

ROYAL BANK ANNUAL REPORT ONE OF THE BEST PRESENTED

Despite Financial Stringency the Royal Sustained a Strong Position and Produced Satisfactory Profits—Canadian Business Conditions Reviewed by the Officials.

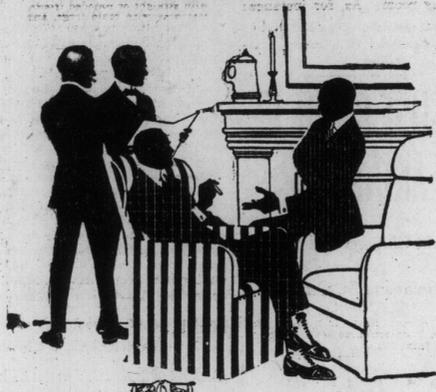

The annual report of the Royal Bank of Canada, which was presented at the annual meeting of the institution held in Montreal on Thursday, cannot be anything but gratifying to the greatest degree to the shareholders. The general public, also, who place deposits in the different branches of the bank throughout the country, will find in the report, which is published in detail elsewhere in The World this morning, much information of the business and financial condition of Canada in particular, and several other countries in general.

Owing to the illness of H. S. Holt, president of the bank, the chair was taken and the annual address presented by E. L. Pease, vice-president. The annual report of the financial condition of the bank shows that although the past year had been one of great activity, the Royal Bank maintained a strong liquid position, and at the same time produced satisfactory profits, equal to 15.5 per cent. of the capital stock, and 8.7 per cent. of the capital and surplus combined. Out of these profits the usual dividend of 12 per cent. has been paid, \$259,000 has been written off bank premises, \$100,000 transferred to the pension fund, and the balance carried forward to profit and loss, bringing that account up to \$1,015,119.

The Balance Sheet.
Among the important statements shown in the balance sheet are: Cash on hand, at call, and on short notice amounted to \$48,609,445, or 34 per cent. of the total liabilities to the public. These reserves do not include Canadian call loans or investments, amounting to \$28,776,999, which are regarded as secondary reserves. Call loans in Canada and elsewhere decreased during the year \$4,150,000; current loans in Canada and elsewhere increased \$2,500,000; and cash increased \$1,800,000. Investments stand at less than the market value on November 30th last. The writing down of securities, which is regrettable, increases the financial stability of the bank. With the next swing of the pendulum values will improve. Bank Premises stand at \$4,792,000. Deposits have been well maintained. These bearing interest increased \$1,237,000, and demand deposits are practically unchanged. Bills payable amount to \$90,000, a decrease of \$1,200,000 as compared with the previous year. Our total liquid assets amount to \$72,885,000, being 46.6 per cent. of our total liabilities to the public. Total Trade Assets, excluding the valuation of Bank Premises, exceed our liabilities to the public by the sum of \$20,702,117.

Conditions in Canada.
Speaking of financial conditions in Canada, the report says: "According to the latest returns, the total field crops in Canada last year yielded approximately \$600,000,000, or about the same as in 1912. Railroad earnings show a substantial increase over 1912. Bank clearings increased \$117,000,000, bank note circulation \$41,000,000. Public deposits in Chartered Banks and Postoffice Government Savings Bank and other savings bank deposits on the 30th of November last amounted to \$1,147,000,000, being an increase of \$14,500,000. Current loans with Chartered Banks were \$222,000,000, an increase of \$6,500,000. Total exports reached \$400,000,000, an increase of \$32,000,000; imports \$672,000,000, an increase of \$84,000,000. Customs receipts for the fiscal year increased \$7,000,000. Immigration reached 402,432, an increase of 48,195, immigrants from Great Britain during the year numbered 150,542 and from the United States 139,009."

What One Man Bought at the "Lonely" Sale

I know a man who makes \$25,000 a year, and yet his credit rating is not good, for he spends money extravagantly.

A customer of ours, who bought \$193 worth of clothes and furnishings at our Lonely Sale, is a rich man, because he knows that it's the money saved that makes one rich.

Here is what he bought:

| | Real value. | He paid. |
|--|-------------|----------|
| 1 Suit of fine worsted | \$30.00 | \$20.00 |
| 1 Chincheilla Ulster, silk lined | 35.00 | 25.00 |
| 1 Britonsloom Serge Suit | 25.00 | 20.00 |
| 1 Chesterfield Overcoat | 25.00 | 12.50 |
| 1 Dress Suit, silk lined | 30.00 | 24.00 |
| 3 Suits Winter Underwear, fine fleecy | 7.50 | 6.00 |
| 2 English Taffeta Shirts, at \$5.00 | 10.00 | 8.00 |
| 1 Dozen R. T. Tooke Collars, at \$1.50 | 3.00 | 2.40 |
| 2 Dress Shirts, at \$1.75 | 3.50 | 2.80 |
| 1 Sweater Coat for motorcycling | 5.00 | 4.00 |
| 6 Silk Ties: 2 at 50c, 4 at 75c | 4.00 | 3.00 |
| 2 Pairs of Gloves, 2 lined, 2 unlined. | 5.00 | 4.00 |
| 4 Night Gowns, 1 pair Pyjamas, 1 Bath Robe | 10.00 | 8.00 |
| | \$193.00 | \$139.70 |

Thus our customer cleared over \$50 in buying nearly a year's supply of clothing. Compared with what his extravagant friend would pay, his forethought saved him over \$100.

This shows just what it means to be a present customer at the associated Semi-ready and R. J. Tooke Stores.

that section of the country. Outside of these provinces a reaction is now in progress. How far it will extend it is impossible to say, but generally when pessimism prevails the turn is near. I take a hopeful view of the outlook, as the tendency is towards conservatism and economy.

In view of the dearth of capital in Europe, resulting from expenditures for wars and armaments, the Canadian public would be well advised to postpone any new enterprise dependent upon foreign capital until financial conditions are improved abroad. Pending the absorption of the great mass of European Government loans now hanging over the foreign markets, and waiting for a favorable opportunity to be floated, we cannot expect to obtain our usual supplies of money from Great Britain.

A Holding Company.
After going over the features of the annual report, Mr. Pease announced that the company, to be controlled by the bank, was to take over the bank's real estate holdings. He said:

"With the object of rendering available for commercial requirements a portion of the funds invested in bank premises, the bank has during the past year sold certain of its properties to the Globe Realty Corporation, Limited, a company organized and controlled by the bank. The value of these properties was \$2,000,000. Sixty per cent. of the appraised value has been paid to the bank in first mortgage bonds, secured upon the same properties, and the remaining 40 per cent. in shares of the company, which shares have been entirely occupied by the bank. The bank is not to be occupied by the bank, and the rents, which are not higher than we have charged the branches in the past, will be used to service the best interests of the public, as well as those of the bank."

The directors of the bank was increased from sixteen to seventeen members by the election of C. E. Nell, assistant general manager. The board is now composed as follows: Messrs. H. S. Holt, E. L. Pease, E. F. B. Johnston, K. C. Wiley Smith, Hon. David Mackenzie, Jas. Redmond, G. R. Crowe, D. E. Elliott, Hon. W. H. Thorne, Hugh Paton, T. J. Drummond, Wm. Robertson, A. J. Brown, K. C. W. J. Sheppard, C. S. Wilcox, A. E. Dymont, C. E. Nell.

PTOMAINE POISON FROM CANNED FOOD DISCOUNTED
Laboratory Investigations Show That Small Danger Exists on This Score.

The fear of ptomaine poisoning from canned food is deprecated, in a paper to the Canadian section of the Society of Chemical Industry, by R. T. Mohan, who urges that physicians and others should carefully avoid creating alarm.

Canned laboratories in Germany, the United States and Canada investigate all reports of poisoning from canned food, and in practically every case the charge is unfounded.

A ptomaine is a putrefactive alkaloid, a product of decomposition. There are many kinds, but few really poisonous, the poisonous ptomaines being formed by disease organisms, such as yeasts and molds, and a few other putrefactive organisms.

As no packer would think of packing putrefactive products, the only possibility of ptomaines arises where a can has leaked or swelled. The only proved case of poisoning known to Mr. Mohan, of the hundreds reported, was from a can of salmon with a pin-hole leak, and the contents, clearly abnormal, should not have been eaten.

BIGGEST TELESCOPE TO BE IN CANADA

Automobile Could Be Driven Thru it—To Be Set Up at Ottawa.

BIGGER THAN THE LICK

Contract Is Awarded for the Huge Six-Foot Tube.

The Canadian Government has awarded a contract to the Warner & Swasey Company of Cleveland, Ohio, for the construction of what is to be the largest telescope in the world. The new telescope will probably be set up in Ottawa, and about eighteen months will be required to manufacture it and place it in position.

A rough idea of its size may be gained from enacting that a full-sized automobile could be readily driven thru the tube. The Warner & Swasey Company built the Lick telescope, finished in 1887; the object glass of which is thirty-six inches in diameter, and the Yerkes telescope, finished in 1893, which has a forty-inch glass. These, when constructed, were the largest in the world.

"Progress, particularly in astrophysics and photographic lines, has been greatly advanced by the use of reflecting telescopes, and especially by the work done with the sixty-inch reflector at the Mount Wilson Solar observatory, near Pasadena, Cal. "Notable results have been obtained by the use of reflecting telescopes in later years, and this has stimulated a great interest in this type of instrument, such as is evidenced by the present contract.

"Even greater impetus will now be given by the action of the Canadian Government in acquiring this splendid seventy-two-inch instrument, which, when finished, will be the largest telescope yet constructed of this type. This great engine of science, weighing fully fifty tons, resting upon massive piers of concrete, will have a tube thirty feet long and seven feet in diameter, which will weigh ten tons.

"At the lower end of the tube will be located the principal speculum, composed of a disc of glass seventy-three inches in diameter, ten inches in thickness, and weighing approximately two tons.

"When used as a Cassegrainian instrument, a secondary convex reflector, nineteen inches in diameter, will be placed near the upper end of the tube for reflecting the rays back through a hole in the speculum to the great spectroscopic apparatus attached to the lower end of the tube.

"As a Newtonian instrument a flat mirror will be provided for reflecting the cone of rays at right angles into a spectro-photograph apparatus at the upper edge of the tube.

EATON'S SEMI-ANNUAL SALE NEWS

Torland to Now on Fifth Floor, Main Building

Stupendous Sale of Women's Furs Begins on Monday With An Offering of Coats, Muffs and Neckpieces at Exactly Half the Regular Prices

Many of the Season's Best Coat Models in Persian Lamb, Hudson Seal and Near Seal, With an Enormous Array of Fashionable Stoles and Muffs in Black Fox, Isabella Fox, Persian Lamb, Alaska Sable, Mink and Ermine

Some of the Chief Sale Features for Monday

1,000 New Coats for Women, Half-price and Less, at \$7.50
More than twenty-five styles in this extraordinary offering, comprising nearly every fashionable wool fabric. Of the heavy reversible cloaks most wanted this season there are scores of patterns in gray, navy, black, tan, brown and smart mixtures. Splendid styles, in variety to satisfy every taste. A great coat-buying opportunity that should result in another record 9 o'clock shopping crowd. Semi-annual Sale, \$7.50.

Women's Fur-lined Coats at Sale Prices \$25 and \$40—High-class mink-trimmed coats with full length linings of first quality muskrat, and Austrian broadcloth shells in black, navy and brown. Coats that are a pleasure to own and wear, and that are a rare economy at the price. Semi-annual Sale, \$25.00.

At \$25 are black and navy broadcloth coats with muskrat, hamster or lock squirrel linings; large collars of Western fabric, Russian and other good fur collars. Few years have afforded an opportunity to buy fur-lined coats at this low price. Semi-annual Sale, \$25.00.
—Third Floor, James Street.

In the Misses' Coat Sale
Misses' Coats in all-wool boucle—four styles, linings to the waist. Three-quarter, cut-away fronts, loose back, away from small belt, convertible collars. A combination of shades—black with red, brown, or blue, etc. Sizes for misses and juniors, 32 to 36 bust, or 13, 15 and 17 years. A 3 o'clock rush special. Semi-annual Sale, \$2.95.

Girls' Coats at \$4.95—The popular all-wool "Red River" blanket coat, so serviceable for school wear, and for outdoor winter sports. Best navy blue cloth; hood lined with scarlet or light blue; knitted mesh to match; close fitting collar. Sizes to fit girls from 14 to 17 years. A remarkably low price. Semi-annual Sale, \$2.95.

Economies in Floor Coverings
Heavy Axminster and Wilton Squares, patterns including only new and stylish designs. Self colorings, floral, Oriental, and floral chintz designs. Sizes in a variety of colors. 12 ft. x 12 ft. x 12 ft. x 12 ft. Semi-annual Sale, \$1.95.

Best quality island linoleum, colorings go through to back of cloth, ensuring long wear. Book and tile designs, in light and medium colorings. Suitable for kitchens, halls, parlors, bath and offices. Semi-annual Sale, square yard, \$1.00.
—Fourth Floor, James St.

THE WEATHER IS RESPONSIBLE for it. We had prepared for a normal Canadian Winter with a magnificent provision of high-grade furs. The mid-winter has continued in a January; Stock-taking is close at hand; the furs cannot be held over; they must be cleared without delay. Hence will begin on Monday the greatest Fur Sale in the annals of the Store, with hundreds of coats, muffs and neckpieces at exactly half their regular prices.

Special Features for Monday: Sets of Black Fox and Coats of Hudson and Near Seal and Persian Lamb

The following items will give an idea of the wide extent and attractive character of the offering:
Coats in Hudson and near seal, with box, semi-fitting and full backs, some with cut-away fronts and a few with collars and cuffs of Western sable. Monday, half-price, \$40.00 to \$76.25.

Coats in Persian lamb—carefully selected skins in small, medium and large curl—including short, long and three-quarter-length models with semi-fitting and full backs, and notch and shawl collars. Monday, half-price, \$112.50 to \$197.50.

Collection of smart muffs and neckpieces in black, pointed, Isabella and red fox, the stoles in animal and shawl designs and muffs in large pillow styles. Monday, stoles, half-price, \$17.50 to \$20.00; muffs, half-price, \$17.50 to \$20.00.

Persian lamb neckpieces, consisting of small cravats and ties, half-price, \$5.25 to \$8.50; throw-over ties, some 70 inches long, half-price, \$10.50 to \$22.50; stoles, half-price, \$21.00 to \$32.50.

Persian lamb muffs, consisting of Empire styles, half-price, at \$10.00, and pillow muffs, half-price, \$12.50 to \$21.50.

Alaska sable muffs, including pillow designs in drop skin effect, half-price, at \$16.25; larger pillow muff in drop skin effect, half-price, at \$21.25; Empire style, half-price, at \$9.00.

Straight ties in grey squirrel—66 inches long—Monday, half-price, \$5.00. Muffs to match, in pillow design—half-price, at \$8.45 and \$10.15.

Neckpieces in near seal, throw-over ties. Monday, half-price, \$4.25; shawl ties, half-price, \$7.25.

Muffs in pillow style in near seal—half-price, \$4.35 to \$6.25.
Children's white Iceland lamb coats, in sizes to fit 2, 4 and 6 years. Monday, half-price, \$7.50.

Children's muskrat coats in size to fit 6 years. Monday, half-price, \$18.50.

A large collection of beautiful muffs and neckpieces in ermine and mink. Monday, Half-price.

Also innumerable sets of misses' and children's furs in grey lamb, and women's muffs and stoles in moleskin, Persian piece and Persian paw. Monday, Half-price.

You were Squirring

Betty—Many thanks for your very complimentary and reasonable wishes. If only the former were deserved and the latter might materialize, it would be a happy state of affairs all round, wouldn't it? And, apropos of pleasantness, you are intending, I see, to make some young person enjoy herself. The books can be provided at small cost: "Good Wives" at 17c, "Little Men" at 4c, and "Jo's Boys" at 4c. The book of "Standpoints" will be mailed to you to-day, if your full address can be found on the list. At last it is ready.
P. R. W.—And thanks to you, too, for timely felicitations. "The Shopper" and "Truly" would be healthy, wealthy and wise if all the greetings you have received would be honored by the bank of Good Fortune. As for the mantle you want for your mother, let me hasten to inform you that a seafoam coat, 100 inches long, with straight or rounded fronts, fastening with brass frogs, and finished with long shawl collar, is available at \$18.50. At the same price can also be had a plush coat, 80 inches long, with notch collar, and lining of blue, yellow or cerise satin. At \$20 is a coat in finer quality, lined with seven-eighths-length, lined with cerise, yellow or blue satin. At \$25.50 is a model with kimono shoulder, cut-away front, and lining of blue or orange or black tulle. Do you see you have a good choice.

—Third Floor, Yonge St.

Sale Clearance of House Mantels Of Interest to Builders and Householders

There are designs suitable for any room. As, for instance: Mantel, mahogany finish, with British beveled plate mirror, set up complete. Semi-annual Sale, \$45.00.

Several golden oak mantels with large mirrors—in dull rubbed or polished finish. Semi-annual Sale, set up complete, \$30.00.

A number of mantels, one of each design and suitable for any room, in golden oak, mahogany and Mission oak finishes. The Semi-annual Sale price, set up complete, \$27.50, \$35.00, \$39.50, \$37.50 and \$49.50.

These prices include choice of many tiles, either gas or coal grates and open fires, and in all cases including setting up within the city limits. Direct telephone call, Main 2611.

—Third Floor, Furniture Building, James and Albert Sts.

You Will Delight in These Sports Coats of Angora and Brushed Wool

IN SWITZERLAND, the land of Winter sports, they are the ruling vogue, and, as everyone who knows them will agree, they are the nicest, smartest, most comfortable knitted coats that can be worn now for skating, tobogganing, snowshoeing, etc., and later on for golf and sundry outdoor pastimes. There is a splendid collection of them in the Sweater Coat Department, with a color range that takes in all the bright art tones which Fashion deems correct for Sports coats. At the lower prices the coats are of brushed wool, similar in appearance, but not so fine in weave as angora. As, for instance:

At \$6.00, is available a coat in soft white brushed wool with turn-over collar and facings of cherry color, tan or green.
A coat in brushed wool in two-tone effect—mauve and white, grey and white, or green and white—has facings and turn-over collar of white. Price, \$7.00.

A wonderfully smart specimen in canary yellow—one of the most fashionable tints in Sports coats—is in very fine quality brushed wool, and characterized by flat shawl collar. Price, \$9.00. The same model is likewise obtainable in deff blue.

A charming angora coat is procurable in all the modish shades—rose, purple, canary, deff blue and fawn. Price, \$13.00.

The new heather mixture effects in angora wool are developed in green, blue, and tan shades with plain facings. Price, \$9.00 each.

And in complete costumes is a skirt, coat and cap in brushed wool in apricot shade at \$24.00, and another in the same color with mittens and scarf also, at \$28.00.

—Third Floor, Centre.

A WONDER WOMAN AT MASSEY HALL

Helen Keller Spoke to Large Audience Who Were Spellbound.

HER FAMOUS TEACHER

Mrs. Macey Taught Blind, Deaf Mute to Speak and Hear.

A magnificent audience almost filled Massey Hall last night, attracted by the appearance of Helen Keller and her almost as famous teacher, Mrs. Macey, who as Miss Sullivan, 26 years ago, took charge of the six-year-old blind deaf mute and gave her the means of communication with her fellow creatures. Mrs. Macey was introduced by Dr. Hughes, who recalled Laura Bridgman, the first blind deaf mute to be taught. It was on reading about Laura in Charles Dickens' "American Notes," that Mrs. Keller obtained her first hope that her little girl might be educated. She went to the Institute in Boston and found there Miss Sullivan, who had been affected by blindness and had been associated with Laura Bridgman for six years, and who at the time was about 18 years of age, and the only available teacher. Nothing could be more thrillingly pathetic than Mrs. Macey's account of how she gradually made Helen understand the connection between symbols and things. Doll and cake were the first words that she learned. The first day she began to realize what words meant was after learning eight nouns and three verbs. She had

confused mug, milk and drink together because they all meant the same thing. But having a bath one day she asked, "What is all this?" with a gesture indicating the water. They went into the pump house afterwards, and as she held the mug with one hand and the water splashed over, on the other hand was spelled out the word water. She dropped the mug, threw back her head and smiled water several times. Then she dropped on her knees, pointed to the ground and asked what it was; then to the pump, then to the nurse and baby who had just come in, and finally to Miss Sullivan. "I told her I was teacher, and teacher I have been ever since." (Applause.) All that day she was greatly excited and began to realize that everything had a name, that she had a way to everything she wanted, her prison door was open, and that night for the first time she embraced and kissed her teacher.

She was fond of Greek mythology as a child and as resourceful in games as Ulysses himself, while in every way she was a healthy, happy child. On the Alabama farm she was in contact with the living creatures and obtained a sense of kinship with the world in which she lived. Mrs. Macey expressed her conviction which she had gained as a result of her experience that it was the child's prerogative to lead the teacher. It was a waste of energy to try to make him learn when the child wanted to play. It was not the easiest way for the teacher, but it was the pleasant and most profitable for the child. All our education was self-education.

Mrs. Macey related how Helen learned to speak, how she studied and took her degree of B. A. at Radcliffe College, affiliated with Harvard, and acknowledged that in many respects the pupil had outstripped the teacher. "She has no eyes, but she sees deep into the structure of society. She has no ears, but she preaches a great change coming into the world. Out of the darkness she comes to you who dwell in the light with a message of Brotherhood." Mrs. Macey concluded amid great applause.

Miss Keller's Voice.
Miss Keller then came on the platform and spoke. Her voice is not greatly different from that of some foreigners who are just learning English. She emphasizes the vowels more than the consonants, and some of her

tones are full and musical, and if monotonous, her voice is not disagreeable. Her diction is idiomatic and fluent. Her message, she said, was simple and plain. We all were gathered together and lived by and for each other. All success in life depended on mutual help. We should make the most of what abilities God had bestowed upon us, and should use them more fully and our mind more alertly.

"I was blind; now I see. I was dumb; now I speak. By the hand of others I found my father and mother, my sorrow and love and God. But for my teacher I should be nothing," elicited loud applause. "My life has taught me to put my trust in the Lord, and he shall uphold me and I shall dwell in safety," she added. It was impossible for the blind man to see the splendor of the sunset.

"People with eyes look up to the stars without emotion. I do not see the wonderful fires in the sky, but they shine in my thoughts forever. Blindness has its wonders, too. Imagination breaks down all the barriers. Put thoughts into your senses. You will wonder at the beauty and the power that came to you. Your eyes and ears will be full of miracles. Look for Oliver and you will find them," she concluded.

Questions Answered.
Many questions were asked by the audience, which she answered promptly. She heard the applause with her feet, she said, arousing laughter and my applause. She spoke French after a fashion.

Phillips Brooks had taught her the love of God. Her favorite poets were Keats, Shelley and Walt Whitman. She liked Whitman "because he is so full of the spirit of the new democracy to come." She loved to read Oliver Wendell Holmes. She imagined the colors. White seemed to be the soul of all things. She did not think socialism would come very soon. "You must work long and hard to bring it to pass." She read Wm. Morris, Bernard Shaw, Arnold Bennett and Carl Marx. She had not read Henry George, but thought single tax a step in the right direction. She had a keen sense of music and its rhythm. She could feel the deep tones of the organ, and its rise and fall like the waves of the sea. To the blind she said: "I greet you and my comrades in the dark." The rain, she said, had spoiled

Never Saw Letters

Harry Saunders, switchboard operator at the fire headquarters on Adelaide street, stated to The World last night that he knew nothing whatever of the letters sent out in ward four endorsing the candidature of R. H. Cameron for alderman. He never saw any of the letters, he says, although he is a member of the executive of the Ward Four Conservative Association. But he never takes part in municipal elections, other than casting his ballot.

her visit to Toronto. "I have not seen the city, but I love the people." Miss Keller and Mrs. Macey leave for London this morning.

LORETTA ALUMNAE.

The monthly meeting of the Loretta Alumnae Association will be held at the Loretto Abbey Tuesday, Jan. 13, at 4 o'clock. Mrs. Ambrose Small will entertain the members and friends of the association with an illustrated talk on travel. Members bringing guests are kindly asked to notify convener of house committee. Tel. North 1548.

CANADIAN INSTITUTE.

The members of the Canadian Institute will hold their usual meeting at the physics building, University of Toronto, this (Saturday) evening at 8 o'clock. Rev. C. E. Whitaker, Herchel Island, will give an illustrated lecture, entitled, "Eskimo of Mackenzie Delta." The public are cordially invited.

HURT THRU CHIVALRY.

In trying to evade striking a little girl who had walked directly in front of his toboggan on the Willowvale Park slides yesterday, Robert McLachlan, son of the proprietor of the Brunswick Hotel, crashed into a sewer pipe, receiving numerous cuts about the face and hands. He was attended by Dr. McLean and Price and removed to his home.

LOHENGRIN

Something About This Famous Opera—The Bridal Chorus Translation.

This is the famous bridal chorus from "Lohengrin." To untold thousands of people this wedding march recalls the most joyous moment of their lives.

In sequence of writing this great opera is the seventh of Wagner's productions for the stage. The poem was written at Dresden in 1845; the music begun in September, 1846; the instrumentation of the work was completed during the ensuing winter and spring, and the first performance took place Aug. 28, 1850, at Weimar.

The opera has always been especially popular in the United States and England, not only on account of the wonderful beauty of the music, but because the legend itself has been embodied in English literature from early times.

The translation of the words used in "Heart Songs" is very beautiful, and match the music almost as well as if they had been written for it originally. The Lohengrin Bridal Chorus, or wedding march, is only one of several celebrated compositions of this kind that appear in the book—and it is this completeness and accuracy that make it universally interesting and absolutely a work that no home should do without.

15 Main Street East, Hamilton, and the choice is optional, as set forth elsewhere in this issue.

MAKE DAYLIGHT BY ARTIFICIAL MEANS

Simple Process Requires Two Color Screens and Strong Incandescent Lamp.

The new process of making artificial daylight at night is quite simple, according to Arthur St. George Joyce, who writes on this subject in The Technical World Magazine. All that is needed, he explains, are two color screens and a strong incandescent light. Then the artificial light rays are passed thru the screens, which draw out the excess of colorings that are foreign to daylight, and there remains true, pure and unvarying daylight.

Various cabinets, lamps and lights to produce daylight have been manufactured, but none has stood the test, continues the writer. In this latest invention a cabinet is employed. This cabinet is constructed in various sizes, but the one which is most convenient is 18 inches deep, 30 inches wide, and 28 inches high.

An incandescent gas light is placed at the top of the cabinet. There is a metal reflector to throw the light downward thru the rays of red orange and yellow, which are foreign to daylight in these colors.

GRANDMA USED SAGE TEA TO DARKEN HAIR

She Mixed Sulphur With It to Restore Color, Gloss, Thickness.

Common garden sage brewed into a heavy tea with sulphur and alcohol added, will turn gray, streaked and faded hair beautifully dark and lustrous, remove every bit of dandruff, rid scalp itching and falling hair. Just a few applications will prove a revelation if your hair is fading, gray or dry, scraggly and thin. Mixing the Sage Tea and Sulphur recipe at home, is so troublesome. An easier way is to get the ready-to-use tonic, costing about 50 cents a large bottle at drug stores, known as "Wyley's Sage and Sulphur Hair Remedy." Thus avoiding a lot of fuss.

While wispy, gray, faded hair is not so sinful, as you desire to retain our youthful appearance and attractiveness. By darkening your hair with Wyley's Sage and Sulphur, no one can tell, because it does it so naturally, so evenly. You just dampen a sponge or soft brush with it and draw this thru your hair, taking one small strand at a time; by morning all gray hairs have disappeared, and after another application or two, your hair becomes beautifully dark, glossy, soft and beautiful. Agents, Robert Simpson Co.

BENSON WAS HAPPY AMONG THE GIRLS

Spoke on Shakspeare at St. Joseph's College — Real Matinee Audience.

FLOWERS AND PRAISE

Showered Upon Stage King by Queens of Convent School.

A tribute to the standing and popularity of F. R. Benson was the magnificent address which greeted him in the auditorium of St. Joseph's College yesterday afternoon, when the distinguished actor gave one of his instructive addresses on Shakspeare and the elements that assisted in the production of the greatest poetry of the English tongue.

The stage of the hall was decorated in honor of the visitor from Stratford-on-Avon in the Alumnae shades, yellow, blue and brown, together with Japanese panels and potted plants. The gallery was filled with the sisters of the community of St. Joseph, and the floor of the house was packed with the pupils, members of the Alumnae and their friends. A large number of the local clergy were also present, amongst them Rev. Dean Harris, Rev. Dr. Burke, P. P., and Rev. Fathers Minehan, Dollard, Williams, Haydon and O'Malley.

Girls Gave Thanks.

At the close Gertrude Bradley, Zita Nolan and Mary McCarthy, three young ladies of the school, ascended the platform and gave thanks for themselves and their companions. They told in very complimentary terms the appreciation of all for the treat they had enjoyed and offered a beautiful sheaf of St. Joseph's lilies.

A Gift for Kings.

It is not given to many men to receive a bouquet with grace, but in no part of his address did Mr. Benson appear to better advantage than when looking down upon the three young girls in their black uniforms with simple white collar and cuffs, who grouped about him offering praises and flowers. Accepting the sheaf, he raised it high and ended a family by designating the lilies as gifts for kings from the home of queens.

ROSARY HALL GUILD OPENED FOR SERVICE

Members Will Visit the Hospitals and Sew for the Needy.

A meeting of the newly-formed society of the Rosary Hall Guild was held yesterday afternoon at Rosary Hall. Miss Marie Macdonnell, president of Rosary Hall Association, opened the meeting. Archbishop McNeill spoke.

The first interest of the organization will be to act auxiliary to the parent organization, Rosary Hall. The members will also do a good deal along the line of social service by visiting the hospitals, sewing for the purpose of making sales to assist the needy and directing their energies along various avenues of work.

The following are the officers of the society: Hon. advisory president, Miss Macdonnell; hon. advisory vice-president, Miss Kate Fraser; president, Miss Florence Boland; vice-president, Miss M. Elmsley; secretary, Miss Mary Hurley; treasurer, Miss Marie Hearn.

About fifty names are already on the roll.

BIRDS' LUMINOSITY AND ITS GENESIS

Phenomenon Has Engaged Attention of Naturalists Since Pliny's Time.

Luminous birds seem to have attracted attention from the time of Pliny, but they have eluded the grasp of naturalists about as successfully as the modern serpent. Some familiarity with them was gained, however, as long ago as 1871, when phosphorescent fowls were marketed, including a brilliantly glowing cock and hen, from different parts of France.

In 1897 Sir Digby Piggott called the attention of naturalists to luminous birds in England, and early in the year one of a pair seen in Norfolk was killed by a gamekeeper and identified as a common barn owl (*scops noctua*). The light was compared to that of a bicycle lamp 300 or 400 yards distant. Its rapid diminution as the bird turned away from the observer suggesting that the luminosity was confined to the breast.

An account by Count L. de Sibour states that the theory accepted at first was that the phosphorescent bacteria of decaying wood had become attached to the feathers, but a later and preferred view is that the dampness and uncleanliness of the breast covering favors a sudden growth of shiny bacteria peculiar to feathers.

HOW TO CONQUER RHEUMATISM AT YOUR OWN HOME

If you or any of your friends suffer from rheumatism, kidney disorders or excess of uric acid, causing lameness, back-ache, muscular pains, stiff, painful swollen joints; pain in the limbs and feet; dimness of sight; itching skin or frequent neuralgic pains, I invite you to send for a generous Free Trial Treatment of my well-known, reliable, Chlorine, with its serene and full particulars by mail. (This is no C.O.D. scheme.) No matter how many may have failed in your case, let me prove to you, free of cost, that rheumatism can be conquered. Chlorine succeeds where all else fails. Chlorine cleanses the blood and removes the cause. Also for a weakened, run-down condition of the system, you will find Chlorine a most satisfactory general tonic, that makes you feel that life is worth living. Please call your friends to this liberal offer, and send today for large free packages to MRS. M. SUMMERS, Box 65, Windsor, Ont.

MUST DO PENANCE FOR DANCING TANGO

Archbishop of Paris to Publish Admonition Also Respecting Immodest Dress.

PARIS, Jan. 9.—(Can. Press.)—Cardinal Leon Adolphe Amette, archbishop of Paris, in an admonition which will be published in the churches here tomorrow, forbids the dancing of the tango, as a sin which must be confessed and for which penance must be done.

"We condemn," the archbishop says, "the dance imported from abroad known under the name of the tango, which by its nature, indecent and offensive morals, and Christians may not in conscience take part in."

"It will, therefore, be the duty of confessors to take notice of this in the administration of the sacrament of penance."

Abbe Gouget of the archbishop's household said that his conscience for some time had been distressed by the persistence of the vogue of the tango, and had hoped that it would be transient, but he felt it his duty now to intervene formally.

Cardinal Amette also will publish tomorrow an official admonition on the dancing and eccentricities of modern dress.

"We remind the women," the cardinal will say, "that they should observe all the rules of Christian modesty which too often are violated. We ask Christian women to unite in abolishing certain styles of dress which are contrary to decency."

Dr. Fouquieres, who, a year ago, delivered a series of lectures in America, today said that Cardinal Amette's prohibition of the tango would produce profound emotion and dismay in Parisian social circles.

SAILED FOR TORONTO AFTER WEDDING FEAST

James F. Goodair and Wife Have Lived Here Twenty-Five Years.

James F. Goodair and Mrs. Goodair, 507 Clinton street, celebrated their silver wedding on Wednesday evening, surrounded by many old friends. They received many beautiful presents and a most enjoyable evening was spent. The host and hostess were married in St. Giles, Edinburgh, on January 7th, 1889, and on the following day sailed for Toronto, where they have lived today with a family of four daughters and one son. Two of the daughters, Mrs. Harold S. Meredith and Mrs. William Harrison, are married. Mr. Goodair is employed in the T. Eaton Company's store.

WONDERFUL FALLS OF KAIETEUR IN S. AMERICA

Many Are Higher and Wider, But None Equal in Symmetry and Beauty of Setting.

Dr. H. E. Crampton of the American Museum of Natural History, writing in Harper's Magazine of his visit to the falls of Kaieteur in South America, which rank among the greatest in the world, says:

"There came the first close view of Kaieteur. Leaving my colleague, Dr. Lutz, to look after affairs at Tukeit, and taking provisions and equipment for a field base on the Potaro above the falls, on July 19 I climbed the steep walk of the gorge to the high plateau above. The path debouched from the forest on to a rocky plain bearing very little soil, and, guided by the roar of troubled waters, I proceeded to the brink and looked out upon a work of nature whose beauty is unsurpassed.

"Like a vast curtain nearly 800 feet high, a sheet of water over 200 feet in breadth poured downward from the rocky rim into the depths of the gorge. The setting is superb; all is primitive, untrodden nature, unmarred by human or his works. And the scale is so grand that its full comprehension is difficult if not impossible.

"Without taking into account the broken waters at its foot, Kaieteur is 741 feet in the clear, nearly five times as high as Niagara, or it is higher than the Metropolitan building at Madison square, in New York, while at the time I saw it it exceeded a city block in breadth.

"Many falls are higher, Niagara and Victoria are far wider, but Kaieteur is matchless for symmetry and beauty of setting."

RECORD SALE OF HIGH-CLASS FURS.

On the afternoon of Friday, Jan. 16, and following afternoons, C. M. Henderson & Co. will offer at public sale within their mammoth rooms, 128 East King street, the greatest and most valuable collection of high-class furs ever exhibited in Toronto. The sale will be conducted under instructions from the Siberian Fur Company, exhibitors at the Canadian National Exhibition of 1912 and 1913, and provides an exceptional opportunity to secure furs of the highest grade. The value of the collection is conservatively estimated at \$75,000, and includes ladies' and gentlemen's furs and fur garments and a really wonderful assortment of mounted animals.

Among the numbers cataloged are splendid specimens of silver foxes, Russian sable, Russian ermine, Persian lamb, broad tail Alaska seal and other rare pelts. The Russian and automobile robes and coats comprise a specially large and notable selection and the mounted animals are in themselves a notable display. They include tigers, pure white polar bears (the largest in the world), Siberian silver tipped grizzlies, South African lions and leopards, Manchurian leopards, Russian wolves and many others. The whole forms the most complete and magnificent collection of furs and mounted animals ever submitted to the Canadian public, and will be sold absolutely without reserve. The sale will commence at 2:30 p.m. each day.

COUNCILLORS SHOULD BE ABOVE SUSPICION

Maybe Will Move That Councilmen Make Declaration of Taxable Property.

There is so much talk in the city about the desiring of taxes by members of the city council that I intend to move in the council that every member make a declaration of the property he owns and what its assessment is," said Ald. Maybee.

"I have heard it charged that some of the members never pay their taxes. This suspicion should not rest upon every man elected to the council, and I intend to clear it up as soon as possible."

The Wise Goose Says

She overheard her father say he suffered with coughing spells, and she thought in that case he ought to let someone else do his spelling if he had to spell.

A DAILY STORY FOR CHILDREN

The Enchanted Land

By Virginia Vale.

Once upon a time there was a King who had the power to let two children visit his enchanted land once a year. They must be very good children and could stay only a few hours, and those that had been there never forgot, for it was very wonderful.

It happened that a little boy and girl went once together, and they never knew how they went or how they got home, but they were sure they had been there. When they woke the next morning after their visit they rubbed their eyes and said: "Where is Jack Frost and his wonderful house? And the King and the Golden Palace?"

Jack Frost had met them at the gate outside the Enchanted Land and had taken them to the King, who had told them how glad he was to see two such good children, and said they could go about and see everything they wanted to, so Jack Frost went with them, and showed them his crystal home with big icicles hanging from the roof, and his ice pen that he used to write with when he came down to earth very cold mornings and wrote things on the windows for the children to see.

Then there were the storerooms where all the snow was kept waiting to fall over the earth and let the children have fun coasting.

There were so many other things that the children hardly had time to see them all before they were taken back to the King, who gave them a small red ball and told them it was time to go home, but to keep the ball to remind them they must all be good always.

So they said "good-bye" and, yes, there was the red ball right in their hands, so it must all be true. Now what do you think, was the red ball from the Christmas tree or from the Enchanted Land?

BUSINESS WOMEN'S CLUB.

The regular monthly meeting of the Canadian Business Women's Club will be held today at the Arena in the form of a skating party, beginning at 3 p.m. The members will assemble for refreshments in the Queen Mary tea-rooms, at 6 p.m. Those unable to attend in the afternoon are invited to be present at the later function.

The World gets more exclusive articles than any other Toronto paper.

GOOPS

By GLETT BURGESS

JAMES PERKINS

You'd better just keep out the way Of Jimmie Perkins, when you play. No gentlemanly child enjoys Such rough and rude and rowdy boys. But when you leave him, see that you Are not a Goop like Jimmy, too!

LADIES

Have your Beaver, Velour or Felt Hats cleaned, dyed, blocked and remodeled at NEW YORK HAT WORKS, 866 Yonge Street. Phone N. 5165.

NURSERY

CONDUCTED BY CLIVE MURRAY

Instinct, Experience or Training

In discussing the advisability of our girls being given as part of their education some instruction that will better prepare them for motherhood, how can we best do this? The answer is that such instruction is not necessary; that as nature intends girls to become mothers, their natural, maternal instinct will guide them in the right way.

For unknown thousands of years the savage woman has been directed by instinct. The savage baby has lived on nature's own baby food, plus the uncertain products of wild fruit, roots, fish and game. The savage mother bears children with rapidity and regularly, but the tribe does not increase much. Why? Because of the awful mortality that befalls children of this mother guided by instinct. Coupled with the dependence on instinct is that other tendency to depend upon the experience of mother or grandmother.

It is unquestionably true that the experience of mothers and grandmothers has taught them great truths, but they in turn get their knowledge from the mothers and grandmothers of the day of the child, the records of those little babies of earlier days who will find that their mothers were much too busy to spoil them with indulgence, and also that their mothers died too soon. Moreover, since grandmother's time there has been as much advance in our knowledge of the law of the child, the child mind and the child morals as there has been in our knowledge of electricity, plumbing and machinery.

The growing realization that it is dirt, ignorance and neglect and not a much-abused Providence that kills our babies is pushing the thought of the nation so fast that the coming change is already upon us.

THE TUBEROSE

"The tuberose," according to Harriet L. Keeler, is a plant that may be said to have experienced in its many double rosettes and creamy white waxiness that no other flower possesses. These rosettes measure often four or five inches across, and exhale a sweetest perfume, which is deadly in its pungent fragrance. This perfume lasts a long time.

I have known people to become deadly sick, nauseated, to be seized with faintness, even to become fligid and clammy after inhaling this odor for the briefest space.

The perfume is worse than intoxicating. It is suffocatingly poisonous to many.

Tuberose plants in bloom should on no account be allowed in the sick room. Nor should bunches of flowers that number tuberose amongst them be allowed in the patient's room either.

Tuberose should be planted in the open garden—and kept there. A ten-acre field is rather an appropriate situation for them, in the estimation of many people.

Next week we shall take up the study of children's gardens, and the good they may accrue from them.

MAMMOTH WOMAN DIES.

Weighed 800 Pounds and Doorway Had to Be Enlarged for Coffin.

HUNTINGTON, Ind., Jan. 9.—(Can. Press.)—Mrs. William Settlemier, 38 years old, who weighed 800 pounds, died at her home near here of pneumonia.

A special coffin, 44 inches wide and 38 inches deep, was required for the body, and it was necessary to enlarge a doorway before the coffin could be taken into the house. A dray wagon had to be used for a hearse at the funeral.

It doesn't take all morning to read The World. The news is condensed.

EFFICIENT HOUSEKEEPING BY HENRIETTA D. GRAUEL

DOMESTIC SCIENCE LECTURER

Between Times

AFTER the holidays and before spring housecleaning there comes a time when a little touching up is necessary to keep the house in company order.

The polished articles of furniture seem to need most attention and among these is the piano. Greatest care must be used in selecting a good polish from those constantly offered for sale. The best of these is scarcely good enough in the hands of an inexperienced worker, so go to a reputable piano dealer for your supply, taking with you a bottle to be filled. Ask for explicit directions for using it. The piano man will always tell you to use a small quantity of polish and a great amount of "elbow grease."

The best directions that I have been able to secure are to use white cheese cloth for the cleaning, washing and polishing. The actual cleaning will require a little warm water. Moisten the cloth in it and wring almost dry. Wipe off the finger marks and dry quickly with another bit of cheese cloth. Clean only a small space at a time and only wash where the case shows positive signs of grime.

With all polished surfaces the less water used the better. When ready to polish moisten a square of cheese cloth with the oil and rub it over the article to be brightened. Always rub in one direction to avoid streaking and do not start to rub the polish in until the entire surface is covered. Then begin to polish with strong strokes in the spot where the polish was first applied. Deep scratches cannot be removed, but a good oil polish will darken them so they will scarcely be noticed.

As soon as one bit of cheese cloth is dark with the polish discard it and take a clean piece. All the polish must be removed and you may have to wrap a blunt pencil or a pointed stick with a little absorbent cotton to reach into the carving and the corners. If you have a good light to work by the task will not seem hard.

Leather couches and chairs will have their period of usefulness troubled if they are dressed two or three times a year with a mixture of equal parts of linseed oil and turpentine.

This should be applied liberally in the evening, so that it can work into the pores of the leather; in the morning rub the leather with a cheese cloth to remove the surplus. Very light leather cannot have this dressing, as it makes it dark, but there is a tan leather dressing to be purchased from upholsterers that answers the same purpose.

An oiled buckskin or piece of old silk or linen have always been used for dusters, but a square of velveteen is preferred by those who have used it as its long nap holds the particles of dust. If you dust your piano once with velveteen you will never want to use anything else for this.

THE WOES OF MRS. NEWLYWED

"I suppose you think this is funny Mrs. Neighbor, but I have found moths in our piano," said Mrs. Newlywed.

"That wouldn't improve the instrument any, would it?" laughed Mrs. Neighbor. "But I can tell you a way to get rid of them without burning the piano at all. Use a scant of turpentine, benzoline and oil of lavender. Seven parts of benzoline to one of turpentine and a few drops of oil of lavender, one drop to each ounce, will be sufficient quantity."

To keep brass like new, rub over with the furniture cream and polish it with a soft duster. By so doing the lacquer retained and the articles do not become tarnished.

There are 860,000 automobiles in the United States, exclusive of commercial trucks.

Sleepy After Meals? Unnecessary!

WRIGLEY'S SPEARMINT

Hastens Digestion Keeps You Lively

Don't waste the precious hours of the evening. Get your sleep from weariness—not from slow digestion. This refreshing mint leaf juice hastens digestion—keeps you alert, besides cooling your mouth and throat and brightening your teeth splendidly.

Secrets of Health and Happiness

Rubber Band Treatment Is Best for Frost Bites

By Dr. Leonard Keene Hirschberg

CAPTAIN SCOTT'S lamentable diary of his trip to the South Pole describes the sudden appearance of frost-bites in his party. They had been through bitter weather; much colder than that experienced when the tips of noses, caps and fingers began to show frost bites.

DR. L. K. HIRSCHBERG

The wind, of course, plays a part in making the Arctic weather more annoying. Old Boreas, however, is not so wicked a fellow in those instances as seems to be the case at first sight.

"The wind has a language I wish I could learn!" Sometimes "its soothing, and sometimes its stern." Sometimes it comes like a low sweet song. And all things grow calm, as the sound floats along.

And the forest is lulled by the dreamy strain. And slumber sinks down on the wandering main.

In temperate climates, such as these, frost-bites, which are really advanced stages of chilblain, are very rare.

Infants who are sent forth by many of us to be "hardened" and made immune to near-zero weather, old persons, and the weak generally, may be truly frost-bitten even in these sub-Arctic neighborhoods.

The fingers, toes, lips, ears and nose of these unfortunate blanch as white as a Christmas snow. The nippings of Jack Frost at first squeeze all of the blood from the flesh and give it a ghastly waxiness. Soon the violet blood leaks back into the part. It now assumes a swollen, purplish hue, itching, burning, prickly, tingling torments now harass the sufferer.

Chilblain is a perniciosis, of moderate affliction, which has not reached the true frost-bite stage. Small patches of dusky scarlet and lavender hue, raised a bit, are to be seen on the toes and fingers affected.

Upon the margins, outer edges and frontiers of the heel, the backs of the toes and fingers, cheeks and any portion of the flesh some distance from the heart—almost unendurable is the itching, particularly when the frost-

biten toes or fingers become overheated of warm. Just as after a fever, the skin peels as the spell of chills—which comes and goes many times in a season—subsides. If an attack of chilblain is neglected, the flesh may form blisters and ulcers and cause gangrene and other serious trouble.

While working in the department of dermatology of the Johns Hopkins Hospital a few years ago, experiments made by me proved that chilblains can be in many instances benefited by placing rubber bands some distance away around the nearby limb.

Thus the flow of blood is stopped. Then suddenly allowing it to rush again into, say, the affected toes, rejuvenates and softens the tissue. This unusual treatment should be carried out every hour for five minutes during the attacks.

Are We Really Independent?

BY WINIFRED BLACK

Copyright, 1913, by Newspaper Feature Service.

I KNOW a man who is in trouble. Desperate trouble. He's rich. He has good health. He has a devoted wife, three fine daughters, two manly sons, a beautiful home and a great circle of friends, but he's so worried he can't sleep—all on account of his daughters.

Three of them—and not one of them willing to live their lives the way he thinks they should live them. "Here I am," he said to me just the other day, "here I am, hale, hearty, as rich as mud, fifty years old, just ready to enjoy life, and these three girls are fretting me into my grave."

"What's wrong with them? Not a thing on earth except that they're crazy, absolutely crazy. That's all there is to it. Good girls, as good as gold, pretty, too, and clever, but every one of them bitten with this independence microbe."

"One of them wants to go East and live in a studio, and teach artistic dancing. "One of them wants to go to California and live in a studio and paint redwood forests."

"And one of them says she'll die if she can't go to New York and lead the broader life—whatever that may be. Oh, yes, there's a studio in that, too. You can't seem to do a thing with any of them without a studio."

"I can't see anything different about a studio, can you? Just a room with some rugs on the wall instead of on the floor and somebody always messing with a chafing dish. Oh, I've been around to some of them. Daughters have been trying to educate me. Here I am, with a great big, magnificent house, built on purpose for them—a special sleeping porch for Madge, a special gymnasium for Catherine, and the finest kennels in the West for Blanche, and her Airedale fad. Just setting down to a life full of gay young people and some fun in living and every one of them is bound and determined to go somewhere else—anywhere, so long as it's far enough away from home, and if there's a studio in it."

"I don't see what's getting into them all. Every girl that comes to our house has taken up art, or music, or settlement work, or something. I sit behind my paper and listen to them talk. It makes me dizzy. As for mother and me—we can't count at all. They try to be tactful, but I can see that they think we're kind of queer, old-fashioned (trumps, and not worth listening to when it comes to the real business of life).

"Art, dancing, music, why, they just want to get away from home—that's all. Any excuse goes." "Well," said I, breaking into the current of my friend's desperate flood of furious talk, "why don't you let them?" "Let them what?" "Get away from home," I said. "That's what they seem to want."

"The man gazed at me in perturbed horror. "You," he gasped, "you"—"Where's Mary?" the eldest daughter. "Why Mary's married."

"Why no, of course not." "Where's George?" the second boy. "He's out in Australia—you know that—why?" "Where's Dick?" the oldest boy. "You met Dick in Chicago the other day yourself. He's doing fine, getting a good start in architecture."

"When are either of the boys coming home—not for a visit—for good?" "Coming home for good, the boys, why, there's nothing the matter with either of them. Why should they want to come home and stay?"

"Why should the girls want to come home and stay?" said I to the man who is in trouble. "You let the one who married go without a word. Why haven't the others the same right to their own independence as she, or as the boys?"

The man threw up his hands. "You're as bad as they are," he groaned. "What's the matter with all you women; are you all going crazy, or what?"

"Perhaps a few of us are trying desperately to come to our senses," I began, but the man who is in trouble wouldn't stay for another word. He couldn't. It made him too emotional.

I have been thinking about him and his daughters and his big fine, empty house, and his lonely, empty heart ever since, and wondering.

The world is full of just such girls as those daughters to-day. Are they going to make the world over, or will the world make them over into something we do not love to think of?

I keep wondering, and wondering.

Winifred Black

"Perfect Enunciation Is Today a Lost Art"

By Mme. Margarete Matzenauer

Prima Donna, Metropolitan Opera Company, New York.

REVIVAL of the refined and artistic use of the English language, both in singing and speaking, is long past due in America. Perfect enunciation is a lost art in the new world. Very few of our concert and opera singers seem to think about enunciation—they are too busy trying to get some pretty vocal effect.

Our country seems mad about "Opera in English," but it is very difficult to understand these singers in what is alleged to be general lack of appreciation of the orthoepic beauty and strength of the Anglo-Saxon tongue.

What is the use of Opera in English if the people cannot understand the singers? The opera might better be sung in German, French or Italian—the enunciation then would be perfect.

American or English singers will study faithfully every syllable of a song in a foreign language, but when they take up an English song they think the enunciation will take care of itself and the result is anything but artistic. And this in spite of the fact that even in speaking the English language is pronounced very badly.

English is a complex tongue and its mastery is quite difficult, but English is the one language really worth while. It has no sounds that are in themselves more difficult than those of other languages. I am a Viennese and sing in the three great music tongues—German, French and Italian. I can't remember when I began to speak English, but it seems as though I have always spoken it. Foreign singers who pronounce English as unrecognizable are either too lazy or too thick-headed to master the Anglo-Saxon tongue.

The singer who has managed to master the Anglo-Saxon tongue must look with scorn on the artist who confesses ability to sing only in a simple language like Italian. A singer who sings English so as to be understood will be the measure applied to all artists one of these days.

Once it was thought enough to teach people vocal agility. To-day mere beauty of vocal tone is not sufficient. The demand now is for tone color with dramatic consistency and perfect speech.

Perfect enunciation is the base of all singing. Every word projects its own atmosphere and that atmosphere must be reproduced in the singer's tone. The admission of Shakespeare "with the action to the words" is the singer as fully as to the player. Singing after all is only the perfect union of speech and tone.

Taming the Lion

By Tom Jackson

THE lion is a savage beast, who's often in a rage; yet all the ones that we have seen were mostly in a cage. But whether in captivity or in his native lair, the lion chiefly is composed of roar and growl and hair.

The lion in the jungle lives, where hunters seek his hide. But should the lion see one first, the hunter goes inside. It is not wise to fool around a lion's mane or maw, unless the lion's inside plant has been replaced by straw. The lion seeks his food at night, and sleeps most of the day, like people do who have the coin along the Great White Way. The lion lives in many lands, and loves to roam the veldts, where simple minded citizens wish he lived somewhere else. There is the lion of the Nile.

The lion of St. Marks, and bronze ones, full of veridict, stand in the public parks. The British Lion has a fierce and very savage look, but when he meets a militant he always gets the best of it. The lion seeks his food at night, and sleeps most of the day, like people do who have the coin along the Great White Way.

The British Lion has a fierce and very savage look, but when he meets a militant he always gets the best of it. The lion seeks his food at night, and sleeps most of the day, like people do who have the coin along the Great White Way.

Answers to Health Questions

Dr. Hirschberg will answer questions for readers of this paper on medical, hygiene and sanitation subjects that are of general interest. He will not undertake to prescribe or offer advice for individual cases. Where the subject is not of general interest letters will be answered personally if a stamped and addressed envelope is enclosed. Address all inquiries to Dr. L. K. Hirschberg, care this office.

Young Mother.—My baby is a year old and cannot walk or talk yet. What shall I do? Nothing. Very few infants do either at this early age. Many healthy children do not speak and upright until they are nearly two years old.

NEW MEDICAL TREATMENT LIQUID PARAFFINE BATHS

Kerithery, the Name of Remedy Which Renders General Circulation More Active.

A new form of medical treatment by baths, known as "kerithery," in which liquid paraffine is used instead of water, is proposed by a French authority, Dr. Barthélemy Sandfort. The Literary Digest gives the following translation of an article on the subject appearing in a recent issue of Cosmos:

"Despite the unusual temperature of 122 degrees Fahrenheit, these baths produce no feeling of heat, and are very well borne; the face remains calm and in taking the bath the skin is scarcely reddened. It becomes red only during the rest that is taken immediately afterward, and it is the heat that has been applied, that perspiration is most abundant."

"This secondary dilatation of the vessels of the skin is explained by the contractility of the vessels, which exerts a very sensible compression on the whole bodily surface; the arterial tension, at the same time, is slightly lowered."

"Kerithery gives very good results in all forms of gout, in sciatica, chronic varicose veins, and in general, in all disturbances of nutrition, since it has the effect of rendering the general circulation active and regular."

"Kerithery gives very good results in all forms of gout, in sciatica, chronic varicose veins, and in general, in all disturbances of nutrition, since it has the effect of rendering the general circulation active and regular."

RUINS OF OLD TEMPLE UNEARTHED AT BABYLON

Was One of 'Wonders of Ancient World'—Only the Foundation Now Remains.

Thru the patient work of German explorers in Babylon, the ruins of an ancient temple have been unearthed. The temple was built on a site which had been excavated in 1847 and there has been brought to light a temple which was one of the wonders of the ancient world. The Christian Herald, have discovered the foundations, but from them the entire plan of the building is distinct.

The ruins were the outer and inner courts and the innermost shrine, or the holy of holies, where the image of the great god stood. About the outer court were the chambers for the priests, and secret passageways led to the shrine.

Running from the temple into the city was a paved street, the street of Daniel as the Germans have called it, without any special reason for doing so.

Babyl, the northern mound, still bears the ancient name of the city. It is a huge mound, more than a hundred feet in height, and with sides so steep that they are difficult to climb.

It is especially here that the Arabs have dug for bricks, and now as one wanders about the site, the bricks may be seen far down the shafts of the massive walls of the great arches, arranged side by side and tier upon tier.

The hollows of the arches have long been filled with fallen debris, once they might have been seen there.

Dr. Koldewey believes that the ruin represents the Tower of Babel, because it still bears the name. More to the east, the hanging gardens of Babylon were there. Shady trees and hanging vines grew upon the elevated terraces, and the water was raised from the Euphrates to the very summit, and came trickling down from terrace to terrace to nourish the vegetation.

Above the terraces were the arches, and the long passages beneath the arches were delightfully cool and dark. The entrances were half concealed by the overhanging vines, and the hot air, tempered by the trickling water, swept thru them. Here the king and queen passed the heat of the Babylonian summer, just as now the resident of Bagdad spends the hot day in his underground serdab.

A complete and brilliant rainbow was seen more than half an hour after sunset in the Swiss Alps a short time ago.

The Chinese chrysanthemum was introduced into England as far back as 1764, but it became extinct in that country soon after.

Principal and Interest. "I have a very heart interest in the play."

"I should say so. Three of the women are supposed to be drawing alimony and two others would be if they could enforce court decrees."

Lost His Equilibrium. "Cholly seems to be unbalanced."

"Yes, that is his great misfortune. He believes his own glowing stories, invents his money and goes broke."

EAR OF DIONYSIUS AND ITS ACOUSTIC QUALITIES

An Old Quarry in Sicily, Used as Prison by Greeks, Contains This Odd Marvel.

Sicily is rich in Greek antiquities. Some of the best are clustered together on the outskirts of the old town of Syracuse. One is the "ear of Dionysius" in the Laionia del Faro, an old quarry used as a prison by the Greeks.

The walls of the quarry are over a hundred feet high and lean inward at an angle of about 90 degrees—all chisel work done by innumerable slaves. The idea, explains a writer in The Wide World Magazine, to prevent any possibility of escape on the part of the hapless prisoners confined there, and as a further precaution Dionysius had chiseled out in the solid rock a vast cavity, very similar, as seen from without, to a human ear, by means of which he is said to have listened to the conversations of the captives.

The interior of the cavity is in the shape of the letter "S" and gradually tapers until at the extreme summit you may perceive a small hole, which the day-light comes. It was here that Dionysius did his eavesdropping.

The acoustic properties of this "ear" are extraordinary. The slightest whisper being distinctly audible, while a loud noise, like the slamming of the door which gives access to the "ear," produces a rapid succession of deafening reports.

The partial impact theory of the evolution of the heavenly bodies is declared by Prof. A. W. Bickerton, British physicist, to have found astronomy a chaos of facts, and converted it into a classified system.

About 100,000,000 stars can be photographed in the Milky Way. The sun, with some or many dark bodies, are traveling in two great streams in opposite directions, and as they pass they acquire enormous speed, so that a partial or side collision does not stop them. From each grazing body a portion is torn away. The coalescence of these two parts forms a third body, which is very hot and has so much more energy than it can retain that it explodes.

A graze of suns in this way produces three distinct bodies—two revolving, torn suns, or various stars, and a third explosively hot body, or temporary star.

The attraction of a new third body would often bind together the original bodies, and the pair would become a permanent double star. The simple new theory recognizes such a complexity of conflicting forces that the phenomena it may explain seem to its author, at least—to have no end.

Suspicious. "I see that the police have orders to arrest all suspicious persons," said Gayboy.

"What of that?" asked his wife. "Well, you had better look out, that's all."

Perhaps Both. "I am told she is looking for a husband."

"Or some other woman's?"

Not to Be Expected. Ukerdel—His argument was mighty weak.

Gobang—That's strange, too, when he has such a strong voice.

With the Bark on

Four o'clock in the morning is early or late, according to whether you are going to bed or getting up.

Give and take is seldom a popular plan when applied to advice.

The rich man who thinks he is poor is poorer than the poor man who thinks he is rich.

There are plenty of things which no man knows, but there are few that some man does not think he knows.

It is easy to deceive the man who is trying to deceive others.

When everybody can read the thoughts of others there will be fewer friendships.

Daddy's Good Night Story

By GEORGE HENRY SMITH

MISTER JAY BIRD was sitting on the limb of a tree waiting for Brer Rabbit to come along because he had a conundrum he wanted to ask him.

He did not have to wait very long, for here came Brer Rabbit skipping through the underbrush with his ears flat on his head and his little bushy tail sticking up in the air.

"Whoa, there! whoa, there!" shouted Mr. Jay Bird. "If you go so fast you are liable to set the grass on fire with your feet."

"I suppose there is more trouble coming now," said Brer Rabbit to himself, and then he yelled up to Mister Jay Bird, "Go ahead, you sassy rascal. I have my paws crossed, now go ahead."

"Better cross your ears too," said Mister Jay Bird, "because I have a question to ask you that is a whopper!"

Then Mister Jay Bird asked Brer Rabbit this question: "If I have a basket with ten ears of corn in it and you pull out one at a time, how many ears would you pull out?"

"I am very busy," replied Brer Rabbit, "and I haven't time to stop and answer foolish questions like that. However, I will tell you just to show you that I know as much as you do. I would pull out ten ears."

"Oh, no, you wouldn't," replied Mister Jay Bird. "You would pull out thirty ears!"

"I don't see it," said Brer Rabbit, and he skipped off down the road. All day long he kept trying to figure out the conundrum which Mister Jay Bird had given him. When he got home that night he said to his wife: "If I had a basket with ten ears in it and you pulled out one ear at a time, how many ears would you pull out?"

"Twenty," answered Mrs. Rabbit. "You would pull out thirty."

"No, you wouldn't," replied Brer Rabbit. "You would pull out thirty."

"Where did you get that idea?" asked Mrs. Rabbit.

"Mister Jay Bird asked me this morning if I had a basket with ten ears of corn in it and I pulled out one ear at a time how many ears would I pull out, and he said thirty."

"That is correct," said Mrs. Rabbit, "but Mister Jay Bird said ears of corn and you said ears. When you pull one ear of corn out of the basket you pull your own two ears out, too."

"I see, I see," exclaimed Brer Rabbit, putting his arms around Mrs. Rabbit's neck.

The Toronto World

FOUNDED 1880. A morning newspaper published every day in the year by The World Newspaper Company of Toronto, Limited...

SATURDAY MORNING, JAN. 10.

WHERE CANADA DIFFERS FROM THE STATES.

The speech of Chief Ranger Stevenson, at the big Foresters gathering on Thursday night dealt with two things that are of first importance to Canadians generally...

But a still more important fact came out viz. that in the United States they have a constitutional provision to the effect that no court or legislature can interfere with contract...

As a matter of fact Canada has come into the inestimable right from British constitutional practice, of being unlimited in its power to deal with grievances...

Perhaps Mr. Stevenson does not know, very few people in this country perhaps yet know, that within the last ten years a determined effort was made by influential parties to have Canadian public men commit themselves to a proposal asking the imperial parliament to put a clause in the British North America Act similar to that in the constitution of the United States...

WHO ARE THE TERRORISTS?

It is very difficult to convince a man against his will. This little piece of experience has more importance just at present than might be imagined. It is, in fact, at the basis of the opposition in the recent elections and of nearly every difficulty that Mayor Hocken has met or is meeting with in his endeavor to settle the traction problem.

any citizen should refuse to listen to reason, and insist that his whim or opinion or prejudice should justify the refusal.

We repeat that most of the trouble over the recent elections was entirely due to the lack of reason of the Telegram and those who followed it, and the continuance of the conflict which the Telegram is leading thru the board of trade is the result of a similar lack of reason.

We presume that some members of the board of trade are convinced that, as the Telegram states, there exists a "Toronto street railway reign of terror." Photographs of Mr. G. T. Somers, Mr. Eric Armour and Mr. J. W. Ellis are given as leaders among those who are enlisted against the "reign of terror," and Mr. R. S. Gourlay is prominently mentioned as another leader.

It is not to the advantage of Mr. Foster that the Telegram revives the memory of facts that Mr. Foster may well desire to have forgotten. The Telegram is pleased to describe these facts as "slanders." The statements made about Mr. Foster were true. They were not denied. They were not induly pressed. They were verifiable by anyone. The Telegram calls the disclosure of these facts terrorism and declares that:

The street railway and its allies will terrorize everybody who can be terrorized. If every individual factor in the leadership of the Rapid Transit Association is not fully disclosed there will be some people the street railway gang cannot terrorize.

If this means anything at all it means that the Rapid Transit Association might be subject to the "slanders" that are mentioned in the same paragraph which couples Mr. Foster and the Rapid Transit Association, as pursued by "the street railway gang."

This sounds very well coming from a newspaper that terrorized three controllers and several aldermen, and endeavored to terrorize the Mayor of Toronto all thru the year 1913. The same paper has now set out for 1914 on a reign of terrorism in the board of trade, and we see that the first evidence of it is a determination to prevent the facts of Mayor Hocken's purchase scheme being presented to the people, or even being laid before the board of trade itself.

The Telegram states that a proposal to submit an agreement to the judgment of these several tribunals is evidence of a reign of terror. The Telegram insists that an absolute refusal to have anything to say to the accused thing is a condition of reason and moderation.

WHO'S THE SHAREHOLDERS' FRIEND?

The World had an article of some account a few days ago, pointing out that the American shareholder in the railways of the United States had been repeatedly told by the directors: there of that it was legislation, railway commissions and judges who were cutting him out of dividends; while as a matter of fact the dividends were destroyed by the stock watering of directors, by looting of assets, by selling to the companies at high prices minor roads that these same directors had bought as junk; also that the directors were, many of them, on the inside in selling supplies to the company. The Saturday Evening Post confirms this idea:

KNIGHTS TEMPLARS WERE INSPECTED

A record attendance of Sir Knights was registered last evening to welcome the provincial prior, Rt. Em. Sir R. R. Dransfield, on the occasion of his annual inspection of Geoffrey de St. Aldemar Precinctory.

EASTERN PROVINCES MAKE STRONG PLEA

OTTAWA, Jan. 9.—(Can. Press.)—Premier Fleming of New Brunswick and Premier Matheson of Prince Edward Island today presented to the government the claims of those two provinces and Nova Scotia for an irrevocable bill of representation in the Dominion Parliament, to which the Maritime Provinces were unable to secure the assent of the present interprovincial conference.

Proposed Reduction in Representation Violation of Confederation Pact, Asserted.

OTTAWA, Jan. 9.—(Can. Press.)—Premier Fleming of New Brunswick and Premier Matheson of Prince Edward Island today presented to the government the claims of those two provinces and Nova Scotia for an irrevocable bill of representation in the Dominion Parliament, to which the Maritime Provinces were unable to secure the assent of the present interprovincial conference.

CLAY MANUFACTURERS APPROVE OF COURSE

At a meeting of the executive, held at the Prince George Hotel yesterday afternoon, it was decided to hold the Dominion convention of the Clay Products Association in Toronto on Jan. 27, 28, 29 and 30, at the King Edward Hotel. It is expected that from three to four hundred leading claymen from all parts of Canada will be in attendance.

ONTARIO APPLES BEST AT ROCHESTER FAIR

Ontario apples bring home some more ribbons. This time the Sweetest Prize in a world competition of the New York Horticultural Association. It is expected that from three to four hundred leading claymen from all parts of Canada will be in attendance.

BROKE LICENSE LAW ON NEW YEAR'S EVE

Ernest McConkey, proprietor of McConkey's Restaurant, pleaded guilty in the police court, yesterday, while making the usual law and order after eleven o'clock on New Year's Eve. He was fined \$40 and costs by Magistrate Dillson.

WINTER TOURS TO THE LAND OF SUNSHINE AND SUMMER DAYS.

At this season of the year a great many are planning their winter tours. Considerable numbers annually visit the ever-popular California resorts, while many of the flowers and sunshine of Florida, together with the very even climate.

PILES CURED AT HOME BY New Absorption Method

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write today to Mrs. M. Summers, Box P65, Windsor, Ont.

AT OSGOODE HALL ANNOUNCEMENT

Peremptory trial for appellate division for Monday, 12th inst., at 11 a.m.: 1. Ferguson v. O'Neill. 2. Kilour v. London Street Railway Company. 3. City of Toronto v. Rogers. 4. Hamill v. Shideman. 5. Reim v. Miduro. 6. Horan v. Albion.

Provincial Prior Was Welcomed by Record Attendance of Sir Knights.

A record attendance of Sir Knights was registered last evening to welcome the provincial prior, Rt. Em. Sir R. R. Dransfield, on the occasion of his annual inspection of Geoffrey de St. Aldemar Precinctory.

TO ERECT BIG PLANT, IONA, N.S.

The Iona Gypsum Company to Commence Mill Construction Soon. 1400 BARRELS OF PLASTER DAILY CAPACITY. IONA, N.S., Jan. 6, 1914.—The construction of a \$50,000 calcining plant for the Iona Gypsum Company will be commenced at once on their property about one and one-half miles from Iona Station on the line of the Intercolonial railways and on the shores of the beautiful Bras d'Or Lakes.

TORONTO CHOSEN BY FOUR MILLION DOLLAR FIRMS

Mining, Metal and Grocery Companies Announced in the Ontario Gazette. Four million dollar companies are launched for operation in Ontario, according to the current issue of the Ontario Gazette. The companies concerned in mining, one in metal production and one in the wholesale grocery trade, all have their head office in this city.

ROSE AVENUE SCHOOL.

The Rose Avenue School League intend giving a series of free lectures in the school on the 14th, 15th, 16th, 17th, 18th, 19th, 20th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st, and 1st February, next Tuesday, Jan. 13, on the Panama Canal (Illustrated) by David A. Moffler, B.C.E., C.E., formerly designing engineer Isthmian Canal Commission.

LEAVES FOR CHINA

Miss Mary E. McNeely of Carlton Place has been appointed to the staff of Canadian Presbyterian missionary nurses in Honan, China, and will be leaving for that country on the 15th inst.

Newark Man Tells Toronto Dealers How Modern Couch Developed.

FURNITURE SALESMEN

Banqueted at C. O. F. Hall by Canadian Mattress Company

One of the largest and most enthusiastic gatherings of furniture salesmen has been held in Toronto to-day.

James Acton of James Acton Publishing Co. of Newark, N. J., spoke on salesmanship.

Tracing the evolution of the modern mattress he referred to the fact that the first of these articles were made of straw.

He pointed out that the modern mattress was not in use to anything like the extent it should be.

He pointed out that the modern mattress was not in use to anything like the extent it should be.

MONEY RAISED FOR AVANIGADDA MARKS GROWTH OF A BIG IDEA

Superintendent Moore of Dovercourt Road Baptist Sunday School Tells How Circle of Missionary Schools Widened—Roncesvalles Contribution Given in Gold Pieces.

Increased both for missions and the general fund. As similar mission circles were formed he expected to see the Sunday Schools give four times as much as at present.

First Avenue Baptist Church which this year formed a part of the Dovercourt circle would probably be the centre for the formation of a similar circle in the eastern part of the city.

Pictureque, quaint and inspiring to the assembly was the presentation of the gifts last night by scholars or officers of the Sunday schools participating. Some were attired in Oriental costumes. One class appeared in a musical attire as a libretto crew.

Lighthouse was exhibited as an emblem of the mission to the world, with the object of building the Mission Bungalow at Avanigadda, the new station being opened by the Canadian Baptist Foreign Mission Board, at the estuary of the Kistna River in Madras.

The site, which is a short distance from the west irrigation pumping plant, was presented to the mission board five years ago by the Dovercourt road school.

Several schools contributed additional sums to bring the total to \$2,500, which Mr. Moore raised to \$3,000, as intimated in The World yesterday.

Miss McLaurin of Dufferin street church, who will go out as a missionary to assist her brother at Avanigadda, expressed her delight at the festival, and at the request of the chairman agreed to send a letter from the mission to be read at next year's festival.

Dr. Brown, secretary, accepted the \$3,000 in behalf of the Baptist Mission Board.

FATAL COMBAT IN PHILADELPHIA ZOO

Buffalo and Peacock Wage an Unequal Strife in Farmer's Enclosure.

In the presence of hundreds of visitors at the Zoological Gardens in Philadelphia recently there was a duel to the death between a peacock and a buffalo, the latter being the victor in the uneven contest. The peacock, according to a representative of The New York Sun, was the challenger and drew first blood, but the buffalo trampled the bird under foot and crushed it to death.

The trouble began when Henkle, keeper of the peacock, allowed it to wander into the gardens, away from his flower beds. The bird that did this with the buffalo drew into that animal's private enclosure, spread its tail crooked its unimpaired eye and plainly informed the buffalo that he was no longer owner of the spot.

The buffalo apparently didn't like the way the peacock acted. He gave a mild bellow of warning. The peacock croaked and fanned his tail. Then the buffalo charged. The bird sidestepped and jabbed viciously at the animal's eye with his beak as the bird rushed by. He lowered head. The jab missed the eye and caught the buffalo in the soft part of the nose. That was a little too much for the buffalo. Believing angrily, he rushed again. The bird escaped by flying to the top

of the fence about the enclosure. There he insisted upon working more completely into the bushes. The buffalo withdrew a short distance, blowing the dust and pawing the ground. The peacock was infuriated, however. Into the enclosure he flew again, spread his wings and shrieked a challenge.

It was soon over. The buffalo charged, entered the bird and trampled it to death.

OKLAHOMA'S BIG GAS PRODUCTION

The total production of natural gas in Oklahoma in 1912, as estimated by David T. Day, of the United States Geological Survey, was 13,799,819,000 cubic feet, valued at \$7,406,228, compared with 67,375,000,000 cubic feet, valued at \$6,731,770, in 1911.

Since large quantities of gas are consumed in Oklahoma for both domestic and industrial purposes at a flat rate, no method of using gas, that is impossible to arrive at the exact quantity of gas consumed, but it is estimated that in 1912 5,600,000,000 cubic feet, compared with 5,512,000,000 cubic feet in 1911. The estimated quantity of gas consumed for industrial purposes in 1912 was 35,042,341,000 cubic feet, compared with 22,327,149,000 cubic feet in 1911.

Much of the gas produced from the oil wells of Oklahoma is wasted, but where installed for the extraction of the gas-oil. This has become a considerable industry, as there is a ready sale for the product. At the close of 1912 there were twelve of these plants in operation, compared with nine at the close of 1911.

VIGIL FOR LOVED PRIEST IS KEPT FOUR CENTURIES

Mining Engineer Owes Escape of Himself and Wife to Tradition of Dead.

BURIAL PLACE SECRET

Known to Be in Cave Somewhere With Aged Guards Constantly in Attendance Thru the Long Years.

MEXICO CITY, Jan. 9.—Peter Oleson, a Danish mining engineer and mill owner, declares that he owes the escape of himself and his wife from Zacapu, in the State of Michoacan, Mexico, to the influence of a Danish monk who lived in that part of Mexico nearly 400 years ago. He tells the following story:

Father Dacio, a Danish monk, went to Mexico in the early part of the sixteenth century. In 1549 he founded the Town of Zinconsa. He worked among the Indians and so far endeared himself to them, that the memory of his life is today their most treasured tradition.

When Father Dacio died his body was embalmed and hidden away in a subterranean cave, where it was installed in a sitting posture in an arm-chair carved out of solid rock. From the day of his death until now, so tradition goes, candles have been kept burning in his underground resting place, and three Indians have kept constant vigil over the place, the location of which is said to be known to the guards only, who never leave until taken by death and the two oldest Indians of the tribe which treasures the tradition.

For 300 years the secret had been handed down by its custodians to those selected by virtue of their age to receive it and keep it and pass it along at the approach of the reaper.

Several of the Popsos, so the story goes, have sought to have the remains of Father Dacio removed to Rome, but the Indians have refused either to give them up or reveal their location. There is a tradition, says Oleson, of one priest sent out by Rome to learn the location of the subterranean tomb who won the confidence of the Indians to the extent of inducing them to show him the embalmed body of the monk. He was blindfolded and led to the place where the cloth was tied over his eyes the priest cut the string of his rosary and, under protection of his cloak, dropped a bead at frequent intervals. The beads were to guide him to the place when a chance offered later on to make the trip without escort.

Indians Honest and Faithful.

The Indians kept their word and led him to the candle-lighted cave where he saw the silent figure of the ancient monk, sitting upright in his chair of stone. He was blindfolded again and led back. When the aged Indian who had led him to the tomb removed the bandage from his eyes the secret of the secret, who had accompanied them, handed to the priest a handful of beads with the remark:

"You dropped these."

Oleson says that he had many warm friends among the Indians and has every reason to believe that the story is true and that somewhere in the vicinity of Zinconsa the embalmed body of that missionary of long ago sits in a stone chair starting with unseeing eyes at the everlasting candle-light which keeps alive in the hearts of the descendants of the people he loved and worked for the memory of his own good deeds.

"The Indians believe it to be true. I have talked with one of the old chiefs who is said to have the secret of the subterranean tomb. I have heard the story of Father Dacio from his lips. I know that I am in property were safely solely because I was a Dane. When the Indians first learned that I came from Denmark they were deeply incensed, but supposed that I had not known Father Dacio. I tried to explain that 1540 was a long time ago. They said they knew that, but that Father Dacio was such a great man that everybody must have known him. They accepted me because I was a Dane, and I know when I go back my property will be just as left. If the Indians who promised to care for it are dead, they will have delegated the duty to somebody else. They may

DRIVE OUT CATARRH

Don't be a slave to it another day—disgusting, leathome, dangerous disease that it is!

Conquer it now before it conquers you! Remember, the longer you put off looking after Catarrh, the harder it will be to drive it out of your system.

Don't let Catarrh go on filling up your nose, your head and your throat with its filthy, poisonous secretions! Don't let it make you a howling, spitting, foul-breathed nuisance that everyone wants to avoid! Take it in hand at once, before it destroys your health—your happiness—your very life welfare itself!

Drive out Catarrh before it gets down into your lungs. It's a terrible mistake to think it only an annoying, disagreeable trouble. It's far worse than that—it's a fearfully dangerous one. Unchecked Catarrh too frequently destroys smell, taste and hearing, and may open the door to the most dreaded of diseases. Be warned in time! DRIVE IT OUT NOW, before it's too late!

Write to me today and let me show you, entirely without charge, just how to get rid of Catarrh, absolutely and permanently. I'll gladly send you a free and complete Medical Advice Coupon.

MEDICAL ADVICE FREE

that will be of tremendous help to you—counsel and information that are sincere—reliable—valuable.

Don't hesitate to accept my aid. You're truly and freely welcome to it. Simply for the asking you'll receive the benefit of my 25 years of experience—my wide knowledge of Catarrh and its cure. I am a graduate in Medicine and Surgery, Dublin University, Ireland, formerly Surgeon British Royal Mail Naval Service, and this treacherous disease has been my life-study. I'm familiar with its workings from start to finish. I can tell you just what to do for it—just how to drive every trace of it entirely out of your system. Thousands have accepted this offer, and now they are free from Catarrh. You can be also, if you will. Read the list of questions carefully, answer them yes or no, write your name and address on the dotted lines, cut out the Free Medical Advice Coupon and mail it at once to:

Catarrh Specialist Sproule
414 Trade Building, Boston.

This Coupon entitles readers of this paper to medical advice free on curing Catarrh.

Is your throat raw?

AND THE WORST IS YET TO COME

GERMAN EMPIRE GROWS RAPIDLY

Population of Eighty Millions in Sixteen Years Indicated by Statistics.

BERLIN, Jan. 1.—Germany will have eighty million inhabitants in 1920, twice its population when the empire was founded in 1871, according to an estimate based on the vital statistics for the empire for 1912. The non-Prussian states have come to the rescue with 2,000 more births than in 1911, offsetting the decrease of 2,042 in births in Prussia, on which such gloomy assumptions of Germany's stagnation in population were based when the Prussian statistics were published a few weeks ago.

The number of deaths in 1912 was the smallest ever recorded and the number of marriages the greatest, so the statistics on the whole make a most satisfactory showing. The decline in the birth rate continues, but the decrease is the smallest registered in years. The rate was 23.1 births to every thousand inhabitants, as compared with 29.5 in 1911, 30.7 in 1910 and 32 in 1909.

The population of the empire was increased by 839,887 thru the excess of births over deaths, the surplus being almost 100,000 greater than in 1911.

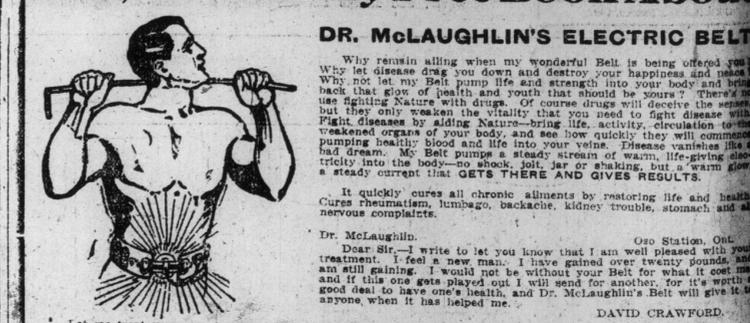

Beautiful Bermuda. Bermuda, noted for its beautiful flowers and climate, is again attracting a great deal of attention. Each year seems to be more attractive than the previous, judging from the number that are sailing to this wonderful island. The three steamers, Arcadian, Bermudian and Caribbean, making the trips this year are being booked to capacity, and accommodation is being taken up many weeks before the steamer actually sails. With the rates starting at \$30 for the "round trip," and the trip itself lasting only 48 hours from New York, it is hard to realize that the tropics are so close at hand. A. F. Webster and Son, at 13 Yonge street, report a great number of Canadians sailing to this beautiful place.

MILLION DOLLAR ROAD PROJECTED IN ICELAND

To Extend From the Capital in an Easterly Direction Fifty-Eight Miles.

A million-dollar railroad is to be started in Iceland at an early date, extending from the capital, Reykjavik, in an easterly direction across the plain of Thingvala, a distance of about 58 miles, to the Orfussa bridge. Ultimately it is proposed to extend the line to Thorshavn, where the line will branch off in two directions, one going to the geysers and the other to Orfussa. The proposed line passes thru a rather populous country, and one which is much frequented by tourists. Heretofore the means of traffic in that country have been rather meagre. There are some few carriages made by H. Glen, Leslie, and a few vehicles are available, but none are made generally on wheels back, and in some instances are old and tedious. The country opened up by the new railroad is already an important dairy section, and with the operation of the new line the value of the lands will increase.

Does Your Health Interest You? If so, Send for My Free Book About

DR. McLAUGHLIN'S ELECTRIC BELT

Why remain ailing when my wonderful Belt is being offered you? Why let disease drag you down and destroy your happiness and peace? Why not let my Belt pump life and strength into your body and bring back that glow of health and youth that should be yours? There's no use fighting Nature with drugs. Of course drugs will deceive the senses, but they only weaken the vitality that you need to fight disease with. Fight diseases by aiding Nature—bring life, activity, circulation to the weakened organs of your body, and see how quickly they will commence pumping healthy blood and life into your veins. Disease vanishes like a bad dream. My Belt pumps a steady stream of warm, life-giving electricity into the body—no shock, jolt, jar or shaking, but a warm glow, a steady current that GETS THERE AND GIVES RESULTS.

It quickly cures all chronic ailments by restoring life and health. Cures rheumatism, lumbago, backache, kidney trouble, stomach and all nervous complaints.

Dear Sir,—I write to let you know that I am well pleased with your treatment. I feel a new man. I have gained over twenty pounds, and am still gaining. I would not be without your Belt for what it cost me, and if this one gets played out I will send for another. For it's worth a good deal to have one's health, and Dr. McLaughlin's Belt will give it to anyone when it has helped me.

DAVID CRAWFORD.

Let me treat your case in my own way. Let me apply a steady current of Galvanic Electricity to your weakened system with my Dr. McLaughlin's Electric Belt. Wear the appliance, night after night, for a few weeks, and it will drive out disease, pain and aches; it will restore energy and equilibrium to your nervous system; it will fill your body with fresh strength and energy; it will give you back your health.

The Dr. McLaughlin Electric Belt is a cure for all signs of breakdown. The health of the body is electricity—the force in the nerve cells. My Electric Belt will give you back this power, and enable you to fight on in the battle of life.

Now, if you suffer, do not lay this aside and say you will try it later. Act to-day—NOW.

AMPLE PROOF WILL BE GIVEN YOU ON REQUEST.

REVIEW OF PAST YEAR

Eastern Ontario Dairymen's Convention Closes With Election of Officers.

(Special to The Toronto World.) CORNWALL, Jan. 9.—The first business at this morning's session of the Eastern Ontario Dairymen's Association convention was the presentation of the secretary's report by T. A. Thompson of Almonte. Mr. Thompson pointed out that the past year had been a most successful one for those engaged in the production of cheese and butter, and the prospects for the future were never brighter. With the heavy influx of immigration to the west and the rapid increase in the population of cities and larger towns Canada was steadily consuming at home all the butter produced, and her exports of cheese were annually decreasing. The Dairymen's Association of Eastern Ontario had done more than any other association in Canada to build up the dairy industry.

Mr. Thompson pointed out that the past year had been a most successful one for those engaged in the production of cheese and butter, and the prospects for the future were never brighter. With the heavy influx of immigration to the west and the rapid increase in the population of cities and larger towns Canada was steadily consuming at home all the butter produced, and her exports of cheese were annually decreasing. The Dairymen's Association of Eastern Ontario had done more than any other association in Canada to build up the dairy industry.

NEW SOURCES OF REVENUE OR ADDITIONAL BURDENS

Prof. Skelton Declares This Condition is Inevitable—Does Not Favor Single Tax.

(Special to The Toronto World.) BERLIN, Jan. 9.—"Canadian Taxpayers' Bill" was the subject of an excellent address by Prof. Skelton of Queen's University before the members of the Canadian Club here this evening. Prof. Skelton pointed out that the question of taxation was not yet so live in Canada as in the United Kingdom, but that time would pass. Either new sources of securing future revenues would have to be found or future burdens would have to be placed on those with the broadest shoulders and most able to bear taxes. Among the propositions put forward by the speaker were "special taxation on business corporations," "federal tax" and "increased tax on railways." Personally Prof. Skelton did not think that the system of single tax was practical and equitable. He further advocated a system of uniformity and publicity of accounts.

BURGLARIES AT WELLAND.

Two Stores Entered and Shoes and Tobacco Carried Off.

WELLAND, Jan. 9.—(Special.)—D. J. Smith's shoe store was broken into last night and over \$100 worth of shoes stolen. The burglars broke the glass in the front door and reaching in turned the Yale lock. The theft was not discovered until the next morning.

The same night the plate glass window in Frank Aliman's store on Mulr street was broken and the thieves helped themselves to about \$10 worth of tobacco and other small articles. Both burglaries were committed by the same men, the police say.

DIED AT NINETY-THREE.

BROCKVILLE, Jan. 9.—(Special.)—Mrs. Mackie, a resident of the district, died at her home near Lake Eridia at the age of ninety-three.

NURSES GET DIPLOMAS.

BROCKVILLE, Jan. 9.—(Special.)—At the graduating exercises of the St. Vincent de Paul Hospital training school for nurses, diplomas were received by Helen Feeney, Cora Morley and Margaret Allore of Tweed and Helen O'Connell of Madoc.

SYRIA'S LIMESTONE HAS SELF-BURNING QUALITY

Greatest Value, However, Lies in Its Plant Food Which is Important Soil Maker.

A limestone of Syria that supplies material for its own burning, yielding building lime with no additional fuel, was described two years ago by Consul Whiting at Jerusalem.

The rock belongs to the fossiliferous bituminous limestone formation of the upper Jordan Valley, and Charles Fox reports that analysis shows calcium carbonate, phosphoric acid, nitrogen, sulphur and organic matter, some of which is asphaltic.

The original material proves to have a fuel value equal to one-fourth that of good coal. Where this rock is available, lime-burning has become an important industry, and a product of high quality is obtained at a very low cost.

This limestone proves to be also a suitable compounding material for use in black rubber goods. Its greatest value, however, rests in its physical characters and its considerable important soil-making influence, which is to be seen in Syria's rich grain fields.

World editorials are convincing and to the point.

LARGE UNEMPLOYED LIST IN KINGSTON

Situation Stated to Be Much Worse Than Last Year's—Election Muddle.

(Special to The Toronto World.) KINGSTON, Jan. 9.—The unemployed list in Kingston this winter is large, and unless something opens up it will surely be a hard winter for many families. The matter was under discussion at a meeting of the associated charities when members reported that the number that received aid this winter was far in excess of last. It was decided to ask council to reopen the stone quarry in order to provide men with work.

While in Toronto, the prison reform commission will discuss the parole system with Major Fraser of the Salvation Army.

A rather unusual state of affairs prevails over the election of reeve in the Township of Kingston. At first J. T. Hawkey was reported as having been elected, defeating Warden Byron Gordon by 30 votes. Yesterday the deputy returning officer admitted that a mistake had been made and that Gordon had been elected. Gordon was re-elected. Today the deputy returning officer admitted that it was all a mistake, that Hawkey was reeve, and said the figures had simply been reversed in one poll. Now it is stated that the matter will likely go before the court to be settled.

When the county quarterly board of audit next meets there will be only one constable's account to be passed. This certainly is a record for the County of Frontenac. In three months' time there was only one arrest.

The synod of the Diocese of Ontario is called to meet Feb. 17. There is not a very heavy grant of business to come before the session.

WILD HORSES ABOUND ON ISLAND OFF VIRGINIA

Supposed to Have Been Castaways From Some Wrecked Vessel Centuries Ago.

When the outside world hears of Chincoteague island off the eastern coast of Virginia, it is usually on account of the half-wild horses that roam over the stretches of the island and of Assateague. They are strong, shaggy little creatures, somewhat larger than the Shetland ponies, and they plunge boldly into the salt water when they want to swim to some toothsome islet of marsh grass, writes Maude R. Warren in Harper's Magazine.

These animals are supposed to have been cast away on Chincoteague from some wrecked vessel in the eighteenth century, perhaps the seventeenth century, and in the course of time have been generated in size. They came to a good haven, for there are five different kinds of natural grass to feed them, and for drink little pools of slightly brackish water in the sand. Some of the cleverest ones make little reservoirs for themselves by digging with their hoofs.

They belong to a few of the islands, who own from one to seventy-five each. Once a year in July the horses are rounded up in Assateague and in Chincoteague and are driven down into the town, where they are penned, and the colts are branded. Then some of them are sold to men from the mainland, who will give as much as \$100 or \$125 for a "stylish" horse.

When the horses are fed with oats and their rough coats are properly cured, they present a very attractive appearance. They are very strong and hard-lived, and re-habitant boasts of a mare, most prolific of colts, which lived to be forty years old and worked almost to the end.

TO SAVE TAYLOR FROM THE GALLOWS

Petitioners Are Seeking to Have Indian's Measure of Responsibility Tested.

(Special to The Toronto World.) BRANTFORD, Jan. 9.—Steps are being taken in the city to save James Taylor, the murderer of Charles Dawson, from the hangman's rope, to which he was condemned after a jury of twelve men had found him guilty of the gravest crime under the law. It is not because Taylor's friends here believe him innocent that the move is being made; his guilt was self-confessed and strongly proved against him. It is felt, however, that he is not responsible for his actions at any time, particularly on the occasion when he committed the atrocious murder of which he was found guilty.

Mental and Moral Degenerate. He has been declared by practically all who have come into contact with him to be a mental and moral degenerate, with no education, and from appearance, no faculties wherewith to realize the enormity of his offence. Accordingly, petitions are being prepared and will be sent out for signature by the citizens of Brantford, asking the minister of justice to have competent scientists examine the unfortunate man and determine whether he is or is not accountable for his actions.

Those behind the move are of the belief that he is insane, and they think that there are a large number of other people here who are of the same belief, and will sign such a petition. Taylor's execution is set for Jan. 23.

ELIZABETHTOWN MAN'S DEATH.

BROCKVILLE, Jan. 9.—(Special.)—Mr. Gilbert Olds, a lifelong resident of Elizabethtown, died suddenly this morning at his home, on the mile east of Greenbush, to walk to the village, and a short time later his body, which was found on the road by neighbors, was taken to the hospital.

Mr. Olds was aged 63 and was born on the farm on which he lived all his life. He had been suffering for some time with a stroke of paralysis, with which he recovered a few months ago, but recovered much of his former strength.

BEATS EXTEND OVER HUNDREDS OF MILES OF DESERT BESET WITH HIDDEN DANGERS.

Curiosity has been expressed as to what are the functions of a camel corps. In reality the camel corps is a force of military police whose "beats" extend over hundreds of miles of desert land beset with hidden dangers. They are the hardest worked and the bravest guardians of law and order in the world.

The corps, to the number of nearly 800 men, are composed entirely of blacks—splendid types of British East Africans, chosen specially for their strength and endurance. These men are commanded by eight British officers. One of their duties is to patrol the 1000 miles of coast line from Suez to the Gulf of Aden, to suppress native disorders.

An officer of the Egyptian army who is home in London on furlough, gave some interesting details of the camel corps and its work. "British officers who join the camel corps are men who want excitement and danger and plenty of it," he said. "The official headquarters of the corps are at Cairo, but the men are seldom or ever seen in the desert. They work principally from Aden, but have no set instructions."

Whenever there is trouble, or sign of trouble among the native tribes there the camel corps goes. Always they are ready to be called upon to hunt and on the watch for the hidden enemies who know so well how to hide in the desert. The duties of this splendid force are, in fact, analogous to those of the famous Royal Northwest Mounted Police.

UGLY RUMORS OVER RECENT ELECTIONS

Loose Methods Said to Have Prevailed in Stratford—Sale of Park Lots.

(Special to The Toronto World.) STRATFORD, Jan. 9.—Rumor has it that the recent municipal elections in this city were in certain respects somewhat lax. Beer was distributed, cast ballots in more polls than one. The challenge made against the right of Dr. J. P. Rankin, D. A. McLachlan and G. A. Down to sit at the council board has been the first breach to start the rumor. Dr. Rankin has followed the lead of the other two and taken his oath of office. The next step will be the hearing on the return of the writs before Judge Barron.

A slice of Queen's Park is to be put up for sale by the park board. The plan of lots has been registered with the Registrar Steele. It is expected that the average of sixteen of the lots will be \$500, and a total of \$15,000 is looked for by some. Differences of opinion have existed, but the policy of the board has received the sanction of the city council and the people.

The intermediate O.H.A. game between St. Mary's and Stratford has been called off owing to the soft condition of the ice.

CAMEL POLICE OF EASTERN AFRICA

Beats Extend Over Hundreds of Miles of Desert Beset With Hidden Dangers.

ELLIOTT TAKES COURAGE FROM TORONTO'S BIG VOTE

Thinks It Indicates Province's Feeling on Woman Suffrage—Will Revive His Bill.

(Special to The Toronto World.) GLENCOE, Jan. 9.—J. C. Elliott, Liberal member for West Middlesex, is going to reintroduce into the legislature at the beginning of the session his bill to grant the municipal franchise to married women owning property, if otherwise entitled to vote. "It was naturally pleased with the success of the referendum in Toronto," said Mr. Elliott today, "and I believe the result is indicative of the general feeling throughout the province. I shall propose my bill again, and I hope, in view of the Toronto vote, that it will not meet with any opposition, but will carry unanimously."

It will be remembered that last session two bills dealing with this matter were introduced, one by Mr. Elliott, the other by F. G. MacDiamid, government member for West Elgin. The latter did not go so far as the former, but was at any rate withdrawn by its mover. Mr. Elliott's bill was voted down by a party division of 70 to 15.

EMPEROR WILLIAM AND HIS INK BLOT

Emperor William is the busiest man in Germany. He revises or approves all decisions in public matters, supervises all art and architecture and lectures everybody. In illustration of the deference paid to his wishes in even the smallest details, they tell in Berlin, writes Mr. Samuel G. Blythe in Everybody's Magazine, the story of the star above the cross on the apron of the Emperor William Memorial church.

Of course the Kaiser insisted on revising the plans of the church. The architect brought the plans to him, and the Kaiser scratched out what he fancied before he gave them to the period O.K. The church was built. There was to be a big gilt cross on the spire, and it appeared in its proper place. But, much to the general astonishment, when the cross was put up a large, many pointed star was raised above it on a heavy rod. The Berliners could not understand the star above the cross on the apron of the Emperor William Memorial church.

The plans were examined. Then it was found that in revising them the Kaiser had let fall a drop of ink from his pen, which hit the paper just above the cross. The architect studied a long time over this blot of ink. There could be no appeal, no inquiry. He finally decided that the blot of ink signified a star above the cross, and he put the star, making it correspond as nearly as possible with the outline of the blot. The star is still there.

MAINE HOUSE REMOVED REBUILT IN KENTUCKY

There has recently been erected at Lexington, Ky., a house which was transported stone by stone from Bar Harbor, Me. The cost of transporting the cobblestones and other material to Kentucky and the cost of the structure again just as it stood on its original site in Maine was \$20,000.

The house Popular Mechanics describes as having a central chimney from which seven big fireplaces, in one corner of the reception room is a small fishing dory suspended by cables from the rafters and fits up like a couch with cushions and pillows.

At the entrance is a life size figure of a Jockey, sitting with hands outstretched to receive the cards of callers. The big stones and anchors forming the gateway of the drive were also brought from Bar Harbor, where they served the same purpose.

If you want all news, get The World.

APPEAL SENT OUT BY MINERS' LEAGUE

Want All Organized Labor in Canada to Declare Two-Day Protest Strike.

(OTTAWA, Jan. 9.—(Can. Press).—An appeal to the members of every local union of organized labor in Canada has been issued by the British Columbia Miners' Liberation League, asking that on Jan. 30 a 48-hour "holiday" be inaugurated as a gigantic protest against the imprisonment of the 39 miners now in jail at New Westminster in connection with the recent big strike on Vancouver Island. Copies of the circular have been received by the Ottawa locals as well as the Allied Trades and Labor Association, and the appeal will be considered at their next meetings. If any of them accept the members of the craft will not work on Friday and Saturday, Jan. 30 and 31.

James Walters, president of the Dominion Trades and Labor Congress, disapproved of the appeal, said that body was acting contrary to the attitude of the congress, in face of the fact that officers of the latter were now dealing with the justice department in behalf of the imprisoned miners.

ASBESTOS OUTPUT IN UNITED STATES

Year's Production is Second Best on Record—Vermont and Georgia Lead.

A comparison of the figures of production of asbestos in the United States for 1913 and 1912 shows that the output in 1912 was considerably less than that of the previous year, yet notwithstanding this fact the production for 1912 was the largest in the history of the industry, except that of 1911.

The production in 1912 was 4403 short tons, valued at \$27,853, against 7004 short tons, valued at \$19,835, in 1911, according to an advance chapter from Mineral Resources of the United States, on the production of asbestos, by J. S. Diller, just issued by the United States Geological Survey.

Nearly all the asbestos mined in the United States came from Vermont and Georgia, although a little came from Wyoming. The finest asbestos yet found in the United States, comparing favorably with the best from any part of the world, is in the Grand Canyon of the Colorado in Arizona; it is not, however, easily accessible.

Asbestos is the most important fireproofing material known. Its fibrous character adapts it to a wide range of applications, from woven fabrics such as fire curtains and articles of clothing to various forms of asbestos shingles, stucco, plaster, "lumber," and other building materials that render structures thoroughly fireproof. Its lightness, strength, heat and electricity insulating properties, and its resistance to acids, are special advantages for structural use in cars and electric motor casings. For insulation in electrical appliances the asbestos must be free from magnesia, as asbestos is the most common use of asbestos is for asbestos paper, millboard, pipe covering, and lagging to inclose heat pipes, furnaces, and locomotives in order to prevent loss of heat by radiation. As a non-conductor of heat it may be used not only in the preparation of fireproof safes and vaults, but also for cold storage and for the insulation of pipes. Houses made of asbestos materials or coated with asbestos throughout are not only warmer in winter, but cooler in summer. In recent years asbestos has been used successfully as a filler in high-grade paints. The finest asbestos thread yet spun carries a small percentage of cotton, and runs over two miles to the pound.

X-RAYS POSSESS MANY MYSTERIES

Scientists Have Long Been Puzzled to Know Just What They Are.

Since the discovery of X-rays by Professor Roentgen scientists have been puzzled as to just what these rays are. They seem like a form of light and give out light under certain conditions, remarks a writer in Collier's Weekly. Or rather they cause plates and screens prepared with certain chemicals to become luminous or fluorescent. The influence of X-rays on them is so great that they are sometimes called "X-ray light." But otherwise they do not (or did not seem to) act like ordinary light at all.

The X-rays are generated when a metal plate in a vacuum tube is bombarded by an electrical stream. It is one of the greatest discoveries of recent years that the electrical stream, this beautiful glow that is seen inside the vacuum tube, can now be manipulated at will. The rays are actually electrical "atoms" or particles which act for all the world like the particles of a gas—air, for example. But while the weight and "charge" of these electrical atoms can actually be measured, so that a measurement can be made with the "X-rays" in fact, analogous to those of the famous Royal Northwest Mounted Police.

Recently, however, some English and German physicists have found substances which react in a very peculiar way to the X-rays. In fact, analogous to those of the famous Royal Northwest Mounted Police.

They act like a glass prism to the rays, so that the latter can now be manipulated much like the rays of ordinary light. And in this way it has been established that the rays are actually little pulses of light. But they are incredibly thin and small.

Ordinary light waves are measured in fractions of a metre—very small fractions—to be exact, in millionths of a thousandth of a metre. A millionth of a metre is called a micron, and a thousandth part of this is called a micromicron. The longest visible rays are 700 or 800 of these units in length, and the shortest, at the violet end of the spectrum, are about 400. It is possible to measure ultraviolet rays, which are less than 100 units in length. But no method of measurement has yet been devised which can give any accurate idea of the waves in the X-ray pulses. Probably they are not a thousandth part the size of the smallest of the ultraviolet.

The World is an advocate of public ownership.

Forty-Fifth Annual General Meeting of The Royal Bank of Canada Steady Progress Made Throughout Year HOPEFUL NOTE SOUNDED ON TRADE OUTLOOK

The Forty-fifth Annual General Meeting of the Shareholders of The Royal Bank of Canada was held January 8th, in the Board Room, at the Head Office of the Bank, 147 St. James Street, Montreal.

On motion of Mr. Wiley Smith, seconded by Mr. E. F. B. Johnston, K.C., the Vice-President, Mr. E. L. Pease, was requested to take the chair.

Mr. C. E. Neill acted as Secretary of the meeting, and Messrs. C. R. Hosmer and A. Hais Sims were appointed scrutineers.

The minutes of the last Annual General Meeting were taken as read, and were confirmed. The Secretary was then called upon to read the Annual Report of the Directors, as follows:

DIRECTORS' REPORT

The Directors have pleasure in submitting to the Shareholders the Forty-fourth Annual Report for the year ending November 29, 1913, accompanied by the Statement of Assets and Liabilities.

| Appropriated as follows: | \$2,752,313.58 |
| Dividends Nos. 102, 103, 104 and 105, at 12 per cent. per annum | \$1,387,500.00 |
| Transferred to Reserve Pension Fund | 100,000.00 |
| Written off Bank Premises Account | \$5,000.00 |
| Balance of Profit and Loss carried forward | 1,015,113.58 |

The assets of the Bank have recently been subjected to the usual careful re-valuation.

Branches have been opened during the year as follows: In British Columbia—Fort George; South Hill, South Vancouver; Campbell Avenue, Vancouver; Douglas Street, Victoria; Fort Street, Victoria; in Alberta—Big Valley, Edmonton; South; Redcliff; in Ontario—Dundas; Kingston; Lambeth; Port Arthur; Union Stock Yards, Toronto; in Saskatchewan—Aylesbury; Regina, North End; Nutana, Saskatoon; in Quebec—East Sherbrooke; L'Esplanade; Limoulin; Beaver Hall Hill, Montreal; Bonsecours Market, Montreal; Notre Dame de Grace, Montreal; Sherbrooke and Bleury Streets, Montreal; Pont Rouge; St. Johns; St. Lambert; St. Laurent; Sherbrooke; Terrobonne; in New Brunswick—St. Stephen; in Nova Scotia—Trenton; in Prince Edward Island—Hunter River; in Cuba—Luyano Street, Havana; Vedado, Havana; Nuevas Idias; Pinar del Rio; Santa Clara; in Grenada—St. George's.

Sub-branches which are open only on certain days of the week have been established at Kearney, Ont., Matilda, Ont., and St. Roch, P. A. C. Que.

The offices at Alma, Warsaw and Wexford, Ont., formerly open only at specified times, were established as regular branches.

The branches at McDougall Avenue, Edmonton; Second Avenue, Saskatoon; Schumacher and South Porcupine have been closed.

The revised decennial Bank Act calls for the appointment of auditors at each annual meeting of the Shareholders, and the voting of their remuneration. You will be asked to make the first appointments at the present meeting.

The Head Office and Branches of the Bank have been inspected as usual during the year.

Your Directors desire to express their appreciation of the efficient manner in which the officers of the Bank continue to perform their respective duties.

All of which is respectfully submitted.

H. E. HOLT, President.
E. L. PEASE, Vice-President.

The adoption of the report was moved by the Vice-President, Mr. E. L. Pease, who spoke as follows:

We regret extremely that our President, Mr. Holt, in consequence of illness, is unable to preside at this meeting, but you will be pleased to know that he is rapidly convalescing and will shortly be out again.

The financial statement which we have the pleasure of presenting to you today, shows that although the past year was one of great strain and anxiety, we have been able to maintain a strong liquid condition, and at the same time produce satisfactory profits. These were equivalent to 18.3 per cent. of our capital, and 3.87 per cent. of capital and surplus combined. Out of these profits the usual dividend of 12 per cent. has been paid, \$2,000,000 has been written off Bank Premises, \$100,000 transferred to the Pension Fund, and the balance carried forward to Profit and Loss, bringing that account up to \$1,015,113.

I will refer briefly to the important items of the Balance Sheet.

Cash on hand, at call, and on short notice amounted to \$45,609,445, or 34 per cent. of our total liabilities. These figures are the highest since 1907, and show a considerable increase over the year 1912, when they stood at \$35,000,000.

Canadian call loans or investments, amounting to \$26,775,000, which we regard as secondary resources. Call loans in Canada and elsewhere increased during the year \$4,150,000; current loans in Canada and elsewhere increased \$2,500,000, and cash increased \$1,800,000. Investments in securities less than the market value on November 30th last, the writing down of securities, while regrettable, increases the financial stability of the bank.

The next swing of the pendulum values will improve. Bank Premises stand at \$47,832,000. Deposits have been well maintained. These standing interest, increased \$1,237,000, and demand deposits are practically unchanged. Bills Payable amount to \$99,000, a decrease of \$1,200,000 as compared with the previous year. Our total Liquid Assets amount to \$72,285,000, being 46.69 per cent. of our total liabilities to the public. Total Trade Assets, excluding the valuation of Bank Premises, exceed our liabilities to the public by the sum of \$20,702,117.

Bank Premises. With the object of rendering available for commercial requirements a portion of the monies invested in bank premises, the bank had during the past year sold certain of its properties to the Globe Realty Corporation, Ltd., a company organized and controlled by the bank. The value of these properties was fixed by independent appraisal. Sixty per cent. of the proceeds of the sale were retained by the bank in First Mortgage Bonds, secured upon the same properties, and the remaining forty per cent. in shares of the company, which shares have been entirely written off. The bonds will be sold without any liability, direct or indirect, on the part of the bank.

The properties sold will continue to be occupied by the bank under lease for a term longer than the term, which are not higher than we have charged the branches in the past, will provide for the interest on the bonds and a sinking fund sufficient to retire them at maturity in twenty-five years, when the bank will become the virtual owner of the properties as well as controlling all the shares of the company. Important buildings

over the previous year of 534,000 tons, and the largest in the history of the island. Unfortunate prices ruled low and the total value, namely, \$112,000,000, was actually \$8,000,000 less than the value of the 1912-13 crop. The coming crop is estimated at 5,500,000 tons, but prices are still low. An offsetting favorable feature this year is a higher saccharine yield than in 1912, and a higher price for sugar. The United States Tariff Revision has also been a factor in the higher prices for sugar as expected.

The condition of the tobacco industry is favorable. Large new areas were planted during the past year, and the coming crop is expected to exceed the previous one. The market for sugar is in a prosperous condition, with high prices prevailing.

Cuba's exports last year amounted to \$165,000,000, and imports \$132,000,000, leaving a balance of \$33,000,000 in her favor. General trade conditions have been generally satisfactory, with the exception of the low price of sugar. The vast resources of the island in comparison with its small population of about 2,000,000 ensure continued prosperity.

Encouraged by the success of our branches in Cuba, we opened five new ones there during the year, making a total of twenty-three.

Porto Rico. Trade in the island of Porto Rico continued depressed owing to the reduction of the duty on sugar into the United States. Only the best equipped branches in the island are able to profitably export present tariff conditions, and it is feared the industry will decline. The island is handicapped by the fact that the sugar growing is inferior to that of Cuba.

Coffee culture is resuming its former importance. The value of last year's export reached \$5,000,000. Exports of tobacco amounted to \$9,000,000; of fruits, \$2,700,000. Total exports were \$14,000,000, leaving a balance of \$37,000,000 in her favor. The island of 1,200,000 people.

closed restraint upon their customers, without unduly restricting credits. They did, however, put a ban on real estate speculation, curbed the extravagance of municipalities. But for previous excesses in these two directions, conditions in Canada might have continued normal, as trade otherwise has remained healthy. We have an example of this in the Maritime Provinces, where the prosperous conditions prevailed throughout the year, due undoubtedly to the absence of extravagance and speculation in real estate in the section of the country. Outside of these provinces a reaction is now in progress. How far it will extend it is impossible to say, but generally when pessimism prevails the turn is near at hand. We are inclined to take a hopeful view of the outlook, as the tendency is towards conservatism and economy.

In view of the dearth of capital in Europe, resulting from expenditures for wars and armaments, the Canadian public would be well advised to postpone any new investments, and to place their funds on foreign capital until financial conditions are improved abroad. Pending the resumption of the great mass of European business, the Canadian public should be prepared to wait for a favorable opportunity to invest their money in the West.

ing ahead, and when we get away from the glamor of the West, we are surprised to find what magnificent results are being made. The aggregate production of the country from Port Arthur to the Atlantic is very remarkable, and the volume of business is large and profitable. Statistics show a tremendous increase in national and mechanical production, and we are moving ahead so steadily, that we are scarcely conscious of our own rapid growth.

On the whole, we have every reason to look forward with hope, and to feel that we are able to maintain our position in the West. We have in our country, notwithstanding the prophecies of those who are inclined to indulge occasionally in gloomy forecasts.

Helpful View of Outlook. Personally, I have great confidence in the vigor and elasticity of Canada and its people. Compared with many other countries, people in Canada do not know what hard times mean. The fact is that financial stringency in Canada is generally caused by over-investment in stocks, and not by a lack of business. The men of Canada during the past two or three years have been doing \$200 of business on \$100 of capital. If they had confined their investments to real estate, the amount of capital they had invested in it, they would not be hard up. But where a man's business is in stocks, he must expect difficulties, and if he has any other source of income, he must expect difficulties, and if he has any other source of income, he must expect difficulties.

If they had confined their investments to real estate, the amount of capital they had invested in it, they would not be hard up. But where a man's business is in stocks, he must expect difficulties, and if he has any other source of income, he must expect difficulties.

On the whole, we have every reason to look forward with hope, and to feel that

GOOD UNDERTONE ON LOCAL MARKET

Canadian Issues, Excepting C. P. R., Showed More Strength.

DOMINION CANNERS UP

Brazilian Very Inactive—Spanish River Had Another Rise.

Yesterday's market on the local exchange clearly showed an optimistic undertone. With few exceptions local issues showed a strengthening tendency.

Following the lead of London, where Brazilian dropped over a point, there was an inactive market to start with.

ROYAL BANK HELD ANNUAL MEETING

May Sell Traders Bank Building in Toronto—New Director Elected.

MONTREAL, Que., Jan. 9.—The shareholders of the Royal Bank of Canada, at the forty-fourth annual meeting held yesterday, authorized the formation of a company controlled by its real estate holdings.

Mr. E. L. Pease, the vice-president, presided in the absence of illness of the president, Mr. H. S. Holt.

The financial statement previously published was unanimously adopted.

Mr. E. F. Johnston, K.C., one of the vice-presidents of the bank, presided in the course of the general remarks.

For the past few years he has been very closely associated with Mr. E. L. Pease, vice-president and general manager.

FARRAR COMPANY DECLARED DIVIDEND Fifteen Per Cent. to Be Paid Middle of This Month.

COLLINGWOOD, Jan. 9.—This afternoon the directors of the Farrar Transportation Company held a meeting here in the company's offices.

Men who would not think of seeking their wife's advice in financial transactions leave in their widow's charge the management of which calls for great business ability.

The Trusts and Guarantee Company, Limited 43-45 King Street West, Toronto

BREAK IN STOCKS ON LATE SELLING

Anti-Trust Bills Cast Shadows Before and Encouraged Bears.

LARGE GAIN IN CASH

Bank Statement Expected to Be an Exceptionally Good One.

NEW YORK, Jan. 9.—Movements of the leading stocks today were held within a narrow limit. At the outset prices eased off moderately, but bear traders encountered buying orders when they attempted to depress the list further.

A few stocks broke away from the remainder of the list and moved more widely. Shares of the southern and southwestern railroads and of the fertilizer companies were influenced favorably by the cotton spinning report.

QUEBEC RAILWAY MARKET FEATURE

Indefinite Rumors of Pending Deal Caused Flurry in Montreal Trading.

MONTREAL, Jan. 9.—A flurry in the Quebec Railway securities lifted the local market from absolute dullness yesterday.

The financial statement previously published was unanimously adopted.

Mr. E. L. Pease, vice-president, presided in the absence of illness of the president, Mr. H. S. Holt.

For the past few years he has been very closely associated with Mr. E. L. Pease, vice-president and general manager.

MONEY AND EXCHANGE. Blyth & Bonner to Glazebrook & Cronyn, at 11 a.m. 25 1/2.

EUROPEAN BOURSES. PARIS, Jan. 9.—Prices were easy on the bourse today.

BERLIN, Jan. 9.—Trading was quiet, but prices were strong on the bourse today.

Brazilian Earnings. Brizilian Traction Light and Power Co. Ltd. earnings for the week ending Jan. 1, 1914, were \$48,865 as compared with \$44,221 for the corresponding period last year.

Town of Sudbury, Ont. 5 per cent. Waterworks-Sewerage Debentures, due 1914-1923.
