MONTRIAN, (Canada,) Nov. 12, 1849.

I, Augustin Norbert Morin, of the City of Montreal, Speaker of the Legislative Assembly of Canada, do hereby certify that I am acquainted with Mr. Lakocque, proprietor of the Plantagenet Springs; that the Plantagenet Waters have been widely used in this city and district, and with marked advantage, as far as I can judge by universal report. I have looked to the printed paper hereto annexed, the original certificates not having been shown to me. I have no doubt of its genuineness, from the well known position of the medical gentlemen and of others who have signed; and from the publicity which these certificates have had in the newspapers. The physicians whose name they bear are among the most respectable of the Faculty. Mr. Hunt, the Chemist, is also well known to me. Ladies' and Gentlemen's INDIA RUBBER

EXPLANATION AND MISTORY OF THE MYSTE-

The next chapter discusses the question, "Are they Good or Evil Spirits 1" who make these demonstrations—a question hardly in order as yet with those who have not decided that they are discussed that they are good, because they always do good—that is, their interposition in human uffairs uniformly tends to the avoidance of evil or the securing of good. This is an excellent touchsions, and we have no disposition to cavil at the conclusions thence attained. The following is one of the cases cited in evidence, (p. 64:)—

"On one occasion a gentleman of Rochester was indebted to a woman who was in great need of the money. The spirit directed her little sister to go to such a place in the street at a certain hour in the day, and she would meet the man who would up her three dollars for her sister. The little girl did not know the man who sweather man who were the man who would not her, "Are you the girl that fives with Mrs, — "I She registed in the affirmation." Here are three dollars for her wister they dollars I wish you would take to her, said the man, handing her a bill, and passed on."

The pamphlet admits, what the reports of investigating Committees given in our columns have already set forth, that the directions given by their "knockings" ure not reliable, but often errorscour. As this is rather important, let us hear what the vertice has to offer upon it, (p. 66:)—
"We see no reason for supposing that, because a man has raised from the state of existants. The has become at

reniesse. As this is rather important, let us hear what the writer has to offer upon it, (p. 66:)—

"We see no reason for supposing that, because a mars has passed from this stage of existence, he has become at once the most perfect of prophets, without regard to his condition here. There are, undoubtedly, sprits who desire to be soliced and to asswer qualtions, whe will be a likely to tell right as wrong. We do not believe these to be wifftelly ricious; these errors arise from their ignorance, and we are answered that they will ultimately progress to a sint of intilligence, purity, and happiness, equal to those who pais from here under more fiverable circumstances. Swedenborg anys there are scale sprins or institute that they will ultimately progress to a sint of intilligence, purity, and happiness, equal to hose who pais from here under more fiverable circumstances. Swedenborg anys there are scale sprins or institute that they will ultimately progress to a sint of intilligence, purity, and happiness, equal to those who not know but they are the ones called for, when nother is meant. This may be so. We are inclined to think it as, for we have known attempts to be made to imitate the signal which we shwaye get when we call four friends. Nearly every pressure who has called frequently for some particular spirit settle as a signals initiated. We do not think there is danger of being deceived by ignorant spirits when a person becomes acquained with these communications. The sound made by an ignorant spirit is quite different from the others. While the sound sould by the ignorant once is the said outgine, the new days and disposition of persons at the time of asking the questions, for, as all the Universe goes by affinities, it needs a pure mind, colum thinker and deliberate questioner to get communications from agrits of a ligh order."

These appirits, or whatever they may be, it

A statement has been made in some of the public prints to the effect that Mra. Parkinan, the wife of the lamented Doctor, had occasionly visited the family of the Professor since his incarceration; and that that unfortunate hady was till on friendly and intimate terms with Mrs. Webster. How far the existence of friendly feelings may be concerned, we know not; but we have suthority for stating positively; that Mrs. Parkman has not only not visited Professor Webster's family since the dreadful event, but has kept herself confined to but over residence, and has not even visited the members of her own treiteen family. Mrs. Parkman, will not be called upon to testify in the case. The evidence relative to the private marks about the perion of the Doctor, by which his body was identified in its manufed state; can be satisfantorily given by the physician of the family, and thus Mrs. P. will be freed from the agonizing position to which she would be subject, if she gave her sydence shefore the gaze of the public.

The Board of Trade and the Treasury have
furnished their respective accounts—supplying
data for estimating our national position. What
the producers of leading articles for the morning
journals have not failed to appreciate in this dull
season. One writer demonstrates to his entire
satisfaction that the phenomenon of a balance in
the Exchequer is the necessary result of recent
legislation, and the forerunner of much good fortune; another maintains that the captivating
figures are brought about by a species of jugglery;
while a third sees in the whole affair unmistakeable evidence of approaching national ruin. The
Trade Returns for the month and eleven months
ending the 6th Dechmber, 1849, do not show the
very large increase observable in the previows while a third sees in the whole affair unmistakes a ble evidence of approaching national ruin. The Trade Returns for the month and eleven months the even months are in the previous Returns. But it will be remembered that the exports in November, 1849, do not show the exports in November, 1849, were very heavy; it is not, therefore, to be wondered at that the exports in November, 1849, were very heavy; it is not, therefore, to be wondered at that the exports in the month and even only show in increase of £274,993 over the asme speriod in 1848. On the eleven months there is an increase of £274,993 over the corresponding months of large payments on secounts of imports, including grain, and consistent exports in the super tended of the present presents on secounts of imports, including grain, and one other stables, it is apparent that the great improvement has been in the exports of textile altries,—after the activity that has recently prevailed at Leeds, Manchester, and elsewhere.—Referring to the quantity in the large recently prevailed at Leeds, Manchester, and elsewhere.—Referring to the quantity in the large recently prevailed at Leeds, Manchester, and elsewhere.—Referring to the quantity in the large recently prevailed at Leeds, Manchester, and elsewhere.—Referring to the quantity in the large recently prevailed at Leeds, Manchester, and elsewhere.—Referring to the quantity in the large recently prevailed at Leeds, Manchester, and elsewhere.—Referring to the quantity in the large recently prevailed at Leeds, Manchester, and elsewhere.—Referring to the quantity in the large recently prevailed at Leeds, Manchester, and elsewhere.—Referring to the quantity in the large recently prevailed at Leeds, Manchester, and elsewhere.—Referring to the quantity in the large recently prevailed at Leeds, Manchester, and elsewhere.—Referring to the quantity in the large recently prevailed at Leeds, Manchester, and elsewhere.—Referring to the quantity in the prevair of the potential prevailed and the prevailed that the super du an increase of £374,993 over the same speriod in 1848. On the eleven months there is an increase of £9,681,897 over the corresponding months of last year. By the termination of 1849, the increased expotts was undoubtedly over ten millions sterling; and if we allew for larger payments on account of imports, including grain and some other staples, we shall still have an important balance in favor of this country, and such as will explain the large receipt of specie. Looking over the table, it is apparent that the great improvement has been in the exports of textile fabrics,—a circumstance which appears quite natural, after the activity that has recently prevailed at Leeds, Manchester, and elsewhere.—Referring to the quantity of imported articles that naid duty, for home consumption, we perceive that there is an important increase in grain, flint cut glass, leather manufactures, brandy, and tea; and a decrease in tallow, timber, and raw sugar. The Quarterly Statement of the Revenue extendite Saturday last. Looking at the whole year 1848, there is a decrease of £30,131 in comparison with 1848. But it must be borne in mind, that last year no duty was postponed, and that the sugar duties were reduced. Moreover, in 1848 there was £500,000 china money received; in 1849 not a penny. On the quarter ending 5th January, there is an increase of £470,005 over the corresponding quarter of 1848s. This is made up by a decided increase in six out of the eight heads of revenue. Politicians are doing their utmost to show how the surplus, of which Sir C. Wood will have to speak, may be most advantageously disposed of. The Financial reformers demand a general revision of taxation, and a large reduction of expenditure—the Ministerialists point to a reduction of the National Debt.

From abroad we have nothing deserving particular notice—except it be the embartasimints of the French Cabinets, and that a large portion of the Legitimists have latterly voted in the Legishative Chamber with the terra-parti and the areality which is daily s

The Judicature.

We thank "Justitia" for his courtesy. Our error, if such it can be called, was in giving the class in general terms. The terms of the Act, indeed, are very apt to mislead in the respect referred to. It declares that appealable cases are ferred to. It declares that appealable cases are ferred to a such a such a such a such as a ferred to. It declares that appealable cases are cases exceeding fifteen pounds, and generalizing, we said non-appealable cases were those under fifteen pounds. As to our quotations of "Justitia's" words, we maintain that in substance we were right, for it is unimportant inserting the words, ("as far as I have been able to perceive,") for it is clear from the ingenuity shewn by "Justitia's bis endeavor to discover every thing the most of the procession of th titia," in his endeavor to discover every thing which might tend to give the Act in question read day for appealable cases in nonerative? The Act declared that every day was a return force of Law, that had such provision regarding done with those cases in vacation; the Court is defaults been there, he would have perceived it, defaults been there, he would have perceived it, and ergo his not having perceived such, is proof of there being no such provision:

[Hence, it is evident that the Courier has committed two mistakes,—one, in stating non-appealable eases to be those under £15, and another, in directically declaring from his editorial chair, for the information of all the non-professional, and to the stupe-faction of all the professional, of Lower Canada, that "non-appealable cases are under fifteen pounds, and appealable cases are under fifteen pounds, and appealable cases are under fifteen pounds, and appealable cases of smally £15.1 Are they son-appealable or appealable? So, now that we have a micrably assisted each other,—he, to brush othe particle of soil from my letter,—and 1, to brush two from his paragraph, I shall proceed to consider other difficulties,—willingly acknowledging that such small infacturacies, on the part of my censor, do not in the least detract from his well-deserved title—to be considered an intelligent and well-deneated gentlemens; but that they have probably been due to a rapidity of thought that does not pusse to consider minutim: eagles do not see detached crumbs of bread.

There are certain Connectionists in Montres who, not seeing the signs of the times, vainly imagine the Queen's speech on the 29th instant will contain a paragraph that will put an extinguisher on Annexation.

This fact, if such it be, is more to be deplored than honored. It only proves to us were any proof wanting, that our trade is handmore tightly drawn, and that our traders and farmers cannot with the same former impunity traffic with their neighbors. In the case of H. Munro et. al. vs. Thomas Watson, it was moved by Rose & Holmes for the Plaintiff, that the Defendant be called in open Court, and, failing to appear, that a default be recorded against him. The motion was made for the murrous of catting a design on the particular of the particular Court, and, failing to appear, that a detailt be recorded against him. The motion was made for the purpose of getting a decision on the question as to whether any provision existed for recording defaults in appealable cases. Messrs. Holmes, Montizambert, and Bethune, urged different grounds in favour of having the cases called in open Court, and defaults recorded on Defendant not appearing when called. The main points were the following:—No provision, it was admitted, was to be found in the Statute—unless one was made by implication the appealable cases had been assimilated to the cases in the Superior Court in all matters respecting pleading; but the intention of the Legislature to introduce with respect to them a similar provision as that contained in the 23rd section, for Superior Court cases, had not been expressed. The form of the summons given in the Statute to direct the Clerk, ordered the Defendant to appear before our Court. Could this mean at the Prothonotary's office?

in that Court there had been great confusion—but that in the Circuit Court in cases of £6 5s., and under, he would follow strictly the letter of the present Act, and would not admit such exceptions. When a man takes exception, declaring that his name is not James, but Thomas, the question would be, is he the man intended to be summousd? If it be answered that he is, then he would order the process to be amended, and immediate proceedings had.

In the case of H. Munro et. al. vs. Thomas Watson, it was moved by Rose & Holmes for the Plaintiff, that the Defendant be called in open Court, and, falling to appear, that a default be recorded against him. The motion was made for the purpose of getting a decision on the question as to whether any provision existed for recording as to whether any provision existed for recording as

Could it be said that because the Act declared that in appealable cases the same delay for pleading, answering, and replying, should be allowed, as in the Superior Court—that, therefore, the provisions respecting defaults and the calling of Defendants in the Superior Court, should also be a provision for that Court? Could that Court supply a deficiency? Could it create a whole section by implication? Debtors for the most part were ignorant of Law. What was their guide? the Queen's Writ, commanding them to appear before the Court? It could not be expected that they would understand from that that they should appear at the Clerk's office! He would, however, decide on the motion, and that when the question was again brought up in another shape, he would review his judgment. He then asked what is the question to be decided; is it not whether the omission of repeating the 23rd section is of such a fatal nature as to render 23rd section is of such a fatal nature as to render the provisions in appealable cases inoperative? The Act declared that every day was a return day for appealable cases. Then what is to be done with those cases in vacation; the Court is not tisen Sitting? Then where return them?

Torkchire, late of the Life Guards, dated September 28th, 1848.

To Professor Hollowar,

Sia,—For a long time I was a Martyr to Rheumalism and Rheumatic Gout, and for ten weeks previous to using your medicines I was so had as not to be able to welk. I had tred doctoring and medicinear over the weeks and felt that I must shorty die. From seeing your remedies advertised in the piper I take in, I thought I would give them a trial. I did so. I rubbed the Chimment in as directed, and kept cabbage leaves to the parts thickly spread with it, and took the Pilis night and morning. In three weeks I was enabled to welk about for an hour or two in the day, with a stick, and in seven weeks I could go any where without one. I am now, by the blessing of God and your medicines, quite well, and have been attending to my business for more than seven months, without any symptome of the return of my old complesit.

Besides my case of Rheunstic Gout, I have lately had proof that your Pils and Ontment will heal any old wound or nicer, as a married woman, living near me, had had a bad leg for four years, which po one could cure, and I give be a some of your Pills and Ointment, which soundly healed it when nothing else would do it. For your information, I had the honor to serve my country for twenty-five years in the let Regiment of Life Guards, and was eighteen years a Corporal. I was two years in the Peningula War, and was at the Battle of Waterloo. I was dicharged, with a pension, on the 2nd September, 1833. The Commanding Officer at the time was Colonel Lygon, who is now a General. I belonged to the troop of Captain the Honorable Henry Basing.

AMPUTATION OF TWO TOES PREVENTED Extract of a Letter from Mr. Oliver Smith Jen-kins, duted Falkirk, August 13th, 1848.

kins, dated Falkirk, August 13th, 1848.

To Professor Holloway,
Sir,—I was superintending, about six months ago,
the erection of one of our Rankwy Bradges, and-by
the fail of a large stone my right foot was seriously
brused, which ultimately got so bad, that I was advised to go to Edinburgh to consult as me of the emineat Surgeons, which I did, and was told that in order
to save my loot, two of my toes must be taken off.—
In dispair, I returned home to impart the melancholy
news to my wife, intending to submit to the operation,
it was then a thought struck me to try your valuable
Ointment and Pills, which I did, and was by their
means in three weeks enabled to resume my usual
occupation, and at this time my toes are perfectly
cured.

AN EXTRAORDINARY CURE OF A DES PERATE SKIN DISEASE.

On the 21st July, 1848, the Editor of the "Mofussiite" Newspaper, published in India, inserted the following Editorial article in his paper:—"We know for a fact, that Holloway's Pills and Onotment act in a most wonderful manner upon the constitution, as an eccentric Coolie, called Bliza, employed in our Establishment, was affected with myriads of Ringworms, which defied all the Meerut Deotors, and promised to devour the poor man before he was under ground; was tried "Holloway" upon him, and in a month he was perfectly restored to his former condition and clennliness of skin. The effect was miraculous."

The Pills should be used conjointly with the Oint ment in most of the following cases:-Gout Glandular Swellings Lumbago Piles Rheematism

Scalds Sore Nipples Sore-throats Skin-diseases Sore-heads Yaws

REDUCED RATES OF PREMIUM-HALF CREDIT RATES OF PREMIUM.

BRITANNIA

THE great and decided success which has attended this Institution has induced the Directors to REDUCE the RATES originally equired in British North America to the ordinary required in British North America. to the ordinary European Rates. The result of such Reduction is to enable parties to avail themselves of the important benefits of Life Assurance at much lower Rates of Premium than those of any other Assurance Company transacting business in Canada.

The Directors have also resolved to extend to British North America the advantages afforded by the HALF CREDIT RATES of PREMIUM which have been an highly approved and are so which have been so highly approved and are so generally adopted by Policy Holders in the United Kingdom. Life Pills and Phenix Bitters. These Medicines have now been before the pub-lie for a period of FIFTEN YEARS, and during that time have maintained a high character in almost every part of the globe for their extraor-duary and immediate power of restoring perfect health to persons suffering under nearly every kind of disease to which the human frame is liable.

IN MANY THOUSANDS

of certificated instances, they have even rescued sufferers from the very verge of an untimely grave, after all the deceptive nostrams of the day had utterly failed; and to many thousands they have permanently secured that uniform enjoyment of health, without which life itself is but a partial blessing. So great, indeed, has their efficacy invariably and infallibly proved, that it has appeared scarcely less than miraculous to these who were acquainted with the beautifully philosophical principles upon which they are compounded, and upon which they consequently act. It was to their manifest and sensible action in purifying the springs and channels of life, and enduing them with reand channels of life, and enduing them with newed tone and vigor, that they were indebted for

newed tone and vigor, that they were insected not their name.

Unlike the host of pernicious quackeries which boast of vegetable ingredients, the LIFE MEDICINES are purely and solely vegetable; and contain neither Mercury, nor Antimony, nor Arsenic, nor any other unineral, in any form whatever. They are entirely composed of extracts from rare and powerful plants, the virtues of which, though long known to several Indian tribes, and recently to some eniment pharmaceutical chemists, are altogether unknown to the ignorant pretenders to medical science; and were never before administered in so happily efficacious a combination.

medical science; and were never before administered in so happily efficacious a combination.

The first operation is to loosen from the coats of the stomach and bowels the various impurities and credities constantly settling round them; and to remove the hardened faces which collect in the convolutions of the small intestines. Other medicines only partially cleanes these, and leave such collected masses behind to produce habitual Costiveness, with all its train of evils, or sudden Diarrhoa with its imminent dangers. This fact is well known to all regular anatomists who examine the human bowels after death; and hence the prejudice of these well-informed men against the quack medicines of the age. The second effect of the VEGETABLE LIFE MEDICINES is to cleanse the kidneys and the bladder; and, by this cleanse the kidneys and the bladder; and, by this means, the liver and lungs, the healthful action of which entirely depends upon the regularity of the urinary organs. The blood, which takes its red urmary organs. Ine blood, which takes its red color from the agency of the liver and langs, before it passes into the heart, being thus purified by them, and nourished by food coming from a cleau stemach, courses freely through the veins, renews every part of the system, and triumphantly mounts the banner of health in the blooming check.

of health in the blooming cheek.

The following are among the distressing variety of human diseases in which the VEGETABLE LIFE MEDICINES are well known to be infal-

ible:

DYSPEPSIA, by thoroughly cleansing the first and second stomachs, and creating a flow of pure healthy bile, instead of the stale and acrid kind; FLATULENCY, Loss of Appetite, Hearthurn, Headache, Restlessness, Ill-temper, Anxiety, Languor, and Melancholv, which are the general symptoms of Dyspepsia, will vanish, as a natural consequence of its cure.

Costiveness, by cleansing the whole length of the intestines with a solvent process, and without violence: all violent-purges leave the bowels costive within two days.

Diarrhoea and Cholera, by removing the

Diarrhosa and Cholera, by removing the sharp acrid fluids by which these complaints are occasioned, and by promoting the lubricative secretion of the mucous membrane.

tion of the mucous membrane.

Fevers of all kinds, by restoring the blood to a regular circulation, through the process of perspiration in such cases, and the thorough solution of all intestinal obstruction in others.

The Life Medicines have been known to cure RHEUMATISM permanently in three weeks, and GOUT in half, that time, by removing local inflammation from the muscles and ligaments Dropsies of all kinds, by freeing and strengthening the kidneys and bladder: they operate most delightfully on these important organs, and hence have ever been found a certain remedy for the worst cases of GRAVEL.

Also Worms, by dislodging from the turnings of the bowels the slimy matter to which these

creatures adhere.

Asthma and Consumption, by relieving the air-vessels of the lungs from the mucous which even slight colds will occasion, and which, if not removed, becomes hardened, and produces these dreadful disease.

Scarry, Uleers, and Inveterate Sores, by the perfect purity which these LIFE MEDICINES give to the blood, and all the humors.

Scorbutic Eruptions and Bad Complexions.

ions, by their alterative effect upon the fluids that feed the skin, and the morbid state of which occasions all eruptive complaints, sallow, cloudy, and other disagreeable complexions.

The use of these Pills for a very short time will effect an entire cure of SALT RHEUM, and a

striking improvement in the clearness of the skin.
COMMON COLDS and INFLUENZA will dways be cured by one dose, or by two even in

TILES. As a remedy for this most distressing and obstinate maindy, the VEGETABLE LIFE MEDICINES deserve a distinct and emphatic recommendation. It is well known to hundreds in the second control of these values. this city, that the former proprietor of these valuable Medicines was himself afflicted with this able Medicines was himself afflicted with this complaint for upwards of THERTY-FIXE YEARS; and that he tried in 'van 'every remedy prescribed within the whole compass of the Materia Medica. He however at length tried the Medicine which is now offered to the public, and he was cured in a very short time; after his recovery had been avery short time.

FEVER AND AGUE.

For this scourge of the western country these Medicines will be found a safe, speedy, and certain remedy. Other medicines leave the system subject to a return of the disease—a cure by these medicines is permanent—TRY THEM, BE SATISFIED, AND BE CURED.

Bilious Fevers and Liver Complaints.

General Debility, Loss or Affertra, and Demants of Fernation—these medicines have been used with the most beneficial results in cases of this description:—King's Evil., and Scropula, in its world forms, yields in the mild yet powerful action of these requarkable, Medicines. Magnetic Swarts, Nervous Desilaty, Nervous Complaints of all binds, Palitatylor of the Heart, Painter's Coase, are speadily cured.

MERCURIAL DISEASES. Tersons whose constitutions have become impaired by the injudicious use of Maxicux, will find these Madicines a perfect cure, as they never full to undicate from the system all the effects of Mercury infinitely isomer than the most powerful reparations of Sarsaparilla. A single trial will place them beyond the reach of competition, in the actimation of every patient.
