here can be no doubt that too much gam ig goes on in the smoking-rooms of Atlanmers, but it is much more easy to point the evil than to prevent it. Games of ance or skill can hardly be forbidden altother, and in smoking-rooms very large sums ay be played for without anyone being the iser—but the parties concerned. There is a cat deal of drinking, also, on board ship. Iany hard cases consider an ocean voyage a are opportunity for a debauch, and the officers f the ship may be powerless to stop them eyen though they are nuisances to the other massengers. Detectives and putting offenders in irons might keep order and morality but companies are loth to use such weapons against their customers.

It is a common mistake with civilized governments, and with their commanders in the field, to underrate savage or half-savage enemies. Another, instance in point has just turned up. In endeavoring to relieve Kassala, in the Soudan, several companies of Italian troops were "simply annihilated by the Arabs." The British know how it is themselves, having played at the same game before.

Alcohol at Medical Schools.

Editor World: Mr. S. H. Blake is reported as telling the Medical Students' Temperance Society that he once was in the habit of using a few glasses of whisky while at hard work goves up that practice and became a total abstatiner he has felt and worked better. I was till long after midnight, and that since he gave up that practice and became a total abstainer he has felt and worked better. I was surprised to find that even under the old time regime referred to by Mr. Blake he did not know better than to attempt work on Whisky; it was what might have been gives expected only in a thoughtless young fellow. I suppose that that experience and the reading of Dr. B. W. Richardson's Cantor lectures have been the chief causes of Mr. B.'s present your wiews on the scientific aspect of the question. I wonder if Mr. Blake ever tried the effect on hard night work of tippling that delightful but much misused beverage—tea, and if he found it any less injurious.

My experience has been different from Mr. Blake's. I worked for years in the cause of ty of his tectotalism—harder, I think, than Mr. Blake now works, and used all the arguments and politics, arm Conistack of the products of the description, and the politics, arm Conistack of the products of the products of the description.

PROF. SMITH, of Wittenberg College, Recommends Cleveland's Superior Baking Powder, and condemns the use of Ammonia in Baking Powder.

This is to certify that I have examined Cleveland's Superior Baking Powder, samples of which I purchased in open market, and that I can recommend it as a good, wholesome, and unadulterated article. It does not contain ammonia, an ingredient of many baking powders, and one which I regard as highly objectionable, since it seriously impairs digestion. I have examined biscuits baked with an ammoniated powder, and have found, as has been repeatedly declared, that the ammonia was still there. Cleveland's powder gave the amount of pure carbonic acid claimed for it by the manufacturers.

have determined to seek election as your tative in the House of Commons of Canada. My reasons for so doing are as follows: I am deeply impressed with the fact that the young men of Canada are not repre-sented in Parliament in proportion to their numbers, intelligence and their interests in the country, owing partly to the machine system of party politics by which individual liberty is crushed out of the people, and partly to too much indifference and a lack of indeendence on the part of the young men them
