### WE LIKE OUR TOWN MUNICIPAL ELECTIONS IN DECEMBER

We admit it. We like our town.  
There are lots of things about it  
we are proud of. There are a lot  
of people i we're glad to know.  
We enjoy their calls, their hand-  
shakes and their friendly greetings.  
Life wouldn't be worth much if  
weren' for this sort of thing.  
After all, friendship is one of  
things we can ever possess  
and nothing can take  
it away from us.

to know, your  
are working  
community  
group of in-  
have common bonds  
common interests. We  
etter for knowing and helping  
each other.

Running a business isn't all pleas-  
ure, any more than doctoring the  
sick, fixing the plumbing, or  
preaching the sermons. It's a lot  
of hard work, and no small part of  
ward comes in feeling that  
the idea and the ideal  
go on with it if we  
purely selfish. Of  
succeeded, but that  
another—

An amendment of the Municipal  
Act provides for the holding of Mu-  
nicipal elections on the first Monday  
in December if the municipality de-  
sires to take advantage of this pro-  
vision. Thus, if Mildmay wishes  
the elections may be held on Mon-  
day, December 4 next for 1923. All  
that the council requires to do to  
bring this change into effect is to  
pass a by-law adopting this pro-  
vision before the first day of Novem-  
ber. This change has much to  
recommend it. Under present con-  
ditions the nominations, election  
campaign, if any, and the election  
come in the midst of the Christmas  
and New Year's holiday season  
when citizens generally are at the  
busiest of the business season of  
the year, and when family and so-  
cial festivities are at their height.  
By following the amendment pro-  
vided, the elections will be over and  
all the attendant turmoil settled  
nearly a month before the holiday  
trade and the Christmastide activi-  
ties.

### LETTERS TO OUR MOTHER

(By one of the Boys)  
On Mother's Day, who'll cheer our  
thoughts?  
Our Mother.  
Who loved us when we were but  
tots?  
Our Mother.  
Who taught our infant lips to pray?  
Our Mother.  
Who liked to watch us in our play?  
Our Mother.  
Who always saw that we were fed?  
Our Mother.  
Who packed us like sardines in bed?  
Our Mother.  
Who made us wash the dishes  
twice?  
Our Mother.  
Who combed our hair for straying  
lice?  
Our Mother.  
Who made us hustle out that pup?  
Our Mother.  
Who smoothed us down when ire  
was up?  
Our Mother.  
Who fussed us well for a mean  
trick?  
Our Mother.  
Who tended us when we were sick?  
Our Mother.  
Who made us take the weekly bath?  
Our Mother.  
Who kept us in the narrow path?  
Our Mother.  
Who made our clothes from grand-  
dads pants?  
Our Mother.  
Who taught us lessons from the  
ants?  
Our Mother.  
Who washed and ironed our dirty  
shirts?  
Our Mother.  
Who kept us from becoming flirts?  
Our Mother.  
Who sat up nights to darn our  
socks?  
Our Mother.  
Who soothed us when we had hard  
knocks?  
Our Mother.  
Who sought to keep us far from  
sin?  
Our Mother.  
Who stuck her job through thick  
and thin?  
Our Mother.  
Who trusts in God's redeeming  
grace?  
Our Mother.  
And hopes to see Him face to face?  
Our Mother.

### DEATH OF MRS. CARNEGIE

Mrs. Jane Moffat Carnegie, an  
old and esteemed resident of the  
town, passed away on Saturday at  
the home of her daughter, Mrs. W.  
J. (Annie) Thomas at Niagara  
Falls, Ontario, in her seventy-sixth  
year. Mrs. Carnegie had been in  
failing health the last couple of  
years and seven months ago took a  
stroke. Her condition became gra-  
dually worse, resulting in a com-  
plete collapse on Thursday of last  
week. Mrs. Carnegie was born in  
Linthgow, a suburb of Glasgow,  
Scotland, and came to this country  
at 6 years of age with her parents,  
the late Robert and Mrs. Moffat,  
who settled at first near Galt. One  
of her brothers was the late Rev.  
Dr. Moffat, for 28 years pastor of  
Knox Church, Walkerton, another  
was the late Capt. Wm. Moffat of  
this town. Of the seven members  
of the family, five were school  
teachers and about 1870 the de-  
ceased taught school for six years  
at Johnston's school-house, Brant,  
succeeding her father, Capt. Wm.  
Moffat in the position. Her first  
husband was the late A. J. Faulds,  
who owned the fruit farm at the  
station. He died in 1888. Eight  
years later she was married to Mr.  
Wm. Carnegie, who predeceased her  
in the West two years ago. Mrs.  
J. W. (Annie) Thomas of Niagara  
Falls, Ont., and Mr. Archie Faulds  
of Brant, are her only children.  
She was the last surviving member  
of her father's family. Mrs. Car-  
negie was a woman of sterling  
qualities and a life-long member of  
Knox Church. The remains were  
brought from Niagara Falls for in-  
terment here, private funeral being  
conducted here to the town cem-  
etry on Tuesday afternoon. Rev.  
W. H. Burgess, pastor of Knox  
Church, conducted the service. The  
pallbearers were all, with the ex-  
ception of Mr. J. A. McGill, former  
pupils at Johnston's school-house  
in the 70's—Messrs. Oliver Mc-  
Connell, John Scanlon, Ed. McIntee,  
Isaac Gintz, R. E. Hughan—Tel-  
escop.

### FINED \$200 FOR HAVING STILL

On a charge of having a whiskey  
still in his possession, together with  
about 15 gallons of mash ready for  
distilling, all of which was seized by  
Inspector Matt. Beckett of Owen  
Sound and Provincial Constable  
Blood of Walkerton on a recent  
Saturday, Fred White of Southam-  
pton appeared before County Magis-  
trate McNab in that town yester-  
day and was fined \$200 and costs  
under the Inland Revenue Act.  
White, who is a mill wright in Pan-  
els Limited, claimed that the booze-  
making apparatus was none of his,  
but the fact that both the still and  
mash were found in his domicile led  
to his conviction. White paid the  
fine.—Port Elgin Times.

The farmer in Canada holds the  
key position. How much he at-  
tempts and achieves in the way of  
production largely determines what  
is possible to people in other lines  
of employment. The country has  
never seen hard times when the  
farmers were doing well, and has  
never seen anything else when they  
were not doing well. It is a matter  
of vast material importance to ev-  
ery interest in Canada that the far-  
mer has cause to sow with confidence  
that he will reap something worth  
while.

### WEISHAR DISPUTE SETTLED

The heirs of the late Andrew  
Weishar, sr., brought in a dispute  
over the distribution of the estate  
before Judge Klein last week. A  
gift of \$1700 by the late Mr. Weis-  
har to his daughter Mrs. Montag,  
was the chief item of dispute. Af-  
ter hearing the evidence His Honor  
advised all parties to get together  
and settle the matter without  
bringing suit to court. This was  
done, Mrs. Montag handing over  
the sum of \$1,000 to be divided a-  
mong the other heirs.—Telescope.

### WILL STAND TRIAL IN JUNE

The case of assault occasioning  
actual bodily harm, of Robert Wal-  
ker of Allenford, against James  
McDonald of Amabel, had a prelimi-  
nary hearing before Magistrate  
McCartney at Allenford when Mr.  
McDonald was committed to stand  
trial at the Jur session of the  
County Court at Walkerton. The  
trouble arose over some cattle be-  
longing to McDonald which Walker  
had caused to be impounded for  
trespassing on his farm. McDonald  
came o Walker's arm about the  
cattle, accompanied by his wo sis-  
ters and according to the evidence  
of Walker struck him over the  
head with a stone, knocking him  
down and partially stunning him,  
and when down striking him again  
several times. The evidence of Dr.  
John McAhs who attended to Walk-  
er's injuries was that there was  
two cuts on the side of the head,  
which required four stitches each,  
one wound in the side of the mouth  
also requiring four stitches and  
bruises all of a severe nature.  
Then there was evidence also that  
one of the sisters participated in  
the mix-up by throwing stones at  
McDonald.

### CHARGED WITH RAPE

Francis Wells, aged 17 years, son  
of Dr. Wells of Port Elgin, was  
brought to the Walkerton jail on  
Tuesday morning charged with com-  
mitting rape on Della Weick, a  
young Port Elgin girl. According  
to the story the Weick girl and two  
lady friends were returning from  
the beach on Monday evening and  
on reaching a certain spot they  
parted, Della Weick proceeding alone  
in the direction of her home. Young  
Wells is stated to have followed af-  
ter Miss Weick, and on overtaking  
her in a rather lonely place, to  
have committed one of the most in-  
decent and dastardly offences in the  
criminal code. The accused, who  
was arrested shortly after the al-  
leged offence and brought the next  
morning to the Walkerton jail, will  
appear for preliminary hearing be-  
fore County Magistrate McNab at  
Port Elgin on Tuesday morning  
next at 10 o'clock.—Times.

Harry Lauder's philosophy would  
soon make an end of war. "Let us  
scrap our battleships and build up  
friendships" is an aphorism he com-  
mends to statesmen and nations.

### FIFTY YEARS AGO

A young man who practiced medicine  
in Pennsylvania became famous and  
was called in consultation in many  
towns and cities because of his suc-  
cess in the treatment of disease. This  
was Dr. Pierce, who finally made up  
his mind to place some of his medi-  
cines before the public, and moving to  
Buffalo, N. Y., put up what he called  
his "Favorite Prescription," and placed  
it with the druggists everywhere.  
Dr. Pierce's Favorite Prescription has  
long been recognized as a tonic for  
diseases peculiar to womankind. After  
suffering pain, feeling nervous, dizzy,  
weak and dragged-down by weak-  
ness of her sex—a woman is quickly  
restored to health by its use. Thou-  
sands of women testify that Dr. Pierce's  
Favorite Prescription has entirely  
eradicated their distressing ailments.  
More recently that wonderful dis-  
covery of Dr. Pierce's, called An-uric  
(for kidneys and backache), has been  
successfully used by many thousands  
who write Dr. Pierce of the benefits  
received—that their backache, rheu-  
matism, and other symptoms of uric  
acid deposits in joints or muscles have  
been completely conquered by its use.  
Send 10c to Dr. Pierce's Laboratory in  
Bridgeburg, Ont., for trial package  
of any of his remedies.

### The Formosa Mutual Fire Insurance Company

Head Office, Formosa Established 1886  
John F. Waechter, President E. G. Kuntz, Man. & Treasurer  
Thomas Inglis, Vice-President

Amount of Insurance in force Dec. 31st, 1921, \$9745047.00  
Cash Assets \$26276.49 Available Assets \$268884.00

This old reliable farm Company insures farm buildings, ch  
schools and dwelling houses in cities, towns and villages at a lo  
mium note rate on the instalment plan and collects lower fire  
and third instalments than other mutual Companies and allowe  
ferred rate on buildings well equipped with lightning rods and is ca-  
pable of carrying any such risks.

The Company has a record for prompt inspection and payment of  
losses without quibbling or fear nor favor so that the assured doesn't  
need to worry if he sustains a loss because payments are made very  
punctual after proof of loss is considered by the Directors.

The Board of Directors meets every last Thursday of every month  
and the office is managed by honest, efficient management. Always  
prompt. Never negligent. With such low rates it merits the patron-  
age of intending insurers.

For rates and information apply to District Agent or  
Head Office, Phone 134-5 E. G. KUNTZ, Manager, Formosa

### Do You Want to Cut Your Chore Time in Half?

In the ordinary work of the farm you  
must pump more than a ton of water a  
day.

Why take the time and trouble to do  
this work when the wind will do it for you  
free.

A Toronto Windmill will cut your  
chore time in half. Make money for you.  
And I can recommend it as an efficient  
worker. It needs little attention outside  
an occasional oiling. And it costs nothing  
to run.

And if you want a real water service,  
with running water under pressure every-  
where, you'll be interested in Toronto  
Pumps and Toronto Water Systems.

Let me tell you about them.

**JOS. KUNKEL**  
Mildmay - Ont

### VEHICLE LAWS TOO COMPLICATED

Any car owner who has attempt-  
ed to wind his way through the in-  
tricacies of the Ontario Motor  
Laws will welcome with enthusiasm  
the proposal to codify and simplify  
the statutes governing motor ve-  
hicle traffic. In suggestion to the  
Legislature this week that a small  
special committee of the house be  
struck to consolidate existing mot-  
or legislation, Hon. F. C. Biggs as  
much as admitted that the present  
arrangement of traffic laws is com-  
plicated enough to please a lawyer  
but too cumbersome to be of any  
use to the average motorist.

The Minister proposed that the  
committee sit during the recess and  
revise three acts now on the sta-  
tute books: The Motor Vehicles  
Act, and The Highways Travel Act  
and The Loaded Vehicles Act. He  
stated that amendments had been  
so extensive and so numerous dur-  
ing the past eight years that no  
ordinary motorist could hope to  
interpret the acts as they stand at  
present. To add to the difficulties  
of enforcement, motor traffic has  
tripled during the past four years.  
"There is no idea of making any  
drastic changes in the existing  
law," stated W. A. McLean, Deputy  
Minister of Highways, when ques-  
ied as to the significance of the

proposal. "Traffic condi-  
tions have been changing so rapidly  
the past few years that amend-  
ments have been made  
the effort to keep  
changes that the  
in a very disjointed  
proposal seeks merely  
the existing law so the  
average motorist can und-

# The Cow Puncher

BY ROBERT J. C. STEAD.

(Copyright The Musson Book Co.)

CHAPTER I

The shadows of the spruce trees fell north-eastward, pointing long, cool fingers across belts of undulating prairie, or leaning lazily against the brown foothills. Like an incandescent globe the afternoon sun hung in the bowl of a cloudless heaven, filmy with heat, but the hot rays were met by the high altitude of the ranch country, and lost their force like a blow half-struck. And among the spruce trees it was cool and green, and clear blue water rippled over beds of shining gravel.

The ranch buildings lay a little to the rear, as though the trees stood sentinel between them and the prairie. The house was of round straight logs; the shingles of the squat roof were cupped and blistered with the suns of many summers. Refuse loitered about the open door; many empty tins; a leaky barrel, with missing hoops; boxes, harness, tangled bits of wire. On the wall there had been a fence; a sort of picket fence of little saplings, but wild bronchos had kicked it to pieces and range steers had straggled unscarred across its scattered remnants.

Forward, and to the left, was the corral; mill slabs on end, or fences covered in, offering vague protection from the weather. The upper poles were worn thin with the cribbing of many horses.

The sunlight bathed the scene; softly it in a soft, warm silence. The desertion seemed absolute; the silence was the silence of the unspoken places. But suddenly it was broken by a stamping in the covered part of the corral, and a man's voice saying, "Hip, there; whoa, you cayer; get under your saddle. Sleepin' eye. Hip, come to it!"

Horse and rider dashed into the sunlight. The boy—for he was no more than a boy—sat the beast as though born to it, his lithe frame taking every motion of his mount as his red shirt and thick hairy chaps could not disguise the lean muscularity of his figure; the road felt just the touch of romance. With a yell at his horse he snatched the hat from his head, turning to the sun a smooth, and slapping the horse across the flank signalled the animal sprang into the air then dashed at a gallop down the roadway, bearing the boy as unconcerned as a flower on its stem.

Suddenly he brought his horse to a stop, swung about, and rode back at the house he galloped him to a gallop and, leaning far down on the animal's side, deftly picked a bottle from among the grass. Then he circled about, repeating this operation ten as his eye fell on a bottle, the road again carefully setting a bottle on each post of the fence that skirted it to the right.

Again he came back to the house, but when he turned his eye was on the row of posts and his right hand lay on the grip of his revolver. Again his sharp yell broke the silence and the horse dashed forward as though shot from a gun. Down the road he went until within a rod of the house, then there was a flash in the sunlight, and to the clatter of the revolver, hoofs came the crack-crack of fragments, but four remained intact, and the boy rode back, muttering and disappointed.

He reasoned with his horse as he rode. "Tain't no use, you ol' Sloppy eye; a fellow can't get the bed if he ain't got the fillin'; cooked meals ain't decent chuk. I could plug 'em six out of 'em; don't you argue about it, neither—when I'm right out 'o' six, I belt I smash 'em six out 'o' six, but ain't right, an' you know it. You don't know nothin' about it; you never had a father, leastways, you never had no be responsible for one. . . . Well, it's comin' to a finish—a damn lame finish, you know that."

But he had reloaded his revolver and set up two more bottles. This time he broke four, and was better pleased soliloquy. As he rode back his sound from broken by a strange horse pricked up his ears, and the boy turned in the saddle to listen. "Jumpin' crickets, what's loose?" he ejaculated. He knew every sound of the foothill country, but this was strange to him. A kind of snort, a sort of hiss, mechanical in its regularity, starting in its strangeness, came across the valley with the unbroken rhythm of a watch-tick.

"Well, I guess it won't eat us," he ventured at last. "We'll just run it down and perhaps poke a hole in it." So saying, he cantered along the road which skirted the spruce trees, crossed the little stream, and swung up the hill on the farther side.

He was half-way up when a turn in the road brought him into sudden sight of the strange visitor. It was the first he had seen, but he knew it at once, for the fame of the automobile, had already spread into the farthest ranching country. The horse was less well informed. Whether or not in that moment he recognized the great rival analyst of horse character, but he bucked and kicked in rage and terror. But the boy was conscious of not so much of the horse as of two bright eyes turned on him in frank and surprised admiration.

"What horsemanship!" she exclaimed, but the words had scarce left her lips when they were followed by a cry of alarm. For the car had taken a sudden turn from the road and plunged into a growth of young poplars that fringed the hillside. The oldish man at the wheel gave it a violent wrench, but left his motor in gear, and the car half slid, half plowed its way into semi-vertical position among the young trees. The two occupants were thrown from their seats; the girl fell clear, but her father was less fortunate.

In an instant the boy had flung himself from his horse, dropping the reins to the ground, and the animal, although snorting and shivering, had no thought of disgracing his training by breaking his parole. With quick ungainly strides the boy brought himself to the upturned wreck. He was curious that he should appear to such disadvantage on his feet. In the saddle he was grace personified. For a moment he looked somewhat sturdily upon the wreck. Had it been a horse or a steer he would have known the procedure, but this experience was new to his life. He had no fear of strangers when they wore chaps and colored handkerchiefs, but a girl in a brown sweater and an oldish man with a white collar were creatures to be approached with caution. The oldish man was lying on the ground, with a leg pinned under the car, and Brown Sweater raised his head against her knee and pressed his cheeks with small white fingers and looked at the boy with bright grey eyes and said, "Well, aren't you going to do anything?"

That brought him back. "Sure," he said, springing to her side. "Whad'ye want me to do?"

"I am afraid my leg is broken," said the man, speaking calmly notwithstanding his pain. "Can you get the jack out of the tool-box and raise the car?"

The girl pointed to the box, and in a moment he had the jack in his hand. But it was a new tool to him, and he fumbled with it stupidly. The handle would not fit, and when it did fit it operated the wrong way.

"Oh, let me have it," she cried impatiently. In a moment she had it set under the frame of the car, and was plying the handle up and down with rapid strokes. The machine began to groan with the pressure, and the boy looked on, helpless and mortified. He was beginning to realize that there were more things in the world than riding a horse and shooting bottles. He felt a sudden desire to be of great service. And just now he could be of no service whatever.

But the foot of the jack began to sink in the soft earth, and the girl looked up helplessly. "It won't lift it," she said. "What shall we do?"

It was his chance. He was eighteen, and his wild, open life had given him muscles of steel. "Here," he said, roughly, "move his leg when I get it machine and I'll handle the rest of the frame. Then he lifted under the steel in a somewhat poised position, and he was able to swing it up far enough to release the injured leg.

"Very good, my boy," said the man. "That was a wonderful lift. The leg is broken—compound. Can you get some way of moving me to shelter? I will pay you well."

The last words were unfortunate. Hospitality in the ranching country is not bought and sold.

"You can't pay me nothin'," he said, rudely. "But I can bring a light wagon, if you can ride in that, and put you up at the ranch. The old man's soused," he added, as an afterthought, "but it's better than sleepin' out. I won't be long."

He was back at his horse, and in a moment they heard the clatter of hoofs galloping down the hillside.

The girl sat on the ground and rested her father's head in her lap. Tears came to her eyes, but she said gently, "Don't cry, Reenie; he'll be so glad to help. Of course, I'll be laid up for a while, but it will give you a chance to see ranch life as it really is. He'll winced with pain, but continued, "I fancy we shall find it plain and uneventful. What a automobile like he could run an automobile like he does a horse we should not be here. Did you notice that I didn't release the clutch? Just ambled into this predicament—embraced it, I might say."

"He's strong," she said. "But he's rude."

"The best fields for muscles are often poor schools for manners," he answered. "But manners are no substitute for hospitality, and he seems that belongs to the open country, the big, open country. In the ranching country, they, why, there isn't any word for it, but you will see for yourself."

He was soon back with a wagon and a stretcher. He avoided the eyes of his guests, but quickly and gently enough he placed the injured man on the stretcher. "I guess you'll have to take the feet," he said. The words were for the girl, although he did not look at her. "I could hustle him myself, but it might hurt 'em."

The injured man interrupted, "I beg your pardon," he said, "that I did not introduce my daughter, I am Doctor Hardy—this is my daughter, Irene, Mr. . . ."

"They don't call me mister," said the boy. "Misters is scarce in these woods. My name is Elden—Dave Elden."

He was for dropping it at that, but the girl came up with extended hand.

## Woman's Interests

Don't Overlook Attractive Annuals.

For natural beauty and pleasing color effects it is hard to beat some of the most fashionable flower gardens of annual plants.

The most permanent and satisfying annuals are obtained with an open space as a foundation, with trees making a frame for the house and giving grateful shade, accompanied by shrubs and permanent flowers to stand off the corners. When permanent planting, especially shrubbery, are newly set they often look ragged, and interplantings of annuals with attractive foliage and brightly colored flowers.

Annual plants are valuable for their flowers for indoor decoration when grown for this purpose they should be given ample space for the development of quantity and quality blossoms. The tall-growing, full-leafed plants, like the tall castor bean and sunflowers, when massed against buildings, fences, or in front of other obstructive objects, serve as attractive and efficient screens. Lower growing plants, when massed against a background of taller growing annuals or shrubs, either against buildings or on borders, are more effective than when used in beds on the lawn when planted in formal designs.

Because annual plants make a quick growth they must be provided with good growing conditions. The soil should be well supplied with available plant food, and should be reasonably retentive of moisture, though well drained. Though many kinds of annual flowering plants, particularly those of the more hardy classes, can be grown successfully in a variety of soils, a rich loam soil is necessary in order that they produce the maximum number of blossoms of the richest colors. If the soil is thin and poor, a bed two feet deep can be excavated and filled with soil especially prepared for the plants. The ideal soil for this purpose can be made from blue-grass

# WRIGLEY'S

After Every Meal

Juicy Fruit, Peppermint, Spearmint certain three delightful choose from.

And the new candy-coated peppermint gum, is also a great joy to your sweet tooth.

All from the Wrigley factories where made perfection.

Packed Tight—Kept Right

Wrigley's Juicy Fruit Chewing Gum

Wrigley's Spearmint Chewing Gum

Wrigley's Doublemint Chewing Gum

He took it shyly, but it made him curiously bold. "I'm glad to meet you, Mr. Elden," she said.

"I'm glad to meet you, too," he answered. "Misses is scarcer than misters in this neck of the woods."

Carefully they lifted the injured man into the wagon, and Dave drove to the ranch building with an unthoughtful caution that must have caused strange misgivings in the hearts of his team.

"It ain't much of a place," he said, as they pulled up at the door. "I guess you can see that for yourself," he added, with a grin. "You see, there's just Dad and me, and he's soused a better'n a scrubbin' brush." He was already losing his shyness. "Now, you take the feet again. Steady, don't break any more bones. Look out for that barrel hoop. This way now."

(To be continued.)

## Dye Old Wrap, Skirt, Sweater, Curtains In Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old worn, faded things new. Even if she has never dyed before, she can put a rich, fadeless color into shabby skirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything! Buy Diamond Dyes—no other kind—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run.

## Clay for China Ware.

A process has been newly discovered whereby artificial ultramarine can be made from china clay, from which all our chinaware is made, including the most beautiful porcelains. But it has various other uses. It is utilized as a "filler" in the manufacture of newspaper paper and in the production of a glaze for highly finished art papers. It is employed in the preparation of cotton fabrics and in making soap, also in some of the chemical industries.

## CORNS

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Your druggist sells "Freezone" for a few cents, to remove every hard corn, or corn between the toes.

Minard's Liniment for Dandruff.

### HIS NERVES NOW STRONG AS EVER

#### How An Ontario Teacher Regained Good Health.

"I am a school teacher by profession," says Mr. James R. Thomson, R.R. No. 1, Centralia, Ont., "yet when I started school teaching I was in very poor health. I suffered a nervous breakdown, brought on by overwork and no relaxation. I was unable to think, to act, or even to eat properly. Queer little prickly sensations were continually running up and down my back, my arms and my legs, like so many needles, seeming at times to fairly paralyze me, and often my heart was thumping like a trip-hammer. I determined to consult our family doctor, and he immediately put me under orders. I had to give up my school and return home in order to recuperate my lost health. Milk was his chief remedy, and I drank quarts of it; yet, though it helped me, it did not build me up to my normal condition—something was missing; something my system was calling for, better blood. One day, when I picked up a newspaper, I came across an advertisement of Dr. Williams' Pink Pills suggesting just what was needed in my case—new, rich, red blood. I immediately sent for a box, and when the doctor visited me, I told him I had decided to try Dr. Williams' Pink Pills and he seemed satisfied. By the time my box was nearly done, and I determined to get another, by the time I had finished this I was gradually coming back to normal. My strength was returning. I could sit and walk without strain. For the next few weeks I continued to take the pills, and they were working wonders with me. My head was becoming clearer, my memory better, and my nerves were becoming steadier. I began to go out frequently, enjoying myself. My appetite improved and was even better than before I had my break-down. I was myself again. I got back my school, and to this day I have had no return of the trouble, and now when anyone comes to me with nervous trouble, I instantly suggest Dr. Williams' Pink Pills as a remedy, as I believe that what they did in my case they will do for others."

Dr. Williams' Pink Pills can be obtained from any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

### BITS OF HUMOR FROM HERE & THERE

**It is.**  
 Flub—"What do you think of Czecho-Slovakia?"  
 Dub—"Well, it's hard to say."

**She Should Worry.**  
 "I hear you are going to Canada with your husband, Sarah," said the mistress to her cook, who was leaving to get married. "Are you not nervous about the voyage?"  
 "Well, ma'am," said Sarah, "that's his look-out. I shall belong to him, and if anything happens to me, it'll be his loss, not mine!"

**A Woman's Reply.**  
 There is no use trying to joke with a woman.  
 The other day Jones heard a pretty good conundrum and decided to try it on his wife.  
 "Do you know why I am like a mule?" he asked her when he went home.  
 The wife did not even stop to think. "No," she replied promptly. "I know you are, but I don't know why you are."

**Amended.**  
 A school inspector in the North of England asked a child in a primary school to tell him as nearly as possible what he understood a pilgrim to be.  
 "A pilgrim is a man who goes about a good deal," was the reply.  
 This seemed hardly satisfactory to the inspector, and he said:  
 "I go about a good deal, but I am not a pilgrim."  
 "Please, sir, I mean a good man," was the eager addition.

**Worked Both Ways.**  
 "Here's a wonderful thing!" said the fascinating widow. "I've just been reading about a man who reached the age of forty without learning to read or write. He met a woman, and for her sake he studied hard and made a scholar of himself in two years!"  
 The disillusioned suitor smiled sourly.  
 "That's nothing," he said. "I know a man who was a profound scholar at forty. Then he met a woman, and for her sake made a fool of himself in two days."

**One on the Doctor.**  
 A Dublin physician, attended by a number of medical students, was making the round of his ward, and stopped beside a bed whereon lay a man with a very prominent chest.  
 The physician, having elicited from the sick man the fact that he was in the habit of playing a wind instrument, went on:  
 "Yes, yes; all that puffing and straining is most prejudicial to the lungs, most prejudicial."  
 "What wind instrument used you to play?" he asked, addressing the patient. To the huge delight of the students, the patient replied:  
 "The concertina, sir."

**Why the Salmon is Pink.**  
 Men of science were long puzzled to know why the various salmon and trout have red or pink flesh. Now they believe that the color comes from the food that they eat. All of the salmon family are particularly fond of shellfish; and trout eagerly feed on fresh-water shrimp. It is well known that when lobsters, prawns, and shrimp are cooked the flesh turns pink; similarly the process of digestion turns shellfish pink. When a shrimp is found in the stomach of a salmon or a trout the gastric juices of the fish have turned it almost as red or pink as if it had been boiled. Therefore, we might believe that the color of the flesh of salmon and trout results from the considerable quantities of various small shellfish that the fishes eat.  
 But there is definite proof. Several years ago Professor Leger of the Piscicultural Laboratory at Grenoble, France, made experiments with trout to determine what gave their flesh its color. He separated the eggs from one trout into two lots and hatched them in different troughs. He fed one lot of young fish exclusively on fresh-water shrimps; to the other lot he gave no shrimps whatever. At the end of the second year the trout that had fed on shrimps had salmon-colored flesh, but the flesh of the other trout was perfectly white.  
 But some one may ask, Why is the flesh of shellfish red or pink? That is a harder question to answer. Perhaps the color comes from the food the shellfish eat.  
 Not long ago chemists of the Department of Agriculture at Washington examined some pink oysters that had been found in Long Island Sound and declared that they were delicious. The chemists suggested that possibly the bright hue of the flesh was caused by food that contained wild-sour bacilli and other similar micro-organisms.

**Minard's Liniment for sale everywhere.**  
 Of French invention is a portable crane that can lift 30 times its own weight.

### MME. BROCHU LIVED ON VICHY AND MILK DIET

#### But Now Montreal Woman Eats Anything and Feels Fine All the Time—Gives Tanlac Full Credit.

"For nearly five months before taking Tanlac I had to live on milk and vichy water alone," said Mme. Louise Brochu, 1366 Amity St., Montreal, Que. "I suffered so much the past two years I was almost a wreck. My indigestion was so bad I was almost afraid to eat for everything disagreed with me. My liver got to troubling me too, and pains in my side nearly run me wild. Nearly every night my sleep was broken by terrible headaches. I took the first bottle of Tanlac to please my husband, who worried over my case, but my second bottle I took of my own accord for I was beginning to feel so fine. I have a good appetite now, eat anything, and have no more trouble from pains or sleeplessness. I think Tanlac is wonderful. Tanlac is sold by all good druggists."

### Searchlight of 500-Foot Range.

From the pocket flashlight operated by two or three dry cells of minute size the battery searchlight has been steadily improved until remarkable results are obtained.  
 Some time ago there was devised a searchlight of 500 foot range operating on six or eight volts. More recently a battery searchlight has been introduced with a range of 2,000 feet up to half a mile, operating on six volts. Equipped with a seven and one-half inch adjustable focus, single shell reflector, on a recent photometer test one of these searchlights gave 453 candle-power.  
 The combination of a nitrogen filled tungsten lamp and a correctly designed reflector has worked wonders for the battery operated searchlight.

### MONEY ORDERS.

It is always safe to send a Dominion Express Money Order. Five Dollars costs three cents.

### Content.

Life's simplest things are love, and kindly friends,  
 Nature's sweet charm of earth and sea and sky;  
 Gladness of soul that with right living blends—  
 Home's dear content, so cheap that all may buy.

### WILL ANSWER ANY WOMAN WHO WRITES

### Montreal Woman Finds Health by Taking Lydia E. Pinkham's Vegetable Compound

Montreal, Quebec.—"I was a sufferer for three years, not able to do my housework. My husband was discouraged, for I was no better and had had the doctor all this time and nothing helped me. I was always sleepy, had no appetite and suffered with my left side. My mother in England recommended Lydia E. Pinkham's Vegetable Compound because it had helped my sister, so I have been taking it. I am now able to do my housework and I can not praise your medicine too highly as I have great hopes for the future. I will tell anyone who writes to me what good it has done me."—Mrs. E. MASSON, St. Henry P.-O., Montreal.

For nearly fifty years Lydia E. Pinkham's Vegetable Compound has been helping women. Just as it helped Mrs. Masson, so it has helped doctors and other medicines failed. If you are suffering from disagreeable symptoms caused by some female weakness, try this splendid medicine. It is a woman's medicine for ailments, and can be taken in any form.

### REYNOLDS

Variation—Reynolds.  
 Racial Origin—English.  
 Source—A given name.

Reynolds is another one of those family names which is traceable to an old Teutonic given name, and the spelling of that name runs about as far from the modern spelling as many of the ancient Irish names do. One would hardly be expected to recognize at first glance the connection between the name "Reynold" and "Reognwaldr."  
 This syllable "wald," which is an element in so many names of Teutonic origin, is not the same as the modern German word "wald," which means "forest." It is the same as the ancient Gothic "valdan," and carries the sense of "ruler" or "ruling." Indeed, it is probable that the word root traces back still further, to a prehistoric time before the original Indo-European race had split into the Celtic and Teutonic branches, as well as into others, for philologists believe it to be a "cousin" to the Welsh word "gualdyr," which has virtually the same meaning.  
 However, the given name "Reognwaldr" meant "God's ruler" or "god-like ruler." Among certain of the north Germanic races it became "Reinhold" and Reinold." The Anglo-Saxons had it as "Regnald," which under Norman-French influence developed into the softer "Reynold" from which the family name has been derived.

### Seven O'clock Tea.

Five o'clock tea, which was first started in England some seventy years ago, is a custom which has spread all over the British Empire and even to the United States and France.

A more recent invention is seven o'clock tea. By this I mean the cup of tea which nine people out of ten now take before getting up in the morning, and which is equally enjoyed by all classes of society.

Australians are the greatest tea drinkers. In England a cup of black coffee after lunch or dinner is very popular, but the Australians and the New Zealanders greatly prefer tea. They drink very little coffee at any time.

In South Africa on the other hand, coffee is the drink. The custom of coffee drinking has been imported there from Holland. When you first go to Holland, you are somewhat surprised to find that everyone knocks off work at eleven o'clock in the morning for a sup of coffee—and very good coffee, too.

At first you may smile in a superior way, but very soon you will take to it, and find that it does you good.

The fact is that the climate has something to do with drink habits. The moist climate of Holland causes this need for coffee, whilst the dry heat of Australia produces the craving for large quantities of tea.

The Russian drinks tea at all hours of the day, but the cup which he appears to like best is that which he takes after supper. It is drunk without milk, and would keep most Canadians awake all night; yet it certainly has not that effect upon the Russian.

In France, Italy, Spain, and Portugal, coffee is served with the first meal of the day. Indeed, the meal consists only of coffee with milk, a roll, and possibly a little honey. Wine is the drink that is taken with the twelve o'clock dejeuner, the real breakfast.

In many American households, coffee is drunk three times a day. It is only within the past twenty years or so that the people of the United States have taken to tea.

### The Garden.

And if indeed  
 In some old garden thou and I have wrought,  
 And made fresh flowers sprung up from hoarded seed,  
 And fragrance of old days and deeds have brought  
 Back to folk weary; all was not for nought.  
 —Wm. Morris.

A match is struck, the weed is lit, the user throws the match carelessly away, a breeze fans it into a blaze with the usual serious results.

Scotland Yard has records of 200,000 finger-prints, so perfectly classified that any special one can be found in one minute.

### What About the House Fly?

It must be remembered that the fact that the house fly is a source of danger in the transmission of disease has never been exaggerated. It does not require any scientific knowledge to appreciate this fact, inasmuch as this pest transmits disease for the most part mechanically. That is, by coming in contact with excretions of different kinds, thrown off by those suffering from the various communicable diseases, and then passing directly from these to the various articles of food, many of which afford a favorable culture medium for these germs, for instance, the milk on our table and in our kitchens and pantries. While the mosquito is only responsible for the transmission of two different diseases, that is malaria and yellow fever; and the body louse only responsible for the transmission of typhus fever; and the flea that infests the rat for the transmission of bubonic plague, yet the fly transmitting germs mechanically on its legs, body, etc., may be responsible for the transmission of various diseases. Furthermore, the fact of it being such a disgustingly filthy pest should more than warrant its extermination, even if it were not responsible for the transmission of disease.

The only way to efficiently abolish the house fly is to destroy the breeding places. However, it is well to remember that every fly killed now may save the killing of millions within two months' time.

### Ex-Kaiser's Cruel Conduct at Father's Deathbed.

"Why didn't father fall at Woerth?" meaning the battle of Woerth-and-der-Sauer in the Franco-German war in 1870, when the then Crown Prince Friedrich Wilhelm defeated the French. "It would have been lucky," said the ex-Kaiser Wilhelm to his mother, the daughter of Queen Victoria, according to Robert Dohme, who was a member of the court of Wilhelm's father, Friedrich III. In his memories, now being published, Dohme in referring to the well known differences between father and son, describes the selfish behavior of Wilhelm's entourage on the occasion of his father's death. The day before he died officers attached to Wilhelm's suite forcibly entered the castle and occupied its rooms, making themselves at home and behaving like masters toward the attendants.

The castle was surrounded by troops under the command of Wilhelm's friends, who cut the castle off from communication with the outside world. While Kaiser Friedrich was dying nobody, not even physicians, could enter or leave without a permit from Wilhelm's friends.

Dohme concludes: "How the court had changed! A mild regime gave place to the sword. One could imagine oneself in the midst of Russia!"

Men who make good use of their time have none to spare.  
 The omnibuses of London travel about 85,000,000 miles in a year.

### CHILDREN AND WELL

Children sleep well and are happy and laughing. It is a mother's duty to see that her children do not sleep well; if they are cross and cry a great deal, give them Baby's Own Tablets and they will soon be well and happy again. The Tablets are a mild but thorough laxative which regulate the bowels, sweeten the stomach, banish constipation, colic and indigestion, and promote healthful sleep. They are absolutely guaranteed free from opiates and may be given to the new-born with perfect safety. Medicine dealers or write to The Medicine Co., Brockville, Ont.

### Washin' Up.

I hate to hear my call:  
 To go now—come, get  
 My play, an' wash  
 In my Sunday best.  
 "Suit out," says ma,  
 "—have a heart!  
 Ma," says I.  
 Wash, now  
 Wash clean!  
 Every speck!  
 How clean  
 —"Mercy  
 —they'll never  
 —family!"  
 —burn—that ain't  
 But ma, she takes  
 the scrubs an' says:  
 sunburn off—in

### get your nails, she says, your hair an' brush your teeth an' brush your face.

Wish I could lay my fingers on the feller that invented close-shinin' up! Jist wish I could!—I'd be bloody up his nose!  
 Roselia Merritt Montgomery.

The Bible contains 773,743 words and 3,556,480 letters.  
 The most prolific cause of preventable fires in all walks of life is unquestionably the careless use of matches.

Damage Sr. former mer-  
 chant, passed away at  
 his son, in Walkerville,  
 after an illness of only  
 a few days. Death was caused by  
 a complication of old  
 diseases, due to old  
 age. He was well re-  
 spected and well known  
 to the older residents of  
 the town. He was the  
 first to open the Great  
 Hotel and was later  
 succeeded by his son, who  
 was in office there for some  
 years. A general store  
 was conducted there for  
 about 20 years and was  
 eventually elected a member  
 of the council, afterward re-  
 ceiving the honor of mem-  
 bership as Reeve for  
 several years. Mr. Dul-  
 can was married on July 7th, 1868  
 to the daughter of the  
 late Mr. Smith, of Clifford,  
 who passed him by 17  
 years. He survived three  
 children, a son and two  
 daughters, Mrs. M. M.  
 and Mrs. W. M. M.  
 The late Mrs. Marie  
 of Bluevale, who was  
 the daughter of the  
 late Mr. Thomas  
 of London, and of New  
 York.

Montreal Licensed Victuallers As-  
 sociation are after the frequenters  
 of hotels who spew out blasphemy  
 and profanity. Printed placards  
 show the fine to be \$50 with or  
 without 6 months imprisonment.  
 The signs might be moved West-  
 ward and relate to more than ho-  
 tels. Bad language don't get you  
 anywhere that good and the fel-  
 low who uses it should be told so  
 with emphasis.

Now that the roads are being put  
 in fine shape and most people are  
 tuning up their buses, comes the  
 announcement that gasoline is go-  
 ing up in price. If John D. wants  
 to get in right with the common  
 people, all he needs to do is change  
 his schedule so that the drop in  
 price, instead of coming in the win-  
 ter time, will go into effect in the  
 spring, when most "tin lizzies"  
 make their debut.

Even where there is plenty of love  
 in them some marriages are not a  
 success. For instance, Blanche Love  
 of Akron, has sued A. R. Love of  
 Akron for divorce. And you would  
 really think that a marriage with so  
 much sweetness about it would be  
 bound to be happy, but G. A. Honey  
 of Hudson, Ohio, has sued his wife  
 Ivah B. Honey, of Akron, for di-  
 vorce. Evidently there was a sting  
 to the B. in Ivah's middle name.

**DESPOUNT FARMER TAKES  
 LIFE WITH SHOT GUN**

Robert McMeekun, a well-to-do  
 farmer living in Egremont Town-  
 ship two miles east of Varney, com-  
 mitted suicide about 6 o'clock Mon-  
 day morning by shooting himself  
 through the heart with a charge  
 from a single-barrel shot gun.  
 Mr. McMeekun, according to the  
 evidence given at the Cononer's  
 investigation conducted by Dr. J. G.  
 Hutton, arose about six o'clock on  
 Monday morning and went outside  
 after building the kitchen fire.  
 Shortly afterwards Mrs. McMeekun  
 also arose and when aptly dressed  
 heard he shot and, looking out of  
 the window, saw her husband hang-  
 ing on to a verandah post near the  
 kitchen door. She called her boys,  
 and when next she looked saw him  
 lying on the floor of the verandah.  
 When the two boys, a son, Cecil,  
 and Albert Reeves, who has been  
 engaged on the place since last  
 April, came down, they found Mr.  
 McMeekun lying with his body on  
 the floor and his head and should-  
 ers on the steps. He was appar-  
 ently dead. Messrs. Joseph Lennox  
 James Marshall and Earl Mead, the  
 closest neighbors, were sent for  
 and Dr. Hutton telephoned for. A  
 daughter, Miss Bessie, also saw  
 from an upstairs window her father  
 lying with his head and shoulders  
 on the steps.

The evidence of Messrs. Joseph  
 Lennox and Earl Mead, who were  
 the first to arrive on the scene af-  
 ter the accident, corroborated that  
 of the members of the family, and  
 also that given by Albert Reeves  
 the hired man. Mr. Lennox said he  
 had heard the deceased, no later  
 than last week, threaten to do away  
 with himself, while Mr. Mead gave  
 evidence that he had heard Mr.  
 McMeekun remark that he wished  
 he was dead, and also knew that  
 he worried over money matters.

**THE TAILOR GETS EVEN**

(Stratford Beacon)

There is a tailor down in Tiffin,  
 Ohio, who may be a wonderful  
 tailor and all that, but he surely  
 has a keen sense of humor. This  
 tailor must be in fairly comfort-  
 able circumstances, as he has the  
 luxury of a car in his off hours.  
 Evidently, in his peregrinations, he  
 has had the usual luck of motor-  
 ists, and has had occasion to lay  
 his bus up for repairs at times.  
 That nothing was lost on him is  
 evident at the opportunity he took  
 to get back at the garage man  
 whose man has evidently grown so  
 corpulent that one day, as men will  
 do, a button was ripped off. The  
 garment was sent to his customer,  
 the good tailor, to have the button  
 restored to his original place.  
 Next day, the garage man got  
 his bill:  
 To sewing on button ..... 15  
 Thread ..... 03  
 Button ..... 06  
 Labor, quarter hour ..... 06  
 Removing old thread ..... 30  
 Labor, eight hour ..... 07  
 Needle ..... 15  
 Bees wax ..... 02  
 Knotting thread ..... 02  
 Labor, sixth hour ..... 20  
 Total ..... \$1.01

We hope that all and sundry mo-  
 torists will be able to appreciate  
 this classic by the tailor, in fact,  
 most people will. That old tailor  
 had a real Bill Nye sense of hu-  
 mor.

**CONSTABLE AWARDED \$120**

In an action brought on by Geo.  
 Speare, Southampton constable,  
 against Earl Burgess, a butcher of  
 Southampton, for injuries alleged  
 to have been inflicted last Decem-  
 ber, the plaintiff was awarded \$120  
 being the full amount of his claim  
 in Division Court, which was held  
 in Port Elgin last week. Judge  
 Greig presiding. Lawyer Mickle, of  
 Chesley, appeared for the plaintiff,  
 and O. E. Klein, of Walkerton, for  
 the defendant. It appears Con-  
 stable Speare was called upon to  
 deliver a summons at the defen-  
 dant's place last December, to  
 which the defendant objected. Af-  
 ter a heated argument Mr. Burgess  
 is alleged to have assaulted the  
 constable, inflicting injuries for  
 which he had been receiving medi-  
 cal treatment for weeks after-

# NOTICE!

We wish to announce that we will accept The Knechtel coin in exchange for goods or payment of accounts to May 31st. At night of closing of that date it will be value.

**"FATHER'S DAY"**

Somebody should start a cam-  
 paign for "Fathers' Day." Poor,  
 old, tired dad may be getting all  
 the praise these days he deserves.  
 Edgar A. Gues breaks out into  
 verse in honor of dad as follows:  
 Only a dad with a tired face,  
 Coming home from the daily race,  
 Bringing little of gold or fame,  
 To show how well he has played  
 the game;  
 But glad in his heart that his own  
 voice  
 To see him come home and hear his  
 voice.  
 Only a dad with a brood of four,  
 One of ten million men or more  
 Plodding along in the daily strife,  
 Bearing the whip and scorns of life  
 With never a whimper of pain or  
 wail  
 For the sake of those who at home  
 await  
 Only a dad, neither rich or proud,  
 Merely out of the surging crowd,  
 Toiling, striving, from day to day,  
 Facing whatever may come his  
 way,  
 Silent whenever the harsh con-  
 demn  
 And bearing it all for love of them  
 Only a dad but he gives his all  
 To smooth the way for his children  
 small,  
 Doing with courage stern and grim  
 The deeds that his father did for  
 him  
 This is the line that for him I pen:  
 Only a dad, but the best of men.

**MAN NEEDS 'EM STILL**

The hired men between their chev  
 had stopped and sat and aired  
 their views where listening cows  
 could hear the news. So Jersey  
 Jane nudged Guernsey Ann shifted  
 her cud and thus began. "I hear  
 that Henry Ford allows that he can  
 make some flivver cows, and since  
 he never works by halves, no doubt  
 some motorcycle calves. Do you  
 believe, good sister Ann, that we  
 shall lose our use to man? Is our  
 long history complete, and will they  
 make us into meat? Said Guern-  
 sey Ann to Jersey Jane, "I share  
 your fears, I share your pain." To  
 hold his peace no longer able, thus  
 spake old Dobin from his stable:  
 "O pray excuse this horse laugh  
 grumpy, but wouldn't Lizzie's milk  
 be tiny? It makes me smile, it  
 makes me snicker, it makes me  
 whinny, neigh and nicker. Your  
 dams have known the herdsmen's  
 care since Eve was young and Ed-  
 en fair. You topped with cream  
 man's coffee cup ree good old He-  
 ctor was a pup, and folks won't  
 risk their lights and livers by drink-  
 ing milk that comes from flivver  
 So Jane and Ann pray cease to  
 weep, swallow your cuds and go to  
 sleep. You still shall serve your  
 human lords in spite of fifty Henry  
 Fords."

**HIS BIT OF LUCK.**

The wife of a little country  
 church sexton had died rather sud-  
 denly, and the vicar went to con-  
 dole with the bereaved husband.  
 "Now, tell me how it happened,"  
 said the vicar.  
 "Well, sir, she was bad, and I  
 went off for the doctor, four miles  
 away and when I gets there he  
 was gone off somewhere else; so I  
 turns back, and in coming home re-  
 membered I had a bottle of medi-  
 cine which he giv me last year, so  
 says I: "That will do for the missus,"  
 so she takes it and dies."  
 Then lighting up his pipe, the  
 old sexton added: "Wasn't it a  
 good job I didn't take it myself."

**Enemies of** a solution of bluestone, each gallon containing one pound in solution. Add the proper quantity of lime and test with litmus in making Bordeaux just as though no poison were in the bluestone solution. All growers who use enough solution, seventy to one hundred gallons per acre per application of white arsenic Bordeaux, control the potato beetles.

Apply at least eighty gallons of poisoned Bordeaux when the bugs are just beginning to appear. It takes a lot less arsenic to kill a small bug than a half-grown one. Above all, use common sense and judgment in spraying. Don't think that applying forty gallons per acre once or twice through the season will grow a large crop of potatoes. Such spraying often does a man's conscience and enables him to say that he has sprayed without breaking any of the commandments, but in order to control insects and blights successfully there must be a certain amount of copper and a certain amount of arsenic applied to each acre, and it must be renewed often enough so that a continuous protection is afforded to the plant.

Potato aphids hibernate for the most part on the rose plant, both wild and cultivated. Root out all of the wild rose bushes in the neighborhood of potato fields and spray cultivated roses in the spring, about the time the first potatoes are coming up, with black leaf 40 at the rate of a tablespoonful to a bucket of water.

The potato aphid is one of the insects, in the control of which steps must be taken before the outbreak occurs. In other words, controlling potato aphids is like insurance—you buy your protection not knowing whether you will need it or not.

To control aphids use one pint of black leaf 40 to each one hundred gallons of Bordeaux and apply at high pressure and with an up-spray. The spray must hit the insect in order to kill. Apply black leaf 40 with the first two or three applications of Bordeaux. It is particularly advisable for growers of seed potatoes to spray thoroughly for potato aphids. In no other way can they hope to keep down mosaic in years of aphid outbreaks.

Few realize the immense amount of damage that is caused by the small, black flea beetles that are found hopping about the potato for the first few weeks after it comes through the ground. This insect tends to stunt the potato's early growth, and when prevalent, will reduce the acreage yield by one hundred bushels. In one case, where the beetles were controlled beside a plot in which they were allowed to run wild, the increased yield was nearly one hundred and forty bushels from flea beetle control alone.

The best treatment is to apply a repellent, and for this Bordeaux is the best yet known. No poison is required in flea beetle control as they absolutely refuse to eat a plant that is coated with straight Bordeaux.

If flea beetles are plentiful on potatoes when they first appear, apply a mixture of 4-4-40 Bordeaux. Continue this every week up until the middle of July. It pays as well to protect the young plant from injury as it does the half-grown plant.

### Beginning Bee-Keeping.

The best time of the year to begin bee-keeping is in the spring. If possible the beginner before starting should pay a visit to other bee-keepers and study the methods to pursue. In his bulletin on "Bees and How to Keep Them," the late F. W. Sladen, Dominion Apiarist, advises starting on a small scale, as nothing is so disheartening to the too venturesome as to lose his bees owing to a lack of experience. A couple of colonies are sufficient at first. With the gaining of knowledge and understanding, additional ones can be made. The first outlay need not exceed \$25 or \$30 if judgment is used. It is well to make the bees pay their way after the first outlay. Colonies, complete in their hives, may be obtained in May, or swarms may be obtained in June or early in July. The former should each give a fair amount of surplus honey or a swarm or two the same season, but a swarm is not likely to produce much honey the first year, unless it is a very early one. The colony or swarm should be fairly populous, and should have a young fertile queen. Be sure the apiary from which it comes is free from disease. If possible procure the bees in the neighborhood, as death is frequent from unskillful packing if the bees are brought from a long distance. Another reason for nearby buying is the less risk of disease from contact. The seller will usually assist in the moving of the bees. If the colony is procured in April or May there will be less risk of loss than if transported later.

Improvement in this respect is shown in the second year compared with the first.

Certificates are issued for all qualified birds laying no fewer than 150 eggs in 52 consecutive weeks, with advanced certificates for birds that lay over 225 eggs in the same period, providing the quality of the eggs is not lower than the grade specials in the Canadian standard for eggs and that they average at least two ounces in weight. British Columbia again shows to advantage in the advance qualifications, with Ontario and Quebec following, with new Brunswick fourth, and Saskatchewan and Prince Edward Island tying. In British Columbia, 96 Single Comb Leghorns granted advanced certificates, averaged 238.32 eggs per bird in the 52 weeks; 42 Wyandottes, 242.17 per bird, and 25 Barred Plymouth Rocks, 241.17 per bird. In Ontario 44 advanced Leghorns laid an average of 245 eggs per bird in the 52 weeks, 27 Plymouth Rocks 234.16 per bird, and 18 Wyandottes 233.13 per bird. In Quebec 10 advanced Plymouth Rocks averaged 235.2 eggs per bird, and 6 Rhode Island Reds 235.3 per bird.

### Grading of Hogs.

The maintenance of Canada's export bacon trade will depend to a great extent on an adequate supply of hogs of the right type for conversion into first quality bacon. As an inducement to farmers to breed and feed that type a premium will be paid for hogs that grade a "select." The grading of hogs is expected to commence at an early date in accordance with the standards recommended at the recent conference of producers, packers and Dominion and provincial departmental officials, held in Ottawa under the auspices of the Dominion Department of Agriculture. Official graders will be stationed at stockyards, abattoirs, and other points where necessary, and a minimum premium of 10 per cent, will be paid by the packers for hogs suitable for the production of select bacon. The difference in price between the grades of live hogs, other than "Select Bacon" and "Thick Smooth" hogs, will be determined by supply and demand. The "Select Bacon" and "Thick Smooth" standards adopted were as follows:

Select bacon hogs—Jowl and shoulder light and smooth; back from neck to tail evenly fleshed; side long, medium depth, drooping straight from back, ham full, general finish, no excess fat; weight 160 to 210 lbs.

Thick smooth hogs—Not conforming to Wiltshire standard, but of smooth fleshing and finish; weight 160 to 210 lbs.

The grading will be carried on under the direction of the Live Stock Branch of the Department by competent officers appointed for the purpose.

A method of buying bees that has come into favor is by weight, without combs, in boxes specially constructed for the purpose. Packed with care the bees will survive a journey of some length, lasting several days in fact, and will not be likely to carry brood disease after so long a separation from their combs if the food supplied is free from infection and they are compelled to build new combs. Colonies should be moved in autumn or early spring if the distance is less than two miles in order to avoid the return of many of the bees to the old location. Always bear in mind that the successful bee-keeper is the one who has learnt how the bees will act under various conditions and how these conditions and the actions of the bees can be controlled.

### Poultry Performance Record.

That the Record of Performance in egg-laying, established by the Poultry Division of the Dominion Live Stock Branch is appreciated is indicated by the increase both of breeders and entries for 1920-21 compared with the number entered in 1919-20. In the latter year the entries were 67 breeders and 4,436 birds and in the former 81 breeders and 7,611 birds. Quebec shows, according to the second report just issued, the largest increase in the number of breeders, and Ontario and British Columbia show the greatest increase in birds entered. The report indicates that the breeds most favored by British Columbia are Leghorns and Wyandottes, and by Ontario Leghorns, Plymouth Rocks and Wyandottes. Quebec's fancy is for Plymouth Rocks and Rhode Island Reds. New Brunswick, Prince Edward Island and Saskatchewan also favor Plymouth Rocks. British Columbia stands well ahead in the number of birds qualified for the record, Ontario coming second, Quebec third, and Saskatchewan fourth. Considerable

### A Durable Exterior Whitewash.

To make a durable whitewash for outside surfaces combine fifty pounds of hydrated lime, or thirty-eight pounds of quicklime, with three pounds of sodium phosphate, or the same amount of soda ash, may be used, and five pounds of casein with nine and a half gallons of water. This whitewash is easiest prepared by dissolving the casein in the sodium phosphate solution and then adding this to the milk of lime after the latter has become cold.

### Jim Crow—And How to Treat Him

#### A Simple Way to Get Rid of a Big Nuisance

Like most outlaws, the notorious Jim Crow has some points that are commended among law-abiding citizens, but when he is a bad bird he is a hard-boiled egg. His springtime ravages on the cornfield are very largely responsible for his unsavory reputation, but he has added to it by occasional raids on the poultry yard, and depredations on wild birds, and at certain seasons and in certain localities he becomes such a nuisance and a detriment to farming that he must be warned by making an example of some members of his gang.

Jim is only about half bad, and because of his better half, which does not mean his wife, who is just as black as he is, it is not advisable to treat him too harshly. Nearly one-fifth of his food is made up of insects, and he includes on his menu some of the farmer's worst enemies—grasshoppers, caterpillars, and white grubs, and their parents, the May beetles.

Probably we could not get along so well without Jim Crow as with him. Killing off the whole family, if that were possible, would be a shortsighted policy. So while we recommend the poisoning of crows, this measure should be looked upon merely as a warning to Jim and his family that they have been going too far and that they can't get away with everything. They are wary enough not to need many repetitions of the lesson.

Every spring farmers revise their old feud with the Jim Crow family, carrying on a desultory battle by means of scarecrows, epithets, and the more effective deterrents of coal tar and poison. Coal tar, which may be secured at gas plants and some paint shops is not a poison, but it imparts a disagreeable gassy odor to the seed grain that is distasteful to crows and other pests. It has the advantage, not possessed by some other deterrents

on the market, of not affecting the germination of the corn when used in limited quantities. A tablespoonful is used to a half bushel of seed. The grain is first heated by an application of hot water, and then drained. The coal tar is added immediately and kernel an even coating. The seed is then spread out to dry or is dried by the addition of sifted ashes, sand, plaster, or powdered earth.

The best deterrent, however, is strychnine, which may be applied to corn in a paste made up in the proportion of one ounce of powdered strychnine, two tablespoons of starch, and one and one-half pints of water to twenty quarts of corn. The starch and strychnine are put into the water, which is heated to boiling, and stirred well when the starch begins to thicken. This paste is poured on the corn distributed into it until thoroughly and is then ready to use.

This method is better than the old one of steeping the corn in a strong strychnine solution. Because of their wariness it will not be possible to kill many of the crows, but a little of this poisoned corn scattered over the field of sprouting corn will get a few of them and the rest will take the warning and leave. Using whole corn for bait lessens the danger of poisoning smaller seed-eating birds. Care should be taken not to distribute the poisoned grain near the farm buildings where domestic animals might pick it up. The crows usually do their corn pulling at some distance from the buildings.

Before going ahead with poisoning operations which involve the spreading of poison it is always advisable to look up laws and local regulations regarding the distribution of poison. Local conditions may modify practices, a great deal, especially in thickly populated regions.

### Hilkiah's Great Discovery, 2 Chron. 34: 14-16, 29-32. Golden Text—Thy word is a lamp unto my feet, and light unto my path, Ps. 119: 105. (Rev. Ver.)

Time and Place—J.C. 623; Jerusalem.

Lesson Foreword—Josiah, like Hezekiah, was a reforming ruler. Under him the religion of Israel was once again cleansed of many of its degrading elements. His reforms were due to the inspiration made upon him by the discovery of the Holy Place in the temple. 2 Kings 22: 3 to 23: 25 should be carefully read in connection with this lesson.

I. The Book of The Law Discovered, 14-16.

V. 14. Josiah had undertaken the repair of the temple, which had fallen into decay, and had sent Shaphan, his secretary, to help Hilkiah, the priest, to count the repair money collected in the temple. 2 Kings 22: 3-7. And when they brought out the money, Josiah was pointed out in the Lesson Foreword as having instituted a new system for keeping the temple in repair. A box with a hole bored in it was placed near the altar and into this the worshippers dropped their offerings for the temple upkeep. Previously the priests had shown a great laxity in the handling of the temple king's secretary should act with the priest in counting the money and paying the workmen. Shaphan was acting in that capacity when Hilkiah the priest found a book, etc. How the book came to be in this particular place we are not told. We may conjecture that the priest had been inspecting the repairs or making ready for them; that he had been taking an inventory of the store chambers; that he had been cleansing the Holy Place—plenty of occasions exist" (H. P. Smith). A book of the law. Most scholars are now agreed that this was the Book of Deuteronomy and not the Five Books of Moses. At least three reasons are usually given for considering this law book to be Deuteronomy: (1) It was read through twice on the day it was discovered. (2) The great impression it made on Josiah could be explained by the woes pronounced by Deuteronomy if the law were not observed (see 2 Kings 22: 13 and Deut. ch. 28). (3) The consequent reforms of Josiah are those advocated in Deuteronomy.

V. 15. Hilkiah delivered the book to Shaphan. This was natural. The high priest could not by himself carry out the prescriptions of the new law book without the consent and support of the king. If the book were given to Shaphan it would be sure to be gained.

V. 16. Shaphan carried the book to the king. Shaphan immediately repaired to the royal palace which stood close by the temple. He first told the king of the progress of the repair work on the temple and then he divulged the great discovery.

When the book of law was read to Josiah it created a profound impression on him. He heard the recital of woes for the non-observance of the law and yet he recognized that it had not been kept. He decided to investigate whether the book discovered

were genuine or not. A deputation was sent to Huldah, the prophetess. The prophets were now recognized as the mouthpiece of God, and Huldah could answer the perplexing question. Huldah's reply was that the book of the law genuinely expressed the will of God.

II. The Book of The Law Read, 29-30.

V. 29. Josiah convened a national assembly for the purpose of accepting the newly found law as the law of the nation. Elders of Judah and Jerusalem. The elders were the heads of families or leading men of each town or village. They administered justice and acted as representatives of their community.

V. 30. The nation held in the precincts of the temple a great concourse of people from all parts of the country. The Levites. Originally they were the priests at the various sanctuaries throughout the land. When later these sanctuaries were destroyed and the only legitimate place of worship was the temple in Jerusalem the Levites were taken into the Jerusalem temple. They read in their ears, etc. The fact that Josiah was able to read through the whole book at one gathering strengthens the argument that the book was Deuteronomy and not the whole Pentateuch.

III. The Covenant Renewed, 31, 32.

V. 31. The King stood in his place. The king had a special place when he worshipped in the temple and 2 Kings 23: 3 mentions that it was "by a pillar on this occasion he may have had a raised platform. Made a covenant. A covenant was ratified by a ceremonial observance. A sacrificial victim was hewn in pieces and the two parties to the covenant passed between it.

V. 32. First the king made a solemn vow to observe the law contained in the new book. Then the people were required to stand and take the oath after him, probably by responding, "Amen."

### Application.

One of the results of the study of the Bible. Even before this man had written with eagerness the portion of Scripture that we have translated. Foxe writes: "At that time some gave a load of few chapters of St. James' Epistle. Some time after this Paul wrote: 'I wish that the people were translated into all languages. I wish that the man might sing parts of plough and the weaver and that the traveler with their narrative his way.'"

There is a well-known traveler, on a standing up in a saddle at a partying to read the post. How carefully he as he strives the Bible and we guides.

### Thinks It Better to Keep Up Grain.

Dairymen differ in opinion as to the practicality of continuing the grain ration after the cows are turned out to pasture. It has been our experience that it pays to keep the grain up, and especially with heavy milking cows. There are cows in every herd that are beginning to decline in milk flow as they are turned out to pasture. These cows I do not consider profitable to grain, but as a rule cows do much better and hold up longer on their milk flow if given a liberal grain ration even on good pas-

ture. Each succulent and produce an as the season ally becomes maximum milk flow of milk during months, should receive a treated feed to balance up —L. R.

Fine barns do not Whim is no especially for child can be taught to like for them.

### Mr. Dairy

Butterfat production helps to pay grocery bills but it is poor policy to rob the young calf in order to pay these bills.

The butterfat production of the future depends upon the growth and development of the present day dairy calf.

The calf ought to have warm, sweet milk until two or three weeks old; from four to six quarts per day, depending upon her size. From then on skim-milk may be added in at the rate of five weeks, the calf is drinking skim-milk entirely at the rate of seven to nine quarts daily. Warm sweet milk is far superior to any other. It is a mistake to attempt to make up in quantity what skim-milk lacks in butterfat.

Whole oats or shelled corn are eaten readily when the calf is quite young. A liberal supply of these grains should be used to supplement the skim-milk ration which should be continued until the calf is five or six months old. Only a well-fed calf builds a healthy, heavy-milk yield cow.

When he was a farmer he spoke as a farmer, he understood as a farmer, he thought as a farmer; but after he was elected he put away his farmer's machine is operated.

When he was a farmer he spoke as a farmer, he understood as a farmer, he thought as a farmer; but after he was elected he put away his farmer's machine is operated.

### UNION STOCK MARKETS TORONTO.

Shippers of live stock to the Union Stock Yards continue to pile up heavy receipts for the opening market of the week. Yesterday's offering totalling upwards of 5,000 cattle, and in addition there were about 1700 head in the yards that were billed through. The offering exceeded the demand, and trade consequently was inclined to be slow, with prices generally a shade lower. Some heavy bulls were wanted for export, and this helped to hold this section of the market steady. Prices for cows also showed little change, but heavy steers and butchers' cattle were easier. Several hundred head were unsold when the market closed.

The weakness in prices was not very pronounced, although in spots a drop of 25c per cwt. was shown. A lot of choice baby beefs were included in the shipments and these met a good trade, most of them bringing from \$2.50 to \$10 per cwt. The top price for a load of butchers was \$3.50 per cwt., and they averaged 960 pounds. Several loads changed hands at \$8.40 per cwt. About a dozen loads of heavy cattle were bought for export, the bulk of which were between \$8.50 and \$8.65, with some as high as \$8.85. The top for cows was \$7, and bulls \$6. Good feeders were in demand, and six loads brought from \$6 to \$6.90, which was about steady with last week.

The supply of calves was not too heavy, and a good steady trade was in evidence. A few extra choice animals sold at \$12 per cwt. with the general top at \$11. Medium quality calves sold from \$7.50 to \$9. The offering of 400 sheep and lambs was largely composed of yearlings and sheep. Sheep held steady at \$8, with yearlings strong from \$12 to \$15.50 per cwt. Spring lambs did not have a very brisk movement, with the best bringing \$15 each, and an odd one \$16.

Hogs held steady at \$13.50 on the fed and watered basis, but for to-day's loading packers are quoting 50c less.

### CAN RUN CAR CHEAPLY

Three hundred miles by an automobile on a gallon of fuel costing five and one-half cents! That is the claim H. H. Elmer, treasurer and general manager of the Globe Malleable Iron and Steel Co. of Syracuse, N. Y., makers for an engine designed for himself, revealed to the directors of the company at its annual meeting here today. Internationally known engineering experts, including Arthur West, chief engineer of the Bethlehem Steel Corporation, have inspected Mr. Elmer's engine and are said to have pronounced it hundreds of years ahead of any built today.

Three full sized models were tested out before the directorate today. One of the models, a one-cylinder, three horsepower engine ran continuously 18 hours on one-quarter pint of fuel the directors stated.

The fuel used is oil, mineral, animal or vegetable. No ignition or arbutator is used. One of Mr. Elmer's models has attained a speed of from 2,500 to 3,000 revolutions a minute, he claims. The principal of his discovery is based on the chemistry of oil according to Dr. Elmer.

**COURT OF REVISION**  
Notice is hereby given that the Mildmay Council will meet as a Court of Revision in Schuett's Hall, Mildmay, on Tuesday, the 23rd day of May, 1922, at 10 a. m., to hear and determine the appeal against the Assessment Roll of the Township of Carrick for the year 1922.

"Always pay as you go," said an old man to his nephew. "But, uncle, suppose I've nothing to pay with?"  
"Then don't go."  
"My Honor, I was not intoxicated."  
"But this officer says you were trying to climb a lamp-post."  
"It was your Honor. A couple of crocodiles had been following me around, and I don't mind telling you they were getting on my nerves."

A contemporary denounces the income tax as a tax on thrift and a hindrance to production. Admitted. Now let us hear what is proposed to take its place. The government would be glad to do away with the income tax altogether, but the war debt and the cost of administration have to be met. Critics of the income tax are wasting time unless they know of something to take its place.

**ASTHMA USE RAZ-MAH**
