Mr. Mackenzie is pursuing his policy of disregarding the interests of Canadian mannet that merits the most severe condemnation. We recently called attention to the fact that a quantity of metal castings, for use in certain public buildings, had been ordered from a Buffalo firm, and we now learn that a large contract for passenger and freight cars for the Intercolonial railway has been given to a firm at Bath, Maine, and that the trees and shrubs required for the ornamentation of the grounds of the Parliament Buildings at Ottawa have been procured from United States nurseries. No excuse or palliation, that will bear investigation, can be advanced in justification of such proceedings as these. Metal castings could be obtained from Guelph or any other town of importance in the Dominion; railway arars could be supplied by any of he rolling stock works at London, Ont., or 8t. John and Halifax, N. 8.; and all the trees and shrubs required could esupplied by Mr. Stevenson or Mesers. ilchrist Broa, of Guelph, or any of the extraive Canadian nurserymen. In consequence of the anti-protective policy of the esent Government many native industries v been crushed out, and it appears as bugh Mr. Mackenzie is determined that remaining ones shall follow suit, as he idiously avoids purchasing from Canadian nurserymen and the state of the Dominion. Price 31.90 a year.

Advertisements for casual insertion are charged at the rainf which he upholds, to the riment of Canadian interests. What and wants is a fair-play, national policy, entire opposite of that now in force, and understood rule that the people's money lee spent in the country whenever praches, and home manufacturers and never the median substance of quebec, Nova Scotia, New Brunarwick, British Columbia, and Manitobal by Mall. of the other compost of the compost heap, salt can generally be obtained in sufficient quantity from the refuse brine of the grocers and fishmongers. If the farm is within a few miles of the sea no salt need be added to the compost, as the spray of the coean furnishes a sufficiency, but otherwise we have found it very valuable and better applied through the compost heap than in any other manner.

Plaster is also excellent for the compost, being a good fertilizer in itself and a great absorbent of the gases which the composting the compost over, to have a barrel of plaster handy and to sprinkle on a little casionally to absorb the ammonia.

These are by no means all the ingredients which may enter profitably into the compost, and the next go to a significant of the profit of t

Soapsuda, hair from the barber's or tanner's, hen's feathers, &c., add to its virtues. In short, compost is much like mince-pie, for making which a woman once said she used forty ingredients and still it was not rich enough to suit her husband. Land is not so difficult to be satisfied as some husbands, and will respond gratefully to a compost made of a dozen ingredients.—N. Y. Times, which is the second day, but so the morning of the second day, but occasionally, having taken alows an extra large amount on the day previous, and knowing that a hard day's work was before us, we have commenced opening the cocks early in the morning, in some cases an hour or more before the dew was dried from the stubble. It seems decidedly did to be opening and a presading hay that was nearly dry upon stubble so wet with the was to soak the shoes on the feet, but knowing that if the hay was all to be put in the straw itself (!) the was to soak the shoes on the feet, but knowing that if the hay was all to be put in the straw itself (!) the cooks and the cumber of the straw itself (!) the cooks of the feet, but knowing that if the hay was all to be put in the straw itself (!) the cooks of the feet of the cooks and the country of the cooks of the feet, but knowing that if the hay was all to be put in the straw itself (!) the cooks of the feet of the cooks and the country of the cooks of the feet of the cooks of the feet
