"I don't see what that's got to do

did see. "I could never, never, never be Mrs. when I could change my name. Everyone has always made jokes about mine. But I just won't, won't, won't change it to Mrs. Preserved Fish."

"Oh, Amy!" he groaned. "It's no use," she said firmly. "I'd rather stay Amy Hogg. That's bad enough. I want a man with a good plain name like Brown or Williams. No, Preserved, it cannot be."

He stumbled home and thought of name. It wasn't the first time he had come to reward persistent effort. contemplated this step. More than once, galled to the limit of endurance by the "Pickled Eel" joke, he had been on the point of getting his name changed to "Montague."

But a vision came before his eyes, In this case, as in others. He remembered his mother's words, and saw half a gallon of water each day.

heaps and heaps and heaps of yellow—

The face should be well washed backed bills. His! His, that is, if he remained Preserved Fish. Hed ecided to remain so. Uncle P. Robinson couldn't live forever; and when he died, Preserved, his namesake, would be independently rich. He could snap his fingers at them all. He practiced snapping them as he made his way home from the verandah of Miss Hogg. He could go to New York and at the Waldorf Astoria and no one would care what his name was so long as he spent freely. And he would spend freely, he promised himself and the world that. Yes, he would pay said the lawyer. Weakly, Preserved the price for that wealth by remaining Fish read it. Preserved until the legacy should be his. It was a big price, he thought, for any amount of money. In his dreams that night he saw piles of yellow bills as high as the five-storey

Clintonia Trust Company Building. Uncle P. Robinson refused to expire. He stuck to life like a barnacle for five years more. Five years of notoriety and torment for Preserved. Amy Hogg married a pants drummer named Ignatius McGoorty. Preserved sent them a plaster Kewpie for their parlor, and wept into the soda fountain's fresh strawberry syrup. The calcium continued to glare into his blue eyes. But he continued to draw trade into the store, and Old Man trade into the store into the s

Keplar gave him a three-dollar raise and taught him to roll pills.

son isn't."

"Isn't what?" demanded Preserved. "Any more," replied Galahad.
"You don't mean—" began Preserved, trembling with joy.

said Galahad. "Here's the telegram. his one thought was to leave Clintonia Say, old can of shrimps, can you lend

Minard's Liniment Heals Cuts.

About the House

A BEAUTIFUL COMPLEXION.

Millions of dollars are paid for cosmetics in a single year. That gives an idea of how much we crave beauty, the beauty that is skin deep. Our hearty country girls are just as earnest as their city sisters in their efforts to give nature a boost in this direction; and their brothers, too, show more than a passing interest. So it is evident that complexion is a matter of very special importance, and that the disfiguring skin disease known as acne, blotching the face with more dish for cool evenings or when and that the disfiguring skin disease known as acne, blotching the face with pimples and blackheads, means great mental distress, even though it does not very seriously impair one's physical powers.

matoes are done.

Corn Oysters—This is a good supper dish for cool evenings or when something tasty and substantial is desired. It may be made from corn that is a little too old for boiling, and will consider the constant of the c

The very best complexion treatmen with it," said Preserved, although he is a cold or cool bath, once daily, pre ferably in the morning. This should be taken in a warm room and the Preserved Fish," she replied. "I've water should be cool enough to get a always looked forward to the day brisk reaction, but there is nothing gained by extreme cold temperatures. Even more important than the bath is the brisk rub that should follow. It must be borne in mind that we are must be borne in mind that we are ful of grated cheese. Cook the pepper now prescribing for young people of for five minutes in a generous table vigorous habit, who desire a good complexion. Such treatment is not quicken the circulation and to improve not only the skin but every organ in corn, cheese and fried pepper and add drinking poison, but decided that the body. Improvement will not come there was still hope. He'd change his in a single week, but it will surely

> The diet of young persons with acne should be rather abstemious, especial-

"Oh, why couldn't you?" There is "Because of your name," she ans-

wered. "I don't see what that's got to do with it," said Preserved, although he

did see. "I could never, never, never be Mrs. when I could change my name. Everyone has always made jokes about mine. But I just won't, won't, won't change it to Mrs. Preserved Fish."

"Oh, Amy!" he groaned. "It's no use," she said firmly. rather stay Amy Hogg. That's bad enough. I want a man with a good plain name like Brown or Williams No, Preserved, it cannot be."

name. It wasn't the first time he had come to reward persistent effort. contemplated this step. More than once, galled to the limit of endurance by the "Pickled Eel" joke, he had been on the point of getting his name changed to "Montague."

But a vision came before his eyes, In this case, as in others. He remembered his mother's words, and saw half a gallon of water each day.

heaps and heaps and heaps of yellowbacked bills. His! His, that is, if he to remain so. Uncle P. Robinson couldn't live forever; and when he usually oily skin is removed. died, Preserved, his namesake, would be independently rich. He could snap his fingers at them all. He practiced snapping them as he made his way home from the verandah of Miss Hogg. He could go to New York and at the Waldorf Astoria and no one would care what his name was so long as he spent freely. And he would the price for that wealth by remaining Preserved until the legacy should be his. It was a big price, he thought, for any amount of money. In his dreams that night he saw piles of yellow bills as high as the five-storey

Clintonia Trust Company Building. Uncle P. Robinson refused to expire. He stuck to life like a barnacle for five years more. Five years of notoriety and torment for Preserved. Amy Hogg married a pants drummer named Ignatius McGoorty. Preserved sent them a plaster Kewpie for their parlor, and wept into the soda fountain's fresh strawberry syrup. The calcium continued to glare into his blue eyes. But he continued to draw trade into the store, and Old Man and faced him with wild eyes.

Keplar gave him a three-dollar raise and taught him to roll pills. birthday his brother Galahad came into the drug store importantly, kick—"and look what I get"

"Well, old sardine, Uncle P. Robinson isn't."

"Isn't what?" demanded Preserved. "Any more," replied Galahad.
"You don't mean—" began Preserv. ed, trembling with joy.

A week later, Preserved Fish, accompanied by his father and Galahad, who had generously taken a day off "I'm an experienced soda dispenser" from the glass works to help count the money, stood in a lawyer's office and I'd like to get a job. I got twenty-five a week where I was."

and was handed the old walrus bag.

"Well, I need a man," the owner

He fumbled at the lock and the bag popped open like the mouth of a croco-dile. With excited eyes Preserved stared at the heaps and heaps of bills.
"It'll run into five figures," gloated
the venerable Mr. Fish.

A sharp, horrified oath from Galahad brought them back to their senses

with a jerk.
"Gawd!" cried Galahad. "It's

phoney!"
"Phoney?" Preserved's knee joints went weak; his head spun dizzily. "Phoney!" piped old Mr. Fish. "Look!"

Galahad plunged his hand into the bag and held aloft a sheaf of worn

"Confederate money!"

LOLLYPOP DOLLIES.

Some thing that will please the children without much expenditure of either time or money is what many nothers are considering for that approaching birthday or any other party, an occasion of thrilling importance to the youngsters.

Buy a quantity of lollypops and some gayly colored crepe paper, or use the odds and ends of such paper you may already have in the house. Cut circles of white or pink tinted paper the size of the candy and fasten over the waxed paper in which each lollypop is wrapped with two or three touches of glue. Next mark on these circles all sorts of funny faces. From the gay paper fashion bonnets and dresses held in place by bits of narrow ribbon and touches of glue. Thrust the end of the stick through an empty spool and you have a charming doll that can stand alone. Endearing colored babies may be made by using black paper for the faces.

These lollypop dollies may be used as place cards or to decorate indi-

AUGUST 19.

Stephen the Martyr, Acts 6: 1 to 8: 3; 22: 20. Golden Text — Who shall separate us from the love of Christ? shall tribulation, or distress, or persecution, or famine, or nakedness, or peril, or sword?—Rom. 8: 35.

Lesson setting—In the fourth chapter of Acts we read, "Neither said any of them that aught of the things which be possessed was his own; but they had all things common." The distribution of this common fund was supervised by the apostles, but complaints arose about the distribution, and the apostles, seeing that the preaching of the Word was their pressing first duty, asked for the appointment of seven men of honest report and full of the Holy Spirit and wisdom. Of the seven men chosen, the first mentioned is Stephen, and he is described as a man "full of faith and of the Holy Spirit." No nobler character ever wore the martyr's and the accused. He is blind to their anger. He sees not only the glory of dod, but Jesus himself in the place of honor and the attitude of power. It that wisdom. Of the seven men chosen, the first mentioned is Stephen, and he is described as a man "full of faith and of the Holy Spirit." No nobler character ever wore the martyr's

The Libertines were most likely the children of Jews who had been carried to Rome as captives by Pompey. Being made freedmen (libertini) they had returned to Jerusalem and formed a synagogue among themselves. Cyrene was a city in Africa. Alexandria was in Egypt. Cilicia and Asia were provinces in Asia Minor. In all these places there was a new many lower.

and ria was in Egypt. Clicia and Asia were provinces in Asia Minor. In all these places there were many Jews and in Jerusalem there were many who had rturned from these places and had their synagogue in Rome. Disputing with Stephen: regarding the truth of the gospel which he preached, and chiefly the Messiahship of Jesus, which was the crucial truth. Vs. 10, 11. Were not able to resist. Stephen's natural abilities were reinforced by the gift of the Spirit. His utter sincerity puts to shame the quibbling opponents. They suborned men. When they cannot overthrow Stephen in argument, they begin to plot against him by procuring false witnesses against him. They follow the same policy as was used against Jesus. We have heard him speak blasphemous words. His enemies were cunning enough to make a charge that had some semblance of truth in it. Stephen doubtless made the teachings spiritual blessing. cunning enough to make a charge that had some semblance of truth in it. Stephen doubtless made the teachings of Jesus supreme above the law of Moses, but taught that the law had been fulfilled, not destroyed, by his that Faith in God through him—a Master. So also, as we shall see, the charge stated later, that he had spoken against the Temple, only meant guishes it from what is elsewhere that Stephen had taught that God's dwelling place was not confined to the Temple. dwelling place was not confined to the Temple.

Vs. 12-15. They stirred up the people. The common people gloried in the temple. They would be greatly moved by any word said against it and would not stop to examine into the truth of the charge. Brought him to the councit; the Sanhedrin, composed of seventy-one members, which dealt with matters of Jewish religion. All looked at him steadfastly, waiting for him to speak his words of defence. Face of an angel. Instead of beholding a man with anxiety and fear upon his face, courage, grace, faith, beauty of character all shone upon his countenance. Amid the scowling faces there was one radiant one.

Under average condiplants decay down.

As soon as the crop is harvested the cover crop should be used. It has been found that even as late as the last of October a crop of rye planted will provide a good growth by early spring. The cover crop should be planted as soon as the last crop of the season is and that they are given liberal range where there is abundance of green a stick or stone, the bed knife of a fed and also animal feed in the form of insects, worms, etc.

Cull out the old stock that you do not intend to keep over for another year, and sell them early while the price is higher and while they are in good condition before they commence.

Such a cover crop of oats and part of the bed knife reformed to the rate of the pecks to the acre (7 pecks oats and 3 pecks peas). This by fall forms a dense growth which should be plowed down as late as possible. If the crop, however, has to stay in the ground over winter, winter rye does best. This should be per acre and is better spread broadcast than drilled and usually may be left until early spring or until the ground is needed for the next crop.

cover crop equals in value fifteen tons of manure. A grower cannot afford to waste this opportunity for food conservation and humus growth. Even where early vegetables are to be grown the following season it sometimes pays to leave the cover crop over winter, to hold readily available soil fertility.

GREEN FEED TO SUPPLEMENT PASTURE.

and feed, and follow this up by weighduction of humus has become of great ing and testing his milk to determine importance since manure has been becoming steadily less available. The producers. amount of green feed required tions, from 20 to 80 pounds of green feed per cow per day will carry the herd over the dry period in reasonably good condition. For a herd of ten cows, one should have at least 250 pounds of green feed per day, available from the middle of July until the middle of September. In other words, it would require about 13 tons of green feed for the season. Under average conditions, this amount should be obtained from 11/2 to 2 acres of well-tilled land.

In order to have this available at the right stage for feeding during the entire period, it should be sown at intervals of three weeks. For instance, the first half-acre should be sown as ter rye does best. This should be early in May as possible; the second planted at the rate of 2½ to 3 bushels and so on until the area is all sown.

Our experience in providing green feed for the dairy herd at the Experimental Farm, Nappan, has been that by growing four acres of green feed we can carry fifty head of dairy cown through the season in reasonably good condition on twenty-five acres of pasture (twenty acres of this is rough pasture and very poor, providing very little more nourishment than the five acres of good pasture). Furthermore the meal ration was cut from an average of 9.2 pounds per day to an average of 4.4 pounds, making a saving of 9 cents per head per day. A dairy cow may have inherited all the qualities of her ancestors as a pro-ducer, but unless she is supplied with a sufficient amount of the right kinds of raw material to manufacture milk. she will remain an unprofitable cown therefore a supplement of these dried-up and poor pastures must be pro-

The Sunday School Lesson

AUGUST 19.

Stephen the Martyr, Acts 6: 1 to 8: 3; 22: 20. Golden Text — Who shall separate us from the love of Christ? shall tribulation, or distress, or persecution, or famine, or nakedness, or peril, or sword?—Rom. 8: 35.

Lesson setting—In the fourth chapter of Acts we read, "Neither said any of them that aught of the things which be possessed was his own; but they had all things common." The distribution of this common fund was supervised by the apostles, but complaints arose about the distribution, and the apostles, seeing that the preaching of the Word was their preaching of the Word was their pressing first duty, asked for the appointment of seven men of honest report and full of the Holy Spirit and he is described as a man "full of faith and of the Holy Spirit." No nobler character ever wore the martyr's grown.

I. STEPHEN'S SHINING FACE. ACTS

Vs. 8, 9. Stephen, full of faith and power. The task to which Stephen was appointed did not prevent him from taking a conspicuous part in the preaching of the Gospel. Did great wonders. He seems to have been as largely used by the Spirit as the apostles themselves. Certain of the synagogue . . of the Libertines . . disputing. The number of synagogues in Jerusalem was very large, somewhere between three and four hundred. The Libertines were most likely the children of Jews who had been carried to Rome as captives by Pompey. Being made freedmen (libertini) they had returned to Jerusalem and formed a synagogue among themselves. Cyrene was a city in Africa. Alexandria was in Egypt. Cilicia and Asia were provinces in Asia Minor. In all these places there were many Jews and in Jerusalem there were many who had their synagogue in Rome was the historian of the sentence must be carried out beyond the city walls. The witnesses laid down their clothes; laid aside their outer garments for action. The law required that the witnesses against the accused must cast the first stones. In this abrupt and dramatic way we get our first glimpse of the great apostle of the Gentiles, as a persecutor. The description "young men" is applicable to any one about the age of forty. Receive my spirit. In this great hour, Jesus is his strength. Lay not this in to their charge. Like his Master, he shows his spirit of utter forgiveness.

APPLICATION.

Stephen had surely won the admiration and love of the early Church and their synagogue in Rome.

are milking well the lambs may thrive half pound of grain per day. The ewe put down as unknown. without any other feed, although lambs and wethers may be given the larger gains are possible when grain same treatment. Grain never gives such returns as when fed young growing animals. In the latter part of July, howfeed in the form of pasture or as a ing and requires less help, providing a substance produces heat. The centre soiling crop, and grain will give good the bins are situated properly for of a manure pile sometimes heats between this time. Owing to labor cost masturing is the only providing. My bins all face to cause of the reaction taing place. Manually properly from the labor cost masturing is the only provided as the control of a barn this plan saves a lot of lift. For example, a strong acid acting on mappens, it is a problem deserving some thought.

Some authorities believe that the modern methods of hurrying hay into the labor cost masturing is the only provided as the control of the labor cost, pasturing is the only practical fay to feed clover aftermath. Oats and peas, or rape, make excellent summer pasture. While rape is good feed, sheep should not be closely confined on rape alone but should have the run of a grass pasture. An ideal te. Make a "run" of about sixty arrangement is to have the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or reasonable and rape alone but the rape field bushels of wheat or rape alone but the rape field bushels of wheat or rape alone but the rape field bushels of wheat or rape alone but the rape field bushels of wheat or rape. arrangement is to have the rape field bushels of wheat or rye, and ninety adjacent to some pasture, and arrange bushels of wheat or rye, and ninety in the gate so that the lambs can go wagon and a boy to hold sacks will crease in temperature may reach the plants may contain much moisture from the rape to the pasture of will be reached to have the plants and smaller twigs are in turn produces heat. Thus the inquickly effected. was a mighty commination of an end o

who had rturned from these places tion and love of the early Church and had their synagogue in Rome. when the historian of those first days Disputing with Stephen; regarding could say such things of him as we the truth of the gospel which he find in this sixth chapter of Acts. He Disputing with Stephen; regarding could say such things of him as we the truth of the gospel which he preached, and chiefly the Messiahship of Jesus, which was the crucial truth. Vs. 10, 11. Were not able to resist. Vs. 10, 11. Were utter sincerity puts to shame the quibbling opponents. They suborned men. When they cannot overthrow Stephen in argument, they begin to plot against him. They follow the same policy as was used against Jesus. We have heard him speak blasphemous words. His enemies were cunning enough to make a charge that had some semblance of truth in it. Stephen doubtless made the teachings of Jesus supreme above the law of Moses, but taught that the law had been fulfilled, not destroyed, by his Master. So also, as we shall see, the charge stated later, that he had spoken against the Temple, only meant that Stephen had taught that God's dwelling place was not confined to the Temple.

Vs. 12-15. They stirred up the people. The common people gloried in the temple. They would be greatly moved by any word said against it and would not stop to examine into the council; the Sanhedrin, composed of seventy-one members, which dealt with matters of Jewish religion. All looked at him steadfastly, waiting for him to speak his words of defence. Face of an angel. Instead of beholding a man with anxiety and fear upon his face, courage, grace, faith, beauty of character all shone upon his counter.

SHEEP

Is singled out and characterized as "a lenny her will said, "When we open the New Testament we find ourselves in the presence of a glowing religious life. For example, a strong acid acting on happens, it is a problem deserving from the rape to the pasture at will. handle all the grain any machine will ignition or burning point of the sub- and, especially if rainy weather is en-

POULTRY

There is a tendency among some people to believe that poultry do not require any special care during the summer months, and may be allowed practically to shift for themselves. While it is true that enoditions are more favorable for growing stock, and for egg production in adult stock, yet at no time of the year is more care to time of the year is more care months. Poultry kept in close, stuffy sleeping quarters cannot be kept in the best condition of health, and are justment.

Tuning Up the Lawn Mower.

A few simple operations may be necessary to put your lawn mower in good condition.

Take the machine apart—really apart. Ther will be at least seventy pieces. Give each piece a bath in kerosene, using a scrub brush and wiping dry with an old rag. Be sure to do a good, thorough job of cleaning, as the mower cannot properly function if badly clogged with grass and dirt. After the bath and drying, assemble the machine without reference to ad-

Eidt, of the Department of lice of the motor car has meant a cows are eliminated from the herd, new era in vegetable gardening to the lice of the motor car has meant a cows are eliminated from the non-profitable advent of the motor car has meant a cows are eliminated from the new era in vegetable gardenin dairy cows will give them good care

good condition. For a herd of ten cows, one should have at least 250 pounds of green feed per day, available from the middle of July until the middle of September. In other words, it would require about 13 tons of green feed for the season. Under average conditions, this amount should be obtained from 11/2 to 2 acres of well-tilled land.

In order to have this available at the right stage for feeding during the entire period, it should be sown at intervals of three weeks. For instance, the first half-acre should be sown as early in May as possible; the second half should be rown three weeks later; and so on until the area is all sown.

Our experience in providing green feed for the dairy herd at the Experimental Farm, Nappan, has been that by growing four acres of green feed we can carry fifty head of dairy cows through the season in reasonably good condition on twenty-five acres of pasture (twenty acres of this is rough pasture and very poor, providing very little more nourishment than the five facres of good pasture). Furthermore, the meal ration was cut from an average of 9.2 pounds per day to an average of 4.4 pounds, making a saving of 9 cents per head per day. A dairy cow may have inherited all the qualities of her ancestors as a producer, but unless she is supplied with a sufficient amount of the right kinds of raw material to manufacture milk. she will remain an unprofitable cow therefore a supplement of these driedup and poor pastures must be provided.

The growing of oats, peas and vetch as a supplement to these poor pastures is rapidly becoming recognized

In fact, the greatest trouble came grain right into the wagon box. Then from slow but constant seepage of have a grain dump or blower that the pent-up water along the surface can be run with a gas engine of about of the original ground. No matter three and one-half to four horsepower, how well the fill was tamped the union The dump can be run with a team between the fill and old ground was also. This method of handling any not quite complete. The water would work its way through, weaken a layer, hand labor, and two or three men with then, without warning, a tiny rivulet two teams can handle all a thresher would appear on the lower side, grow larger, and finally crumple the whole where you want it .- B. Frank Tackaberry and children have been guests of Mrs. Argue. Miss Frances Dunn, Bellingham, was a recent guest of Mrs. D.

McConnell Brothers' threshing outfit has started operations for the sea-

The Misses Landon, of Lyndhurst, spent the last few days with Miss Georgie Willougmby.

HereandThere

A jersey cow owned by a Mont-real man has broken all Canadian records by producing 1,200 pounds of butter in a year.

The average annual per capita cost from fires in United States is \$2.26, while Canada loses \$2.73 per capita by fire; Spain, \$1.86; France, 97 cents; England, 64 cents; Germany, 28 cents, and the Netherlands, only 11 cents. only 11 cents.

Bungalow Camps in the wilds of Ontario have been opened by the Canadian Pacific Railway Company at French River, Nipigon, and near Kenora, Lake of the Woods.

Traffic through the Lachine Canal during the month of June showed an increase of two million bushels of grain and one hundred thousand tons of coal with increases in pulpwood, produce and passengers over the same month of the previous year.

The wheat crop of Alberta and Manitoba has progressed so well on account of the abundant moisture of the early season that farmers, business men and railroad companies are preparing for a harvest in excess of the record one of 1915.

Prince Rupert, B.C., claims the world's best record for a one trip fish catch. A fishing schooner arrived at this port recently after being at sea 14½ days, with 38,000 pounds of halibut, which sold for a sum that netted each man of the crew of five \$727.80.

In the Province of Ontario, it is estimated, the lumber cut in 1922 amounted to 309,000,000 board feet, and in addition 289,113 cords of pulpwood. The Province of Nova Scotia cut 125,000,000 feet, New Brunswick 210,000,000 feet, and British Columbia 273,146,000 board

The Dominion Express has just effected a shipment from Hamburg to Kobe, Japan, in 32 days. The average time consumed between the same two points via the Suez Canal is 49 days, and the saving thus made by the Canadian route will be of great importance in helping make this country the road between Europe and the Orient.

The total value of the pelts of furbearing animals taken in the Dominion during the season of 1921-22 was \$17,438,800, an increase over the previous year of \$7,287,273, or 72 per cent., and the number of pelts of all kinds was 4,366,790, an increase over the previous season of 48 per cent. These figures comprise pelts of animals taken by trappers and pelts of ranch-bred animals.

Tests of ceramic clay resources in Critish Columbia are being planned this summer by the British Columbia Government. The tests will be made under the auspices of the Department of Industries. There are many varieties of clays in Prit are many varieties of clays in Brit-ish Columbia and some are reported to be particularly suited to the manufacture of high class pottery ware.

A reduction of express rates on westward moving business between Europe and Canada was announced by the Foreign Department of the Dominion Express Company recently. This reduction on westbound shipments follows a similar cut on shipments from Europe to Canada made a little while ago, and amounts to a reduction of approximately twenty per cent. on the trans-ocean trip. The rates came into effect on July 9 between all points in Canada and Europe. and Europe.

The Banff-Windermere highway, the last link in the 6,000-mile chain of good roads which extend from the heart of the Canadian Rockies to California and return is now open motor traffic, having been offiy opened on June 30th by the cutting of a riband at Kootenay crossing in the presence of a num-ber of Federal and Provincial Government officials, and a host of automobile tourists. The comple-tion of this road has rendered accessible the most beautiful scenic country on the continent.

Below—Canadian Pacific tank are unit on the road.

Left—Showing the pumps and how they throw a stream high over a 90 foot tower.

OOK at the boards at your feet, the walls which surround you, the roof over your head, the chair in which you sit, and your furniture. All are products of the Canadian forests, and practically everything you come into contact with in the day depends on the forest for one or more of its component parts. Then take the foods you eat, the paper you read by the wood fire at night; the food is produced by Canadian farmers who depend on the forest for a regular supply of moisture, the paper is composed largely of wood pulp. It is almost beyond comprehension—the amount of lumber used by Canadian industries each day, and the amount used in construction and in the development of the country each year. Canada's prosperity, her whole future, is one with that of her forests.

Ontario alone gives employment to 17,000 men in the bush; pulp and paper mills in the same province employ 8,000 men, and the amount of capital invested in the two industries amounts to over \$150,000,000. Yet, for every tree that is felled, for every log that helps to keep the wheels of industry moving, for every board that is used in construction, twelve are destroyed in the forest by fire. This means that forest fires consume twelve times the amount of the lumber which is the life of Canadian industries, and that each year.

employ 8,000 men, and the amount of capital invested in the two industries amounts to over \$150,000,000. Yet, for every tree that is felled, for every log that helps to keep the wheels of industry moving, for every board that is used in construction, twelve are destroyed in the forest by fire. This means that forest fires consume twelve times the amount of the lumber which is the life of Canadian industries, and that each year fire is depleting the forests which should hold back the rain fall so as to ensure throughout the year the moisture which is the life of the farm. Five hundred thousand acres of forest are burned over in Ontario each year, and the government of this province is burdened with a forest fire protection organization which costs \$3,000 a day.

Why is the country put to such a loss?

Because there are no means of segregating the

in the forest by fire. This means that forest fires consume twelve times the amount of the lumber which is the life of Canadian industries, and that each year fire is depleting the forests which should hold back the rain fall so as to ensure throughout the year the moisture which is the life of the farm. Five hundred thousand acres of forest are burned over in Ontario each year, and the government of this province is burdened with a forest fire protection organization which costs \$3,000 a day.

Why is the country put to such a loss?

Because there are no means of segregating the criminal fools and careless! Take the fire which in October last took forty-four lives, rendered thousands homeless, and destroyed property valued at eight million dollars in the vicinity of Haileybury, the termination of the lumber of fire patrol are notified, and the nearest ion men and fire patrol are notified, and the nearest ion men and fire patrol are notified, and the nearest despatcher takes steps to secure whatever additional men are required.

The Canadian Pacific maintains a regular and efficient force which patrols the right of way in forest areas after the passing of trains and which office prevention organizations to the fullest extent. Also at various points along the line are kept a number of fire tank units, each unit consisting of two tank cars, each of 7,000-gallon capacity, equipped with powerful pumps, and approximately one mile of two tank cars, each of 7,000-gallon capacity, equipped with powerful pumps, and approximately one mile of two tank cars fires but in fighting fires which have occurred in forest and rail side towns. (SAVE THE FORESTS.

Dominion News in Brief

New Westminster, B.C.—The Can- the provinces would be commenced im-ada Western Cordage Co., of New mediately and that they would be in Westminster, started in 1920, has de- time for the handling of the 1923 veloped into a most thriving industry.

Last month was the biggest month in Winnipeg, Man.—With the bulk of the history of the company, 225,000 pounds of rope having been shipped. The production was four times that of the corresponding month last year.

Grande Prairie, Alta.—In summing up the crop prospects in the North, it may be stated fairly that the crop bids to be a good average one—somewhat "patchy" with good stands of grain interspersed here and there with a few acres of poorer stand, but on the whole very satisfactory. Wheat and barley are all headed out, but oats are not so well advanced, although making excellent progress. Green feed is also showing up well, good growth being evident during the past two weeks.

Regina, Sask .- Formation of separate wheat pools with a central selling organization for the three prairie provinces was decided upon at a conference of farmers' organizations in St. Lawrence ports was set effect was given which said that the of 217,000 bushels of grain were unestablishment of a pool for each of loaded in 17 hours.

the offerings being sold to New York buyers, the most successful fur auc tion sale of this city has just been concluded, more than 200,000 skins of all kinds being disposed of for a total value of \$410,000. There was little change in the price of pelts. Muskrat, beaver, and white fox declined 10, 5 and 5 per cent. respectively, while lynx, silver fox, otter and cross fox advanced 10, 25, 25, 30 and 20 per cent. respectively.

Haileybury, Ont.-Close to sever hundred men are now employed on the construction work on the branch of the Canadian Pacific Railway from Kipawa to Des Quinze, and trains will reach the new terminal some time in November.

Quebec, Que.—What is claimed to be a record for the unloading of grain An official statement to this when three barges containing a total

RUHR OCCUPATION DECLARED ILLEGAL

British Note Sets Forth Basis for a Reparations Settlement.

A despatch from London says:-The new British note, which has been handed the French and Belgian ambassadors, is firm in tone and contains the minimum program which this Government-in its present frame of mind is willing to accept as a basis for a reparations settlement, it is said in well-informed quarters here.

The document registers the opinion -long held, but never officially pub-shed—that occupation of the Ruhr is illegal under the Versailles Treaty.

The note also goes into the question of inter-allied debts at great length. Emphasis is laid on the heavy tax burden in Great Britain and the enormous amount expended on supporting the unemployed in England since the Armistice. It is pointed out that in contrast to reconstruction of devastat-ed areas, this expenditure, though due to the war, is not productive.

Then it is said that the least Bri tain can expect in reparations and repayment of allied debts is enough to meet her obligations to the United States. The note says that this whole sum can hardly be gotten from Gerby the allies, who borrowed from England during the war.

It is then pointed out the less Germany can pay because allied treat-ment of her, the more the Allies will have to pay Britain.

It is understood France is any-thing but pleased with this, that Beltning but pleased with this, that Belgium is still trying to bridge the gap ronto, \$9.50.

between London and Paris, and that the Italian Government's reception of the note will be favorable.

However, in usually well-informed quarters there is little optimism of any immediate progress being made toward a joint allied note to Germany.

To Administer Manitoba Liquor Law Richard D. Waugh, former Mayor of Winnipeg, who has resigned as a member of the Saar Commission and will many, and the difference must be paid return to administer the new Manitoba Liquor Law.

On One Rail.

A truck which one man can handle on a single rail to carry building materials has been developed by a railroad in Europe.

Last year Dr. Bulyea and Mr. Wates attempted the climb but had to turn beak owite to the resulting the seeking to the peak of the seeking to th but had to turn back owing to the peculiar nature of the peak, which presents an almost perpendicular climb of several thousand feet.

HARDING FUNERAL SIMPLE CEREMONY

Twenty-Ninth President Laid to Rest in Marion, Ohio, Cemetery.

A despatch from Marion, O., says:-Harding, of Ohio, is home, sleeping his last sleep near the mother at whose knee his first childish dream of greatness was prattled.

Aside from the multitude that walled the long way from his father's home to the vault and those others close packed to make a living setting for the funeral rites, there was not much to mark the ceremony as the burial of one who had held highest power in his grasp. There were the men of his guard from the sister services of the nation, the admirals and the generals who formed his honor of candidates, representing many par escort, the friend and comrade who ties and interests. now is President in his stead, the coleagues of his Cabinet.

Otherwise the funeral service was that of a simple, much-loved citizen of Ohio. Throngs, whose number will never be known, passed his casket and ooked their last upon the dead face.

From his father's house he went out again carried by the men who have stood constantly to guard a dead commander. No solemn music bands or military pageant marked his going.

In cars behind the simple hears came President Coolidge, members of the Cabinet, the friends and close kin. There came, too, Justice Taft and General Pershing. Then came Mrs. Harding in black and with her veil drawn close, and just ahead of her walked the old father, his face plainly showing his grief. Through the

1922, amounting to \$1,420,170,000, is fruit and vegetables from \$35,000,000 halted at a distance and the casket ered, in waiting, in line across roadway that runs in front of the entrances. With them stood the comrades of camping days, Ford, Edison and Firestone.

The Cabinet family came to stand closer, at the foot of the casket, with their new chief among them. The their new chief among them. admirals, in gleaming white, lined the

way to the left, the generals to the right, and beyond, behind the Cabinet. stood the little party of intimates and

AERIAL PHOTOS TRACE OLD ROMAN SITES

Pictures Taken at Six Thousand Feet Give Results for Research in Archaeology.

A new epoch in archaeology has been opened up with the use of airplanes for photographing ancient sites. This is the opinion of O. G. S. Crawford, archaeologist with the British ordnance survey, as a result of his inspection of snapshots taken for practice by the air force officer near Win-

Aerial photography has been used by the American expedition which is now working on the site of ancient Carthage, on the north coast of Africa, to plan a foundation line for the submerged mole which guarded the harbor of the Punic city destroyed by the

Discovery Made by Chance.

The discovery was made more or less accidentally when an airman who photographs in the course of his military work found on them certain strange markings. On ploughed land these appeared as bands of lighter colored soil, forming a pattern of irregular squares and rectangles. The clew to the nature of these markings is indicated in the lines of Rudyard Kipling's "Puck's Song":

"See you the marks that show and

Like shadows on the downs? Oh, those were the lines the flint-men made

To guard their wondrous towns. "And see you after the rain the trace Of ditch and mound and wall?

as a legion's camping place

When Caesar sailed from Gaul." When the photos were submitted to Mr. Crawford he was soon able to dentify the mysterious markings on them as ancient British "lynchets," or field boundaries, which were formed during the Roman occupation of Britain and perhaps some centuries be-fore. The ancient British system of agriculture was entirely different from

The Celtic system, as revealed by the airplane photos, was a network of small patches, rarely more than two to three acres in size. In many cases there could be seen upon the same section nearby mounds and hollows of tile river valleys, which they cleared, When the Saxon invaders arrived they destroyed the upland Celtic villages, and when they settled down founded new villages along the line of the fer-tile river vallayes, which they cleared, introducing from Germany a system of cultivation radically different from the older British system.

Ancient Ramparts Shown.

The airplane photos depicted pre-Roman hilltop camps actually in a new light, disclosing features which were wholly invisible from the ground. Within two camps photographed they revealed a faint inner ring within the outer ramparts, which appears uncon-nected with the rest, and older.

Mr. Crawford wonders whether these vestiges of neolithic works were not ancient when the outer camps were made. Little or nothing is known at present of the pre-bronze age of the inhabitants of Britain, almost all remains being connected with burial places, while of the living there is scarcely any trace, due to the fact that subsequent invaders obliterated the earlier settlements,

Now there is some prospect that the airplane may help solve the problems connected with the earliest inhabitants of Britain. It is conceded that the science of air photography for archae ological purposes is still in its infancy but the results so far obtained are regarded as most encouraging. The height does not seem an important factor, as 6,000 feet gave good average results. The experiments in Eng. land will be continued, and though the presence of chalk in the soil of the valleys where the prehistoric settlements were established is a factor which is not present elsewhere, it is hoped that further inquiry will enable a method to be applied to other ancient

Seeing Without Eyes.

A Frenchman has lately startled the world with the extraordinary theory that the sightless may yet see through their skins!

The scientist is Dr. Farigoule, and he points out that there is no scientific law which in itself opposes his theory that man may be made to see through his skin, even though he can not do so with his eyes.

There is scientific proof that two creatures which have no eyes at all can yet see. These are the ordinary earthworm and a certain beetle which only comes out at night.

Many living things without ears, or any apparatus corresponding to ears, seem to have a fine sense of hearing. It is a well-known fact that our skin not only feels, but breathes, and to a certain extent does the same work as the kidneys in expelling waste matter. Dr. Farigoule states that the skin is an organ of sight, not as efficient as the eyes, but better than nothing.

It is not suggested that a man may close his eyes and suddenly see through his skin, but it is asserted that a man who cannot use his eyes may be trained to use his skin instead, and by this means distinguish colors and shapes and even read figures and

Scientists are learning new things about the human skin every year, so that these wonders may yet come true.

IN THE SUMMER

The summer months are the most dangerous to children. The complaints wife in a schooner bound for St. Helof that season, which are cholera in- ena, and was landed again at Tristan. that obtaining to-day, which is directly descended, with modifications, from the early Saxon system.

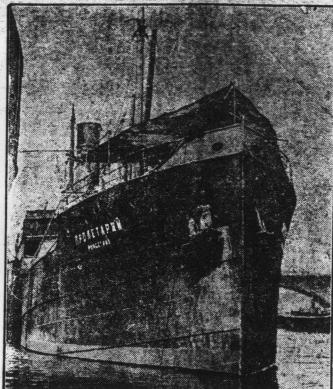

fantum, colic, diarrhoea and dysentery come on so quickly that often a little one is beyond aid before the mother his agricultural operations so as to realize he is ill. The arrival and the same and daughters were born, and the come one is beyond aid before the mother his agricultural operations so as to realize he is ill. The arrival realizes he is ill. The mother must be on her guard to prevent these troubles, or if they do come on suddenly to banish them. No other medicine is of venient calling-place for American such aid to mothers during hot wea-ther as Baby's Own Tablets. They occasionally by homeward-bound India regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co.,

SYMPTOMS OF DEBILITY

How to Tell Whether Your Blood Needs Revitalizing.

The symptoms of general debility vary according to the cause, but weakness is always present, a tendency to perspire and fatigue easily, ringing in the ears, sometimes black spots passing before the eyes, weak back, vertigo, wakefulness caused by inability to stop thinking and unrefreshing sleep. The cause of the trouble may be some drain on the system, or it may be mental or physical overwork, some times insufficient nutrition due to digestive disturbance.

If you have any or all of these

symptoms try building up the blood with Dr. Williams' Pink Pills, and as the new blood courses through your veins there should be an increase in your appetite, a better digestion and oon a renewal of strength and vigor. You can get these pills through any dealer in medicine or by mail, post paid, at 50c a box from The Dr. Wil-

liams' Medicine Co., Brockville, Ont "Glass Island".

During the imprisonment of Napo on on the island of St. Helena, the British stationed garrisons on all of the out-of-the-way rocks in the South Atlantic Ocean within a circuit of hundreds of miles.

Among others, one named Tristan da Cunha was chosen as the residence of a company of British soldiers.

Upon the death of Napoleon these precautionary measures were no lon-ger necessary, and as the barren rock of Tristan does not lie in the path of vessels bound round the Cape, the garrison was taken off.

Among the soldiers, however, was one Glass, who had conceived the idea of settling on this desolate island after the manner of Robinson Crusoe.

Escaping to the mountains, he was left behind when his comrades sailed to the Cape.

He remained for three years in solitude, cultivating a little garden, and msell by exploring the mountain fastnesses and hunting goats At the end of this period an outward

bound India-man, which had got out of her latitude, hove in sight, saw his signal, and bore him to the Cape. There he remained long enough to earn an outfit for the novel life to which he intended to return. He married, engaged passages for himself and

to the old patriarch's daughters. His sons — he had eighteen chil-

dren in all, but mostly girls - remained with him until they grew to man's estate, when several of them chose themselves wives from among the Portuguese inhabitants of the Cape of Good Hope, and settled for life under the rule of their father, who now styled himself Governor.

The hundredth child was born before the first death occurred in the colony. The island is now under the "governorship" of Glass' eldest son, and the population is nearly one hundred and fifty.

MONEY ORDERS. The safe way to send money by mail is by Dominion Express Money Order.

There was little advertising in prehistoric days, but the cavemen and cavewomen read it and advanced step by step to our modern civilization.

His Concern.

"Do you know, I believe this little rascal has swallowed one of my diamond studs?" "Oh Heavens above!"

"Now he's gone and broken the

The Last Straw.

Mr. Busiman was exasperated with the telephone. Ten times that morning he had tried to get on to a number and each time something had prevented him from speaking. Either it was "number engaged," or the person he wanted was out, or else he had been suddenly cut off. At last he got through.

"Halloa!" he said. "Is Mr. Xthere?"

"Yes," replied a voice. want to speak to him?"

This was the last straw. Back came the reply, in icy tones: "Oh ,no! Nothing of the sort. I merely rang up to hand him a cigar!"

As Usual.

Bits of broken nest came down from the bird house on the pole and with it volley of indignant bird chatter. "Well, I've had my lesson," cried the feathered matron. "I'll never sublet this place for the summer again See the condition they've left it in Why, they even sharpened their beaks on the woodwork!'

caterpillar does not through its mouth, but through the holes in the sides of its body.

PUTS HEALTH

So Says Mrs. MacPherson of Lydia E. Pinkham's Vegetable Compound

Brantford, Ontario.—"I was always fired and the least exertion would put me out for a, day or two. I had a pressing pain on the top of my head, onin in the nape of my neck, and when stooped over I could not get up without help, because of pain in my back, did not sleep well and was nervous the least noise. I keep house, but I was such a wreck that I could not sweep he floor nor wash the dishes withoutlying down afterwards. A friend living ear me told me what Lydia E. Pinksam's Vegetable Compound had done for her so I began to take it. With the first bottle I felt brighter and got so I could wash dishes and sweep without having to lie down. Later I became regular again in my monthly terms. I have taken ten bottles all told and am now all better. I can truly say that your wonderful medicine cannot be beaten for putting health and vim into a woman."—Mrs. James H. MacPherson, 309 Greenwich St., Brantford, Ont.
