FACULTY OF THEOLOGY.

SYSTEMATIC THEOLOGY.

The business of this Class during the last Session has been conducted, to a great extent, through the medium of Text Books, on which the students were subjected to a close examination. Two Lectures (occasionally more) illustrative of, or supplementary to, the Text Books, were delivered weekly, on which also the Students were examined ; and the first five chapters of the Epistle to the Romans were read in Greek, and accompanied with critical and expository Lectures.

The Text Books were :—

- I. Butler's Analogy. This work was studied throughout, the students being examined daily on a prescribed passage, and afterwards giving in a written analysis of it, which was read and criticized by the Professor.
- II. Hill's Lectures in Divinity. Three books were studied, comprising the first half of the work. Of the first book, on the Evidences of Christianity, a carefully written analysis was given in by each student.
