PARLIAMENT.

OTTAWA, April 9.-The house re-umed business today after recess and ames Halliday, member elect for North Bruce, was introduced amid James North loud opposition applause. Mr. Borden, Halifax, asked Premier Laurier to bring down papers in con-nection with the Mackenzie-Mann claim, proposed in the house early in March. Hon. Mr. Fisher's fruit bill was referred back to a committee of the whole, and a proposal was made to extend its scope so as to regulate the packing of all fruits instead of apples and pears, as at first sug only gested. This resulted in considerabl opposition, as the term fruit was in definite and that the operation of the law would be rendered difficult, and s was inserted which provider that the term fruit shall not apply to ild fruits. The bill passed its se ut the clause mhich that the informant receives one half of the penalty in cases where fines are imposed. The third reading will take place tomorrow.

OTTAWA LETTER. Restricting the Importation of Alien Labor.

Swinging the Axe at Bidding of Heelers.

Even Suspicion of Having Conservative Leanings Means Dismissal from Office

While Civil Servants Who Stump for the Machine, to the Neglect of Their Official Duties. Are Richly Rewarded.

OTTAWA, April 3.—The opposition had considerably better of the argu-ment yesterday afternoon in connec-tion' with the debate on the government measure introduced by Sir Wiltrid Laurier to amend the act restrict ing the importation of alien labor. Early in the session several bills were laid before the house in regard to this matter, and a lengthy discussion took place as to the best means of enforc-ing regulations which would have the effect of protecting Canadian work-men and Canadian interests. It was own that there was every need for a law which would be open to enforce ment, and the premier promised to introduce a bill which would meet the views of the different parties interest-Yesterday it came up for its sec and reading, and went before the se as a committee of the whole Sir Wilfrid fully explained the provisions of the act and pointed out that en amended it would meet the views of manufacturers who now em-ploy considerable alien labor in cerbranches, as well as those of labor unions. The labor unions, the labor unions. The labor unions, according to the premier, had been in-terviewed and had passed upon the features of the aot, but later it was admitted that the bill had never really been placed in a formal way before labor representatives.

The principal feature of the bill i clause which sets forth the meththe clause which sets forth the meth-od of procedure that shall be adopted in cases where violations are suspect-ed. At present the Canadian law is so cumbersome that it is almost im-possible for a private individual to enter a complaint for any breach of it. It requires the plaintiff to first obtain the consent of the attorney general of Canada to bring on his case, and then it must be tried in a superior court. This latter provision, owing to the excessive cost involved, makes it almost impossible to obtain justice in a large province, where the complainant has to carry his cause to the capital town or await the regular own district. In cases where a con-tractor comes from the United States and engages large numbers of American workmen it was almost impossibl to get at the offender, who would com plete his work and return home be Core action could be taken in his case. What is wanted is a law under which justice swift and sure can be meted out, and with a law in Canada similar to that in the United States it is fel that such results could be obtained. Sir Wilfrid's bill provides that in cases of a violation, the plaintiff, in-stead of appealing to the attorney general of Canada for permission to commence action, shall obtain the written consent of the attorney gen-eral of the province in which the offence was committed, or a written consent of any judge of the court in which the proposed action is intended to be brought. The penalty fixed for a violation of the law is largely left to the discretion of the officiating judge, who may impose a fine not ex-Sir Wilfrid's bill provides that in dige, who may impose a fine onto a the eding one thousand dollars hor ies an fifty dollars. Under the presen it the penalty was one thousand dol is straight. The premier explained at inasmuch as the sum of one thou that inacchire as the sum of the same sand dollars was mentioned as the amount to be recovered for an infrac-tion of the law, the action would ne constrily have to be taken before the ily have to be taken of a superior court. On this proposition a very interest-ing discussion took place. Mr. R. L. Borden, Mr. Casgrain and Mr. Monk all held that under the clause consid-erable doubt might arise as to what would be a competent court in a case where action was taken under the proposed amendments. It was held by these well known lawyers that as the penalty might be fixed in any sum hese well known lawyers that as the enalty might be fixed in any sum rom fifty dollars to one thousand dol-ars, the plaintiff would be perfectly ustified in commencing action in a ommon court of law for recovery of he minimum penalty. Mr. Borden howed that a prosecution would not e conducted, but that a civil action ould be commenced by the plaintiff gainst the offending company or in-widual, and that any damages re-ward in court would be paid into dividual, and that any damages re-covered in court would be paid into the receiver general. Under such cir-cumstances it was suggested that the law should be made perfectly clear in every particular. Sir Wilfrid and the Hongrable Charles Fitzpatrick joined issue with the suggestions thrown out by the opposition members, and held that no such misunderstanding could arise, because a suit for an amount equal to one, thousand dollars would equal to one, thousand dollars would have to be commenced in a superior court. Thus it was shown that the object of the bill was to have every action involve the collection of one thousand dollars. In all cases the amount of damages to be recovered will be the maximum amount allowed the plaintiff, but if the judge in his stances warranted it, he might fix the penalty at any sum above fifty dol-lars and up to one thousand dollars. object of the bill was to have every

E. F. Clark, Toronto West, who has taken a deep interest in the alien labor law, opposed one part of the bill which necessitated the plaintiff ap-pearing before a superior court in order to dispose of his case. Mr. Clark sees in such a proposition the death-blow of any bill that might become law. His experience of the present act atal in making a practical proposition of the govern-ment bill, they deserve the gratitude of the workmen of this country.

Mr. Clark's idea is to have the complaint index with a stipendiary magistrate, ed. One important sugges-tion he made was to the effect that the law should provide machinery for de-porting allens whenever and wherever Since the session opened, numbers of cases have been brought to the st-tention of the house in which man were dismissed from the governments employ simply because they exercised their privilege and voted on election day. Such conditions can only lead to the prostitution of re-sponsible government, and a condi-tion of affairs which should be severely condemned in a country where freedom and justice are supposed to be paramount.

When Mr. Sifter brought in his estimates, early if March, for the consideration of the house, Mr. Thompson's name was pro-minently mentioned in connection with the last election. It was shown by Mr. Boche that under the poiles ad protection, and a force of militiamer were sent from Montreal to protect the company's property. Then Mr. King, the deputy minister of labor, was sent down as conciliator with the object of bringing the rival when the object of aringing the rival factions to terms. According to in-structions conveyed to Mr. King un-der a law passed last session, 63-64 Vic., chap. 24, section 5, "It shall be the duty of the conciliator to promote conditions favorable to a settlement Mr. Roche that under the policy ad opted by the government last Novem-ber, Mr. Sifton was enabled to pro-vide candidates for several constituvide candidates for several constitu-encies. These men are employed by the government to inspect the home-steads of the west, or for other pur-poses, and in the discharge of their duties they are constantly thrown into communication with the settlers of the prairie lands. Their power to put the settlers to more or less inconvenience and their frequent meetings with them, enable the inspectors to be-come thoroughly acquainted in the ridings in which they discharge their duties. It is unnecessary to state that the appointment of unscrupulous fol-lowers means considerable to the government, during election eam-paigns, and it does not appear from the evidence at hand that any of these inspectors have 'neglected the duties by endeavoring to allay distrust, to remove cause of friction, to promote good feeling, to restore confidence, and good reeing, to restore confidence, and to encourage the parties to come to-gether and themselves effect a settle-ment, and also to promote agreements between employers and employes with a view to the submission of differences to conciliation and arbitration before resorting to strikes or lockouts." But Mr. King did not do this. He met the leading people of Valleyfield and told them the government were prepared to do a good deal for the inspectors have neglected the duties which they consider they owe to their masters. As party organizers they have been an unquestioned success, and, if Mr. Sifton is to be believed. success of the strike, but it was all important that they should support Mr. Loy, who was the liberal candidate. Sir Wilfrid Laurier, Mr. Tarte and Mr. Sutherland all made vigorous de-fences on behalf of Mr. King and oharged Mr. Monk with maliciously endeavoring to injure the young man, their services will be continued with what he hopes, no doubt, will prove equally profitable results. out the very indignation of these gentlemen led Mr. Monk to reply, that his belief was strengthened instead of lessened by the excitement displayed. He has been in the house for a num-It seems that, in Mr. Thompson's case, he was an employe of the do-minion government up to the time he was nominated as the grit candidate was nominated as the grit candidate in Marquette. A few days after he had been tendered the nomination and had accepted it, he handed his resignation to the minister of the interior and the position of homestead inspector in that riding was made vacant. But good care was taken that Mr. Thompson's ber of years, and is well aware that a hot-headed repudiation by members of the government generally means that there is something in the charge that they are endeavoring to refute. And Mr. Monk promised, further, to subcare was taken that Mr. Thompson's interests were conserved, and that he should suffer nothing by his sacrifice. No appointment was made to the position until after election day, and then Mr. Thompson, having been de-feated, was quietly reappointed and walked back again to draw his salary as a dominion government official. Mr. Sifton positively assured Mr. Borden, the leader of the opposition, that the government were entirely innocent of any political feeling in the matter. In nit affidavits showing that everythin that he said was correct, or, in the event of his failing to do so, he would be the first to retract and do justice to Mr. King. The result of Mr. King's visit was that the day after Mr. Loy was elected, nothing further was heard of the Valleyfield strike, or nothing has been heard of it since. Mr. Puttee and Mr. Smith, both labor represent-atives, and liberals, concurred in what anves, and mersis, concurred in what Mr. Monk had charged in respect to the desertion of the strikers as soon as the election was over and they both expressed themselves as being dissatisfied with the outcome. They elegand that the later have any political feeling in the matter. In fact, if the statement of the minister of the interior is to be taken as a truthful one, none of the cabinet ministers were aware Mr. Thompson was even to be a candidate. In some mysclaimed that the labor bureau had acted in a shabby manner towards the men of Valleyfield, and that no seriterious manner he had just slipped out ous effort was ever made on behalf of the men to whom so much had been promised.

cial from resigning and running as candidate for parliament.

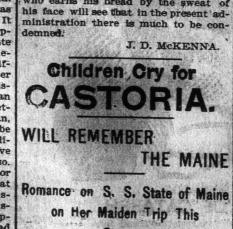

If that was all that could be laid at the door of Mr. Thompson, Mr. Sif-ton's statement might go down with a few people who are easily gulled, but the fact that, during the provincial election in Manitoba, Mr. Thompson was one of the most energetic canvassers in the grit party, shows that Mr. Sifton is not sincere in his statements. Mr. Thompson at that time, had not resigned his position and was still in Mr. Sifton's employ. In the north of Manitoba large numbers of Scandinavians had settled, and in order to capture these votes Mr. Thomp der to capture these votes all. Homp-son was sent to canvass them. It is fair to assume that Mr. Sifton must give his officers permission before they can leave their duties and engage in

my other business, and, therefore, we open to suppose, that in Mr. Thompson's case, he knew this gentlehan was absent from his work, and that he was to be engaged in political' work. But despite this fact he was not even censured for his conduct. It might be explained that Mr. Thompson in this respect was very fortunate as compared with Mr. Cox, his predeessor in office. According to Mr. Sifton, Mr. Cox was a first rate officer and performed his duties to the satis-faction of the department. But in an hour of weakness Mr. Cox wrote a letter to a conservative committee man. in which he stated that if he could be of service to the conservative candi-date, without being guilty of offensive palitical partizanship, he would do so. The letter was never replied to, non was there any evidence to show that Mr. Cox did even what he had promised to do. Nevertheless he was dis-charged and Mr. Thompson was ap-pointed, as a combination homestead inspector and electioneering agent. So much for this case.

Valleyfield was, according to Mr. Monk, that of electing Mr. Loy and defeating Mr. Bergeron. Mr. Berge-ron, in 1896, had a majority of 105, while in November last, he was snowed under in the same section by an adverse vote of 312. Mr. Monk believes that vote of 312. Mr. Monk believes that the movement was got up, to a very large extent, for the purpose of favor-ing the candidate of Mr. Tarte in the riding of Beauhannols. Mr. Tarte had an invitation to go there and run, but declined to do so. "The information." said Mr. Monk. "I have given to the house, as briefly as possible, has been given by reliable people. If this state-ment as to the state of affairs is true; it is clear that the conduct of the party I have named in connection with the matter is much to be condemned. A STATE OF A POWELL IS AVENGED.

(Montreal Gazette, 5th.)

Rufus H. Pope, M. P., was at the 7indsor yesterday, en route for Cookshire, after having spent some time at the seat of government. In an interview the member for Compton spoke with a great deal of interest regarding the present members of the house of commons. With one or two exceptions. Mr. Pope remarked, the losses to the debating power of the conservative party had occurred in the lower provinces, mentioning Sir Charles Tupper, Hon. Geo. E. Foster and Mr. Powell, of Westmorland. He had the highest or westmoriand. He had the nignest opinion, however, of the present con-servative deputation from the great province of Ontario. Mr. Pope says it comprises some of the best business men of the country and the represent-atives of the Queen city are men of whom any community should bebroud.

Continuing, Mr. Pope said that, although there were more liberals from the lower provinces than in the last parliament, he could not see any men who could well replace those whom the fortunes of politics had left behind. A good deal was expected of Mr. Emmer-son. who defeated Mr. Powell in West-morland, but that gentleman was not 2 ccess the other evening on the coronation oath debate and it is not at all likely that he will ever again repeat the exceedingly hazardous attempt to-lecture the Canadian House of Com-mons. "Yes, indeed," he added, "Mr. owell was certainly avenged."

There are men on both sides of the house, Mr. Pope added, who believe the members of the house of commons should be paid \$2,000, but it is so deli-cate a matter that they will not advo-cate such an increase on the floor of parliament. He likewise stated that it seemed to him to be most inconsist-ent for a member to vute against the increase, and then take it with the rest, should such an increase he adopt-ed by the house. Here he said there will be no business of importance transacted this session, and the mem-bers will have at least put in three months and a half.

John Charlton of North Norfolk ilso had a hand in the debate, and as usual he championed the interests of the Michigan lumbermen. Mr. Chari-ton was horrified that such a brutal al 'as an up-to-date alien labor

proposal as an up-to-date alien labor tot should be proposed in the domin-on of Canada. He claimed that in the for of Canada. He claimed that in the lumber business, competent workmen could not be secured on this side of the border, and that unless mill men were allowed to import such help as they desired the mills would have to be cleased down. According to Ma they desired the mills would have to be closed down. According to Mr. Chariton, we have a very inferior class of artisans and laborers in this Canada of ours. He has a lot of sym-pathy for the men who are wealthy and are making money, but he has no thought of those who are poor and who need employment and good wages.

Mr. Chariton let the cat out of the bag when he stated that the wages on this side of the border were too high, and that the mills declined to pay the rates demanded by Canadian work-men when they could secure cheaper help across the line. It is not Canada that Mr. Chariton this of but his

men when they could secure cheaper help across the line. It is not Canada that Mr. Charlton thinks of, but his own potect and those of his friends. While he advocates this policy of en-couraging the importation of Ameri-can workmen, he is perfectly well aware that on the shores of Lake Michigan resident experts in the lum-ber business are being driven abroad to seek employment. Mr. Bennett ex-posed this condition of affairs, and proved that the Canadian workmen are made to suffer by the failure of the government to take some action in their behalf. Out in British Columbia there is a case on record where large numbers of American miners were brought in under contract and then discharged at the mouth of the pit. After loafing about for some days they were forced to take positions at great-ly reduced wages, and the cut result-ed to the disadvantage of the Cana-dians who were employed there. It meant that the naturalized residents had to accept the reduction or accept their discharge. And this is only one instance where the privileges granted to employers in this country had been abused.

Sir Wilfrid melted under the strong position shown by both sides of the house, and agreed to consider the sugsestions thrown out. This means that he will further amend the act, so as to make it possible for county judges to have jurisdiction in cases of this

Among those who boarded the boat at Boston kindly manner in which the Ontario members have greeted Mr. Monk as Mr. Borden's lieutenant, but he says were James Dugan, formerly of St. John, and a Miss Montgomery. this is not surprising for in past years They when French conservatives have met-and fraternized with the representaecured separate staterooms and for the first part of the trip their actions and fraternized with the representa-tives of the same party in the English speaking provinces, most lasting and sincere friendship has been the result. He likewise related a pleasant incid-ent the other day when the Jacques Cartier market gardeners, all of whom were French-Canadians interviewed the government and were so strongly sup-ported in their demands for more pro-tection by Clarke Wallace and others, "Who was the lame man who spoke up so strongly for us?" they asked Mr. Monk. excited no comment. So when the boat arrived at Portland: their announcement that they were going ashore to be married caused general surprise. Those on the steamer did not know whether the couple had been previously acquainted or not, but " such was the case, the acquaintance had been very short, as the man in the question insinuated that it was an old fashioned case of love at first sight. "What, the famous Orangeman of whom we have heard so much?" and it is safe to say that hereafter these French farmers will shrug their shoulders when next they read of the "sanguinary" Grand Sovereign of Brit-ish North America. "And this is what we want," declared Mr. Pope, "for if you can only get our people to know each other, all these vexed questions of race and creed will forever disap-pear from the political aren." Then he took up the question of an increased indemnity, stating that the sovernment should have the courage of their convictions if they have got any, and take the responsibility of any change they consider it advisable to make. Mr. Pope says Canada's federal legislators are the most poor-ly paid of any of the same class in the world. At Quebec, the deputies get \$800, and in Australia the members re-ceive £400, or equal to \$2,000.

After leaving Portland, a search re-vealed a clergyman on the passenger list, but the hopes of the anxious couple were again dashed by the fact that he was a Canadian and could not perform the ceremony until after the line was crossed. It was desided ine was crossed. It was decided to wait for this, but when they arrived at Eastport, where it was ascertained that the steamer would remain hearly twelve hours, the much-dis-turbed bridegroom elect gritted his taeth and started ashore. John is entirely different from that that in any other constituency. Mr. Shaw could not understand why the surveyor general was afraid to trust the people in the county. He in-stanced that in the parish of Simonds the non-resident vote which goes out from St. John city is sufficient to swamp the vote of the resident. He could see no reason for the exception. Mr. Hazen said no reason had been advanced why the exception to St. John should apply. There is a distinct representation for the county and an-other for the city, and so far as voting mbers of the legislature is concerned St. John city and county are as separate and distinct as are the counties of York and Carleton. The pres-ent legislation was more desirable in St. John than in any other constitu-ency, for there is a large city vote

which at every election practically swamps the county vote. Hon. Mr. Dunn said he was not for the fiscal year during which they are contracted, and that when acafraid of the that the city people who hold property in the county should be allowed to vote Mr. Shaw could see no reason why after the people of the city have elected four representatives of their own they should be allowed to control the selection of the county representatives. Hereafter persons desiring to bottle liquor would have to pay \$500, the price of a wholesale license.—The bill was agreed to and reported. Hon Mr. Tweedie said the business of the house being finished, there re-mained bit one thing to be done, and that was to pass an address to His-Most Gracious Majesty King Edward VII. It is not necessary for me, he said, to elaborate on the theme. We all know that the reign of Queen Vicsaid, to elaborate on the theme. We all know that the reign of Queen Vic-toria has been marked by circum-stances of greatness such as have dis-tinguished the reign of no other mon-arch who ever occupied the British throne. Under her benificent rule the boundaries of the Empire have been extended, the population of the Em-pire has been doubled, its wealth has been emormously increased, and those principles of liberty which have come down to our time through many cenlown to our time through many centuries of parliamentary struggles have been strengthened and established more firmly than before. We hope and trust that under the reign of King Edward the VII no backward step will be taken, but that the empire will enjoy the same degree of prosperity which it has enjoyed during Victoria's eign, and that the rights of the subject will be as well protected as they have been in the past. New Brunswick has always been a loyal province. It is in fact a Loyalist province. It

THE ELECTRICAL CITY OF CANADA.

Mechanics, laborers, etc., have a splendid opportunity to better their adition by coming to Shawinigan Falls. The enormous amount of cheap water power has induced large manufacturing concerns to locate here, and a number of mills are now being erected. Skilled and unskilled workmen of all kinds are required now. Good wages will be paid and work will be regular and steady. The erection of a large pulp and paper mill, on which work has just commenced, will provide employment for several hundred artisans and laborers for many months to come. On completion many

hundred hands will be required to take permanent positions at high wages. Shawinigan Falls, the Electrical City of Canada, is on the St. Maurice River, twenty-one miles above Three Rivers. It is in the centre of a beautiful country, the climate is exceedingly healthy, and as the town has been laid out on model lines, with all modern city conveniences, it is an ideal spot in which to make your home.

Men who desire to reside here can secure Building Lots at low prices, and on an easy system of payments. Any workman can have a home of his own in this growing town where property is constantly increasing in value and where there will always be an abundance of work both for himself and his family. Shawinigan Falls is reached by the Canadian Pacific and Great Northern Railroads.

THIS IS A GRAND CHANCE TO MAKE MONEL for either farmers or THEIR WIVES and those who either cannot afford to keep up a large farm or who, through some infirmity or poor health, are not able to atend to the heavy duties of heavy farming. PRICES TO BE PAID.—This Company will pay the very highest prices to its shareholders, so as to encourage the raising of first-class poultry, and, as it will year in and year out be selling at the high prices to be obtained in England, it can afford to pay more than the best prices now paid for birds now sold on the Canadian market.

Canadian market. GREAT PRICES IN ENGLAND.—Chickens shipped to Liverpool, England, met with a ready sale at eight-pence (sixteen cents) per pound. As they weighed eleven pounds per pair, they sold for one dollar and seventy-six cents per pair. JUST THINK FOR ONE MOMENT—one dollar and seventy-six cents for a pair of chickens in England, and yet it is only a fair market price there, and the profits are equally as good, if not better, on turkeys, ducks and geese. The consignee wrote as follows about the shipment: "I was agreeably surprised at the all-round excellence of your small experimental shipment of Canadian capons (chickens). On experiment the enset the birds were found to be in heartful exclusion of the surprised at the all-round excellence of your small experimental shipment of Canadian capons (chickens)... By becoming a shareholder you will commence putting the money in your own pocket. SUCCESS.—This Company is a natural outgrowth of the great and wonderful cold storage system. Before "cold storage" became known it would have been an impossibility to carry on this great business, but now the great success of cold or chilled storage is the maker of this enormous business, which will prove a money-maker for its shareholders. Space will not permit giving a description of the great arrangements to be made, of the many receiving and shipping stations, abattoirs, cold storage plants, offices and agencies this Company will establish in the different Provinces of Canada and in England, or of the numerous employees it will engage to do the buying, killing, plucking, packing and shipping; the instructors the Company will en-gage will give to the working shareholders such directions and assistance as they may desire. THE HEAD OFFICE WILL BE AT HAMILTON, ONTABIO, and from there MR. WILLIAM S. GILMORE, THE EXPERIENCED MANAGER, will direct its affairs. Mr. Gilmore is already well known to many Canadians, but for those who do not know him and who would naturally like to know something of the man who is to direct the affairs of the Company in which they intend to invest their money the follow-ing extract from a letter written by the celebrated firm P. HON. T. R. JONES.

Hon, Thomas R. Jones, in advanced years and failing health, has been living a retired though still a somewhat busy life. But citizens not yet old will remember him an enterprising and progressive man of affairs, a sturdy, active and reliable politician, and a public spiritmber of the community. He was a man of strong opinions, who had the courage to maintain them, and the usually gave them utterance in a way not to be misunderstood. Mr. Jones was a St. John boy, who fought his way rapidly to a strong commercial and financial position. Afterward he had his fair share of successes and re-verses, enjoying his triumphs without ostentation, and accepting misfortune with fortitude. He exerted a very de-eided influence during his period of service is the legislative council, and did not refuse to take his share of municipal duties at a time when men of business training and determination were needed in city government. In the days of his active political life, Mir. Jones was one of the leading men and financial position. Afterward he

Mr. Jones had no immediate friends or associates. He lived, out-side of the domestic circle, a semisolitary life in his recent years, but in bygone days he was one of the promunent men who made the Victoria hotel the headquarters of American tourist travel and the centre of St. John gossip. There have been no hotels in St. John since the great fire the all round equal of the Victoria.

-Hon. Thomas Roseneil Jopes, hanker and broker, was born in St. John. Sept. 12th, 1825. He was of Loyalist descent, the son or John Jones and Eliza Roseneil, residents of the city of St. John, the latter being & grand-daughter of Thomas Mullin, the first, frish-man who settled in the maritime provinces. Mr. Jones received his education at the schools of St. John, finishing it at the com-mercial school, conducted by Thomas i Addi-son & Son. At fourteen years of age he en-tered on mercantile pursuits with Isaac Woodward, once mayor of St. Johan and later, for three years and a half, had the management of the commercial business of S. K. Foeter at Fredericton. In 1849 he re-turned to St. John and commenced business for himself, currying on a very extensive wholesale trade until 1881, when he retired. Mr. Jones always took an active part in affairs concerning the weighter of the city, and was a member of the Common Gouncil for eight years. During his period of service at the civic board he introduced a great number of reform measures. In 1868 he was called to the Legislative Council of New for eight years. To Know What You are Taking When Using Catarrh Medicines

When Using Catarrh Medicines. Catarrh is the short route to consumption, and the importance of early and judicious treatment of catarrh, whether located in the head, throat or bronchial tubes, cannot be too strongly emphasized. The list of catarrh cures is as long as the moral law and the forms in which they are administered, numerous and contusing, from sprays, inhalers, washes, ointments, and salves to powders, liquids and tablets. The tablet form is undoubtedly the most convenient and most effective, but with hearly all advertised catarrh remedies it is almost entirely a matter of guess work as to what you are taking into your system, as the proprietors, while making all sorts of claims as to what their medicines will do; always keep it a close secret as to what they are.

PRESIDENT'S OFFICE :

TORONTO STREET.

Gentlemen,-Permit me to answer in a letter through your columns a number of ibr juiries which are being made as to the intended operations of the Canadian Dressed Poultry Company, Limited.

In the first place its promoters nave been fully convinced of the great profits to be minde by exporting dressed poultry, turkeys, etc., to England, and, after a careful study of the matter from every standpoint, including the condition of the export trade in other products, they are convinced that the business must be thoroughly systematized; if this were not done the business would fail into the unsatisfactory state the apple trade is now in through lack of management, had packing and carefess shipping. With this object lesson before them, the promoters of this company decided that the practical way to make this business a success is to establish a number of receiving and shipping statisms in each of the provinces, say five or six in Ontagio, about the mine number in Quebee and a proportionate number, according, to the population and the number of shareholders, in Nova Scotia, New Brunswick and Prince, Eduard island. With these stations the birds can be gathered together alive from the In the first place its promoters have been fully convinced of the great profits to be and the number of shareholders, in Nova Scotia, New Brunswick and Frince Iduard Island. With these stations the birds can be gathered together alive from the farmers, killed, dressed and packed carefully for shipping to the Old. Country. The shareholders will be divided and a proportionate number will be directed to ship to each station. The stations will be fitted with plants necessary to make the exported article as perfect as possible. It was not desirable to have people in Prince Edw Islands shipping to a station in Quebec, or those in Quebec shipping to Hamilton, the fore, the object is plain and reasonable.

fore, the object is plan and reasonable. The promoters consider the plan of buying only from shareholders in the company the strongest feature of the business, as by this course the company secures a practical bond of faith from the farmer, and the best possible guarantee of getting the right quality of poultry, turkers, etc., and secondly, because the buyers and inspec-ors, when they go out on their trips for the company "wild know just whom to see and arrange with, as to the number of birds and kinds to taise. For instance, the buyer and arrange with, as to the number of birds and kinds to take. For instance, ins buyer car go to the shareholders and say plainly. "How many birds and of what kinds will you undertake to raise this coming year, and when, will you be prepared to deliver them?" The shareholder tails him and the company is then prepared to regu-late their supply as well as the "quality," which it would be almost impossible to de. In any other way, especially in a business it is intended to carry on your in and year-out. Just where these stations will be is now being considered, but each station will be rected to supply his station: All the stations and all the managers, including the management. It will be his duty to deal with the particular shareholders, di-rected to supply his station: All the stations and all the managers, including the manager in England, will act ander the instructions of the company's general manager. Mr. William S. Glimore. It is intended that this shall be an enterprose for the Canadian people, and for the pro-tection of the farmers particularity, and, therefore, the canadian people, and for the pro-tection of the farmers particularity, and, therefore, the company will be business with a figure within the reach of all it will pay the company will be business with. It is expected that the bayers for the company will terminence operations on so about the first of June next, so as to arrange with the shareholders as to supply. It is, therefore, of the unbot importance that all these who wish to acell to this company or to subscription the reach of a share the shareholders as to supply. It is, therefore, of the states in it should lose no time, but send in their subscriptions at once, as the stock is being rapidly subscribed for and the list will be slowed without them. Yours truly,

HAMPTON, Kings Co., April 9.-At noon today the examination into the charges preferred against the young men for disturbing the services of the Salvation Army was concluded and ment given. The parties proceeded against were Samuel Durant, Wil-liam Smith, Travis Mitchell, John Smith, James Ross and Joseph Mit-chell, the information against Edward Todd, William Mitchell and Harry Todd, Walliam Mitchell and Harry Knox having been withdrawn upon the amended information, which charged that between Feb. 14 and March 24 these parties disturbed, in-terrupted and disquieted an assemge of persons met for religious worblage of persons met for religious wor-ship. Upon two days of the enquiry R. LeB. Tweedle, K. C., appeared for the defendants, and presented many objections to the jurisdiction of the court and the methods adopted hy Mr. Sproul, who appeared for the com-plainant, Lieut. Maggie Mitchell, the officer in charge of the army corps at this Mac.

The abjections, however, were over-tilled by the magistrate in each case, without a moment's delay, and this morning, although there were three cases yet to be heard, Mr. Tweedle did not appear. The chief witnesses were Miss Metkle and Calvin Bickford, who e abjections, however, were overas each new case came up repeated their evidence. ST. STEPHEN, N. B., April 9.-Will Doyle took his life in a Calais barroom this afternoon in a very deliberate manner. He had been on a protracted spree, and entering the bar, asked for an empty glass to get a drink of water. He entered a stall and poured an ounce of raw carbolic acid into the glass. This he drank, then staggered to the bar and fell dead. He was unmarried, thirty years of age, and a candy maker by trade He joined the Baptist church here some years ago and led a good life until about a year ago, when a former tendency to

drink overcame him. The water in the river has comnenced to fall, and not much further

damage is anticipated. SUSSEX, April 9.-The millinery de partment of the Sussex Mercantile Co. is very tastefully decorated with lattice work of yellow and white crepe paper for the opening. THE OSSEKEAG WORKS.

Bad for Hampton, but Good for the

Buyers.

It is pretty well settled that the Osekeag works will not be started up gain at Hampton. The purchasers of the property, who are said to have paid \$60,000 for it, will probably be able to et all demands by the produce of their factories in Toronto, London and Montreal. It is said that the price of enamelled ware had been cut a good deal during the last few years, and was twenty or thirty per cent. lower than the United States price. The day after the purchase of the Ossekeag works by the syndicate, selling, agents all over Canada were instructed to ad-vance prices, and they are now fifteen to twenty-five per cent. higher than they were the day the tenders were op ened. If the advance amounts to ten per cent. on the product of the Cana-dian works producing such goods as were made at Hampton the profits would be increased some \$10,000 a year. Therefore the investment would be good one, even if the purchasers never made use of any of the property chased. As it is they have \$5,000 to \$10,000 worth of stock on hand, and haps the same value of moveable machinery. But the closing of the works is a bad thing for Hampton.

DOCTORS PIERCED HIS HEART.

Was Four Inches Larger Than Norma and They Cut It in Operating for Dropsy.

SAN FRANCISCO, April 2.—Frank Seller, whose heart extended four inches beyond the space occupied by the normal heart, caused consternation on Saturday among the surgeons at the City and Country Hospital. Seller went to the hospital to be treated for pains in the chest. There being eridences of dropsy, it was decided to tap him. The needle was driven in at a point four inches from the place ordinarily occupied by the heart. Instead of dropsical fluid the needle caused a flow of blood. The British Naval Estimates for the Coming Year Are Greater Than Has Been.

Five Submarine Boats Will Shortly Be Completed - The Coronation Oath-News and Gossip-An

> Engagement that Does Not Please the King.

LONDON, March 30 .- Last week was unproductive of any important change in the South African situation. After three weeks' parley, the After three weeks parley, the Kitchener-Botha negotiations fell through. Only this week we have sent sixteen rebels to join their fellows in seclusion at Cape Town, their terms of imprisonment varying from eigh-teen months to five years, and their fines from £150 to £5,000. A heavy additional term of imprisonment is additional term of imprisonment is imposed in default of payment of fine. Such being the case, it is obviously impossible that we could give an assurance of immunity to those rebels still in the field. This fact must have

been distinctly apparent to Botha, and one naturally inclined to the idea that time was his only object, so as to collect his shattered fortunes.

The entire Boer force is at presen in a condition of melancholy demoralization. Prisoners recently captured state that they have not sufficient am munition to fire a volley, and must needs run on the appearance of the British. The rumor that De Wet's mind had become unhinged, has now been reflably confirmed. The terrible strain of incessant flight has at last emphasized itself upon him. What this strain has been, we can estimate from the fact that some of our pursuing columns marched over 800 miles during February, seldom doing less than 25 miles per day. Most of the time they were miles from any baggage-sometimes on half rations, and frequently on none at all. Such a re-cord is a very high tribute to the stamina and endurance of the British

soldier: It appears that De Wet's manne come more and more brutal and arbitrary. He trusts his plans to no one, and never sleeps in camp unless absolutely obliged to do so. His sleeping place is known only to the few who form his bodyguard. The war, he says, is now one of revenge. He utrepudiates the idea of surrender,

terly repudiates the idea of surrender, and asserts that he will fight to the bitter end, doing all the mischief he can. So objectionable has he become that some of his most faithful adher-ents have left him in disgust. Very few men now remain with him—the bulk of his followers being scattered over the country. Physically, Steyn is suffering from dysentery, while his France will have no fewer than twenty on the water. suffering from dysentery, while his mental condition is one of hopeless Lord Salisbury has accepted the proposal for the appointment of a committee of both houses, to consider despair. £9,000,000 of this sum has been allotted for construction, and is the largest amount ever asked in a single year for that purpose. The of the navy is to be increased by 3,745 officers, men and boys. This will not be looked upon as excessive, considering the steady increase in the number of ships. Including Coast Guard, and Royal Marines, the total naval strength in 1901-1902 will be 118,635. Our shipbuilding programme, though large, is by no means too liberal. The, following is the work laid down for the coming year: Battleships, 3; armoured cruisers, 6; third-class cruis-ers, 2; torpedo-boat destroyers, 10; torpedo boats, 5; sloops, 2; submarine boats (ordered and work commenced in 1900), 5.

In unfolding the estimates, the secretary to the admiralty remarked, that our new 7.5 gun was superior to any gun in any navy in the world. The new powder-equal to cordite, but less destructive to the guns, was, he added, a step in the right direction. The five submarine boats will short-ly be completed. They are of the "Holland" type; but an improvement on the American boats. In shape the vessels are nearly circular. They dive under, and do not sink on an even keel. Each carries five torpedos which may be fired from the bow. Naval authorities now consider these boats a vital factor in the navy of a nation. Perhaps the most remarkable case of male impersonation on record is that of Catherine Coome, aged 66, who was charged with fraud at a London police court the other day. She ap-peared in court in male attire, which she has adopted for the past 46 years. The remarkable part of her extraor-dinary history is, that she actually emphasized her claim to man's estate by marrying Lady Campbell's maid; and the two lived together for fourteen years. As the other woman is dead, no light can be thrown on this episode. Coome was for over two years a captain's cook on a P. and O. liner. Easter day, though fair, was far rom being bright in the old shire own; but in Holy Trinity church all was bright and cheering. Kind friends had supplied a wreath of Easter Hill tulips and other cut flowers, while the chancel steps were banked with potted flowers. The music was of high class and exceptionally well rendered at both morning and evening services, and there was a very large attendance of communicants. At the Easter Monday meeting Mrs

He said the country needed unity and concord, and that the conflict of interests and the country's increasing wants would end in compromising the future of the nation future of the nation steps were taken to ameliorate conditions. Solidarity and civil cial peace could not be secured except by ers in their cells. One case interested him especially, a man of good educa-tion and address, and seemingly of abilities fitted to command success in the world. My friend gave vent to his sincere distress at finding such a man in such a position, and was going on to "improve the occasion," when the prisoner cut in with the remark that he believed in England we were fond of fox hunting. The pre-sident landed at 2 o'clock and drove in a landau through streets lined with troops to the Place d'Armes, where he bestowed dec-orations on a number of military men. Thence M. Loubet repaired to the prefecture. Great crowds everywhere heartily welcomed the president. The Duke of Genoa and his staff left the Lepanto at 3 o'clock, all of the forty war-ships in the roads firing salutes. WASHINGTON, April 7 .- The great | Tell me how the Lord Almighty can Christian festival celebrated in all the turn the charlot of his omnipotence churches is the theme of Dr. Talmage's a rose leaf. You ask me question discourse: I Corinthians xv., 20, "Now is Christ risen from the dead and be-come the first fruits of them that wer. wer. slept."

On this glorious Easter morning. amid the music and the flowers, I give you Christian salutation. This m ing Russian meeting Russian on the streets of St. Petersburg hails him with the salutation, "Christ is risen!" and is answered by his friend in salu-tation, "He is risen indeed!" In some parts of England and Ireland to this very day there is the superstition that Easter morning the sun dances in on the heavens. And well may we forgive such a superstition, which illustrates the fact that the natural world seems to sympathize with the spiritual.

Hall, Easter morning! Flowers! Flowers! All of them a-voice, all of them a-tongue, all of them full of speech today. I bend over one of the lilies, and I hear it say, "Consider the lilies of the field, how they grow; they toil not, neither do they spin, yet Solomon in all his glory was not arrayed like one of these." I bend over a rose, and it seems to whisper, "I am the rose of Sharon." And then I stand and listen. From all sides there comes the chorus of flowers, saying, "If God so clothed the grass of the field which tos and tomorrow is cast into the shall he not much more clothe day is and you, O ye of little faith?"

Flowers! Flowers! Braid them into the bride's hair. Flowers! Flowers! Strew them over the graves of the dead, sweet prophecy of the resurrec-tion. Flowers! Flowers! Twist them into a garland for my Lord Jesus on Easter morning, and "Glory be to the Father, and to the Son, and to the est, as it was in the beginning is now and ever shall be." The women came to the Saviour's tomb, and they dropped spices all around the tomb, and those spices were the seed that be-gan to grow, and from them came all the flowers of this Easter morn. The the flowers of this Easter morn. He, the first sheaf of the tion harvest. He. "the first fruits of them that slept." Before I get through this morning I will walk through all the country graveyards, where your loved ones are burled, and will pluck off these flowers, and I will drop a sweet promise of the gospel-a rose of hope, a lily of joy-on every tomb-the child's tomb, the hus-band's tomb, the wife's tomb, the fa-ther's grave, the mother's grave. WORLD'S GREAT CONQUERORS.

If I should come to you and ask you for the names of the great conquerors of the world, you would say Alexander. Caesar, Philip, Napeleon 1. Ah, you have forgotten to mention the name of a greater conqueror than all these—a cruel, a ghastly conqueror. He rode on a black horse across Waterloo and Chalons and Atlanta, the bloody hoofs shing the hearts of nations. It is conqueror Death. He carries a ck flag, and he takes no prisoners. He digs a trench across the hemis-pheres and fills it with the carcasses pheres and fills it with the carcasses of nations. Fifty times would the world have been depopulated had not God kent making new generations. Fifty times the world would have swung lifeless through the air—no man on the mountains, no man on the sea, an abandoned ship plowing through imemneity. Again and again has he does this mer with all generations. e this work with all generations. He is a monarch as well as a conquer-or; his palace a sepulchre; his foun-tains the falling tears of a world. ed be God! In the light of this Easter morning I see the prophecy that his sceptre shall be broken, and his palace shall be demolished. The hour is coming when all who are in their graves shall come forth. rected body that are beyond guessing and beyond mistake. In the first place, I remark in regard to your resurrected body, it will be a glorious body. The body we have now is a mere skeleton of what it would have been if sin had not marred and defaced it. Take the most exquisite statue that was ever made by an art-ist and chip it here and chip it there with a chisel and batter and bruise it here and there and then stand it out in the storms of a hundred years and the beauty would be gone. Well, the human body has been chipped and bat-tered and bruised and damaged with the storms of thousands of years-the physical defects of other generations coming down from generation to gencoming down from generation to gen eration, we inheriting the infelicitie of past generations. But in the morn ing of the resurrection the body will

adorned and beautified according to the original model. And there is no such difference between a gymnast and an emaclated wretch in a lazaretto as the bodies of the dead are to be raised, how is this and how is that? And you ask me a thousand questions I am in-competent to answer. But there are a great many things you believe that you are not able to explain. You would be a very foolish man to say, "I won't befieve anything I con't understand." you will see the form erect and elastic after the burdens have gone off, the shoulder-the very life of God in the body. In this world the most impressive thing, the most expressive thing, is the human face, but that face veiled with the griefs of a thousand why the difference which the seeds verified with the griefs of a thousand look to be very much alike-are very much alike?
