numbered by them with by through-out eternity... while during the remainder of their continuance here on earth, they may learn to wear a good warfare in all things...

The morning service was conducted by the Bishop addressing the congregation generally from the pulpit, on the nature and duty of public, family, and private prayer, to which he gave the sign of the cross, and who gave to the spiritually diseased, medicine to least their sickness...

In all probability many of us will not see him again till his usual triennial visitation. It is a solemn thought that some of us will see his face no more. There is one thing, however, which we can all do in the short remaining space which may yet graciously be afforded us, let us draw near to God and earnestly implore him to give grace to the Bishops and Pastors of his Church, and to all who minister in sacred things that they may persuade men to enter into the true fold, so that finally there may be but one fold under one shepherd—Jesus Christ the righteous.

I am, Sir, yours, A CHURCHMAN.

[The following address was presented to the Rev. J. Spry on his recent visit to this Island.]

To the Reverend John Spry, Rector and Dear Sir: We the Elders, Members, and adherents of the Congregation of Cavendish and New London, in connection with the Presbyterian Church of Nova Scotia, cherishing the pleasing remembrance of your former visit, and highly acceptable services in dispensing to us the ordinance of Divine grace of which we had been temporarily deprived, by the removal of our late beloved Pastor, to another, and important field of labor; and impelled by a grateful sense of your zeal for promoting our spiritual interests by your interesting and valued ministrations at this time, cannot allow you to depart without testifying our high appreciation of the motives which induced you at your advanced age, to submit to the fatigue and inconvenience of so long a journey from your family and home, in compliance with the request of our minister, in order that you might impart to us those blessings of the Gospel of Christ, the unspeakable value of which, eternity alone can fully develop.

We trust and pray, Reverend Sir, that the King of Zion, may succeed your labor of love with the benign influence of his holy spirit; making thereby indelible impressions on the minds of old and young (amongst us) of those solemn and important truths that you have proclaimed in his name, and by his authority; and we respectfully request you to accept this feeble testimony of our regard for your person and services, and that you will rest assured of our ardent prayers for your happiness in time and eternity, and should it be so ordered by the providence of him "who doth all things according to the counsel of his will" that we should not be privileged again to meet together in this world may be by his grace be permitted to recognize each other amongst that countless multitude who will "surround His Throne" having washed their robes, and made them white in the blood of the Lamb.

Wishing you a safe and prosperous journey homeward, and a happy return to your domestic circle after your arduous labors in promoting the interests of the Redeemer's Kingdom, we bid you an affectionate farewell.

To which the Rev. gentleman made the following reply:

Christian friends: I thank you for this Address. Tokens of regard should be received in the same spirit in which they are given. The good opinion of our fellow creatures, when honestly obtained, is the noblest of earthly rewards and next to the approbation of our mind and that of our Maker, and is an excitement to greater exertions in the path of duty.

This beautiful Island and its inhabitants are often under-estimated by those who know them, but a slight acquaintance would teach them, that it requires nothing but the hand of Industry and the dews of heaven to give it a splendor equal to the climate of the sunny south, and that the people favorably compare with those of larger communities and older countries.

You have in Cavendish and New London, all the elements of polished society, and ingredients of permanent felicity, you have fertile fields, sparkling brooks, blooming orchards, substantial dwellings, good ministers, intelligent people, libraries, Reviews, Magazines, and much of the periodical literature of the day. "May Peace be long within your walls and prosperity within your palaces."

I duly appreciate your affectionate and feeling address; and it will remain among my papers a memorial of your friendship after I am gathered to my fathers.

In this visit I have met some old friends without new faces. I have made some new acquaintances; for when a man is far advanced in life, unless he make some efforts to repair the circles of earlier friends which the King of shadows has swept away, he will be left alone, as "a lodge in a garden of cucumbers." The morning of life is long past, the evening approaches, my sun declines; yet I am unwilling to bid you adieu and people "farewell" and if spared I may visit you again, but if this shall not be so, I hope, through the merits of our Redeemer, to meet with many (fair would I say all) of you, in the better land: where we shall have a long day to talk over the good and ill, which we have seen in this life, and taste the sweets of eternal friendship.

John Spry, Secretary of N. S. Industrial Exhibition, Charlottetown, P. E. I., June 28th, 1854.

NOVA SCOTIA INDUSTRIAL EXHIBITION. TO THE EDITOR OF HASZARD'S GAZETTE.

Sir,—Being for a short period at Charlottetown, I would take this opportunity of calling public attention to the forth-coming Industrial Exhibition in Nova Scotia, with the view of eliciting the exertions of the people of Prince Edward Island on behalf of this important undertaking. For the information of such as are not thoroughly conversant with the position of this movement, I will briefly detail a few of its more leading particulars.

The idea of a Provincial Industrial Exhibition for Nova Scotia, was suggested so far back as 1851 or 1852, and steps were taken by the Halifax Mechanics' Institute, with a number of other public spirited individuals, in order to enlist the sympathies of the people generally in securing a creditable display of the natural and industrial resources of the Province. A number of Public Meetings were held, and an organization not aging, for the purpose of the more effectually accomplishing the object in view. Subscriptions were raised in the City of Halifax, to the amount of some Eight Hundred Pounds. Local agencies were established throughout Nova Scotia and Cape Breton; Public Meetings were convened, and every possible means taken of diffusing information upon the subject amongst the population. It was originally intended to hold the Exhibition in 1855, but owing to the rejection by the Legislative Council of the grant of £1,000, voted in the House of Assembly in aid of the undertaking, it was resolved by the Commissioners to postpone the Exhibition until the Autumn of the present year. That grant has, in the mean time, been re-passed by the House, and confirmed by the Council. The several Committees throughout the interior of Nova Scotia are actively engaged in raising subscriptions, and in the growth and preparation of articles evincing native industry and skill. I believe, that a more beautiful display of articles and produce exhibited at the Government Agricultural Fair, held at Halifax last Fall, the forthcoming Exhibition will reflect much credit on the capabilities of the Province, and the industry and activity of its people. The Committee having charge of this matter have issued some time since a Premium List, offering between £1,500 and £1,600 for the best articles, whether from the Mineral, Vegetable or Animal Departments of the country. A supplementary list has since been published, with additional prizes to the extent of £200. Whilst the money premiums are to be confined to the Province of Nova Scotia, the Exhibition will be open to the productions of ALL OTHER COUNTRIES; and, in order to induce parties to send such articles, a considerable sum will be devoted to the granting of diplomas or honorary prizes for all foreign articles worthy of merit.

All the available space in the Provincial Building at Halifax, with the adjacent grounds, has been placed at the disposal of the Committee for Exhibition purposes, and steps are now in progress for securing the necessary accommodations for cattle and live stock, as also for the storage and safe preservation of all articles forwarded. It is confidently expected that many articles will be contributed both from New Brunswick and the United States, and every reasonable effort will be put forth to secure from these and other countries in North America an assemblage of visitors. I may also state that the New Brunswick Exhibition, intended to be held in 1855, has been postponed for a future period, owing to the fact that the Nova Scotia Exhibition is to come off this year.

I conceive that it would be of the utmost importance for Prince Edward Island to be represented at the forthcoming Exhibition to be held at Halifax. The distance of Charlottetown from Nova Scotia might be urged as an objection to the people of this Island taking any general interest in the undertaking. But when it is considered that the water communication between Nova Scotia and the Island renders the conveyance of articles much less difficult and expensive than from many parts of the interior of Nova Scotia, the objection will be seen to possess little or no weight. There is, however, a strong reason why Prince Edward Island should be represented at this Exhibition. Nothing conduces so much to elevate the character of a country in the estimation of its rival competitors, as the display in one united and concentrated whole of its various natural and industrial productions. This fact might be easily verified, did space permit. Surely it is to be regretted that at the London Exhibition of 1851, Nova Scotia not only rose in general estimation from the character of its contributions, but she was also materially benefited therefrom in a pecuniary point of view. The Committee in Nova Scotia are anxious that the adjoining Colonies, at least shall be handsomely represented at the approaching Exhibition. It will be a means of their becoming better acquainted with the extent and value of each other's resources, and of their inhabitants cherishing towards one another a feeling of mutual friendship and respect. For these reasons, I would suggest that the people of this Island generally, and of Charlottetown and its vicinity in particular, should at once take some decided steps for sending contributions of agriculture and other specimens of their native industry and skill to our Exhibition. The simplest plan, probably, would be to organize an active working Committee, to raise a sufficient amount to defray any local expenses and cost of shipment to Halifax, and to enlist parties to forward their contributions through this Committee. I would humbly and respectfully suggest, in conclusion, that the officers of the Royal Agricultural Society at Charlottetown take the initiative in this matter, as the object would be so accomplished with a comparatively trifling effort. Should they deem the subject of sufficient importance, I would be happy to make any suggestions, or contribute any further information relative to the mode in which the Exhibition is to be conducted.

Your obedient servant, Howard D. Spry, Secretary of N. S. Industrial Exhibition, Charlottetown, P. E. I., June 28th, 1854.

Correspondence of Haszard's Gazette.

The Fisheries are being prosecuted this year at Tignish, and Nail Pond, with great vigor and fair success, owing however to the scarcity of bait and disappointments in supplies of salt, the catch, as yet, has not so much exceeded that of last year. The Crops in this part of the Island are backward, the severity of the past winter, and people generally keeping too many cattle, causing so extreme a scarcity of fodder that seed had to be given in March and April to stock, consequently, many farmers were hunting up and begging for seed when it should have been in the ground; the weather has been cold the past three weeks, prevailing winds from the N., N. E. & E. and potatoes slightly damaged with frost: it is now warmer with heavy dews at night. Let 1 sows up its name for giving employment to magistrates, no dismission taking place in the number of petty prosecutions for debt, assault, &c.: it is complementary however to that far-off portion of our fair, little Isle to notice that a member has been returned to the House of Assembly in the person of Stanislaus Perry, Esq., J. P., &c. &c. &c. What were enlighten-ed Malpeque and mercantile St. Elmore's, about that they must not be a man of the relief of the 2d district of Prince County, and what will that District do if it should turn out as is reported, where it might be known that S. Perry, cannot prove a qualification?

We understand that Lieut. Westrop stationed on Duty in this Garrison, secured two Deserters from the Detachment of the 76th Regiment, this active and enterprising young Officer pursued and took the men 37 miles from Charlottetown on the Bay Fortune Road.

Divine Service will be held (D. V.) in the Temperance Hall, Charlottetown, on Sabbath next, July 2, in the evening at half-past six o'clock, p. m. Mr. Steele will officiate.

Married. On Tuesday, the 27th, by W. B. Aitkin, Esq., Daniel Gordon, Esq., of Georgetown, to Bridget, daughter of Mr. J. Kearney. At Halifax, on Thursday, 15th instant, by the Rev. Wm. Bennett, the Rev. Alexander Black, Wesleyan Minister, to Miss Caroline Matilda, third daughter of the Rev. William Crosscomb.

LIVER COMPLAINT, DYSPEPSIA, JAUNDICE, CHRONIC OR NERVOUS DEBILITY, DISEASE OF THE KIDNEYS, AND ALL DISEASES ARISING FROM A DISORDERED LIVER OR STOMACH. Such as Constipation, inward Flux, Nausea, of Blood to the Head, Acidity of the Stomach, Flatulency, Heartburn, Digest for food, Faintness or Weight in the Stomach, Sour Eructations, Sinking or Fluttering at the Pit of the Stomach, Swimming of the Head, Harried and Difficult Breathing, Fluttering at the Heart, Choking or Suffocating Sensations when in a lying posture, Dizziness of Vision, Dots or Webs before the sight, Fever and Dull Pain in the Head, Deficiency of Perspiration, Yellowness of the Skin & Eyes, Pain in the Side, Back, Chest, Limbs, &c., Sudden Flashes of Heat, Baring in the Face, Constant Imaginings of evil, and Great Depression of spirits, can be effectually cured by DR. HOOPLAND'S CELEBRATED GERMAN BITTERS. Prepared by Dr. C. M. JACKSON, No. 120 Arch street, Philadelphia.

Their power over the above diseases is not exceeded, if equalled, by any other preparation in the United States, as the cures situate, in many cases after skillful physicians had failed. These Bitters are worthy the attention of invalids. Possessing great virtues in the rectification of disease of the Liver and lesser glands, exerting the most searching powers in weakness and affections of the digestive organs, they are, without safe, certain and pleasant. Read and be Convinced. The "Philadelphia Saturday Gazette," says of Dr. Hoopland's German Bitters. "It is seldom that we recommend what are termed Patent Medicines, to the confidence and patronage of our readers; and therefore when we recommend Dr. Hoopland's German Bitters, we wish it to be distinctly understood that we are not speaking of the nostrum of the day, that are soiled about for a brief period and then forgotten after they have done their petty work of mischief, but of a medicine long established, universally prized, and which has met the hearty approval of the faculty itself." "Scott's Weekly," said, Aug. 25— "Dr. Hoopland's German Bitters, manufactured by Dr. Jackson, are now recommended by some of the most prominent members of the faculty as an article of such efficacy in cases of female weakness. Persons of debilitated constitutions will find these Bitters advantageous to their health, as we know from experience the salutary effect they have upon a weak system."

MORE EVIDENCE. J. G. Moore, Esq., of the Daily News said, October 31st:—"Dr. HOOPLAND'S GERMAN BITTERS.—We are trying this renowned medicine for a stubborn disease of the bowels, and can with truth testify to its efficacy. We have taken the contents of two bottles, and we have derived more benefit from the experiment than we derived previously from years of allopathic treatment at the hands of our first physicians." Hon. C. D. Hineline, Mayor of the City of Camden, N. J., says:—"HOOPLAND'S GERMAN BITTERS.—We have seen many flattering notices of this medicine, and the source from which they came induced us to make inquiry respecting its merits. From inquiry we were persuaded to use it, and must say we found it specific in its action upon diseases of the liver and digestive organ, and the powerful influence it exerts upon nervous prostration, is really surprising. It calms and strengthens the nerves, bringing them into a state of repose, making sleep refreshing. If this medicine was more generally used, we are satisfied there would be less sickness, as from the stomach, liver and nervous system, the great majority of real and imaginary diseases emanate. Have these a healthy condition and you can bid defiance to epidemics generally. This extraordinary medicine we would advise our friends who are at all indisposed, to give a trial—it will recommend itself. It should, in fact, be in every family. No other medicine can produce evidences of the same merit."

For sale wholesale and retail at THE GERMAN MEDICINE STORE, No. 120 Arch street, next door below Sixth Philadelphia, and by respectable dealers generally throughout the country. In this mannerous-shiping Age, it is rare to find a man place his usefulness to the public, before his interest. During a late visit to the "City of Spindus," we were presented by a professional friend, to the celebrated Chemist, Dr. J. C. ALEX., whose name is now perhaps, more familiar than any other, at the bedside of sickness, in this country. Knowing the unprecedented popularity of his medicines, and the immense sale of them, we had expected to find him a millionaire, and rolling in wealth. But we found him in his laboratory, busy with his labors, among his crucibles, alembics, and retorts—giving his then personal care to the compounds, on the virtues of which, thousands hang for health. We learned, that notwithstanding his vast business, and its prompt returns in cash, the Doctor is not rich. The reason assigned is, that the material is costly, and he persists in making his preparations so expensively, that the net profit is small.—American Farmer, Phil.

VARIETIES.

Action.—I have often had occasion to observe that a warm blundering man does more for the world than a frigid wise man.

Not so bad.—It is related of an old Presbyterian minister, down East, that being astonished at the outrageous flatteries inscribed on the tombstone of the village church yard, he was heard muttering as he went out the gate—"Here lie the dead and here the living lie."

The latest mode of "popping the question" is to do it with a kind of a laugh, as if you were joking. If the girl accepts, well and good; if she does not, you can say, you were only in fun.

Lord Byron gives this account of a party with Sheridan: "He was first silent, then talky, then disputatious, then unintelligible, then altogether, then inarticulate, then drunk."

The best thing to take after being intoxicated—Aa solution never to get tipsy again.

Rev. Roland Hill once said—"I do not want the walls of separation between different orders of Christians to be destroyed, but only lowered, that we may shake hands a little easier over them."

Henry Ward Beecher says that "dress does not make the man; but, when the man is made, he looks better dressed up."

The following is a good phrase, descriptive of an energetic character: "Cromwell did not wait to strike until the iron was hot, but made it hot by striking."

A son of the Emerald Isle, having been told that the price of potatoes had risen, exclaimed, "This is the first time I ever felt grieved at the rise of my best friend."

Cheap living in Patagonia. The natives steal all they eat, wear a couple of fig leaves for clothes, and sleep, most any where. Very convenient mode that for "short" style of folks.

The first line—we have not been able yet to get further than the first line—of Mr. Charles Dickens' new work of fiction, "Hard Times," reads thus: "Now what I want is facts!" We are not so exacting as the talented author. We could be well content to dispense with facts, if he would only once more give us, as he used to do, good fictions. But one thing we must insist upon; and we trust that Mr. Dickens will excuse our parodying his brilliant style, when we assure him that—"What we want are grammar!"

A very pretty young woman went to the post office, lately, with a letter and no direction, and said to the postmaster: "Send that to my sweetheart!" The postmaster took it, looked at it, and said: "What is his name, and where does he live?" The girl replied: "Ah that is the very thing I don't want any one to know."

A youngster, who had just risen to the dignity of the first pair of boots with heels on them, laid liable, through some demeanor to maternal chastisement. After pleading to get clear, to no effect, he exclaimed:—"Well if I've got to stand it, I mean to take off my boots."

"Why?" asked his mother. "Because I want, be whipped in them new boots, no how. That's so."

A passenger on the mail boat from Louisville, not in the habit of "indulging," found himself somewhat under the influence of "Old King Al." Being asked how he came to drink so much, he replied, "why, fust is, gents, (hic) the river has got so low, (hic) the captain has forbid the use of water as a beverage, there is none to spare."

"This is a pretty time o'night to come skulking home, you drunken brute! Whar have you been, eb?" said Mrs. Potts, when she saw Mr. Potts practicing at the cork screw polka on the staircase. "Been—hic—been? Why—hic—ye see, Sal—hic—Sally, I've been to the—hic—temperance mass—hic—meeting, and I've eat too m-much lemonade." "Eat what?" "Yes—hic—eat that, too."—At this juncture a heavy squelch announced the downfall of the Potts family.

What do the Sick Require?

To those who think—if sick, if suffering the torments of pain, or afflicted with long illness, the invalid's constant hope and most fervent desire is to be relieved and cured of the distressing ailment that afflicts him.

The R.R.R. REMEDIES are worthy of the age. They instantly relieve the bed-ridden from the most excruciating pains, and quickly free the afflicted from the most obstinate and serious maladies, infusing new life and vigor in the shattered and bruised body, and renew each member and organ of the human system with strength and power.

The R.R.R. REMEDIES consist of RADWAY'S READY RELIEF, RADWAY'S RENOVATING RESOLVENT, and RADWAY'S REGULATORS.

RADWAY'S READY RELIEF is for the instant relief of the sufferer from pain, and to check and arrest the progress of disease, to dislocate, fracture, sprain, rheumatism, neuralgia, and infectious poisons, thus protecting whoever uses it against all poisonous infection from Contagion, and from sudden attacks of Cholera, Typhoid, Ship Fever, Fever and Ague, &c. Like other of the R.R.R. Remedies, it is a safe and certain cure of all pains and diseases of the Joints, Limbs, Nerves, &c.

Its first action is to remove the pain, (hence its usefulness in Neuralgia cases); its second, to remove the cause of the disease, and to check and arrest the progress of inflammation, if the Relief be applied after the first little smarting it over the pain is extinguished, and the work of reparation now commences. But if the Relief is not applied, there are many chances to one that the pain will continue, and an inflammation be set up, and instead of a simple incised wound we have inflammation—disease to contend with. Beside, its direct power over pain, the Ready Relief is the most effectual and disquieting "counter irritant" that is known to the medical world.

If there be a congestion or heaping up of the blood in any particular part, occasioning pain and threatening inflammation or disease, as Sore Throat, Lumbago, or pains in the loins, Pleuritic congestion, &c. the Relief will be found the most invaluable curative. By applying it over the adjacent parts, the blood is drawn away from the affected parts, the congestion is dispersed, and the pain removed at once. Let any one who may doubt this make the trial. Now, these two properties, its power over pain and its "counter irritant" render it the most valuable remedy for Diarrhoea, and although not an astringent in the popular meaning of the term, yet it stops the pain and arrests the discharge of the most frightful Diarrhoea or Cholera in a short time.

RADWAY'S READY RELIEF is the most safe and powerful disinfectant in the world—as such, it is a most effectual cure and positive preventative of FEVER AND AGUE.

So with other fevers and all malarious diseases. Ten or twenty drops, taken internally, in a little water will protect the system against any attacks from infectious and malarious poisons.

Whether Typhoid or Billious, RADWAY'S READY RELIEF, taken internally, and applied over the surface of the body, and the bowels regulated and kept soluble with RADWAY'S REGULATORS, the patient will soon be out of danger, and speedily restored to health. The R.R.R. Remedies are given, and will save the life of the patient.

RADWAY'S RENOVATING RESOLVENT is the second of the R.R.R. Remedies. It is for the cure of old Chronic Diseases that have been lingering in the system for years.

HIGHLY IMPORTANT TO ALL AFFLICTED WITH CHRONIC DISEASES. For the present, let us pass to the consideration of the RESOLVENT, the second of the three R.R.R. Remedies.

RADWAY'S RENOVATING RESOLVENT is for the cure of Chronic Diseases, of inflammation that is kept alive on fire by some sustaining cause, and the Chemist tells us that inflammation is a slow conical combustion. And this cause is a deposit resulting from the inflammation whilst it is in an active or acute condition, for all diseases is at one time acute before it becomes chronic. If a person has Chronic Rheumatism, it is the result of a deposit in the fibrous tissue surrounding joints; if a person is Scrofulous, these deposits often show themselves in small lumps under the skin, and along the neck, if he have a Consumption or Chronic Cough, there is tubercular matter deposited in the lungs; if Bronchitis, it takes place in the Bronchial tubes; if Syphilis, it occurs in every tissue and organ in the body, and in the most spare spaces. Now to cure these diseases, these Chronic Inflammations, (for it is this in every case.) it is manifest that the diseased deposits must be first removed, the sustaining cause be taken away, and that the impure blood be altered in its condition and rendered pure and healthy.

It becomes necessary, then, that the absorbents be active and the blood be purified to a certain extent, and stimulate them into action, and at the same time purify the blood. Medicines that depend merely on purifying the blood alone will scarcely ever cure Chronic Diseases; to ensure success they must at first have the power to stimulate the absorbents, and remove the diseased deposits. The action of the RESOLVENT is directed first to the absorbents, stimulating them into action, and second to the blood which it purifies by its action over the glands, the liver, pancreas, kidneys &c. which are the sewers that nature has established for purifying the blood. You will, after this description, we hope, appreciate the name we have given to the second of the R. R. R. Remedies of RENOVATING RESOLVENT.

It removes away diseased deposits; it purifies the blood and renovates the system. Tumors are removed and dissolved by its operation; Chronic Swellings are dissipated; Nerves are softened and melted away. The most leathern Skin diseases disappear under its action; Scrofulous constitutions are soon amended, and the disease checked when ever it has attacked the system. Syphilis, with all its horrible train of concomitants, here finds a certain and infallible cure; and Consumption too, often finds its master—Consumption, that prevalent and lamentable disease of the lungs, that is so well known to you all, from its fatal and almost hopeless character, and the havoc it produces among the young, the most gifted and the most beautiful of the human race, creeping over our vixen with an insidious yet awful certainty, and consigning to an early and premature grave its yearly victims of victims. Tubercular Consumption is often regarded as a specific disease of the lungs alone. This is a mistake; it is but one of the forms of Scrofulousness—a Scrofulous deposit, an inflammation of the lung structure, and could be as readily cured as any other Scrofulous disease—such as Rheumat, Hip

Complaint, or White Swelling.—If it was not for the peculiar structure and action of the lungs in which it takes place.

The lungs expand and contract during every respiration; and from the moment the first breath of life is drawn, until the last guttural sigh passes from the dying invalid, a never-ceasing action is kept up on their part. It will readily be conceived then, how difficult it must be for an Ulcer of the lungs to heal, where it is constantly kept irritated by the act of breathing.

Understand, then, we do not offer you the RESOLVENT as a certain cure for Consumption or Scrofula of the lungs, as it is for other Chronic Diseases. We believe that it will cure Scrofula in any other part of the body, but from the very nature of the case, this complaint—except in its first stages—is often-times incurable; but we can recommend it as the most certain remedy (when taken as directed in our pamphlets) that we possess to arrest its progress, and can point to a large number of cases of Lung Diseases that it has cured.

Such then, is the RENOVATING RESOLVENT. What the Relief is to Acute Diseases the RESOLVENT is to Chronic; it resolves away the foreign and diseased deposit; it purifies the blood and it renovates the system.

NO. 3. We now request the reader's attention to the third of the R.R.R. REMEDIES.

RADWAY'S REGULATORS. Every pill taker should examine the theory on which the REGULATORS are founded. Every case of Chronic Disease, whether it be Rheumatism, Gout, or any other of the most pleasant and safe Regulator of the Liver, Bowels, Kidneys, and other organs of the system in use.

We have hitherto been treating of diseases or inflammations in its acute or chronic state, and its remedies; the RELIEF in one hand and the RESOLVENT on the other. We now pass to the consideration of that state of the system immediately preceding disease or inflammation, viz: IRRITATION. To allay irritation of the nervous system, and remove its effects wherever it exists, and to aid the RELIEF or RESOLVENT in treatment of inflammation, are the chief purposes of the REGULATORS.

But how is nervous irritation the cause of disease? Because the glands of the system are controlled by the brain and nervous centers, and what irritates the brain causes irregularities of the glands; and when the glands refuse to do their work, the foreign matter which it is their duty to remove, is left in the blood, and increases already existing irritations. The glands are sewers of the system and are composed chiefly of the Liver, the Kidneys, the Pancreas, the Salivary Glands, and those of the skin and intestinal canal. Now, a regular and honest action of these organs are indispensable to keeping the blood in a pure and natural state. If we give you poison instead of food to eat you can easily understand that the blood will be corrupted by it, and diseased action will follow; and it will be just as surely corrupted if the glands do not abstract the worn out materials from it.

Again, if the kidneys be interfered with in their action, from any irritation whatsoever, why then we have the salts of the urine, the poisonous urea, circulating in the blood, producing headaches, coma, drowsiness, &c.

And, last and most important of all, if any irritating causes interfere with the operation of that great laboratory the Liver, behold the disastrous effects! The bile, instead of passing into the intestines to aid digestion, &c. Also Spavin, Ringbone, Strachan, Cracked Heels, Chafes, Galls, &c. on Horses and other animals. It is external in its application, and we GUARANTEE it to cure PARASITICALLY in every case for which we recommend it.

Many Physicians use it because they can depend upon it—so can their patients.

Farmers and Livery-stable Keepers. Say that you have it, and will not be satisfied without it, after giving it a fair trial. Therefore we say to travellers upon highways and by-ways use the Mustang Liniment! It has become so thoroughly introduced throughout the United States, British Possessions, and West India Colonies, that it is almost impossible to stop off the cars at any Station without beholding the gay banner of the "Mustang."

The prices are as follows—25 cents, 50 cents, and \$1 per bottle, the 50 cent being three times as large as the 25 cent size, and the \$1 size nearly three times as large as the 50 cent size, so that the large bottles are cheapest.

PROCLAMATION

Good People of P. E. I.

PROBABLY there is not a family in your Parish but what some members of it are more or less afflicted by Humors or Chronic Affections. As a remedy for these various complaints, there are numerous preparations brought into the market, but all of them of little or no good. But there is a discovery which has recently been made in chemical analysis that is wonderful in its operation. It has been long enough tried and we have proof sufficient to certify that it will cure the highest offices of the people of the United States can give—that the medicine will do just what it is recommended. It is DOCTOR HAMPSON'S VEGETABLE TINCTURE. The medicine is compounded from the Vegetable Kingdom and may be used by any person without injurious consequences. By a wise choice and combination of some of the best of each class of co-operative, simple remedies, it fully restores all the essential organs of the human system, and there it has proved itself an effectually curative of the whole round of chronic affections.

Over two millions of bottles have been sold in the north and west during the last five years. Three to five bottles is warranted to cure the worst case of Rheumatism.

Two bottles will check the worst case of Dyspepsia.

Three bottles are warranted to cure the severest case of Erysipelas.

Five to eight bottles will cure the worst case of Scrofula.

One to two bottles is warranted to cure the worst kind of Pimples on the Face.

Two to three bottles is warranted to cure the worst case of Ring Worm.

Five bottles will cure the worst case of Cough, Consumption, General Debility, Asthma, &c.

As a FEMALE MEDICINE it has no superior. We could give hundreds of cases where the cure was truly wonderful, but we request all to get a complete list of the hundreds of certificates of its cures. Price \$1.00 per bottle.

General Agent for P. E. I. W. R. WATSON. Sold also by M. W. SKINNER.

Notice to Travellers.

IT has become an established fact that accidents will happen notwithstanding the care and attention which may be paid to the safety and convenience of travellers. Explosions will take place, bridges will be broken, and cars run off the track as usual. It is well enough for the public and legislators to caution companies to "beware," and "take heed," in such casualties will occur, which result in severe contusions, broken limbs, burns, lacerations, &c.

The Mexican Mustang Liniment. Upon such occasions, is invaluable! The wonderful effects of its soothing and healing properties have induced many, who have tried it, to always carry a bottle of it with them when they are travelling.

Frequent tests have proven it to be efficacious in curing Rheumatism, Piles, Scrofulous Diseases, Cancers, Ulcers, Old Sores, Neuralgia, Toothache, Earache, &c. Also Spavin, Ringbone, Strachan, Cracked Heels, Chafes, Galls, &c. on Horses and other animals. AYER'S

AYER'S CHERRY PECTORAL

For the rapid cure of COUGHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP, ASTHMA, AND CONSUMPTION.

Among the numerous discoveries Science has made in this generation to facilitate the labors of life—increasing its enjoyment, and even prolonging the term of human existence, none can be named of more real value to mankind, than this contribution of Chemistry to the Healing Art. A vast trial of its virtues throughout the broad country, has proven beyond a doubt, that no medicine or combination of medicines yet known, can so surely control and cure the numerous varieties of pulmonary disease which have hitherto swept from our midst thousands and thousands every year. Indeed, there is now abundant reason to believe a remedy has at length been found which can be relied on, to cure the most dangerous affections of the lungs. Our space here will not permit us to publish any particulars of the cures effected by its use, but we would present the following:—and refer further enquiry to my American Almanac, which the agent below named, will always be pleased to furnish free, wherein are full particulars, and independent proof of these statements.

Office of Transportation, Laurens R. R., R. C., Aug. 4, 1855.

J. C. AYER. Dear Sir,—My little son four years old has just recovered from a severe attack of malignant Scarlet Fever, his throat was rotten, and every person that visited him, pronounced him a dead child. Having used your CHERRY PECTORAL in California, in the winter of 1854, for a severe attack of Bronchitis, with entire success, I was induced to try it on my little boy. I gave him a tea-spoonful every three hours, commencing in the morning, and by ten o'clock at night, I found a decided change for the better, and after three days use he was able to eat and drink without pain.

It is in the above named disease will save many a child from a premature grave, and relieve the anxiety of many a fond parent.—For all affections of the Throat and Lungs, I believe it the best medicine extant. A feeling of the deepest gratitude, prompts me in addressing you these lines,—but for your important discovery, my little boy would now have been in another world.

I am yours, with great respect, J. M. POWELL, Sept. Trans., L. R. R.

Rock Hill, (Somerset Co.,) N. J., July 21, 1855.

Dr. J. C. Ayer.—Since your medicine has become known here, it has a greater demand than any other remedy we have ever sold. It is spoken of in terms of unmeasured praise by those who have used it, and I know of some cases where the best they can say of it is not too much for the good it has done. I take pleasure in selling it, because I know that I am giving my customers the worth of their money, and I feel gratified in seeing the benefit it confers.

Please send me a further supply, and believe me, Yours, with respect, JOHN C. WHITLOCK.

Almost any number of certificates can be sent you, if you wish it.

Windsor, C. W., June 26, 1855.

J. C. AYER. Sir: This may certify that I have used your CHERRY PECTORAL for upwards of one year; and it is my sincere belief that I should have seen in my grave ere this time if I had not. It has cured me of a dangerous affection of the lungs, and I do not overstate my convictions when I tell you it is a priceless remedy.

Yours very respectfully, D. A. McCULLIN, Attorney at Law.

Wilkesbarre, Pa., September 23, 1855.

Dr. J. C. Ayer, My dear Sir,—Your medicine is much approved of by those who have used it here, and its composition is such as to insure and maintain its reputation. Invariably recommended it for pulmonary affections, as do many of our principal physicians.

I am your friend, CHAS. STELLATER, M. D.
