NO. 8

THE DAY OF CHEAP FOOD HAS GONE

From Now On, the Farm Lands of the East Will Become More and More Valuable, says the Dartmouth Patriot, and the Farmers Tilling Them Will Get Far Greater Returns for Their Industry.

The day of cheap food has passed. Never again will the old level of prices be reached.

The opening up of the great wheat fields of America and the enormous ranges where beef and mutton could be grown for almost nothing played havoc with the agriculturalists of Europe, Ireland in particular suffered severely. No longer could the peasantry pay rent to a landlord and live. That was the beginning of the agrarian troubles there. German agriculture got an awful smash also and to a lesser degree did France. English farmers are still suffering. Prices fell to such a level that thousands of acres were turned into pasture. And they would not have been used for pasture even if the British government had not evaded the policy of Free Trade and prohibiting the import of cattle on foot from America. As everyone knows Canadian cattle are not diseased still they will not be admitted because the British farmers will not have it.

The cheap food of America swamped the markets and wrecked the farmers of Europe. But that is passing. In another ten years the United States and quite possibly North America will not be exporting a bushel of wheat or a single animal for food purposes, Russia and Argentina may for a time keep prices about where they are but when those countries become peopled as they soon will then will come the era of big prices for foods of all kinds.

The farmers of Nova Scotia suffered with the farmers of other countries. Many of them, refusing to adopt ad-

vanced methods, as the Danes, the Irish and the French have done, have thrown up their hands and their lands and gone west or to the "States" or elsewhere taking their chances of making an easier or better living.

The turn of the tide has come. The best authorities say there will never again be a time when the consumer will see cheap beef or pork or bread.

It is quite possible the present very high range of prices may be lowered temporarily, but that is all it will be. The farmer who keeps right at it gets down to advanced methods and uses brains as well as brawn need never fear that he cannot make a good living working reasonable hours. That is how the case stands today.

The opportunities open to the farmers of Nova Scotia are of the very best. The farmer has the situation in his own hands today. He can get from two to three times as much for his produce today as he could ten or twenty years ago. True he has not so much virgin soil to draw upon, but he has scientific knowledge ready at his hand of the greatest value to him that he could not avail himself of at that time.

This is the day for the farmer, the day when it will pay to get back to the land. The tide is beginning to turn, in fact it is well on the flow to a prosperous condition for those who till the soil. In ten years more farm lands in Nova Scotia will be worth twice what they are at present and the country will have thousands more on the land than it has today.—Dartmouth Patriot.

C. P. R. Engineers Visit Digby

They Are Inspecting the Bridges and Wharf Property of the D. A. R.

A special train arrived here about three o'clock Wednesday afternoon containing Messrs. P. Giffins, superintendent of the D. A. R., D. J. Murphy, general road master of the D. A. R., J. G. Sullivan and P. R. Motley, C. P. R. engineers. These gentlemen were on a tour of inspection of the D. A. R. bridges, wharf property, etc.

They had dinner at the Royal Hotel after which they spent some time here inspecting the shipping facilities at this port which will soon become the principal outlet for freight along the line.

A Courier representative had a pleasant interview with Mr. Giffins who is much pleased with Digby as a summer resort and shipping port. The direct Boston-Digby service will

no doubt become a permanent fixture throughout the entire year and great things are promised for Digby, many of which will not be made public at present.

The gentlemen proceeded to Yarmouth, returning to Digby yesterday about 1.15 p.m. They dined on board the S. S. Prince Rupert, the special train running down to the wharf. Messrs. Sullivan and Motley left for Montreal via St. John, the special leaving for Kentville soon after the Rupert sailed.—Digby Courier.

EDWARD VII.

Who in the realm today lays down Dear life for the sake of a land more dear,

And, unconcerned for his own estate, Toils till the last grudging sands have run?

Let him approach, it is proven here Our King asks nothing of any man More than our King himself has done.

—Kipling.

C. P. R. Engineers Inspect D. A. R. from Halifax to Yarmouth

St. John, June 2—J. G. Sullivan, assistant chief engineer, and J. C. Motley, assistant bridge engineer of the C. P. R., who have made a thorough inspection of the D. A. R., arrived in the city this evening from Digby and left for Montreal. They will report the result of their trip to Sir Thomas Shaughnessy.

When interviewed by the Herald correspondent the engineers declined to discuss the purchase of the whole road and the report they would submit to the president would cover the question from an engineering standpoint.

"I am agreeably surprised with all I saw," said Mr. Sullivan. "The road bed of the D. A. R. is in much better condition than I expected to find it, and when I report to the president I will say so. There is a good railway in Nova Scotia and even at the present time it is in surprisingly fine condition."

THE ROAD IS IN GOOD SHAPE.

"Then your report will be in favor of the purchase?" Mr. Sullivan was asked.

"My report will say that the road is in good shape, and that the road bed is thoroughly adequate for the cars to be hauled over it."

"Would it be suitable for the C. P. R.?"

"It is a standard gauge road, and the grades are very light. I am very much pleased with it," was the reply Mr. Sullivan added that he had inspected the whole road very carefully going on Wednesday to Yarmouth, and making the trip from Yarmouth to Digby today. He was enthusiastic over the country through which the road runs, especially the Annapolis valley and expressed glowing opinions of its beauties. Mr. Motley was also impressed to such an extent that he said he would send his family to the Annapolis valley this summer.

"We have always summered on the St. Lawrence," he remarked, "but I think I have found a prettier spot now."

THE WINDSOR BRIDGE A FINE STRUCTURE.

Mr. Motley inspected the bridges at Clementsport, Weymouth, Bear River and Windsor. The Windsor bridge, which is an iron one, he thought was a very fine structure for its size and type. The report of the engineers will probably mark almost the final step in the negotiations for the taking over of the road. People who are on the inside say that there is no doubt that the C. P. R. will be openly identified with the D. A. R. after the meeting of the D. A. R. stockholders in October. It is understood the road bed will need to be strengthened for the heavier C. P. R. engines.

One thing which seemed to amuse the engineers considerably was the statement which had been made that the C. P. R. would run a car ferry across the bay of Fundy and bring passengers from Halifax via that route. When told of this Mr. Sullivan gave expression to the single word "nonsense."

The engineers left for Montreal this evening.

May Be Forced to Become Vegetarian

There is little hope for improvement as regards one item in the high cost of living. Beef is not likely ever to be cheap again. The reason is that the great areas of grazing lands on this continent are rapidly passing out of existence as such. The cattle ranges become farm lands, the hay of cheap pasture is done, the herds dwindle in size, and a much greater proportion of the feeding is done in stalls. Instead of keeping pace with the increasing demands of a growing population, the supply has fallen off. Cheap beef belongs to a past age. There are substitutes which are equally nourishing and less expensive. To such recourse must be had. The day may be coming when the crowd of the world will force us all to be vegetarians.

Annapolis Co. Describes World's S. S. Convention

To THE S. S. CONVENTION: As many of our readers will be interested to hear of the World's S. S. Convention I will give a brief description of the largest and most successful gathering the organization has ever held.

At the evening session of first day there were present 3000, while outside the convention hall a still larger number of persons congregated unable to enter.

Sometimes three and four simultaneous convention sessions were inadequate to hold the throng.

Three thousand were registered as official delegates and in addition to these, there were about seven thousand unofficial delegates or visitors.

The great Men's Bible Class Parade on the afternoon of May 20th was an interesting feature.

In order that some members of Congress might march in the parade, as they did, and that others might witness it, Congress adjourned early on the day of demonstration.

Though very heavy rains largely reduced the ranks about seven thousand men in a bannered procession a mile long, marched down Pennsylvania Avenue, and were reviewed at the Capitol by a throng of about ten-thousand persons.

All these marching men belong to the Sunday School and the thought uppermost in the minds of many of the Spectators who lined the side walks was expressed on one banner "where the men lead the boys will follow."

Two large mass meetings were held for men and women delegates at the same time two big meetings of women delegates were in session.

Memorial Services were held on May 20th between 11 o'clock and noon in the convention churches, in memory of the late King Edward VII.

A large Open Air Meeting was held on the east steps of the Capitol on Saturday afternoon. This gave the large number of people who were unable to get into the convention hall an opportunity of hearing some of the speakers.

Part of each day was given to a roll call of Nations. Various factors combined to make the Convention a Missionary occasion. Many Missionary addresses were presented. There was a large Missionary and Educational exhibit.

The wide spread observance of World's S. S. Day in more than two hundred languages and dialects as reported to the Convention by cables from various lands was a real Missionary factor.

The statistical report showed number of schools 285,842; teachers and officers 2,500,000; total enrollment 27,888,479, of whom 16,000,000 are found in United States and Canada.

A fund of \$75,000 was raised in a few hours, \$65,000 of this was raised in making "life members" of the Association.

A large part of this will be used in placing Field Workers in South America and in foreign lands.

On the closing night of the Convention there was a tableau of seventy-five children reproducing the picture which this Convention has made famous "The Twentieth Century Crusaders."

The Convention sessions were too numerous to be mentioned in detail, on Sunday afternoon there were twenty-five and on Sunday night over a hundred, all with regularly appointed speakers.

Especially notable among the addresses were those of President Taft, Hon. John Wainmaker, Mr. Robert Spear, Dr. F. B. Meyers, Rev. S. M. Zwenton, of Arabia, Dr. J. Wilbur Chapman, Bishop J. C. Hatzell of South Africa, and Mr. Marion Lawrence.

The President for the next three years—Dr. George Pauley of Philadelphia.

Place for next Convention—Geneva, Switzerland.

Yours in the work,
A. E. YOUNG.

MINARD'S LINIMENT CURES PAIN

Some New Sea-Side Resorts in Nova Scotia

As the Windsor Board of Trade has issued an attractive booklet advertising the summer attractions of Windsor-on-Avon, and this recalls an article I read in a recent number of the New England Magazine, in which the writer described an interesting automobile trip through Nova Scotia, commencing at Yarmouth. He doesn't

enthusiasm much over most of the places he visited en route, including our immortal Grand Pre, but Windsor seems to have measured right up to his expectations, for he refers to it as "the brightest, most-up-to-date, and at the same time most interesting place we had seen."

Halifax seems to have made a favorable impression on him also, and in the course of his description of the City he remarks that "the peace which Halifax hospitality sets would make the most hardened New Yorker seek a sanatorium."

"We do not often get the published point of view of the visiting automobilist in Nova Scotia; and in the case of the writer under discussion, it is exceedingly interesting to read his views concerning Nova Scotia roads. These he seems to have found good, bad and indifferent, according to circumstances, reserving his most delicate compliments for a certain portion of the highway between Windsor and Halifax. Of this, he says, "a worse road cannot be imagined, after the summit of Mt. Uniacke has been passed."

"The Morning Chronicle has seen to it that its readers have been kept well informed as to what other countries and sections have been doing in connection with the "good roads" movement. Think how enormously it would add to Nova Scotia's fame and prestige as a summer resort if it could have a "state" highway between Yarmouth and Halifax similar to the three Great Trunk Roads that are now being built through different parts of New Hampshire at the expense of the State and County Governments. It would be an asset of untold value, and one of the best advertising cards the Province could possibly possess.

"A new resort that is going to play a conspicuous part in the future history of Nova Scotia as a vacation centre is Seaside Park, at Harborville, on the Bay of Fundy shore, eleven miles from Aylesford. This place, as readers of The Morning Chronicle know, is controlled by the Harborville Realty Co., Ltd., of which General Manager Percy Giffins of the Dominion Atlantic Railway, Kentville, is President, and Sir Frederick Borden is Vice-President.

"This new and delightful haven for the weary is being vigorously exploited by the company, through Mr. E. W. Kappelle, the hustling and enthusiastic manager. Mr. Kappelle has made several visits to Boston this spring to confer with local capitalists and is in that city now. He has been very successful in his mission, and promises that Seaside Park will be a day in the near future be one of the most popular and populous summer resorts in the Maritime Provinces. The company has ambitious plans for the building up of the resort, with modern hotel, cottages and bungalow features, and intends to advertise it extensively. Already there are a number of guests booked for the coming season, and everybody who has ever visited Harborville has fallen a permanent victim of its charms. I have always wondered why this attractive Seaside has been so long overlooked by the vacation resort exploiters.

Another interesting enterprise of this character this is at present being exploited here is the Lakelands Development Co., Ltd., which has been organized under Nova Scotia laws for the agricultural, industrial and commercial development of a 3500 acre estate in the townships of Windsor and Uniacke, Hants County, known as Lakelands. Mr. C. H. McClure, a well-known and successful architect, of Cambridge, Mass., and a native of Nova Scotia, is the chief promoter of this enterprise, which has for one of its objects the attracting of summer visitors to Lakelands."

THE "JUDGE LINDSEY" OF VERMONT

The Lindsey Methods Practiced in the Vermont State Industrial School of Which J. N. Barss is Superintendent.—All Signs of Prison Discipline Abolished.—Juvenile Delinquents Put "On Their Honor."

The following article published in the Rutland Herald will be of especial interest to many of our readers, because the Mr. Barss referred to is an Annapolis County boy and a nephew of Mr. Alfred Vidito and Miss Helen Vidito of this town. In referring to him as the Judge Lindsey of Vermont, the Rutland Herald indicates the pre-eminent success that has attended Mr. Barss in his noble work.

Through the courtesy of Secretary Clark of Burlington V. M. C. A., Rutland Herald was represented at the formal dinner given Judge Lindsey, of the famous "boys' court" in Denver, in Burlington. The brief address of the celebrated jurist and educator was distinctly impressive.

Judge Lindsey is a sparely built man of middle height, dark, clear-eyed and without any frills about him. He looks you squarely in the eyes, grips your hand hard and talks plain business and the gospel of love. He says there are not many bad boys, but a good many boys do bad things. Sadness in boys is more a question of environment than anything else. You must get at a boy's heart, then work outwardly from that. You cannot as a rule drive anything into a boy by force, says Judge Lindsey, but by getting his love and respect you can do a great deal. It is a mistake to attempt reforming a boy by treating him as a criminal.

The force of his teachings and system, considerably reinforced by the strength of an unusual personality, has given his court a remarkable record. In eight years he sent 507 boys to state institutions without a police guard, simply putting them on their honor and giving them money to purchase their tickets. They were told they could run away if they thought it was square, but in eight years only five boys ran away, while the police lost 42 "prisoners" in spite of hand-cuffs and shackles. Before the Lindsey system, 62 boys out of 100 were returned to jail later for worse offenses; today, the average of such relapses is only 12 in 100. This is the sort of thing that counts.

In the course of his brief talk, Judge Lindsey referred to the work of the state industrial school and congratulated the governor on the splendid work that is being done there by J. N. Barss, the present superintendent. Mr. Barss is not a judge, but he believes in and practises the Lindsey methods. One of the first things he did was to abolish all signs of "prison discipline." No lock step, no guards, no whippings, no locked doors, no spying, no degraded clothes or customs. He appeals di-

rectly to the boy's honor, lets him come and go within all reasonable limits and begins without harshness or coercion the process of turning his energies into useful channels.

A prominent state educator stated to a Herald representative the other day that the boys and girls in the industrial school are getting a better practical education under the Barss system than our children can secure in the high schools of the state.

Judge Lindsey told of 500 boys from the Colorado industrial school coming down to Denver during the Grand Army encampment and being permitted to wander in groups all over the city, absolutely without guards or restraint, the only proviso being that they should behave themselves and report at headquarters every night. Not a boy ran away or got into trouble. Just so Mr. Barss brings his boys and girls to Middlebury fair and allows them to wander about the grounds unguarded. They not only do not run away but they are the first to observe the time, keep track of the hours and see that the superintendent's confidence shall not be missed. Whatever stigma may have attached itself to the "reform school" in the past is disappearing, leaving not a vestige of discredit in having served a "term" in that admirable state institution.

Perhaps it is not going too far to say that Mr. Barss is the Judge Lindsey of Vermont. Certainly they both subscribe to and practice the principles laid down in the following extract from the Burlington address of the latter:

"Your own boy is not safe unless "all boys are safe, and if we believe in brotherhood we shall not turn our backs on the children. "The policeman should be the friend of the boy and the boy should be the friend of the policeman, but thought it was square, but in eight years only five boys ran away, while the police lost 42 "prisoners" in spite of hand-cuffs and shackles. Before the Lindsey system, 62 boys out of 100 were returned to jail later for worse offenses; today, the average of such relapses is only 12 in 100. This is the sort of thing that counts.

"I understand his environment. "The difference between the bad boy and the good is the difference between environments. It is absurd in dealing with a child to apply the same methods as when dealing with a man. Fear is the father of "enemies" towards the boy. If we are "out of a boy first get the fear out of him. The parent, whose anger rather than love prompts punishment, soon has the hatred of the "boy and he gets immediately beyond parental control."

The creditors of the H. W. DeForest Co., of St. John have accepted an offer of twenty-eight cents on the dollar and the old Company will now merge with the Sunbeam Tea Co., under the title of Union Tea Co.

ANNAPOLIS ROYAL BRANCH, E. B. McDANIEL Manager

Sheriff's Sale.

IN THE SUPREME COURT
1910, A. No. 1550.

Between:
Julia Ruffee, widow
Plaintiff
Chas. E. Phinney and
Annie, his wife.
Defendants.

TO BE SOLD AT PUBLIC AUCTION by the Sheriff of the County of Annapolis or his deputy at the Court House in Bridgetown in said County on SATURDAY, the 2nd day of July, A. D. 1910, at the hour of three o'clock p. m. pursuant to an order of foreclosure and sale made herein on the 14th day of May A. D. 1910, unless before the day of the sale the amount due to the plaintiff with interest and costs is paid to the plaintiff or her solicitor or into Court.

All the estate, right, title, interest, claim and equity of redemption of the defendants in, to and out of either of the following lots situated on parcels of land situate at Wilmot in said county and described as follows:—

All that certain piece or parcel of land and premises situate lying and being in Wilmot in the County of Annapolis and bounded and described as follows: that is to say beginning at the southeast corner of Charles E. Phinney's carpenter shop where it now stands on the west side of the Wheelock road so called, thence running south ten degrees by the course of said road ten rods, thence westerly or parallel with the Saunders road so called eight rods, thence northerly parallel with the said Wheelock road to the south west corner of land now owned by Charles E. Phinney, thence easterly to the place of beginning, containing one half of an acre be the same more or less, and all other if any, the hereditaments comprised in a certain indenture made the 10th day of February, 1892, between Franklin A. Robb and the said Charles E. Phinney and recorded in the Registry of Deeds in and for the said county of Annapolis in Book 96, at page 122.

Also all and singular that certain other piece or parcel of land and premises situate lying and being in Wilmot aforesaid and bounded and described as follows, that is to say, beginning at a stake and stones on the south side of the Saunders road so called four feet east from the centre of a certain ditch or water course, thence running southerly or parallel with the Wheelock road so called, said ditch being about sixteen and one half rods west of the said Wheelock road, thence running easterly until it meets the north east corner of land owned by Edward T. Phinney, thence southerly by the course of said Phinney's west line to the south-west corner of land now owned by said Charles E. Phinney, thence westerly in the same direction of the south side of said land to a certain ditch, thence southerly following on the east side and the same distance from the course of said ditch into the place of beginning, being one and one half acres be the same more or less and all other if any, the hereditaments comprised in a certain indenture of mortgage made the 20th day of September 1892, between Franklin A. Robb and the said Charles E. Phinney, and recorded in the said Registry of Deeds in Book 97, page 479.

Also all and singular all that certain other piece or parcel of land and premises situate lying and being in Wilmot aforesaid and bounded and described as follows, that is to say beginning at a willow tree at the Saunders road so called, thence running a southerly course forty-eight feet to a willow tree, thence easterly forty-eight feet to a willow tree at the Wheelock road so called, thence southerly along said road twenty rods to lands owned by Chas. A. Phinney, thence westerly eight rods, thence northerly twenty rods to the aforesaid Saunders road, thence easterly eight rods to the place of beginning, containing one acre more or less and all other, if any, the hereditaments comprised in a certain indenture made the first day of March 1893 between Edward T. Phinney and the said Charles E. Phinney and recorded in the Registry of Deeds in Book 99, page 364, together with the buildings, easements and appurtenances thereto belonging.

TERMS.—Ten per cent deposit at time of sale remainder on delivery of deed.
EDWIN GATES,
Sheriff of the County of Annapolis.

F. L. MILNER,
Solicitor for Plaintiff.

SEALED TENDERS

addressed to the undersigned, and endorsed "Tender for Pier Extension at Kingsport, N. S." will be received at this office until 5 p. m. on Monday, June 13, 1910, for the construction of an Extension to Pier at Kingsport, Kings county N. S.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department, at the office of C. E. W. Dodwell, Esq., District Engineer, Halifax, N. S., and on application to the Postmaster at Kingsport, N. S.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, for the sum of twelve hundred dollars (\$1,200). The cheque will be forfeited if it is not tendered in full.

The Department does not bind itself to accept the lowest or any tender.

By order,
NAPOLEON TESSIER,
Secretary.

Department of Public Works,
Ottawa, May 13, 1910.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

SEALED TENDERS

addressed to the undersigned, and endorsed "Tender for Breakwater at Blue Rocks, N. S." will be received at this office until 5 p. m., Friday, June 17, 1910, for the construction of a breakwater at BLUE ROCKS, LUNENBURG, CO., N. S.

Plans, specification and form of contract can be seen and forms of tender obtained at this Department, at the office of C. E. W. Dodwell, Esq., District Engineer, Halifax, N. S., and on application to the Postmaster at Blue Rocks, N. S.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures, stating their occupation and places of residence. In the case of firms, the actual signature, the nature of the occupation and place of residence of each member of the firm must be given.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, for the sum of one thousand dollars (\$1,000.00), which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the work contracted for. If the tender is accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
NAPOLEON TESSIER,
Department of Public Works,
Ottawa, May 17, 1910.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

Mail Contract.

SEALED TENDERS addressed to the Postmaster General, will be received at Ottawa until noon on FRIDAY, JUNE 24th 1910, or the conveyance of His Majesty's Mails on a proposed contract for four years three times per week each way, between DELAP'S COVE AND GRANVILLE FERRY, from the Postmaster General's pleasure next.

Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Office of Delap's Cove, Granville Ferry & route offices and at the Office of the Post Office Inspector at Halifax.

POST OFFICE DEPARTMENT

The Fish Hogs Who Infest Lake and Stream

(From the Eastern Chronicle)

At this season of the year, few there be especially among the male population who would not fancy being by the side of some turbulent stream, far from the busy mart, with rod and line, whipping the dark pools with attractive worm, or else on the placid waters of a remote lake casting the fly upon its glimmering surface in an endeavor to lure the wily trout from its hiding place.

All of which is good legitimate sport, in many instances more terrible to the worm than to the trout. We have nothing to say regarding the man who so enjoys a day or so spent thus; it is royal fun, the outing does one good; the open air, the tramping through the bush, the freedom, the closeness to nature, all tend to prolong life and fit the body better for the duties of the year. But like all good things, even this can be carried to excess.

In few localities are there such exceptional advantages for these pleasurable outings as we have in Eastern Nova Scotia and they should be the prize of every true sportsman. Unfortunately, unless a crimp is out in the movements of certain fishers properly termed "fish hogs" these many beautiful lakes and streams will be swept clean. It is all too evident that these hogs are making raids on our lakes and carrying away bags out of all proportion to their needs from an eating or fun standpoint. And it is just as certain that these "hogs" are using means other than those prescribed by the law.

A local game protection society has generously offered a reward of sixty dollars for the conviction of anyone who takes trout illegally by use of net or dynamite yet we have not so far learned of any one laying claim to this sixty.

Recently a fisher was telling the writer of his having taken five hundred trout through the ice on a certain lake at Caledonia, and if he told the truth, every one of which were illegally caught, yet he only laughed at our suggestion of a fine. Those who are interested in the great game of angling should deem it their duty to keep a watchful eye on the game hog else our lakes will be ruined. There are lakes in which it is quite good enough sport for anyone to take thirty to fifty trout, for they are large and each trout can give the necessary thrills to satisfy any Disciple of Izaak but these hauls numbering in the hundreds are to be condemned the man who makes them confiscates his privilege to be termed a good sportsman.

Next to the angling for trout, in fact ahead of it with many, comes hunting the moose. Again, we find here every evidence of wanton destruction. There are now on the shores of Salames Lake Fifteen Mile stream, the bodies of two large moose shot apparently for only the lust of killing. One is minus the head which probably had antlers or was taken to bait a bear trap, both were destroyed within a very few weeks and in a locality that few hunters frequent.

The game commissioners are certainly lax in fulfilling their duties and we believe there are instances in the province where the government has appointed game wardens who work harder at evading the law than they do in seeing that the requirements of the law are fulfilled. The object of all who care at legal seasons of the year to frequent the splendid forest ranges and its lakes should be to protect the speckled beauties and the noble antlered denizens of the tall uncult.

DASHED TO DEATH IN AUTOMOBILE ACCIDENT.

Machine Ran Over Embankment Killing Two Women and Injuring Others.

Logan, Ohio, May 27.—While returning from a party at midnight an auto driven by Wm. Snyder, President of a Lumber Company, ran over an embankment near Young's Bridge and Miss Lillian Wright and Miss Flossie Herman were instantly killed. Mrs. Don Goss sustained a fractured rib, and Mr. Snyder's leg was broken. Miss Wright was to have been married next Wednesday.

Campaign Against Obscene Literature

The editor of the Toronto Globe is more than a political booster; he is now showing himself to be above party on the question of morality. For some time he has been denouncing Aylesworth for granting pardon to two men found guilty of trading in obscene literature and pictures. "I do not care how far you go, even if it smashes the government," is what Senator Jaffray, president of the Globe Printing Company, told Mr. MacDonald, the editor, as regards the Globe's Campaign. The Senator before making that statement had read one page of a book submitted to him by the editor while seeking approval for his campaign. In Toronto, studios patronized by the wives of many men prominent in political and social life had degraded their business by taking vile photographs. Fifty thousand of these were sold in Toronto, and ten thousand in Barrie, ten thousand in Hamilton, four thousand in Peterboro and a large number in the Maritime Provinces. And His Majesty's mails carried this disreputable stuff throughout the length and breadth of the land. "These books and pictures," says Editor MacDonald, "were sold as classics. When the law does authorize the arrest of a man who is responsible for the circulation of such rubbish, or the agent of such a person, it does not allow the official who makes the arrest to search his supplies. It allows a search to be made for whiskey though and I'd far rather see a boy of mine come home drunk than have concealed such truck in his pockets. He can get the whiskey out of his system but he can never get these vile things out of his mind."

No Disordered Kidneys or a Weak Bladder if You Take a Few Doses of FIG PILLS

All Backache and Distress from out-of-order kidneys or Bladder Trouble will vanish, and you will feel fine. Lame Back, Painful Stitches, Rheumatism, Nervous Headache, Dizziness, Sleeplessness, Wornout, Sick Feeling and other Symptoms of Stagnant, Inactive Kidneys and Liver disappear. Smarting, Frequent Urination and all Bladder Trouble ends. FIG PILLS go at once to the disordered Kidneys, Bladder and Urinary System, and complete a cure before you know it. There is no other remedy, at any price, which does so thorough and so quick a work. FIG PILLS can come from the FIG PILLS and a few doses mean clean active healthy Kidneys, Bladder and Liver—and No Backache.

For sale at all first-class drug stores. 25c a box, or five for one dollar. Warren's Drug Store, special agent.

DEATH BY CAT AND FLY

New York, May 29.—Edward H. Pratt, of Jersey City, a few days ago reached under his office chair to stroke a kitten and received a scratch. That same night he caught a fly, whose buzzing at the window annoyed him, and crushed it in the same hand which had been lacerated. The following morning the hand was swelled to an abnormal size and the trouble was diagnosed as septic poisoning. He went to the hospital and his hand was amputated, but the trouble had gone too far, and yesterday he died.

Chamberlain's Stomach and Liver Tablets will brace up the nerves, banish sick headache, prevent despondency and invigorate the whole system. Sold by all dealers.

CURTISS WINS TEN THOUSAND PRIZE.

Flew From Albany to New York in An Aeroplane.
New York, May 29.—Glenn H. Curtiss flew from Albany to New York City in an aeroplane today, winning the \$10,000 prize offered by the New York World. He covered the distance, one hundred and thirty-seven miles, in two hours and thirty-two minutes, and came to earth as easily and lightly as a pigeon.

If you are not satisfied after using according to directions two-thirds of a bottle of Chamberlain's Stomach and Liver Tablets you can have your money back. The tablets cleanse and invigorate the stomach, improve the digestion, regulate the bowels. Give them a trial and get well. Sold by all dealers.

EGGS AS OMENS.

Curious Divination Custom Among Hill Tribes in Farthest India. The egg enters in a peculiar way into the lives of the people of the Khasi Hills, in Assam, Farther India. No event of any importance in the life of a Khasi takes place without divination by egg-breaking. The number of eggs broken for omens is only limited by the resources of the owner. Groups of Khasis may be seen arguing and wrangling for hours, and accompanying their ejaculations by furiously banging an egg on the ground, until in time they are standing in a disheveled mess of egg shells, yolks, and blood-red saliva caused by betel-chewing. When the success or failure of some prospective event is in question, the custom is to drop an egg on a peculiarly shaped board, and then, from the configuration of the splintered yolk, and the position of the bits of shell, draw an augury concerning them and its future. You can command and can divine nothing. You can communicate with spirits, and between them and us have intercourse. Now, say, who has done this—who has caused this man to fall sick? If the spirit is in the house, let the signs be on the left; if out of the house, on the right. Then he spits on the egg, and takes some clay in his hands, smears it over, so that the outside of the shell may be quite unmistakable when it is smashed. Apology is made to the egg by the man saying, "I don't spit on you to insult you, but to clean you and give you a color," and then it is hurled upon the board.

MADE EGYPT POSSIBLE.

The Glorious Nile and the Wonders It Has Accomplished. The Nile is probably the most wonderful river in the world. It has made Egypt possible by turning an arid wilderness into the richest land in the world. It has provided the means of an admirable commercial highway and made easy the transportation of building materials. The ancient Egyptians were thus enabled to utilize the granite of Assouan for the splendid structures of the hundred-gated Thebes and of Memphis, and even the towers of Tanis, on the Mediterranean coast.

At a time when the people of the British Isle were clad in skins of wild beasts and offered human sacrifices upon the stone altars of the Druids, Egypt was the centre of a rich and advanced civilization. Most of the development of Egypt was due to the Nile, which not only watered and fertilized the soil annually, but was and is one of the greatest and best natural highways of the world. From the beginning of winter to the end of spring—that is, while the Nile is navigable—the north wind blows steadily up the stream with sufficient force to drive sailing boats against the current at a fair pace, while, on the other hand, the current is strong enough to carry a boat without sails down against the wind, except when it blows a gale. That is why the ancient Egyptians did not need steam engines or electric motors, for the immense commerce that covered the Nile, nor for barges carrying building materials for hundreds of miles.

Popular With the Irish.

Lord Mayo, who met with an accident in the hunting-field recently during a run from Palmerstown, his Irish seat, is extremely popular in the Emerald Isle. He takes a keen, practical interest in the affairs of Ireland, and is devoted to the development of the Irish national industries, in which work he is warmly supported by the people. His lordship succeeded to the title in 1872, on the death of his father, the then Viceroy of India, who was assassinated while on an inspection visit to the penal colony in the Andaman Islands. Soon after this sad event the Indian Government awarded a pension of £1,600 a year to the Dowager Countess of Mayo and a lump sum of £20,000 for the benefit of his children.

Spinning an Egg.

One of Lord Kelvin's favorite experiments while teaching natural philosophy at the University of Glasgow was to spin an egg which was suspended in the air. If the egg were hard boiled it would spin a long time; otherwise, owing to the friction between its contents and its shell, its motion would soon cease. Lord Kelvin inferred from this that the interior of the earth cannot be a fluid or the globe's rate of rotation would have been checked long ago. Once the student substituted raw eggs for the hard-boiled ones provided for the experiment, not one would spin properly, but Lord Kelvin was not to be fooled. "None of them boiled," was his only comment.

The Difference.

A nobleman against whom insanity was imputed by his relatives was asked during examination by Lord Loughborough, "How many legs has a sheep?" "Does your lordship mean a live or a dead sheep?" asked the nobleman. "Is it not the same thing?" said the chancellor. "No, my lord; there is much difference. A live sheep has four legs, a dead sheep has two. The others are shoulders!"—London Tatler.

Butter 500 Years Old.

A remarkable "find" was made near Portadown, County Armagh, Ireland, one day lately, where some peat workers dug up in a moss a piece of butter, which is believed to have lain embedded in the peat for over 500 years. The butter, which is in a fair state of preservation, is enclosed in a "firkin," hollowed out of a tree stump, and covered by a piece of but a newly-worked handle carved out of the same piece of wood as the lid. For the interesting find a very large price has already been offered.

One Way to Shine.

Do not neglect to keep your boots polished. You can always shine at one end if you cannot at the other.

THE MAD MULLAH.

An African Washington and Napoleon Rolled Into One.

News dispatches a few days ago announced that the Mad Mullah, who has been a thorn in England's side for many years, has again broken loose in a region containing 60,000 square miles. He is a sort of African Washington and Napoleon rolled into one and has cost Great Britain thousands of lives and \$50,000,000 in cash. Many years ago Great Britain, which ruled over the peaceful tribes on the coast, declared a protectorate over the interior. The Mad Mullah, who had risen to power among the fierce Mohammedan tribes, resented this and prepared to dispute England's extension of authority. The English sent an expedition to meet him and three years of desultory campaigning followed, during which they expended \$15,000,000 and sacrificed 1,500 men. But the Mad Mullah was not subdued, and in 1901 England dispatched another force to tame him. Similar expeditions were the dominating figure in a region containing 60,000 square miles. He is a sort of African Washington and Napoleon rolled into one and has cost Great Britain thousands of lives and \$50,000,000 in cash.

Many years ago Great Britain, which ruled over the peaceful tribes on the coast, declared a protectorate over the interior. The Mad Mullah, who had risen to power among the fierce Mohammedan tribes, resented this and prepared to dispute England's extension of authority. The English sent an expedition to meet him and three years of desultory campaigning followed, during which they expended \$15,000,000 and sacrificed 1,500 men. But the Mad Mullah was not subdued, and in 1901 England dispatched another force to tame him. Similar expeditions were the dominating figure in a region containing 60,000 square miles. He is a sort of African Washington and Napoleon rolled into one and has cost Great Britain thousands of lives and \$50,000,000 in cash. Many years ago Great Britain, which ruled over the peaceful tribes on the coast, declared a protectorate over the interior. The Mad Mullah, who had risen to power among the fierce Mohammedan tribes, resented this and prepared to dispute England's extension of authority. The English sent an expedition to meet him and three years of desultory campaigning followed, during which they expended \$15,000,000 and sacrificed 1,500 men. But the Mad Mullah was not subdued, and in 1901 England dispatched another force to tame him. Similar expeditions were the dominating figure in a region containing 60,000 square miles. He is a sort of African Washington and Napoleon rolled into one and has cost Great Britain thousands of lives and \$50,000,000 in cash.

To-day the whole interior of Somaliland is at the mercy of the Mullah. He has at his disposal a force of 70,000 men, 10,000 of them cavalry. He has modern guns and rifles and as he manufactures his own powder he can wage quite a serious war without depending upon outside sources for his supplies. That he will not remain inactive is quite certain, and the future will hear more of the Mad Mullah. He is now 43 years old. He studied Latin under a Catholic missionary and the Mohammedan religion at Berbera. He exercises tremendous influence over the Mohammedans and is a dangerous element in northeast Africa.

Irish Raid Auction.

An extraordinary demonstration took place at Menagh, County Tipperary, one day not long ago, as a result of a dispute between a landlord and his tenants. He promised to sell or give a reduction, but failed to do either, and the tenants refused to pay their rent. Writs were issued, and the auction sale was fixed, and several bands, followed by hundreds of farmers, paraded the town, preceded by cattle and horsemen. At the hour fixed for the auction a large crowd assembled at the town, and a rush was made, and the cattle were taken out by force. The animals were then decorated with green ribbon and laurels, and another procession paraded the town. A huge green banner carried in front of the procession bore the words "The land is ours."

The Parsees.

The Parsees are sun worshippers, and it is an interesting sight to see the throngs of them on the shore of the bay when the sun rises, apparently from the sea, performing the simple rites of their religion, the fluttering robes showing their fine figures to the best advantage as the day begins. Their religious practices are in strict accordance with the principles of a healthful and personal cleanliness. The rigid observance of sanitary laws produces the natural result of perfect health among the adults—large families of active, healthy children and immense numbers of old men, gray-bearded, white haired, but erect and princely in their gait and attitude despite the naturally enervating character of the tropical climate.

A Boon for Wives.

One of the first and most courageous advocates of "women's rights" is Lady McLaren, who has drawn up the Woman's Charter, one of the objects of which is to provide that a small share of the husband's property should be regarded as belonging to his wife, the amount to be calculated on the scale of a housekeeper's salary in her own station of life. Thus it would be impossible for a husband to will everything away from his wife. Lady McLaren is part author of no fewer than eight Bills affecting her sex which her husband, Sir Charles McLaren, M.P., is introducing into the House of Commons.

Pig-Sticking in India.

What bull-fighting is to Spain pig-sticking is to India, or at least to the English garrison in that country. Formerly English residents were given to the sport of riding down bears with spears, but as the supply of bears gave out a substitute had to be found and the wild boar fitted into the place with a nicety. The boar, indeed, proved itself to be a more desirable quarry than bruin, and now pig-sticking is the premier sport in India. The fact that horses are used in the case recommends the sport particularly to Englishmen, while the elements of danger which enter into it add another attraction.

Man's Mourning.

Man was made to mourn, but probably it was never intended that he should spend much of his time at it. MINARD'S LINIMENT CURES DISTEMPER.

Lockport's Small Man Dead

He was Smallest Man in Canada, Being Less Than Three Feet In Height.

Lockport, May 27.—Edward Hupman, probably the smallest man in Canada, died yesterday at his home in Allendale, five miles from here. He was thirty-eight years of age. His height was but two feet nine inches, and he weighed about thirty pounds. He had been ill for about five months with stomach trouble, but the immediate cause of death was paralysis with which he was stricken on Sunday. Both Mr. Hupman and his parents were always adverse to his appearing on exhibition, but when the Dominion exhibition was held in Halifax four years ago he appeared there in company with his sister, who is now about twenty years of age, and of exceedingly small stature. The deceased possessed good school education, and while he had his health was a constant reader and was well versed in public questions. He was widely known in Shelburne county, and was a general favorite. He was not in the least sensitive concerning his diminutive size and mingled freely among his fellow men. During the construction of the public wharf at Lockport station he was employed as timekeeper and gave general satisfaction. The funeral will be held on Sunday.

"It cured me," or "it saved the life of my child," are the expressions you hear every day about Chamberlain's Colic, Cholera and Diarrhoea Remedy. This is true the world over where this valuable remedy has been introduced. No other medicine in use for diarrhoea or bowel complaints has received such general approval. The secret of the success of Chamberlain's Colic, Cholera and Diarrhoea Remedy is that it cures. Sold by all dealers.

MIXTURE IN BOY'S POCKET EXPLODES THREE PEOPLE HURT

Toronto, May 28—(Special)—An explosion of a mixture of chlorate of potash and sulphur in the pocket of Frank Barsottie, aged fourteen, in McCaul street last night caused serious injury to him and to Stewart Plant, aged eleven, and Miss Maud Barnett, aged twenty-one, who was passing. Barsottie's left arm had to be amputated and he may not recover. Miss Barnett had a hole torn in the abdomen and sustained severe burns, as did Plant. Barsottie had been experimenting with chemicals. Friction caused by walking and the heat of the body probably caused the explosion.

Dropsy— Given up by Doctor

"I had dropsy, and was told by my family physician that there was no chance for me. My family also gave me up. My limbs and body were swollen one-third larger than natural, water collected around my heart and I had to be propped up in bed to keep from smothering. I took Dr. Miles' Heart Remedy until I was entirely cured. This was in 1902, and I am now able to do any kind of work on my farm. My cure was certainly marvelous."

L. TURLEY CURD, Wilmore, Ky.
Dr. Miles' Heart Remedy has been wonderfully successful in relieving heart trouble. Its tonic effect upon the heart nerves and muscles is a great factor in assisting nature to overcome heart weakness.
Price \$1.00 at your druggist. He should supply you. If he does not, send price to us, we forward prepaid.
DR. MILES MEDICAL CO., Toronto.

How Do You Judge a Dairy Cow

Domination Department of Agriculture, Office of the Dairy and Cold Storage Commissioner. A dairy cow is often judged by the scale of points of the breed to which she belongs. Another method is to rate according to her general appearance and the external indications of milking powers; appearances are sometimes deceiving. Recently a farmer near Ormstown, Que., sold five cows at \$25.00 each, saying they were no good as dairy cows. The purchaser found to his great satisfaction that one gave him 10,000 lbs. milk, and another 13,000 lbs. Sometimes a cow is valued because she is easy to keep, or she is a docile family pet. Coming nearer to the practical test, a farmer may judge his best cow to be the one that daily gives a couple of pails full of milk in June; though she may quickly decrease in flow, the remembrance of that big yield sticks in her owner's mind and she is undervalued. She may have earned a wide local reputation just by one isolated test to fat very likely higher than normal. On the other hand a cow that gives only a moderate yield but attends strictly to business for a reasonably long milking period will probably prove the most valuable. Again there may be some general idea of production, but totals that are only estimated are generally in excess of the actual yield.
The positive proof of value is certainly of the cow's ability to produce milk and fat economically, the generous minded, unselfish, real dairy cow, independent of strikes and lockouts, works full time, and returns a handsome margin of profit above the computed cost of feed. The one infallible test is a record of the production of each cow for the full period of lactation. Don't average up the herd, ascertain that each cow is a specialist.

GOOD STABLE REMEDY.

A very trivial thing often times causes a horse to go lame, such as a slight wrench, a sprain, a cut, etc. These are things to be expected. They are liable to happen to any horse at any time. The lameness may cause inconvenience but it is not otherwise serious. All that is necessary in many cases is to be ready to treat promptly with some efficient remedy.

In this connection it is a suggestive thought that for over a score of years one could hardly speak or think of a horse remedy without calling to mind Kendall's Spavin Cure.

Perhaps no other single horse remedy has ever been so generally used or had so great a reputation. Almost everybody who owns a horse has heard of Kendall's Spavin Cure. Its popularity has been confined to one locality or state. It is national even world-wide. It is found on the shelves of well-posted horse men in many countries.

It is worth while to remember that Kendall's Spavin Cure has been in use for nearly half a century and its popularity is greater now than ever before. If it had not stood the test it would have been out of mind long ago. This old favorite horse liniment is on sale at drug stores and general stores everywhere. The excellent horse book entitled "A treatise on the Horse and His diseases," can also be had free at drug stores or by writing for it to the Dr. B. J. Kendall Co. at Enosburg Falls, Vt.

HAS OUTLIVED FIVE SOVEREIGNS.

Mrs. T. R. Linton, Park street, is one of the few loyal British subjects who have lived in the reigns of six sovereigns. This worthy citizen has been on our little earth during the reigns of George III, George IV, William IV, Victoria, Edward VII, George V.

KEDGEMAKOODGE LAKE.

Mr. Benson is engaged in putting up a very commodious cottage for the use of the management. It will have six large bedrooms, sitting room, dining room and kitchen, with a verandah on the front. It will be ready for occupation in ten days' time.

The new motor-boat is now ready for the engine, and does the builder, Mr. Benson, a great deal of credit. It is a fine model, and fitted up in great shape and will accommodate thirty people. Mr. J. H. Coffill, of Bridgewater, will install a Gray 10 h.p. engine in her and she will be launched sometime about the 20th of May. The Club were very fortunate in securing the services of Mr. Smith, the English chef, who can work marvels in the cooking line.

The log cabin will be started this week and rushed up so as to be ready for the American guests by the end of June.—Gold Hunter.

CHILDREN'S STYLES.

Simplicity the keynote of Modes For the Small Girl. Gingham frocks for youngsters are much in vogue, the bright combinations of coloring in the weave and the starch wearing qualities of the material adapting themselves peculiarly well to childish wardrobes.

Pique is much in favor for children's dresses, and when it does not constitute the entire garment it is used for

A MODISH LITTLE COAT. Trimming little frocks and comes in many variations hitherto undreamed of.

Pique frocks made with one piece yoke and sleeves, the square neck outlined with handmade scallops and the little dresses cut on the plainest lines by means of a circular gored pattern, never outgrow their popularity with mothers who consider simplicity a necessity of the childish outfit.

Little girls are wearing this season smart coats that are finished with deep revers collars and worn with patent leather belts. The coat illustrated can be utilized in that way or worn without a belt. In the present instance the coat is made of linen trimmed with embroidery, but the model is very useful in pongee lined with dotted foulard or serge lined and trimmed with foulard. JUDIC CHOLLET.

This May Manton pattern is cut in sizes for girls of one, two and four years of age. Send 10 cents to this office, giving number, 6824, and it will be promptly forwarded to you by mail. If in haste send an additional two cent stamp for letter postage, which insures more prompt delivery.

ATTRACTIVE TRIFLES.

Latest Cry in Neckwear—Old World Cotton Stuffs Made into Blouses.

There is no end to the variety of neck trimmings. The newest is the plaited full collar, called by some merchants the "Chantecler" to be worn around the low necked frocks. The new frill comes in lace, linen, batiste and chiffon, or one may have a hand embroidered frill or a frill with dainty colored border. These trifles are to be purchased and used as side ruffles for the lingerie blouse.

Whole blouses of quaint old world cotton stuffs are made up to wear with

THE SEPARATE TUNIC. The plain color of the suit being echoed in the slight touches on the blouse, or the blouse material finds its way into the cuffs and collar of the coat.

The separate tunic is very modish. The model illustrated is of marquisette trimmed with silk banding and is worn over a guimpe of lace, but it would be smart made of chiffon and worn over an entire silk frock. JUDIC CHOLLET.

This May Manton pattern is cut in sizes from 22 to 42 inches bust measure. Send 10 cents to this office, giving number, 6824, and it will be promptly forwarded to you by mail. If in haste send an additional two cent stamp for letter postage, which insures more prompt delivery.

MINARD'S LINDIMENT CURE FOR DIPHTHERIA.

VOGUE POINTS.

Hair High on Head Next—Black Satin Stocks Very Modish.

The modern coiffure is like the house problem in New York city. When there isn't any other place to go they build straight up. As soon as dainty woman tires of the turban that swathes her head she is going to revert to the styles of colonial days.

The black satin stock is the latest cry in neckwear, but to be extremely

GIRL'S SPRING COAT.

smart it must have a turnover or frill at the top. Cuffs matching the frill also have frills.

Close fitting upper skirts combined with plaited or frilled lower skirts will prevail among the run frocks. The round line of tulle or Russian coat falling over an all round plaiting cuts the wearer's height; hence it will be popular with tall women.

Simple loose coats are the preferred ones for the small girl during the spring and summer months. The coat illustrated can be made with several different collars. Royal blue broadcloth makes this a serviceable little coat. JUDIC CHOLLET.

This May Manton pattern comes in sizes for girls from six to twelve years of age. Send 10 cents to this office, giving number, 6821, and it will be promptly forwarded to you by mail. If in haste send an additional two cent stamp for letter postage, which insures more prompt delivery.

FIBBLES OF FASHION.

Shades of Shades. Blues are fashionable, but this term is rather inclusive. To be accurate, the shades of blue worn are navy, gobbela, delft, cadet, cell and royal blue. Think of being sent for samples of blue with trimming to match! Sleeves are of all lengths. To be sure, the long close sleeve is a trifle out, but there are many ways of add-

A GRACEFUL EVENING PROCE. This evening gown is simple and at the same time very smart. It is made of organdie and trimmed with embroidery, beadings and ribbons. The skirt is one of the most graceful of the tied-in variety. JUDIC CHOLLET.

These May Manton patterns come in sizes for the skirt from 22 to 30 inches waist measure and the blouse from 22 to 40 inches bust measure. Send 10 cents each to this office, giving numbers—skirt 6822 and blouse 6821—and they will be promptly forwarded to you by mail. If in haste send an additional two cent stamp for letter postage, which insures more prompt delivery.

10 cent and 10 cent bundles of new papers at MONITOR OFFICE.

A BOY'S STRUGGLE FOR LIFE

Mr. S. J. New, of 154 Baldwin St., Toronto, says: I can trace my son Harold's trouble to when he had the measles five years ago, from which he never really recovered. Some of the best physicians attended him, but with months of suffering he in turn contracted whooping cough, bronchitis, and then pneumonia. Months after month went by that we shall not soon forget: months of sleepless nights, fearful coughs, weakening night sweats, left my boy a mere shadow. He had no appetite, and my heart ached to see how he was wasting away. He spent one whole summer at the Lakeside Home for Sick Children, and came home greatly improved, but the cold winds of October took him off his feet again. The doctor advised me to send him to Muskoka, but heavy doctor's bills had depleted my financial resources, and such a step seemed out of the question.

"At this point we tried PSYCHINE, and human lips cannot describe the change that took place. No words can express the thankfulness of his mother and myself when we saw the crisis was over, and realized that our boy was fighting his way back to life and health. PSYCHINE had mastered that which all the doctor's prescriptions had failed to check. Day by day Harold grew stronger, and all through the winter, although continually out of doors, he failed to take cold, and he put on flesh very quickly. By the spring my son was completely cured, and developed into a strong, sturdy lad."

PSYCHINE is the Greatest Strength Restorer and System Builder known to medical science, and should be used for COUGHS, COLDS, WEAK LUNGS, LOSS OF APETITE, WEARINESS.

HAROLD NEW, Toronto

M. K. PIPER
PROPRIETOR AND PUBLISHER.

WEDNESDAY, JUNE 8, 1910.

—What we should eat, and what
deny ourselves is one of the questions
that the writers of the day are try-
ing to solve for us. Meat has been
under the ban for some time and we
are persuaded to believe that flesh-
food is the chief cause of all the ills
that human flesh is heir to. One
clique of faddists, inspired by the
well-known writer, Upton Sinclair,
would try to convince us that we
should return to the habits of our
monkey ancestors who lived on raw
food, and for which, only, they claim,
our alimentary canal is designed. Mr
Sinclair quotes instances of remark-
able improvement in health and
strength in individuals and families
living on uncooked foods. Before
starting upon it he advocates a peri-
od of fasting. He personally has
fasted twelve days twice, and start-
ing off carefully with raw fruit, juices
and milk has felt only benefit from it.
He lost in his fastings a total of
forty pounds "of very poor flesh", he
says, and after that put on "a total
of sixty pounds of the very best qual-
ity of muscle." The staple articles of
his diet are nuts, prunes, raisins,
figs, bananas, oranges, apples and
the summer fruits adding if the fancy
strikes him raw vegetables or flaked
grains.

Just as Mr Sinclair has almost
persuaded us that the human race
can never rise to its highest and best
while indulging in flesh diet and
cooked foods our new theories are
unsettled by the statements of an-
other writer of prominence in the
scientific world, Charles E. Woodruff
who contributes an article to the
North American Review, in which he
assures us that the nitrogen foods,
milk, eggs and meat, are absolutely
essential, and that "all living matter
"is an unstable compound built of
"nitrogen and needing nitrogen for
"its continued existence." Also that
"in England and other countries it
"has been found that defective de-
"velopment and what is called de-
"generation are largely due to defec-
"tive nitrogen nutriment supplied
"to the young both before and after
"birth. For many years observant
"English school-masters have noted
"the irritability of underfed school-
"boys and the deplorable condition
"of the girls, whose food is mostly
"the carbon compounds. When nitro-
"gen is increased—meat twice a day
"the children become normal. The
"same observation has been made
"with other carnivorous animals for
"we are carnivorous at least in
"infancy—and they, too, show grave
"inanity when the nitrogen is re-
"duced."

Referring to tuberculosis, Mr.
Woodruff is of the opinion that the
"most important element in
its cure, next to outdoor life, is ni-
trogen nutrition. He does not mean
stuffing the patient, but giving him a
generous diet of milk, eggs and
meat to the limit of his digestive
powers. The results are marvelous,
and leave no reasonable doubt that
the main reason why the tissues lost
their resisting powers was the fact
that they had previously suffered
from deprivation of nitrogen.

"When the scientist took up the
"work of experimental dietetics, it
"was with keen expectations that the
"medical profession looked forward
"to enlightenment—and the enlighten-

"ment we got was the new fad that
"we eat too much of the thing of
"which we are built, a fad which will
"destroy a nation as surely as it
"will destroy an army. Long before
"there was a "science" of dietetics,
"Napoleon said that an army "trav-
"els on its stomach," and every
"other man who has ever had the
"management of bodies of workers
"has said that they work on their
"stomachs. And we can apply the
"same rule to the nation and to the
"whole race.

"Though we cannot build a ship
"without nitrogen, yet, after the
"building is done, we can well reduce
"these elements; and it is surprising
"the small amount of nitrogen with
"which an old sedentary man can re-
"tain efficiency—but that is another
"story, for we are here concerned
"with the danger of insufficient nitro-
"gen until well along in middle life.
"It has been reported that within a
"year two college boys have died
"while subjecting themselves to low
"nitrogen diet, and in each case the
"physicians in attendance were of
"opinion that the lowered vitality
"from partial nitrogen starvation
"was the real cause of death. Names
"and places have been suppressed as
"a matter of course, but there does
"not seem to be any doubt as to the
"reality of the facts. So let us teach
"good feeding, and then, perhaps, we
"will not hear of so many students
"who have broken down from "over-
"work," which is too often, if not al-
"ways, "underfeeding."

"Praise up your town—don't run
"it down. Stand by your merchants
"and manufacturers—they are the
"bone and sinew of your municipal
"structure. Stand by your churches
"and your schools—they are the
"hopes of your future. Stand by
"your press—it is the tireless senti-
"nel that guards your interest."

In every live town it will be found
that the principles inculcated in the
above paragraph have been the
means of advancing its material
progress.

President Johnson of the Halifax
Board of Trade, is quoted as saying
that twenty-five men can make a
town if they are energetic and force-
ful." Doubtless twenty-five men or
even less could do much towards in-
spiring and enthusing the people with
a spirit of enterprise and progress,
but one "croaker" can block the
wheel of progress to a most discour-
aging extent. Which will you be a
"pusher" or a "blocker?"

**"DON'T CLEAR YOUR
THROAT SO MUCH."**

(From the New York Medical Record)
The impulse to clear an obstructed
air passage is perfectly natural. When
air fails to pass freely it is usually
because the passage is narrowed by
congestion and swelling of its lining
membrane. But a person thus affected
is apt to think that the trouble is
caused by an obstruction, which must
be removed by forcing through the
tube a column of air under pressure.
He, therefore, either coughs, clears
his throat or blows his nose.

The facts are about as follows:—
An extra supply of blood is summon-
ed to resist an invading foe, and ir-
ritation, swelling and secretion are
incidents of the ensuing conflict. It
may be said that irritation sounds
the alarm, swelling indicates the
presence of reinforcements, and secre-
tion provides a covered way under
which the affected part returns to a
normal condition. The removal of
mucus by the successful application
of a blast of air does not justify the
effort made, but really indicates that
a natural protection has been sus-
tained. A similar situation is seen
in the case of a cutaneous abrasion.
It would not be good practice to
wipe the part by the frequent applica-
tion of a brush. It would be better
to leave it untouched until healing
takes place under the protective coat
which inflammatory action had
brought and spread over the affected
part. When the throat is sore, inter-
ference aggravates the irritation, and
the irritation in turn prompts fur-
ther interference, forming a "vicious
circle," which calls for the exercise of
reason and self-control. Excessive se-
cretion induced by repeated muscular
effort does not prove that the case is
a severe one, and that action was
justifiable. It indicates rather that
inflammation and its products have
been increased by ill-advised exer-
tion. It is better to omit trying to
remove obstructions which do not ex-
ist, and to apply, if necessary, for
professional advice.

LUMBER MILLS BURNED.

South Maitland, June 5—The An-
thony lumber mills were destroyed by
fire this afternoon and property val-
ued at \$100,000 was burned, with in-
surance of half that amount. The
mills are the finest in Nova Scotia
with the exception of the Davison
mills at Bridgewater.

A Chat With the June Brides

(Joan in the Halifax Recorder)

There are those who say they can-
not bear to see a marriage ceremony
there is something so sad about it.
But pessimists are everywhere with
their dismal prophecies that tend to
take the vim out of life. If the young
woman has taken a comprehensive
view of her responsibilities before-
hand; if she has not rushed headlong
into matrimony through some hyster-
ical and imaginary delusion that she
is marrying a god instead of a "mere
man," her wedding day ought to be a
happy one—that day on which they
plight their troth, each to each, to
take up life together and make it the
beautiful thing it ought to be—if both
are only loyal to the underlying mo-
tives which sanctify, enoble and in-
spire the really ideal life.

Never was there a better age in
which to marry and build the home
beautiful no matter who may say the
contrary. Modern science and educa-
tion have done so much for us that
the problems of domestic economy
are made easy to the intelligent
young wife. Thanks to these, she
need no longer be the slave of house-
hold drudgery. If she is methodical
and resourceful, an economist of time
she can have plenty of leisure to keep
herself brainy and normal—never for-
getting that her most irresistible
charm is to keep intact the youthful
enthusiasm of her wedding day; and
there is no reason why she should not
do so, for ten, twenty, thirty—aye
and for fifty years, should she live so
long.

You know there are some people
who never grow old. I know couples
right here in Halifax who have been
married fifty years and they are still
lovers. I have known parents and
children who were always chums. In
such homes love strikes deep roots.
There you will find mothers who never
seem to grow old, for love has
crowned them with eternal youth.
The heart remains young, which is
the secret of those happy natures we
meet now and then and wonder how
they do it.

The wise woman will hold on to her
youth with all her might. Don't al-
low yourself to grow careless about
your personal appearance as some
women do, who seem to think that
anything is good enough for the hus-
band when they are alone. Make it a
point to always look your best at
that moment, and remember that a
shirtwaist and linen collar as in the
most elaborate dinner
dainty and fresh at the breakfast
table as you are charming and attrac-
tive when you sit opposite him at
dinner in the evening. It will have
more to do in making home the best
place of all to both of you than you
perhaps realize.

Be enthusiastic about your home.
They tell us nowadays that nothing
goes without enthusiasm. Try and be
an expert in making yours the pret-
tiest, daintiest and most attractive
of homes, over which I hope you may
be clever enough to preside with all
the gentle gracious power of a queen.

Light and Power at Cheap Rate

The time is coming when people
will get heat, light and power easier
and cheaper than they do now. The
outcome of the Bell process, lately
introduced in London, promises to be
the greatest economic fact of many a
day. It means that small cost heat can
be stored, and that all surplus ener-
gy, in any water power or steam
plant, may be converted into heat,
and stored in the house or factory,
and released as wanted for heating
water, for house heating, steam or
raising temperatures in any way. It
abolishes the use of coal, and makes
a state or province such as Ontario,
independent of Pennsylvania or
Nova Scotia. It means that the mil-
lions of horse power in the back
country can all be wired to the popu-
lated centres for heat and for indus-
try, and never be exhausted. The
conservation of national resources is
the forward policy of the day.

The proper and careful conserva-
tion of our natural resources, whether
they be our mines or minerals, our
forests, our fisheries, our vast and
unlimited water power, contained in
our rivers, streams and lakes, means
a great deal to the future of the
maritime provinces. If we are to be
an industrial and manufacturing
country, as nature evidently intends
we should be, we must save those
natural assets that we possess, take
the best care of them, and preserve
them, as a heritage for future use.

The time is coming when the vast
and unlimited power, contained in
our rivers, streams and lakes, will be
used to advantage in these maritime
provinces, in manufacturing and all
departments of industry. By the ap-
plication of electricity, heat, light
and power will be within reach of all,
and at a cheap rate. That will be a
consummation devoutly to be wished.
—Observer in Westville Free Lance.

**Real Estate
FARM FOR SALE**

Fruit and Dairy Farm of 350 acres,
in West Paradise, Annapolis Co.,
Sixty acres cultivated, balance in
pasture and wood land containing
plenty of timber and fire wood.
Brook running through pasture. This

We are showing the largest variety to be found in the county. We have all
widths from 5-8 of a yard to 4 yards.

JOHN LOCKETT & SON

LOCAL AND SPECIAL

Ripe wild strawberries were picked on the first day of June.

A sharp frost did considerable damage to tender garden plants on Saturday night.

Services will be held at St. Alphonso's church next Sunday as follows: Mass at 11 a. m.; Vespers at 3 p. m.

The Halifax Exhibition prize list has been issued and a copy may be obtained from the secretary, M. McG Hall.

It is rumored that the C. P. R. in the purchase of the Dominion Atlantic forestalled the I. C. R. which desired the road but was a little slow in acting.

Middleton has put in on trial three acetylene lamps of the Monitor make, advertised elsewhere in these columns, Middleton has at present no system of street lighting.

The marriage of Miss Winifred Mildred Banks, daughter of Mr. Caleb Banks, of Clarence, to Tracy Collins Minard is announced to take place on Wednesday evening, June 15th.

The first Tennis Tea of the season was held on Saturday last. The hostesses were Mrs. F. R. Fly and Misses Bess Hoyt and Bess Ruggles. The players found the court in splendid condition.

Master Maurice Armstrong presented the Monitor with the first sweet pea blooms of the season yesterday. They appeared in his father's garden this year on June 2nd, fully two weeks ahead of other seasons.

Beginning June 12th the D. A. R. boats Prince Arthur and Prince George will take up the summer service making four round trips a week between Boston and Yarmouth, beginning Sunday, June 26th the service will be six round trips a week.

The monthly meeting of the Town Council was held on Monday evening with the Mayor and all councillors present. Beyond the passing of a number of bills and a resolution to engage the services of a land surveyor to locate the north boundary of the town, no business was transacted.

Postmaster Brown has been notified that the petition for a Free Rural Mail Route for Clarence has been accepted and residents along the route will soon receive the boxes at a cost of \$3.00 each after which there will be no further expense, the mail carrier using the boxes to drop and receive mail daily. The district covered is from Arthur Marshall's to Ralph Williams' a distance of about eight miles, and will be a boon to the people along the route.

The Methodist Annual District Meeting is in session in Bridgetown. A public meeting was held in the Methodist church last evening at which Rev. Mr. Phillips, of Middleton gave the address. The visiting ministers are the Reverends Munro of Weymouth, Glendenning, of Digby, Phalen, of Bear River, McNeil, of Annapolis, Whitman and J. R. Hart of Granville Ferry, J. A. Hart, of Lawrencetown, Phillips of Middleton and Farquhar of Aylesford.

The official report of the Department of Agriculture says of the fruit prospects in Annapolis Valley: "Present indications are for a moderate to good crop of apples. There was a severe frost in the Annapolis valley at the end of April, which injured the fruit buds in some localities. Although the effects of the frost are not considered serious generally, the bloom is considerably shortened in some parts of the Valley." Prospects generally throughout Canada are for a fair crop, and in Great Britain for at least an average yield. In the United States it is predicted the crop will be below the average.

MARRIED

CASSIDY-MCKAY.— At Annapolis Royal, June 1st, 1910, Miss Kathryn A. McKay and Mr. Alex. Cassidy, of Kingston.

BEALS-SLOCUMB.— At Paradise, June 1st, Miss Lizzie Slocumb, of Mt. Hanley and Orrin R. Beals, of Clarence.

DIED

BORDEN.— At Tuperville, on the 31st ult., after a brief illness Maria Jane, beloved wife of Mr. William Borden, in the 41st year of her age. The unexpected death of this comparatively young wife and mother has brought deep sadness to the surviving husband and seven children, and much sympathy is felt for them by a large circle of friends.

Musical Notice

G. O. Gates and Son, Piano and Organ Tuners and dealers, will be in Bridgetown soon. Orders care of Monitor office or through the mail will receive attention.

PERSONAL

Mr. Kenneth Murdoch left last week for Vancouver.

Mr. B. M. Williams spent Sunday with his family.

Miss Jennie Manthorne leaves today for Winnipeg.

Mr. Allan Huntington, of Wolfville was in town over Sunday.

Miss Alice Cunningham, who has been ill all winter, is convalescent.

Mrs. A. C. Johnstone, of Dartmouth, is the guest of Mr. Stephen Ruggles.

Dr. Carmon Johnson, of Winnipeg, is visiting his parents at the Methodist parsonage.

Mr. N. B. Margeson, of Berwick, visited his daughter, Mrs. M. L. McLeod on Monday.

Miss Alice Ruggles, of Dartmouth, has been the guest of Miss Bess Ruggles the past week.

Mrs. H. M. Chute and daughter, Almira, are spending a couple of months in Boston and vicinity.

Mrs. Ralph Elliott and children, of North Sydney, are expected today or a visit to her parents, Mr. and Mrs. J. W. Beckwith.

Miss Georgie Tibert, who has been spending the past few months in Bridgetown, returned to her home in Freeport on Monday.

Mrs. J. H. Longmire and Miss Hazel Longmire have been spending a week with friends in Lower Granville and Parker's Cove.

Miss Emily Young, of Patterson, N. J., and Mrs. McNutt, of Truro, are visiting their father, Rev. F. M. Young, Parrsboro.— Truro News.

F. J. Burns, representing the Monitor Acetylene Light, was in town last week leaving on Saturday for St. John but will return this week.

William Huntington, of the electrical works at Scenectady, N. Y., is at the home of his mother, Mrs. Jessie Huntington, Wolfville, for a short vacation.

Mr. and Mrs. Lyman Archibald with their two children passed through the Valley last week on their way to Yarmouth where they will shortly take up their residence.

C. A. Munro, son of the late Capt. Milledge Munro, Bridgetown, who has been in Halifax for several years on the staff of J. S. Creed, left for St. John recently, where he will engage in business.

Among the young people home from the Colleges are Misses Marguerite Hicks, Florence Lee and Stella Foster from Acadia, LeMoine Ruggles from Kings, Fred Kinney from Mt. Allison and Fred Craig from Acadia.

Miss Alice Huntington, of Wolfville who has been filling a position in music in Texas, has started on her fourth trip abroad, where she takes a party of her school friends. They will attend the passion play at Oberammergau.

Mrs. T. B. Messenger and sons, Ralph and Howard, (who is ill) and Roy started on the long journey to Rosestown, Sask. on Thursday to meet the husband and father and make their future home there.— Outlook.

Mr. and Mrs. Hilton Belyea and little daughter, of St John, are visiting their uncle, Mr. J. W. Peters. Mr. Belyea is well-known throughout the provinces, being a champion oarsman and skater of New Brunswick.

Mr. Stuart Burns, son of Councillor W. F. Burns, is visiting his old home here after an absence of a number of years in California. The Monitor regrets to state that Mr. Burns who has become a prosperous building contractor of Los Angeles, has recently suffered the total loss of his eyesight as the result of an accident.

Digby Courier.— Mrs. John Murdoch, of Bridgetown, and Mrs. Gilbert Fowler, of Winnipeg, are the guests of Mr. and Mrs. H. B. Short, Queen St.— Messrs R. C. Hamilton, of Liverpool, H. D. Romans, of Bridgetown, and Mr. Mitchell, of Bridgetown, the latter a son-in-law of the late Dr. Ellison, were in Bear River to attend the funeral of the late Mrs. W. M. Romans. Mr. Hamilton was in Digby yesterday.

THE MIDDLETON DRIVING PARK CO., will give a Race Meeting on Dominion Day, July 1st, 1910, consisting of the following Sports: A 3-minute Class for Trotters, Purse \$150.00; 3-minute Class for Pacers Purse \$150.00; 2:23 minute Class for Trotters and Pacers, Purse \$200.00. A one mile Amateur Foot Race. Prize, a Silver Cup, donated by The American House.

Special Trains will be run East, West and South after the Sports have closed. Entries for the Horse Races will close on Monday, June 20th, at midnight, and for the Foot Race on Monday June 27th, 1910.

For Entry blanks and other information, apply to Fred L. Shaffner, Sec'y. Middleton N. S.

June 8th, 3 ins

County Hospital Recreation Hall Fund.

The Treasurer hands us the following receipts for publication:

- Previously acknowledged \$ 179.23
- Mrs. N. E. Chute 5.00
- Mr. N. E. Chute 1.00
- E. Miller 5.00
- R. Lloyd 5.00
- J. A. Myers 5.00
- J. Piggott 10.00
- F. Fitch 5.00
- Percy Hiltz 5.00
- T. B. Chipman 10.00
- Dr. Armstrong 10.00
- Ernest Underwood, Treasurer. \$ 240.23

In connection with the above kindly permit me to say that the building committee will be greatly obliged if subscribers will now hand in their subscriptions as soon as they conveniently can.

The work is progressing apace the frame being up as far as the plate and borden in the roof will be the next in order. This has involved the incurring of liabilities rather more than equal to the subscription list, and we want, if possible, to pay our way as we go. Besides the above several men have kindly contributed labour of which proper acknowledgement will be made in due course.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Extension to Breakwater at Hampton, N. S." will be received until 4.00 P. M. on Monday July 4, 1910, for the construction of an Extension to the Breakwater at Hampton, Annapolis County, N. S.

Plans, specification and form of Contract can be seen and forms of tender obtained at this Department, at the offices of C. E. W. Dodwell, Esq., District Engineer, Halifax N. S., E. G. Millidge, Esq., District Engineer, Antigonish, N. S., and on application to the Postmaster at Hampton, N. S.

Tenders will not be considered unless made upon, and in accordance with the conditions contained in forms furnished by Department.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, for sum of three hundred and fifty (\$350.00) dollars.

By Order NAPOLÉON TESSIER Secretary.

Department of Public Works, Ottawa, June 1 1910

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

SEALED TENDERS addressed to the undersigned and endorsed "Tender for Little Tanook Island Breakwater will be received at this office until 4 p. m., on Monday, July 4, 1910, for the construction of a Breakwater at Little Tanook Island, Lunenburg County, N. S.

Plans, specifications and form of contract may be seen at the offices of C. E. W. Dodwell, Esq., District Engineer, Halifax, N. S., E. G. Millidge, Esq., District Engineer, Antigonish, N. S., and on application to the Postmaster at Little Tanook, N. S., and at the Department of Public Works, Ottawa.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied and signed with their actual signatures, stating their occupations and places of residence. In the case of firms, the actual signature, and nature of the occupation and place of residence of each member of the firm must be given.

An accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, for two thousand dollars, (\$2,000.00), must accompany each tender. The cheque will be forfeited if the party tendering declines the contract or fail to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By Order NAPOLÉON TESSIER Secretary.

Department of Public Works, Ottawa, May 31, 1910

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.

CANADA'S STANDARD ACETYLENE GENERATOR BUILT BY THE Monitor Manufacturing Co., Ltd., Fredericton, N. B.

TESTIMONIAL

Colonial Arms Hotel, Deep Brook, N. S.

The Monitor Mfg. Co., Ltd., Fredericton, N. B.

Dear Sirs,

It gives me great pleasure to state that the Acetylene lighting plant installed by your company in my Summer Hotel here, has given complete satisfaction. It is under perfect control, and requires a minimum of attention, and the whole of my premises are lighted in the most satisfactory manner.

For a summer hotel or residence, there is nothing in my opinion to compare with Acetylene, made in a reliable generator such as the Monitor has proved itself to be, for lighting premises and grounds, in this summer land of North America.

My guests from all over Canada and the United States were loud in their praise of the beautiful bright soft light afforded by your generator.

Respectfully yours, (Signed) JOHN D. SPURR.

For particulars, write the Monitor Mfg. Co., Ltd., Fredericton, N. B.

See that Your Flour is Sound and Dry

Then, Madam, the cookbook says: *Sift Your Flour.* Do YOU know the story the Sifter tells? To beware of flour that's soft and sticky, coming out of the sack with difficulty; flour that's lumpy, misty, woolly, soft; flour that sifts quite sluggishly. To guard against the stuff you can press into a ball near solid falling into several pieces when broken, not into that fine granular dust which FIVE ROSES is. Because, Mistress Housewife, all this means "stuffy" quality plus Excessive Moisture.

Very nasty thing is excess moisture, Madam. Expensive too, you know. Since the bread-making and water absorbing properties decline, and YOU are robb'd; of many loaves per barrel, many rolls, and pies and goodies. And you pay for water instead of good flour. Since Strength and Tightness go together, don't you see?

wonderfully light and silky. Of course, Madam, flour (like all good foodstuffs) must contain some moisture. But there's Minimum and Maximum, you know. And when the moisture-danger mark is crossed say 15% then look out for molds and bacteria, for bad odors, musty, unwholesome, un-sound flour that won't keep. flour that makes "runny" dough and bad tempers. Yet FIVE ROSES, Madam, has a clean bill of health. Ground from the plump, well filled Red Fife berries sun ripened on the sun kissed western prairies. Made from soundest wheat in the best way, packed right, fully dried stored in well ventilated sunny warehouses, shipped right. And it's guaranteed unbleached. Why don't YOU use FIVE ROSES.

New Wall Papers

We do not want the Earth, but we do want the Wall Paper trade and are pleased to say we are getting it from every part of the country. We buy in very large quantities direct from the largest Wall Paper mills in Canada and U. S. making a specialty of Wall Paper, consequently we are in a position to supply the individual customer with a large variety of patterns and colorings at a lower price than the store that handles dry goods, groceries etc. in addition to a small line of wall paper. We can save you money on your wall decorations. Give us a call or write or telephone and we will call with samples
Butter and Eggs wanted at highest prices
F. B. BISHOP, Lawrencetown

Boys' Camp

There is more fun in a camp for boys than can be imagined by a person that has never been in one. The camps conducted by the Maritime Committee of the Y. M. C. A. have become so popular that it is now necessary to run them in two sections. The Directors chosen are men who are interested in the development of boys and want to see them have a wholesome good time. These men with their able assistants insure a perfect outing to the boys.
Boys from all parts of the provinces are invited to attend either section of the Maritime Boys' Camp. Section one will be held August 3-17 at Robertson's Point, N. B. The boys gather at St. John and Fredericton and go into camp by one of the river boats. The tents are on a high point and look out over Grand Lake. In the distance is seen the village of Chipman. Half a mile down the lake stands Sentinel Rock. It is an ideal place for a camp.
Rev. G. A. ... is to be the Director of this camp and Mr. Moor, the Boys Work Secretary of the St. John Y. M. C. A. will assist him. Both of these men are old campers and they know how to make good fun in camp. Mr. Moor is an expert swimming teacher and will give instructions in all sorts of water sport.
Section two of the Maritime Boys' Camp is held at Big Cove, N. S., near New Glasgow, July 15th to 29th This camp is under the direction of Rev. E. W. Forbes, who has been the leader of five camps. He too, knows how to make everyone have a good time. No boys are allowed to be back ward in the camps he leads. Every fellow has got to have a good time or he feels that the camp is not a success.
The site at Big Cove is rivaled only by that at Robertson's Point. Here, too, the tents stand on a high hill and look out over the water. But in this case the water is dotted with islands and the view is out toward Northumberland Straits. The camp has everything needed for good wholesome enjoyment. Boats and a chute-the-chute are there for the water sports, and there is an athletic field for the land games.
The Maritime Boys, Camps hold for two weeks and the cost is eight dollars. This covers everything in camp food, tent-space, boats and all. Boys may attend whether of Y. M. C. A. or not. The age requirement is that that only of or between thirteen and seventeen years of age will be enrolled. Information regarding the camps may be secured from Mr. Y. M. C. A. Secretary or from Mr. Darrell Hibbard, Maritime Secretary for Boys, New Glasgow, N. S.

Joker's Corner

WELL MET.
He rejoiced in the pleasing name of Wood, and he prided himself on his jokes and brilliant repartees. One day he met a friend whose name was Stone, and naturally a name like that was too good a chance to miss. "Good morning, Mr. Stone," he said pleasantly; "and how is Mrs. Stone and all the little pebbles?" "Quite well, thank you Mr. Wood; and how is Mrs. Wood and all the little splinters."
APROPOS.
"Darling," he breathed rapturously, "I swear by this great tree, whose spreading branches bear witness to my sincerity—I swear I have never loved before."
The girl smiled faintly and observed: "You are always saying such appropriate things, George. This is a chest nut tree."
WHEN THE WORM TURNED.
"Ugh!" spluttered Mr. Jones. "That nut had a worm in it!"
"Here," urged a friend, offering him a glass of water, "drink this and wash it down."
"Wash it down?" growled Jones. "Why should I? Let him walk!"
—Wroe's Writings.
HIS REASON.
"I'll work no more for that man Dolan."
"An' why?"
"Shure 'tis on account av a remark he made."
Says he, "Casey," says he, "ye're discharged."—The "Sketch."
"My husband never gets what he should for his poetry," said the poet's wife with a tinge of sadness. "Oh, don't be too hard on him," replied the girl, absent-mindedly.
"She is neglecting her game of bridge dreadfully."
"Why is she doing that?"
"Some silly excuse. Says the children need her, I believe."
Bride—"Here you are at last. I thought you were never coming."
Bridegroom—"There was no danger of my forgetting it. I tied a knot in my handkerchief."
Hubby—"There's another chap committed suicide because his home was unhappy."
Wife—"I daresay it will be happier now."

What Can We Afford?

The following from a recent issue of the Maine Farmer is worth passing along:
"A short time ago I heard a farmer say in all seriousness, 'I can't afford a sanitary barn, and if pushed shall have to go out of the milk business.' There is no question but hundreds feel the same and the unjust and arbitrary requirements of the Boards of Health are largely responsible for decline of their dairy work. At the same time every man wants just 'what the city officials are aiming at, that is healthy, clean and neat conditions in the barns. We are all learning that what once sufficed will not answer today, and for the reason the little seven by nine sleeping room, opening directly from the living room, and with but a single window is being discarded. More air, more sunlight for the sleeping rooms is now demanded. We are finding that sunlight is a germ destroyer and pure air an invigorator and so are opening out to receive the most of God's choicest blessing. This is as true in the barn as the house and slowly is coming. The greatest obstacle is the want of a clean, common sense idea of what is sanitary and here the rules and construction placed on the same by the Board of Health are at fault. In one city it was required 'that every cow furnishing milk for that city trade should stand upon a platform not less than eight feet long.' The man who made that rule either did not know the length of a yard stick or had never been inside a sanitary milk barn. This is only on a par with a lot of the senseless stuff printed and sent broadcast by those who assume to say what is and what is not healthy.
"On the other hand every man may have a sanitary tie-up and produce normal milk, healthy and below the bacteria count established. While the King system is the ideal for ventilation, it must be constructed by a skilled mechanic and even then is not to be relied on. Any man can stop throwing the manure out under the eaves, can whitewash the tie-up, can put in long windows and use thin muslin instead of glass, can sweep down the cobwebs and keep the floor the floor clean, can bed the cows, can wipe down the cow's sides and under with a damp cloth before milking, and certainly can have his milks clean when he milks. The whole trouble with milk comes after it leaves the cow's teats, and if conditions are all cleanly and the milk is removed as soon as drawn from the udder and put at once into clean cans where it can be kept at a low temperature there is no danger of trouble with any board of health. These officials aim at a clean product and this the farmer wants to produce. Sanitary conditions are only clean conditions made healthy at every step and this every man wants for himself, his family and his customers. Out cut the senseless frills but make the tie-up roomy, sunny, clean and sweet and good milk and more milk will follow."

3,000 YEARS AGO THE EGYPTIANS CURED DISEASE WITH FRUIT

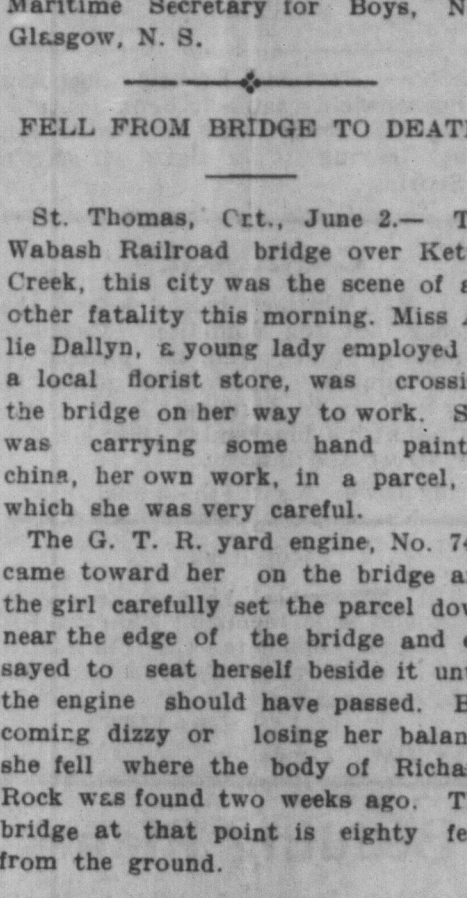

To-day, Canadians Are Doing It With "Fruit-a-tives"
—The Famous Fruit Medicine

We are apt to consider the age we live in as the most wonderful age that the world has ever known. It is, in many respects. Yet the ancients surpassed us in some things. Engineers of our 40-story sky-scrapers still marvel at the massive pyramids and the sphinx. So, too, the Egyptian physicians of 3,000 years ago, used fruit juices as a medicine for treating blood trouble, liver and kidney disease, and stomach weakness. Their method of mixing fruit juice as a medicine, is also one of the lost arts. A well known Canadian physician, however, perfected a method of utilizing fruit juices, which is one of the greatest discoveries of modern medical research. "Fruit-a-tives" is the natural cure for Chronic Constipation, Biliousness, Indigestion, Torpid Liver, Kidney Disease, Pain in the Back, Bad Complexion, Rheumatism, Nervousness, Headache and Neuralgia.
50c. a box, 6 for \$2.50, trial box, 25c. At all dealers, or from Fruit-a-tives Limited, Ottawa.
ONLY THE BEST OF THE RACE
I look for the time when we shall set apart the best and noblest men and women of earth for teachers, and their compensation will be so adequate that they will be free to give themselves for the benefit of the race, without apprehension of a yawning almshouse. A liberal policy will be for our own good, just as a matter of cold expediency; it will be an enlightened self-interest.—Elbert Hubbard.
MINARD'S LINIMENT RELIEVES NEURALGIA.
BEARS NUMEROUS
Guysboro, June 1.—Bears are becoming very numerous in this section of the Province. This spring they have been unusually bold and are proving a great nuisance to farmers in this neighborhood. They have so far killed fourteen sheep for the farmers within five miles of Guysboro and notwithstanding every effort to shoot or otherwise trap them not a single snout has yet been bagged.
From the different sized tracks it is estimated that at least four bears have assisted in the depredations and stock raisers are alarmed.
Lame shoulder is almost invariably caused by rheumatism of the muscles and yields quickly to the free application of Chamberlain's Liniment. This liniment is not only prompt and effective, but in no way disagreeable to use. Sold by all dealers.
SEVEN DEGREES OF FROST IN THE WEST.
Growth of Wheat Checked, but Good Weather will Save the Crop.
Winnipeg, June 1.—The thermometer dipped last night all the way from thirty-two in Winnipeg to seven degrees of frost at several other points in Manitoba and Saskatchewan. The growth of the wheat has been checked on top, with the consequence that it has stooled out forming unusually strong plants. Thus the prospects for the crop are by no means pessimistic, and a prolonged spell of good growing weather is needed now to bring the crop along.

FELL FROM BRIDGE TO DEATH

St. Thomas, Ont., June 2.—The Wabash Railroad bridge over Kettle Creek, this city was the scene of another fatality this morning. Miss Allie Dallyn, a young lady employed in a local florist store, was crossing the bridge on her way to work. She was carrying some hand painted china, her own work, in a parcel, of which she was very careful.
The G. T. R. yard engine, No. 749, came toward her on the bridge and the girl carefully set the parcel down near the edge of the bridge and essayed to seat herself beside it. Until the engine should have passed. Becoming dizzy or losing her balance she fell where the body of Richard Rock was found two weeks ago. The bridge at that point is eighty feet from the ground.

Excels for making

PURITY FLOUR
Chamberlain's Cough Remedy is sold on a guarantee that if you are not satisfied after using two-thirds of a bottle according to directions, your money will be refunded. It is up to you to try. Sold by all dealers.

Excels for making

"A passive treatment is the only thing possible for the really ill, the convalescent, too, weak for exertion" says Jane Williams, M. D., in Woman's Home Companion for May. "Nature will do wonders for a patient who will lie out of doors on a cot or in a hammock, protected from drafts and the direct rays of the sun, just breathing in fresh air. But when physical strength will permit it, some form of outdoor occupation will be much more beneficial, and a congenial occupation that can be pursued with enthusiasm is infinitely better than mere exercise."
"Agreeable work, performed in the proper environment, is at present acknowledged by competent authorities to be the most potent weapon we have in fighting disease of the nervous system. There are several large sanatoriums in which this principle is observed, and they are doing most satisfactory work: Lace-making, the hand weaving of rugs, portiers and all kinds of art fabrics, clay modeling solid work and their similar occupations are successfully carried on in great airy rooms or in the open air. If ingenuity and persistence were used to the utmost we would be surprised to find how many indoor duties might be transferred to the open. Men and women would find that it had been the confinement itself, that had so undermined their health."
Chamberlain's Cough Remedy is sold on a guarantee that if you are not satisfied after using two-thirds of a bottle according to directions, your money will be refunded. It is up to you to try. Sold by all dealers.

Makes Hair Grow

Mr. Warren has an invigorator that will grow hair or money back.
The time to take care of your hair is when you have hair to take care of.
If your hair is getting thin, gradually falling out, it can't be long before the spot appears.
The greatest remedy to stop the hair from falling is SALVIA, the Great American Hair Grower, first discovered in England. SALVIA furnishes nourishment to the hair roots and acts so quickly that people are amazed.
And remember, it destroys the Dandruff germ, the little pest that saps the life that should go to the hair from the roots.
SALVIA is sold at Warren's Drug Store under a positive guarantee to cure Dandruff, stop falling hair and Itching Scalp in ten days, or money back. A large bottle costs 50 cents. The word "SALVIA" (Latin for sage) is on every bottle.
A FATIGUE PRODUCER
Chicago, May 10.—A half dozen drinks of whiskey in a day will produce the same effect of fatigue on brain and body as a day's hard work. This has been proved by experiment, according to Dr. William J. Wick, in an address to the Chicago Medical Society.
"Alcohol actually tires the muscles the nerves and the brain," he said.
"A man who had rested an entire day, vigorous and fresh, was put at hard labor. At the end of the day he was subjected to physical and nerve tests to prove the extent of the fatigue."
Then he rested another day and was given six drinks within the day, doing no work. The second examination showed his body and nerves had undergone the same fatigue as on the day he worked.

That's Quality-Insurance
You can be sure of getting all the hat-value you pay for when the maker's name stands for money-back-if-you-say-so. That kind of quality insurance is in every hat with that trademark—look for it.
THAT brand is style insurance, too—it certifies to up-to-date modishness, correct, seemly, COMFORT for your head—looks—wear—money's worth—these make it worth while finding the right hatter. He sells WAFER-LITE HATS
A. A. ALLAN & CO., Limited, TORONTO Wholesale Distributors

Pure, Rich Indian Tea and Fine Young Ceylon Leaves—this is all that enters the Morse package.

That is why it makes so many cups of strong yet delicately flavored Tea.

Philanthropy That is Needed

Principal Fearon Makes a Strong Plea for These Afflicted Children.

To the Editor of the Halifax Herald: Sir.—I should like to call attention to the great need there is in these maritime provinces of a school for feeble-minded children. I feel sure if the members of the government and the people realized how great this need is that steps would be immediately taken to establish such a school.

I have taken opportunities—perhaps greater than any one else in the province—of coming in touch with these feeble-minded children, as the parents, hearing of what our school is doing in teaching the dumb to speak, apply constantly in the hope that something may be done for their more afflicted children.

A deaf or blind person, though uneducated, is to a certain extent self-reliant, and instances are known to us all of such persons passing useful lives and earning an honest livelihood, but the feeble-minded child is a constant burden to the mother and often to such an extent that the home and other children are neglected.

If I could make the women of this province realize what the mothers of these feeble-minded children suffer and tell them of their wearying watch from morning to night in the presence of their helpless condition, I feel sure they would make a combined effort to have a school established.

Elsewhere over the civilized world such schools exist, and these feeble-minded children, far more afflicted than the deaf or the blind, are helped and cared for. Here, unfortunately, they are allowed to grow up to drift into sin and crime and reproduce their type, and in the end cost the people probably five times as much as would be required to support a school. The people of Nova Scotia are justly proud of their many philanthropic institutions, but none is more needed at present than a school for feeble-minded children.

J. FEARON, Institution for the Deaf and Dumb.

FIRST GRADUATES OF NOVA SCOTIA'S "TECH"

At the closing exercises of the Nova Scotia Technical College Wednesday afternoon the following students received diplomas in Civil and Mining Engineering, the first graduates in the Institution.

Civil Engineering—F. R. Archibald, Halifax; Clarence L. Dimock, Upper Newport, Hants Co.; Francis M. Dawson, Truro; Edward S. Kert, Truro; E. L. Thorne, Jr., Dartmouth; Walter Putnam, Maitland; A. J. MacAulay, Glace Bay. Mining Engineering—T. W. Hardy, Jr., Halifax; N. W. MacKay, Balmoral Mills, Colchester Co.

Minard's Liniment

is the best remedy known for sunburn, heat, rashes, eczema, sore feet, stings and blisters. A skin food!

All Druggists and Stores—

ANNIVERSARY OF GOLDEN WEDDING UPPER CANARD

(Kentville Advertiser)

The following marriage notice of half a century ago will be of much interest to many of our readers, particularly in Eastern Cornwall.

"At the Baptist church, Windsor on May 28th, 1860 by Rev. D. M. Welton, J. Stanley Eaton to Janet, daughter of the late Peter Nicholson of Bridgetown, formerly of Westport, Scotland."

The participants in the above announcement are residing in Upper Canard, and tomorrow they will quietly celebrate their golden wedding. The pastor who performed the marriage ceremony, Daniel M. Welton, D. D., passed to his reward many years ago. Mr. Eaton is the last surviving member of his family, and Mrs. Eaton has but one sister Mrs. Angus Caverhill of York Co., N. B.

Both Mr. and Mrs. Eaton are enjoying fairly good health. They have four children: Clarence, in Portland, Me.; Mrs. Dr. Lowden of Auburn, R. I.; Walter who resides on the farm at Upper Canard, and John, of Boston, Mass.

St. Mary's, N. B. Feb. 18th, 1910.

Mr. R. W. Foster, formerly proprietor of the largest livery stables in Fredericton, and now of St. Mary's says: "When Empire Liniment was first recommended to me I had but little faith in it and considered it in the ordinary class of liniments—no good. I soon had occasion to use it on a valuable horse and the results were wonderful. It made a cure and my faith grew. Shortly after, I fell from the bridge spanning the St. John river to the ice below and landing on my back and shoulders, severely injured my spine. I was treated by the best doctors in Fredericton without getting any better. Then I tried every liniment recommended for the purpose in vain and came back on Empire purchasing from Mr. F. W. George, of St. Mary's and the result was a perfect cure. You may use this as you like as it is a statement of facts.

I can certify that Mr. Foster's statement is true in every respect. I had a personal knowledge of Mr. Foster's case and his cure by Empire Liniment was nothing short of marvelous.

(Signed) F. W. GEORGE

Athletic trainers will tell the players, if common sense doesn't, that they cannot get out and play as good a game of base ball after eating a hearty meal as they could if they contented themselves with a light lunch before a game, or no food at all. Eating, particularly overeating, dulls his thinking mechanism and takes away his speed.

"Back in the old days—the good old days gone some like to call them—the manager of a ball team had to stand for drinking and everything else by his players, but times have changed, and the hard drinker is a rarity among ball players now. But the manager still has the husky athletes' fondness for the good things of the table to fear, and consequently if he is up to the minute he will watch his players grub list as closely as he does their nelding and batting.

GOOD START ON C. N. R.

Montreal, June 2.—William MacKenzie, President of the Canadian Northern Railway, who arrived today from London, stated this evening that during the present year the Western end of the railway would be well underway, the distance pretty well covered between Edmonton and the Rockies, a good start made on the section around the North Shore of Lake Superior, and that he hoped before four years had expired the entire main line would be completed from Montreal and Toronto and the Pacific Ocean.

"Who are the most delightful and sympathetic people you know? The ones, I will warrant, whose lives are a part of the mainland of human life, who, when they meet you, are not eager to tell you of their health and their affairs as they are eager to know about yours. And the most entertaining and charming conversationalists? They are not those who tell you about themselves; they are those who interest you in things outside themselves, and yourself. And the most beautiful lives? The rule applies here, too. They are those which have forgotten themselves in love for others."

WRECK OF "COLBORNE"

FAMOUS DISASTER OF 1838 COST FORTY-THREE LIVES.

Only Twelve of Vessel's Company Ever Touched Land Again—Two Hundred Thousand Dollars in Specie Went Down and an Immensely Valuable Cargo of General Merchandise.

Throughout the two old provinces of Canada there was in the year 1838 no name better known or more frequently mentioned than that of Sir John Colborne.

The uprising against the Government that had broken out in 1837 flared up again in the following year, and Sir John, as commander-in-chief of the forces in Canada, was the man of the hour.

Before his military operations the flame of insurrection was soon stamped out, although it has been charged that on some occasions he was unnecessarily severe.

However, that is not under consideration here. In order that he might have a table service in keeping with his high position, and style of living, he caused to be sent out from England a valuable collection of silver plate, and by a rather remarkable coincidence the plate was shipped on a vessel that bore Sir John's name, the Colborne, of Hull, England.

The Colborne was a barque of 350 tons, commanded by Captain Kent, an experienced seaman. During August, 1838, she took on her cargo at London, and considering the smallness of the vessel, it was one of the most valuable cargoes ever shipped out of the Thames, consisting of general merchandise, wines, spirits, sperm oil and spices.

Besides this Sir John Colborne's valuable plate, a large collection of costly ornaments for churches in Lower Canada and £40,000 in specie in boxes, each box containing one thousand sovereigns. A large portion of this money belonged to the Government, and much of it was intended to be used in paying the troops in Canada. Some of the gold was for the Canadian banks.

The crew of the Colborne consisted of seventeen men, and besides the crew there were thirty-eight passengers. Among the passengers were a number of British officers going out to join the forces in Canada, and their wives and children—Capt. Jas. Elliott Hudson, his wife, five daughters and four sons; Mr. Wm. Walker, of the Royal Navy, brother-in-law to Capt. Hudson; Capt. Bucket and wife, and others of like rank. A number of Canadians were also on board—Mrs. W. Scollie, of Hamilton, Ont.; Mrs. Wilson, of the same place; Mrs. Keast, of Toronto; Mr. George Manly, deputy sheriff of Quebec, and others.

The passengers were, with few exceptions, persons of means such as to-day are to be found in the first-class cabin of an ocean liner.

On August 30th the Colborne sailed from London.

The wind was favorable, the Colborne quickly passed down the Thames, and was soon at sea buffetting with the waves of the Atlantic with her bows turned towards the distant shores of Canada.

The Colborne never again entered port. She reached Canada, but only to be stranded on the rock-bound coast of the Gaspesian peninsula.

Of the fifty-five souls who sailed on the Colborne out of London harbor, only twelve ever set foot on land again, and the greater part of her cargo of gold and silver plate and valuable merchandise went with the forty-three victims of the wreck to the bottom of the Bay of Chaleur.

On the night of October 15th, forty-five days after sailing from London, the Colborne was well in the Bay of Chaleur and close to the Gaspesian coast.

Her destination was Quebec and, therefore, instead of being in the Bay of Chaleur, she should have been passing up the Gulf of St. Lawrence. That she was so far out of her course shows that a fatal and inexcusable error had been made in the reckonings.

MINARD'S LINIMENT OURES PAIN

Paradise

Miss Minetta Longley visited at Melvern Square recently.

Mrs. Alken and children of Falmonth, are visiting her parents, Mr. and Mrs. E. K. Leonard.

Miss Pearl Morse, of Lawrencetown visited at the Parsonage recently.

Revs. Mellick and Wallace exchanged pulpits on Sunday last.

The canker worms are working vigorously in some orchards in this vicinity.

Mr. Blakeney, of Acadia, has been a guest of Rev. and Mrs. L. F. Wallace.

Miss Ada McCormick spent the week end in Bridgetown.

Road work is being carried on this week under the supervision of F. S. Darling.

Roy Balcom and Reginald Bishop, of Acadia, are at home.

Mrs. Zwicker and Miss Zwicker are visiting Mrs. H. E. Banks.

Miss Beeler, of Bridgetown, has been a guest of Miss Nettie Covert.

Mrs. Harding, and daughter, of St. John are guests of Mrs. G. L. Pearson, on their way home from the Acadia closing.

Rev. and Mrs. Haddon Balcom welcomed a daughter on the 4th inst.

Belle Isle

Mrs. S. Clopton, of St. Louis, Mo., is visiting her aunt, Mrs. Almon W. Parker.

Mrs. Morris, of Gilbert's Cove, Digby Co., is visiting her father, Mr. Robert P. Gesner.

Miss Janie Nelly, who has been spending the winter with relatives in Boston and vicinity returned home last week.

Miss Fannie Dodge, who has been visiting her sister, Mrs. Jos. McLean at Bridgetown, returned home last Saturday.

Mr. and Mrs. John Bent, of Fluperville, spent last Sunday the guest of Mr. and Mrs. Herbert W. Bent.

Mr. and Mrs. Joseph Graham are receiving congratulations—a daughter.

Fruit predictions, in this section of the Valley, say a half crop. The outlook is not encouraging at present, & a sharp frost here on last Saturday night did considerable damage to early garden plants in this vicinity.

Wolfville

Mr. and Mrs. Nelson Hatt left on Saturday for a two weeks visit in Lunenburg Co.

J. E. McAloney recently sold a calf four months old weighing one hundred and seventy-five pounds.

Mr. and Mrs. Robert York, Mr. and Mrs. Edgar York arrived here on Saturday for the summer.

The first rose of the season was picked from Mrs. L. A. Allen's rose garden on June 3rd.

Miss McKay, of Halifax, is spending a little time with her friend, Mrs. E. M. Archibald.

Mr. James Evans expects to move into his river side cottage soon.

Miss Carrie Spurr arrived home from Mr. Allison Ladies' College June first.

Mrs. G. E. Spurr and daughter drove to Kingston on Monday to visit Miss Magee who is ill.

Mr. and Mrs. E. M. Bartheaux spent Sunday in Greenwood, the guest of her sister, Mrs. Spinney.

Hampton

On Saturday last, Judson Foster went to Karsdale to visit his father, J. V. B. Foster. The aged gentleman had a shock a few weeks ago and is not likely to get about again.

Elias Messenger and wife have gone to Boston, where they have secured positions in a summer hotel.

On Saturday last Miss Ethel Farnsworth presented the writer with some ripe strawberries.

Mrs. Snow and Sabean have got their well in St. Croix Cove, and are probably getting their share of salmon.

Capt. Reuben Chute and Frank Chute of Phinney Cove, have put in a weir to the westward and are catching some salmon.

The rain of last week was a great boon to the grass and grain, but has somewhat delayed the finishing of getting in the crops.

Miss Taylor, of Aylesford, was visiting at Mrs. Reed Farnsworth's last week.

Frank Messenger has gone to St. John to join his ship.

MINARD'S LINIMENT RELIEVES NEURALGIA.

Bear River.

Mr. and Mrs. Charles Garnham, Annapolis, spent a few days in town the guest of Mr. and Mrs. Wm. Morgan.

S. S. Bear River sailed for St. John on Monday.

Miss Hattie Woodworth is being instructed in the art of telegraphy by Miss Fiske, the operator at the W. U. office.

The Bear River Hotel is receiving a new coat of paint.

Miss Jennie Phinney arrived home last Wednesday, somewhat improved in health.

Capt. A. H. Borden and wife, of Halifax, were guests at the Bear River Hotel on Monday. Capt. Borden was here for the purpose of instructing the Boys' Cadet Corps.

Mr. W. R. Rice is erecting a new building on Water street.

W. E. Reade, Esq. went to Wolfville on Tuesday to attend Grand Lodge (Masonic) in an official capacity.

Mr. W. H. Smith was in town on Monday.

Miss Myrtle Miller arrived home last week on a short vacation.

Mrs. M. E. Smith returned to her home at Port George last Friday.

The students from Acadia College at Wolfville arrived home last week. About a dozen of Mr. Atlee Clarke's classmates accompanied him as his guests, and are enjoying an outing at Lake Mulgrave.

On Sunday, after a very short illness, Mary, wife of Frederick Cashman, passed away, suffering from tetanus, leaving to mourn their loss a husband and two children, her parents, Mr. and Mrs. Alfred Doucette, and one sister. The circumstances are particularly sad. Mrs. Cashman had been at work cleaning up her new home, which they had purchased a short time ago, and the necessary repairs having been effected, moved into the house on Thursday last. While eating dinner on Saturday she was attacked with lock-jaw caused by a splinter in her thumb.

Schr. King Josiah arrived on Sunday to load lumber for New York.

Rev. I. Phalen went to Bridgetown on Tuesday to attend the yearly District Meeting.

Clarence.

On Wednesday evening there was a very pleasant reception given to Mr. and Mrs. Oran Beals at the groom's home, where about fifty invited guests assembled to partake of a sumptuous repast, while outside guns horns and vocal strains filled the air. The bride was the recipient of a number of presents both pretty and useful. After spending a very pleasant evening the guests departed wishing Mr. and Mrs. Beals a long and happy life.

Mrs. Ruth Beals and daughter, Mary, are moving to Lawrencetown this week.

Mrs. Freeman Fitch spent a few days at Wolfville, attending the closing exercises at Acadia. Mr. Hallie Fitch, student at Acadia, has returned home for the summer.

Rev. Mellick, of Lawrencetown, exchanged pulpits with Pastor Wallace.

The Women's M. A. Society will meet in the vestry on Tuesday, June 7th and in the evening there will be a public missionary meeting. Rev. Mr. and Mrs. Wallace and Rev. Mr. and Mrs. Mellick are expected to be present the latter to speak on the North West Mission. As the close there will also be a ten-cent luncheon served.

Orange blossoms and wedding bells in the air.

St. John's

There will be a Mission Band concert in the Baptist church on Sunday evening, June 12th. A cordial invitation is extended to all.

Miss Lizzie Slocumb, of this place, and Mr. Orin Beals, of Clarence, were married last Wednesday, June 1st, 1910.—Congratulations.

Mrs. J. N. Harris spent last week at Clementsvale attending the S. S. Convention there.

Miss Francis Eaton is at Wolfville for a few days.

Mr. J. N. Harris has been very busy with his fish weir the last few weeks catching salmon and other fish.

Mr. George Brown and wife and family from Massachusetts, are the guests of Mr. Charles Bartheaux for an indefinite period.

Miss Mabel Hines is slowly improving in health.

C.P.R. interests have purchased for \$900,000 the debentures of the Midland portion of the D. A. R.

Port Wade

A party from Annapolis visited this place on Friday last, coming by train and buckboard.

The extensive works of MacKenzie & Mann and the Canadian Iron Co., are causing quite an interest here. The large engines for handling the ore are being installed. The large ore pocket will be finished in a few weeks and as soon as this is done the C. I. Co., will begin shipping. Carpenters are still in demand.

Mrs. Walter Barnes and two children, of Digby are visiting with Mrs. Kerdall.

The Ferry Boat 'Port Wade' made a special trip Saturday evening when a number of the workmen here availed themselves of the opportunity of a visit to the City of Digby.

The tern schooner, F. G. French, Capt. A. Holmes, cleared from this place Friday for St. John to load lumber for Boston.

Frank Walsh, of Londonderry, Colchester Co., had his foot severely jammed Friday by a mud sill falling on it. Dr. Smith attended the injury.

The fishing fleet of this place this summer is as follows:—The 'Albert Lutz', Capt. Apt., 'Claude Daley', Alex. McGrath, 'Wilfred L.' Johnson, 'Emerald', McWhinnie, 'Elmer', White 'Falcon', Casey, and three power boats owned by Messrs. Mussels, McWhinnie, Hayden and Kinghorn, making the largest fleet from this place for years. The weather has been quite rough this spring so that no record trips have been taken.

CAN YOU AFFORD IT?

Does it ever pay to get angry? Not from a moral but from a physical standpoint, I mean.

I know a man who says he is done up or a week if he allows himself to get thoroughly angry, and although that is an extravagant case I don't believe it's a unique one.

If people realized how much vitality they lose by fits of temper, it seems to me they would be more careful how they gave way to them.

No one who has much to do in the world can afford to be angry or hate because he needs his energy for other things.

People fancy when they are tired out that their vitality is all due to overwork, but I fancy no doubt but that hurry, worry and hate do more ravage to many people's vitality than any output of honest energy.

Never let a child say "I hate" unrebuked.

Explain to him besides the moral objections, the utilitarian one that if he hates anyone he gives that person a power to move and wound him, and thereby exalts him.

Every hate you harbor is a weakness, a chain forged about yourself and the key given over to him you hate.

Teach the child that indifference is a far healthier, saner feeling than hate.

Teach him to say, and try to teach him to feel, the negative "I don't like" instead of the positive "I hate". And while you are teaching him, suppose you also be your own pupil.

—Ruth Cameron.

GETTING BACK

Again and again it is discussed—why the young people come to the city, and leave the farm forlorn—and no satisfactory conclusion is ever reached. It seems as if there were faults or failings on both sides and as if the clash were inevitable.

A girl who is working in a large store in a Canadian city recently gave up her position to go back to the farm, declaring herself in this fashion.

"I think we've both learned a lesson—Daddy and I've found out that there's no place like home, and that the only people who really care about you are the ones who have always known you. They may tell you of your weaknesses and shortcomings but after all, it's a comfort to have someone take an interest in whether your hat is on straight, or what kind of suit you're going to have for the spring. The difficulty was all about money and I wanted my own. Daddy wouldn't see that I was grown-up and deserved to be paid for my work. It was always nag-nag-nag to get a cent from him, yet he did not intend to be mean. He just did not understand. My brothers had money when they wanted it, but, though my work was worth just as much to the farm, it was never recognized. However, things are to be different. I'm to have an allowance and oh, I'll be so glad to get out of this noise and back to the farm."

There cannot be a pleasanter home in the land than the farm, if the powers which rule the homestead merely recognize the principle that the laborer is worthy of his hire, even when the laborer is a feminine relative.

NEW C.P.R. SCHEME

Improved Lands in West Prove a Big Inducement.

The first active step in the settlement of farmers from Great Britain on the improved farms of the Canadian Pacific Railway Co. in Alberta, under the new policy inaugurated by Sir Thomas Shaughnessy during his visit to Great Britain in the early part of the year, was realized by the arrival on the Empress of Britain at St. John with a party of 170 people from Great Britain to go into occupation on these farms.

The new policy of the company involves the improvement of farms varying in size from 80 to 100 acres. On each of these farms the company breaks and cultivates 30 acres and puts it in crop, fences the farm, puts down a well and erects a small house and barn, the cost of these improvements being added to the list price of the land, and the purchasers given ten years in which to pay for the land and improvements.

In the colonization of the West, it has been found that the American or Canadian farmer is not afraid of pioneer conditions, and is prepared to take possession of a prairie farm and immediately proceed to make his own improvements, living in a tent or temporary shelter until he can get a house erected.

Settlers from Great Britain and Northern Europe are not accustomed to pioneer conditions in the West, and settlement by this class has been deterred owing to the fact that they were unacquainted with those conditions, and were afraid of the hardships resulting therefrom. To meet this condition, the new policy of the company has been organized, and the success so far met with indicates that the number of people who can be brought out to occupy improved farms is only limited by the number of farms which can be got ready for them.

Anyone who had seen the first party which arrived on the Empress of Britain would have been struck by the appearance of these people, and by the fact that they are of a class which, up to date, Canada has been obtaining a very small number.

The company makes it a rule that these improved farms are only sold to married men who have had previous experience, and the fact that on their arrival in Alberta they can at once move on to a farm with some crop in the ground, and with a comfortable house in which to settle their belongings, as well as a barn for stabling the horses and cattle that they will immediately buy, makes their chances of success very much greater than it would be were they simply turned loose on unimproved land.

The new policy of the company is the first of its kind which has been tried in connection with the colonization of railway land in America, and its inauguration has probably attracted more attention than any scheme since the tide of immigration began.

Toronto Boy for South Pole.

One of the physicists who will accompany Capt. Scott on his British expedition in search of the South Pole this year is Mr. C. S. Wright, an old Toronto boy, who has been working the last two years in Canada under Prof. E. J. Thomson in the famous Cavendish Laboratory.

Mr. Wright was educated at Upper Canada College (head boy 1904) and the University of Toronto, where he took first-class honors each year, and finally won the B.Sc. exhibition scholarship. He is the second son of Mr. Alfred Wright, Canadian manager of the London & Lancashire Fire Insurance Co. The work of the physicists, Dr. Simpson and Mr. Wright, will comprise the usual meteorological and magnetic work, and in addition a survey of the currents and conditions in the upper atmosphere will be attempted by sending up specially constructed balloons carrying instruments for registering the temperature and height. Work on ocean currents, atmospheric electricity, radioactivity of the sea and air, salinity of sea water and analysis of the atmosphere will also be undertaken.

Another point to which Mr. Wright intends to devote considerable attention is the investigation of the crystal structure of ice from the point of view of its age and past history. Should any simple relation be found connecting the crystal structure and the age of ice considerable light would at once be thrown upon the origin of the great ice barrier—that vast floating ice sheet, 200 feet high, 200 miles long and of unknown width, which has so long puzzled the mind of the geologist.

The Singing Mother

"I love to hear mother sing," said a daughter. "It sounds cheerful and pleasant, and as if her work were not crushing her, though she is always so busy."

This daughter was old enough to notice the sweet sound and to reflect upon it, but the singing mother also influences the younger ones, unconsciously of the reason for their happier feeling. There is a soothing and uplifting spell about mother's voice that has nothing to do with technicalities or training. The love-taught tone is in itself a potent charm.

The mother who sings softly about her work is helping to mold her child to gentle manners and cheerier ways, when both mother and child are wholly unaware. Very little children will not think of the words or understand them when mother sings a familiar hymn, but the tune will have its effect, and the atmosphere of harmony will be felt. Small children who are too young to reason, will be vaguely conscious of mother's mood, and will know, without understanding it, that mother is not "cross," or she would not sing. If mother does feel too vexed and troubled to sing spontaneously, let her make herself sing a verse of "Count Your Blessings," and then she may feel like keeping on. Older children will by and by take some heed to helpful words, and the tuneful utterance of faith, love and hope will find its way into the heart and memory as a lasting influence. The very sound of a familiar air will call up sacred words with power long afterward, and perhaps in strange places.

Most mothers sing lullabies to their children; but, besides crooning the slumber songs, if they will sing as if to themselves sweet words and tunes about the daily tasks, the effect will tell upon child-life, pervasively and permanently. The sweetest echo that lingers in memory's chambers for that some of us is that of mother's voice, in psalm or hymn singing about her work.—Lois Tilden.

Crushed Coffee— what is it?

By a new process of crushing between steel rollers, instead of grinding, the skin, which remains in the eye of the bean after roasting, is separated from the kernel and removed by air suction, while the kernel is broken into small even grains. These grains when steeped, being free of the skin or chaff, settle quickly, leaving the liquid clear and bright, and give the true coffee flavor.

Estabrooks' Red Rose crushed Coffee is as easy to make as Red Rose Tea. Directions are in each tin.

It is strictly pure, not a particle of chicory or any other adulterant being used, and is packed in air-tight tins the same day it is roasted so to retain its full flavor, fragrance and strength.

A good combination is Estabrooks' Coffee for breakfast and Red Rose Tea for other meals.
