SACKVILLE N. B., MAY 26, 1892

## THE DAIRY INDUSTRY.

The Department of Agriculture at Ottawa is making every effort to bring about a profitable change in the dairy industry in the maritime provinces, and to place these provinces in the same enviable position which Ontario holds in the dairy markets of the world. This province which a decade ago was practically unknown as far as her influence on the dairy market went, is now the leading dairy province of the Dominion, and her products in the European markets have a standing second to none in cheese and second to Denmark only in butter. This change has been brought about solely by enterprising dairymen, assisted and directed by the best skill procurable by the government in the form of competent teachers who went from dairy to dairy and from factory to factory showing where errors had crept in in making the butter or cheese and giving hints to overcome the difficulty. This system of dairy instruction has been the foundation of Denmark's greatness, it has brought Ontario up from a province scarcely supplying her own demands to the position she now occupies, and there is no reason why New Brunswick, Nova Scotia and Prince Edward Island will not feel the stimulus if the farmers turn themselves to a recognition of their capabilities.

Prof. Robertson, who is well known to every farmer in the East as well as in the West as a thoroughly practical man, has succeeded in having established in each province a sort of dairy school at which better is made from cream supplied by the farmers in the locality who reap the profits of the enterprise. The dairy station of New Brunswick is situated at Kingsclear, a few miles from Fredericton. Mr. J. W. Hart, a graduate of the Ontario Agricultural College in charge. Mr. Hart is a thorough dairyman. He was better maker at the government creamery, Guelph, for a time and since then has been at work in the line of dairy instruction in Alabama. At these stations instruction making will be carried on all summer and an attempt will be made to show the farmers the profit in winter dairying. Two travelling dairies are now at work in the province, at the expense of the provincial government and much good is anticipated as the result. In Nova Scotia Mr. J. E. Hopkins, a practical cheesemaker will visit the cheese factories and give directions for improving the quality. He also intends to make a lot of cheese to be sent to England. At present Mr. Archibald's Antigonish factories have a high reputation there. Mr. T. P. Dillon will superintend the work in P. E. Island, where a station has been established at New Perth with 250 cows promised.

Summer dairying is the first object which will be aimed at, and the farmers to so conduct their stables as will keep the supply of milk up for winter work. The general opinion appears to prevail that our market for butter and cheese is strictly local and that when the home market is supplied the business must decline. This is an erroneous idea. Good butter and good cheese can find a market in England and at remunerative prices. These provinces have natural advantages for dairying that cannot be surpassed. We have a cool summer, plenty of water, and an extended season for pasturing and in addition, a nearness to the seaboard which places us a day nearer the English markets than the Ontario dairymen. Let the farmers but take hold of these stations. Look into the business in all lights and if it looks as if dairying was profitable encourage it by co-operation and support.

## OUR INDUSTRIAL PROGRESS

Census Bulletin No. 8 relating to manufactures has been issued by the government. Mines and mining are not included in this statement. The total number of industrial establishments in Canada, as reported to the census enumerators in April, 1891, was 73,763, an increase of 29,842 since 1881, or nearly 52 per cent. The total number of employees in 1891 was 367,496, an increase of 112,561 since 1881, or 44 per cent. Classified the employees in 1891 and 1881 are as follows:

	1881.	1891.	Increase.
Men.	109,915	229,794	119,879
Women.	11,542	70,282	58,740
Boys.	14,181	10,240	3,941
Girls.	5,397	22,282	16,885
Total.	250,935	367,496	112,561

The positions of the provinces towards each other in respect to industrial establishments and employees for 1881 and 1891 is as follows:

	1881.	1891.	Increase.
Ontario.	23,068	32,201	9,133
Quebec.	15,818	23,110	7,292
New Brunswick.	2,117	5,419	3,302
Other Provinces.	2,411	4,893	2,482

The new members of the confederation have advanced rapidly in industrial life. Prince Edward Island had 5,777 employees in 1881 and 9,906 in 1891—an increase of 37 per cent, in the ten years. Manitoba has increased from 1,921 in 1881 to 4,375, in 1891—an increase of 127 per cent. This, though a great gain absolutely, is relatively to population. As indicative of the progress in the Dominion, it is to be noted that the gain in the number of employees in 1891 was 52 per cent, compared with the 1871-81 period.

cent, showing a greater proportionate increase in the 1881-91 period than in the 1871-81 period.

3rd. That the smaller provinces, relative to Ontario and Quebec, have made greater increase, both in the number of establishments and of employees.

4th. That the provinces west of Lake Superior have increased their manufactures with great rapidity, British Columbia having the 16 years passing from fourth place to first place, the manufacturing province of the Dominion in proportion to population.

5th. That the Eastern Maritime Provinces have made great headway. New Brunswick standing second in the proportion of its population engaged in manufacturing.

6th. That every province shows marked increase in the number of industrial establishments, indicating that many new industries have been started, and that the development of our industrial life is not merely in the direction of old establishments taking larger proportions than they had in past years.

## Dominion Parliament.

OTTAWA, May 18.—Census bulletin number nine, dealing with the religions of the people, was issued today. The total increase of population accounted for in the statistics of religious denominations is 475,701; of this increase 198,483 was among Roman Catholics, 101,488 Methodists, 79,034 Presbyterians, 66,692 Church of England, 17,629 Lutherans, 7,224 Baptists and 4,152 others.

In the province of Nova Scotia the increase of population was 9,824. That increase is divided among the denominations as follows:

Roman Catholics	4,965
Church of England	4,056
Methodists	8,384

Showing an increase of 12,405 in these three denominations. The others show a decrease, together a decrease of 2,581. The most notable decrease is that of the Presbyterians which is 3,536 in the ten years.

In New Brunswick the principal changes in the denominational branches are as follows:

Inc.	Dec.
Catholics	6,870
Methodists	990
Presbyterians	993
Baptists	1,443
Church of England	4,151
Presbyterians	2,249

The following statement shows the strength of the principal religious bodies in 1881 and 1891:

	1881.	1891.
Catholics	1,990,165	2,790,882
Methodists	817,469	742,952
Presbyterians	755,199	676,165
Church of England	641,106	571,818
Baptists	308,749	296,515
Lutherans	63,979	46,320
Others	5,535	5,211
Evangelists	11,680	8,847
Congregationalists	28,155	26,900
Disciples	12,763	20,183
Jews	6,411	2,393
Pagans	29,709	24,472
Protestants	12,216	6,519
Unitarians	4,638	6,653
Universalists	1,742	2,346
Others	3,196	4,177

May 19. The criminal law bill received considerable attention during the day.

May 20. The House is getting tired of the ceaseless obstruction placed on business by the opposition. Sir John A. Macdonald's government progress is expected. Cartwright is credited with causing the stay in progress.

Further correspondence on the Newfoundland question was presented to both houses today. It includes a dispatch from Lord Knutsford to the governor general, in reply to a telegram stating that the Government of Canada intended to support the Canadian government as to the manner in which the draft of the Newfoundland convention discriminates against Canada and in favor of the United States.

On the 16th of March last, a man named Weatherbie, was drowned at Tatamagouche. He had just returned from River John, and was carrying with him his horse and sleigh, and after making some purchases at McNeill's store had driven towards his home, but never arrived there. Some days afterwards the team was found quite a distance out in the river frozen in the ice, but although a good many engaged in the search, the body was not found until Friday last, when it was found floating in the river just above the large bridge at Tatamagouche. The body was well preserved and the parcels including some tobacco and pipes were found in the pockets. A small sum of money and the bill of the goods were also found. It was supposed that the man had got out of the sleigh, had fallen down on the bank and after falling down the bank into the river, he had been drinking that day.

## Maritime Matters.

—The Chatham World tells of two Douglasfield boys who captured the contents of two foxes—eighteen young and two mother foxes.

—Letters patent have been granted to the Magalloway Fish and Game Corporation and the Harvey (Yok) Farmers' Trading Company.

—It is rumored that the Sussex Record will change ownership on the 15th, the proprietor, Edward Spooner, having sold out good-will and interest to R. D. Robinson, at one time manager of the pool works near Penobscot.

—Arthur M. Wrayton was drowned Sunday night while crossing from the mainland to his home on Emerald Isle, Barrington, N. S. He was 42 and leaves a wife and 10 children. Deceased's father, brother and sister were drowned at the same place a few years ago.

—The lobster pickers lost heavily by destruction to their traps by the recent severe storms. Hundreds of traps drifted ashore on the Eastern side of the island, and it is feared that all the traps out have been destroyed.—Sydney Reporter.

—W. F. McCoy, acting on behalf of a well known Halifax gentleman who has had connections in that city, writes that in 1875 was 12,564,901 gallons, while in 1888 it had increased to 31,080,523; and although it fell to 23,724,890 in 1891, it is said nearly twice as great as in 1875.

—The Montreal Star's cable says, London, May 11.—The imports from Canada show a great expansion last month of 91,836 pounds, or 406 per cent compared with last year. The wheat imports expanded 2,100 pounds; cheese 3,100 pounds; fish, cured and salted 600 pounds. The imports for the four months increased 165,000 pounds, or 76 per cent. The wood imports increased 41,000 pounds, or 100 per cent. Canada increased four per cent, in the month and decreased four per cent, for four months.

At a meeting of tanners and curriers held in Boston, last week at which 40 leading establishments were represented, an agreement was entered into to shut down operations for 90 days. This follows upon a similar action taken by New York makers of sole leather. The weekly output of sole leather is said to be largely in excess of the present demand. Prices are coming down and there is a further drop. Stoppage seems to be the only remedy. It is estimated that 4,000 men will be temporarily thrown out of work in New England alone, and if the Pennsylvania tanners should also stop, 5,000 would be idle in that state.

—Detective Skiffington, of F. C. R., expresses his belief that the obstruction found on the rails at the Kelly bridge was of two ago and which might have proved disastrous to the C. P. R. train, was accidental. The statement was then made that the deed of would-be train wreckers. Skiffington finds that slabs had fallen from a previous train, which were piled on steep banks at the side of the track by sections. These, the detective thinks, were carried by the momentum of the train and wind to the rails.

—Professor Saunders, director of the Experimental Farm, Ottawa, is in the city in connection with the Columbian exhibition next year. The main object of Professor Saunders' visit is to make arrangements with the various provincial governments for concerted action on the subject, but he will be happy to consult with any one who contemplates taking part in the exhibition. Canada having decided to take part in the exhibition, it is very desirable that our exhibit should be a credit to our country.

—Stenard "Chunda," from Liverpool via St. Johns, reports meeting hundreds of icebergs, the first sighted being 100 miles east of St. Johns, and from that time until they reached Newfoundland the icebergs were sighted. They were all sizes, some big and enormous, while others were very small and many were crumbling and showing signs of breaking up. There is a very large berg about one hundred feet high above the surface of the water, and it is estimated that it is outside of St. Johns harbor. After leaving St. Johns, they were continually seeing bergs until reaching Cape Race. This accounts for the cold weather.

On the 16th of March last, a man named Weatherbie, was drowned at Tatamagouche. He had just returned from River John, and was carrying with him his horse and sleigh, and after making some purchases at McNeill's store had driven towards his home, but never arrived there. It was supposed that the man had got out of the sleigh, had fallen down on the bank and after falling down the bank into the river, he had been drinking that day.

On the 16th of March last, a man named Weatherbie, was drowned at Tatamagouche. He had just returned from River John, and was carrying with him his horse and sleigh, and after making some purchases at McNeill's store had driven towards his home, but never arrived there. Some days afterwards the team was found quite a distance out in the river frozen in the ice, but although a good many engaged in the search, the body was not found until Friday last, when it was found floating in the river just above the large bridge at Tatamagouche. The body was well preserved and the parcels including some tobacco and pipes were found in the pockets. A small sum of money and the bill of the goods were also found. It was supposed that the man had got out of the sleigh, had fallen down on the bank and after falling down the bank into the river, he had been drinking that day.

## Industrial and Commercial.

—Dull times are reported among the sardine canners at Eastport and Lubec, this spring, all because the fish and sardine herring appear to be very reluctant to swim hither to into the docks of the sardine canners.

—Messrs. Archibald & Co., proprietors of the Gower Colliery mines, have more tonnage chartered this season for the Montreal coal trade than any previous season. The exports to Montreal, at one time manager of the pool works near Penobscot.

—The largest port wine sale ever known occurred in London last week, when 12,000,000 bottles were offered. They cost over \$6,000,000, and yet this amount of port does not represent more than seven months ordinary consumption in the United Kingdom.

—The locust of granite cutters throughout the New England states was declared last week, throwing 20,000 or 30,000 men out of work at the same time. A number of strikes were ordered in sympathy with the stonecutters, and it is estimated that fully 50,000 men are out.

—In the statistics of the wine production of the world since 1874 the marked advances shown by the United States is noteworthy. The total product in that year in 1875 was 12,564,901 gallons, while in 1888 it had increased to 31,080,523; and although it fell to 23,724,890 in 1891, it is said nearly twice as great as in 1875.

—The Montreal Star's cable says, London, May 11.—The imports from Canada show a great expansion last month of 91,836 pounds, or 406 per cent compared with last year. The wheat imports expanded 2,100 pounds; cheese 3,100 pounds; fish, cured and salted 600 pounds. The imports for the four months increased 165,000 pounds, or 76 per cent. The wood imports increased 41,000 pounds, or 100 per cent. Canada increased four per cent, in the month and decreased four per cent, for four months.

At a meeting of tanners and curriers held in Boston, last week at which 40 leading establishments were represented, an agreement was entered into to shut down operations for 90 days. This follows upon a similar action taken by New York makers of sole leather. The weekly output of sole leather is said to be largely in excess of the present demand. Prices are coming down and there is a further drop. Stoppage seems to be the only remedy. It is estimated that 4,000 men will be temporarily thrown out of work in New England alone, and if the Pennsylvania tanners should also stop, 5,000 would be idle in that state.

—Detective Skiffington, of F. C. R., expresses his belief that the obstruction found on the rails at the Kelly bridge was of two ago and which might have proved disastrous to the C. P. R. train, was accidental. The statement was then made that the deed of would-be train wreckers. Skiffington finds that slabs had fallen from a previous train, which were piled on steep banks at the side of the track by sections. These, the detective thinks, were carried by the momentum of the train and wind to the rails.

—Professor Saunders, director of the Experimental Farm, Ottawa, is in the city in connection with the Columbian exhibition next year. The main object of Professor Saunders' visit is to make arrangements with the various provincial governments for concerted action on the subject, but he will be happy to consult with any one who contemplates taking part in the exhibition. Canada having decided to take part in the exhibition, it is very desirable that our exhibit should be a credit to our country.

TAKE OUT an Accident or Life Policy in the Travelers.

J. F. ALLISON, Agent

### Around Town.

PILING.—The piling market is very quiet at present, in fact it has been in a lethargic state all spring. Prices are flat in New York and few cargoes have been called for.

QUEEN'S BIRTHDAY.—The 24th was quietly celebrated in Sackville. Several fishing parties went out and returned with varying success. Lovers of horse flesh went to Moncton and Amherst.

PROPERTY TRANSFER.—Mr. Albert Anderson has purchased Capt. Wilson Estabrooks property at Salem. Mrs. Edward Anderson will reside there. Capt. Estabrooks intends moving to the States.

THE HOME MARKET.—Says the Sun: Orders for no less than 8,000 pounds of butter were taken in Moncton one day last week by an Ontario firm, which is also shipping large quantities to P. E. Island.

DEALS.—Baie Verte presents a lively appearance at present. Ten square rigged vessels are in the Bay for deals and shippers have their hands full to keep the going. A special engine went down the line yesterday to take deals for the vessels.

SCHOOL VACATION.—Chief Superintendent Enoch has issued a circular giving notice of some changes in school terms to go in force Jan. 1, 1893, and notifying that the Summer Vacation in the public schools will begin July 1st and end August 12th. In cities and incorporated towns the vacation does not close until August 12th.

THE RACES.—Zulu Chief had an easy day at Moncton on the 24th taking first prize in the 2 1/2 wad out effort. Dot baked badly and was out of the race from the start. At Amherst Thos. Bower's Peter got 4th in the 2 year old race. In the 3 minute class, Thos. Wood's Happy Jack got first, Nelson Dan, 2nd and Richardson's Country Girl 3rd. A race has been arranged between Zulu Chief and Steadman's Sir John for \$100.

SCOTT ACT.—The cases against Watson Allen and Elizabeth Allen, Botsford have been dismissed. The case against Isaac Campbell and one against Fred Brownell have been dismissed and the case against Brownell for keeping liquor for sale has been adjourned to Tuesday next to enable defendant to make defence. Two cases against Geo. Fillmore one of the proprietors of the International Hotel were brought up yesterday and adjourned till Tuesday, F. A. McCully, Inspector for the prosecutor, J. P. Sweeney for the defendant.

STOCK NOTES.—Mr. Edgar Ayer has the first Sunny Cline colt to be dropped in Sackville. The stranger, a lively dark bay colt arrived yesterday morning, and is indeed a fine animal. Its dam is the Salaman mare, Gypsy, dam Mag, by Black Hawk. Mr. Ayer is to be congratulated upon his good fortune in getting this colt as Sunny Cline's breeding is the best in existence. There will be three colts by Sunny Cline in Sackville this season, the above and Mr. Ayer's Administrator mare Clara, and Thos. Horner's Messenger mare.

NEW TOO.—E. C. Gooden & Co., are one of the most enterprising business firms in the country. They run two establishments, one at Baie Verte and the other at Port Elgin, at each of which they manage a large country trade, besides being one of the largest exporters of lumber in the country. They have recently improved their facilities for handling ships arriving in the Bay by constructing a stanchion, with two keels and about 30 tons carpenter's measurement. The model is beautiful and she promises to be capable of doing good work.

MR. ALLISON NOTES.—The reception room of the Ladies' College has been renovated recently and presents even a more envying appearance than ever. Messrs Fry Bros. have papered the ceiling and walls, the cornices have been retouched, the floors laid with handsome carpets, the furniture newly upholstered and two pretty chandeliers, one with 4 fifty candle-power lights, and one with 4 sixteen candle-power, placed in position.

Those who had the pleasure of their acquaintance will regret to learn that Miss Tuff and Miss Shenton say farewell at the close of this term. During their stay here both ladies have made many friends in the village as well as in the college who extend all best wishes possible to them in the future. Just why they are severing their connection with Mr. Allison is not within the scope of the Post's privileges to hint, but it is understood they will return to private life.

The Exams are in progress and will be concluded to-morrow. Everything is being made ready for the Commencement Exercises to begin tomorrow evening. The Grand Reception and the Alumni and Alumnae Supper are merged into one this year and will be held on Saturday evening. The exhibit this year will be in one of the school rooms on the ground floor of the Ladies' College.

Mr. Osborne who has so ably conducted the Commercial Dept. at the Academy during the past year retires, having accepted a position in Belleville, Mr. A. W. Young of that place is to succeed him.

A new feature here is the graduation of 9 or 10 students from the Commercial Dept., the first in the history of the institution. Mr. J. Wesley Smith of Halifax has kindly offered \$25 in prizes in this dept. and Mr. Chas. Pickard of Sackville offers a prize of \$10 for the best all round student in the Academy.

At the closing exercises of the Academy on Monday May C. W. Harrison and Prof. Watts, of Windsor will take part.

About 30 students from Acadia, Wolfville arrived in town yesterday on the steamer Weatherspoon, and left today.

### Around Town.

STONE.—Seven cars stone were shipped to Toronto this week.

CATTLE.—One car cattle was shipped to Halifax on Monday by W. W. Fawcett.

FOR CHILLIWACK.—Misses Lena Powell, Dora Wood, Daisy Estabrooks, Susie Webb, Florence Webb and Winnie Trueman gave a parlor concert at the residence of Mrs. Wood on Monday afternoon. The programme was very creditably carried out by the promoters. Proceeds for the Chilliwack B. C. Mission.

THE music in the Methodist church on Sunday morning will be as follows: "Gloria in Excelsis" from Mozart's Twelfth Mass, at opening of service, by the choir, S. S. Metcalfe Church.

PERSONAL.—Mr. Geo. H. Ham, Travelling Passenger agent of the C. P. R. was in town on Friday. Mr. H. says the reports concerning the late storm in the west were considerably overdrawn and that the settlers were not so seriously affected as would appear. The C. P. R. are making arrangements for a series of four round trip excursions to the west during the summer which will enable those desiring of seeing the country to do so at a low rate.

EARLY CLOSING.—Notice is given in another column by the merchants of Amherst of the early closing movement lately inaugurated in that town. The movement deserves the support of all who are aware of the unnecessary expense and labor involved in keeping stores open every evening and with no income in return. The arrangement will doubtless cause a little inconvenience to the customers, but it is a movement familiar with the custom, when it will be found to work satisfactory as it did here last season.

### Local Matters.

Brig Bessie May 341 tons register, built at DeChester in 1875, by Alexander Bessie has been sold at Santos.

Miss Maina popular young lady of Amherst, was seriously burned about the face by a kerosene explosion on Monday last week.

The four year old son of Fred Strong, Tidnish village, was seriously cut by an axe in the hands of an older brother last week.

A large bear was seen by James G. Barbour and others at Cape Enrage on Saturday. His den is supposed to be on what is called The Island, as he has on several occasions been heard about Barn Marsh.

J. Hoffer Haslam, of the C. P. R. left yesterday for P. E. Island. He took with him a Ruge bicyclic, which he will ride this summer. Mr. Haslam's weight is 240 pounds, and he will probably have some interesting experiences. [St. John Telegraph.]

A serious affair has just come to light on the Washa lemoak, St. John. A rather halfwitted boy knocked his brother on the head and to hide the crime his parents secretly buried the body giving as the reason that the child had died of black diphtheria. The affair leaked out and now the old folks are in trouble.

On Saturday of last week, John McArthur, of Hopewell, N. S., while operating a turning saw, fell backward pulling the saw in contact with his leg, completely severing the limb about three inches below the knee. It was found necessary to amputate several inches more of the leg before it could be properly dressed.

John W. Simpson, of Mount Pleasant, Cumberland Co., was shot and killed by one Alex. Ritchie, at Aspen, Colorado, on Saturday. He stopped at a house in company with a friend to ask some questions as to where a man lived, and when leaving, a dog attacked him. He stoned the dog where upon the owner drew a revolver and shot him.

A shooting affray disturbed River Hebert on Thursday last. Albert Bowles, colored, returned from Joggins considerably the worse for liquor, and had some words with his employer, Jonathan Smith, blacksmith over some work. The negro ordered Smith out of the shop and when he had gone across the street drew a revolver and fired at him. Smith although not hit dropped and Bowles thinking he had been successful placed the muzzle of the weapon to his own head and pulled. The revolver 32 calibre had no effect on the bony structure of the colored gentleman's cranium and the bullet failed to get farther than the skin.

The Press says: An Arabian peddler named George Harris, who has been a resident of Amherst for two years, left the town of Yarmouth for Amherst some twenty days ago and has not yet been heard from. He was expected to come by way of St. John and should not have been over two days en route. He had a large quantity of jewelry in his possession as well as \$150 in cash, and his friends here are of the opinion that he has met with foul play. He could have no object in voluntarily delaying himself as his partners in Amherst are waiting for his arrival with the goods. He was a stout, fat man of medium size, of temperate habits and not likely to go on a spree. His brother is here and is much alarmed over the strange disappearance.

No OTHER Sarasparilla has the merit by which Haddon Northwest has the most famous live cattle are admitted to the English markets, while there are no other cattle are not. There is a market for the farmer at every station; and there are no other cattle are not. There is a market for the farmer at every station; and there are no other cattle are not.

No OTHER combines the economy and strength which make "100 Dose One Dollar" true only of Hood's Sarasparilla. No OTHER possesses the Combination, Proportion, and Process which make Hood's Sarasparilla peculiar to the world. Hood's Prize cure Sick Headache.

PREMIER FIELDING of Nova Scotia appears to be in a very buoyant state of mind at present, although the terrors of the Thomas suit may press him hard, for we read that he is going to England to float alone.

### Anniversary Exercises.

This certificate when completed at Sackville will entitle to free return, but must be exchanged for ticket not later than June 4th. Negotiations are in progress for reduced rates on other lines.

### Pt. de Bute.

The 24th passed very quietly here, a few of the smaller boys and girls "went away" to the 25th of the older sportsmen took a run on the I. C. R. as far as Havelock to enjoy the luxury of angling.

Rev. L. S. Johnson occupied the Methodist pulpit here on Sabbath last, preaching two excellent sermons.

Lawyer T. P. Carter of Amherst, Victoria Co., and Mrs. Carter are here visiting the old home. Mr. Carter is another one of the Westmorland boys that has been successful in the western States and province. Mr. L. A. Allison of P. E. Island is likewise a Westmorland boy.

The district school continues very successful under the care of Miss Spruce. The attendance is the largest it has ever been at this season of the year and the regularity of attendance is very marked. One pupil, Almon Wells has not been absent from a single session of the school for three years and Miss Kate Fullerton has made nearly as good record while a number of others are not far behind.

The old Division No. 50 is still in good working order. Mr. James Colpitts and a few others are "firm squares" on the Temperance question, and it is that kind of men the cause wants.

Rev. Mr. Pickles has a hard day on the Baptist circuit last Sabbath preaching on the Temperance question, and it was a hard day for him. He stood it all right however and is hard at work visiting and looking after the interests of his parishioners.

THE 24th passed very quietly here, a few of the smaller boys and girls "went away" to the 25th of the older sportsmen took a run on the I. C. R. as far as Havelock to enjoy the luxury of angling.
