Liberals will not Lack Sinews of War in Coming Election.

Instances Where American Interests are Shelling Out for Government Campaign Fund.

No Word of Dissolution Yet, and House May Run Along for Another Week or More.

Special to The Standard. Ottawa, July 28.—The dissolution market continues bearish. Speculation is quiet today and runs in the direction of a continuance of this week's performance over next week.

About Campaign Funds. Things being a bit dull, our Liberal friends have been building up Conservative campaign funds.

Let us give one or two facts about campaign funds. The Liberal party has a fund of \$300,000, and the Conservative party has a fund of \$200,000.

As a concrete fact, take the \$69,350 which Hon. Frank Oliver deposited to his credit in Edmonton, Mr. McCall's charge is that this money was Mr. Oliver's own money improperly acquired.

Again, speaking in the House of Commons, H. H. Miller said that he counted himself fortunate if he got through an election on \$16,000.

Quebec, July 28.—Louis Dion, aged 25 years, was murdered at St. Honore, Temiscouata County, yesterday afternoon, in the course of altercation with a neighbor named Plourde.

JOHN ARBUCKLE TELLS COMMITTEE ABOUT SUGAR TRUST.

John Arbuckle, who is one of the most prominent sugar refiners in this country, recently gave some highly interesting testimony before the Congressional investigating committee in New York concerning the so-called "Sugar Trust."

NEW PROCESS OF TREATING SUGAR CANE WILL MEAN A GREAT BOOM FOR CUBANS

J. D. O'Connell, Formerly of Sussex, but who Now Has Large Interests in Cuba, Talks Interestingly of Affairs There—New Sugar Process Expected to "Bust the Trust" and Result in Increased Prosperity.

J. D. O'Connell, formerly of Sussex, but for some years resident in Cuba, returned yesterday to his former home on his annual visit. Mr. O'Connell is the owner of a large plantation near Canaquey, and is every year going more extensively into sugar growing. He has in the past given a large share of attention to cattle raising and other industries, and expresses full satisfaction with the prosperity which has attended his efforts.

In conversation with The Standard yesterday, Mr. O'Connell talked most interestingly of conditions in Cuba, touching on both the political and industrial phases of life there. Perhaps the most interesting statement he made is that a new process of treating sugar cane recently been invented, and is now in the experimental stage. It has already met with such success that it promises to develop into the most important advance in the history of the island. It has been introduced by Roberts Bros., of Chicago, who are now in Cuba, and who, by the way, are Canadians. They are backed by a company by the name of Sammons, and the company is known as The Sammons Sugar Company. Instead of crushing the cane and treating it at enormous expense in mills in the island, afterwards shipping the product north for refining, the new process shreds the cane. It is then put up in bales like hay, and the whole thing shipped north. This shredded cane is treated by a steam process in the American Sugar mills and comes out in the form of refined sugar.

The result of this is that the sugar mills in Cuba, costing millions of dollars, will undoubtedly be replaced by innumerable smaller mills, which can be built at, perhaps, five per cent. of the cost of the present ones. It will be no longer necessary for a man to be a millionaire to go into the sugar business in Cuba. Again, the great American Trust controlling all the refineries will, if the new process proves successful as it now appears to be, be put out of business for refining will no longer be necessary.

Indeed, in Mr. O'Connell's words, the interest in this new process is so intense that it is practically the only topic of conversation among the sugar growers, and in the opinion of the majority of the people, it promises to "bust the trust."

It is stated, too, that the steaming treatment brings 10 per cent. more sugar out of the cane, and in addition to this, the cane itself, after treatment, is used for pulp. This cane,

SOCIALISM IN LEVYING TAXES

Discrimination in Levying Taxes, and Increased Taxation Despite the Lowering of the Rate, Having an Effect.

(New York Sun.)

Every once in a while rumors drift this way about what is happening in Milwaukee in the hands of the Socialists, and not everybody who comes from that way quite agrees with the enthusiastic report made by the Socialist Mayor on his recent visit here. W. P. Bloodgood, who is a member of a law firm which his father, one time partner of Wheeler H. Peckham, established here before the civil war, and who is not in politics, says that things are in bad shape so far as the government of the city is concerned, that the burden of taxation is increasing, that discrimination in levying taxes is charged, and the result is likely to be that conservative people in the city will get together at the next municipal election, which does not happen until next spring, and turn the lot out.

"Socialism has become a vexing question in Milwaukee," said Mr. Bloodgood at the Waldorf yesterday. "Taxes have increased to such an extent, causing so much dissatisfaction, that I don't doubt that the Socialists will soon lose control of every city department. Of course the Socialists are not in through defections in the Democratic and Republican parties. The last judicial election furnished a test of their real strength. The men of their party put up with the Socialists were defeated by overwhelming majorities."

"Obviously the Socialists have lowered taxes in Milwaukee. They have reduced the percentage of taxation. But they have been increasing the valuation of property, both real and personal, to such an extent that the lower rate of taxation makes the property owner go down much deeper into his pocket. Then the charge has been made that in swelling the assessable value of property small owners were favored, and some attempt to correct this has resulted in dissatisfaction all around."

"The difficulty the Socialists had when they went into office was that they had no trained men for the various places. Into the office of the Register of Deeds, that of the County Clerk, and many other departments they did not put anybody who had any qualifications for the job he was supposed to fill. Instead of keeping trained men there they could not resist the temptation to put them out. They let out the City Engineer, who had been office many years. They put some bright young fellows into the City Attorney's office, but the City Attorney himself was absolutely unknown. I don't if he had ever tried a case in a court of record. I know he had never argued a case in the Supreme Court."

"The temper of the people of Milwaukee is above clearly with the Mayor attempted to interfere with the Chief of Police. The latter was an efficient man of independent judgment and free from political influences, and his department was well run. The Mayor tried to remove him and the Police Commissioners would not stand for it. The Sheriff in appointing deputies selected for more than half the jobs men who had been strikers, a lot of them with records, arising from the strike of the moulders at West Allis some years ago. He himself was a pud and the head of a union. Such methods disgusted all the independent voters."

"There is no question that Congressman Berger, who is the head of the Socialist movement in Milwaukee, is an able man or that Mayor Seidel is honest. Many who were associated with the latter at the beginning were really in earnest and had the confidence of men who did not agree with them at all, but who looked for them to exercise judgment in the conduct of municipal affairs. So far as Seidel is concerned there is no question that his intentions have been of the best but he could not carry out his plan of getting good men about him."

"One fault Seidel has is that he cannot stand having men about him who do not agree with him in anything. The class who did agree with him did so because they wanted to get on the band wagon and enjoy the spoils of office. Such men have injured Socialism a great deal. They set salaries three or four times bigger than they had been able to earn and when they did not divide up there was jealousy and they have lost support in their own party."

"I think business, generally speaking, is improving in Milwaukee. The St. Paul railroad has large shops here and the western extension of the road especially the opening of its passenger service has kept that big industry going on all the time."

YANKEE DOLLARS TO HELP GRITS

Continued from Page 1.

This is a British country—that is that the Conservatives were financed by British, and the Liberals by American money, the people might prefer the British party if it became necessary to supplement it. Here the American pro-reciprocity press helped greatly. The Liberals are in a singular and agreeable position. There are in the United States a great many people and newspapers who hate the British Empire.

There are in the U. S. a great many people and newspapers who wish to detach Canada from the British Empire. There are in the U. S. a great many people and newspapers who wish to see Canada annexed by U. S. There are in the U. S. a great many people and newspapers who are hostile to Canada's plan of nation building.

These people, these newspapers, wish the Liberal party to win the next election. These people, these newspapers, desire the defeat of the Conservatives at the coming election.

And in these anti-British anti-Canadian newspapers appeared a statement that the interests of the U. S. were sending vast campaign funds to help the Conservatives and the Liberals are repeating this yarn of their American allies.

This talk is all rot. Your correspondent happens to know from private information that at the present moment the Conservatives and reciprocity campaign fund in certain parts of Canada is seriously embarrassed for lack of money, for ordinary, necessary and entirely legitimate purposes. The Conservative party is not rolling in luxury of a monstrous campaign fund.

Enormous interests in the U. S. favor the passage of reciprocity. They steeled it to success through a very complicated political situation.

J. J. Hill, with his sixteen branch lines rubbing their noses against the 49th parallel, interested in the success of the Liberal party, would not begrudge a million to the campaign fund of the party which is fighting to let these branch lines in.

Azrah earlier in this session the government put through a bond guarantee of \$636,000 for Mackenzie and Mann. Is there no campaign fund in that? An ounce of fact is worth a ton of talk, here is concrete fact, not long ago American interests made a deposit of \$7,000 in a bank in Eastern Canada for the purpose of forwarding the passing of reciprocity. This happens to be one single isolated instance which has come to your correspondent's knowledge.

Yankee Dollars For Grits.

American money is being sent into Canada to help to beat the Conservative party at the coming election. Indeed the Liberal party seems to have got the habit. Did not Frank Oliver's \$70,000 come from New York? Inside the chamber the work goes on and it has been useful work today.

The Farmers' Bank.

For example this morning E. B. Oser delivered an infinitely damaging statement showing that he was not Mr. Fielding, that the Farmers' Bank was rotten, Mrs. Fielding, in a downcast and embarrassed manner, said that Mr. Oser should have sent the warning in writing.

This suggests a new motto for our finance department: "All warnings."

WESTERN COAL MINES ACCEPT BOARD'S RULING

Will Grant Wage Increase to Strikers, But Demand Right to Retain Principle of the Open Shop.

Ottawa, July 28.—The Minister of Labor has received a telegram from Mr. Lewis Stockett, president of the Western Coal Operators Association, in which the operators announce their acceptance of the majority report of the board of conciliation and investigation of which Rev. C. W. Gordon, D.D., was chairman. This agreement is of the operators on this point is as follows:

"We feel that the majority report is anything but a fair proposition taking into account the financial standing of a large number of companies involved and also taking into consideration the large financial interest at stake. We also feel that the acceptance of the same will work a hardship on the large capital investment which may take years to overcome. In this condition we might refer, in passing, to the fact that the report states that one of the facts disclosed by the investigation of the board that probably two-thirds of the mines in the Association have operated during the past two years at a loss.

"We realize however, that the public have to a very large extent to be considered, and while if we consider only the interests of the companies involved we would be forced to decline to accept the findings of the board, we feel that rather than precipitate a coal famine and the consequent sufferings we should accept the same. In doing so we wish it to be understood that we are signifying our willingness to negotiate an agreement with the United Mine Workers' Association along the general lines suggested by the board in its majority report. This we understand to mean an absolute open shop with a non-discrimination clause to be conceded to the operators, that we retain absolutely the management of the mines and control all the employees connected with the management and safety of the same. We also understand that the increase in the day's wages is to be based on the existing scale of day's wages as provided in the last agreement between the United Mine Workers of America, district 18, and the Western Coal Operators' Association. Beyond this we absolutely refuse to go.

The Cement Merger.

Replying to Dr. Sproule in the Commons today, Sir Wilfrid Laurier said the Government would take up the matter of appointing a committee to inquire into Sir Sanford Fleming's charges re the Canadian Cement merger.

Hon. Mr. Fielding said there was no objection to bringing down any public documents desired in connection with formation of the Farmers' Bank.

GARDENS RECLAIM BAD BOYS

How the naughty little boys of Dayton, O., were reclaimed from their mischievous ways without the aid of reform schools is told in the Popular Mechanics' magazine. Each boy was provided with a garden all his own, from which he could harvest vegetables to supply his home and for sale to the neighbors.

The Boys' Garden is a plot of land advantageously located in a part of Dayton now called South Park, and each boy has a garden 10 feet wide by 100 feet long, the whole lot being surrounded by shrubbery. The office of the Boys' Garden Company is a very artistic building located at the edge of the gardens, and the officers are boys. The hours of work in the gardens are from 6.30 to 7.30 in the morning, and from 4 to 5.15 in the evening. If any boy wishes to work overtime he must stop work when the rest do, report to the head gardener, and get permission to continue. Every boy must stay in his own garden, must clean his tools after using, and hang them in their place. The use of bad language is strictly forbidden, and an excuse must be brought to the head gardener in case of absence.

The benefits of the scheme to the boys are remarkable, teaching them to take care of little things as well as the large ones, benefiting them mentally and physically through work in the open air, teaching them how to keep the ground working all the time, and supplying them with pocket money honestly earned.

LIONESS ON VISIT TO ROOSEVELT'S OFFICE

New York, N. Y., July 29.—An interesting press agent is suspected of responsibility for the delivery of a full grown lioness today at Theodore Roosevelt's editorial office. The cage was addressed to Col. Roosevelt, but before he had a chance to see its contents the police took charge of the snarling animal and held it until the owner called. After some difficulty, the owner obtained permission to take the lioness back to Coney Island.

WILL FLY ACROSS THE UNITED STATES

London, July 28.—Jules Vedrines, the French aviator who won the Paris to Madrid race, and finished second in the circuit of the Great Britain coast, today announced his intention of competing for the American prize offered for a flight from New York to San Francisco.

HARD CALLOUSES QUICKLY CURED

Soak the feet in hot water and then apply Putnam's Palmers' Corn Extractor—it removes the callous quickly. Be sure you get "Putnam's" only.

A BIG RAILWAY DEAL.

New York, N. Y., July 28.—Bankers connected with the New York Central Railroad's interests today confirmed the report that plans are being considered for consolidating the financial management of the New York Central system. This is by far the largest re-adjustment of railroad capitalization ever undertaken—involving several hundred million dollars value, and 13,000 miles of railroad.

Molassine Meal

contains antiseptic and deodorizing properties possessed by no other Stock Food.

FOR HORSES

It is most valuable—it makes strength and stamina. 3 lbs. per day substituted for an equal quantity of Oats will keep Horses fresh in each year, insure perfect digestion. It is an admirable food for Brewers, Colliery and all hard working horses.

PIGS fed upon it regularly will be healthy, able to digest all their food, and cost less to bring to market. It will have equally good effects upon

DAIRY COWS, BULLOCKS, SHEEP AND POULTRY.

A quantity mixed with damaged Grain will make it palatable and easy to digest.

INFLAMMATION AND PAIN

Cured by Lydia E. Pinkham's Vegetable Compound.

Creston, Iowa.—"I was troubled for a long time with inflammation, pain in my side, sick headaches and nervousness. I had taken so many medicines that I was discouraged and thought I would never get well. A friend told me of Lydia E. Pinkham's Vegetable Compound and it restored me to health. I have no more pain, my nerves are stronger and I can do my own work. Lydia E. Pinkham's Vegetable Compound cured me after everything else had failed, and I recommend it to other suffering women."—Mrs. Wm. Seals, 605 W. Howard St., Creston, Iowa.

Thousands of unrelieved and genuine testimonials like the above prove the efficiency of Lydia E. Pinkham's Vegetable Compound, which is made exclusively from roots and herbs.

Women who suffer from those distressing ailments should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

If you want special advice write to Mrs. Pinkham, at Lynn, Mass. She will treat your letter as strictly confidential. For 20 years she has been helping sick women in this way, free of charge. Don't hesitate—write at once.

THE DIMPLE IN THE ELBOW

Several Ways of Securing it, Including Surgery, the Use of a Pebble and Oil Baths—The Youthful Effect the Best

New York, N. Y., July 26—etactin (New York Sun).

Women who would Paris this summer had the pleasure of seeing the Stephanie elbow. Stephanie is an actress, and the elbow is seen to best advantage when she is dining or supping at a smart restaurant. Stephanie's chief charm is her elbow. Your first impression is that it is very pretty in shape. Then comes a glimpse of a shapely arm with a gleam of ivory white skin and finally you see the dimple in the elbow.

Whether her arm is straight or bent or lying long and graceful in her lap the dimple is there. It is not a thing that depends upon position. The dimple is a fixture and all who pass Stephanie's table can see it. It is deep and pink, alluring and pretty.

It was an American woman who first tried to get a dimple like it. "I must have the Stephanie dimple," she declared to a French beauty maker.

That was the beginning of the beauty maker's trade. Now she has done hundreds of elbows, and Stephanie is no longer the only one who has elbow dimples, though hers are still the most natural and the most youthful.

How do you do it? "I asked a woman of one of the most successful of the French dimple makers. "My method is difficult," was the reply. "I use the knife."

"Dreadful!" was the comment. "Yet not so when you come to think of it," rejoined the beauty artist. "I merely make a cut, a sharp, not too deep little incision. I believe, I don't understand it exactly, but I know he dresses the arm, gives orders that he be kept quiet, and in ten days the dimple is there."

"Some women want a dimple in each elbow. Others would not have two. They want one elbow left as nature made it. One of my patients had such success that she came back to have a dimple cut in her chin, and another wanted one in her shoulder."

Still the American woman on information best went to see another specialist in elbows. This dimple maker had quite different ideas.

INSIDE HISTORY OF LAKE OF THE WOODS

J. C. Mackintosh & Company, in their weekly market letter give a very interesting inside history of the Lake of the Woods Milling Company, which has recently come into particular prominence in the Canadian markets.

They say in part:—"The attention of the market has been called to the Lake of the Woods Milling Company, which has recently come into particular prominence in the Canadian markets."

IN THE COURTS

Supreme Chambers. In Chambers yesterday morning before Mr. Justice McLeod, the examination of J. W. Smith of Hampton, formerly manager of the Victoria Acetylene Gas Company, Limited, was commenced. The company is in liquidation, and as a call for double liability has been issued James Hunter, a former president and heavy stockholder of the company had Mr. Smith examined as to the affairs of the company. The examination was continued in the afternoon. George W. Fowler, K.C., appeared for S. A. McLeod, the liquidator; George O. Dickson Oty for George Barnes, executor of the estate of James Titus, a

stockholder; James Hunter, J. R. Woodburn and A. G. Edgecombe, other stockholders, appeared in person.

LOOK AHEAD FOR ILLNESS. Sudden illness and pain came to every family—to parents and children alike. But if you have looked ahead, and have right in your home, ready for immediate use a bottle of Polio's Nervine, there isn't much to worry over. If it's a sore throat or contracted chest, apply Nervine and put on a Nervine Porous Plaster. If it's a cold, cramp, or any stomach disorder, just administer ten drops of Nervine in hot water. No family medicine is more useful or more dependable upon emergencies than Nervine and Nervine Porous Plasters. They keep the doctor bill small. Each at all dealers. Refuse substitutes.

SAINT JOHN, SATURDAY MORNING, JULY 29, 1911.

AN OMINOUS UTTERANCE.

The speech of Mr. Balfour at the banquet given in honor of Mr. Chamberlain's birthday is one of the most ominous utterances to which the British Empire ever listened. There is a note of pessimism in it which is saddening, the more to be taken warning from because Mr. Balfour, when he speaks, never speaks as a politician looking for votes, nor as an orator seeking applause, but as a calm student of affairs.

He says in effect that there are differences developing between Great Britain and the Dominions which are irreconcilable unless there is a total change in Great Britain's fiscal policy, that he can see no way out of the complications caused by the favored nations treaties in relation to Canada's apparent policy of reciprocity with the United States. He does not blame Canada, but his own country, which is his business and not ours. We have entirely more immediate and practical matters to attend to.

We know that the Imperial Conference began in indifference and ended in contempt, and we know that the man who is responsible for that is Sir Wilfrid Laurier. He deliberately slapped the British Empire in the face, and made a conference which he was only shamed into attending barren of results. What has he ever done to make the interests of Canada and Great Britain coincide? What has he ever attempted to make them divergent and separate? He is trying at the present moment to force a policy upon Canada, which, because of the inexorable certainty of its results, will dismember the British Empire and leave it merely the memory of an unfulfilled aspiration of scattered peoples.

But Mr. Balfour should have paused to remember, before he indulged in such unrestricted gloom, that the Canadian people have something to say about this matter before it is settled. In this country, big it is, and perhaps because it is so big, we have no room for foreboding. If there is no visible way out we will seek for one till we find it. Sir Wilfrid Laurier cannot blind us and lead us into a ditch forever. And there is one thing which Mr. Balfour may be certain, that Sir Wilfrid Laurier in attempting to gild the capital of Washington so that it pales the tower of Ottawa, has made a mistake, for which he will be faithfully and firmly dealt with.

THE HARMFUL AND UNNECESSARY FLY.

One of the bright young physicians connected with the United States naval hospital service has of late brought the common and noxious house fly—*Musca volitans*, which means "the-fly-that-gets-away"—before the bar of public opinion and christened it "the typhoid fever fly." According to the Bangor News the charge has been sustained in every allegation. For centuries and millenniums the house fly has been a public nuisance. It has fallen in the cream pitcher, and lashed miserably from drowning; it has become mixed up with the table linen; it has got into the sugar bowl and the syrup can, and become enmeshed in the wires of the window screen. It has also leisurely walked across the shining bald heads of dignified college professors, and clouded the doors of heated kitchens, with swarms of noisy and noxious pests, which science, aided by human wisdom, was unable to subdue.

This pestiferous fly usually retires soon after sundown, though it is willing to work overtime, without extra compensation whenever its services are needed. Light a lamp in a sick room, or bring a simple tallow dip into a parlor where two loving persons are anxious to become better acquainted with each other, and the fly is on the spot without invitation and without so much as "by-your-leave." The fly is there immediately, and soon all of his poor relations—down to cousins and second cousins—drop in by dozens, and make "a jolly family party" for any home that has a stable, a pig pen or a sink spot as an annex. You can't destroy or subdue the musca volitans. Or if you do bring him to grief, 40,000 of his kinsmen come to attend his funeral and will not be denied.

So long as the house fly was employed for thickening cream or as a substitute for a dried blueberry in a fancy and frosted cake, small attention was paid to his harmless eccentricities. Flies come every year, as a matter of course. They are with us always in the summer time. If the supply of active and unengaged flies in one home exceeded the supply in a neighboring home by some eight or ten millions of flies, the place which held the lesser number was the more fortunate; for, as has been said before—the flies come to us as regularly as do the summer visitors in the heated season. In this desultory and entirely unconventional way, the close association of flies with human beings was permitted to go on. It was impossible to keep off all the flies in any locality. Why try?

But the new breed of doctors are funny chaps. To excuse themselves for charging such exorbitant bills, they spend much time in feeling your pulse, looking at your tongue and asking you all sorts of irrelevant questions, such as nobody but a curious and rubber-necking doctor would ask or dare to ask. That is the doctors' way of making a bluff at earning their pay. At last, a doctor in attendance upon a typhoid fever case met a fly in the sick room by the bedside of the victim; and as the fly was very inquisitive regarding the cause of a red spot on top of the doctor's head, the doctor mashed the fly with a slip of his hand, a week after which tragedy, the doctor was taken down with typhoid fever and came near dying from his inadvertent act.

The doctor, being a venereal sort of a chap, and lacking professional employment during his convalescence, spent some time in tracing back his own case of typhoid to the fly in the sick room, which was mashed upon the head by the physician. Followed a period of work with microscopes, test tubes and clinical thermometers, and another painful period of writing for some medical magazine, wherein the plain house fly was called the "typhoid fever fly," and a new and dangerous foe to human health was discovered.

It does not matter now so much as to how many died or how many recovered from disease carried by flies. It does matter very much that the doctors and the health officers have discovered several ways of keeping flies in check, and holding them in check. Flies breed copiously and wax fat among farm dressings, near cess-pools, among decaying feathers, and offal from slaugh-

ter houses. The cure for the fly is to clean up and to keep clean, to put screens at the doors and windows, and have all screens fly-tight at all times. To accomplish as much good as possible, and as cheaply as may be, scatter chloride of lime and field plaster in powder form over the floors of stables, about heaps of dressing, and in all places from which offensive smells emanate. Do this regularly and sprinkle places, which are suspected, with common copperas or sulphate of iron dissolved in water. If eternal vigilance be the "price of liberty," it is doubly the price of good health and freedom from typhoid and malaria.

BREAKING UP BRITISH ESTATES.

One of the effects of the Lloyd George land taxes established in his famous budget has been the breaking up of many large rural estates in England. Not a few of the leading noble land owners have put their farm holdings on the market and have had no difficulty in making sales. The Duke of Bedford recently sold at auction the greater part of his estates in Devonshire, mainly well-cultivated farms, ranging in area from 157 to 428 acres. The whole area covered by the sales was rather less than forty-eight hundred acres and the prices realized are referred to as eminently satisfactory, though it would appear that the average rental returns on the investment heretofore has been only about three per cent. per annum.

The details of prices and areas found in the English newspapers are interesting in view of the frequency of the assertion that British agriculture is suffering from "chronic depression." One farm of 428 acres brought \$31,500; another, of 300 acres, \$28,000. As a rule the price paid did not fall below \$70 an acre, and for some very desirable tracts it ran above \$90. These are figures expressive of eagerness to purchase on the part of farmers, for no inconsiderable proportion of the purchasers were tenants who must have realized the capabilities of the property.

English opinion regards a clear 3 per cent. per annum on any investment as a very good thing, hence there is no real contradiction between the rental return and the desirability of the Duke of Bedford's farms. Evidently he was not "land poor," and it is a fair presumption that his willingness to sell was prompted by a desire to escape the enhanced valuation which will be placed on the land by the new system forced upon the country by Lloyd George.

The Chancellor in reality is only aiming to have land assessed at figures approaching its market value, but such an assessment will be in wonderful contrast with that under which the nobility have escaped paying their dues to the collector of taxes. There are large tracts of land making good returns to their owners which have hitherto paid but paltry taxes, but when the new law comes into full operation they will probably have passed into new proprietorship.

HOLIDAY TIME.

About this time of year there is a feeling of expectation in the air, a general and pervasive attitude as of waiting to receive something. It is like the time just before Christmas, only different. It is the thought of holidays that manages to keep our minds on tiptoe, to mingle a metaphor. Everyone is either just taking a holiday or just about to take a holiday. There are a few poor creatures who have already had their holidays. But we do not envy them, despite their air of having got the thing over with for another year.

Most holidays, it must be admitted, are a delusion and a snare. We go forth with much hopefulness and hard cash to track down elusive happiness and the zest of life which an eleven months' grind in shop or office has apparently extirpated. We spend several weeks and all the money in our possession in the pursuit, after which we overdraw our accounts and take just one more day, in desperation. We come back thoroughly fatigued and body, s'warned as to nose, with blisters on our ears and feet, and a mind absolutely vacant of thought. And then we find the zest of life waiting for us at our desks. The old things have taken on a new aspect; interest has been re-created out of monotony. We find to our utter amazement that we are glad to get back to work. If anyone attempted to restrain us from doing so, we might become violent. There are a great many things to be done, and no one else could possibly do them. Things have evidently been standing still in our absence.

In that lies the beauty of all holidays. They are at their best when they are over. A holiday which is not a complete change is merely a waste of time. Banish all familiar scenes and faces and thoughts, and for the rest it does not matter where that holiday is spent. We who live in town have maddening visions of leafy woodland solitudes and running water and the open sky above us at night. But a dweller in the country might be greatly benefited by a course of soda fountains and car rides and department store shopping, with an occasional moving picture entertainment thrown in. Do something different, that is all. This is the time of year when everybody should change cars at the next station.

THINGS ANIMALS LEARN.

One of the most interesting of phenomena among birds and animals in wild state is the manner in which they adjust themselves and succeeding generations of their kind to the dangers which civilization always imposes. Men who remember the installation of telegraph lines recall how a string of two to five or six wires between telegraph posts caused the death of thousands of rapid flying birds which sought that general level of flight. How many thousands—perhaps millions—of prairie chickens were slaughtered in the early days of the railroad and telegraph lines is impossible to guess. But many an individual standing near a line of telegraph wires in the late autumn, when the prairie chickens were nesting in flocks of 200 or more and flying to new feeding grounds, has picked up half a dozen or more mangled and dead birds which had collided with the deadly wires.

Once upon a time after the establishment of a new lighthouse on a coast where ducks, geese, and brant flocked in migrations, it was a common thing for the gallery of the light to be half filled with dead and crippled birds which had flown into the light out of darkness. Today neither the telegraph nor the lighthouse is slaughtering birds. They have learned the ways of man too well. Which lends interest to a story from a German paper in telling how bears in German forests have learned to avoid the telegraph wires and poles.

As the writer explains, the installation of telegraph poles and wires brought about the invariable humming which marks the pole as a sound spot. It was taken for granted that this buzzing sound attracted the bears, through the sense of hearing, to imagine that bees had stored crops of honey at the top of the poles. They began research work along the most careful German lines, putting miles of wires out of commission in the early years of the telegraphic invasion. Cross arms of poles were broken and wires snapped everywhere. Gradually, however, the bear in the German forests grew to understand the telegraph pole was a honeyed jewel. Today not even a baby bear, following its forebears on the hunt, even sniffs at a telegraph pole.

A GRAND MEDICINE FOR OLD PEOPLE

"Fruit-a-tives" Restores the Health and Strength of Youth.

Grande Ligne, Que., Jan. 2nd, 1910. "I heartily recommend 'Fruit-a-tives' to all who suffer from constipation and the painful consequences. Piles. I am now over 70 years of age and suffered for more than 10 years with Constipation and Piles. I tried all kinds of remedies, but nothing cured me. About four years ago I received a sample of 'Fruit-a-tives.' After taking a few doses, I felt that 'Fruit-a-tives' were doing me good. As 'Fruit-a-tives' were not sold here then, I wrote to Ottawa, for several boxes.

After taking four boxes, I felt well—my 'Bowels' were regular and the Piles had disappeared. N. JOUBERT. By taking one 'Fruit-a-tives' tablet half an hour before meals—or one or two at night—old people can correct all Stomach, Liver and Kidney Troubles. 'Fruit-a-tives' the famous fruit medicine is mild and gentle in action—pleasant to the taste—yet no other remedy has been found to be so effective in keeping old folks in good health. One box, 25c. A box, 50c. At all dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

OBITUARY.

Mrs. Jas. S. Smith. The death of Mrs. Jas. S. Smith, aged forty-five years, occurred at Nepean early Friday morning after a short illness. Mrs. Smith was the youngest daughter of the late Thomas Godfrey of Welsford. She is survived by a husband, one sister, Mrs. Weston of West St. John; four brothers, Geo. A. Godfrey of Lead, South Dakota, John A., of West St. John, Louis W., of Fredericton and C. P. R., and Frederic C., of Welsford. Her oldest sister, Mrs. Hazen Godley, of Welsford, died about four weeks ago, after a short illness. Mrs. Smith was an earnest worker of the Carleton Presbyterian church, and resided for a number of years at that place. Funeral on Saturday at 3 o'clock.

A STRAIGHT TIP FOR THE ANNEXATIONIST TELEGRAPH.

To the Editor of The Standard: Sir,—The Telegraph this morning states that the farmers of the Maritime Provinces are holding back the sale of their hay until after reciprocity comes into force. This will be news to the farmers, as the hay is not yet cut. If the farmers sell their hay in the United States it means higher prices for consumers at home and is a bad outlook for the raisers of live stock. The annexationist press has better get posted before writing up farm matters. A FARMER. Lingley, K. Co., July 26.

The Canadian Annual Review of Public Affairs has become in the course of its ten years publication (Toronto: The Annual Review Publishing Co., Ltd.) and under the editorship of J. Castell Hopkins, a most important record of the development, history, institutions, political changes and opinions, material and general growth of the Dominion. Started at the beginning of this century by Mr. Hopkins and supported by a company at which included Lord Strathcona, Colonel James Mason, Senator G. A. Cox and Sir Henry Pellatt of Toronto, H. Wilson Smith of Montreal and others, it has survived many difficulties facing such a publication in this country and now ranks with the world's standard annual books of reference. The United States indeed has no such work. Great Britain has its Annual Register founded 150 years ago by Edmund Burke, but it is a smaller volume and much less detailed in its record. On this point the London (England) Standard states lately that "There is hardly a thing local, national or Canadian of any interest about which you cannot learn just precisely what you want to know in The Annual Review; and it would be hard to find the same of any other work of reference dealing with this or any other country."

The 1910 issue of The Canadian Annual Review contains 125 divisions, 740 pages of reading matter, and 40 illustrations of the men of Canadian prominence during the year. Some of the chief subjects dealt with include an elaborate history in its every phase of the naval question, origin, progress, and the home rule question. Liberal, Conservative, Imperialist and French-Canadian views; the death of King Edward and accession of King George so far as those events touched on Canadian history; a review of Lord Grey's last year as Governor General, Canada's part in the British elections of 1910, a record of the Canadian visit of General Baden-Powell and Sir John French; a history of the Queen's Own visit to England; Mr. T. P. O'Connor's tour of Canada; a full review of the Laurier-Bourassa's policy and the progress of Nationalism in Quebec; a full record of the Laurier administration in Quebec; a full review of the Laurier administration in all its departments and policy; a review of Mr. Borden's policy and the work of the Conservative Opposition; a survey of the legislation and debates of parliament in 1911; a complete history of Sir Wilfrid Laurier's Western tour and of the important Grand Growth of the Dominion to Ottawa; a review of the tariff situation and the position of the manufacturers.

The interesting and eventful Drummond-Arthabasca by-election is reviewed at length with a record of the Nationalist, Liberal and Conservative opinions expressed in the contest; the Militia, Immigration, progress, the Orange Order, the Canadian Club, the Canadian Board of Trade, the Municipal organizations of the country and the Ecclesiastical Congress of 1910 at Montreal are all dealt with in full detail. The growth of cities, towns and villages in Western Canada, the question of municipal government, the Woman's Suffrage, propaganda and Socialist policy, Legal and judicial events of the year are dealt with. Some of the provincial affairs treated include an elaborate study of the development in Cobalt and the Porcupine, and the Northern Ontario general election; the Whittier Government's political conditions in the province; the progress of the Niagara Power Enterprise; the question of bilingualism in the Dominion; the Ontario-Quebec Government's policy at the pulp wood question; Natural resources and development in Nova Scotia and New Brunswick; Government Ownership and Control of Elevators in the West; the Manitoba General Election and party in that province; the Rutherford Government crisis and Great Waterways Railway Issue in Alberta; the McBride Government and political conditions at British Columbia.

In general matters, Transportation, Reciprocity in its earlier stages, Financial interests, Trade and Commerce, Agriculture, Mining and Fisheries, are all considered, while elaborate tables of Canadian history of the year, obituary, university appointments and honorary degrees, appointments and elections to public office, and statistics of national progress are given. To all who desire reliable information upon all phases and sides of Canadian problems and development this work can be heartily recommended.

THE NEW AND THE OLD--A CONTRAST

To the Editor of The Standard: Sir,—As we read the Telegraph's silly editorials and alleged "poetry," we wonder how far the editor or members of the staff have travelled on New Brunswick roads. I would like to have had one of the staff with me on a drive I took this week, starting at Shediac and going to Roxton via Cocaine, St. Anthony, Mt. Carmel, St. Paul and St. Norbert, over 80 miles. First about five miles from Shediac we came to a fine new steel bridge, and just beside it is the old one which was unsafe for at least four years under the old government, and about the time the Hasey government got the new one the old one allowed a team and load to go in the river. The two represent the two governments—the new safe and good, the old, rotten and bad. Then between St. Anthony and St. Paul we find a good stone bridge replacing an old rotten one. Between St. Paul and St. Norbert, we find two stone bridges replacing old rotten bridges, unsafe for years. There are many small bridges I have not mentioned, but I hope like any man to look those bridges over. They are the real permanent kind and will be a monument to our local government when the present generation have passed away. It is the same all over the province. Yours, ONE WHO HAS USED THE BRIDGES NAMED FOR MANY YEARS.

County Buys Land. A four acre tract of land in Fairville was on Thursday purchased by the county from Mrs. Percy Olive and Samuel S. Hayes, for \$650. The land is to be used as the location for an septic tank in connection with the water system in Fairville.

THE CANADIAN OARSMEN DID WELL AT SARATOGA REGATTA

Saratoga, N. Y., July 28.—Canadian oarsmen did well at the big regatta this afternoon, Butler, of Toronto being the particular star.

TODAY'S GAME SHOULD BE A HARD FIGHT

Those who saw the St. John's take St. Stephen into camp yesterday were brought to a realization of the fact, that though Joe Page's warriors are leaders at the wrong end of the league, they are by no means a negligible quantity in the race.

Fans who saw Al White's stellar work in yesterday's game will not be surprised if he is to join faster company when he finishes his season here, and is to report to Comiskey of the Chicago White Sox about the first of September.

The team looks good, and with a repetition of yesterday's performance fans should have a chance to sing "Hail the Conquering Heroes Come," to watch the flag. The game starts at 3 o'clock.

JUNIOR BASEBALL

The Junior Acadias scalped the St. Peter's Juniors last evening 11 to 3. Foley and Ritchie did the trick for the victors and McIntyre and McNutt were between the points for the losers.

The Royal Georges of the Schofield Paper Co. put the kibosh on the York Point Stars last evening by a score of 7 to 6.

Both the St. John Teams Won Their Ball Games Yesterday

Marathons Strengthen their Position at Top of League by Defeating Woodstock -- Joe Page's St. John's Had an Easy Time of it with St. Stephen--Frederickton Defeated Calais.

N. B. AND MAINE LEAGUE.

Yesterday's Games. At St. John's—St. John's 10, St. Stephen 1. At Woodstock—Marathons 4, Woodstock 2.

At Calais—Frederickton 4, Calais 3. The League Standing. Marathons 11 6 .647 Frederickton 9 5 .643 Calais 8 6 .571 Woodstock 7 10 .412 St. Stephen 6 9 .400 St. John's 4 9 .303

At St. John's—St. John's vs. Calais. At Frederickton—Marathons vs. Frederickton. At St. Stephen—Woodstock vs. St. Stephen.

St. John's, 10; St. Stephen, 1. Joe Page's Marathons took the St. Stephen Thistles into camp yesterday afternoon on the Marathon grounds in a league game by a score of 10 to 1.

The first Thistle to reach second base was Art Finnemore in the fourth inning, and he stole there. Hurley was the next to reach the No. 2 bag, and that was in the 7th. Then three men got past the second base in the eighth, and the only run by the Thistles was made in this inning, and this was on a very close decision at the plate. In all only five visitors got as far as the second base in the game.

The failure to hit Paquette, and the poor pitching of the St. Stephen twirlers along with good hitting by the St. John's was the reason for the one-sided nature of the game. At the finish of the eighth inning to allow the St. Stephen men to catch a train. They had then been playing ball for two hours and had the tall pitcher, Crowley, went in the box at the start of the game for the St. Stephens. He was attired in a bright red shirt, and he presented the appearance of a scarlet lily as seen in a picture book. The shirt was wide open at the front, showing his chest, but no tato signs could be seen about his chest or neck, as that is said to be the cause of the poor attempt he made at pitching.

The first man to face him was Siney, and he walked to first on a base on balls. Pinkerton was next, and he hit to Finnemore at second and Siney was put out. The next man to face him was Ramsey, and the way that he walked the ball to left field for two bases was enough to make a pitcher ill. Pinkerton scored on the hit. Sabourin fouled out. Then Sullivan stepped up to the plate, and like Ramsey, he smashed the ball on the seam and it went out to the left field fence for two bases, and he was out. The tall pitcher, Crowley, went in the box at the start of the game for the St. Stephens. He was attired in a bright red shirt, and he presented the appearance of a scarlet lily as seen in a picture book. The shirt was wide open at the front, showing his chest, but no tato signs could be seen about his chest or neck, as that is said to be the cause of the poor attempt he made at pitching.

Frederickton Here Monday. Arrangements were made last evening between the managers of the Marathons and of the Frederickton's for an exhibition game to be played here on Monday between the two teams. The York county team has not been seen here for some time, and Monday's game should prove a drawing card.

Dr. Hamilton's Cure for Pimples. All skin diseases such as pimples originate through failure of the kidneys and liver. All taints that block the avenues of health must be removed. Dr. Hamilton's Pills do this quickly. They cleanse the system, make the skin smooth, restore roses to the cheeks and give clear, dainty complexion. For good looks, good health and good spirits there is nothing so sure as Dr. Hamilton's Pills. 25c. boxes at all dealers.

Evans Goes to Capital. Umpire S. Evans, who officiated here last Saturday has been appointed by Frederickton as the official umpire in Frederickton. Evans is a good arbitrator and his decisions in recent games here gave entire satisfaction.

A GOOD ENTRY LIST FOR THE MOOSEPATH RACES

Next week should see something doing at Moosepath. Followers of the racing have been rejoicing in the anticipation of a meet here, and the list of entries for the different events has been awaited with interest. From a glimpse at the accompanying list of speeders, it is obvious that things will be lively on the turf at Moosepath on Friday and Saturday next.

Already there are signs of activity at the track and the clatter of hoof beats will be heard for the next few days. The horses have begun to arrive for the meet, and those who know say that there is some likely looking horseflesh in the string already on the scene.

The different events to be run off during the meet are the free-for-all, 2:30 trot and 2:20 pace, the 2:14 trot and 2:17 pace.

It is undecided yet what the programme for each day will be, but an announcement will probably be made early in the week. The list of officials for the meet is also a matter of conjecture as yet, but it is expected that the officials will be selected this evening.

The list of starters for the St. John's with their records has been completed and is as follows: Frank Patch, 2:14 1/2—James Adams, Charles King, 2:14 1/2—F. B. Rideout, Laura Merrill, 2:14 1/2—F. Rideout, Thoughtful, 1:13 1/2—M. V. Douce, Gallagher, 2:03 1/2—L. R. Acker.

Owing to the marked interest shown in the races, the St. John Driving Club has succeeded in obtaining excursion rates over the C.P.R. and I.C.R. railways on August 2, 3, 4, 5, 6, good to return until the seventh of August. With promise of good racing and with excursion rates at an added inducement, it is expected that all roads will lead to Moosepath on Friday and Saturday.

RESULTS OF THE BIG LEAGUES

Table with columns for American League, National League, and Eastern League, listing teams and their records.

"AL." WHITE WILL GO TO A BIG TEAM

Joe Page, manager of the St. John's, is always on the scout for promising players for the big league managers, and the latest man he has had signed is Edward A. White.

White was recently brought here to catch for the St. John's and has made good. He is a hard worker and his work in yesterday's game was highly commented on.

Mr. Page says that other big league clubs have options on some of the players now performing in the Maine and New Brunswick League games.

Lyack Filed to Black. The following were the players and the score by innings: Marathons—Winters, ss, Williams 2b, Donahoe 2b, Connolly c, McGarry lf, Riley cf, Nelson rf, Lynch, lb, Sweet p.

Woodstock—Black cf, Wilder lf, Keane, ss, O'Donnell c, Allen lf, Paquette 2b, Mayo lf, Wessinger 3b, Urquhart p.

Marathons 4; Woodstock 2. Woodstock, N. B., July 28.—The Marathons with their star twirler, Al Sweet, in the box, gave the Athletics a defeat this afternoon in one of the best games of the season, the score being four to two.

THE KING'S TACT AND QUEEN'S KINDNESS WON ALL HEARTS

Human, Sympathetic Attitude of King George and Queen Mary, Particularly in Dublin, Made Vivid and Lasting Impression on Even Lowliest of Their Subjects—Tact of Duchess of Connaught.

London, July 24.—Now that Ireland's "lead miller" straight from the warm hearts of the Celtic Wales' homage, offered in raucous sounding consonants, and bony Scotland's ringing cheers from Highlanders and Lowlanders alike, the pleasant memories to King George and Queen Mary, the newspapers of the United Kingdom are as one in declaring that from the day on which the monarchs were crowned in the old Westminster Abbey the King, by his unfailing tact, and the Queen, through her womanly kindness and consideration, have won their way into the hearts of all their subjects with a celerity that seems marvellous when one reflects upon the coldness with which their names were received only a short six months ago.

Correspondents in Dublin vividly portrayed the tumultuous welcome of the Irish, but the Irish are always enthusiastic, and when the cheers along the way seem to have forgotten all about the memorable visit, were it not for the human sympathy which attended the royal visitors, who received cordially and kindly and then left the heartstrings of the Celts by their deep consideration for the poor and their earnest and manifest desire to better the condition of the lowly.

When King William, Queen Victoria and King Edward visited Ireland, they were welcomed with noisy hurrahs from the mob and loyal, though more reserved greetings from the nobility and gentry, but they found no permanent lodgment in the hearts of the people. When they left the peasant became a bit of history that's all.

DOROTHY WHITNEY ENGAGED TO PROMINENT FINANCIER.

Of worldwide notoriety is the engagement announcement in New York of Miss Dorothy F. Whitney, daughter of the late William C. Whitney, to Mr. Willard D. Straight, of Oswego, N. Y.

Miss Whitney is well known and greatly admired in society and has travelled extensively in Europe, where she is at present. Her fiancé, although only thirty-one years old, is a financier of note, who had a prominent part in getting through the recent Chinese loan.

SUGAR TRUST OFFICIAL QUIZZED BY CONGRESSIONAL COMMITTEE

"Live and let live" is the policy of the American Sugar Refining Company, according to the testimony given by Mr. Washington B. Thomas, chairman of the Board of Directors of the company, in the course of the inquiry by the Congressional committee investigating the sugar industry in New York.

Mr. Thomas also testified that at the present time his company only controlled forty-two per cent of the sugar business, whereas in 1890, when it was organized, it controlled more than ninety per cent.

AUNTY PATERSON — "O, My! we've had to resort to artificial respiration several times since Borden's hot wave struck us from the West."—From the Toronto News.

The Sunday School Lesson

THE DUST COVERED BOOK DISCOVERED.

S. S. Lesson by Evangelists. July 30th, 2 Chron. 34:14-33. It seems almost incredible that the grand old Book could have been lost or forgotten, yet so it was and how it happened nobody knew.

Many and profitable are the speculations regarding this Book. Some think it was the Book of Deuteronomy. Others that it was the whole Pentateuch which seems the most reasonable view, for while the warnings against the idolatry of the heathen were found in Deuteronomy, the instructions for the Passover which he afterwards observed were found in Exodus.

Torry says that "through there are fifteen places in the Old Testament referring to 'the law of Moses,' 'the Book of Moses' and only one mentions 'the book of the law by the hand of Moses,' from which we gather that it was the original MS. of the law as given by God to Moses in Sinai.

Such the same thing happened in Europe in the dark ages. Luther was twenty years old before he saw a copy of his Word of God. When he then discovered one chained to a wall in a crypt of a monastery it was not only bound with iron but also in a dead language.

DEATH VALLEY PURE EXTRACTS

Perils of Forbidden Region are Still Beyond Human Strength to Overcome—It Requires Three Nights with a Team to Cross the Trail, which is Seventy-five Miles Long—Will be Conquered Some Day by the Automobile.

Rhodes, Nev., July 23.—New stories of the perils of the Death Valley region are still being told. The most foolhardy will attempt to reach the Panamints through this gateway at this time of the year. The heat of Death Valley in the summer months is fatal to the average man. Even those most familiar with desert travel during the heated term will find it a supreme task to cross Death Valley during July or August, with the best of equipment.

Very few persons can grasp the perils of this forbidden region. The wealth of the Panamints cannot be sufficient to compensate any one for the risk of a trip to that region at this time of year. If the adventuresome compel him to enter from the Nevada side, if he is not overcome by the heat he will have sickness at the sight of the graves any time he attempts to enter from the Nevada side.

Death Valley lies between the Funeral Mountains and the Panamints, near the southern boundary of Nevada, in California. It is appropriately named, and in July and August is the most revolting spot on earth. The valley lies 200 to 300 feet below sea level, and the heat rising from the mighty stretch of sand and borax is intolerable. It burns into the brain and so depresses the sufferer that those who escape find it impossible to convey to others any idea of the horrors. Water, of course, is very scarce along the trails and of the vilest quality.

There are three known trails across Death Valley, and these are marked with little heaps of stones that cover the bones of luckless adventurers. Only a few of these are known, it being a source of wonder that so few prospectors carry anything with them to serve as a means of identification.

No man can cross Death Valley during the daytime in midsummer. No animal is sufficiently hardy to do so. The trails are often lined with rattlesnakes which crawl into the shoes of the traveler, and he is often struck viciously at every passing object. Burros are often thus struck, but these hardy creatures seem to show the ill effects of a bite, other than a few hours of unusual listlessness. Prospectors protect themselves with heavy boots.

But Death Valley will be conquered one of these years by the automobile. Already some points along the western borders of the valley are reached by automobiles, but, as is generally the case with nature, the greatest riches are stored in the more inaccessible places, and no automobile can reach the Mecca of the more ambitious Death Valley wealth seekers. There will be disappointments and sacrifices of life, but the riches of the western slope of the Panamints will be plucked from the foothills and given to civilization.

NEW YORK'S MAYOR INVESTIGATES CHOLERA SITUATION.

The cholera situation in New York is still causing some concern to the authorities in New York and Washington. Several experts who have been directed by the United States government to make a thorough investigation of the conditions are now at work on Hoffman and Swinburn islands, where cholera victims are detained.

LEAGUES WELCOME COLLEGE STARS

SCOUTS Keep an Eye on the University Diamonds, and the Road to Fame in the Professional Ranks is Smoothed When the Candidate Shows any Signs of Promise

(New York Press.) Professional baseball today is crowded with men from the college ranks, but not over-crowded. For any good scout will tell you that there is not enough high-class baseball material in the country to over-crowd two big leagues. It has been natural for the club owners to turn to the colleges for fresh material, and in the main they have not been disappointed, for although some have failed to "make good" in fast company a large proportion has settled down to big league baseball and not a few are stars of the first magnitude. It is seldom that a college player creates quite such a sensation as "Buddie" Collins of the Athletics, but the chance is always there, so while the scouts are glad enough to scour the lots and the bush leagues for new timber, they make it a point not to overlook the colleges. The college player is more than well come, and he can rest assured that if he fails it will be his own fault, and not due to any lack of desire on the part of his professional companions to help him in every way.

Times have changed since Fred Tenney established the college world by going in for professional baseball, and Tenney could a tale unfold about the old days, when the college player was looked upon with suspicion, was roughly handled, and generally humiliated whenever opportunity offered. He could tell of the passing of Barclay de Lafayette and of the fate of some of the other collegians who did not fit in with professional company and sank instead of rising in the scale. But Tenney has lived through several periods of professional baseball and has seen the game as a profession improve by leaps and bounds.

Looking to the Future.

Players agree, both college and non-college men, that the average in the two big leagues is far higher than it was twenty years ago. The players are more seriously minded—they look to the future, for they know they cannot last forever in the game, and it will be well when they retire to be "well heeled" for the next business venture. So it is that the college man finds the transition easy from the amateur to the professional field—finds friends among the non-collegians who are quite as earnest as he is, and whose uniforms, by the way, are apt to be cleaner than those worn by his college team in its big games. There are still players in the big leagues, of course, who affect the careless manner and the soiled uniform, but even these are not to be judged by appearances.

It was appearances, such as this, that completely fooled a stout personage in a silk hat at American League Park some years ago. Nick Altrock was pitching for the White Sox at the time, and the Highlanders were under the management of Clarke Griffith. Altrock, although in his street clothes, an extremely good looking young man, was a tough looking citizen when on the field. The large spectator in the silk hat singled him out as a target for scorn. Passing Griffith as the teams changed places after an inning, Altrock stopped to whisper to Griffith.

Player and Grammarian.

"Hey, you, Altrock," bawled the noisy one in the silk hat, "you can't tell Griffith nothing!" Altrock doffed his cap politely and stepped over near the stand. "I beg your pardon," he said, addressing the fat one, "do you not mean to say that I cannot tell Mr. Griffith anything? Is not that the correct grammar?" Everybody in the stand had a laugh at the expense of the fat man in the silk hat, who thereafter remained sullenly silent. The incident is trifling, but it is line with the tendency of the professional ball player to make the most of himself, and as a result there is nothing when the men are on the field to indicate which is the college man and which the non-collegian, save that the latter may show a keener knowledge of the fine points of the game.

So it is among "muckers" that the young collegian finds himself when he finally develops to take up the professional game. He will find here and there a man who is apt to be uncouth from lack of early advantages, but the vicious man or the "rounder" is rare in either of the big leagues. Times have changed since the days of Mike Kelly, and it is no longer good form to play baseball all day and stay up all night. Poker has given way to pinocle and billiards, and the ball team one finds in the hotel corridor is as mild as a set of men as ever demanded the sacrifice of an umpire. The college bred man need not be ashamed to appear in the hotel with them, and he sometimes makes no better an appearance than the rest of the crowd.

The college man "breaks into" professional baseball for the principal reason that he is besought so to do. The scouts, the managers, and the club owners are after him and if he has anything at all in him he will get every chance in the world to show it. The college player is easy to handle, he has brains and often personality. If he "makes good" the crowd promptly makes him a favorite, and he becomes a drawing card. The crowd wants the non-college player to cater to its amusement by monkey-shines on the coaching line and that sort of thing, but it expects the collegian to comport himself with all due modesty, no matter how well he may be doing. It is doubtful if any college player, even Mathewson, was so heartily cheered as was Arthur Devlin, then fresh from Georgetown, when he joined the Giants some years ago. Devlin set a terrific batting and fielding pace, but it was the quiet style of his play, as much as the execution he did, that earned the applause.

While the crowd may be critical, it will give the collegian a fair chance, and will sometimes stick to the newcomer long after the management has found that he will not do a permanent acquisition, as was the case with "Tot" Murphy, the diminutive shortstop who came down from Yale to join the Giants years ago. Murphy was smaller than Leaguer of Cornell, who is now with the Highlanders, and the recruit from Ithaca is small enough.

There are few if any professions that the college graduate can enter

that will pay him so well for the first five years as baseball. Many collegians are glad to pick up the money for a couple of years, in order to give them a "stake" when they begin the practice of law or of medicine. On the other hand, a great many players who have come in contact with the collegians, have been fired with the ambition to take up the study of some other profession. The cases of John Wray and Hughie Jennings are familiar. The baseball ranks are full of doctors, dentists and lawyers who have really earned degrees, and who have become ambitious through daily contact with the college men on the team. So the thing works both ways, and for the good of all. Most of the players take up some sort of work in the winter, which is in sharp contrast with the old days when these months were idled away. The presence of the collegian has helped to raise standards, and every man will gladly turn to help him in the finer points of the game, which have to be taught to every newcomer no matter what his individual dexterity. There is practically none of the hazing that was so much in evidence in the old days, and, of course, no tempting of the youngsters from the straight and narrow path. Time was when the whole team conspired to "show up" the recruit, as cruel a practice as ever appeared in baseball. But at morning practice nowadays, the players are only too glad to coach the newcomer from college, sometimes a little roughly, perhaps with plenty of "joshing," but always kindly in the long run.

Watching the College Stars.

Because of the necessity for keeping a close watch on college diamonds, there is a demand among the big league clubs these days for scouts who do either a little or a great deal of coaching in the college ranks. Bill Clark, who handles the Princeton team, keeps an eye on the Tigers in the interests of the New York national league team, while George Huff, who coaches the University of Illinois, one of the best big league fencers in the country, is still pitching for the crickets, there the right hand scout for Frank Chance, captain and manager of the Cubs, by the Chicago Cubs is in evidence at the university field. Every bit of generalship that Huff has learned from Chance and that he has worked out himself is brought to bear in the college games, and as a result the Illinois men turn out almost uniformly good teams, and some good pitchers, notably Reulbach, as well as infielders and outfielders, to the major league team.

Mack's Southern Scout.

Down south, Oesie Schrockenogot is one of Connie Mack's most industrious scouts, and before the big season opens each year he is sent down there to look over the Southern colleges. In recent years the Southerners have not made a very strong showing in the big leagues, but in the past many a man from the colleges in the cotton region lasted at least a year or two in fast company, and the old-time scout will tell you that the field is still well worth watching. Even one good man in four or five years would make the effort worth while. At the same time, the Southern scouts look after Augusta, which sometimes has promising material, and keep an eye on the mill section where Joe Jackson of Cleveland comes from. The field of the scout on the lookout for college stars extends from coast to coast, and from Texas, in the South, to Vermont, in the North. The University of Vermont, by the way, has vied with Holy Cross in sending men to the big leagues, although some of them got no further than Boston. From the Vermont institution came "Young Cy" Young, who created such a sensation when he first appeared on the mound for the Boston National league team.

Yale, Harvard and Princeton have not been so much in the running in recent years, but this was not because these institutions did not turn out good players. It simply was difficult to induce them to take a chance in the professional game. The Brown men have always been approachable, and Fordham and Georgetown, especially the latter institution, have taken kindly to the professional ranks.

Indeed, the league scouts have been so anxious to pick up the best college material that they have often begun negotiations long before the close of the college season, thereby making trouble for the youngsters, who were still playing as amateurs. Clarkson, of Harvard had the misfortune some years ago to sign a contract while still pitching for the crickets, there by bringing down about his ears a storm of criticism. Eddie Collins of

A NEW ASSIGNMENT FOR "JOE" TINKER; RUMOR HE WILL GO TO CINCINNATI

Rumor now has it that "Joe" Tinker, the great shortstop of the Chicago Cubs, is to be the next manager of the Cincinnati Reds. It is not known what "Joe" has done to deserve such punishment, for surely he is entitled to better treatment. That Cincinnati assignment is one sweet job to stay clear of.

Hughie Jennings, himself a college graduate, although long after he had carved out a career on the diamond, has plenty of informants to watch the collegians; and in Philadelphia, with the University of Pennsylvania close at hand, from which came Roy Thomas and others nearly as good, the university ball player had to hide his light under a bushel to keep out of sight of the local scouts. Any promising material from the Red and Blue teams is sure to have a fair chance in fast company.

There is not a single club in either league without the services of some man who has either college affiliations or friendships, and who may be relied upon to comb the "varsity" diamonds as carefully as the scouts do the minor and bush league fields, and even the back lots. Huff has been among the most successful of the lot, for the reason that he turns out remarkable teams at the University of Illinois, and his charges step into the faster company with a pretty thorough knowledge of the inside game. The Illinois men play closer to the league standard than do those of any other university. East or West, and practically the same systems of signs and of inside play as that used

Columbia got into the same hot water. This year Cottrill, of Syracuse was so besieged by the big leaguers that he was hard put to it to keep up his studies, and the worry affected even his ball playing so that he has not been able to do himself justice on the mound.

Although Pennsylvania State College has made no bones of its attitude toward professional baseball, willingly allowing its students to dicker with the professionals in the course of their college career, few really good players have come from that institution. Dartmouth, which has insisted on baseball purity in recent years, has not been particularly cordial to the league scout, although the Hanover institution furnished Ralph Glaze to the professional ranks.

If the college man displays anything like promising form, he should have no trouble in getting into the professional ranks, at least for a time, and it frequently happens that he will find two or more teams bidding for his services. The scout takes him under his wing, gives him a little private coaching, and then turns him over to the team manager. The youngster gets a pleasant welcome and finds that he has fallen among friends. Every ball

THE BOY SCOUTS AT THE CORONATION OF KING GEORGE

THE KING AND BOY SCOUTS.

player has his own kinks and tricks that he thinks are useful in the national game, and he is not so loath to part with them as he used to be. The newcomer finds much of the club spirit in evidence, and although the game is faster, and the requirements more exacting than those of the college coach, his professionalism does not weigh heavily upon him, and he gets as much pleasure out of victory and as much gloom out of defeat as he did at his alma mater, or at least very nearly as much.

Checkers and Billiards Popular.

Travelling with the professional team is not what it used to be, and the college recruit no longer finds himself in the embarrassing situations that were so much in evidence many years ago. Training rules are fairly strict, especially when on the road, and in most cases they are not difficult to enforce because the men realize that ten years is a long life in baseball and they want to last as long as they can. When off duty and "out for a time," men like "Christy" Mathewson and "Ty" Cobb indulge in the exciting pastime of checkers, and the very "Red" Dootin, catcher and manager of the Philadelphia National League team, betakes himself to a game of billiards when on the road. The men stick pretty well together. They learn to be clannish, and they avoid the off-duty adulation of the fans as they would the plague. The example of Arthur Raymond is hardly needed these days to point the moral of self-respect in the national game. "Raymond had \$50,000 stowed away in his good right arm," said an old-time ball player yesterday, "and he simply threw it away."

There was a man in Harvard some years ago, who played professional baseball in the summer because he needed the money, and so of course could not go out for the "varsity" team. Only those who had tried to get him to come out knew of his occupation, for a long time, and there was nothing in the man's demeanor to indicate that he was anything but an exemplary student and a true Harvard man. He did not find professional baseball contaminating. He loved the game, played it well, and made friendships among the professionals that were as lasting as any he formed in college. He has a high opinion of the professional ball player and believes that the game offers an excellent opportunity for the young college player to get a start in life.

Most of the collegians come unspoiled through their major league experiences, and most of them go on successfully in other lines of work, as doctors, lawyers, and merchants. They are among the staunchest friends of the "pro," and will stoutly maintain that if the professional game owes something to the influence of the college player, the "varsity" star has not failed to benefit through contact with men who take their work seriously, even if it is a game, and play the game for the game's sake as well as for the stipend involved, and the chance to get a start in some other business. The more collegians in the game the better, say the club owners and the managers, and they, with the graduate who can play up to the league standard, may be trusted to do their utmost to keep the profession an honorable one.

HENLEY ROYAL REGATTA AT OTTAWA

20 GUESTS BURNED BY BOLT ON TOP OF HEAD

Monticello, N. Y., July 26.—Twenty New Yorkers at a large boarding house here, were injured this morning when the house, which is run by Charles Garetzky was struck by a bolt of lightning. One woman is still unconscious and will probably die.

VOLCANO DEFRAUDS DUTIES FROM STATES

Washington, July 27.—Bongo, a volcano in Japan, is defrauding the United States out of duties on raw sulphur every day in the year. Customs officials, after a long wrestle with Bongo's case, have decided they cannot do anything about it. Raw sulphur, as most everyone knows, comes from the crater of a volcano. It is free of duty. Refined sulphur pays \$4 a ton. But Bongo's crater is so hot that it refines the sulphur as fast as it makes it.

20 GUESTS BURNED BY BOLT ON TOP OF HEAD

There were more than 50 guests at the Garetzky house and while the storm was in progress the 20 who were injured were sitting in the hall.

VOLCANO DEFRAUDS DUTIES FROM STATES

The shrewd gentlemen who own Bongo steadfastly refuse to pay duty on the sulphur and the treasury knows of no way to make them do so.

happenings of the Week

Mr. H. O. McInerney and child are visiting Mrs. McDonald in Georgetown, P. E. Island.

Mr. Kenneth Arthur of Detroit is the guest of the Misses Peters at St. John.

Mrs. Allen Magee of Montreal, is the guest of her mother, Mrs. Geo. F. Smith, Union street.

Mrs. Barclay on Wednesday for Liverpool, England. Captain Barclay will meet Mrs. Barclay at Quebec.

Hon. J. D. Hazen, Mrs. Hazen and the Misses Hazen sailed yesterday for England for Canada.

Mr. Moritz Haufamon Emery has returned from Paris and is now in Philadelphia. He will return to St. John in September.

Mr. Charles McDonald has returned from a trip to England. Mrs. McDonald and Miss Owen McDonald will not return until later.

A number of the members of the Halifax Golf Club arrived on Friday and played their annual match on the local links.

The Halifax men are: Chas. Archibald, C. A. Vans, F. T. Handsomebody, W. A. Henry, G. M. Howard, A. E. Jones, O. B. Jones, D. MacGillivray, R. H. Murray, H. H. Smith, G. A. Taylor, W. B. Wallace, B. A. Weston, H. M. Wylie.

The ideal summer weather of the past few weeks continues and every one that can takes advantage of the fact. Entertaining is pushed well into the background just now, but golf and tennis tournaments cruise on the river and jaunts to the suburbs form excellent substitutes. Week end motor trips are the order of the day for those who are fortunate enough to own cars and each week finds numerous parties touring to the different summer resorts.

The weekly tennis tea on Wednesday was in charge of Miss Travers. Miss Jack, Miss Jean White and Miss Best. Among those present were Miss Pat Young, Miss Eileen Taylor, Miss Jeannette Bridges, Mrs. Goodwin, Miss Jean Trueman, Miss Edith Young, Miss Alice Green, Miss Marjorie Penock, Miss Mollie Robinson, Miss Nora Robinson, Miss Gladys Hegahn, Miss Vera MacLaughlin, Miss Davidson, Miss Jean Garden, Mrs. Kent Scott, Miss Kathleen Sturdee, Miss Kit Schofield, Miss Emily Sturdee, Miss Connie McGovern, Miss McAvaney, Mrs. Mackenzie, Miss Portia Mackenzie, Miss Jack Messers, Jack Belyea, Noel Lee, Ernest Alward, Lawrence Wilson, Douglas McLeod, Mr. D'Arcy, Mr. Joy, Mr. Lewis.

Miss Portia Mackenzie leaves next week for a trip to western Ontario.

The Misses Armstrong, of the Park, Rothsay, gave a delightful dance at the pavilion this week, in honor of Miss Wasson Roberts of Wales.

Mr. and Mrs. J. Harrison, Mrs. Lawson and Miss Harrison, of Fredericton, are in St. John for a month.

Miss Marjorie Penock who has been in P. E. I. is at Duck Cove for the summer.

Mrs. Roy Campbell left on Monday for a visit to Littlefield.

Miss Thomas Tait was in the city this week.

Mrs. McVey, wife of Dr. McVey, who was seriously injured in a motor accident this week is much improved.

Mr. and Mrs. John Sealy arrived in the city on Wednesday, returning from a two months trip to Europe.

Mrs. Will Green, Miss Alice Green, Miss Nora Robinson, Miss Lilly Raymond, Miss Mollie Robinson, Miss Edith Young, Messrs. Hugh McLeon, Dan Skinner, Arthur Rankine, George Lockhart and Percy McAvity have returned from a delightful camping trip to Belleisle.

Miss Margaret Black and Miss Marion Black of St. Stephen, were in the city this week.

Sir Mackenzie Bowell, Hon. Hugh Guthrie and Hon. Geo. E. Foster, have sailed from England for Canada.

Mr. John Black, who has been acting manager here during Mr. Eason's absence, has returned to Woodstock.

J. R. Young, of Winnipeg, who has been abroad for the last six months, is the guest of Dr. and Mrs. J. Boyle Travers, Lancaster Heights.

Mr. H. P. Timmerman of Montreal, was in the city this week.

At Grandville, N. S., on Wednesday, Mr. and Mrs. Edward Manning celebrated their golden wedding.

Mr. and Mrs. Walter Johnson of Montreal are receiving congratulation on the arrival of a daughter.

White straw hat with velvet facing.

er office is off on a vacation at her Shedin home.

Miss Laura McGrath of Chatham is the guest of her cousins the Misses McGrath here.

Mr. and Mrs. James Calder are returning to their P. E. I. home.

John A. McKendry of Dougloustan is home on vacation from Edmundston, N. B., where he manages the Royal Bank.

Mrs. John Clark is visiting her daughter, Mrs. C. H. Robbins, Picotou, N. S.

Mrs. John Montgomery and daughter, Agnes, are visiting Mrs. William Montgomery in Dalhousie.

Mr. and Mrs. F. H. Deacon, of Toronto, accompanied by their children, sailed on Saturday from Montreal for London. Mrs. Deacon is the daughter of Hon. H. C. Emmerson.

Mrs. J. B. Snowball and Miss Lilian Snowball have returned to Chatham after a lengthy visit in England.

Mrs. Warren Winslow, of Chatham, is at Bay Shore for the summer.

Mr. and Mrs. Andrew Jack are to play in the golf tournament in the finals for the Weldon cup next week.

Madame Harriet Lebade will give an Interpretation of Gossip, an adaptation of Il Goran Gallots by Jose Echevaray, on August 3rd, at the Opera House, under the auspices of the Society for the Prevention of Tuberculosis.

Miss Gertrude Mills arrived in the city on Thursday, and is visiting Miss Mills, Coburg street.

Mr. and Mrs. Wm. Vassie spent their week-end at Acamaic.

Mrs. Fairweather and Miss Fairweather, who have been visiting Mr. Knowlton, left this week for their home in California.

Miss Aiken, of Newcastle, sister of Sir Max Aiken, is visiting in Vancouver, B. C.

The marriage of Miss Louise Beer, daughter of Mrs. William Beer, to Mr. Frank Moody will take place in Toronto on August 1st.

Geo. C. Cutler was at the Royal Hotel Saturday. He had just returned from a salmon fishing trip, having been at the Bonaventure Salmon Club, Quebec. He had as guests the United States secretary of the navy, George W. Meyer, the assistant secretary, Benjamin Whitrop, General Peabody and George Sheldon, a New York banker and Republican leader. Mr. Meyer and some others are now on the Restigouche. Mr. Cutler left on the Boston train Saturday night.

The marriage took place at St. Andrew's church, London, England July 12th, of Miss Josephine Mary, daughter of Mr. Charles A. Heales and Mrs. H. Heales, of Cornwallis, Nova Scotia, and Mr. Norman Brown, of Vancouver, B. C., son of the late Mr. Christopher Brown, of Belfast, Ireland. The ceremony was performed by the Rev. Basil Castleden. The bride who is a graduate of Dalhousie College, was attended by her sister, Miss Gertrude, the groom being supported by his friend, Mr. A. Lewellyn Jones, of Swansea, Wales. After a few weeks' sojourn on the continent, Mr. and Mrs. Brown will return to Montreal, where Mr. Brown is completing his course in medicine at McGill University. The bride is a niece of Dr. Joseph Andrews, of this city, and a sister of Mrs. VanDorsser, of Winnipeg.

Mr. Douglas Clinch is spending a few weeks in Nova Scotia.

The provincial tennis tournament will be held on the local courts the 7th of August.

NEWCASTLE

Newcastle, July 23.—Mrs. F. G. Childs and son Ralph, who had been visiting the former's brother, M. Kane of the Commercial Hotel, returned yesterday to Mechanics Falls, Me.

Mrs. C. C. Hamilton is visiting the Misses Evans, Shedin.

The Misses Meshan of Bathurst are visiting their uncle, Rev. Father Dixon.

Miss Moore of the Royal Bank is spending her vacation in Nova Scotia.

HOW TO WASH LINEN SUITS

Woman who Makes a Living at it Tells the Way—The Great Point is to Shape the Partly Dried Frock Over a Form—Sun Drying for White Material and Shade for Colored—Two Suits for all Summer.

(New York Sun.)

"We work with linen suits exclusively and get all that we can do," said a young woman who does a good business laundering linen suits at a summer resort.

"Though our method is new, it is quite simple. You have never worn a wash chambray glove you know how much better it fits if allowed to do the last drying on your hand. We apply this idea to linen suits and as a result they keep their shape to perfection. The trouble with washing linen suits in the regular way is first the wringing. Wringing even a pocket handkerchief and you will find it crooked, needing quite a little pulling to get back in shape. Wring a linen or cotton suit and it is almost impossible to get it in shape again.

"We never wring our clothes in the usual way. After a garment is washed the wringer is pressed out. The wet garment is folded and placed on a strong homespun sheet. The sheet is then wrung. It requires two persons to do it, but the garment is in no way twisted out of shape. After wringing it is partially dried out of doors, in the sun if it is white, in the shade if colored. Even tan linens should be dried in the shade.

"Before it is entirely dried it is brought in the ironing room and ironed, not dry; then it is placed on a form and by pulling here and pressing there a perfect shape is attained. Our object is to get it to look and fit as it did when sent home by the tailor.

"Linen suits, whether cut and made or made to order, may be washed any number of times and returned in the best shape.

"The first step in our work is to examine the linen suits as they are brought in to us. If they are poorly cut we return them, explaining why it will be impossible for us to undertake to launder them. As a rule, we are returned with the request that we do the best we can. If the cutting is quite hopeless we persist in our refusal and advise dry cleaning.

"The great objection to linen suits is that they get out of shape when washed. Among women of wealth, the custom is to wear a linen suit until it was sent to the laundry and then discard it. Now that even the tailor suits are being so elaborately embroidered this is too extravagant even for the very wealthy. So many women have been having their suits ripped up, laundered and returned that I had to make a specialty though it is better than discarding the suit entirely.

"It was being called on to remake a fashionably embroidered suit of this kind that I had the idea of opening my laundry. With my knowledge of sewing and fitting I felt that it would be quite safe to guarantee a fit. Then I had the idea of opening my laundry. With my knowledge of sewing and fitting I felt that it would be quite safe to guarantee a fit. Then I had the idea of opening my laundry. With my knowledge of sewing and fitting I felt that it would be quite safe to guarantee a fit.

SPANISH LINEN TROPICAL SUIT SHOWING UNLINED COAT

The accompanying picture shows Warren E. Smith and his Spanish linen suit, which he has designed for hot weather. Mr. Smith comes from New Orleans, and has made a study of garb for torrid climates. He advocates Spanish linen, and says it is the best fabric for hot weather. The product comes from Barcelona, and can be made in every shade.

Bronchitis Creeps into Consumption.

Coughing weakens the tubes and makes a resting place for the bacilli. Why let Bronchitis become established? It's easy to cure—just inhale Catarrhone—breathe in its soothing balsams and relief comes at once. Catarrhone is so certain in Bronchitis that every case is cured. Throat is strengthened, cough stops, irritation goes away, all danger of tuberculosis is prevented. For throat trouble, catarrh and coughs, Catarrhone is The Remedy, 25c. and \$1.00 sizes at all dealers. Get it today.

NEWCASTLE DELEGATES TO MUNICIPAL UNION

Newcastle, July 23.—At the adjourned meeting of Newcastle town council last night, Ald. H. H. Stuart, mayor Pedolin and Ald. T. W. Butler were elected delegates to the Union of N. B. Municipalities which meets here on Oct. 11th and 12th.

Ald. Stuart was deputed to prepare a paper on Taxation, to be read before the convention.

The mayor and Ald. Dickson, Staples and Sargeant were appointed a committee to make necessary arrangements which will include the chartering of a boat to give the delegates a sail on the river.

Ald. Clark's financial statement showed that after deducting expenditures and liabilities incurred to date, the salaries for the whole year, the following departments stand as follows:

Left for balance of year—public works, \$450; police, about \$170; park and fire, over-expenditure, \$278.21.

MARK TWAIN'S WORKS.

If you are interested in obtaining a complete set of all his books at the former price on the easy payment plan it will cost you nothing to get full particulars and a new thirty-two page book 'Little Stories About Mark Twain.' Address Box 499 Standard Office.

P. R. A. Competitions.

The annual rifle meeting under the auspices of the P. R. A. will be held this year on the Sussex ranges commencing Aug. 15th. This is a week longer than usual. The prospects now are for a big entry list. Maj. Frost, secretary of the association, is busily engaged in making preparations for the coming of the marksmen.

MISS ELSIE STEVENS UNDERGOES OPERATION

Miss Elsie Stevens, young daughter of Mr. and Mrs. Richard Stevens, is seriously ill at the home of her parents, in Newport, B. I. Miss Stevens has just undergone an operation for appendicitis.

WATERBOROUGH NEWS.

Waterborough, Q. C., July 27.—A barn owned by Brun Smith, of this place was destroyed by fire about 3 o'clock yesterday afternoon, and it was with difficulty that an adjoining barn containing horses and machinery was saved. It is believed that a tramp set the barn on fire, as one was seen to leave the barn shortly before the fire broke out.

Hay is on in full swing here, and so far the hay crop looks good, and of a better quality than last year.

Capt. William Gale of St. John, is visiting his brother, George H. Gale, of this place.

Mrs. Nellie and Annie Van Wart, who have been spending a three weeks' vacation the guest of the Misses Louise and Stella Wiggins, returned to their home in St. John by the steamer May Queen today.

Mrs. Edith Wasson left today for Bartlett, N. H. where she will spend some months for her health.

The Cooling off is Pleasant But the Kidney Trouble isn't

Of course, you are going to keep as cool, as you can these hot Summer days. At work or play, one is bound to get over heated and it is so natural to cool off in a shady spot or pleasant breeze. But look out for Kidney Colds.

A slight chill, a pain across the back or between the shoulders or in the abdomen, is a warning that you have taken cold in the Kidneys or Bladder.

A box of GIN PILLS will put you right. They go at once to the spot and soothe the inflamed Kidneys and Bladder and relieve the pain.

Gin Pills contain the healing medicinal properties of Gin as well as other valuable curative agents. It is the combination of all these ingredients that gives Gin Pills their wonderful healing virtues. Don't take substitutes. Remember—every box of Gin Pills is absolutely guaranteed to cure all Kidney and Bladder Troubles, or money will be refunded. Be on your guard against Summer Chills—Keep Gin Pills handy. 50c a box—6 for \$2.50—at all dealers, or direct by mail on receipt of price.

For the INDUSTRIOUS NEEDLEWOMAN

By ADELAIDE BYRD

A Nasturtium Centerpiece

HERE is one-half of a centerpiece that is just twice as pretty in the completed work, and that's saying a good deal, isn't it?

I think that this design will be very effective on tan linen, worked with two shades of yellow and a pale green for the leaves and stems.

The idea is a swinging design. By that I mean that when you are transferring the design to your linen you will swing the circle around so that the lower scallop will join the one above. There must be a union of the small leaf and the larger one when you continue the design.

This design is very quickly done with long-and-short stitches in from the edges of the petals. The leaves can be worked in heavy outline stitch with green thread and the veins in the same stitch. In this case, work the turned-up

edges of the leaves solid.

If your time be not curtailed, work the flower forms in solid stitch, keeping the leaves in green outline. Let me suggest a little idea that has occurred to me: After a heavy outlining and veining of the leaves, why not fill in with stencil dyes? This will give a solid effect without the work that embroidered leaf forms would demand.

The scalloped edge you will first pad and then work with buttonhole stitches. A dark brown or green will be serviceable and pretty. Outline the stems with dull green thread and make the bud forms the combination of yellow and green.

For your library table, this centerpiece is a beauty. It is a little different from most designs, and is particularly recommended for lovers of yellow or red flowers.

I have seen some very pretty designs

worked in seed stitches on some of the petals, alternating with long-and-short stitches on others. A combination of solid work and seed stitches is also good, while heavy outlining with long-and-short stitches at the center gives an entirely different effect. Here and there a leaf filled in with seed stitches will offer relief at the smallest cost of time and work.

The combination of this pretty centerpiece and a bowl of the real, fresh flowers is the loveliest possible scheme for your cool living room or your breakfast room.

It will be a bright spot in the room, and you will be glad that you were "tempted."

The finished work

Designed by MARY V. FOX

One half of design

VACATION EMBROIDERY

FOR veranda work during vacation time there are many odd pieces of embroidery that can be easily made, even if you are not an adept at the art of the needlework.

The woman who enjoys a daily dip in the ocean will find comfort in a pretty cap of pique and a broad sailor collar of the same material that covers her bathing cap of rubber and finishes the neck of her bathing dress.

The cap is made by cutting a circle of pique sixteen inches in diameter, scallop the edge and finish with the buttonhole stitch in mercerized white cotton. Two inches from the edge cut slashes two inches long and the same

distance apart all the way around. Buttonhole the edges of these and run a broad ribbon through them, drawing the cap up in the same manner a dustcap is arranged. A full bow finishes this in front.

The collar to match is cut either with pointed or scalloped edges and worked around with the buttonhole stitch.

A sponge bag of buckram toweling, embroidered with the darling stitch in your monogram or a simple bowknot or flower, is an easy thing to make and a very useful thing to own.

A bag of larger dimensions made of the toweling is extremely useful to the traveler. It holds all the small things for the toilet that are so hard to put

your hand on if left loose in the hotel.

Still of the buckram toweling is fashioned a practical shirtwaist case. Cut the toweling three-quarters of a yard wide and a yard long; turn over an inch-wide hem all the way around and featherstitch in place. On one end embroider your monogram or some simple design, and fold the case over in envelope fashion, so that the edges meet evenly. With small buttons or glove fasteners catch the edges and the flap to the underneath portion of the case.

Such a covering for your fine waist fits into the bottom of a suitcase and protects the shirtwaist from dust, besides keeping them from being mussed or crumpled.

The lazy daisy

Linen Covers for Hatpins

Embroidered rings

In coarse thread

Ribbon roses

Large French knots

THE painted hatpin we have long had with us, the beaded hatpin, the lace-covered hatpin; and now, properly headed, comes the fabric hatpin head, which is either embroidered or, what is very much the same thing in effect if not in method, ornamented with ribbonwork.

Naturally the embroidery is done while the fabric—linen, usually—is still off the wooden or metal hatpin mold, which serves as the foundation. A circle is cut large enough to cover both sides of the flat mold, and the linen is then stretched tightly over the latter and sewed firmly where the pin meets the

head. Care should be taken to have just as few creases as possible, and none at all on top. Needless to say, virtually all the heads are of the same shape and size, as long or half beads would not show the embroidery so effectively.

A number of ideas are given here, and every possibility is in this line. One very stunning head is the daisy design. Each petal is made by a long stitch of thick yellow floss from the center to the end, a knot and another parallel stitch back to the center. Leaves and stems are done in stem stitch, or in outline stitch if still greater simplicity be desired.

The centers themselves are clusters of close French knots. In yellow and brown on natural-colored linen this pattern is extremely effective.

What may be done by French knots alone is shown by the conventionalized wild-rose design. The only other stitch used is the backstitch connecting the "stamens" in the center. Pious silk should again be used, old rose on white is a good combination.

English eyelet embroidery seems odd when used for this purpose; but it is most attractive, perhaps from its very simplicity. Somehow eyelet always looks best in all-white and worked in

white linen thread or mercerized cotton; but blue on white is also pretty.

To turn to the ribbon work, two varieties are shown. In the first there is a close wreath of countless tiny blossoms. Ribbon work of this sort is done by threading No. 1 ribbon on a coarse needle and embroidering with it as if it were silk thread. A loop or a double stitch will always, with the aid of colors for shading, suggest a leaf or a petal.

In the second style, where the flowers are larger and more in evidence, each rose is made first by folding and tacking down half-inch ribbon and then is caught by a few careful stitches to the linen. The leaves are made as in the former example, a single stitch sufficing for each.

The chief advantage of these embroidered hatpin heads, of course aside from their pleasantness as fancy work, is the fact that they can be made to match every hat and every costume as metal hatpins never entirely will. Remember that when you are planning the dress accessories for your new costume, and sit down and make yourself an experimental pair!

Three Ways to Transfer

HERE are suggestions for transferring the pattern before you to any material before working.

Perhaps the easiest way is the "window-pane" method. This is successful when the material is thin, like linen, batiste, etc. Pin the sheet of paper and

the material together and hold them up against the glass of a window. With a sharp pencil draw on the material the design which can be easily seen through the goods. If one-half of the design only be given, unpin the paper and turn the other side to the fabric. The strong light behind will make it plain.

If you have carbon paper, you should place the sheet between your fabric and the newspaper. This latter is on top. With a sharp pencil go over the outline of the design. The impression will be left in fine lines and will last until worked. This method is successful on heavy material.

The last way is also easy. On wax paper or ordinary tissue paper trace

the pattern before you. When the design is completed, turn over the paper and outline the pattern with a heavy lead pencil. Then place the design down on the fabric and redraw the outline, pressing hard with the pencil. The pattern will be transferred without difficulty.

Surely the way is easy.

THE WEATHER.

Lower St. Lawrence and Maritime—Strong winds and gales from the east-erly and southerly with rain.

Table with weather forecasts for various locations including Atlin, Victoria, Vancouver, Edmonton, Calgary, Moosejaw, Regina, Winnipeg, Port Arthur, Parry Sound, London, Toronto, Ottawa, Montreal, Quebec, Chatham, St. John's, and Halifax.

AROUND THE CITY

Lowest prices—You don't have to believe what we say about prices. You can prove it by doing all your shopping at The People's Dry Goods Store, No. 14 Charlotte street.

Backed Auto Into Ditch—Thursday evening a young man backed his automobile in the ditch on the side of the Marsh Road, it took another car and a team of horses to pull the auto out of the ditch where it had been for about three hours.

Returning From Yarmouth—About forty firemen from Moncton and Nova Scotia points along the I. C. R. came over from Yarmouth on the boat yesterday afternoon, after taking part in the Old Home Week festivities in Yarmouth. They left for home last evening.

Expect Good Crops—Hon. Dr. Landry, commissioner of agriculture was in the city yesterday to attend a meeting of the Board of Agriculture. Speaking of conditions in the farming industry he said reports to the department indicated that the crops would turn out well. He added that there was considerable activity among the agricultural societies, and that the farmers were adopting improved methods all along the line.

Good Roads and Bridges—Hon. John Morrissy, commissioner of public works, came from Newcastle by way of Fredericton in an automobile, to attend the meeting of the local government, which was held here yesterday. He made the run from Fredericton to St. John in three hours. Speaking of the condition of the roads he said that generally he found them in good condition. In regard to the bridges he said that in travelling 250 miles he had only seen one bridge that needed repairs.

St. John A Health Resort—Seldom have health conditions been better or the mortality lighter in St. John than during the past month. At the office of the Board of Health yesterday it was stated that the number of deaths reported during July was only about one-half the average monthly death toll. The city is comparatively free of infectious diseases, though a few cases of cholera infantum have been reported. In view of the abnormal death rates reported from other cities during the hot spells St. John people have reason to be thankful that their lives are cast in pleasant places.

Building Trades' Council—At the meeting of the Building Trades' Council held last evening, the question of the enforcement of the Factory Act was discussed, and the consensus of opinion seemed to be that one man could not do the work of enforcing the act in a satisfactory manner, owing to the extent of territory he had to cover. It was decided to approach the provincial government with a view to having another factory inspector appointed to assist in the work of enforcing the act. Reports were received from a number of affiliated unions stating that they had endorsed the action of the council in deciding to move for the closed shop principle in the building trades after September 1. There was a full attendance of delegates.

Another Schooner Damaged—A peculiar accident happened to the Nova Scotia schooner, the Wilfred, yesterday. She arrived from Barba-dos during the day with molasses, and moored in Walker's slip. At low tide when she was high and dry aground, she parted her moorings, lurched over on her side, and slid out into deep water. As she went her rigging fouled the jibboom of a large wharf, carrying away her mizzen top-mast and some of her running rigging. The other vessel, however, sustained no damage, though her jibboom was subjected to a severe strain. After the launch of the Wilfred, the surprised crew dropped the anchor, and later a tug went to her assistance and took her back to the wharf. Beyond chafing her side, she sustained no damage to her hull. This is the second accident of the kind that has taken place in this port. Some years ago a vessel slid out of the Patterson Carriette slip at low water.

Open Air Concert—On the Aberdeen playgrounds last evening an enjoyable and successful entertainment was given by the children who attend the playgrounds. Besides the children were present a large number of visitors, including many of the children's parents. Among those present last evening were Mrs. P. D. Chisholm of the playgrounds committee; Inspector Wm. McLean and Gordon Leavitt, secretary of the school board. The programme carried out by the youthful entertainers was varied, and the little ones, by the admirable manner in which they acquitted themselves, agreeably surprised their friends. Though last evening's entertainment was the first venture of the kind, the experiment was a success, and the concert will probably be repeated in a couple of weeks. In addition to those whose names were published a few days ago as taking part in the programme, the Misses Monahan also contributed to the success of last evening's entertainment.

ST. JOHN CONSERVATIVES FORMED A STRONG CLUB

Enthusiastic Meeting, Last Evening, Organized the St. John Conservative Club—Starts with 180 Members.

If any evidence was needed of the eagerness with which St. John Conservatives are looking forward to the approaching election it was provided by the enthusiasm manifested at a largely attended meeting held last evening when the St. John Conservative Club was formed.

The new club starts out with 180 members, and it is expected that in a short time the membership will be increased to several hundreds. The club will be open to all Conservatives and the membership fee will be \$1.00 a year.

The club will shortly open permanent quarters, which will be available for the use of the members every evening in the week, and arrangements will be made to have the quarters as attractive as possible.

The following officers were elected: President, Ald. R. W. Wigmore; 1st vice-president, Ald. A. O. H. Wilson; 2nd vice-president, Wm. M. Campbell; recording secretary, Chas. F. Stevens; financial secretary, Chas. M. Lingley; treasurer, John H. Burley.

A strong executive committee was also elected. After the club had been formally organized the president and other officers delivered brief addresses, expressing their confidence in the outcome of the approaching elections for the federal house.

A resolution was adopted expressing the confidence of the St. John Conservative club in the able leader of the Liberal-Conservative party, and pledging the membership to use their best endeavor to return him supporters from this district.

Sliding Mud Damaged Wharf and Schooner—Front of Eastern End Rankine's Wharf Suffered by Accident Yesterday—Schooner Calabria also Damaged.

About seven o'clock yesterday morning the mud slid out from the front of the Eastern Rankine's Wharf in the North End, and caused damage amounting to some thousands of dollars.

About a year ago James S. Gregory, who has in lease of the wharf, had quite a large amount of dredging done in front of the wharf.

Yesterday morning the large three masted schooner Calabria was lying at the wharf with the schooner Rewa lying astern. The wharf became undermined and the mud foundation slid out into deep water, taking the large schooner with it, while the wharf sank down into the hole left by the slide.

The vessel's hawsers were parted, the capstan was torn out, and the mizzen topmast backstay becoming caught in the jibboom of the schooner Rewa caused a few feet of the Calabria's mizzen topmast to be broken off.

The damaged schooner slid into deep water, and was towed to the Leig Wharf. It is stated that Mr. Gregory's loss will amount to over three thousand dollars.

Some weeks ago the Calabria, while being towed under the Suspension bridge, met with an accident, having her mast broken by colliding with the bridge. She has since been loaded and repaired and was nearly ready for sea, when yesterday's accident happened.

It was learned yesterday that outside interests were large purchasers of the stock of the Cornwall and York Cotton Company, Ltd., and that as a result these interests would be able to control the policy of the mills in the future.

S. P. Gerow, secretary-treasurer of the company, when seen last evening, verified the report which had spread about the city, but said there would be no change in the management of the mills. He added that the mills would continue to be run on full time, and that it was probable that the York mill in Courtney Bay would be enlarged in the near future.

PROVINCIAL GOVERNMENT HELD MEETING YESTERDAY

Decision to Organize Three Agricultural Societies—Minor Appointments Decided on—Valley Railway Discussed

A meeting of the provincial government was held in the city yesterday. It is understood that the St. John Valley Railway question was discussed and other important matters dealt with.

It was decided to authorize the incorporation of three new agricultural societies, one at Lever Settlement, Charlotte county, another at Cody's, Queens county, and the other at Newcastle, Northumberland county.

Several minor appointments were made and ordered gazetted. Those present were, Acting Premier J. K. Fleming, Hon. W. C. H. G. Grimmer, Hon. Dr. Landry, Hon. H. F. McLean, Hon. Robert Maxwell and the Hon. John Morrissy.

The many friends of Ralph E. Powell, son of H. A. Powell, of this city, will be pleased to learn that he has successfully passed the examination for Fellowship in the Royal College of Surgeons, recently held at Edinburgh, Scotland.

Mr. Powell made a splendid showing, obtaining a considerable margin over the percentage of points necessary for admission to a Fellowship in the Royal College. He is a young man to have achieved such an honor, and a brilliant future is predicted for him.

The committee in charge of the arrangements for the banquet to be tendered Premier Hazen on his arrival from England report that tickets are selling rapidly.

Conservative friends and supporters of Mr. Hazen who wish to attend the function should receive tickets at once or they may be disappointed.

The premier's friends will give him a grand welcome when he arrives. Arrangements are being made for a demonstration at the station and his friends accompanied by a brass band will form a procession and escort him from the station to his residence.

Some weeks ago the Calabria, while being towed under the Suspension bridge, met with an accident, having her mast broken by colliding with the bridge. She has since been loaded and repaired and was nearly ready for sea, when yesterday's accident happened.

It was learned yesterday that outside interests were large purchasers of the stock of the Cornwall and York Cotton Company, Ltd., and that as a result these interests would be able to control the policy of the mills in the future.

S. P. Gerow, secretary-treasurer of the company, when seen last evening, verified the report which had spread about the city, but said there would be no change in the management of the mills. He added that the mills would continue to be run on full time, and that it was probable that the York mill in Courtney Bay would be enlarged in the near future.

The report that the famous Canadian warship, Niobe, would shortly pay a visit to St. John and give the people an opportunity to admire her, seems to have been a bit premature.

G. H. Flood, agent of the Department of Marine, said he had received no word that the Niobe was coming here, and did not think she would be seen here for some time.

North Yakima, Wash., July 23—New-ber before probably did fruit trees promise to bear such loads as they do this year. To illustrate the heavy growths of young fruit on typical trees exhibits have been made here from all parts of the fruit section.

A 14 inch limb bears 125 pears, while on 12 inches of apple boughs 35 apples are clinging. The narrows are two 15 inch cherry limbs which are bearing 302 young Royal Anne cherries.

All fruit yields promise to be equal-ly as heavy and it is a problem of the grower just how much to permit the trees to mature and what fruit to knock off.
