.

"A stitch in time saves nine," says the proverb. This is as true of the body as of a coat. Let the nerves and muscles begin to tire out, to work with friction, and every hour the trouble increases. The farmer and the machinist understand this well. No sooner does the waggon-wheel or the swift-moving machine-wheel begin to cry out for oil than the oil is applied. If it were not done, heat would generate, and the wheels would run stiffly, and there would be friction and trouble. The body is a machine, and friction in the body and brain is as disastrous as a machine. Thus, such a remedy as Dr. Howard's Quinine Wine is necessary at such times, and it is a blessing to very many that it can readily be obtained, and that its cost is reasonable, and that it is a pleasant remedy as well as an efficient one.

In the more newly settled districts of the country, as well as in those where the land lies low and is marshy, there is much weakness and disease from fever and ague. With these prosperity is almost impossible. Without them prosperity comes readily, if the residents have pluck, perseverance and ordinary good luck. Good health can almost be guaranteed by the use of Dr. Howard's Quinine Wine, at least as far as the malarial and kindred diseases are concerned.

This is a proverb worth many dollars, and it is as true in print as if it were given you by your best friend.

TURKISH DYES GIVE PERFECT SATISFACTION.

PLANETS IN MAY, 1892.—Luna passes close to Saturn on the 6th, and is alongside Uranus on the 10th. Mercury is visible in the Morning Sky on the 16th, when he is at Greatest Elongation West, and rises just before the Sun. Mars is near the Moon on the 17th, Jupiter near the Moon on the 22nd, Mercury near the Moon on the 24th, and Saturn "Stationary" on the 26th. The Moon is near Neptune on the 26th, and near Venus on the 29th. Neptune reaches Conjunction with the Sun on the 29th.

TURKISH DYES ARE THE LADIES' FAVORITE.

Worms, and How to Get Rid of Them.

There are three kinds of worms that infest the child's bowels—the tapeworm, the long round worm, and, most frequent of all, the common thread or seat-worm. The tapeworm infests the whole course of the bowels, both large and small; the long round worm, principally the small bowels and occasionally the stomach; and the common thread worm, the fundament.

THE CAUSES of worms are weak bowels, bad and improper food, such as unripe, unsound and uncooked fruit, and much green vegetables, pork, especially when underdone, an abundance of sweets, and the want of salt in the food.

THE SYMPTOMS of worms are emaciation, itching and picking of the nose, dark marks under the eyes, grating of the teeth during sleep, starting in the sleep, foul breath, furred tongue, uncertain appetite—sometimes voracious, at other times bad, the little patient sitting down very hungry to his dinner, and scarcely before tasting a mouthful, the appetite vanishing; large bowels, colicky pains in the bowels, slimy motions, itching of the fundament; unhealthy, doughy complexion, puffiness of the face and eyelids, tongue large and marked on the sides by pressing against the teeth; high-colored and strong-smelling urine. Tapeworm and round-worm, more especially the former, are apt in children to produce convulsions. Tapeworm is very weakening to the constitution and causes great emaciation and ill-health.

Many of the obscure diseases of children arise from worms. In all doubtful cases, therefore, this fact should be borne in mind, in order that a thorough investigation may be instituted. Cases are not uncommon in which the presence of worms in the bowels has produced Epileptic and Cataleptic Fits, Dropsy of the Head, St. Vitus' Dance, Palsy, Fainting, Hiccough, Dysentery, Convulsion, Lockjaw, and even idiocy.

THE REMEDY for worms in children is DR. WILSON'S DEAD SHOT WORM STICK, which is at the same time agreeable to the appetite of children, in no way injurious to the health, and sure.

Its active ingredients are entirely of vegetable origin, and are separated from the inert and unpalatable matter with which they are found connected in nature. In a word, DR. WILSON'S DEAD SHOT WORM STICK is a safe, quick, reliable and pleasant remedy for worms in children—one they can be induced to take without worry and without f.c.c.e. DR. WILSON'S DEAD SHOT WORM STICK has been a favorite with mothers for many years, and during all these years we have scarcely ever heard of

a case in which the symptoms of worms were at all certain that its use was not followed with good results, in some cases large numbers being expelled by a single stick, as many as from twenty-five to five hundred having been counted in the subsequent stools.

Under the circumstances we strongly recommend the use of DR. WILSON'S DEAD SHOT WORM STICK whenever there is reason to expect the presence of worms in the child's bowels. In the first place, if worms are there, they certainly will be expelled, and perhaps a long train of diseases prevented; and, if there are no worms to expel, there can follow no evil results either to the child's health or temper. He has eaten a candy—that is all.

But it must be borne in mind that sometimes worms may be expelled without there being any signs of them in the stools either dead or alive. When they are met with high up in the bowels and there destroyed by DR. WILSON'S DEAD SHOT WORM STICK, they usually are acted on by the digestive fluids and become mixed with the excrements, often having the appearance of chopped greens.

It must be remembered that when the worms are once carried away the evil is not necessarily at an end. The cause that led to their presence once will lead to it a second time unless proper means be taken to prevent it. Children of a scrofulous disposition, especially, are prone to the breeding of worms in the bowels in large quantities. In such cases DR. WILSON'S DEAD SHOT WORM STICK should be given occasionally to expel the new broods, while DR. WILSON'S TONIC AND SASSAPARILLIAN ELIXIR should also be given to tone and strengthen the system and improve the general health. At once the difference in the child's appearance will show that the proper treatment of the disease is being followed, and health, strength and good temper will abound, where, but a short time before, weakness and peevishness were the prevailing characteristics.

WILSON'S DEAD SHOT WORM STICK is best given on an empty stomach, for thus it is most certain to come in contact with the worms, without the intervention of the food, as then it is sure destruction to them. *It will kill the worms and cure the patient.*

With adults, also, WILSON'S DEAD SHOT WORM STICK will be found to be an excellent medicine, for the popular idea that they only infest the bowels of children is a mistake, and many diseases, otherwise mild, are augmented by the unsuspected ravages of worms. This fact is often found out after many years of distress, which may easily be prevented.

NO MORDANT REQUIRED WITH TURKISH DYES.

PLANETS IN JUNE, 1892.—On the 2nd the lovely Venus is at greatest brilliancy as an evening star. The Moon is close to Saturn on the 3rd and near Uranus on the 6th. Neptune and Mercury are in Conjunction on the 10th. Saturn reaches "Quadrature" and is overhead at 6 p.m. on the 14th, when Mars is in Conjunction with the Moon. On the 17th Venus is Stationary. The Moon is near Jupiter on the 19th. On the 20th Mercury is in Conjunction with the Sun (Inferior) when the Sun enters Cancer and Summer commences. The Moon is near Neptune on the 22nd, Mercury on the 24th, Venus on the 25th, and Saturn on the 30th.

WHEN YOU WANT A GOOD DYE, USE TURKISH.

A Wonderful Magnetic Remedy.

A noted Parisian savant discovered a remedy for internal and external use, which is known in Canada as the FRENCH MAGNETIC OIL.

This is what one who has used it to her benefit says of it in respect to its beneficial effects in the cure of rheumatism :—

SOUTHAMPTON, July 22, 1890.

Mr. J. W. Brayley, Montreal.

DEAR SIR,—Enclosed please find the following facts regarding your valuable remedy, the French Magnetic Oil. For a long time I had been suffering from Sciatica, and after having tried almost everything in the shape of medicine, I found that I was getting worse all the time, and my right leg was almost paralyzed. One day, when I was almost wild with pain, I turned in despair to your almanac, and, strange to say, the first thing that struck my eyes was your French Magnetic Oil recommended for Sciatica. Of course, having nothing to lose, I thought I would try it, and, after using a bottle and a half, I am glad to say that I am completely cured, and, what is more, I have never been troubled with sciatica from that day to this. I may say that I recommended it to Mrs. Williamson, who had a weak leg, and she also has been cured by your Magnetic Oil. I consider your French Magnetic Oil the best medicine I ever used, and would not be without it under any circumstance. I send you this letter as a token of gratitude from a woman who was a sufferer until she found a balm in your wonderful French Magnetic Oil.

I am, sir, yours sincerely,

MRS. HUTCHINSON JACKSON.

This is pretty plain language, and in general terms it is as true of all the other diseases mentioned as cured by the French Magnetic Oil in the paragraph referred to as of Sciatica. The paragraph referred to is as follows :—

“Its range of cures is marvellous, being used externally and internally. This is not wonderful. Magnetism is almost everywhere. There are but few pains that are not relieved by it. Headache, stomach-ache, neuralgia and rheumatism give way before it. It alleviates colds, cramp, lumbago, sciatica, flatulence, wind, diarrhoea, influenza, growing pains in children, pain in the back, pain in the side, bruises, contusions, chilblains, frost-bites, sore throat, quinsy, diphtheria, enlarged veins, chronic ulcers, lumps and gatherings, milk leg, and many other troubles.

“Its results are not temporary, like many preparations which simply deaden the parts when applied. The French Magnetic Oil

not only stops pain instantly, but it acts as a counter-irritant, a diffusive, an agent removing inflammation, the latter being caused by what is known as arrested circulation, the blood in the veins being congested, and thus pressing upon the nerves, causing pain. At such a juncture, when perhaps the patient is half frantic, the French Magnetic Oil is applied. It acts like a soothing balm, quiets the poor sufferer immediately and alleviates his distress.

“It has also been an immense power—this French Magnetic Oil—in curing and preventing attacks of the most deadly, the most virulent diseases. It is the remedy, the antidote, the best thing possible to use in Asiatic cholera, yellow fever, dysentery, colic, inflammation of the bowels, fever and ague, typhoid fever, smallpox and other most terrible plagues, pestilences and virulent diseases that prey on mankind.

“The French Magnetic Oil is also an excellent remedy in very many diseases of Cattle and Horses. For Bruises and Strains, Garget, Colic and Belly-ache it is very effectual. The dose for a horse would be a full bottle, and may be repeated every hour or two until relieved.”

Mrs. Jackson is one of many thousands who have benefited by the advice given in “Brayley’s Family Medical Almanac,” which is sent free to all. The amount of suffering relieved by the French Magnetic Oil is incalculable. It seems to have a charm peculiarly its own, and to cure diseases no other remedy, or no other combination of remedies, can touch. It is this which makes it so useful in chronic cases. Rheumatism which has been unremoved for a score of years, when it is applied, disappears forever. This is not fancy, but the result of practical test. If it were not so, such immense quantities of it would not have been sold, and the same people would not have purchased it time and again for the members of their families. Neither would they write and tell of such marvellous cures as that recorded on this page. The pains it relieves covers a wide field, the French Magnetic Oil being taken internally as well as applied externally. When once used, its benefit is always appreciated highly.

We cannot refrain at this time from referring specially to the great benefit of the French Magnetic Oil in the cure of Coughs, Colds and Influenza. To this end teaspoonful doses are taken in molasses and hot water, frequently at first, until it brings on sweating, and afterwards at intervals of two or three hours. The cure of these diseases is hastened by bathing the throat and chest frequently with the Oil, and, if there is headache, by often smelling it.

TURKISH DYES DYE EVERYTHING.

❀ A REMARKABLE TRIAL ❀

QUEEN vs. WASTING DISEASE.

COURT OF ASSIZE—CRIMINAL SIDE. JUDGE SOUND PRESIDING.

"Call the prisoner."

It was Judge Sound who spoke. He was a man whose shrewd knowledge of men and things, whose care in the investigation of all subjects in which he took any interest, and whose sterling honesty had become so generally recognized that his private opinions on men and things were looked upon as verdicts, and his mature judgment of cases never was questioned even for a moment. In appearance he was tall and proportionally stout, with a hearty, well-fed aspect, as if his digestive organs were in perfect condition, although by no means what is called a fat man. His forehead was high and prominent and marked with lines of thought. His features were striking and regular, the most noticeable being his eyes, keen as a sabre thrust when uncovering fraud, but soft in their expression as a fawn's, when truthful tales of suffering and oppression were brought under his notice.

"Call the prisoner," he said.

"Bring in the monster," directed the Sheriff.

The prisoner was conducted to the box, and on account of his feeble health given a seat. What a sight he was! Thin, almost to emaciation, with savage, wolfish eyes blazing like angry fires, his face pinched and weary looking and unclean, his mouth cruel, his breath foul, his skin sallow with burning-looking spots here and there. Bent and broken in spirit he appeared, but there was behind all this, distinct evidence of energy unusual to men, which could not be recognized without a shudder. His clothing hung in tatters on him, but could not add to the disgust which his aspect engendered. A shudder ran through the court as he entered. It was as if a corpse had taken a seat in the box.

"Wasting disease," said the clerk of the court, "stand up, and hear the charges against you."

The prisoner stood up and the clerk continued: "You are hereby indicted for hav-

ing caused the death of Mr. John Goodfellow on the 16th day of September last, through your treacherous and insidious art, having seized upon him when he had taken a serious cold, and while all the time comforting him and allaying his fears by the assertion that he would be well soon, dragging him down to the grave, leaving unprovided his wife and four young children. In addition, under the various *aliases* of Cough, Sore Throat, Asthma, Bronchitis, Influenza, Croup, Congestion of the Lungs, Inflammation of the Lungs, Consumption, and different others, you have caused the death of many thousands of her Majesty's faithful subjects, causing great loss to the Kingdom, and suffering and injury to the community so great that it could not be measured. Prisoner, are you guilty or not guilty of the crimes with which you are charged?"

"Not guilty," faltered the prisoner, still with an air of innocence and composure that would deceive the most bitter opponents.

It was difficult to find a jury. Not one in the room or country but had lost a relative through disease and death, and every one had heard of the prisoner's acts. But still, after much difficulty an unprejudiced jury was found, composed of healthy, hearty men, full of vigor, who laughed at disease as if they expected to live forever.

The address of the Crown Counsel was brief and effective. He pointed out the great amount of distress caused by the prisoner, whose only object could be a hatred to the human race, for he gained nothing to himself by his actions. He referred to cases within the memory of the jury of heads of families who had been stricken down in the prime of life, and laid on beds of sickness which they never left alive, to bereaved widows and children, to hunger and cold, because the bread-winner had been cut down at his work. And all this he laid out at the hands of the prisoner. But when he described the case of Mr. Goodfellow, there was hardly a dry eye in the room. A young

TURKISH DYES DO NOT WASH OUT.

man of great promise, a farmer, foremost in good works, the support of aged parents, his youthful wife and young family; when working one evening to protect his hay from an approaching shower, he was drenched to the skin. A cough resulted; it was neglected; it grew more severe and he began to raise up phlegm; the physician was called in; he was confined to his bed; in a few months he died. At the conclusion of this address the jury were ready to convict the prisoner without any evidence, as also was every man in the Court. But that is not the course taken by justice in Canada.

The evidence for the prosecution fully sustained the charge.

The only question asked in cross-examination, as each witness was examined, was: "Did the deceased person use DR. WILSON'S PULMONARY CHERRY BALSAM?" to which the uniform answer given was "No."

This singular question, together with the nature of the case, caused an unusual interest to be shown in the defence, which was conducted by J. A. Matchem, Q.C., than whom none stands higher amongst those who practice before the bar.

Without any remarks, he proceeded to call his witnesses. The first was:

Mr. T. A. Robbins, St. Jean, who testified that for 17 years previous to 1877, he had been troubled with Asthma, which rendered his condition very precarious. He had tried almost every remedy that had been offered, but none did him any good, and he abandoned himself to his fate, feeling convinced that the prisoner, through the disease, would carry him away a corpse at last. But there came a change. Some one, he had forgotten whom, recommended to him DR. WILSON'S PULMONARY CHERRY BALSAM. He felt sure that it would do him no good, but thought there could be no harm in trying it anyway: obtained a bottle and began its use. From the first he felt benefited, continued its use, and soon was completely well. Prisoner was not responsible for the disease which witness had contracted; did not fear prisoner now since he used DR. WILSON'S PULMONARY CHERRY BALSAM. He had recommended it to his friends, and all those who tried it had a similar experience.

W. V. ARNOLD was called and testified

that he had a severe attack of asthma with strong symptoms of Influenza, and Consumption seemed inevitable; but he had been perfectly cured by two bottles of DR. WILSON'S PULMONARY CHERRY BALSAM.

In cross-examination, he stated that he, previous to its use, had tried various remedies, but none had done him lasting good but this.

There was considerable dispute about the admission of the evidence of the next witness, Mr. T. S. Backer of Quebec, the reason given by the prosecution for rejecting it being that the witness did not speak from personal knowledge, his father having been ill and having been cured, and not the son, who was brought to bring evidence. Why had they not brought the father to testify on his own behalf? In answer to this it was shown conclusively that the father could not possibly be present, and that the son was capable of testifying in his behalf.

Mr. T. S. BACKER of Quebec, then being examined, stated that his father actually had recovered from an attack of Bronchitis so severe that it had been supposed that he never would be able to speak again. He had been placed under the treatment of several of the most eminent physicians of that city, who were in turn compelled to give him up. But having heard of several marvellous cures that had been performed by DR. WILSON'S PULMONARY CHERRY BALSAM, he resolved to give it a trial. To say that the result was better than his expectation is to say little, for he had determined, in desperation, to try it as a forlorn hope. Its results were simply wonderful. First he obtained ease so that he could sleep, and very soon all his trouble had disappeared.

Mr. J. W. HOOD, of Carleton, N.B., gave very important evidence. Several years ago he had been attacked with Bleeding from the Lungs. He had also applied to his physician for relief, but although his counsellor was a man of experience and skill, no perceptible good was accomplished through his aid. On being advised to try DR. WILSON'S PULMONARY CHERRY BALSAM, he purchased a bottle. It did him much good; he tried a second which acted as the first; he persevered in taking it, and the cure was complete.

Mr. L. McCLOSKEY, of St. Charles, P.Q., being examined, stated that last winter he had suffered from Inflammation of the Lungs which had become most dangerous, but he commenced to take DR. WILSON'S PULMONARY CHERRY BALSAM, with those virtues he was well acquainted, and soon was well again. He has since never failed to recommend it to his friends who were affected with Lung diseases, and many of them have been benefited by it.

DR. FRANK, a distinguished analytical chemist, was examined as to the nature of this remedy, and its mode of action on the system. He explained briefly and in language that all could understand, that Dr.

PLANETS IN JULY, 1892.—Mercury and Venus are near each other on the 1st. The Moon is close to Uranus on the 3rd. Mars is stationary on the 6th. Venus makes her passage between the Earth and Sun on the 9th, and becomes a morning star for the rest of the year. The Moon is near Mars on the 12th. Jupiter is overhead at 6 morn. on the 15th, and near the Moon the next day. Luna is near Venus on the 22nd. Uranus is overhead at 6 ev. on the 24th, and Jupiter at Perihelion the same day. The Moon is near Mercury on the 25th, and near Saturn on the 28th. Mercury is visible after sunset for a few evenings adjacent to the 29th, when he is Elongated East of the Sun. Venus is stationary on the 31st.

WHEN YOU WANT SUCCESSFUL DYEING, USE TURKISH.

WILSON'S PULMONARY CHERRY BALSAM was composed of the purest vegetable materials exclusively, and there being no adulteration, the dose was the smaller, and there was no danger of any organ becoming clogged by hurtful and useless material. Going into analysis of the remedy he showed that it was composed in the first place of the Extract of Wild Cherry Bark, which has a wonderful effect in soothing any irritated surface in the lungs and air passages. Besides, it is an excellent tonic to the stomach, thus aiding in giving a healthy appetite, and in addition has a peculiar soothing, sedative influence on the heart and large blood vessels. Those who are affected with Lung diseases know the value of such a soother. Any irritation of the Lungs preventing the free flow of blood through them, the heart is compelled to exert greater force to overcome this obstruction, and thus it is felt to beat as if it would break, to perform its work. This is known as palpitation. This ingredient, in addition, has important qualities as a blood purifier. A second ingredient is employed to loosen and displace the phlegm, the raising of which causes so much pain, distress and injury. This phlegm clogs the mucous lining of the air tubes, and if not dissolved remains in them, blocks them up, and after a time comes decay leading to Tubercular Consumption. Nature, with its usual fidelity, attempts to relieve itself of this phlegm through convulsive coughing most exhausting to the system. This ingredient helps on the good work and with the most favorable results. A third ingredient heals. It is the vital property of the peculiarly soothing and healing gums of the white pine and fir of torrid climes, at the one time grateful and beneficial to the stomach, and lastly there is a pleasing and soothing lubricant that supplies the place of the mucous secretion which, while the organs are healthy, coats the mucous membrane, keeping it soft and natural. It at first supplies the place of the diseased secretions and assists in restoring them so as to perform their proper and most important duties. All these ingredients work in harmony to the one great end, and thus their wonderfully beneficial results.

This closed the evidence.

The Counsel for the Defence then made the following brief, but telling address:

Your Honor and Gentlemen of the Jury:—I am not here to endeavor in any way to prevent the ends of justice being attained, but to obtain justice for my client. It is alleged that the prisoner seized Mr. Goodfellow, after that gentleman had taken a severe cold, and dragged him soon to the grave. I answer this by the fact which has been proved to the court, that a cold is easily cured. One bottle of DR. WILSON'S PULMONARY CHERRY BALSAM, which would have cost twenty-five cents, or even less than a bottle, would, in all probability, have

cured Mr. Goodfellow at the beginning of that fatal disease which caused his death. Why did he not use it? I can only attribute his singular action, or rather want of action, to two or three causes. Firstly, he may not have known of this remedy; secondly, knowing of it, he may have ignored it entirely, as so many persistently do ignore good things, or thirdly, he may have considered his cold of no consequence, as a mere cough, until it had attained such proportions that it couldn't be checked. In any of these cases, the late Mr. Goodfellow himself was responsible for all the suffering to himself and family which is laid to the prisoner's charge. Again, Cough, Sore Throat, Asthma, Bronchitis, Influenza, Croup, Congestion of the Lungs, Inflammation of the Lungs, Consumption, Whooping Cough, and all other diseases of the Throat and Lungs have been and may be cured by the use of this invaluable remedy—DR. WILSON'S PULMONARY CHERRY BALSAM. This important fact has been established by many witnesses, and it has not been shown, and cannot be shown, that it ever has been used without producing some good effect, even in the most hopeless cases. These two facts, then, I urge as sufficient grounds for the prisoner's discharge; all these diseases are either the cause of carelessness, indiscretion or hereditary taint; secondly, they are curable by a remedy of little cost, though of priceless value, which may be obtained throughout the length and breadth of this country. It is true, I admit, that the great popularity of this remedy has caused dishonest persons to attempt the sale of a counterfeit article, but the public easily may be assured that they possess the genuine, by seeing that the full name is blown on the glass of each and every bottle they purchase."

After a brief address by the Crown prosecutor and a learned summing up by the judge, the matter was left with the jury, who returned the following verdict:

"We find the prisoner guilty of the crime charged against him; but in view of the fact that he could be prevented and cured by a well and favorably known remedy for all Lung and Throat diseases called DR. WILSON'S PULMONARY CHERRY BALSAM, and whereas he is never present in these forms unless invited and encouraged by the carelessness and indiscretion of the persons to whom he attaches himself, we recommend him to mercy."

After some deliberation, his Honor the Judge declared the prisoner had been sufficiently punished by his imprisonment and exposure, whilst the publicity the case against him had attained, made it patent to all that he was harmless to those who provided against him. He therefore would order the release of the prisoner, and command all Her Majesty's dutiful subjects to preserve their health from all attacks of Throat and Lung diseases by using DR. WILSON'S PULMONARY CHERRY BALSAM.

PLANETS IN AUGUST, 1892.—Mars is at Opposition—near the Earth and, exceedingly bright in the Night Sky—on the 4th, when he is overhead at midnight. He is near the Moon on the 7th. On the 11th Mercury is Stationary. The Moon is very close to Jupiter on the 13th, and Jupiter is Stationary the next day. Venus is at greatest brilliancy as a "Morning Star" on the 15th. She is near the Moon on the 18th. The Moon is in Conjunction with Mercury on the 22nd, and close to Saturn on the 24th. On the 25th Mercury passes between the Sun and Earth—Inferior Conjunction. Uranus is near the Moon on the 27th.

WHEN YOU GET TIRED OF COMMON DYES, USE TURKISH.

Faith and Experience.

Faith is all very well in its way. But faith won't cure piles. I've tried it and I know. Faith won't make a leg grow on to an amputated stump. I prefer to buy a wooden one to having faith that a flesh, blood and bone one would grow in with the aid of faith. No, faith won't cure piles, but experience tells me that Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS will.

Faith will cure a headache when the headache is an imaginary headache, but Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS will cure a headache that is a headache, caused by Bilioussness, by Indigestion, or by other cause leading from the stomach, liver or bowels. All the faith you need have is faith enough to buy Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS and take them; Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS will do the rest.

Experience shows that Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS will cure Diarrhoea. This disease should be attacked very early, and thus the pills should be taken as soon as it makes its appearance. Diarrhoea is painful, weakening and excessively dangerous, therefore the remedy of experience should be taken without delay. This remedy is Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS.

Faith will not cure piles, as I have said before; but Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS will cure piles. That is one of the things they are made for. Piles is the inflammation of knots of vessels at the fundamnt. Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS releases the pressure, enables the organs to do their proper work, and the piles disappear that's all. That is experience.

Experience shows that Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS cure Dysentery or bloody flux. This is simply an advanced stage of diarrhoea, and so severe that blood is forced through the coats of the vessels, which are rendered soft and pulpy by the irritating mucous and the constant straining and pressure of the bowel in itself. Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS do away with the cause and the disease goes.

Experience proves that many fevers are cured by the use of Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS. These are usually caused by the body being starved and permeated with impurities through the stomach and bowels not doing their proper work of digesting the food and carrying off the refuse. Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS encourages and assists the digestive organs to do their perfect work. Acting as they do on the liver, the pores of the skin, the kidneys, and as an expectorant, they not only put them to do

their work of building up the body, but clear off the clogging impurities which obstruct the body in its work and reacts on the mind.

My watch went irregularly the other day. When it ran it ran slow, and sometimes it wouldn't run at all. Experience told me to bring it to a watchmaker. I required the exercise of some faith in choosing the right one. But I chose one with experience. He took out all the dust and accumulations of oil and dust, and it went all right. He didn't change a wheel; not he! He took away what shouldn't have been there and prevented its working. Then the watch went all right. That is what Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS does to the body clogged with impurities which prevent the digestive organs from performing their proper work.

Experience shows that Liver complaint is one of the diseases thus engendered and cured by Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS, and liver complaint is one of the most disagreeable of diseases. It causes an "all-overishness" which few people fancy. The relief given by Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS is wonderful.

EXPERIENCE SHOWS THAT

in Female Diseases Wilson's ANTI-BILIOUS AND PRESERVING PILLS are of great service and may be safely trusted. They correct Irregularities, relieve Stoppages, cure Leucorrhoea or Whites, and are specially useful about the Turn of Life, when so many chronic diseases are apt to take their first beginning. Stoppages or Suppression is often relieved by these Pills by sympathy. They should be given in frequent doses and aided by a hot bath, or bathing the feet in warm water with mustard in it before going to bed. The Pills are more likely to bring on the Catamenia if taken when due than if delayed a few days.

A WHOLE MEDICINE CHEST.

LITTLE RIVER, N.S.

Mr. J. W. Brayley.

SIR,—In my opinion of the merits of Dr. Wilson's ANTI-BILIOUS AND PRESERVING PILLS, I will briefly state that for many years they have been a standing medicine for my family. A box of these Pills is always left within reach of any one who may feel the necessity of taking a dose. Whether it is owing to the efficacy of these Pills or not, I do not pretend to say; but I can safely assert that since we have used them my family has enjoyed uninterrupted good health, and I cheerfully recommend them to all who duly appreciate this inestimable blessing.

J. T. Burns.

PLANETS IN SEPTEMBER, 1892.—Neptune is 90° (Quadrature) from the Sun on the 3rd, and overhead at 6 a.m. Mercury is Stationary the same day. The Moon is very close to the ruddy Mars on the morning of the 4th, Mars being Stationary the same day, and in Perihelion on the 7th. The Moon is close to Jupiter on the 9th. On the 11th Mercury is at greatest Elongation West of the Sun, and visible before Sunrise in the East. The Moon is near Venus on the 16th, the latter reaching her greatest Elongation West as a Morning Star on the 19th. Mercury is near the Moon on the 19th, Saturn close to Luna on the 21st, when the Sun enters Libra and Autumn commences. The Moon is near Uranus on the 23rd. Saturn passes behind the Sun on the 25th, when he becomes a Morning Star.

When you want a Dye you can recommend, use Turkish.

Dr. Wilson's Herbine Bitters.

Every one wants to be happy, and every one can be happy, if they only go the right way about it. Happiness is as much within the reach of the poor as the rich. Many a man has found it easier to acquire wealth than happiness. Money is not sufficient. Look! That man you meet on the street every day is thin and pale. What can be the matter with him? It cannot be that he is in want, for he controls thousands of shares of stocks in leading financial institutions. He has friends without number. He has a loving wife and family. Yet, he looks unhappy. His face bears a careworn expression. Life is a burden to him. What causes this condition in which he is in? It is his stomach. Many a poor fellow thinks his friends and the world have gone back on him, when really it is his stomach only that causes his misery. The stomach becomes rebellious and refuses to act as it should. The food remains indigested, and the body derives no nourishment therefrom. The stomach becomes foul, and splitting headaches follow. No wonder a man feels that all is lost to him. Life to him is not worth living. His physician prescribes for him, but no change takes place. The dizziness is still there; the stomach is still disordered; his feet are cold; his face burning; he is drowsy all day, yet he cannot sleep at night. Poor fellow! He almost loses hope. Shall he ever see another happy day? Is there no remedy for his disorder? He thinks. Others have been troubled as he is, but are now well. He starts! How did they regain health? They are well; why cannot I be well? Something must have cured them—what was it? He enquires of his friends, and from each he gets the same answer: "Dr. Wilson's Herbine Bitters cured me." "Dr. Wilson's Herbine Bitters!" he repeats. "Why did I not try that remedy before? I have always heard it was a famous remedy." He procures a bottle of the Herbine Bitters, and takes it regularly. Soon a change comes over him: his appetite increases and the stomach does its work more regularly; the headaches are less frequent, and his countenance is brighter and clearer. Another bottle of Herbine Bitters, and his friends remark the great change for the better. The medicine is now doing its work. It was never known to fail. The stomach is strengthened and the headaches have disappeared. Dr. Wilson's Herbine Bitters has done all this; and it will do the same for you, poor dyspeptic. Your case can be cured. Dr. Wilson's Herbine Bitters were made for you. Take the remedy and be well. Below are testimonials from some of those who have taken Herbine Bitters. The reading of these will comfort you:—

CLEARVILLE, March 20, 1890.

Mr. J. W. Brayley.

For three years or more I had been suffering from nervousness, sick headache and bleeding at the nose, until I wasted away to a skeleton, and I felt as though I had but a few days more on this earth. About this time I met Mr. F. T. Allen, and he advised me to try Dr. Wilson's Herbine Bitters. Feeling as though I had nothing to lose I thought I would try a bottle of the Herbine Bitters, seeing it is only 25 cents. I took the first dose as per direction, but, owing to the state I was in, I found it rather too strong; but, after reducing the dose, I continued taking the Bitters, off and on until date, with the following results: When I began to take the Bitters I only weighed 126 pounds. Thus, when you consider my height, which is about six feet, you will admit I was pretty far gone. After taking six bottles of the Herbine Bitters I now weigh one hundred and seventy pounds (170 lbs.), or a gain of 44 pounds in four months. I think this certainly ought to encourage some others to try the Herbine Bitters with good prospects of success. I also omitted to state that my nose never bleeds now, and I feel as well as possible. This is no cock-and-a-bull story, but perfectly true. There are a number of people here who know this to be as stated by me, and quite a few are now taking the Herbine Bitters. In my opinion, it is far stronger and better than any dollar preparation I have ever tried. I may also state that this testimonial has been given gratuitously, with the hope that some sufferer, like myself, might see this and also try the Herbine Bitters, and thereby gain in health and strength.

You may do with this letter as you think proper.

I am, sir, yours sincerely,
ALBERT HOLMES.

VICTORIA, Ont., Aug. 4, 1890.

I feel confident that, from the use of Dr. Wilson's Herbine Bitters, it has been the means of curing me of that most distressing malady—dyspepsia or indigestion. I have been afflicted with this disease for many years during which time I found no medicine to afford me relief until I began to use Herbine Bitters. In this disease I experienced great prostration of strength and general debility, loss of appetite and torpor of the stomach and bowels. After using the Bitters a short time it had a tendency to increase the appetite, promote digestion and invigorate the system, and, by occasionally using them, my health has so much improved that I think I might pronounce myself a sound, healthy person.

F. J. RISCH.

WHEN YOU WANT SUCCESSFUL DYEING, USE TURKISH.

Such unsolicited testimony as the foregoing should bring conviction to the mind of unprejudiced readers. Unfortunately, many read so carelessly, or with minds so warped by prejudice, that they cannot learn. However, there are tens of thousands in Canada who have tried and have been benefited by Dr. Wilson's Herbine Bitters. The action of these Bitters is so rapid, and their good results so permanent, that the fame of this remedy is in the mouth of thousands, and they speak decisively of what they know. There is no doubt about the nature of these cases. They are not attacks of "nerves" that the Bitters cure, but troubles of the digestive organs—of the stomach, liver and bowels. These are easily diagnosed by those who are sick. They can also follow every stage of the cure in themselves. This is what those who wrote these convincing letters do.

These Bitters are sold at a popular price. This is possible largely because of their great popularity and the immense quantities put up at one time, and the large purchases made at one time by dealers. It is a good thing for suffering humanity that this is so, and that the cure so potent is at the same time so cheap.

Read the evidence:—

ST. THOMAS, March 27, 1890.

Mr. J. W. Brayley.

For years I have been troubled with chronic inflammation of the bowels, and I tried every medicine possible, but without the slightest benefit. I then tried the Herbine Bitters, and, after taking a few bottles of them, I can truly say that I am now as well as can be, and I attribute the cure to Dr. Wilson's Herbine Bitters.

You may use this as you think best.

I am, sir, yours, etc., G. HILBORN.

UNIONVILLE, Ont., Aug. 12, 1890.

I feel myself under a deep obligation to the discoverer of Dr. Wilson's Herbine Bitters. I have for some years been afflicted with dyspepsia, and from the good effects produced by one bottle of the Bitters, in my case, I am persuaded that the use of another bottle will effect a permanent cure. Please send it by express.

J. B. SAGE.

THORNCLIFFE, Ont., Sept. 22, 1890.

For the last eight years I have been a constant sufferer from weakness, liver complaint, pain in the side, etc., during which time I suffered intensely with pains in my head and back. Last July I bought a bottle of Dr. Wilson's Herbine Bitters, and used it, and am now perfectly restored. My eyes, which were very weak, have, with my returning health, regained their former strength.

G. W. MACPHERSON.

SYDENHAM, Sept. 30, 1890.

For a long time I have been suffering with liver complaint, general debility, with dyspepsia, and in the worst forms. The least food would cause distress and acidity in my stomach, although I took physicians' remedies constantly. About two months ago a friend recommended me to buy Dr. Wilson's Herbine Bitters, which I did, and, after using two bottles, I am in every respect well. My food digests naturally and easily. I had previously been treated by the best medical men in the county.

J. B. RIDLEY.

STEWART, Sept. 15, 1890.

Allow me to return sincere thanks for the great benefit I have derived from the use of Dr. Wilson's Herbine Bitters. I had suffered very much from dyspepsia or indigestion. The use of two bottles have permanently cured me. It appears to me that no person ought to be without it who suffers from flatulency or indigestion. It affords me much pleasure to add my humble tribute to the real merits of the Bitters.

JOSEPH P. DENFORD.

BRANT, Ont., Oct. 14, 1890.

I feel in duty bound, with gratitude, to make a statement respecting the efficiency of Dr. Wilson's Herbine Bitters, with a hope, by giving it publicity, I may be the means of inducing others to try it also, being well assured the dyspeptic will find it a certain cure. I have been afflicted with dyspepsia in a very distressing manner. During that period I could not taste the smallest bit of meat of any kind without feeling great pressure and sickening in the stomach, accompanied with severe vomiting; neither could I drink water without the same effect, until I was reduced so low I could not attend to any kind of business, and had likewise all the nervous irritability that attends this disease. I tried several eminent physicians, but daily grew worse, until my friends lost all hope of recovery. My whole biliary system was deranged, and almost every morning I would vomit pure bile. My bowels during this time were very irregular—either obstinate costiveness or severe diarrhoea prevailed, and my food passed indigested. I suffered so much I several times wished I were dead. About two months ago I was advised to try the Herbine Bitters. I procured two bottles, and, after taking them, it effected a certain cure. I can now eat heartily of the strongest food, drink as much water as I please, and feel comfortable. I am engaged in very laborious work, and find my strength daily increasing; have not been so well since I was a boy.

B. D. MANKS.

TURKISH DYES DO NOT WASH OUT.

Magnetism.

Nobody knows exactly what magnetism is, but it can be, and is, controlled by human skill to do wonderful things. It is the controlling influence in the electric light, in electric motors, in the telephone, in the telegraph, and recent research shows that it has no little influence on the human system, and can be used to very good advantage in the cure of diseases.

One of the preparations in which this wonderful power of magnetism is employed is the French Magnetic Oil, the discovery of a celebrated Parisian philosopher and scientist, who gave it to the world as one of his contributions for its benefit. This French Magnetic Oil is peculiar in that it is used with great benefit both externally and internally. Therefore, the list of diseases cured by it is very long.

It comprises: Coughs, colds, influenza, cramp, pain in stomach and bowels, cholera, diarrhoea, dysentery and colic. For these it is taken internally. When used as a liniment it is efficacious in cases of chronic rheumatism, lumbago, sciatica, neuralgia, local muscular pains, growing pains in children, pain in the side, back-ache, cramps in the limbs, bunions, chilblains, frost-bites, enlarged nerves, chronic ulcers, strains, cramps, tooth-ache, ear-ache, and the like.

The French Magnetic Oil is a combination of powerful vegetable oils, which exist naturally in a state of opposite magnetic condition, and which, when brought together in contact with the nervous system, permeates it readily and brings about a state of magnetic equilibrium, and takes away all obstacles to a cure caused through the unfavorable magnetic condition of the body. This unfavorable magnetic condition is the root of the difficulty in many cases of chronic diseases in reaching the deep-seated cause of the trouble. When once this is made right the cure is rapid. It is as true of medicine as it is of surgery, that the general condition of health must be such as to facilitate a cure before a cure can be depended on. Everybody knows that a sore with foreign matter in it will not heal until that matter is ejected. The French Magnetic Oil has a wonderful effect in bringing the body to the special condition necessary to make the best use of the beneficial drugs contained in it, and thus making the cure a rapid as well as a permanent one.

This last point is a very important one. There are some liniments which remove the pain for a few moments and then it returns as bad or worse than ever. The French Magnetic Oil, on the contrary, acts a counter-irritant, a diffusive, removing the inflammation, which usually is caused by what is known as arrested circulation, the

blood in the veins becoming congested and pressing upon the veins, thus causing excessive pain. It is under just such circumstances that the French Magnetic Oil comes as a magical relief; the pain is dissipated forever, and the sufferer is full of gratitude for the relief he or she experiences.

In one special trouble the French Magnetic Oil works wonders—in preventing lumps and gatherings in the breast of women who have recently become mothers. If the breasts become at all hard and painful, have them well rubbed down from the root of the breast to the nipple with the French Magnetic Oil, and then apply it on a fold or two of flannel, repeating every two or three hours. The pain and heat are relieved, the glands are softened, and the milk can be drawn thoroughly and without pain.

In addition to these might be mentioned the fact that the French Magnetic Oil has a wonderful power in preventing and curing attacks of the most virulent diseases, such as Asiatic cholera, yellow fever, fever and ague, typhoid fever, small-pox, and the like.

In addition to the many diseases of men cured by the French Magnetic Oil, it is an excellent remedy in many diseases of horses and cattle. Amongst these are strains and garget, colic and belly-ache. A full bottle is the dose for a horse, and should be repeated every hour or two until relief is obtained.

Coughs and Colds are cured by the French Magnetic Oil.

Influenza is cured by the French Magnetic Oil.

Pains in the Stomach and Bowels are cured by the French Magnetic Oil.

Cholera and Diarrhoea are cured by the French Magnetic Oil.

Rheumatism is cured by the French Magnetic Oil.

Lumbago is cured by the French Magnetic Oil.

Sciatica is cured by the French Magnetic Oil.

Neuralgia is cured by the French Magnetic Oil.

Local Muscular Pains are cured by the French Magnetic Oil.

Growing Pains in Children are cured by French Magnetic Oil.

Bunions are cured by the French Magnetic Oil.

Chilblains and Frost-bites are cured by French Magnetic Oil.

Chronic Ulcers are cured by the French Magnetic Oil.

Strains and Cramps are cured by the French Magnetic Oil.

Tooth-ache is cured by the French Magnetic Oil.

PLANETS IN OCTOBER, 1892.—Mercury and Saturn are in conjunction on the 1st. The moon is near Mars the same day, and close to Jupiter on the 6th. Mercury passes behind the Sun on the 8th. Jupiter is at opposition (brightest) and overhead at midnight on the 12th. Venus is near the Moon on the 16th and Saturn near the Moon on the 18th. Uranus is close to Mercury on the 20th, the Moon passing these two planets on the 21st. Uranus is in conjunction with the Sun on the 29th and the Moon close to Mars on the 30th.

TURKISH DYES DYE EVERYTHING.

Dr. Howard's Beef, Wine and Iron.

Beef, Wine and Iron. These, when properly combined, contain elements well calculated to build up the human system. They stimulate, they strengthen, they enrich. As combined in Dr. Howard's celebrated preparation, they are calculated in an eminent degree to give tone to the stomach, vitality to the blood and brain, and strength to the muscles. Nothing can be more readily taken, and to delicate ladies and children, as well as to men who do not love nauseous draughts, it is a boon.

For impaired digestion it is a most valuable remedy. In general debility its value is acknowledged by the highest authorities. For a weak stomach, which requires a gentle stimulant and tonic, its value is very high.

As an appetizer Dr. Howard's Beef, Wine and Iron has a valuable place. It will restore the exhausted system to strength. In cases known as general debility its cures are rapid and permanent. The glow of health mantles the cheek once faded; the flaccid muscles become firm; the memory which has become untrustworthy is restored; the groan of hypochondria gives way to high spirits; the impoverished blood becomes a rich crimson stream, carrying nourishment to brain, nerve, bone and muscle.

Of course, the human body cannot be changed by merely chemical agency. It is influenced by the mind as well as matter. The one acts on the other. Thus, healthful occupation, pleasant society, and the endeavor to do good, are valuable aids on the recovery of the troubles here mentioned. Try these with Dr. Howard's Beef, Wine and Iron, and the cases will be very few in which the remedy is not complete.

Now, Dr. Howard's Beef, Wine and Iron will not cure every disease. We would not recommend it for a broken arm, nor even as a cathartic, nor as a liniment. Remedies for such and other diseases are given in this book; but, as a restorative of the system run down from any cause, it is most valuable.

What a benefit to the nation it would be if all the prematurely old men and women, and children, too, were restored to bounding health. Dr. Howard's Beef, Wine and Iron will aid in this. What a blessing to the families if broken spirits were unknown, and carping and complaining relegated to the back-ground. Dr. Howard's Beef, Wine and Iron will aid in this.

Children who lose their appetites and strength through disease are often recreated, as it were, by the use of Dr. Howard's Beef, Wine and Iron. It is well to try it in every such case. It is then in which, after a brave struggle with disease,

and after the worst is supposed to be over, the strength gradually disappears until there is no strength left. It is more than likely that in these cases new life, new vigor and new strength will be given by the use of Dr. Howard's Beef, Wine and Iron.

Dr. Howard's Beef, Wine and Iron is best recommended by the cures it effects. If you follow its course carefully you will find wonderful results. Is your friend ailing from impaired digestion, ill-nutrition, weak appetite, or similar cause? Recommend Dr. Howard's Beef, Wine and Iron. You can do this most freely and forcibly if you have used the delightful remedy and have been benefited by it.

Dr. Howard's Beef, Wine and Iron is just what its name implies—the combination by a distinguished physician of the elements essential to the complete nutrition of the human body, presented to the public in a palatable shape. It is a benefactor to those who use it, as well as to those interested in those restored to health.

Rosy cheeks are twice an ornament. They are beautiful in themselves, and they are pleasant to look on, because they indicate health in their wearer. The hectic flush of disease is not meant, but the glow of the rich, pure blood through the transparent skin. And health means high spirits, good temper and cheerfulness. Of course everybody wants such, except those ladies whose style is fast going out, whose gospel was that it was not in good form to be in good health. Such are not much thought of in Canada, and it is well. Good health is the greatest of all earthly blessings. Dr. Howard's Beef, Wine and Iron is an aid to good health, as indicated by rosy cheeks. It purifies the blood, builds up bone, muscle and brain. It is one great influence towards good nature, good temper, good spirits.

Our advice, then, is to use Dr. Howard's Beef, Wine and Iron in those cases in which it is likely to be useful. There is hardly any condition of the human system in which it will not be beneficial, and it is therefore safe to give it a trial in cases where there is any evidence that it is required. Many such trials as these result most beneficially, and amply reward for the trial. In cases of general debility and kindred ailments, Dr. Howard's Beef, Wine and Iron is most beneficial.

Dr. Howard's Beef, Wine and Iron is prepared with the utmost care, so as to retain all the elements necessary to build up the constitution, while it is palatable to the taste and does not lose its valuable qualities with age. This is a most important consideration, as the purchaser knows that every bottle he gets will be the same as every other bottle, and that all are good.

WHEN YOU WANT A GOOD DYE, USE TURKISH.

PLANETS IN NOVEMBER, 1892.—Jupiter is very close to the Moon on the 2nd. On the 10th Mercury is in Conjunction with Saturn, and the Moon near Saturn on the 14th. Venus is near the Moon on the 15th. The Moon passes the place of Mercury on the 21st, Mercury reaching Greatest Elongation East of the Sun on the 23rd, when he is visible after Sunset in the West. The Moon is close to Mars on the 27th, and very close to Jupiter on the 30th.

TURKISH DYES DO NOT SMUT.

Strong's Summer Cure.

Spring brings green fields, green leaves; and green cucumbers and green apples and melons soon follow. These bring Canadian cholera, diarrhoea and dysentery; and, where people are wise, they bring Strong's Summer Cure to banish them.

Everybody knows what Diarrhoea is by its effects. According to the dictionary it is "a morbidly frequent evacuation of the bowels, generally arising from inflammation of, or irritation of, the mucous membrane of the intestines, and commonly caused by errors in regime from its quantity or quality; intestinal catarrh."

There is the whole matter in a nut-shell. Eat too much or too little, habitually, and you are in danger of diarrhoea. Eat unsuitable food, and you are in danger of diarrhoea. It is well to live properly in respect to diet; but it is difficult to do so in the hot summer days, when there is little appetite, and it craves for things it should not have. Especially true is this in respect to the young. Then comes diarrhoea. For this Strong's Summer Cure is a positive remedy, and is highly appreciated by those who have examined it scientifically and experimentally.

Dysentery, the dictionary says, is "a disease characterized by inflammation of the mucous membrane of the large intestines, mucous, bloody and difficult evacuation, and more or less fever." This is practically a later stage of diarrhoea, and if the former is not checked the latter may supervene.

These diseases cannot be trifled with. It pays in money, in comfort and in health, to take them in their earliest stages. Strong's Summer Cure is the remedy recommended, and one which, if you try, you will be sure always to have at hand.

A remedy that is always effective and always at hand is far too valuable to be despised. Such a one is Strong's Summer Cure. It stops the diarrhoea like a charm. It should be in every household. It should be carried with families on their journeys to the seaside or into the country. This is one of the most apparent instances in which a stitch in time saves nine stitches. It saves much more. Diarrhoea taken in its early stages and cured saves much pain, much annoyance, strength, health, and sometimes life itself. This is a fact which is known. And it is known also that Strong's Summer Cure is the remedy for the purpose. It can be used by old and young with full benefit. It is unchanged by climate or variations in temperature. It is a standard remedy. All leading druggists and dealers in medicines have it. If you cannot procure it, drop a line to the publishers of this almanac, and it will be sent to you by return mail. You cannot afford to be without it because of the want of enterprise of any dealer.

The Turkish Dyes.

The Turkish Dyes dye everything—ribbons, dresses, yarn, stockings, feathers, scarfs, wrappers, cloaks, mosses, everlasting flowers, hair, leather, coats, hoods, fringes, rugs, carpet-rugs. They dye everything made of wool, everything made of silk, everything made of cotton, and dye it well, too! There is no mistake about the quality of the Turkish Dyes. Every package of any one color is exactly like every other. It is no matter when it was made. The quality is always the same. The results are always the same. No careful person can make any mistake. The Turkish Dyes are beautiful. They are fast. They are brilliant. They color cotton, jute, hemp, linen, wool and mixed goods in one bath only. Soap won't fade them; neither will scouring, and milling won't, nor will steaming, nor light. One package is enough to impart a beautiful color to two pounds of wool or silk—a beautiful color, a brilliant color, an everlasting color. That is, it will last as long as the wool or silk lasts. It won't last any longer. The Turkish Dyes are guaranteed to color more cloth, and to color it better, than any other dyes ever made. They will do it, too. If you don't believe it, try a package or two of these dyes—or even more. The price won't kill anybody. They are only ten cents each. Turkish Dyes are no use for rat poison; they can't poison anything, but they can do an awful lot of dyeing all the same. There are seventy-two colors in all. Ten cents a package is the price. Some of the colors are entirely new. They can't be had in any other dyes—only in the Turkish Dyes. These new colors accomplish results never thought of before. Since they were introduced they have become all the rage. It is no wonder. There is nothing to equal them. They are done up into neat packages. No one can mistake the directions. They are in more colors than any other dyes. They are in better colors than any other dyes. They are sold at the same price as inferior dyes. A ten-cent package is as good as two of any other make at the same price. It will color mixed goods at one bath. This is not claimed by any other dyes on the market. The Turkish Dyes stand first and alone. They are not approached. They cannot be approached.

The Turkish Dyes are sold more largely than any other dyes. They are sold in every quarter of the civilized world, and in portions of the uncivilized world. They are used in coloring the brilliant gowns of titled ladies and the blanket-borders and beads of the Indians. They are applied by the brush of the artist; they are used in the vats of the dyers, in the laboratories of the ink manufacturers, in the homes throughout the country, and every place where rich colors are required.

TURKISH DYES GIVE PERFECT SATISFACTION.

PLANETS IN DECEMBER, 1892.—Neptune is at opposition (overhead at midnight) on the 1st, the Moon passing his place on the 3rd. Uranus and Venus are in conjunction on the 4th. Mars is at Quadrature 90° from the Sun on the 9th and overhead at 6 ev. Jupiter is Stationary on the 10th. Mercury passes behind the Sun on the 12th. The Moon is near Saturn on the 12th, near Uranus on the 15th, passes Venus on the 16th, Mercury on the 18th, Mars on the 26th, Jupiter on the 27th, and Neptune on the 31st.

TURKISH DYES ARE THE CHEAPEST.

An Effective Liniment.

We will let the public say a few words about DR. DOW'S STURGEON OIL LINIMENT, for the public is interested in learning some facts about the wonderful cures which this remedy is making every day.

A "HOPELESS" CASE OF RHEUMATISM.

COLBORNE, ONT., June 18, 1891.

Having tested the extraordinary virtues of Dr. Dow's Sturgeon Oil Liniment in the cure of a most obstinate disease, I feel impelled to relate the particulars of my case for the benefit of persons similarly afflicted. I am now fifty-nine years old, and previous to using the Liniment had been afflicted with rheumatism in its worst forms for twenty-five years. The disease was at first acute or inflammatory, but became at last a most obstinate chronic complaint, defying all attempts at cure. During the greater part of the long period mentioned I was confined to my room, or obliged to hobble on crutches. The disease affected my whole system, and during the last five years practically disabled me from business. Goodness knows how many hundreds of dollars I paid to physicians and for medicines, without mere temporary relief. My disease baffled the skill of the best doctors, who gave up my case as a desperate one—the toughest one they had ever met with in their practice. About a year ago confinement to the house brought on dyspepsia, which caused me very great additional suffering. Our storekeeper induced my wife to try a bottle of Dr. Wilson's Herbine Bitters, which quickly cured me. As that had done its part so well, he had no difficulty in getting her to buy a bottle of Dow's Sturgeon Oil Liniment. From the first trial of it I experienced a sensible relief, both as respects pain and the use of my limbs. My general health is excellent, and I have a good appetite and digestion. My recovery, of which I had about despaired, and which seemed almost a miracle to me, I ascribe entirely to the use of this Liniment, which I would not now be without for any money.

Hoping that the sufferers from rheumatism may be persuaded by my statement to avail themselves of this remarkable liniment.

GEORGE V. DORAN.

The above testimony from a Western Ontario town is marvellous, but it is not alone, as the following letters from New Brunswick testify:

CHRONIC RHEUMATISM.

GRAND RIVER, N.S., Feb. 14, 1891.

I never expected to be able to write such a letter as this, to say I am clear of rheuma-

tism. I hardly know what to make of it, after suffering excruciating pain for years. At every coming storm my whole body and joints were in the greatest possible torment man could bear, and somehow or other it always appeared to me as if nobody pitied a man with the rheumatism. However, thanks to Dow's Sturgeon Oil Liniment, I now ask no man's pity on that score. I can do as good a day's work as ever I could. I used but two bottles of the Liniment, and feel like another person.

W. H. MACKMAN.

SALMON RIVER, N.B., Dec. 5, 1890.

Your Sturgeon Oil Liniment cured me of rheumatism of four years' standing. I suffered with pains during a great part of the time. No other remedies could cure or even do me any good; but your Liniment has, and my health is entirely re-established. That I should be sincerely grateful to you is natural enough, and I am. That you will be rewarded is the sincere wish of

A. E. HOOD.

Returning west again, a number of other wonderful cures are met. The first is a case of

RHEUMATISM FOLLOWING CATARRH.

BROWNSVILLE, Ont., Feb. 12, 1891.

It is an old saying, and a true one, that "misfortunes never come single." After having suffered four years with catarrh, the rheumatism set in, which deprived me of the use of my legs. I was confined to my bed for several weeks, and as great an object of pity as you can conceive. In this state, a friend advised me to try Dow's Sturgeon Oil Liniment, and as a last resort I did so, and after using but two bottles was entirely cured.

N. BARNETT.

AFTER FIFTEEN YEARS.

BUCKHORN, Ont., Jan. 30, 1891.

I have been afflicted with rheumatism for fifteen years, ten out of which I was entirely helpless; not even able to stir out of my chair without assistance. My limbs were swollen and my joints stiff. I had applied to all the physicians in my reach without any benefit. I have used but three bottles of Dow's Sturgeon Oil Liniment, and am now as well as any woman of my age (fifty-nine). I felt myself getting better from the first application. I can now walk without the assistance of cane or crutches.

H. Z. BARRY.

WHEN YOU WANT A GOOD DYE, USE TURKISH.

FORTUNATELY HE HEARD.

CARLISLE, Ont., Dec. 20, 1890.

I have long been the victim of rheumatism, which so affected my joints as to render me almost helpless, and unfitted me to perform any kind of labor. I used a great many kinds of medicine in the vain hope of getting relief, but obtained no benefit from any of them. The disease had obtained such a hold of my system that it seemed impossible to remove it, and I feared that it would continue to afflict me for so long as life remained. But, fortunately for me, I heard of your Sturgeon Oil Liniment, and was induced to try it. I have used two bottles, which have entirely cured me, and I am on my feet again, able to walk as well as anyone.

B. K. BELLAMY.

CENTREVILLE, Ont., Dec. 6, 1890.

I had rheumatism in my joints, which gave me great pain. I took one drug after another, hoping to be cured, but in vain. It held me in its grasp in spite of them all. When hope was almost gone I was induced to try Dr. Dow's Sturgeon Oil Liniment. Two bottles have entirely cured me. My case has been a very bad one—my sufferings such as I am not able to describe. I owe to the inventor of this Liniment an expression of gratitude.

T. MCGILL COATES.

Each of these letters, by persons well known in their respective neighborhoods, speaks volumes in favor of Dr. Dow's Sturgeon Oil Liniment. That this Liniment should be so effective is due to the value of its component parts. It was the discovery of Dr. Dow, a celebrated physician of New Brunswick, who used it extensively in his widely-extended practice. While many discoveries come largely by accident, aided by the wit to take advantage of it and improve by it, Dr. Dow's Sturgeon Oil Liniment was not one of these. On the contrary, it was the result of wide knowledge, large practical experience and much study. When the article sought for was finally secured, it was used with great advantage, to the fame of the physician as well as to the benefit of his patients. The secret of its preparation became known to its present proprietors, whose trade extends throughout the whole of British North America, and its virtues became familiar to all Canada and Newfoundland. And every year the knowledge of it and demand for it spreads. It is impossible for it to be otherwise. No people are more anxious to adopt a good thing than Canadians, and they have adopted Dr. Dow's Sturgeon Oil Liniment to their great benefit.

It is not only valuable as a counter-irritant to draw pain and inflammation from the internal organs to the surface, but is especially useful in restoring the skin to a healthy condition in all those annoying affections which are attended with inflam-

mation and eruptions, but where the surface is not broken, such as Frost-bites, Chilblains, Burns, Scalds, Erysipelas, Ring-worms, Boils, Felons and the like. Its action is as rapid as it is effective. This is one of its distinguishing traits. Hardly is the remedy applied than the pain begins to disappear, and soon it is away altogether. This is probably more noticeable in Rheumatism than in any other disease, because the pain is so excruciating and the change so rapid. Thus it is that there are so many letters which speak of the cure of Rheumatism.

But in Neuralgia it is no less effective. In Contracted Joints its effects are as wonderful as in any other trouble. Lumbago flies before it. It is a sovereign remedy for Sciatica. It finds in Cramp in the Muscles an easy task. Sprains and Bruises it alleviates immediately.

Testimony to these facts may be found everywhere Dr. Dow's Sturgeon Oil Liniment has been tried, and there are few places in Canada and Newfoundland where it has not been tried. Fishermen and Lumbermen, and others who are subject to all kinds of unfavorable weather and to risk of accidents greater than most of mankind, are especially pronounced in their expressions of its value. There are none better able to pronounce on the value of a liniment. Farmers are also particularly outspoken in its favor. Mechanics who are troubled with Rheumatism and similar complaints speak of it in the highest terms, and ladies do not hesitate to extol its virtues.

These are almost startling facts to those who have not tried it, but simple common-places to those who have. A trial is all that is necessary to convert a sceptic into a believer in Dr. Dow's Sturgeon Oil Liniment.

In fact, Dr. Dow's Sturgeon Oil Liniment is the perfect liniment. It is inexpensive, rapid in its action, effective, permanent in results, and its component parts are so wisely chosen, and it is so conscientiously compounded in the laboratory, that it never loses its strength. Under all these circumstances, it would be a great wonder if it were otherwise than it is.

Besides its great value in respect to the diseases of men alluded to above, Dr. Dow's Sturgeon Oil Liniment is very valuable in the treatment of several diseases of horses, and there are very many stables in which it has a place on the shelf. Amongst these are the following:—

BONE SPAIN.—This is an affection of the bones of the hock joint, caused by too violent action of the joint in galloping, heavy draughts, &c. When forming there is always lameness, which often disappears, although the disease remains. Dr. Dow's Sturgeon Oil Liniment is useful in Bone Spavin.

MANGE.—The loose scurf should be brushed from the skin, and the latter anointed with Dr. Dow's Sturgeon Oil Liniment mixed with an equal quantity of alcohol. Let it remain a day, and wash off with soap

TURKISH DYES ARE BRIGHT, PURE AND LASTING.

and warm water. Repeat three or four times, and the cure is certain. It never fails.

SAND CRACK.—Dr. Dow's Sturgeon Oil Liniment softens the hoof, prevents fungous granulation from the *sensible laminae*, and, by anointing the coronet with the Liniment two or three times a day, a healthy secretion is stimulated, which gradually fills up the opening in the hoof. A hot iron should be applied to the angle of the crack for a second to prevent its further extension, and the hoof be bound with a wax end. This very often effects a cure, although one can not be guaranteed.

CRACKED HEELS, SCRATCHES AND GREASE.—These are names for different stages of the same disease. The worst cases can be cured by keeping the parts affected strictly clean, and the application of Dr. Dow's Sturgeon Oil Liniment, they first being washed with Castile soap and warm water. A drachm of alum or blue vitriol added to a bottle of the Liniment will increase its efficiency.

WINDGALLS.—By saturating several thicknesses of muslin with Dr. Dow's Sturgeon Oil Liniment and applying it, Windgalls are frequently cured in one night. Care must be taken to bind the muslin on firmly.

POLL EVIL AND FISTULA IN THE WITHERS.—These are frequently cured by injecting Dr. Dow's Sturgeon Oil Liniment into the fistulous pipes. An opening must be made at the point where the matter gravitates, and kept open by a seton so as to allow free exit for the matter. Dr. Dow's Sturgeon Oil Liniment then being ejected, the cure is certain.

FOUNDER, RINGBONE AND HARD HOOF.—Dr. Dow's Sturgeon Oil Liniment is used with good results in these affections.

BLOOD SPAVIN.—If Dr. Dow's Sturgeon Oil Liniment is applied early, the soreness and

swelling are reduced, and by thorough and constant application a cure is often effected.

WEAK KNEES.—Dr. Dow's Sturgeon Oil Liniment gives tone to the cords and muscles of the knees, and is a very valuable strengthener.

BRUISES, STRAINS, SADDLE AND COLLAR GALLS, CUTS AND WOUNDS OF ALL KINDS.—Dr. Dow's Sturgeon Oil Liniment is useful in all these. It reduces inflammation, prevents proud flesh, and secures a clean surface which heals rapidly.

The lesson to be derived from these facts is very plain—Dr. Dow's Sturgeon Oil Liniment is a remedy which should be in every household. It is invaluable to cure all diseases of the human kind which are relieved by the application of a liniment. It is useful in healing many troubles of man's most faithful and useful friend, the horse. A wise man knows that it does not pay to drive a crippled horse; a kind man dare not. To the latter, every step of the suffering beast gives pain. Then, when such troubles as are mentioned above can be cured by the wise expenditure of a few cents in the purchase of Dr. Dow's Sturgeon Oil Liniment, it is difficult for a man to be considered either wise or kind who permits his horse to have any of these complaints for any length of time. It is better to begin the cure the moment the disease manifests itself than to let it get a firm hold which will require needless expense and suffering before it can be eradicated. It is here, especially, that this household remedy exhibits its great value, because it is always at hand, always can be applied without injury, and there are very few instances, indeed, where it is applied without beneficial results. Thousands who have tried this remedy testify to the truth of these statements.
