## REGINA EXHIBITION IS IN FULL SWING

The Strong Feature is the Big Show of Cattle—Heavy Horses are Good—Local Patronage Off a Little—A Big Breeders' Contest

Under perfect weather conditions which is practically the first provincial fair ever held in Saskatchewan, was formally inaugurated Tuesday afternoon, and, as was fitting, the ceremony was performed by Premier Scott, who was introduced by President Hunter of Regina Industrial and Exhibition Association. The proceedings took place at about half past one from the steps of the main building, and closed with the playing of the national anthem by the city band led by Mr. Laubach, after which the guests, members of the press and directors were entertained to a dainty luncheon by the Ladies' Aid, who have spared no pains to make their booth pretty attractive while the luncheon they provide is admirable. Visitors Welcomed

In his brief opening remarks Mr. Hunter welcomed the premier and visitors to the fair, saying that the aim of the association was two-fold to educate and to entertain, and he thought that in their first attempt they had succeeded very well, as may be seen from a visit to the stables and the ring, where a magnificent collection of animals was to be seen. He traced the growth of the project from one stable a year ago to six stables and the splendid amphitheatre today, a result due to the energy and generosity of two successive city councils and of such enthusiastic supporters

country and encourage those coming in by an annual demonstration of what could be done in Saskatchewan. It was all in the experimental stage and the main object of such an exhibition was to convince those who had weathered the hardships of the pioneer days that their confidence was not misplaced.

### A Different Object

That faith, went on Premier Scott, is now proved, and an exhibition is not needed for that purpose, for all have faith in the present and future of the country. The influence of such an institution must now be entirely educational and if it was not so then its day of usefulness has passed away. All of them were looking forward with great expectations to the developments of the next few years, and in the forward march a very considerable part must be played by the educational system of the province, beginning with the public schools and continuing through the high schools up to the agricultural college and university. Saskatchewan was essentially an agricultural province and the speaker hoped he was not wrong when he said he looked to the development of a complete and complete system of education which should be permeated from top to bottom with agricultural spirit.

Most of them know of the great benefits agriculture has derived from scientific research by experimental farms in the east, and by the universities, particularly those of Wisconsin and Minnesota. That research was putting millions of dollars yearly into the pockets of the farmers. "This province being almost purely agricultural," said Mr. Scott in conclusion, "it seems to me that the time is not very far distant when our people, so largely agricultural, will have to bear their full share in the work of research which is so much more than the science of agriculture."

### HORSES

The premier on declaring the exhibition open was heartily applauded. Although the exhibition is away in advance of any previous show in this province, there is much to be desired with regard to local patronage. Some from the Regina district evidently got cold feet when they heard of so many competitors coming from outside points, for the fair is lacking in what were strong features last year. This particularly refers to a certain class of horses. The judging did not attract much attention yesterday as the classes were not well filled, but the best is yet to come.

In Hackneys there was only one entry, G. M. Annable of Moose Jaw. This is a good animal which was imported last year. He got a first.

There was only one exhibit of French coaches, this being owned also by "Mac." In draft horses there were three entries. The first two were a close fit, Bryce getting first, and A. G. Mutch second. In the agricultural class there were few competitors and the exhibits were only fair. The teams in harness showed up well. Light horses were very poor. The Taber, Bryce and Mutch stables were strong in evidence going through the stalls and Paul Brett and R. Sinton had some fine animals. The best feature of the horse show is the well bred clydesdales, the big winners of the Brandon and Winnipeg fairs.

### CATTLE

Experienced cattlemen declare that the exhibit of cattle at the Regina fair is the best aggregation that ever appeared in a show ring in what used to be the North-West Territories. The shorthorns are particularly strong compared with other years. The judges had their serious moments Tuesday in awarding the winning colors so close was the competition. In

(Continued on page 3.)

## BREEDERS WANT THREE FAIR CIRCUIT

W. H. English Says that Regina, Brandon and Calgary will Attract Cattle Breeders in Future

"I was not at the Winnipeg fair this year," said W. H. English the well known Shorthorn and Yorkshire breeder of Harding, Man., to The West, "but I took in Calgary and Brandon. Winnipeg is not a breeders' exhibition; it is merely a citizens' function." "We," he continued "regard Brandon as the stock centre of Manitoba, and Regina is particularly the centre of Saskatchewan, while Calgary is the stock centre of Alberta. What the breeders like is a circuit including the three points named and if the dates are favorably arranged these exhibitions will be the big stock fairs of western Canada. "Ontario breeders would rather come right into the stock centres such as these points if they have to miss Winnipeg to do it."

Mr. English complimented the Regina fair management on the excellent accommodation provided, for the buildings are certainly up-to-date. The investment by the city must be kept up, however, for the success of the show this year will mean increased patronage next season and the building must continue.

Comment on Mr. English's exhibit will be found elsewhere. He gave his assurance that the fair will have his hearty patronage next year and was pleased to learn that it will be in every respect a provincial exhibition.

## APPALLING ACCIDENT

Pleasure Party Drowned Near Toronto--Seven Young Men Disappear

Toronto, July 26.—An appalling drowning accident which has shocked the entire community occurred last night about midnight, during a sharp thunder storm.

A party of ten young men from the junction left Sunnyside about nine o'clock for a pleasure trip in the gasoline launch Dalvine, a home made craft.

Of the entire party but one is alive this morning, and he is so bruised and dazed with his awful experience that he can tell little of how the accident happened.

George Shields, 19 years old, crawled home early this morning, and told his friends that the launch upset, but how many were lost he did not know. When the search party got to work it was apparent that Shields was the sole survivor and that nine young lives had been snuffed out in the accident.

The following are the victims:  
Joe Irvine, aged 20.  
Walter Dundas, aged 20.  
Frank Kyle, aged 18.  
Glen Daly, aged 18.  
Frank Daly, aged 20.  
Dawson Niehragan, aged 21.  
Rudge Miller, aged 19.  
Gordon, Leecro.

The news quickly spread along the lake shore, and soon half the residents in the immediate vicinity of the Humber, were out on the lake searching for the bodies of the victims.

There was a heavy wind blowing from the northwest and the searching parties were obliged to keep near the shore.

Very few people noticed the party around the Humber last night; it appears that the Irvine boys and their comrades met at the corner of Dundas and Keel streets. It was agreed that two of the party should go down to Humbolt where the Dalvine was moored, and bring her to Sunnyside, where the rest of the party was to meet them. The man in charge of Dalvine's boat house paid no particular attention to the two men who were in the boat. They were going down to Sunnyside to meet a party of friends, and thought that it might be well to take an extra supply of gasoline. At that time it was quite calm on the lake although it looked as though a storm was in sight. "We don't intend to be out very long," said one of the occupants of the boat.

## CONCERNING TERMINALS

Terminal Elevator Question becoming Serious--Farmers May Be Up Against It

The secretary of the Manitoba Grain Growers association writes the following to the press:

"Sir.—Among the many features of the grain trade in which the grain growers of the prairie provinces are concerned, that of the terminal facilities at the lake front stand out prominently. While the storage and clearing facilities were in the hands of the railway companies there was no cause for unrest, as there was no inducement for manipulation. They being carriers of grain could not dispose of any accumulated surplus without causing suspicion, nor would they profit by the disappearance of low grade wheat while passing through their elevators. Of recent years those engaged in the buying of grain at country points have been gradually acquiring terminals, until now practically all those engaged in the handling of grain at initial points control their own terminals at Port William and Port Arthur.

The Elevators  
The Canadian Northern elevator at Port William is leased to the British American elevator company, Ogilvie Milling Co. own their own terminals; stock holders in the Northern, Winnipeg, Dominion and Canadian elevator companies own the Empire Elevator at Port William and some nineteen companies and grain buyers have made a "jackpot" and built the Consolidation at Port William. The C.P.R. elevators are still independent and held by the company, but as nearly all the dealers in Manitoba grain are interested in private terminals it is natural to suppose that they will send no grain to the C.P.R. terminals while there is space in their own. So that the only grain the railway company will get for storage, is that shipped direct by the farmers and farmers elevators, and any farmers' bills of lading the dealers get hold of will be diverted to their own terminals.

Needs Attention  
The weekly report of the visible supply at the lake front of the present year's crop indicates that the diverting of our grain from the railway terminals into those privately owned has reached a stage that needs attention from those most concerned. There is the further danger that if the railway company company will not get a fair share of the grain coming forward for storage they will apply the common business rule—"A business that don't pay must be

changed"—and lease or otherwise dispose of their elevators. Knowing what is reported as is being done at privately owned terminals in other places no grain grower would want that to occur and the best way to prevent it is to always use the storage facilities offered by the railway company.

Storage Charges  
The present system of charging storage also needs attention. No great objection can be raised for the charge of three-quarter cents for cleaning, spouting and fifteen days' storage, but 2 cents for the next thirty days of fraction thereof is unfair to say the least. There is no equity in having to pay as much for storing grain for one day over the fifteen days as for thirty. The only equitable way is to make a charge for services actually rendered, that is to say a fixed charge for every day grain is in store after the first fifteen days. It is to be hoped that the C.P.R. authorities will meet the wishes of the people who are shippers of their produce in this regard.

R. McKENZIE,  
Secretary M.G.G.A.  
Brandon, July 22.

## FARM HANDS ARE WANTED

Canadian Market Well Supplied with Industrial Help--Artisans Won't Go on Land

Winnipeg, July 25.—Although immigrants are arriving in about the same numbers as usual in Winnipeg from the east, the only men for whom work is certain at this time of the year is for those prepared to go and work on farms.

Naturally at this time of the year, and especially will it be the case in a few weeks time, there is a big demand for farm hands through the great west, and many more could be placed on the land if they would only be prepared to take to this form of work.

Unfortunately, however, among the very large number of immigrants, especially those arriving from the old country, are men used to artisan labor and town life, because in the United Kingdom there is always plenty of demand for farm help in the summer months, and the stories of poverty and destitution which are noised abroad refer to industrial workers, whom conditions have driven from employment. These men have spent their time from school days in factories or workshops, and are unwilling to take to the land. They come out here with the expectation that there is the same opportunity

## PERIODICAL TRIBUTE

Canada has to Cough Again to Uncle Sam--Will Soon Have It All

Vancouver, July 25.—A special from Forty Mile mining district states that the American-Canadian International survey party, now running a line from the Yukon river along the 141st meridian has found the former survey by William Ogilvie, ex-governor of the Yukon territory over five hundred feet east from the true course on Davis Creek.

This means that a wedge shaped slice which begins with the thin edge at the Yukon river boundary, the correspondent says, and runs southward several hundred miles making the wedge grow wider, will give Alaska another large slice that has long been regarded as "Canadian territory."

Poker Creek miners claim that many mining claims heretofore regarded as being on the Canadian side when mining licenses, royalties and renewal fees for leases are collected, may now be found to be on the American side, and they will ask the Canadian government for refunds. The boundary line also affects Alaska's new copper fields now being exploited by the Guggenheim Company.

CHEAP LAND DOWN EAST.  
Fredrickton, N.B., July 25.—The provincial government has completed the transfer of fifty thousand acres of land from the New Brunswick railway company. The price which the government is paying is 75 cents an acre, and it will be sold to settlers in one hundred acre lots at that price plus cost of survey and interest. The land is in the Victoria county, and is known as the Blue Bell tract. It is well watered by branches of the Tobique river, and the G.T.P. survey shows that the road will pass through the north end of it.

## THEY MADE EASY MONEY

Big Skin Game Worked on Public--Lindsay is Centre of Gang

Lindsay, July 25.—The town is stirred with another sensation that promises to rival the thrilling incidents of the counterfeit cases. Only a few days have passed since Lindsay was heralded as the centre of the operations of a gang of bogus money makers and passers, and well known citizens were arrested and cast behind iron bars. Right on the heels of the sleuths who ran these men to earth have come others. They are working on another get rich quick scheme, this time for furs, which has been developing for several months into extensive proportions.

Lindsay is looked upon as a centre which game wardens of the province have been working to change the fur bearing animals of the Algonquin park into cold cash.

## PERIODICAL TRIBUTE

Canada has to Cough Again to Uncle Sam--Will Soon Have It All

Vancouver, July 25.—A special from Forty Mile mining district states that the American-Canadian International survey party, now running a line from the Yukon river along the 141st meridian has found the former survey by William Ogilvie, ex-governor of the Yukon territory over five hundred feet east from the true course on Davis Creek.

This means that a wedge shaped slice which begins with the thin edge at the Yukon river boundary, the correspondent says, and runs southward several hundred miles making the wedge grow wider, will give Alaska another large slice that has long been regarded as "Canadian territory."

Poker Creek miners claim that many mining claims heretofore regarded as being on the Canadian side when mining licenses, royalties and renewal fees for leases are collected, may now be found to be on the American side, and they will ask the Canadian government for refunds. The land is in the Victoria county, and is known as the Blue Bell tract. It is well watered by branches of the Tobique river, and the G.T.P. survey shows that the road will pass through the north end of it.

## RICH IN OIL

There is great enthusiasm at Morinville, the present northern terminus of the Canadian Northern line from Edmonton, on account of the already assured success of the boring operations of the American Canadian Oil Co. It is positively declared that the gas that has been tipped at Morinville is genuine oil gas in the same condition and emitting the same odor as the gases found in the great Californian oil fields and the probability is that one of the greatest oil fields in the world has been struck at Morinville.

aged shorthorn bulls there were seven entries, this was a particularly strong class. The noted Spicy Marquis the head of Van Horn's herd taking first money. He is certainly a smooth animal.

Baron, of Carman, Man., got second with his big bull, which weighs 2890 pounds. In the two-year class there were four entries. This was a strong class. English's Marquis of Marigold took first and later got the senior championship. In yearlings, senior, the exhibit was also strong. Baron won first and the same bull won the senior and grand championship. In junior yearlings there were five entries and these were especially good. Baron got first and Van Horne second. The former had outstanding winners but Brett and Caswell showed up well. In aged cows, 3 years and over there were thirteen entries. Paul Brett's animal took fifth place, beating Baron, but as the cows were supposed to be in breeding condition the winners owned by Van Horne and English, in the order given, are carrying useless fat which really puts them out of the breeding class.

At the stables the Regina dairy heads owned by J. C. Pope and R. Sinton are a strong feature. Visitors from outside points never fail to throw bouquets at the home herd of Ayershires and Herfords. Col. McCrae of Guelph, has a fine herd of Galloways which invite praise from every visitor. J. E. and R. W. Casswell of Saskatoon are strong in Shorthorns.

PIGS

The Yorkshire pigs are a strong exhibit. E. Meadows did well with his entry, taking first. English took the premier honor, and Mr. Colton our local breeder, got second in the same class. He also has a fine exhibit of Leicester and Grade sheep.

We have only referred in a general way to these features of the fair. The story will be told in detail by the list of winners. Taken altogether the exhibition is of a provincial character that is encouraging, but the local patronage is not what it was last year in some respects. However the visitors cannot fail to note that for high grade horses of the heavy class there was not much else to be desired, and the cattle are all round a very fine exhibit.

POULTRY

The exhibits of poultry is rather poor, but some of the classes were well filled up.

In the dairy building there were some very fine exhibits, but this part of the fair can stand very much improvement. The vegetables are small owing to the late season, but there is a good display of small fruit. The grasses and grain in sheep is very good.

Main Building

The main exhibition building has a very different appearance from last

year, the exhibits being principally from outside the province, many eastern houses having a nice display. The great need for more space is evident as several concerns cannot be accommodated.

On entering this building the first exhibit to the right is that of Victoria, which has a very fine display of fruit of many varieties. The British Columbia government has no exhibit this year, but the coast province's fruit growing resources are well represented. Booklets are handed out to visitors.

Fronting the Victoria exhibit is the display of the Singer Sewing Machine Co. This comprises an elaborate show prominent among which is the tent, awning and carpet making machines. Samples of the most beautiful art work hang in profusion and is very much admired by the ladies. This work is done in silk and pictures are worked out very true to life. Around the booth are streamers, one of which bears the injunction—"Buy a Singer, and be always sure of repairs."

The Saskatchewan Piano and Organ Co. have a nice display of instruments. Their goods are the Bell and English, in the order given, are carrying useless fat which really puts them out of the breeding class.

The Petrie Mfg. Co. had a display of cream separators.

One of the most interesting personalities around the main building is W. E. Plumertel, publicity commissioner for Vancouver, who occupies a booth and distributes literature pertaining to the industrial coast city. He is a walking encyclopedia and is already on the most friendly terms with many fair visitors.

A most inviting appeal is made by the array of pianos shown by Mason & Risch in the main building. It is an extensive exhibit occupying considerable floor space. The instruments are therefore shown to the best advantage, and among the makes represented are the Mason & Risch, Dominion, and the Aeolian line of New York, consisting of metronome Pianola Pianos. The Weber Pianola Piano is fitted with the metronome attachment, and by its aid the demonstrator shows how anyone can play with the touch of an artiste the most difficult musical compositions. The Mason & Risch pianos are of course the prominent feature of the exhibit. They are instruments whose perfect mechanism and beautiful tone have been testified to by such eminent musicians as Sir Alexander MacKenzie, Sir Frederick Bridge, Dr. F. H. Torrington, and Frank S. Welsman.

The success of the firm is explained in the following sentence: "It was only brought about by years and years of patient effort, conscientious workmanship, and a scientific study of the acoustic and artistic principles which govern correct piano construction."

A beautiful miniature Grand is a striking feature of the exhibit and it has been admired by all who have

seen in. The Mason & Risch Co., operate their own stores in all the principal cities in the west, and sell their pianos direct from the factory to the customer, thereby giving absolute satisfaction and protection to every purchaser. From Factory to Home is the motto of the company which should appeal to every piano purchaser. The benefit is clearly evident by the number of pianos sold by this enterprising firm, from their beautiful store on Scarth street.

Mr. N. S. Edgar, the local manager, is in charge of the exhibit demonstrating the special features of the different instruments in the stand.

The Davis sewing machine exhibit consisted of seven different grades. A nice specialty is the cabinet in quarter cut oak. This comprises a lady's secretary as well. This display took a diploma at Edmonton.

The New Williams Pianos occupy the same space as last year and they comprise a very fine exhibit.

The cosy corner of the building is the exhibit of Wright Bros., who have a beautiful line of furniture in walnut, richly upholstered. This display is freely commented on by visitors.

J. C. Stokes has on view a nice line of goods, consisting of maties, fire places, church pews, show cases, the silent salesman, Walker bins, and other stove fixtures.

Summers & Kelly have a corner devoted to their plumbing fixtures, and when it is considered that the electric light fixtures for the whole fair grounds is their work, they must give credit for a big feature display.

The largest and most costly exhibit is that of the Regina Trading Co. consisting almost entirely of furs goods. This is where the ladies congregate as the latest things in winter goods are shown here and the display is well arranged. The prominent features are ladies' fur lined coats with new fancy shells of English broadcloth. They have two and three striped nicked collars which fit the face perfectly. The colors are garnet, black, brown, green and fawn.

The regular lengths are from forty to 52 inches with North Shore muskrat, natural color lining. There is also a nice line of ladies' black Persian lambs trimmed with mink, brevere colors and Russian blouse effects. There is also river mink blended in the same style. The auto is in from forty to sixty inch lengths. The colors are made to meet over the face. In ruffs and collarettes there are many varieties, from the one skin muffs to the sixty-inch collarette. They are in natural colors with muffs to match in all shapes and styles. In white fox there is a full cushion muffs with two skin collarette. There is a nice Baum collarette, two skins and sable muffs to match, also the Isabel fox muffs. The grey Persian lambs with collarettes and gantlets to match are the same sets in Glasgow sable. In men's coats the richest thing is the Ohio valley silk cown with mitts to match. There are many varieties of men's fur lined coats in all grades, has been admired by all who have

owned by the sisters of the Regina Hospital will not fail to catch the eye of the visitors. It will be disposed of by lottery. It is very costly being all hand made.

Although a somewhat sombre display, yet something which catches the public eye is the exhibit of the Granite and Marble Works owned by F. Sack & Co. of this city. They have a round design in grey granite standing over nine feet high, shaft sixteen inches in diameter. There are also designs in red Scotch granite and Vermont marble, and artistic crosses of Bedford limestone. They have a fine assortment of monumental work.

Before going upstairs we notice the Newcombe pianos and Dorothy organs, and also a very fine display of bindery work by the Regina Leader.

THE SECOND FLOOR

On the second floor of the exhibition building to the right is a nice display of special in fine arts. The pen work by John Bruner is particularly good. In ladies work the exhibit is not large, but in quantity cannot be surpassed. The flower display by Lieut. Gov. Forger is well worth a visit. It is a special feature.

Side it is the exhibit from the Industrial school. This is far ahead of any thing heretofore displayed by the native children. The hand made furniture shows that in cabinet making their product is well worth inspection. They have also beaded work, grain and vegetables.

Bakers Cocoa and chocolate was displayed and demonstrated, also Tetter's teas.

The strong feature of this floor is by all odds the Kootenay Valley fur display consisting of the varied products of that rich country. The fur is beautiful in all varieties and all the stages of growth. They have trout, mineral, grasses, furs. This exhibit is from Nelson and the fur is all this year's growth. The mineral specimens are very attractive one being from the first mine owned in the country. There is an excellent specimen of mountain goat and the head of a mountain sheep. Visitors will profit in knowledge by a visit to this part of the building.

Pettingell and Van Valkenburg have a fine display of school furniture and other supplies. With the organization of so many new school districts this year they should receive many interested visitors.

One of the largest booths in the main building was occupied by the Regina Typewriter Exchange. They have on exhibit a large line of desks, new and second hand typewriters and a complete line of Columbia graphophones and talking machines. The booth was decorated with royal purple bunting and Canadian and American flags.

JUDGING

CLYDESDALES

Judging took place this morning on Clydesdale horses and cart being made on females with good mares, colt at

foot, just as an adornment was made for lunch. As was anticipated the showing surpassed anything ever before seen in Saskatchewan ring, which goes to show that the farmers of this province are taking more and more keen interest in improving the quality of their horses, and the Clydesdale is undoubtedly the coming type. It is a noticeable fact that all today's winners were imported, and men like Bryce of Arcola, Brett and Horn of Regina, Brooks of Cottonwood, Mutch Bros., of Lumsden and Taber of Condie, sparing neither money or brains in establishing breeding studs such as must be a very real benefit to the farming community at large. Perhaps the most promising colt to make its first appearance in a Saskatchewan ring was the two-year-old imported by Bryce, a grand, upstanding youngster that might well figure in the three year old class, and who should develop into a champion of rare quality. He will doubtless be heard from when the championships are awarded tomorrow morning.

By Classes

For aged stallions, P. J. Brett, Regina took first with his fine imported animal Baron, Kerr, who took first place here as a three year old last year, representing the bluest of blue Clydesdale blood, tracing back directly through Baron's Pride, Prince Cedric and Macgregor to Belted Knight. Baron's Scotland, owned by Archie McCrae, Regina, was second.

Three year olds brought out a half dozen typical Clydes, and the contest was exceedingly close between first and second, the red ribbon being finally awarded to Sir William Van Horne's Lord Ardwell, A. and G. Mutch getting second with Stopped, this confirming the Winnipeg ruling. The Judges, Tully Elder of Brandon and Bryce Wright of De Winton, Alberta, failed to reach a decision and after an hour's deadlock, Dr. Tolmie was called in to decide between them. Though showing a remarkably good imported one, T. Bryce's of Cottonwood could get no better than third.

Four competed in the two year old class, but Bryce of Arcola easily led with the magnificent colt referred to above, though Brett scored a very creditable second with Vulcan's Best, bred by owner.

Peter Horn was awarded first in the yearling class for a promising colt.

Standard Breed

Thomas Battell of Moose Jaw earned a red ribbon in the standard breed class with the black stallion Hartwood, by Woodford Wilkes.

RACES

2.15 trot or pace. Edelman, T. E. Battell, Moose Jaw, won this race in three straight heats; Mattie Weaver second, Samuel T., third; Samuel L. fourth. Star lady, Glendor Subscription also ran. Best time 2:18.4. Running dash seven furlongs—1 Roy, G. McMullan, Winnipeg, 2 Er-

mack, S. D. Howell, Strathcona, 4. Chief Alberta, Time 1:34.4. Boy's pony race, had six entries. Vanguard owned by R. Robinson of Broadview; second Full Cry, H. C. Lawson, Regina; third Lightfoot, Youngren & Noonan, Regina. Wild Hetty, Little Cora also ran. Best time 56.

MURDER AT SASKATOON

One Galician Shoots Another—Motive was Unfaithfulness of Wife

Saskatoon, July 29.—Metro Sharope, a quiet, intelligent looking Galician of thirty years or older, gave himself over to the police early this morning with the simple statement, "I killed him." The man whom Sharope had killed, Mechalchuk, also a Galician, was lying at the time unconscious on the floor of a room used as a kitchen in Mechalchuk's cottage on Avenue B, almost directly opposite the Canadian Northern round-house.

The shooting occurred shortly after seven o'clock, and the cause of it, all the prisoner's only asserts, was his young wife's unfaithfulness. The latter too has been placed under arrest, but more as a guarantee that she will be found when wanted to give evidence than for complicity in the crime.

Mechalchuk was taken to St. Paul's hospital where he lay all day in a critical condition. He was shot in the right side of the head by a ball from a thirty-eight calibre revolver. A broad brimmed hat of the cowboy variety with a cruel little hole through the band and covered with ugly blood stains is now in possession of Chief Dunning, who has charge of the investigation. There is also a revolver with three empty shells for evidently three shots were fired in Mechalchuk's house. On the floor of the kitchen are great congealed clots of blood where Chief Dunning found the man about fifteen minutes after the tragedy.

Mechalchuk lives in a three roomed shack. He is unmarried and foreman of the C.N.R. section gang and is scarcely thirty years of age. Immediately north of the house is the Sharope home, a building somewhat larger and all the outward appearance of a thrift. A well kept potatoe patch runs along side the house and between the potatoe patch and Mechalchuk's house is a barbed wire fence. Sharope was a member of Mechalchuk's gang on the railroad and both he and his boss went to work this morning at seven. It would seem from the prisoner's straightforward story and from evidence picked up that Mechalchuk, when he got the men to work started back in the direction of his home. Sharope had evidently been suspecting that things were not right for he also started for home immedi-

ately afterwards. From the results of the investigation it seems clear that Sharope first went to his own home and not finding his wife there started across the garden to Mechalchuk's shack. So freshly is the garden kept that the tracks were plainly visible. These footprints lead up to the centre window of the foreman's house, that of the bedroom. The blind was drawn down almost all the way. Sharope peered through and then climbed over the fence and went around to the back door.

Sharope declares that when he entered the house a struggle ensued between himself and Mechalchuk, by whom precipitated he does not say, but he says his hand was bitten by the younger man in the fight. Sharope then drew the revolver he afterwards gave up, and the first shot he fired evidently missed, for it is shown where the ball passed through the door that separates kitchen and bedroom, and from the angle at which the bullet struck it is clear that Sharope was in the bedroom when the shot was fired. The ball struck some clothing hanging behind the door. Chief Dunning found the leaden pellet lying on top of a telescope valve immediately underneath clothing which might easily stop the further flight of the missile. Another hole was found in the wall on the upper edge of the base-board in the kitchen and it is supposed that the fight was continued out there, while the third is accounted for by the hole in Mechalchuk's head.

When he felt that it was all over Sharope went down street to Merry's boarding house and told Merry of the affair. The latter ran over to Ed. Jordan's house a half block away and telephoned the police, coroner and Dr. McKay. When Chief Dunning came along a few minutes later and was looking for his man Sharope walked up to him and gave himself up. He was taken to the city police station and locked up. In the meantime Mechalchuk was taken to the hospital, and the woman had disappeared. A couple of hours after the shooting and while the police were formally examining the scene of the crime, a frightened and excited looking young woman, scarcely over twenty years and rather good looking appeared on the scene. "You want me?" she asked the officers. She was Mrs. Sharope, and was told by the chief that she was wanted and to get herself ready to go to the police station which she quickly did. In reply to a few questions Mrs. Sharope said that she was at the front of Mechalchuk's house when the shooting happened, and declared that she had not been a witness of it. She had evidently run out at the front door while the men fought at the back.

The case has been remanded until tomorrow at 3 o'clock. The postponement of the preliminary hearing was made on the request of Chief Dunning who said that the condition of the victim was such that the charge laid, that of attempted murder, would very likely be changed to one of murder.

Side Lights on Autonomy Act

Too much importance has been attached to the one side of the decision recently given by Judge Newlands respecting the right of a school district to recover arrears of taxes from a subsequent occupant of a homestead, the taxes having accrued against his predecessor.

The real importance in this decision is the weakness of our provincial position with regard to lands the title of which is vested in the Crown in the right of the Dominion.

It is palpable that Dominion lands cannot be taxed. While we were under Territorial law it became necessary to organise the country for school and local improvement purposes and at the time the local improvement ordinance was passed it was found that in the assessment of districts for taxation only patented lands were included, organisation would be utterly impossible, so small was the proportion of patented land compared with the unpatented.

Section 50 of the Local Improvements Act, which is Territorial law reaffirmed by provincial enactment, says with respect to assessment:

The council may cause to be levied in each year for the general purposes of the district a tax not less than one and one-quarter cents and not more than five cents per acre upon every owner or occupant in the district for land owned or occupied by him.

Thus it is seen that, as we have said, the "owner" or "occupant" and not the land is taxed. Under the heading of interpretation we find:

"Owner," any person who has any right, title, or estate whatsoever or any interest other than that of a mere occupant in any land.

"Occupant," includes the inhabitant occupier of any land, or if there be no inhabitant occupier the person entitled to the possession thereof and the leaseholder or holder under agreement for sale and any person having or enjoying in any way or for any purpose whatsoever the use of the land.

pointed and the recurring difficulty referred to impresses upon us the weakness of our provincial position. Instead of dealing with this matter ourselves we have to go again on our knees to Ottawa and beseech of them to assist us when we should be able to help ourselves.

It should be possible for a district to realise some time on arrears of taxes such as the case referred to, and the subsequent occupant of the land should pay it into the district the same as he is liable for the improvements if there are any, and he has to pay for those to the Dominion government. This matter is seriously engaging the attention of the local improvement districts but they can get a remedy only from one source at present, but if we ever get possession of our domain the province can adjust this matter very easily and speedily.

Then there is the question of the school lands. The Dominion has been holding school land sales and a great many farms have been disposed of throughout the country on terms that will leave the title of the land vested in the crown for a long time to come. The occupants of such lands are in the same position as homesteaders with respect to taxation, and the school and local improvement districts cannot charge up arrears of taxes against the land or against the subsequent occupants. So it is seen that the whole question of the right to our lands for the successful administration of the country is opened up to view by these side lights, such as we have referred to.

Another phase of this question is one which will appeal very strongly to the wage earners. The Mechanics' Lien Act is provincial legislation to protect the workman against loss, yet if a carpenter, stonemason or bricklayer has no protection under this act when he is doing work on a building situated on land the title of which is vested in the Dominion government, whether it be homestead or school land. This is something for the workmen to consider when the question of the ownership of our public domain comes up for discussion.

From whichever point of view this land question is discussed we are continually confronted with obstacles which owing to the autonomy settlement prevent the proper administration of our local affairs. These difficulties do not arise either in British Columbia, Quebec or Ontario, and why should we be in an inferior position to the citizens of the sister provinces?

Destroy The Weeds

One of the eye-sores at the exhibition grounds is the large patches of French weed which is so prevalent ground the race track especially. The grounds in many places have the appearance of an experimental weed farm. There is enough French weed sown at the fair grounds to seed down the whole adjoining country.

We realise that the city is doing much for the agricultural interests in providing the exhibition accommodation but the weed question and it will soon have to be handled by extreme measures. The weeds around the track have been cut but they had matured and the seed had been left on the ground to propagate, and how tenacious of life the French weed is, farmers know to their sorrow.

The time has come for the city to place a man in charge of the grounds the year round and this is the only effective way to cope with the conditions prevailing, both with regard to tree planting, the care of the city's building investment and the weed problem.

EDITORIAL NOTES

It is bad enough to charge high water rates, but evidently Winnipeg does more than that according to the following comment from the Tribune: "Joseph Kerr, the well known city undertaker has had an experience

with city waterworks owing to a leak in the water service. Mr. Kerr is owner of a small store on Adelaide street, and it is claimed that the plumbing leaked. The city has billed Mr. Kerr with \$132 for excess water, and it is expected, unless he can compromise with the city, that the bill will have to be paid. The service was metered.

An extract from a recent letter received by James Brown of the educational department here, from the Duke of Argyle, has gone the rounds of the Canadian press and has apparently been subjected to many interpretations. Commenting on the quotation the Victoria Colonist says: "We have before us a paragraph headed 'Duke of Argyle fears conscription.' What the duke says in his letter, which was printed under this heading, is: 'If the civil education will make war training among Canadian and British youths a part of education we need not fear conscription.' If we understand the English language, the Duke is expressing his opinion that a certain course will prevent conscription, but he does not say that conscription will come if such a course is not taken. If a man should say that a certain fire extinguisher would enable you to save your house, if it was on fire, you would hardly conclude that he thought you were going to set your house on fire.

Three weeks ago we published an article stating that the lands department of the C.P.R. had notified the secretary of the Heward school district that they would not pay taxes to the district for lands assessed. Since then the secretary has received correspondence stating that the taxes would be forthcoming as they were in error regarding the matter. We are pleased to note that the company have signified their intention to pay without further trouble. The loss of that company's taxes according to assessment, would have made a deficiency in the school funds which, if they were successful in their contention that the lands were not assessable, would have had to be borne by the other rate payers of the district, thus raising the rate of assessment. And had the school board been compelled to take the matter up in the courts, as there is no doubt the ratepayers of the district would have insisted upon, there would have been considerable expense for both parties to the suit. An amicable settlement of the matter will be gladly received by our citizens.—Heward Chronicle.

PRESS COMMENTS

(Victoria Colonist) The "better terms" act as passed does not contain the words "final and unalterable" in the body of the statute, but they are in the resolutions of the Canadian parliament, which are appended to it as a schedule. The act takes effect from July 1st, so that the "provisional" amounts from that date. The inclusion of the resolution and the omission of the words "final and unalterable" from the act itself make an apparent contradiction. How the courts would construe such legislation, as affecting all individuals is quite immaterial. As between the province and the Dominion the case stands thus: The Dominion parliament asked the Imperial parliament to make a certain arrangement final and unalterable, and the latter body did not do so, although it recited the request in a schedule to the act. This state of things taken in connection with the statements in the house of commons; by the spokesmen of the government, show that the door for the further presentation of provincial claims is wide open.

(Toronto Telegram) Canada is staggered by the magnitude of the proposal to vote Lord Cromer \$250,000 as a reward for his services to the empire of Egypt.

Britain is the home of the only democracy on earth that will pay generously for public service. To pile a public grant of a quarter of a million on top of long years service at \$32,500 per annum is an enormity that would be classified as graft in the bright lexicon of Canada. A typical Canadian placement with the opportunities that followed Lord Cromer's unchecked supremacy in Egypt, might have heaped up treasures on earth to such an extent that he could dispense with \$250,000 grants from a grateful country.

At all events typical Canadian placements in the occupation of positions far inferior in power and opportunity to that of Lord Cromer in Egypt have been able to do so well for themselves that the country had no need to do anything for them. Canada would leave a man in a position like Lord Cromer with no other reward than the fame of his high-handed integrity and the approval of his good conscience.

Britain supplements these moral and intellectual rewards with substantial recognitions in the form of titles that kept British interests intact, and the integrity which kept British honor unscathed throughout the long years of Cromer's consulship in Egypt.

SUNSHINE FURNACE BURNS COAL OR WOOD

The Sunshine is a good, "all round" furnace. Burns with equal facility, either coal or wood. Cokes, too, if you prefer it. And so perfect is the combustion of the Sunshine that it extracts every unit of heat from the fuel. What's left in the ash-pan is not worth sifting. Sunshine consumes less fuel, too. Because its perfect system of dampers prevent the escape of the hot air up the chimney—compels it to come out through the registers.

JAPS OVER RUN COAST PROVINCE

Great Alarm Expressed in British Columbia Owing to Threatened Yellow Peril

Vancouver, July 25.—Twelve hundred Japanese from Honolulu arrived in Vancouver today, on board the steamer "Kumeric." The Arthur, Sustuma Moreyama, Japanese agent, calmly admits that there is an organisation behind the Japanese immigration movement. He says the headquarters are in Honolulu, and declares that the Japanese are 'free men and will be brought here until the head tax is imposed. Fully one-fourth of the seventy-five thousand Japanese in the Hawaiian Islands intend to come here.

The Modesty of Women Naturally makes them shrink from the delicate questions, the obnoxious examinations and unpleasant local treatment, which some physicians consider essential in the treatment of diseases of women. Yes, if help can be had, it is better to submit to this ordeal than let the disease grow and spread. The trouble is that so often the woman undergoes all the annoyance and shame for nothing. Thousands of women who have been cured by Dr. Pierce's Favorite Prescription write in appreciation of the cure which dispenses with the examinations and local treatments. There is no other medicine so sure and safe for delicate women as "Favorite Prescription." It cures debilitated drains, irregularity and female weakness. It always helps. It almost always cures. It is strictly non-alcoholic, non-secret, all its ingredients being printed on the bottle wrapper; contains no deleterious or habit-forming drugs, and every native medicinal root entering into its composition has the full endorsement of those most eminent in the several schools of medical practice. Some of these numerous and strongest of professional endorsements of its ingredients, will be found in a pamphlet wrapped around the bottle, also in a booklet mailed free on request, by Dr. R. V. Pierce, of Buffalo, N. Y. These professional endorsements should have far more weight than any amount of ordinary lay, or non-professional testimonials.

The most intelligent woman now-a-days must know what they take as medicine instead of opening their mouths like a lot of young birds and gulping down what is called a "Dose." "Favorite Prescription" is a fact every woman should know. It makes weak women strong and sick women well. Dr. Pierce's Medical Adviser is sent free on receipt of stamps to pay expense of mailing only. Send to Dr. R. V. Pierce, Buffalo, N. Y. 21 one-cent stamps for paper-covered, or 50 stamps for cloth-bound. It will come to the Doctor, free of charge by letter. All such communications are held strictly confidential.

Dr. Pierce's Pleasant Pellets invigorate and regulate stomach, liver and bowels.

OLIVER IS INVESTIGATING

Minister Comes West to Go Through B.C. Looking over Government Land

Winnipeg, July 25.—Hon. Frank Oliver was in the city last evening on a tour through British Columbia. He was met here by prominent Liberals.

"My visit west is for information," said Mr. Oliver, in an interview. "I want to find out all I can regarding the conditions surrounding the strip of land, twenty miles on each side of the C.P.R. through British Columbia."

Clashing Interests.—"This land has been considered for some time as of little value, but now people are wanting it, and there are various clashing interests. The same rule can't be applied to this forty mile strip of land as to the prairie lands which the government granted to the C.P.R. This strip extends from the eastern boundary of British Columbia to within a few miles of the Pacific coast. The C.P.R. had the right to take possession of this land but neglected to do so, and so the people of B.C. gave it to the Dominion government in return for the benefits which were conferred on them by the C.P.R. connecting them with the east."

His States Trip.—Mr. Oliver then spoke of his recent trip through a large number of the American states, in which he looked into several matters pertaining to the immigration question, and found out how several questions had been solved by our friends across the line which Canada will have to meet in the near future. One of the most important of these has to do with the restriction of the flow of immigration into the country.

"As you may know," he continued, "I recently made a rather extensive trip through the States, and visited our agents in many cities. At present we have agents stationed at Boston, Syracuse, Pittsburg, Indianapolis, Toledo, Detroit, Chicago, Kansas City, Omaha, St. Paul, Waterton Grand Forks, Great Falls and Spokane. Of these I visited Boston, Indianapolis, Detroit, Kansas City and Omaha."

"Canada has an agent at New York also to turn back all immigrants destined for Canada whom it is believed would be undesirable. He co-operates with the American authorities just the same as our agent at Quebec, who is stationed there for a similar purpose. I found out from our agent at Ellis Island that things were progressing very smoothly."

"In Washington I met the Hon. Oscar Straus, who is at the head of immigration affairs in the States. He advised that Canada should not adopt the stringent rules for the exclusion of immigrants that the United States has done, but on the contrary, that we should permit an open door policy to prevail on account of the vastness of our unoccupied territory and the small population which we have at present."

"Notwithstanding the congestion in New York city and vicinity, caused by the constant stream of new comers, there is a great demand in the southern states for European labor. In fact the demands from seven bureaus for the equitable distribution of immigrants have already been established at Charleston, Galveston and New Orleans."

"We have had considerable success for several years past in getting men to emigrate from Canada to the further western States, and this stream is still flowing in our direction, although in volume it has been diminished this year. There are three reasons for this. The first reason is the unwonted severity of the winter just passed which has scared a considerable number of people away who would otherwise have flocked northward. This year the seeding in several of the states was nearly six weeks ahead of that of Canada, and the people cannot be convinced that this is not the normal state of affairs."

that has put an end to our excursion to the Canadian west. "So you see that we are getting hit all round, and it is most creditable that we are holding our own as well as we are with the three-fold cause hindering us. But I consider prospects most encouraging, and am very well satisfied with the outlook."

THE FEDERAL SITUATION

(Toronto News.) At the meetings which Mr. Borden will address throughout the country the issues which the Opposition will urge upon the people at the next general election will be developed. There seems to be no reason to doubt that there will be another session of parliament before dissolution. Sir Wilfrid Laurier gave his word to this effect, and his pledge will be respected. It is difficult now to say what are the prospects of the Opposition. Mr. Borden has to deal with a radical wing in his own party, which demands a program more advanced than many Conservatives will accept. If this wing throws itself with energy into the contest the outlook will be improved. If it is halting or hostile the Government necessarily will profit by the dis-union among its opponents.

It must be remembered that the traditions of the Conservative party of Canada are very like those of the Conservative party of Great Britain. Its strength has been with the solid financial and commercial interests of the country. It has been the champion of established institutions. It has been inhospitable to radical ideas and revolutionary programs. Protection, a second chamber, railway aid, and private control of industry and transportation are the natural features of a Conservative program. But Sir Wilfrid Laurier has adopted the ancient Conservative policy, and now practically occupies the same old platform as Sir John A. Macdonald. For the moment the radical spirit is extinct in the Liberal party, and in order to find substantial grounds of difference with the Government, Mr. Borden must recreate his party and develop a radical program.

There is his danger from the standpoint of party unity and party success. In Canada we have few great centres of population, few great hives of labor, neither much wealth or much poverty, nor much unrest, and therefore radicalism has not the material to feed upon which exists in such abundant measures in old world countries, and even in some American communities. Moreover the country is passing through a time of amazing prosperity and development, and in all the history of this continent teaches that under such circumstances governments are seldom defeated. In seasons of prosperity, wastefulness, extravagance, and inefficiency are tolerated in government. They are likely to endow ministers with virtues which they do not possess, and to confer the blessings of Providence with the acts of government. The "full dinner pail" has the ring of cant and humbug, but it gets votes. So a strong, efficient and vigorous government may go down in a time of depression for causes which it cannot control, and for acts of sound and prudent statesmanship. Industrially, therefore, the time is unfavorable to Mr. Borden and the temper of his party is likewise unfavorable to a radical program.

There is reason to think also that the government may declare for the construction of the Georgian Bay canal and the Hudson Bay railway, as well as for the organization and establishment of a fast Atlantic steamship service. It is known that the Canadian Northern Railway desires to extend to Hudson Bay, and if its far-sighted managers can affect an understanding with the government, both the Canadian Northern and Grand Trunk Pacific will be in practical alliance with Ministers for the next election. No doubt the Canadian Pacific will continue its traditional sympathy with the Conservative party, but its power in the west is not so great as of old. It has powerful rivals, there is a larger population and the government controls enormous patronage in western Canada. Furthermore Sir Wilfrid Laurier is a skilled politician and it is likely that his government will be strengthened before the election. Besides men easily revolt against a campaign of personal scandal.

There is no reason why Mr. Borden should oppose the constructive policy of the government. It is of the genius of the Conservative party to favor large plans of national development. The national spirit of the party is robust and confident. Possibly Mr. Borden will do well to maintain that spirit in Opposition as it was maintained for a generation in office. If anything the "All Red Line" is of Conservative origin and in general breadth and national outlook the Conservative leaders have nothing to learn from the Liberal ministers.

In civil service reform, in senate reform, in state telegraphs and state telephone, in resolute criticism of wasteful expenditure, in vigilant scrutiny of the acts of the administration, and its management of the public resources Mr. Borden has material for a progressive program and an aggressive campaign. It remains to be seen if he is equal to his task. If he cannot unite the radical and conservative wings of his party, if he has genius to find men in the constituencies that will strengthen the front benches, if he can set mediocrity aside, and revive national enthusiasm for the party which he commands. Furthermore he does not know what is in the minds of the people, what is the real temper of the country, and what sentiment will appear as the election approaches. This much is certain that wherever Mr. Borden goes he will command respect and confidence, and that at the worst the Conservative party of Canada is a formidable fighting machine, instinct with patriotism and rich in worthy traditions and honorable achievements.

Free, for Catarrh, just to prove merit, a trial size box of Dr. Shoop's Catarrh Remedy. Let me send it now. It is a snow white creamy, healing antiseptic balm. Containing such healing ingredients as Oil Eucalyptus, Thymol, Menthol, etc., it gives instant and lasting relief to catarrh of nose and throat. Make the free test and see for yourself what this preparation can and will accomplish. Address Dr. Shoop, Racine, Wis. Large jars 50c. Sold by the Regina Pharmacy Stores.

HAYWOOD NOT GUILTY

Boise, Idaho, July 28.—At two o'clock on Sunday morning the jury in the famous Haywood murder case returned a verdict of not guilty, acquitting William D. Haywood, secretary treasurer of the Western Federation of Miners, of the charge of murdering Frank Steenberg, the former governor of the State. Two hours later Haywood was discharged by Judge Wood. After deliberating from three o'clock on Sunday afternoon until early this morning, the jury filed into the court room, and after the usual questions put by the judge, the foreman handed the following verdict in an envelope to the judge: "We, the jury in the above entitled case, find the defendant, William D. Haywood, not guilty."

The court room was immediately the scene of intense animation. The attorneys for the defense jumped to their feet and slapped Haywood on the back and all tried to grasp his hands at once. On the first ballot the vote stood eight for acquittal and four for guilty. After a time two of those favoring a verdict of guilty went over to the majority but the other two held their views. The deadlock lasted nearly all night. The ballot was taken at frequent intervals, but it was not till after daylight this morning that the two for guilty gave way making the return of a unanimous verdict possible.

JUDGE GETS EYE-OPENER

American System Far Behind the English for Speedy Trial. London, July 26.—Justice Vernon M. Davis, of the New York supreme court, who is sitting on the bench yesterday beside Mr. Justice Darling in the central court saw swift justice dealt out to "Chicago May" Churchill and John Smith, for the attempted murder of Edward Guerin of Devil's Island fame. Asked his opinion of such expeditious justice, he said: "I have been profoundly impressed with everything I have seen. The trial was conducted admirably, the cross-examinations were exceedingly fine, and the lawyers showed an excellent spirit."

HOME RULE FOR PROTECTION

Winnipeg, July 28.—J. Kier Hardie leader of the Labor party in the British House of Commons, arrived in the city today. He will be in town all day and tomorrow leaves on the Pacific express for Calgary. Discussing the general political situation in the old country, Mr. Hardie was emphatic in expressing his views that an Irish parliament was the only solution to the Irish question. "Irish people," he declared "would have accepted Mr. Birrell's bill if it had been more logical and hedged with less restrictions and vetoes." He added that he would not be surprised to see the Tories offer a home rule scheme in return for Irish support of protection.

A striking phase of the political situation at home, in Mr. Hardie's view, was the women's suffrage movement. "I think," he said, "that the government will introduce franchise reform. The women's suffrage movement has come to the front, thanks to the militant tactics adopted, and if such a bill is introduced it will include women's suffrage."

VICTORIA BADLY SCORCHED

Victoria, B.C., July 23.—After doing a quarter of a million dollars worth of damage the blaze has been practically extinguished. Sixty houses in all were burned. The Calvary Baptist church, the old Indian Methodist Mission, and St. John's church were consumed by the big fire, which swept the water front of Victoria yesterday. A row of ten houses on Douglas street, which had been clean, the fire burned most miserably though it did not burn continuously, jumping certain places. One woman temporarily crazed attempted to jump into the flames, but this was the nearest approach to a fatality. The electric power wires burned early in the fire, and the entire city was afflicted, newspapers, presses and laundries alike went temporarily out of business.

FIG BAR

Is one of the most delicious cakes for the table, manufactured. It contains nothing but selected figs and our special sweet cake ingredients. The flour used is "Alberta grown," therefore when you use A.B.C. FIG BARS you are surely supporting the farmer of the West and sending your money back to the soil. Fig Bar is sold by all good grocers. If your grocer will not supply you write to the factory for a package at our expense—give grocer's name. DEPT. 347 ALBERTA BISCUIT CO., LTD. CALGARY, ALTA.

case, twenty-one much improved, and twenty-five "improved." Of these cases 113 are at work, nineteen are not at work, while twenty-three have failed and one only is known to have died.

Everywhere throughout the grounds the patients are at work; the women are gardening, cutting the grass etc., the men, some of them at their various trades under sheds, and others in building a concrete reservoir and casing firewood, etc. Among the work accomplished by the patients since the opening of the sanitarium may be mentioned the excavating of the walls of the reservoir and mixing and laying about six hundred tons of concrete, making paths, and laying concrete walks, building a subway between two of the buildings, and cutting into firewood about one hundred trees.

LOOKS GOOD TO VAN METRE

Crops Well Advanced on North Line—Will go to Peace River. The well known land man from Tip-top, Iowa, E. Van Metre, was in the city Thursday last having been up north with several homeseekers. He had been in town since his last visit here. Mr. Van Metre says that the crops are very promising along the C.N.R. branch. He will go to the Peace River country to look around this fall, a friend of his having a controlling interest in a big company that received valuable concessions from the Dominion government. The land referred to was originally given to the Jesuits in Montreal, and included in a tract of land twenty-four miles square, sixty miles southeast of Dunvegan, on the Peace River. The land was given on the understanding that the even numbered sections should belong to the government and be thrown open for homesteading. If the company took out fifty settlers in the first year and a certain number each subsequent year and settled them on this land, they would receive a free grant of the odd numbered sections. The Jesuits could not finance the scheme so the Peace River Colonization Co. was formed, composed of Canadians backed by American capital. An expedition now being formed is the first step of the company to secure these concessions.

Weak Kidneys

Weak Kidneys, surely point to weak Kidney Nerves. The Kidneys, like the Heart, and the Stomach, find their weakness, not in the organ itself, but in the nerves that control and guide and strengthen them. Dr. Shoop's Restorative is a medicine specifically prepared to reach those controlling nerves. To doctor the Kidneys alone, is futile. It is a waste of time, and of money as well. If your back aches or is weak, if the urine is scanty, or is dark and strong, if you have symptoms of Bright's or other distressing or dangerous kidney disease, try Dr. Shoop's Restorative in its Tablets or Liquid—and see what it can and will do for you. Druggist recommend and sell.

act clearly states that when this bill becomes effective, which it will do in the autumn, the high court judges must reside at the capital.

It appears that Moose Jaw was named as Mr. Justice Johnstone's residence in his commission, but this provision is not binding even under the present status. As a precedent for Judge Johnstone's residence here, we might cite the case of Mr. Justice Wetmore who came west after his appointment with Whitewood named in his commission, but who located at Moosejaw.

OFFICIAL REPORT ON COAL DEPOSIT Government Engineer Makes Exhaustive Survey and Reports in Detail

An important report as to the possibilities of the coal deposits found to the southwest of Saskatoon, has been prepared by Inspector Frank Smith, M.E., and presented to the deputy commissioner of the department of public works. It is as follows: Sir,— I beg to submit my report on the examination of the coal prospect in the Eagle Creek district, southwest of Saskatoon.

Leaving Saskatoon driving westward there is a thickly settled country for over twenty miles. Small poplar bluffs are situated over these twenty miles, but from about twenty miles westward for many miles north and south of the trail there is not the vestige of a bush. Goose Lake district, 56 miles is made the first night out. Here the settlers have to go twenty to thirty miles south-east into the sand hills for their fuel. It is a very poor quality of poplar.

The coal seam discovered is over three feet in thickness and will make an excellent domestic coal. I interviewed many of the settlers there and all were anxious to give me all the information and assistance possible with regard to the coal found in different wells and springs.

On the southwest quarter section 18, township 30, range 21 coal was found about ten days ago by a settler named Campbell who is digging for water in the Coulee formed by Stony Creek. The point at which the coal was found is fifteen feet above the level of the creek and about one hundred feet below the level of the prairie.

The coal seam discovered is over three feet in thickness and will make an excellent domestic coal. I interviewed many of the settlers there and all were anxious to give me all the information and assistance possible with regard to the coal found in different wells and springs.

On section five, in township 31, range thirty, I visited the property owned by Mr. Calder of Saskatoon. A year ago he took up six acres of land and drove two or three short tunnels in the coal at the east side of the valley. The coal measures two feet and a half and is a very fair quality of lignite.

Conclusions I interviewed many of the settlers on my trip and they are unanimously of the opinion that they cannot stay in there this winter unless there is a solution to the fuel problem either by mining or railway facilities. It takes the settler on an average from two to five days to make the round trip for wood to the sixty mile bush and many of them buy it from the half-breeds who are cutting it. From the coal already found it would certainly warrant the expenditure of some money in proving its economical value or the existence

The Castle Comedy By THOMPSON BUCHANAN

CASUALLY the young man raised his eyes from his harp to find that he had an audience. He sprang to his feet, looking at all embarrassment at the two girls standing suddenly so close to him. Pictures of twin beauty, contrasts, they were, framed in the door-free stone archway of the half ruined hut.

Her mouth was made for kissing, for smiling or for the shy saying of things that cut, and her hazel eyes would smile always unless a sad tale dived them.

But the other—there could be no "perhaps" here. He looked and gasped, for in those deep eyes he seemed to find, all intermingled, the witchery, the appeal and the compelling power of midnight. Here was one who could jump the octave of emotions from laughter to rage and strike not a mood between. Her hair was black, and, dimly, he was aware of her nose tilting daintily upward, a bit supercilious above the lips that met so straight and yet so tender, while under the white skin he could see the blood run quick this way and that at the dominating black eyes' command.

"Oh, it is horrible. Will he live?" the girl exclaimed when she saw the long gab running across the man's forehead at the roots of his hair. Dubarre shrugged his shoulders again. "It is nothing. We French know much. I bound up the wound. Then we came on to this hut. Pierre was tired from the blood letting, I from carrying the harp. We stopped, and I sung him to sleep."

"The dancing master stepped across to the moss bed, and Mistress Percy followed him. "Oh, it is horrible. Will he live?" the girl exclaimed when she saw the long gab running across the man's forehead at the roots of his hair.

"The dancing master stepped across to the moss bed, and Mistress Percy followed him. "Oh, it is horrible. Will he live?" the girl exclaimed when she saw the long gab running across the man's forehead at the roots of his hair.

"The dancing master stepped across to the moss bed, and Mistress Percy followed him. "Oh, it is horrible. Will he live?" the girl exclaimed when she saw the long gab running across the man's forehead at the roots of his hair.

"The dancing master stepped across to the moss bed, and Mistress Percy followed him. "Oh, it is horrible. Will he live?" the girl exclaimed when she saw the long gab running across the man's forehead at the roots of his hair.

CHAPTER II. COME, come, mademoiselle, that is all wrong. The dancing master spoke sharply as she would to an unruly child, for Mistress Percy was in one of her obstinate moods, and the lesson had gone awry from the beginning.

"To hear the truth," he ended for her, smiling lightly, "with grave politeness: 'Certainly, if mademoiselle wishes to achieve awkwardness, I will say already she is far on the road to perfection. Pardon me for hitherto mistaking the aim of mademoiselle.' His face showed deep concern at his mistake. Only about the eyes was the quizzical humor of a man amusing himself at the expense of a spoiled child.

"Do you not like it?" Dubarre asked when the girl involuntarily put her hands to her ears. "If after three months you will not keep time with the music, then the music must keep time with you. My reputation as a dancing master demands that you keep together."

"Do you not like it?" Dubarre asked when the girl involuntarily put her hands to her ears. "If after three months you will not keep time with the music, then the music must keep time with you. My reputation as a dancing master demands that you keep together."

"Do you not like it?" Dubarre asked when the girl involuntarily put her hands to her ears. "If after three months you will not keep time with the music, then the music must keep time with you. My reputation as a dancing master demands that you keep together."

two squirrels. They were friends; their children were to marry; that was all that was to it. Now was come that time when, under the agreement of the long ago, the children were to be brought together. Sir John Wilmerding knew the old agreement by heart—knew three days before her seventeenth birthday they must be betrothed. The marriage might be delayed two years, but no longer.

It was a merely formal matter of a few minutes. Sir Henry Percy thought as he called the young and fair girl to the library that morning. The baronet was in a hurry to get away for his ride, but decided regretfully that he ought to spare a few minutes for telling his daughter she might begin preparing for her marriage.

His very first sentence had raised the storm. Mistress Percy now paced a few minutes. Sir Henry Percy thought as he called the young and fair girl to the library that morning. The baronet was in a hurry to get away for his ride, but decided regretfully that he ought to spare a few minutes for telling his daughter she might begin preparing for her marriage.

KIER H

Probably the only man in the British Empire who has not been to the Kier Hardie is not conventionalities and refuses to assume the silk hat that iron-bound ordained for the man to Westminster to rest.

When he appeared as chief of the Canadian he faced business men were chosen for com weather consistent a dignified appearance he was neither of rubber camping, all but his of a tan leather, but bla winter weight. He wo shirt of open weave, w collar all its own. A with a glass goggle, it was a man between a t some few days. From a gold watch chain and self was at the end of pocket. To the pendent he is a stranger. Of ve nor yet the convention the do not cut much philosophy of Kier Hardie.

The first glance at a high forehead, and grows longer than is moustache and beard a well trimmed, give the wial roughed look. T ther conceals the lower so the brown eyes stand deep beneath the brows, less often with a trow if the pathway was still uncertain, and had his ers. But there is no fin the head is thrown back acerbic attitude, the out and conviction of the and a firm assurance of revealed, and a touch of

For all he represents a stitency, Kier Hardie is Scotchman, showing it in and the proud assumpt prosperity of this land it measure due to the meri clef that northern land. One does not look for in his speeches. He seems for that, and yesterday t more here as after the ling as efforts to reach the audience. There ed the readiness of the form speaker, as he is m lard, proof against the "heeding" of which Ca little.

Those who came out to brand were disappointed and in the words of the Independent Labor P pipe that he pulled out smoked after he had est pipe of peace. There was stride against the vester non pompous prophecies of nium that Socialism w Kier Hardie won for him himself a respectful hearin times marked profits of a His address was on " political developments i country." He touched bri a very interesting manner termed the "recrudescen spirit of nationalism in Scotland." Wiles," a lead to home rule.

STUCK GERMAN'S Balgonie, July 29.— heavy hail storms have done considerable damage crops on the farms in t colony south east of here.

BIG SURPRISE Saskatoon, July 26.—I relation to C. F. Stortz, R. right of way departing out from Saskatoon to Lake country last week. It returned this morning. In sion are samples of wheat growing crops on differ They show wheat to be with a most generous grain for which that distr come famous. Some samp in measure fully forty-se is the largest area of terrapted wheat land I ev my life. Mr. Stovel de tricted a good portion of trict. He estimates that t

ADVERTISE IN "THE WEST" THE MONEY MARKET. WE hear so much about the tightness of the money market these days that one would think our duplicating machine would copy DOLLAR BILLS! But that is the only thing on paper it won't make a copy of. If you need a list of anything, copies of circular letters, maps, want to save time and printing bills, you should see this machine. No washing, no dirt, no special appliances. The office boy can operate it. We'll sell this machine for Twelve One Dollar Bills, and guarantee it satisfactory. ## Local and General

Mrs. Geo. Michelson returned on Sunday from a trip to British Columbia.

The pilgrim Doukhobors reached Winnipeg, Monday and were taken in charge by the police and sent to the immigration hall.

Mr. Robinson of the Saskatchewan Construction Co., left for Yorkton on Sunday evening to take charge of a contract his company has there.

The Regina high school board held a meeting last Monday and appointed G. S. Gamble secretary-treasurer at a salary of \$150 per year. They submitted estimates to the amount of \$9,000.

The city entertained a party of British journalists Sunday morning, giving them breakfast at the Wascona and afterwards taking them to the barracks and for a drive around the city.

R. S. Lake, M.P. of Grenfell was in the city Monday. He had returned from England only a few days having been absent since the session. Mr. Lake is an enthusiastic stockman and visited the stables at the exhibition grounds.

Mr. Beuth Sims, C.P.R. divisional engineer at Moose Jaw is in town. He leaves for Toronto tonight, but will return to Ottawa later for a few days. Mr. Sims was engineer of the Ottawa and Gatineau a few years ago and has many friends at the capital—Ottawa Citizen.

Dixie Watson said: "It is certainly beyond what we ever dreamed of when we had the Bungalo." The register showed that the guests were from many business centres all over the continent. The music for the opening was furnished by Laubach's orchestra.

James Kenderly, the Lansdowne porter who was arrested for having much jewelry in his possession, has been committed for trial.

Mr. and Mrs. B. M. Cherman representing the New York Commercial were in the city this week the guests of the publicity commissioner, H. C. Lawson.

The city council is asking the railway commission to order the C.P.R. to construct the spur track system on a twenty-five per cent. surcharge. The company say that they will not operate anything more than eighteen per cent. Both Mr. Whyte and Mr. Bury promised the city that the twenty-five per cent. surcharge would be adopted.

A dress of Venetian point lace is on display in the Trading Co.'s exhibit at the fair. It took two years to make this dress all of which is done by hand. The garment is valued at \$1,000. It is the property of the Mother Superior at the Regina Hospital and will be disposed of by lottery for the benefit of that institution.

The action of the Regina Philharmonic Society in arousing public interest in the contest at Ottawa for the governor general's prize has been highly commended by R. S. Lake, M. P. who told The West on Monday that he would be pleased to see an opera company go from Saskatchewan and from the expressions of public opinion the Philharmonic Society would make a creditable impression at the federal capital.

H. W. Laird has issued a writ against the city to recover \$390 damages for water flooding his farm property. M. Evoy is also suing the city for \$300. The council held a special meeting Monday afternoon and recommended that the city pay Mr. Evoy \$200 in settlement of his claim, and the clerk was to intimate to Mr. Laird that the city will keep a man in future to look after the water at the compensating basin so as to prevent overflows, and another basin will be constructed.

T. W. Macbie, a stranger, lately of Moose Jaw, was charged in the police court Monday with having unlawfully issued at Regina, on July 22, a cheque on the Canadian Bank of Commerce, Moose Jaw, for one thousand dollars in favor of W. J. German, he well knowing that he had no account at the bank and that the cheque would not be honored. The

Editor Hartley of the Prince Albert-Advocate is in the city attending the fair.

The provincial synod of the Church of England meets in Regina on the 14th, 15th and 16th of August.

A. F. Angus, manager of the Bank of Montreal, returned on Monday evening from a week's outing at Long Lake. Mrs. Angus and daughter remained at the lake for some time longer.

I will small, you free, to prove merit, samples of my Dr. Shoop's Restorative, and my book on either Dyspepsia, The Heart, or The Kidneys. Troubles of the stomach, heart or kidneys, are merely symptoms of a deeper ailment. Don't make the common error of treating the symptoms only. Symptom treatment is treating the result of your ailments, and not the cause. Weak stomach nerves—the inside nerves—means stomach weakness, always. And the heart and kidneys as well, have their controlling or inside nerves. Weaken these nerves, and you inevitably have weak vital organs. Here is where Dr. Shoop's restorative has made its far. No other remedy even claims to treat the inside nerves. Also for bloating, biliousness, bad breath or complexion, use Dr. Shoop's Restorative. Write me today for samples and free book. Dr. Shoop, Racine, Wis. The Restorative is sold by the Regina Pharmacy Stores.

IN THE SUPREME COURT OF THE NORTH-WEST TERRITORIES, JUDICIAL DISTRICT OF WESTERN ASSINIBOIA

Pursuant to the order of the Honorable Mr. Justice Newlands, made in the action of  
The Excelsior Life Insurance Company, Limited, Plaintiffs,
