

## Which Will It Be? Borden and King George or Laurier and Taft?

### LASTLY—

The World awaits the result of today's polling with the most profound confidence in the genius and spirit of the Canadian nation. It will be for history to say whether the 21st of September has been a red-letter or a black-letter day in the annals of a young and aspiring people. Regarding the Laurier-Taft reciprocity policy, as we do, as the beginning of an entangling alliance with the United States, the result of which must be the absorption of Canada by the American republic, it is with the liveliest anticipation that we look for the defeat of the pact at the polls.

It is no over-sanguine view to take to anticipate the retirement of the Laurier government. Sir Wilfrid has had fifteen years of power. In that time he has frequently had occasion to speak kindly of the eminent French-Canadian and his sunny ways. But we have repeatedly had to speak ill of his company, and he has not reformed it. In point of fact, it grows worse. The World had it from a well-to-do Montreal man, now resident in Toronto, that he would not vote against reciprocity because he was a free trader. "But I will vote against the Laurier cabinet," he declared, stigmatizing them as a gang of boodlers. This is really more definitely the issue in Quebec than reciprocity and will account for some of the things we shall hear to-night before we sleep.

In the Northwest two elements have been overlooked entirely by the Liberal press. The United States and the British-born immigrants dwell side by side in the prairie provinces. They have instructed one another about American trust inquiries. The United States farmer fled to Canada to escape that slavery. He wants no more of it. His British neighbor will assist him in disposing of the pact.

In Nova Scotia clause 12 of that Washington-drawn pact will do all that is necessary to cut down Laurier's majority in the maritime provinces.

What will Ontario do? Is it necessary to ask? Anyone who has read the Globe and the Star for the past three weeks and noted the accomplished mendacity of their news, and the venomous and snake-like fury of their editorials, is aware how fully their proprietors and managers realize the bitterness of fighting for a lost cause. The desperation of the government that looks upon a single seat as unspeakably valuable, is indicated by the absolutely scandalous methods adopted at Port Arthur to save a political booter to the government ranks.

In Toronto the reign of the unreliable is coincident with the electoral efforts of the Liberal candidates. The latest and most glaring attempt in Centre Toronto, perhaps gives Al. Alfred Maguire the palm in scurrilous activity. There is no doubt whatever about the return of five anti-reciprocity candidates in the city.

The choice of Mr. Borden as leader of the house of commons will place Canada in the most independent position she has yet assumed. Canada must look to the United States or to Great Britain for her nurture and protection for a generation at least. It is unlikely that Canadians would desire to exchange Great Britain for the United States at this juncture in her career. It is true that the United States eagerly wishes the conclusion of the pact. It is true that if it is refused, the United States will make all the tariff changes and more that the pact promises. But the Americans want much more than that. They desire to control the resources and the destinies of this wealthy Dominion. Canada's refusal to-day to ratify the pact will probably precipitate a panic on the New York Stock Exchange. Fortunately we are not involved in these disastrous conditions, nor do we want to be subject, as reciprocity would tend to make us subject, to such dangers.

But the greatest danger reciprocity involves is the disruption of Canada, east from west. Canadians will refuse to consider it to-day.

### ELECTION RETURNS IN WEST TORONTO.

West Toronto electors will not need to come down town to get the election returns to-night. Arrangements have been made to give a quick and accurate service for the special benefit of West Toronto people, the returns to be flashed from Webb's garage, the use of which the proprietor has kindly granted, to Mr. Maclean's committee rooms, at 1545 Dundas-street.

### What Protection Has Done for a Country

And furnishes the explanation as to why that same country now wants Canada, its only rival, and the Canadian workman to throw their opportunity away.

land and improvements, \$13,114,492,056;

buildings, \$3,660,198,191; implements and machinery, \$761,261,550; live stock, \$3,078,050,041; expenditures for labor in 1899, \$365,805,321; for fertilizers, \$54,782,767; number of farms operated by owners, 2,713,371; by cash tenants, 752,920; by share tenants, 1,273,566; by white persons, 4,970,129; by negroes, 746,717; value of farm products in 1909, estimated by commissioner of agriculture, \$3,760,000,000.

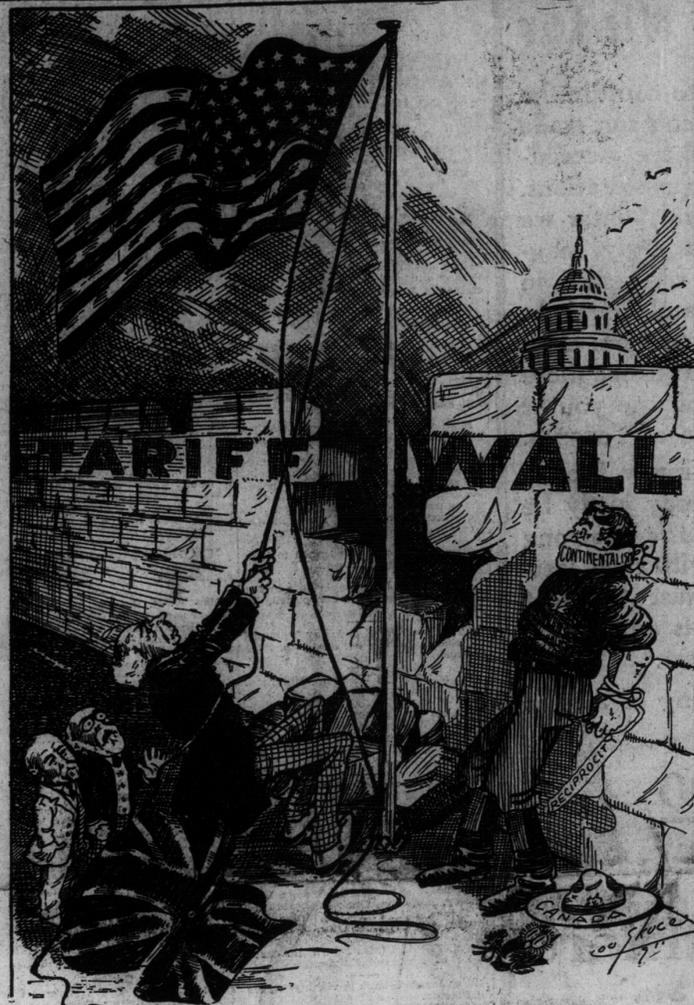

How does the Canadian farmer like the outlook for breaking in on the wider market?

How does the mechanic, artisan or workman of Canada contemplate the competition thus offered by reciprocity?

How can either exchange present prosperity unparalleled in the world to-day for that "Bird in the Bush" reciprocity? Is not present prosperity the real "Bird in the Bush"?

Yes, and with all kinds of yague reciprocity birds!

A vote for protection is the only way to retain the bird in the hand, and a vote against reciprocity the only sure and certain way of maintaining and perpetuating and expanding Canadian commerce and Canada's greatness.

DON'T LET LAURIER FINISH HIS WORK

### GLOBE'S WELLAND STORY IS A PURE FABRICATION

No One in That Town Knows of Alleged New Industry—No Negotiations for Power With Hydro-Electric Commission, as Liberal Organ Stated.

Yesterday morning The Globe published with a flourish of trumpets under the caption "Big Industry for Welland If Reciprocity is Carried," the following: "The Globe received authentic information last evening that an American newspaper had secured an option on thirty acres of land along the old Welland Canal upon which it will erect a large plant for the manufacture of news print for its own use if the reciprocity agreement is endorsed by the Canadian people to-morrow.

"The plant to be erected will involve an expenditure of \$1,000,000. It will furnish employment to between 500 and 600 men, at wages ranging from \$2.50 to \$3 a day, turning out 100 tons of paper daily.

"Negotiations are under way for 10,000 horsepower from the hydro-electric commission.

"If the reciprocity agreement falls this industry will be located in the northern states."

Regarding the above G. E. W. Kennedy of 23 Simpson-avenue, Toronto, called The World up last night on the long distance phone from Welland and said:

"I have made inquiries here from manufacturers and others and can find no definite information regarding the proposed pulp and newspaper print industry. As far as I can see there is no foundation for this statement."

"W. K. McNaught, M.L.A., a member of the hydro-electric commission, was called up by The World, concerning The Globe report to which Mr. Ken-

### A STANDPATTER.

An Englishman, who has made good in Canada, holds the following opinion in regard to reciprocity:

"I want none of it," said he. "When I lived in England, a free trade country, I had to work night and day to provide my wife and seven children with the absolute necessities of life. Since I have come to this country, where we have protection, my seven children have been able to keep me and the wife in luxury."

### WILL SWELL BORDEN'S MAJORITY

A Toronto gentleman, who has much to do with the different newspapers in the city, and who is personally acquainted with a very large number of newspaper men, told The World that if a vote could be taken of the men who work on The Globe and The Star, an overwhelming majority against reciprocity would be given.

### MISS CANADA TO SIR WILF.

Remember whom you're talking to, said she. Excuse me, here's your hat; you'd better go. Can it be possible you thought so ill of me I'd let you both come round. Ah, Wilfrid, no! Put on your coat; I think it will be cold. Reciprocity? I will not have it so. Outside it's rather damp and you are cold. Can it be possible you thought to share my smiles? I do not like your fat friend in the hall. Take him with you and journey on for miles; You see I'm not that kind of girl at all.

### BRISTOL SWEEPING CENTRE

One Street Alone Gives Him 98 Out of a Total of 104.

Ninety-eight votes out of 104 for Bristol in a street in the western section of Centre Toronto.

The figures may appear almost incredible, but they are actual and are furnished by one of Ald. Maguire's own workers.

Mrs. Bristol and Mrs. Van Kaughten were out interviewing voters yesterday where they met the opposition canvassers whom they had previously encountered, and whose frank testimony as to the results of his canvass had given them information which proved reliable.

"You needn't bother about canvassing this street," he said. "I've gone over it, and there's 98 for Bristol and 6 for Maguire."

The ladies thanked him, but replied that they would seek to convert the six and make it unanimous.

### A BROKEN PLEDGE.

"In urging our compatriots, irrespective of their birth and religious or political affiliations, to vote for the opponents of the reciprocity agreement, we remember that the Dominion Government, when inviting Britishers to leave the United Kingdom, and to throw in their lot unreservedly with their Canadian fellow-citizens, made it understood that Canada was unalterably British, that the whole scheme of her commercial development, as indicated by the British preference, and by the Transcontinental Railway, was designed to prevent, in Sir Wilfrid Laurier's words, 'an ever-vigilant competitor, talking to himself the trade that properly belongs to those who acknowledge Canada as their native or adopted land.'

"We expected that this policy would be rigidly adhered to and that the last had been heard in Canada and the United States of the very union which the prime minister so vehemently repudiated, and the dangers of which have been so impartially pointed out by the British ambassador.

### N. P. PROTECTS IMMIGRANTS.

"The development of Canada on the lines laid down by the prime minister, in accordance with the national policy, affords to the millions of immigrants, whether from within or without the empire, greater opportunities than they possessed in their native lands. It is the paramount duty of the government to encourage the growth of a pro-Canadian, pro-British sentiment among all the new-comers, so that commerce and nationality may combine to secure for Canada the most enviable place among English-speaking peoples.

"This supreme duty was partially recognized in the pledging of the nation's credit for undertakings without which the produce of Canada could not be marketed east and west thru Canada.

### CALL TO STRIKE FOR CANADA AND EMPIRE

In Final Appeal to British Born, Arthur Hawkes Points Out That Nation's Destiny Hangs in Balance — Government Must Be True to Its Overseas Pledges.

It's the last call to the British-born to rise in their might against an agreement with the United States, which must inevitably, if carried, quench the fires of Canada's national life.

Arthur Hawkes and his lieutenants, who for weeks have been bearing the brunt of the battles on behalf of Britain's sons in Canada, finish their work with the following appeal, issued by the central committee (Toronto) and branches of the Canada-British Association, in connection with which 42 meetings have been held in opposition to reciprocity, between Windsor and Halifax:

"It is the high privilege of the British-born in Canada to unite with the Canadian-born at the most important general election in Canadian history, to defeat the object of a foreign government. According to President Taft the election brings Canada to 'the parting of the ways,' and a vote for the Laurier government is a vote for commercial and social union with the United States, and, according to many American statesmen and journals, including the leader of the house of representatives, it is a vote for political union as well.

"We accept the judgment of the British ambassador at Washington, Mr. Bryce, a former member of Liberal cabinets in London, that a commercial union such as that now contemplated by the president of the United States, would hamper Canada's freedom in any tariff adjustments with the United States. In his monumental book, 'The American Commonwealth,' Mr. Bryce says: 'The material growth of Canada would probably be quickened by union (with the United States), and the plan of a commercial league of customs union, which has lately been discussed, might, if carried out, lead to a political union. Indeed it is hard to see how otherwise Canada could have her fair share in adjusting such tariff changes as might from time to time become necessary.'

### ELECTION RETURNS.

The election returns to-night will be shown on a screen in front of The World office in West Richmond-street. The public will find this a convenient location from which to view the results, as the returns will be posted direct from the telegraph wires in The World office. A series of comic views will be displayed.

### RECIPROCITY IS THE RESULT OF THREATS

Canada Has Grown to Nationhood By Minding Its Own Business, and Allowing Its Neighbors to Mind Theirs.

The World has received the following communication from Watson Griffin, editor of The Canadian Century: MONTREAL, Sept. 20.—While looking over The Toronto Globe file to-day I noticed in the middle of the leading editorial of Feb. 13, the following sentence:

"For 44 years the people of this country have grown to nationhood by minding their own business and allowing their neighbors to attend to theirs."

Any one of us might have said this. It is the dominant thought in the minds of the Canadian people to-day, but I was rather surprised to find it in an editorial advocating reciprocity, and it seemed to me that the one little sentence I have just quoted was a complete reply to everything else that was said in that long editorial. How such a sentence happened to get into such an editorial I cannot guess.

Tariff Changes.

We have had many changes in the tariff since the confederation of Canada. Some of them were good and some of them were not very good, but all of them were home-made. We minded our own business, made our own tariff and gradually developed into a nation that is the pride of the British Empire to-day, and is attracting the attention of the whole world as the most progressive and prosperous country of the twentieth century.

Now, however, we are asked to accept a tariff made in Washington. Instead of minding our own business and allowing our neighbors to mind theirs it is proposed that a joint high commission, composed of two members of the Canadian Government and representatives of the United States Government may meet together and frame a tariff for Canada.

When our tariff is made at Ottawa without consulting the U.S., our government has to consider only what will please the people of Canada. When our tariff is made in Washington, or anywhere else that the joint Canadian-American high commission may happen to meet, the wishes of the American people must be considered also. A tariff made in Washington must be amended to the satisfaction of our neighbors, who can say what the consequences will be.

### NO CHANGES ALLOWABLE.

When our tariff is made by our own government after the budget is brought down, if any section of the people are hurt by it they have the right to go to Ottawa and make their objections known, and if the government are convinced that an injustice has been

### RECIPROCITY AND FURS.

The close of to-day will decide the commercial destiny of Canada. It is a matter of pure speculation to imagine what the future will bring forth, no matter which party is victorious. One thing is certain, it will not make any difference in the price of furs in Canada. Furs have always been on the free list in this country, as in every other in the world. Manufactured, or dressed furs, will not be affected by the pact, should it carry. Any Canada is nearly an export country in the matter of furs. The W. & D. Diamond Company, Limited, are showing all the newest designs in London, Paris, Berlin and New York garments for the coming fall and winter, and cordially extend to everyone an invitation to visit the showrooms. We feel sure that the ladies of Toronto will appreciate the efforts of the company to secure the most novel garments being shown. It is safe to say that beyond the Diamond doors it will be impossible to duplicate them in Canada.

THURSDAY MORNING, SEPT. 21, 1911

BE LOYAL TO CANADA.

This is a day of unusual moment for Canada and the Canadian people. At a word from the Republican administration of the United States the Dominion Government, in the persons of its envoys to Washington, agreed to depart from the national policy which has made the Dominion a free, self-reliant nation. The splendid success of that policy is history large on the pages of Canadian literature for more than a generation. By its aid Canada has reached her present unexampled position, has taken rank as the foremost of the rising nations of the world. Full of buoyant hope and of the faith and confidence inspired by constant advancement and achievement, the Dominion hailed the dawn of the twentieth century—Canada's century. Before that century passed its meridian, Canadians dared to believe that their loved country would stand a living example of the finest fruition of their glorious British heritage. Chief, too, among that splendid imperial band of equal, self-governing communities, whose voluntary co-operation and common loyalty to King and flag heralds the triumph of the cause of world peace.

Yet scarcely had the first decade of the century passed when Canada, by the act of her government, is menaced with the destruction of her national ideals. Reciprocity has been thrust upon the Canadian people, at the instance of a republic that ignored and contemned the Dominion until its magnificent resources became the necessity of United States manufacturers and its expanding prosperity and unprecedented prospects roused the envy and greed of a power that demands the domination of the American continent. Canada, President Taft and other public men of the United States have declared, is at the parting of the ways. Canada, they imagine, can still be drawn by closer commercial union from the mother and sister lands, towards the continental sphere. Reciprocity, on their own admission, is designed to secure that closer commercial union which will lead to complete identification of interest and at least to political amalgamation. That is the vision which hovers and has always hovered, before the eyes of the citizens of the republic of the United States. Dimmed for a while, it has grown brighter by the act of Sir Wilfrid Laurier and his cabinet and their obedient following.

Reciprocity, so fatal for Canada, would have been forced thru parliament but for the determination of the King's loyal opposition to compel a reference to the Canadian people. Had believers in Canadian national ideals failed in that most sacred duty, they might well have expected an exorcism second only to that of a government which was ready to immolate these ideals on the altar of continentalism. To-day the country will speak and will arbitrate its own destiny. It has been given the opportunity to say whether it shall remain one of the imperial band of British states, or whether it shall link itself with a republic whose constitution has failed to respond to twentieth century democracy. Every Canadian loyal to Canada, to the empire and to the King will vote to-day against reciprocity and for the continuing independence of this country. If patriotic elections are true to the faith that is in them they will to-day sound a note that will ring round the world and tell with no uncertain voice that Canadians they are and shall remain.

STAR PRICES. An east end voter called at The World office yesterday evening with a copy of The Star's alleged Toronto prices, and the actual prices he is paying at his butcher's. He thinks The

Star is convincing the voters to vote against reciprocity by its untruthfulness. If the advocates are so unreliable, what is the policy likely to be? Here are the figures: Roast rib beef, Star price 20 cents, actual price 14 cents; sirloin steak, 23c and 18c; leg of lamb, 18c and 15c; lamb chops, 22c and 18c; chuck roast beef, 13 1/2c and 10c; loin of pork, 18c which in this case was correct; round beef steak, 18c and 16c; veal chops, 22c and 18c.

In every case but one, The Star prices are incorrect, and while the Toronto prices given are not as low as the Buffalo prices given by The Star, the Toronto prices are for the best quality of goods. Whether The Star prices are for the best quality of goods, or are correct at all, would appear doubtful in the light of the falsity of their Toronto figures. Anyone, however, who has lived in Buffalo knows how absurd it is to represent living there as cheaper than Toronto.

MR. TAFT'S DISCOMFITURE.

There will be one discredited man in America to-day, and that will be President Taft. By no vote of the Canadian people is it possible to have reciprocity ratified by the new Canadian parliament, and it will take months to discuss the question even if Sir Wilfrid Laurier has a majority, which is not at all likely. On the contrary, reciprocity, in our best judgment, will be defeated to-day. Be that as it may, reciprocity will never go thru the Canadian parliament. It is therefore up to Mr. Taft to give cheaper food by a specific reduction of the tariff in his own country without any conditions attached to it in so far as Canadian markets are concerned. He has promised lower tariff duties, and he can only deliver the goods by signing the tariff bills reducing the duties, which the coming congress will send to him.

RECIPROcity WILL LOWER WAGES.

Working men have a special interest in defeating the reciprocity pact. The wages of every class of workman has gone up in the last eleven years as much as 50 per cent. Bricklayers have advanced from 30 and 23 1/2 cents to 48 and 50 cents an hour; builders' laborers from 15 and 20 cents to 25 and 25 cents per hour; plumbers, 25 and 30 cents to 35 and 37 cents; stonecutters, 22 1/2 to 30 cents; carpenters, \$1.50 and \$1.75 a day to 40 cents an hour; machinists, \$1.25 and \$2 a day to \$2.25 and \$2.75 a day. All the workers in the building trades, in the metal trades, and in every other kind of work are aware of this. They have been asked to vote for reciprocity and the party which would change this condition of things on the ground that these wages have increased during the rule of that party. Workmen will not neglect the fact that if the party changes the policy under which good wages have been secured there is no guarantee that the good wages will remain. On the contrary it has been made perfectly clear that the object of the American Government in offering the reciprocity terms was to secure, the Canadian markets, both east and west, for American farmers and manufacturers. President Taft would ruin the Canadian workman in two ways. He would rob him of his own home market, by destroying his best customer, the Canadian farmer, and he would drive him out of any market left by the American competition. The Canadian manufacturer will be compelled to pay lower wages to meet this United States competition, and the cheap food which the Liberal party promises as a result of reciprocity would be made the first pretext for a reduction of wages. Wages and cost of living always bear a direct proportion to each other. The argument of the Liberal party as advanced by The Brantford Expositor, that cheaper food will benefit the workman without impairing in the slightest his ability to make good wages is defeated by The Expositor's own admission, that "the low cost of living in England is the only salvation of the British workman."

LOYAL PUBLIC SERVICE.

Sir Robert Hart, late Inspector-General of Chinese Customs, has not only survived his retirement from that responsible position. In every way a typical civil servant of the class that apparently only the English-speaking people can produce, his career was one of marked distinction in a field that few foreigners could hope to fill even with partial success. In 1862, after the reorganization of the Chinese customs service, he became its head, and for well nigh half a century he administered the department with ever-increasing reputation, both in his native

and adopted country. Sir Robert Hart knew China as none but the best informed Chinamen knew it and his devoted service and high sense of honor earned him well-deserved gratitude. He has passed, but his memory will remain and his works will follow him.

BOURASSA AND THE GLOBE.

After the violent attacks made by The Globe on Mr. Bourassa, the leader of the Quebec revolt against the domination of Sir Wilfrid Laurier, it is surprising to find that the editor of The Globe was moved to remark that Mr. Bourassa's Nationalism was nothing else than Globe Liberalism. This he did after Mr. Bourassa had uttered the words: "The Canadian Club exacted the same views as the Drummond-Arthabaska campaign and also the other day at Sudbury. If the opinions expressed by the French Nationalist leader did not conflict with loyalty to the British Empire five or six years ago, they cannot do this now. The change is in The Globe, which has no use for Mr. Bourassa now that he is actively engaged in opposing Sir Wilfrid Laurier. As a partisan organ The Globe cannot do otherwise."

Laurier and larger trusts.

Reciprocity was not made in Canada. Laurier and Taft and larger markets for the United States farmer. Sir Richard Cartwright asserted at Kingston that Borden's chances for defeating Laurier were 100 to 1. That is what he said, whatever he meant. The omen is good.

SOME CATTLE TALK.

Editor World: Mr. Wm. Weir, St. Mary's, makes some statements in The Globe of Sept. 9, which call for some comment. If the Canadian cattle selling in Toronto at \$2.25 to \$2.40 are equal in quality to the States cattle selling in Chicago at \$1.50 to \$2, and only bring 1/4 of a cent less in Liverpool, why do not Mr. Weir and his good Grit friends ship to Liverpool and save the difference for themselves. The plain truth is that shipping cattle here has not been profitable at present. I would also remind Mr. Weir that the cattle feders of Ontario and Quebec have forgotten about the Michigan cattle which were sold in Toronto last spring and which filled the place of Ontario cattle to the great loss of Canadian stockmen. And they have not forgotten about the good Grit cattle buyer who sold them to the United States at a profit in Chicago than in Ontario and Perth. As for his statement that beef from a cent to a cent and a half is sold to the consumer at 10 cents per pound, he is telling lies, and he knows it. I met a Chicago man only last week, and he told me that you can not get any beef fit to eat under 20 cents per lb. in Chicago.

TO THE BRITISH-BORN.

Reports have been received from all parts of Ontario and the Maritime Provinces telling of the good work being done by the Canadian-British Association to fight the reciprocity issue. To keep the closest relationship between the mother country and Canada, both in commercial and political relations, is the object of the Association. When the campaign against reciprocity was launched by the Canada-British Association at Earlscourt in the early part of the year, the British-born denounced in no small measure the agreement, which to them and to the British-born in Ontario, meant nothing less than the alienation of Canada from the mother country. Other parts of Ontario as well as the Maritime Provinces have responded wherever they are to the call, gathered at one to deal the death blow to this infamous agreement. Reports of the meetings which have been held, show the feelings of the audience, and the way the speakers of the Canada-British Association have been received. The work of the association has been applauded both by Liberals and Conservatives, and while several of the Liberal party organs have tried to show that the work and speeches of the Canada-British Association have been with no other intention but to arouse racial prejudice, they have ignorantly failed, because, no matter how scurrilous their statements are, they cannot throw dust in the eyes of the Britisher who has lived under the regime of free trade in the old country.

ants, J. MacGregor, for plaintiff. An appeal by defendants from the judgment of a divisional court reversing the judgment of Riddell, J., at the trial, dismissing the action and directing judgment for the amount found by the jury. The plaintiff, a market gardener and partner of the Township of York, brought his action claiming \$5000 damages for injuries sustained by being struck by a car of defendant, alleged to have been caused by the negligence and carelessness of defendant. The jury, by their verdict, found that the plaintiff was negligent, but assessed plaintiff's damages at \$1200, if the court should think him entitled to judgment. Appeal argued and judgment reserved.

Before Moss, C.J.O.; Garrow, J.A.; Macleod, J.A.; Masse, J.A.

Rogers v. National Drug Co.—J. Bicknell, K.C., and M. L. Gordon, for plaintiff. E. D. Armour, K.C., for defendant. An appeal by plaintiff from the judgment of Riddell, J., of Feb. 11, 1911. An action by plaintiff for immediate possession of certain lands and for mesne profits. Defendants denied plaintiff's right to possession and claimed a new lease of the lands under the agreement to renew contained in their lease, and by way of counterclaim asked to have that agreement specifically performed and to have a proper lease granted to them. Upon the plaintiff's motion for judgment, judgment was given for plaintiff with costs and gave judgment to defendants on their counter-claim, declaring that they are entitled to a lease of the lands in question for the term of years of the agreement for lease made between plaintiff's predecessor in title and defendant. Appeal dismissed with costs.

BRINGING OUT THE VOTE.

Nearly all the large business houses in Toronto have been grappling with the problem of how to arrange to let the employees get off to vote to-day. There appears to be no universal plan, but two methods are apparently favored.

The city hall, the Russell Motor Car Co., the American Watch Case Co., the Heintzman Piano Co., and many other firms proposed to solve the difficulty by closing at 3 p.m. Other companies prefer to give their men an extra hour at noon, and the T. Eaton Co. It is announced, will let their employees off at any time they wish, on making application. Some firms have even arranged to have their men conveyed in vehicles to the different polling booths, and it is assured that all will be given the opportunity to vote.

C. M. A. Convention Oct. 10. On account of the elections, the annual convention of the Manufacturers' Association has been postponed till Oct. 10. The present officers have been authorized by a pro-forma meeting to remain in power until that date.

The employees get off to vote to-day. There appears to be no universal plan, but two methods are apparently favored.

Joy Riders Fined. H. J. Tomlinson and E. J. Sillock, bookkeepers at the Harrie Abolition, were fined \$10 and costs each yesterday morning's police court for joy riding in their employer's motor car. They had taken the car out for a 24-hour jaunt.

Cause of Pure Water. For the purpose of joining other lake-side municipalities in efforts to keep their water supply pure, Mayor Geary and Dr. Hastings, M.H.O., will go to the 10th International Congress to be held in Chicago next week.

Quiet Firmness to Market Wheat Values Hold Unchanged

Uncertainty Over Reciprocity Prospects Keeps Chicago Exchange in Bull Frame of Mind—European Markets Easier.

CHICAGO, Sept. 20.—Doubt about the success of reciprocity rallied the wheat market to-day after a decline to free movement of the grain from the harvest fields of Germany and France.

Local grain dealers' quotations are as follows: Oats—Canadian yellow oats, No. 2, 45c; No. 3, 44c; lake ports, Ontario, No. 2, 44c; No. 3, 43c, track, Toronto.

Wheat—No. 2, red, white, or mixed, 85c to 86c, outside points. No. 3, 84c, outside, nominal.

Barley—For feed, 50c to 55c; for malting, 70c to 80c, outside, nominal.

Buckwheat—No. 2, 52c; outside, nominal.

Manitoba wheat—No. 1 northern, 110c; No. 2 northern, 108c, track, lake ports; new wheat, 3c under these prices.

Local millers' quotations at Toronto are: First patents, 85c; second patents, 84c; strong bakers', 84c.

Corn—No. 2 yellow, 75c; c.l.f., bay ports. No. 3, 74c; No. 2, 73c to 74c, outside, nominal.

Ontario flour—Winter wheat flour, \$3.45 to \$3.50, seaboard.

Weather is Favorable for Crop Movement

Larger Receipts of Wheat at Northwest Points—Market Hangs on Reciprocity Uncertainty.

Edison Perkins & Co. had the following at the close: Wheat—Weather throughout the northwest and Canada generally favorable for the movement to market.

Wheat—Weather throughout the northwest and Canada generally favorable for the movement to market. Cash demand was very dull and Minneapolis reported cash market there a little slow, millers still discriminating in their buying.

Corn—Weather generally favorable and country offerings very light. Cash demand only fair, with very little offerings. As soon as the new crop begins moving it will meet with a brisk demand for home consumption, as well as for export and the movement, in our opinion, will not be large.

Oats—Market strong all day, with good trade. The market was plentiful of local wheat to come to the market. The offerings were sufficient to check the advance and the price was lower yesterday at 80c. Reasons for early selling pressure in wheat were the movement in the Liverpool cables, reports of realizing sales and early advance quickly 1/2d in the English market.

Manitoba flour—Quotations at Toronto are: First patents, 85c; second patents, 84c; strong bakers', 84c.

Porcupine Stocks Turn Soft Under Profit-Taking Movement

Lower Prices for the Gold Issues When Liquidation Puts in an Appearance—Foley-O'Brien at New Low Level.

World Office. Wednesday Evening, Sept. 20. Porcupine stocks turned soft today and lower prices were realized through the profit-taking movement following on the heels of the advance of the last two sessions.

The big issues were again in the lead, but trading fell off to a noticeable extent, due to the pronounced demand at the higher prices. Hollinger got back to the twelve-dollar mark, a reduction of 30 points from last night's close, but considering the fact that the shares had moved up nearly two dollars in the last two weeks, this loss was not of any moment.

Rea dropped back 25 points to \$3.10 in the early trading, but a better call for the stock at the lower prices brought about a recovery, in which a portion of the loss was regained, the shares reaching to \$3.25, and closing around that figure.

The lower priced issues moved in much the same way as the higher securities. Dome Extension was off three points to 65 at one time, but more than half this was regained during the afternoon when the shares moved back to 67.

A sharp slump in Foley-O'Brien was the real feature of the day. This issue was under special pressure for some unknown reason, and got down to a new low record at 84, with the close at that quotation. New York was reported to be selling the stock, and the trading report in the list was Swastika, which moved up to 35 1/2, a gain of nearly four points for the day. There was no news to account for the advance, which was got down as a sort of covering by floor traders. Coronation was also strong, making a sharp recovery to above eight cents.

Cobalts were quiet, and outside of a point advance in Beaver and a decline of like volume in Timiskaming, there were no price changes in evidence.

Excellent Ore From West Shining Tree

Free Gold Showings in Specimens—Mackenzie and Mann Hold Claims.

Recently returned prospectors and mining men from the West Shining Tree district report that the whole country in that section has been thicketed by the swarms of men who have participated in the gold rush.

Meanwhile the West Shining Tree property in the district has revealed some promising indications. The World was yesterday shown some excellent samples taken from a claim owned by S. H. Thomas. This property is in Churchill Township, near Lake Okawenda, about a day by canoe route and forest trail from Gowganda Junction.

The ore shown The World was of the same character as that in Porcupine, milky white quartz and schist. Free gold was plainly visible in one of the specimens of quartz. A sample of blue quartz from a big vein looked particularly promising, and was stated by Mr. Thomas to run high in gold values.

It is reported that the Canadian Northern Railway interests, Mackenzie & Mann, have taken over six claims in West Shining Tree. The C.N.R. line north from Gowganda Junction passes within 15 miles of the district, and it is understood that a tunnel will be laid out at the point where the railway line taps the camp.

VEIN 100 FEET WIDE On McDonald Property Adjoining Rea—Traced to Reciprocity Claims.

The Hollinger belt continues to come to the front. Mr. J. F. Ingle, who owns a big interest in the McDonald property, two claims to the north of the Rea mine, and who was in the city yesterday, stated to The World that the vein on that property had been traced 100 feet in width, and that assays showed \$47 in gold to the ton. The vein has been stripped to the line of the Reciprocity mines to the north. Camps are being erected on the latter property this week, and the men will be put at work to pick up the vein as soon as these are completed.

BIG LINER RAMMED. The steamship Olympic was rammed by the British cruiser Hawk, shortly after leaving Southampton at noon today, but no one was hurt. The steamer was not beached, but anchored off Cowes, Isle of Wight. The passengers were not landed in boats, and remained on board the Olympic, returning to Southampton under her own steam. Arrangements are being made to transfer the passengers to other steamers as opportunity offers.

Quashed Railway Appeals. The Court of Appeal yesterday quashed two appeals by the Street Railway Commission. Mrs. Alice D'Espey, who was injured while boarding a Carlton car at Broadview-avenue, was given \$100 by the trial judge, and the award was sustained.

The award of \$1500 in favor of Edward Williams, a city street cleaner, who sustained an injury to his back while working with his horse and cart, was also sustained.

Tent Dealer Assn. Wm. Bartlett and Son, 334 Spadina-avenue, dealers in tents and awnings, have assigned to N. L. Martin and Co. a meeting of the tent dealer will be held on Sept. 27 in the office of the assignee.

Porcupine Notes. PORCUPINE, Sept. 18.—(From Our Man Up North.)—Cement foundations and brick buildings are the structures going up at the Dome Extension, and before freezing weather sets in it is expected the work of reconstruction will be completed.

The Dome Extension joins the Big Dome on the east. A break in the run of the ridge occurs at the Extension's west line, but the finding of the smaller dome with the rich pay streak at the Big Dome, right in a straight line with the main ridge on the Dome Extension, gives rise to the statement on the part of mine men that the two domes may be found to connect. The depression between the two ridges is filled with a vegetable wash known as muck.

When the plant starts, no time will be lost in finding out what connection there may be between the ore bodies on the two properties. Steam will be turned on within three weeks' time. Then the main shaft will be deepened and the work of sinking to the 300-foot level carried on as before. The plans call for the sinking of three shafts to this depth, and within this triangle is formed a "horseshoe" ore body which is being explored and systematically worked.

The ore zone, located thru surface work so far done, is fully 300 feet long and 200 feet wide. It is the famous quartz deposit at the Big Dome, with less spectacular free gold showings. The "golden stars" are viewed from the east, along the ridge to the east of the main shaft, where a pay streak strikes off to the east down the incline in the side. Chas. Fox.

RECIPROcity WILL DISRUPT CANADA. Reciprocity in effect means the ultimate separation of the great provinces of Ontario and Quebec, New Brunswick and Nova Scotia, and Prince Edward Island from the rest of the Dominion. Reciprocity means continental free trade just as surely as that the sun will rise tomorrow. Continental free trade will mean that Chicago, Minneapolis, St. Louis and Duluth will be the commercial centres for the Canadian West.

Reciprocity means the stagnation and paralysis of the giant young cities of Port Huron, Sarnia, Windsor, Sault Ste. Marie, Saskatchewan and Alberta, and the Mackenzie Valley and the Peace River country, during the present century, at least.

These great prairie provinces are really the granary of the world. They produce the wheat which feeds the world, and it is out of reason, and Aid Maguire himself is not slow in making promises that would be rather hard to fulfill, that he has stirred the ward to its very depths was made by the candidate at a Lyric Theatre meeting, in which he remarked that in Montreal everything was wide open on Sunday and there was no reason why Toronto's ward shouldn't be the same.

Last month, the railway commission, headed by Judge Mabee, chairman, visited Prince Rupert, and made a trip over the hundred miles of the Grand Trunk Pacific east of Prince Rupert, which is now in operation. General Superintendent Mohan was the recipient of many compliments as to the physical conditions of the new roadbed. Judge Mabee said in an interview with a reporter of The Evening Empire in Prince Rupert: "I saw a splendid piece of roadbed. It is a fine road all the way from the point to the westward. Better piece of road cannot be found among many of the roads of older Ontario. On our return trip, we ran over 85 miles an hour over some portions of the line and the going was remarkably steady for a new road. When the government accepted the road, there was an order limiting the speed of trains to 12 miles an hour, but after having seen the road, we are going to make an order permitting the speed of trains to be increased to 35 miles an hour."

Porcupine Making Material Progress

Will Surpass the Optimistic Expectations of Last Spring—Voters Leave For Their Homes.

PORCUPINE, Sept. 22.—(Special From Our Man Up North.)—Even the fire set back all mining operations at Pearl Lake, the operating mines will before snow flies exceed all expectations and surpass even the anticipated record made in spring. Depth down to 200 feet has been proven to the satisfaction of such staunch mining men as Engineers Lamb, Thompson and others and a new mark has been set by Northern Whittier, working hard and this week the Miller Porcupine starts a core drill to test out the depth on two veins located in the shaft-work.

The railway line to Pearl Lake will not be running before December, and this fact alone holds many away from Lake and Timmins Townsite building. The Bristol and Cripple Creek districts show considerable life and an extension of the Ontario Railway can be done in the heart of the locality that section will do more with renewed vigor. Particulars on the latest commission for day wages to get a new start. Weather is bright and warm. Balmly atmosphere of the last few days is passing.

Large number of voters now leaving for their homes in order to vote on Thursday. Conservative Government, headed by R. S. Gagner, M.L.A., was largely attended and much enthusiasm shown. Chas. Fox.

NOT YET, MAYBE SOON. Sir Donald Mann Reluctant on Central Ontario Railway Deal. When seen by The World yesterday afternoon, Sir Donald Mann did not feel inclined to discuss any of the C. N.O.'s proposals for the future. Asked if the company would take over the Ontario Railway, he remained silent for two or three moments and then replied evasively, "Not at present."

Regarding the new elevators which it is expected the C.N.O. will build in Port William, Sir Donald would say nothing for as to that, "I have nothing for you as to that." "I can't say anything about it," was the only comment he would make on the island smelting process negotiations.

Increased Nervousness

NEW YORK, Sept. 20. showed indications as to the intention in regard to the anti-trust law. A second conference on a bill indicates that some fear of further disapproval of large corporations which once more will shoulder the heavier burden of the law.

As the law is passed, it will mean a reduction in the price of stock, and the lowest since 1906, and also reached a new low year, 1917, the low price of stock has been maintained for three months. The market has been in a state of depression since the beginning of the year. The market has been in a state of depression since the beginning of the year. LET NO ONE PERSONATE YOU TO-DAY OR TO-MORROW

To-day the polls open at 9 a.m. and those who vote often generally begin about that hour. So if you want your vote to count on the right side, better cut your breakfast short, and be on hand at 9 a.m.

To-morrow you may be personated as early as eight o'clock at this wonderful sale of twelve dollar suits at \$5.95. There aren't enough of them to risk being late, so if you want the best value of the autumn season, 8 o'clock is the hour to-morrow.

Honest tweeds, in greys and browns, are the materials from which these suits are made. You'll find the style is quite the newest and most desirable cut, for these suits are just in. They are tailored "for keeps," and we'd have to get ten and twelve dollars for them, if they'd been bought in the usual way. Our Friday price
