

HAD NO POSITIVE PROOF OF AN ATTEMPT TO BRIBE

Mulhall Tells Senate Committee His Story of Alleged Plot. ... HAD ONLY BEEN SHOWN WHAT WAS TO BE DONE

Washington, July 18.—Martin M. Mulhall today gave the Senate lobby investigating committee his story of the alleged plot in 1907 or 1908 to bribe Samuel Gompers to desert the cause of labor and support the policies advocated by the National Association of Manufacturers.

LIGHTNING KILLS MAN BUT BABE IS UNHURT

Powhasson, Ont., July 18.—During an electrical storm here this afternoon, Thomas Siller, a farmer, was killed. He was sitting in his home with a baby on his knee when the fatal bolt came. The child was unhurt.

FRED COOK ELECTED TO MASONIC BOARD

Ottawa, July 18.—The vacancy on the Board of General Purposes of the Masonic Grand Lodge, of Ontario, created by the choice of Mr. S. A. Lake, of Ottawa, as deputy grand master, and who by reason of that position is automatically chairman of the board, has been filled by the election of Mayor Fred Cook, of Ottawa, who was sixth man in the field of fifty candidates for the five elective positions on the board.

SENATORS ATTACK BRYAN FOR LECTURE TOUR IDEA

U. S. Secretary of State's Plan to Earn a Little "On the Side" Precipitates Bitter Controversy Among Law Makers at Washington. Washington, July 18.—Secretary Bryan's policy of lecturing in his vacation time involved the senate in a bitter controversy today.

REVOLUTION IN CHINA IS BECOMING MORE SERIOUS

Great Battle Reported Between Southern Rebels and Northern Loyalists. EXTRAORDINARY STORY COMES FROM KIU-KIANG Chinese Official Insults British Consul Saying "No Facilities For Britishers"—Rebellion Hangs on One Decisive Battle.

Peking, July 18.—Four thousand southern rebels from Nanking, Province of Kiang-Su, who had crossed the Yang-te-Kiang to attack the northern army, met with defeat today at the hands of 2,000 of the loyal troops near Suchofu, in the northwestern part of Kiang-Su province and a short distance across the northern border of Anhwei province.

Shanghai, July 18.—An extraordinary story has been brought here from Kiu-Kiang, a treaty port in the province of Kiang-Su. During the recent fighting Mr. Duff, the storekeeper at Ku Ling, a mission station about ten miles south of Kiu-Kiang, tried to obtain a pass from the northern general to send provisions to the front.

M. E. GRASS THE NEW HIGH CHIEF RANGER

Triennial Session of High Court I. O. F., Concluded Yesterday—St. John Chosen as Next Place of Meeting.

Moncton, July 18.—The high court I. O. F. of New Brunswick concluded its two days' session here this afternoon about four o'clock, and the next meeting will be held in St. John three years hence.

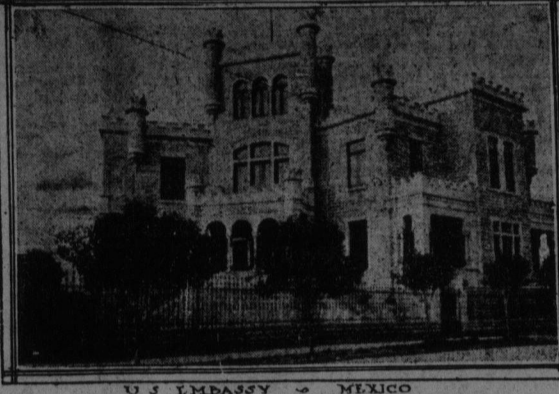

CHANGE IN DATE OF GEOLOGICAL CONGRESS

Toronto, July 18.—An important change has been made in the date of the meetings of the Geological Congress. They will begin at Toronto on August 7, instead of August 21 as previously announced and will terminate on August 14.

SCALED TO DEATH

St. Thomas, Ont., July 18.—Wm. Gilbert, 35, single, formerly of St. Thomas, was "scaled to death" this morning when he was struck by a steam train while about two miles out in Lake Erie.

UNITED STATES EMBASSY THREATENED.

The United States Embassy in Mexico is threatened. Ambassador Wilson received an anonymous note containing threats to blow up the Embassy.

NEWCASTLE AMATEURS IN MUSICAL COMEDY.

Newcastle, July 18.—"The Lost Chaperone," a musical comedy, was excellently staged before a full house in the Opera House last night by some 30 local artists under the direction of Arch. H. Cole.

QUEBEC MAN INTERRED BODIES OF TWINS DIED WITHIN TWO HOURS OF EACH OTHER AND THEN DISAPPEARED.

Quebec, July 18.—The authorities of St. Nome, Beauce county, were notified today of a mysterious affair that may lead to sensational developments. It was said that one Alfred Morin, residing at Woburn, Beauce county, in April last, interred twin babies, who died within a couple of hours of each other, behind his house.

JACK WARHOP

"Jack" Warhop, the star pitcher, is now back in his Yankee uniform. Warhop has been a long time rounding to this year. His arm has bothered him since the team returned from Bermuda in the spring, but he says he believes all the kinks are out of it and that he will be able to work just as often as is necessary from now on.

PROVINCIAL PREMIERS WILL MEET IN OTTAWA

Decision Reached that Conference Will be Held on August 29th—Will Discuss Representation.

Toronto, July 18.—It has been definitely determined that a conference of the premiers of the different provinces will be held at Ottawa, August 29 next. The announcement was made at the parliament buildings today that a joint letter had been addressed to the different premiers by Sir James Whitney and Sir Lomer Gouin summoning the conference.

"Did Baron Fucash ask you for my hand, father?" asked Gwendolin. "No," replied Mr. Cumros, "he called to discuss a marriage settlement. He didn't ask for your hand. He asked for my pocketbook."

STMR LUCILLE (Br), reports July 5, lat 39 40 N, lon 48 19 W, passed a mast standing upright and projecting about 8 feet out of water; covered with marine growth.

STMR CAROLINA (Br), reports July 7, lat 41 50 N, lon 44 W, passed a log about 20 feet long covered with marine growth.

STMR CAROLINA (Br), reports July 9, lat 45 30 N, lon 37 50 W, passed a spar standing upright and projecting about 10 feet out of water, apparently attached to submerged wreckage.

STMR MONGOLIA reports July 8, lat 38 40 N, lon 128 50 W, passed a piece of lumber 15 feet long, well covered with marine growth; same date, lat 38 20 N, lon 127 43 W, a log about 10 feet long and 18 inches in diameter.

CAPT. KNOX WINNING. Windsor, Ont., July 18.—Poult play is suspected in the disappearance of Capt. A. S. Knox, commander of a Standard Oil freighter, who has been missing since July 7. When last seen the man had \$16 in his possession and was on his way to his boat. Knox was known as one of the handsomest captains on the lakes. He was a blond giant, fifty years old, and weighed 210 pounds.

WARNINGS BY WIRELESS. The United States Weather Bureau Wednesday established a system whereby ships at sea will get storm warnings by wireless. Bulletins will be sent broadcast by the naval radio stations at Arlington, Va., and at Key West, Fla. The messages will be sent daily, a few minutes after 10 o'clock P. M. They will consist of two parts, the first giving the code letters and figures of the actual weather conditions at 8 o'clock P. M. (75th meridian time) at certain points—Sydney, Nanuet, Atlantic City, Hatteras, Charleston, Key West, Pensacola and Bermuda—with a special forecast with the probable winds to be experienced 100 miles off shore. In the second part will be the storm warnings and forecasts, which will cover a period of 48 hours from the time of issue. Although the new broadcast bulletin distribution will be exclusively through the two big radio stations, the other naval radio stations will continue to send out weather information and forecasts as they are at present doing.

MARITIME BOARD OF TRADE. The annual meeting of the Maritime Board of Trade is to be held at New castle, N. B., on the 20th August. Newcastle is the headquarters of the great Miramichi lumber industry and should prove a popular meeting place for the boards of trade of the lower provinces. There are many subjects of great interest that should occupy the attention of the business men of these provinces at the present time.

COMMITTEE TO CHOOSE MELLEN'S SUCCESSOR

Directors of New York, New Haven and Hartford Accept Resignation of their former President.

New York, July 18.—Charles S. Mellen's resignation as president of the New York, New Haven and Hartford Railroad was accepted by the directors this afternoon. The resignation is to be effective upon the appointment of his successor, whose selection was left in the hands of a special committee.

In an official statement issued in Mr. Mellen's behalf, it was said that he had felt it necessary to resign because of the existence of "certain disquieting possibilities for the New Haven route and its allied properties." He added that he felt he had been justified in everything he had done and would not attempt to explain the causes that led to the "disquieting possibilities."

The following committee was appointed to name his successor: J. P. Morgan, Theodore Vail, Samuel Real, Wm. Skinner, Edward Milken and Robert Taft.

TOOK THE GAS ROUTE.

Baltimore, July 18.—Thomas M. Hulings, vice-president of the Continental Trust Company, was found dead in bed in his apartments today. The illuminating gas was turned on full, and the coroner gave a verdict of suicide. It is believed that ill-health prompted the deed.

THE CHINESE UPRIISING.

Peking, China, July 18.—The belief prevails here that the Japanese are financing the revolution in the southern provinces. The situation in the provinces has improved somewhat today. The rebels yesterday killed 21 government officers.

CUT HIS THROAT TO END HIS TORTURE

Southern Railway Engineer Pinned beneath Locomotive Tires waiting for Death to Come

Decatur, Alabama, July 18.—Pinned beneath an overturned locomotive Huston Flemming, an engineer, put an end to his torture by cutting his own throat late last night, when spectators of his plight refused his request to kill him.

Flemming, with Floyd Hamlin, an air inspector, was testing a new locomotive in the Louisville & Nashville yards, when it was hurled from the tracks by a switch engine and overturned. Hamlin died today.

HAD NARROW ESCAPE IN ELECTRIC STORM

(Kings County Record.) The electric storm which passed over here on Sunday last gave rather a severe shock to Mr. and Mrs. J. M. Keith at Havelock, when the lightning struck the house, killing a dog instantly, which was in the room where they were sitting and lying by Master Ward's chair. It slightly damaged the house, but all are glad to know it caused no further injury.

EMERGENCY DEMONSTRATED.

The speech of Mr. Winston Churchill, explanatory of the policy of the British Government in consequence of the rejection of the Naval Aid Bill by the Senate, confirms in detail the announcement he made on June 5th last that "immediate action" was necessary. "The rejection of the Canadian Naval Aid Bill," he states, "has, for the time at least, deprived us of aid upon which we had been depending, and unless that gap is filled, by sacrifice of the British taxpayer, the general defence of the Empire, apart altogether from the defence of the United Kingdom, would be three ships short of the Admiralty requirements from the end of 1915 onward."

SUCCESSFUL DAIRYING.

In the wide field covered by the Department of Agriculture special attention is being given to the subject of cow testing for the benefit of the farmer. Much valuable information is being sent out by the Department showing what can be accomplished by giving typical cases of better results from better methods. The case of a dairy farmer at Cedar Hill, in the Gaspé Peninsula of Quebec, is cited. In the first year of which record is kept, eight cows gave him 33,511 pounds of milk, being an average of 4,188 pounds at a feed cost of \$32.50, netting a total profit of \$76.82, an average of \$9.60 profit per cow. The result of the year's observation was that the good cows were distinguished and were fed better. The second year eight cows gave 41,000 pounds of milk, an average of 5,176 pounds, or an increase of 1,000 pounds per cow. The feed bill amounted to \$41.20 more per cow as a result of the better feeding of the good milkers, but the total profit was \$177.39, or an average of \$22.16 per cow. The profits were thus increased 100 per cent. The Department's report in summarizing the results states that the gross income from milk from the same number of cows increased by \$133.43, and the profits were far more than doubled. Such cases as these—and there are plenty of them—should be sufficient to establish the value of the cow testing movement for which every dairy expert in the country is working.

INTERIOR STORAGE ELEVATORS.

A great boon is being conferred on the West by the decision of the Dominion Government to build interior storage elevators. The first two will be erected in Moosejaw and Saskatoon. Plans have been completed for buildings capable of holding from three to four million bushels of grain. The estimated cost in each case will be about one million dollars. Of modern type and adequate capacity, these elevators will fill a long felt want in the West. Owned by the Government, they will be operated as a public utility, and their establishment will tend to eliminate the evils of the middleman system. An up-to-date plant will supply the equipment necessary for dealing with wet and "sick" grain. With the extension of the system to the other provinces the task of handling the annual grain crops will be materially lightened, and grain blockades will be avoided. Locations for the elevators proposed for Alberta have not yet been announced, but the information may be expected shortly. As in the case of those for Saskatchewan, Vancouver and Port Nelson, they will be built under the direct supervision of the Grain Commission, and operated by the Government. The work of construction will be under the direction of Professor Howe, who has for the last five years occupied the chair of engineering at Dalhousie University and ranks very high in his profession.

CURRENT COMMENT

Regrets.
(Philadelphia Public Ledger.)
Always the United States is glad to help, but we pause when we realize that 200,000 good Americans going to Canada every year and taking with them over a hundred millions of American cash, they are building up Canada magnificently—but we wish they had been content to do the same work in their old homes. Opportunities in the United States are just as big as they ever were and it is not necessary for any one to emigrate to find profitable openings.

Canada's Resources.
(Montreal Herald.)
Dominion census figures giving the agricultural development of Ontario show that exclusive of the 141,000,000 acres of newly added territory only fifteen and one-half per cent. of the acreage of the Province is under agricultural development, and this in the most densely populated and richest Province in the Dominion. Those who fear an early exhaustion of Canada's resources may be reassured.

Burn the Garbage.
(Chicago Tribune.)
The great authority on municipal sanitation—Rudolph Herring—has long ago rejected garbage reduction because of its complexity. His opinion is that the profit from the process is no greater than the damage to surrounding property is borne out by our experience. He has demonstrated that incineration is the simplest, surest and safest method of disposal.

Canada's Fire Loss.
(Commission.)
The fire loss in Canada for the year 1912 amounted approximately to \$22,000,000 or a per capita loss of \$3.07. To this must be added a per capita cost of maintaining fire brigades, of \$1.25, making a total loss of \$4.32 per capita. The number of lives lost as a direct consequence of fire amounted to 203 for the same period.

DIARY OF EVENTS

HISTORIC DAYS IN CANADA

THE EARLY CANADIANS.

Giovanni da Verrazano, an Italian navigator who commanded the first French expedition to America sent out under royal auspices, arrived at Dieppe on this date in the year 1524, after a successful voyage in which he traversed the coast of North America from North Carolina to Nova Scotia and Newfoundland. Upon his return from the country which he called "New France," Verrazano wrote a letter to his royal patron, Francis I., in which he gave an interesting description of the Canadians of the early sixteenth century. "The people," he wrote, "were entirely different from the others we had seen, whom we had found kind and gentle, but these were so rude and barbarous that we were unable by any signs we could make, to hold communication with them. They clothe themselves in the skins of bears, foxes, seals, and other animals. Their food, as far as we could judge by several visits to their dwellings, is obtained by hunting and fishing, and certain fruits, which are a sort of root of spontaneous growth. They have no pulse, and we saw no signs of cultivation; the land appears sterile and unfit for growing of malt or grain of any kind. If we wished at any time to traffic with them, they came to the sea shore and stood upon the rocks, from which they lowered down by a cord to our boats beneath whatever they had to barter, continually crying out to us, not to come nearer, and instantly demanding from us that which was to be given in exchange; they took from us any knives, fish hooks and sundries on chemistry. No reward was paid to our courtesies; when we had nothing left to exchange with them, the men at our departure made the most brutal signs of disdain and contempt possible."

FIRST THINGS

THE REVOLVER.

The first successful revolver, or pistol with a rotating chambered breech, was the invention of Samuel Colt, who was born at Hartford, Conn., on July 19, 1802. He was the son of a manufacturer, and his inventive genius first found expression in his father's shop. He was sent to school at Amherst, Mass., but ran away to sea and made a voyage to India. On returning he was apprenticed to a chemist, after which, under the name of "Dr. Colt," he visited all parts of the United States and Canada, lecturing on chemistry. He earned a considerable sum of money, which he spent in perfecting his invention of the revolver, the germ of which he had devised while on his voyage to Calcutta. He was only fifteen when he made his first model in wood, which still exists. At twenty-one he patented his first revolving pistol in England, France and the United States. At this time he did not know that others had conceived the idea of a revolver, but while such was the case, they were far more likely to kill the man who used them than the object aimed at. Colt's first factory was established at Paterson, N. J., but failed. Later he opened a factory in Hartford, Conn., and became wealthy from the sale of his invention. Colt also laid the first successful submarine cable, between Coney Island and New York, in 1843.

THE PASSING DAY

DUKE OF SAXE-COBURG-GOTHA.
Saxe-Coburg-Gotha's quarter of a million people will celebrate today the twenty-first birthday of their ruler, Duke Charles Edward, who is, with the exception of King Alfonso of Spain and Grand Duchess Marie of Luxembourg, the youngest of Europe's reigning princes. The youthful monarch of the little German state, rules by the grace of the Emperor William, in the stead of the Duke of Connaught, now Governor-General of Canada, who refused the throne. He is the only son of the Duke of Albany, fourth son of Queen Victoria. His succession was in this wise: Duke Ernst II, who was a brother of Prince Albert, Queen Victoria's consort, died in 1853, after a reign of nearly half a century, and was succeeded by his nephew, Alfred, Duke of Edinburgh, who died in 1893. His only son, Prince Alfred, had died the previous year, and the Duke of Connaught, thus became his presumptive heir. He did not please him, and a few months later both the Duke and his son, Prince Alfred, died. His claims to the succession in favor of the young Duke of Albany. He has ruled since 1900. Duke Charles Edward's mother was the Princess Helen, daughter of Prince George of Waldeck, another German prince. The Duke's wife is Princess Victoria Adelaide, eldest daughter of the Duke of Schleswig-Holstein. They have three children, two sons and a daughter. In size Sachsen-Coburg-Gotha, to give it its German name, stands fourteenth among the twenty-six states comprising the German Empire, with an area of 756 square miles. Coburg and Gotha were formerly separate duchies, and are situated in Thuringia about fourteen miles from each other. The territories of the young Duke also include eight scattered exclaves strewn promiscuously about the map. The people of Coburg belong to the Franconian and those of Gotha to the Thuringian branch of the Teutonic family. The miniature nation has two capitals, one in each duchy.

SIR WILLIAM MANNING.

Jamaica's new governor, Col. Sir William Henry Manning, will pass the half-century mark today, having been born July 19, 1863. He was educated at Cambridge and the Royal Military College at Sandhurst, and entered the British army at twenty-three. He first saw active service in the second Boer war, in which he was wounded. Later he accompanied expeditions to the wild interior of India and to the jungles of Central Africa. He raised and commanded the Central Africa regiment. From 1910 until his appointment to the Jamaica post he was governor and commander-in-chief of the Nyassaland Protectorate. Sir William has won many medals for gallantry in action, and has an excellent record as an administrator. As governor of the "banana island" he succeeded Sir Evelyn Oliver, an eccentric but extraordinarily capable and efficient executive.

OPHELIA'S SLATE

IN LIGHTER VEIN

Obliging Her.
The sweet young thing was being shown through the locomotive works "What is that thing?" she asked, pointing with her dainty parasol. "That," answered the guide, "is an engine boiler."

Running Wild.
"Can you tell me how to secure a husband, Mrs. Worldlywise?" "Why, you've got a husband, my dear."

Trapped Her.
Bobby—Ma, you said that I shouldn't eat that piece of cake in the pantry—that it would make me sick. Mother—Yes, Bobby. Bobby (convincingly)—But, ma, it hasn't made me sick.

Missed Nothing.
He and she arrived in the fifth inning. (to a fan)—What's the score? Fan—Nothing to nothing. She—Goody! We haven't missed a thing!

Matrimonial Amenities.
He (during the quarrel)—Then, by your own account, I didn't tell you a single truth before we were married. She—You did one; you said you were unworthy of me.

Sufficiently Advertised.
"I found a pocketbook on the beach yesterday." "Did you advertise it?" "Yes; I told my wife."

Wheels Within Wheels.
Mrs. Crawford—I was so glad to find her out when I called. Mrs. Crabshaw—I knew you didn't like each other, so I told her when you were going to call.

Mean Thing!
Miss Redburn—"Do you think he will love me when I am old?" Miss Palisade—"There's one consolation. You will soon know."

The Best Quality at a Reasonable Price

Diamond Rings

If you have in mind the purchase of a Diamond—no matter what the size or grade—it is the part of prudence to use the most thorough discretion in its selection. Few persons know diamond values, and unless you are an expert you must depend on the dealer from whom you buy. You do not need to be an expert to buy a diamond here. We tell you exactly what kind of a stone you are getting, and even then you have only the finer grades to select from, for our stock contains no poor, off-color stones. There's a Diamond ring in our stock that will just suit you. Come in and see it.

WILLIAMS

HELD FIRST AID TESTS IN C. P. R. OFFICE

Ambulance Teams from C. P. R. Services in Various Centres, Here in Competition Yesterday.

S. A. Gidlow, assistant secretary Canadian Branch, and general secretary of the C. P. R. Centre, St. John Ambulance Association, accompanied by Dr. H. A. Beatty who is also connected with the association, held the examinations for the branches of the organization in New Brunswick here yesterday. Teams from the service of the Canadian Pacific Railway from Brownville Junction, McAdam Junction and Aroostook Junction took the examinations with satisfactory results.

The Brownville Junction team, composed of C. A. Wood (capt.), W. J. Walsh, Ralph Fisher, M. Riley and W. S. Chase were awarded first place with 160 points out of a possible 217. The McAdam team composed of J. O'Neill (capt.), B. B. Herd, J. Thomas, G. Craig and F. Seeley were second with 141 points.

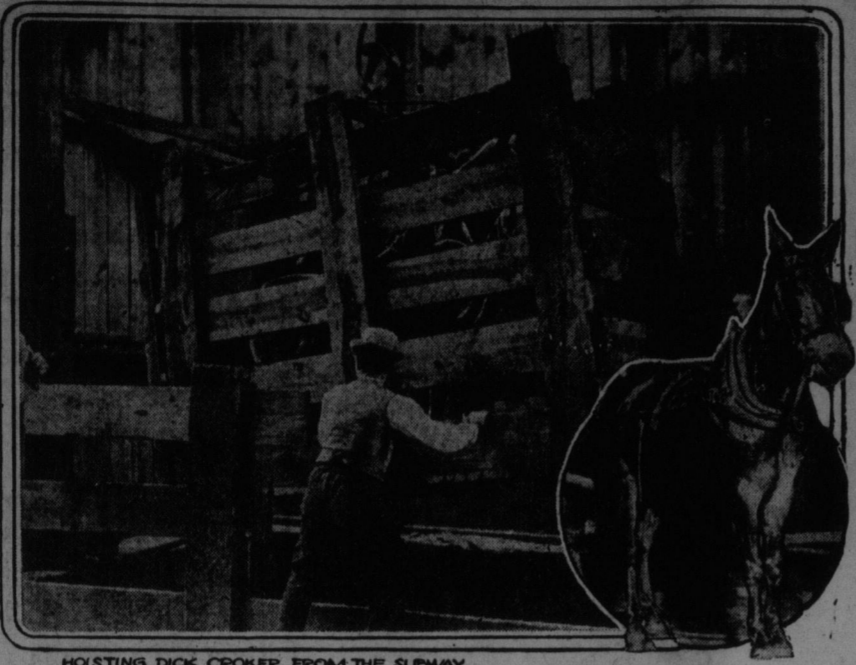

The Aroostook Junction team, composed of W. Crandall (capt.), A. E. Palmer, D. S. Boone, A. R. Turner, and C. S. Gaines, were awarded third place with 135 points.

Mr. Gidlow and Dr. Beatty, who is the chief surgeon of the eastern lines of the C. P. R., seemed well satisfied with the results but deplored the fact that a larger number of teams were not present. The first aid movement, however, is daily gaining headway and they expect that within a short time hundreds of men will have been taught the proper manner to apply the necessary aid to prevent loss of life.

The tests taken up yesterday were the stretcher and individual tests. In the stretcher test it was supposed that a man had been struck by an engine and sustained a severe scalp wound over the right eye and rendered unconscious. The left arm hung limp and the left leg showed an angular deformity midway between the knee and the ankle. The different teams were taken separately and made to diagnose the case, treat it and transport the victim one mile. A stretcher and the necessary bandages were supplied.

In the individual test the students underwent an entirely different examination and were forced to apply first aid with articles of clothing or whatever they could find to use. This proved a most interesting problem as newspapers, coats and other articles

VETERAN MULE EMPLOYED IN SUBWAY KEEPS TIME FOR WORKERS

HOISTING DICK CROKER FROM THE SUBWAY

In Manhattan strange things happen. The strangest so far is the animal clock, Dick Croker, the veteran mule employed in the subway. He is really the timekeeper of all subway workers. When Dick is lowered in his crate to the underworld people know that it is eight o'clock, and when Dick leaves his occupation in the subway and walks toward his crate to be hoisted up to the street the laborers drop their tools, for the veteran mule has let it be known it is five o'clock. Dick has worked twelve years in the tunnels and is the oldest animal in the service.

were quickly turned into bandages, slings and splints.

Addressed Police Chiefs.

Mr. Gidlow, who is also secretary for the western lines and honorary secretary for the Dominion of Canada, has just returned from Halifax where he addressed the meeting of the police chiefs. At the meeting he urged the necessity of policemen and firemen learning first aid. In Vancouver, Winnipeg and Toronto this is compulsory and although Mr. Gidlow is not in favor of compulsory training, he believes the policemen especially should have a thorough knowledge of this necessary art. In the above cities they are given three months to learn or are dismissed from the force.

Take for instance, said Mr. Gidlow, a man who is knocked down by a street car and sustains a broken thigh. The first man on the ground is usually a policeman, who if he does not know the proper thing to do, bundles the victim into a cab and sends him to the hospital. Now, when a man sustains a broken thigh the bone should be set before he is moved because of the danger of the jagged edge of the broken bone cutting an artery leading to death by excessive bleeding.

To prevent fatalities of this description the policeman should be able to reset the bone.

Another case, said Mr. Gidlow, when a knowledge of first aid by policemen would result in saving life, is that of a man stricken with apoplexy or kindred fits. These men are often arrested for drunkenness and found dead in their cells next morning.

When in Halifax Mr. Gidlow received a request from the Board of Management of the I. C. R. to address all their employees at a mass meeting in Moncton. He complied with this invitation with the result that now hundreds of these men are studying with beneficial results. After speaking of the different ways relief can be given, Mr. Gidlow gave the reporters a practical demonstration and in a few moments taught them to set broken bones and to stop bleeding from any part of the body.

Caught.

Riggs (facetiously)—This is a picture of my wife's first husband. Diego—Silly looking guy! But, say I didn't know your wife was married before she met you. Riggs—She wasn't. This is a picture of myself when I was 25.

GROUND UNDER TRAIN WHEELS.

Sault Ste. Marie, Ont., July 18.—Knocked from a train which was being shunted and ground beneath its wheels, chief fire ranger J. A. Ritchie was instantly killed last night a few miles up the Algoma Central Railway.

LEAVES ESTATE OF \$200,000.

Toronto, July 18.—The will of the late Senator Archibald Campbell, of West Toronto, who died last February, was filed for probate today. It disposes of an estate of over \$200,000, most of which goes to relatives.

HOUSE BURNED AT MACE'S BAY

Frederick and Harry Mahoney Lost Property as well as Sums of Money.

The Mahoney homestead at Mace's Bay, was destroyed by fire on Wednesday morning last, and very little of the furniture was saved from the building. Fred Mahoney and wife resided in the homestead, and his two brothers, Harry and David, resided with him. David had been out to a dance the night before, and on Wednesday morning remained home asleep while the others were out.

About nine o'clock he was awakened by the house being full of smoke, and then he discovered that the entire roof was burning. A portion of the furniture was removed from the building, but the fire, which is supposed to have caught from a defective chimney, had such a start that nothing could be done to save the building and it was burned to the ground.

After the fire it was discovered that Harry Mahoney had lost \$50 which he had left in the house, and Frederick lost the sum of \$80 which had been burned up with the building.

WEDDINGS.

Pugsley-Jones.

A pretty wedding took place at the residence of Mr. and Mrs. Melvin Jones, of Lakeville, Queens County, on the fifteenth inst., when their daughter, Lillian Maud, was united in marriage to Calvin W. Pugsley, of Central Cambridge, Queens County. The ceremony was performed by Rev. Mr. Rowlands. Miss Helen Leckey acted as bridesmaid and the groom was supported by Charles Jones.

The wedding service was held at five o'clock in the afternoon and afterwards a supper was served, and an enjoyable evening spent by the assembled guests who were present to the number of 70 or 80. The bride looked charming in a costume of white voile over silk, carrying a large bouquet of flowers. She is a very popular young lady and the esteem in which she is held was well shown by the large number of presents she received. Mr. and Mrs. Pugsley will reside at Central Cambridge.

LAKE STEAMER ASHORE.

Sault Ste. Marie, Ont., July 18.—The steamer Victoria is ashore at Iroquois Point after overiding her anchor and there is an ugly hole in her starboard side. One compartment is filled with water and the vessel is heavy listed. The lighter Bellanca and the tug Boynton have gone to her assistance.

TRAVIS CASE RESUMED IN COURT YESTERDAY

Proprietor of Store Identifies Articles Found on Prisoner as Similar to those Kept in His Store.

In the police court yesterday afternoon the case of John Travis, a youth charged with breaking, entering and stealing from Barrett & Smith on Dock street was resumed. Daniel Mullin, K. C. appeared for the defence. Young Marshall who is employed in the establishment gave evidence of finding the place ransacked in the morning when he opened the place. He also identified some pocket books that were found on the prisoner as similar to those kept in stock by the firm.

George J. Barrett, the proprietor of the establishment, was called and identified the pocketbooks found on the prisoner as being similar to those kept in stock by him.

Patrolman O'Leary, who arrested Travis, told of seeing the defendant walking from the direction of R. F. & W. F. Starr's office on the night of the break, about 10.30 o'clock, and stated that he told Travis to go home and of finding him out later in the night on Union street and placing him under arrest.

Patrolman Shortliff and Sergeant Caples also gave evidence of seeing Travis about the vicinity of the breaks on the night in question.

The case was adjourned until Tuesday afternoon next at two o'clock.

DIED.

FULTON—Suddenly, at Lingley, on the 17th inst., Sydney Clarence Sutton, only and beloved son of William and Annie M. Fulton, leaving a mother, father and five sisters to mourn their sad loss.

Funeral at 3 p. m. Sunday from his father's residence, 42 Water street, West End.

COLLIN—In this city on the 17th inst., William Roy Collin, son of Mr. and Mrs. Francis Collin, death from drowning, leaving besides father and mother, two sisters and two brothers.

Funeral at 3 p. m. from his father's residence, 15 Prince St., West End.

ROBERTS—In this city on Friday, July 18th, after a lingering illness, Linley James Roberts, son of E. H. and M. J. Roberts, leaving besides his parents, one brother and four sisters to mourn their loss.

Funeral will be held Sunday at 3 p. m. from his parents' residence, 27 Garden St., to St. Mary's church.

CLARK—At her late residence, 54 Watson street, St. John West, on the 17th inst., Amy Amelia, widow of the late Daniel W. Clark, of St. John West, aged 85 years, 9 months. Funeral from her late residence on

THE GATLIN INSTITUTE

Secures Local Building and Property.

The Gatlin Institute Co. has secured the handsome and commodious building located at 46 Crown St., Corner of King street.

This large building, which is handsome in both exterior and interior, is being well furnished and with every convenience and comfort for the short stay of three days which each patient requires to make for their wonderful liquor cure.

This is another step in the progress of this city, owing to the fact that this is the only original, reliable three-day liquor cure, and St. John has been selected for permanent location, being the only city east of Montreal with a branch.

It was only after careful investigation, and owing to the business the company has had in the provinces, that they decided to come to St. John. They operate under government charter, having large capital back of the business, and will undoubtedly meet with good reception by the people in this city, and throughout the Lower Provinces.

Saturday afternoon at 3 o'clock. Service at 2.30.

BARDSLEY—In this city on the 17th inst., Lillian M., daughter of Elizabeth and the late Robert Bardsley, leaving her mother, four sisters and three brothers to mourn their sad loss.

(Winnipeg and Boston papers please copy.)

Funeral on Saturday at 2.30 from her late residence, 72 Exmouth street.

Miss McGowan Did Well.

When the names of those winning high points in the High school examinations were published a few days ago the name of Miss Phyllis M. McGowan was unfortunately omitted. This young lady made 781 points, which was most pleasing to her many friends.

Our Great Semi-Annual CLOTHING SALE

NOW ON

Clearing Sales Are Not An Everyday Occurrence With Us, We Hold But Two Sales Annually, July and January

Our summer stock must now be closed out, the unvarying policy of this house to carry no goods over from one season to another makes an immediate and complete clearance imperative, hence this event—this opportunity to select from our entire assortment of

MEN'S AND LADIES' CLOTHING AND FURNISHINGS

at a genuine reduction of 20 to 40 per cent. from our regular prices. Please consider that this is a bona fide clearance, not a Curtailment of previously padded prices—a sale of manufacturers' left overs or juggling of prices; it's a square deal for you and ourselves, a chance that every Lady or Gent will eagerly embrace.

FINANCIAL AND COMMERCIAL NEWS AND COMMENT

PRICE'S LETTER ON STOCK MARKET

(F. B. McCURDY & CO.)
 New York, July 18.—As compared with the ending July 11th, in which prices of stocks, cotton and grain, underwent little change the last several days furnished a very striking contrast. Much has developed in the way of news, and rather as the result of a sold out condition, because the news developments have been continued with favor to prices of stocks tonight as compared with those of Friday a week ago show advances which are very pronounced. Standard issues such, for instance as Steel, Union Pacific, Lehigh, Reading, Copper and C. and O. show advances of from 3 to 4 points, and in one or two instances the advances are even greater. Canadian Pacific's close tonight as compared with that of Friday night is six points higher. Cotton is from three-quarters of a dollar to a dollar a half higher. Corn shows an advance of from one and three-quarters to two cents a bushel. The wheat market affords the only exception. That commodity having fallen off in price slightly in response to the generally favorable view which is taken of the crop. The changes in the commercial and industrial conditions have been mainly favorable, and in some instances which are quite marked. The dry goods markets report freer buying, and factories in other industrial branches have resumed work and are now actively engaged in anticipating the fall requirements. An item of news which has distinctly illuminating was the statement of H. C. Claflin Co., which was made public this week, which showed net earnings for the year ending June 30, 1913, which were \$1,000,000 in excess of the net earnings for a like period ending June 30, last year.

NEWS SUMMARY AFFECTING MARKET

(F. B. McCURDY & CO.)
 New York, July 18.—The banks of England, France and Germany show favorable statements. Unfavorable news from China, Mexico and the Balkans depress the foreign stock markets. President Wilson is not ready to recognize Huerta. The tariff fight begins today in the Senate. Marsh and Miller, representing the New York Cotton Exchange, protest to President Wilson against the cotton futures tax. The members of the United States Board of Mediation and Conciliation are appointed. The trainmen are unwilling to arbitrate grievances except their own and renew strikes threaten. The American Express Company will close its books Friday of next week for a 25 per cent stock dividend of Wells Fargo shares. Information channels favor a trading position.

A. O. STANLEY DENIES LAMAR TESTIMONY

AUGUSTUS O. STANLEY

Representative A. O. Stanley, of Kentucky, in a speech in the House produced the records of the House to show that a whole year before the investigation of the Steel Trust was ordered he had introduced and had favorably reported by the Judiciary Committee a resolution for an inquiry similar to the one which David Lamar and Henry B. Martin, secretary of the Anti-Trust League, told the Senate Lobby Investigating Committee they had "inspired." Mr. Stanley declared their assertion that they had "influenced" him to introduce the resolution was "ridiculous" and branded their statement as an "absolute falsity." "That resolution," said Mr. Stanley, "was submitted, months before it was introduced into the House, to the present chairman of the Judiciary Committee in the spring of 1910, a year and a half before this Lamar is supposed to have sent a resolution to me, before I ever knew there was such a man as Martin in existence; and I may add that I never heard of Lamar until some time after the investigation in the Senate was in progress."

M'CURDY & CO'S FINANCIAL LETTER

(F. B. McCURDY & CO.)
 Montreal, July 18.—The stock markets as a whole have shown a much better tone during the past week than for a considerable time previous. The Balkan situation has not altered much for the better and may even be somewhat worse. This, however, does not seem to be a sufficiently bearish influence to drive prices down any further and at the end of the present week advances from Paris, Berlin and London are quite an encouraging character. This does not mean that there is very much promise of an advance but simply that the decline seems to be at last checked.

LIDLAW & CO'S CLOSING STOCK LETTER

(J. C. MACKINTOSH & CO.)
 New York, July 18.—While there was little increase of outside interest in today's stock market there was a marked improvement in point of activity and strength derived from more or less professional sources. Traders derived their inspiration to bid up prices from the obviously sold out condition of the market which responded rather easily to this initiative. There was no news to account for the improvement in being accomplished at New York for speculative purposes. These conditions have not improved to a point which would foreshadow any early accommodation of money at New York for speculative purposes, but the change for the better is nevertheless very perceptible. While this improvement is being accomplished at the expense of general business such evidence of healthy re-adjustment is a legitimate bull influence in the stock market.

DOW JONES CO'S SUMMARY OF NEWS

(J. C. MACKINTOSH & CO.)
 New York, July 18.—Charles H. Mellen resigned as president of the New Haven and all subsidiary roads at a full meeting of the Board yesterday. No action taken on resignation but another meeting will be held today. American Express to distribute its Wells Fargo stock in ratio of one share of Wells Fargo to every four shares of American Express held. Union leaders say strike will be called unless railway managers withdraw grievances from arbitration. Representative Henry plans war on Currency Bill in caucus. Equitable Trust Co. petitioned to intervene in Wabash foreclosure suit. Interstate Commerce Commission reports operating revenue of all railroads in United States reached \$2,826,917,967 in fiscal year 1912, or \$54,000,000 ahead of 1911. Operating net decreased \$17,986,214. Americans in London firm, generally one-quarter to five-eighths up. Twelve industrials declined 33 and twenty active railways 25.

stock this week also, owing more particularly to the announcement of the terms of the deal whereby the plant was taken over that of the Lake Superior Paper Company. The Espanola plant of the Spanish River Company is within a hundred miles of that of the Lake Superior Company. The latter is a new plant with a capacity of about 230 tons per day of newspaper besides ground wood and sulphite. The Spanish River stock has not been very strong on the announcement of the price having declined to 39 1/2. Rumors of this character do not seem to resolve much credence in market such as this, but the stock nevertheless has advanced a few points.

NO INFORMATION OF LONG WHARF PURCHASE

Report of C.P.R. Acquisition of Water Front Property not Confirmed—Board of Trade Asks.

The report that the C. P. R. had acquired the Long Wharf or a berth there, was a subject of discussion at the meeting of the council of the Board of Trade yesterday, and it was decided to send communications to the C. P. R. authorities at Montreal and Ottawa, asking for definite information about the report.

Up to a late hour last night the Board had not received any reply to their communications. The commissioner of harbors stated yesterday that he had no information about the matter. "I hardly think," he added, "that the I. C. R. would sell its Long Wharf property at the present time. But when the harbor at Courtenay Bay is available, I don't know that there would be any serious objection to letting the C. P. R. have the Long Wharf."

The Standard's correspondent at Ottawa wired last evening that the C. P. R. was unable to get any information there about the reported sale of the Long Wharf.

AROUND THE CITY

Will Visit His Parents.

Rev. W. J. Buchanan, pastor of Mapleton Park Congregational Church, Brooklyn, accompanied by his family will spend the month of August in St. John, visiting his parents, Mr. and Mrs. James Buchanan. Rev. Mr. Buchanan is a St. John boy who has won recognition as one of the ablest preachers in his denomination in the United States.

Want Grant for Parade.

At the last meeting of the Trades and Labor Council it was decided to hold a parade and demonstration on Labor Day, and to ask the city council for financial assistance to make the demonstration a success. It was said the City of Montreal had granted the Trades and Labor Council \$500 for a similar purpose, and that the city of St. John contributed sums of money to all kinds of organizations.

Laborers for Annapolis.

That with all the construction work going on about the city which requires labor there are yet many of the laboring class in the city idle was seen yesterday when the steamer Prince Rupert carried away about 50 foreign laborers. The men were being transported through the agency of Louis Feller to Annapolis, where they will be employed at the Dominion Lumber Company.

The Advertising Campaign.

The advertising campaign conducted by the Board of Trade in connection with the Old Home celebration last year is still bearing fruit. Yesterday a letter was received from former St. John man living in Maine referring to the communications sent him last year, and asking for further information as to the prospects which might be open to him if he came to St. John to live.

Will Tour Nova Scotia.

The beautiful sailing craft Janet, owned by Arthur Likely, will leave today for Digby with a party of eight who will spend a few days in Nova Scotia. After the arrival at Digby the party will motor to Yarmouth and journey through the Annapolis Valley. Those who will compose the party in the Janet are: Mr. and Mrs. Arthur Likely, Mr. and Mrs. J. A. Likely, Miss Jessie Likely, Dr. David Likely, of New York; George Gray and J. C. Belyea.

Not Many Appeals.

One of the duties of the Mayor under the present system of government is to act as an appeal committee and listen to the pitiful stories of those who cannot pay their taxes. This year there have not been as many people as usual applying for relief from taxes, but still there are enough to take up a good deal of the Mayor's time. To quite a number of men in the city the small tax imposed on laboring men looks large, and turning it over to the city means more deprivation for their families.

Mt. Pleasant Water Main.

Yesterday Com. Wigmore completed the installation of the new water main to Mount Pleasant which was laid through the park and connected with the pipe running up Mt. Pleasant for the purpose of providing a better pressure on the heights. As a result of tests made yesterday it was shown that the pressure had been increased two and two-fifths times at Kelley's corner. The new main is a twelve inch one, and will supply sufficient water for almost any possible fire fighting emergency on Mt. Pleasant.

Marsh Bridge Mission S. S. Picnic.

The Marsh Bridge Mission Sunday school held its annual picnic at "Seaside" on Wednesday. A large number were present and games and races were participated in. Rev. R. L. MacTavish, of Winnipeg, brother of C. P. MacTavish, superintendent of the mission, was present and gave an interesting address, which was much enjoyed by all present. The picnic dispersed about eight o'clock, when three cheers were voted for the superintendent and heartily given by the boys and girls.

The Country Market.

In general there is a good supply of produce in the country market for today. The different varieties of most are more plentiful in the market than they have been for some weeks. In the vegetable line there is also an increased supply. The prices for the most part remain unchanged. The retail quotations for today are: Roast beef, 12c to 22c; steak, 15c to 16c; lamb, 15c to 22c; chops, 20c to 25c; pork, 15c to 20c; veal, 10c to 15c; mutton, 10c to 15c; chicken, 11c to 13c; fowl, 11.50 to 12c; beans, carrots and turnips, 10c; peas, 5c; corn, 1c; potatoes, 5c to 6c; cucumbers, 10c; tomatoes, 20c; lettuce, 5c.

MEN NOT WORRYING OVER CLOSING OF THE MILLS

May be Effort to Induce Owners to Resume Because of Effect on Other Industries.

Representatives of the Mill Workers Union called at The Standard office last evening and said that the article in an evening paper urging somebody to try to settle the strike of the millmen placed a misleading construction on the situation because, they claimed, if the millmen had been locked out, the unions had made a request for more wages and offered to submit their demands to arbitration, and the reply of the mill owners was to close down the mills and lock out not only the union men but the inside men who had not asked for an increase. At present, according to the union officials, the deal makers, raftsmen, pondsmen and inside workers are all employed at other jobs and have no cause to worry over the situation created by the closing down of the mills.

Wheel Stolen from Water Street Building Found by Detective Killen, on Mill Street Shortly Afterwards

About 5.45 o'clock yesterday afternoon some person stole a bicycle from the second floor of the Magee building on Water street and made away with it. The wheel was the property of Raleigh Myers, 41 Cranston Avenue, and being employed by F. C. Wesley, on the upper floor of the building, the young fellow had left his wheel on the second floor while he was at work.

THE KANE'S CORNER LINE.

123 St. Peter's street, Montreal, July 17, 1913.

To the Editor of The Standard, St. John, N. B.:

Dear Sir,—I am a large owner of property and a heavy tax payer in the Parish of Simonds. The question I would like to have answered is whether the Saint John Street Railway owns the town, and if the city authorities are going to tolerate and allow the Street Railway Company to tear up your streets and lay rails on the presumption that they intended to operate to Kane's Corner in thirty days from starting of work.

Sec'y Hoagg of Board of Trade to Attend Furniture Exposition in New York Next Week.

The Council of the Board of Trade met last evening and decided to send the secretary, H. T. Hoagg, to New York to attend the furniture exposition in progress there. In connection with the exposition there is a convention of furniture manufacturers and the object of sending Mr. Hoagg was given to Detective Killen to solve. The detective learned that a man was seen going up Dock street with a wheel and, after a short hunt, the officer found the stolen wheel on Mill street, where the thief had left it.

Will Not Hold Inquest.

Coroner Keeney said last night that he had decided not to hold an inquest into the deaths of Sydney Fulton and William Collen who were drowned at Linsley on Thursday evening.

Engine for Chipman.

A 500 horse power engine, part of the equipment at the electric light power house, has been sold and was yesterday shipped to Chipman where it will be used in the operation of the Sayer mill.

STOLE SLOT MACHINE.

Berlin, Ont., July 18.—Alfred Schaeffer, who pleaded guilty to a charge of stealing a gum slot machine from a local store on July 6th, was sentenced today to one year in central prison. He was married six weeks ago.

FIRE IN HALIFAX.

Halifax, July 18.—The interior of John White and Company's store on Water street was gutted by fire tonight. The damage to the building was not great but the loss on the stock which suffered by water, will be heavy.

PERSONAL.

Mrs. Charles Ambrose Glyn, of New York, is at the Royal Hotel on her way to Prince Edward Island with her niece Miss Gertrude Donna Kassler.

YACHTSMEN MAY THIS AFTERNOON

Left Last Night for Boston and will Get Tips on Fire Fighters Used on Water Front.

Com. McLellan left last evening for Boston and other towns in New England. While away he will inspect the fire boats in Boston harbor, with a view to getting information as to the equipment of a fire boat to be used in case of fires on the water front of St. John. The old council discussed the matter of getting a fire boat for St. John several times, especially with a view to the protection of the city's wharf property on both sides of the harbor. Some of the tugs working in the harbor are equipped with powerful force pumps and lines of hose, and did good work at the fire on the McLeod wharf not long ago. But at present there are no lugs here which are equipped with fire fighting apparatus at all comparable with that of the regular fire boats maintained by large American seaport cities.

"Happy Days" Cruise Starts Today for Week of Pleasure.

The cruise this year promises to be a better one. The fleet, it is expected, will be larger than ever, and should the weather prove fine the boys expect that for real pleasure and enjoyment the coming week will rank first among the days spent on the annual sail.

Gun on Flagship will Blast Signal to Ship Anchor at 3 o'clock — Motor Craft will Join Fleet.

The Standard's correspondent at Ottawa wired last evening that the C. P. R. was unable to get any information there about the reported sale of the Long Wharf.

More Dredging on West Side by Gov't

Com. Schofield notified Nelson and Wellington slips will be dredged — Will Make More Berths.

Com. Schofield has been notified by the Department of Public Works that the government will undertake the work of dredging out Nelson and Wellington slips on the West Side. Owing to the construction of the wharves around these slips the dredging cannot be done to any great depth, but by cleaning out the silt that has drifted into the slips, several berths will be made available for schooners in the winter when there is so much pressure on the harbor accommodation.

UNION JACK LODGE WINS HIGH HONORS

Has Secured More Members for Prentice Boys than any other Lodge in Canada—Wins Collar.

For the second time Union Jack Lodge No. 25, Protestant Association of Prentice Boys, has won the prize offered by the Grand Lodge of Canada to the local lodge securing the largest number of new members in the course of a year. Considering that the association has lodges scattered all over Canada, Union Jack Lodge has some right to be proud of the fact that it has twice beaten out every other lodge in Canada in the matter of securing new members. The prize, which is a handsome collar for the worshipful master, arrived this week, and at future meetings will adorn the person of H. P. McCordick, who is serving his second year as worshipful master. The lodge secured 56 new members last year. It hopes to carry off the prize next year, having already got 32 members on its roll who will count in the competition.

THE GEOLOGISTS VISIT.

A. O. Hayes of the Geological Department, Ottawa, is in the city and will arrive on the 30th inst. Mr. Hayes will in conversation with The Standard last evening said the preparations for the congress which will open on August 7th were going rapidly forward and that arrangements were made for excursions to be held before and after the convention.

WANTED—Bell boy, also chambermaid, Apply Royal Hotel.

COM. McLELLAN WILL INSPECT FIRE BOATS

Left Last Night for Boston and will Get Tips on Fire Fighters Used on Water Front.

Com. McLellan left last evening for Boston and other towns in New England. While away he will inspect the fire boats in Boston harbor, with a view to getting information as to the equipment of a fire boat to be used in case of fires on the water front of St. John. MEN'S FURNISHING DEPARTMENT.

A Pleasing Showing of New Dress Goods
That Will Interest Our American Friends

Many tourists have already found their way into our Dress Goods Section. Canadian prices on dress goods are little savings that add to the pleasure of the vacation trip. Space will not allow for a full talk on the new arrivals here for your inspection, but a few of our leading lines are mentioned below:

WHIPCORDS, a goods proving as popular as ever, on display in various colors, green, tan, Dutch blue, golden brown, leaf green, rosea green, plum, purple, navy and black.

NEW BEDFORDS, this is a smart attractive weave, a most promising cloth for the coming season, shown in the same colorings as the whipcord.

MANHATTAN ENGLISH WORSTEDS, a material that tailors perfectly and wears well; exceptionally wide, being 56 and 58 inches, selling at \$1.55, \$1.50, \$1.75, \$2.00 and \$2.25 a yard. The width of this material is the saving quality of it.

For the Johnnie Coats, now so much in evidence, we are showing the following in new goods: A Stylish Bedford Velvet Cloth, Two Tone Stripe Velvet Cloth, Wales Tweeds and Scotch Tweeds, Ratine Cloth and others.

St. John women should take an early advantage of seeing all our new fall cloths.

FRIENDS PRESENT HER WITH FAREWELL GIFT Miss Emma Kirkpatrick Recipient of Friendly Token on Eve of Departure from Upham.

Upham, July 18.—What proved to be one of the most pleasant functions of the season was the farewell surprise party held at the home of Mr. and Mrs. T. W. Reids in honor of Miss Emma Kirkpatrick under the auspices of Tuck Lodge No. 118 of which Miss Kirkpatrick was a valuable member. The evening was spent pleasantly in games, music and dancing. At midnight ice cream, cake and coffee were served after which the chairman called the meeting to order and presented Miss Kirkpatrick with a handsome gold locket and chain, a slight token of respect. The gift was accompanied by the following address: "We, the officers and members of Tuck Lodge No. 118 and children of School District No. 6, having learned with sincere regret of your departure from our midst at an early date, take this opportunity of extending to you our best wishes and Godspeed in your new field of labor and in appreciation of your valuable service to our lodge and school, and in token of our affection and esteem we ask you to accept this gift, which we trust you will recognize is given not so much for its value but in simple and honest expression of our appreciation of your excellent character, untiring and faithful work, and that cheerfulness of disposition which has won a place in the hearts of all those with whom you have been connected while with us. We wish you to believe we feel keenly at the present time the loss we have sustained by your removal from our midst and hope that while wearing this

NEW ZEALAND ON HER WAY TO VANCOUVER

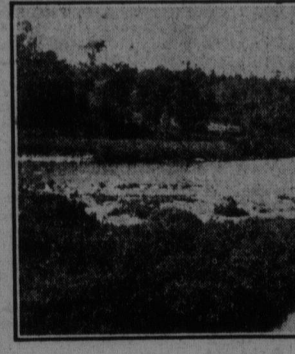

Battleship from Antipodes Sales from Honolulu for Pacific Coast -- Will be Welcomed by Mr. Hazen.

Honolulu, July 18.—The British battleship New Zealand sailed today for Vancouver, B. C., after a week of entertainment. The last affair was a dinner on board ship, given by Captain Halsey to General and Mrs. Funston, Admiral Moore, and Consul Rentiers and his wife. Yesterday Captain Halsey and his fellow officers reviewed the infantry, cavalry and artillery stationed at Fort Schofield. A large crowd watched the New Zealand get underway, while the American band played "God Save the King," and the ship's band played "The Star Spangled Banner."

Hon. J. D. Hazen, Minister of Marine and Fisheries, who is now on route to the coast, will welcome the New Zealand at Vancouver as the official representative of the Canadian government.

At seven o'clock last evening fire was discovered in the upper floor of the St. John Iron Works moulding shop at the foot of Sydney street and an alarm was sent from box 47. When the firemen arrived they found that the fire was doing considerable damage and besides burning in the room it had caught the roof. A couple of streams of water played on the flames soon had the fire under control. The damage will amount to a couple of hundred dollars.

Found Parcels in Yard. While going his rounds last evening Patrolman Sullivan found six parcels in a yard of Church street belonging to Messrs. Brock and Paterson. The officer notified the watchman of the building and had the parcels taken into the establishment.

A Magnificent View Near the Jordan Memorial Sanatorium.

ing a mighty work, giving back to stricken men and women lost health and happiness and, last but not least, an opportunity of returning to their homes sound in mind and body, again able to grapple with the problems of life, free from the terrible taint of the Great White Plague. Rest and Regularity. To the untalented the Sanatorium presents a problem of deep and abiding interest, but that which impresses the visitor most, after the natural beauties of the situation have evoked sincere admiration, is the pervading air of quiet and rest which permeates the entire institution. Rest and regular habits form the ground plan of the cure, and it is with earnest efforts that the sixteen patients progress toward perfect health by implicitly following the regulations which order the coming and going of their days. The urgent need of just such an institution can be seen and understood by the most callous, and a walk through the streets of any city, town or village of the province will reveal to the observer the great necessity of caring for the tuberculosis victims. "In the majority of cases," said Dr. Townsend, as he conducted the reporter through the different buildings, "those stricken with the plague are afraid to admit the true nature of their illness and will go from doctor to doctor until told they are not ill. Then comes the final breakdown leading to death. To combat and to overcome this terrible state of affairs was the principle underlying the foundation of

"Hullo Fatty! Have you got it too?" the Jordan Memorial Sanatorium, and its object is to point out to the public the danger in which it stands, and to effect a cure before the disease has secured a fatal hold.

The Doctrine of Prevention. An ounce of prevention is better than a pound of cure, and indeed it aptly applies

A View Showing the Three Pavilions and Administration Building at the Jordan Memorial Sanatorium.

to the fight against tuberculosis. The Jordan Memorial Sanatorium," said Dr. Townsend, "is not a hospital where incurable cases are treated, but a place where those with the disease in incipient stages are taken in, treated and cured. There is a vast difference, and the sooner the treatment is commenced the sooner will the victim be returned to his home in perfect health."

The institution is situated five miles from River Glade Station on the line of the Intercolonial railway, on the banks of the Pollet river. From a scenic viewpoint it is all that could be desired, as the group of buildings occupies a quiet glade surrounded by hills clad with spruce, fir and other trees. Away on the outskirts of civilization it is blessed with the most modern conveniences necessary to the work, all of which are taken advantage of.

In quiet harmony with the scenery are the buildings themselves, the three pavilions, or bungalows, the administration building, the free-ward building, which has not yet been opened, the neat barn and the site of the power house are arranged to fit with their surroundings in a manner to convey to the ill a sense of being home and to appeal to the imagination of those who are nearing recovery.

Can Accommodate Thirty. The sanatorium has accommodation for thirty patients, and when the work is well underway additional accommodations will be added. Each pavilion is fitted for ten patients and is supplied with conveniences ranging from acetylene light to shower baths.

In each ward are three beds, with hard rubber wheels, so as to make it easy for the patient to roll his bed onto the broad, screened veranda, where indeed most of the twenty-four hours are spent. Each patient has a chiffonier, a large rocking chair and a small chair for his private use, while about the veranda are other large and comfortable chairs. Each pavilion is equipped with a bath tub, a shower bath with the mixer so arranged that the patients can not burn themselves; toilets, special basins for teeth washing and the usual basins for ablution purposes. Besides this there are linen, medicine and kit

carrying the germs, while cheese cloth is supplied those who are afflicted with cough, so that the spray, caused by the violence of coughing, cannot endanger the other patients. Spitting, smoking or other habits tending to the spreading of the disease are prohibited by the superintendent and carefully avoided by the patients.

There are three pavilions at River Glade, and sites have been selected for others, as they are needed. In all, sixteen patients are taking the cure, and it is pleasing to record that all are progressing toward recovery. The sixteen are made up of nine men

and seven women, and a considerable number came from this city. The Administration Building. The administration building is a commodious and airy structure in which are the quarters of the two nurses, Dr. Townsend, the house-keeper and other attendants. The offices and examining room are also located in this building, and are in perfect harmony with the rest of the institution. The most interesting apartments in the administration building are the kitchen and dining rooms. In the kitchen, where the food is cooked for the patients, the fixtures are all that

the most exacting housewife could demand, while the stoves, kitchen ware and other utensils are spick and span, and the whole has a truly wholesome appearance, and the odor of the food stuffs in preparation would tempt the appetite of the most fastidious.

Leading from the kitchen is the room where the dishes are washed, and here, disinfecting apparatus reigns supreme, and again there is an example of the care taken to defeat the plague. The food goes into the dining room through a slide in the wall, and the dishes do not return to the kitchen until they have the dining room by way of another slide and scrubbing with soap and hot water.

The Recreation Room. The recreation room in one of the wings of the building tells at a glance the thoughtful care taken to provide entertainment for the patients. Large comfortable looking chairs, a big fireplace, heaps of reading matter, including all the latest books, and last but not least a grand piano with a mechanical player. Here those attending the Sanatorium are at liberty to spend the time from after the supper nap until half past eight, in any manner they see fit. Needless under the quiet supervision of Dr. Townsend a jolly time is enjoyed and it does much to cheer up the sufferers. At half past eight the patients prepare for bed and all must be asleep by nine o'clock. Adjoining the administration building in the rear is the refrigerator plant where the foodstuffs are kept wholesome and clean during the hottest weather. The ice is placed in the same manner as in the largest refrigerators and indeed the plant is a model one in every way.

The Free Ward. The free ward when completed will prove a great boon to those who are unable to afford the small fee required to assist the upkeep of the institution. The building is large and airy and presents an excellent appearance, both from a useful and scenic standpoint. The principle involved in this branch of the Sanatorium will, it is understood, be somewhat the same as the free ward in any hospital and the patients will receive the same care and attention as those inhabiting the more luxurious bungalows. The equipment is now being installed and Dr. Townsend expects to have it in running order shortly.

Although the Sanatorium is now equipped with an up-to-date acetylene gas plant, the construction of a modern power house is being rushed to completion. The fixtures for electric lighting are now being installed in all departments.

A large crew of men are now at work on the concrete foundations of

where all the little necessities are kept.

Great Care Taken. The care which is taken to prevent the disease from spreading greatly impresses the visitor. In the kit closet are to be found small paper bags and paper handkerchiefs which are used to prevent the sputum from

THE ADMINISTRATION BUILDING.

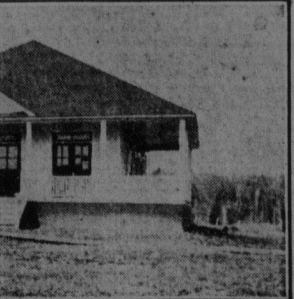

Here the Patients Eat and Play—Jordan Memorial Sanatorium.

THE ADMINISTRATION BUILDING.

First Patient a Cure. The Jordan Memorial Sanatorium was opened on March 10th of this year and the first patient arrived on March 17th. It is pleasing to relate that he will soon be discharged, completely cured. The institution has now been running slightly over four months, during which time twenty-one patients have attended with the most satisfactory results. Sixteen people are now taking the cure and are progressing favorably.

Rest absolute is the key note of the treatment, and as the patient progresses exercise is added with the idea of returning the patient to his home as nearly able as possible to perform the labor he formerly carried out. The idea of a Sanatorium is comparatively new to New Brunswick and Dr. Townsend is trying to convince the public that it is not a cure in a box, and not when the disease has taken a fatal hold. Dr. Townsend has consulting headquarters at St. John, Fredericton and Moncton and other centers, where all who think themselves afflicted may go for advice, knowing that if they are ill an opportunity to recover is offered. Dr. Townsend is of the opinion that there are many people in the province who do not know the true state of their health, or if they do are afraid to admit it. These people must be taught, said the doctor, to realize the value of taking care of themselves and the necessity of taking advantage of the institution. The routine of the Sanatorium is dearer than last year.

This Bungalow Affords Accommodation for Ten Patients—Jordan Memorial Sanatorium.

Scheme to Acquire Control of all Privately Owned Franchises

\$22,000,000 THE PURCHASE PRICE

Complete Clean Up of Power and Traction Interests within City Limits—City Need Raise Only Eight Million Dollars.

Toronto, July 18.—Sale of every privately owned electrical railway franchise, the Interurban Light and Power Company, and all assets of such interests within the city limits, for twenty-two million dollars, if the report of the experts shows the property and rights to be worth this amount, is the essential feature of the agreement reached yesterday by Mayor Hocken and Controller McCarthy, after a keen and lengthy battle of wits with M. E. R. Wood, Mr. William Moore, Mr. Z. A. Lash, and other representatives of the MacKenzie interests in the city.

The price of \$22,000,000 includes the Toronto and Toronto Suburban Railways, assets and franchises, the Interurban Light and Power Company, the end of the Metropolitan Railway on Yonge street, the sections of all radial lines within the city limits—in brief, all the tracks and rights within the city limits. Provisions are also made, it is understood, by which the city may acquire other portions of such radials as far as the city boundaries are extended. It is a complete clean up of all electrical railway franchises in the city.

The deal is conditional upon the city acquiring the Toronto Electric Light Company's franchise and holdings at a price of \$8,000,000.

For the entire deal the city will be required to raise only eight million dollars cash by the sale of city bonds, secured by the properties acquired.

conductive to health. At seven a. m. each patient arises, washes, dresses, and makes up his bed. At seven-thirty breakfast is served, after which must rest for half an hour. At ten-thirty a luncheon is served, after which another rest is taken and games enjoyed. For half an hour before noon another nap is taken while rest is ordered. At half past three another luncheon is served and at five o'clock a half hour nap is taken until supper at six. At eight-thirty another luncheon comes around, and at nine everybody goes to bed.

This regular care, together with a prescribed amount of exercise, can have but one effect, and that is cure. The patients impressed the reporter as being altogether healthy, but Dr. Townsend stated, in answer to a query, that great care had to be taken with all.

A Patient's Testimony. One of the patients when speaking to the reporter described the routine and general life as most enjoyable and healthy. "I feel better every day," he said, "and Dr. Townsend and the staff are doing everything in their power for us. It is wonderful," he said, "to see the change in the patients after they have been here a short time. The pallor leaves their faces and is replaced with a healthy brown, while an increase in appetite is noticeable." Just about this time a white-uniformed nurse came along with a watch in one hand and, standing on the walk, viewed the reporter with high disfavor and then announced, "Time for rest, you had better go to bed." As the reporter didn't feel the immediate need of slumber, he escaped, and suffered the nurse to lead him to the dining room, where he enjoyed a very excellent supper.

Dr. Townsend, the superintendent, is highly optimistic of the success of the sanatorium and is doing a great work. Trusted by the patients, believing in the necessity of the institution, and meeting with a well-merited success, he deserves the unreserved praise of the public at large, and last but not least, the whole-hearted assistance of all, and an intelligent recognition of the brave battle he is fighting against that fell disease—the Great White Plague.

A note addressed to Dr. Townsend will secure all the necessary particulars regarding the institution.

ALBERTA HAS LABORERS BUT NO BINDER TWINE. Lethbridge, Alta., July 18.—It is said on good authority that there was no shortage of labor for the harvest in northern Alberta, but there will be a shortage of binder twine and it will be from one to two cents a pound dearer than last year.

Trimmed with black lace, and was assisted in receiving by Mrs. Charles Arthur Penbody, who wore blue and white silk. Miss Myrtle Merriman and Miss Marjorie Woodford assisted Mrs. Woodford in serving. Those who were present were Mrs. William Belmont, Mrs. J. Arthur P. Gordon, Mrs. B. Harry Smith, Mrs. George Mitchell, Mrs. C. Lee S. Raymond, Mrs. Charles Omben, Mrs. John Macpherson, Mrs. W. J. Jack Dillie and Miss Margaret Lamb.

SACKVILLE

Sackville, July 16.—Rev. C. F. Wiggin and Mrs. Wiggins are spending a vacation in Charlottetown, guests of Mr. Wiggins' sister, Lady Davies. Rev. A. M. Sanford D. D., President of New Westminster University, B. C., is visiting friends here and at Mrs. Sanford's home, at Nappan.

DIAC

McGrath, Mrs. J. Kelly and Mrs. James MacQueen. Miss Harriet Vincent, of St. John, is visiting Mrs. Jas. White, Main St. Mrs. Pearson, of St. John, is the guest of Mrs. H. W. Murray, Belmont St. Miss Margaret Murray is on a visit to friends in Kings County.

WEDDINGS

A very pretty wedding was solemnized by Rev. Father Jaquem, C. S. R., when Miss Eleanor Harrick became the bride of Theodore Wachel. They have been but a short time in this country. Mr. Wachel arrived here about a year ago from Bohemia and is engaged to marry Miss Harrick.

CHARGED WITH NON-SUPPORT

In the police court yesterday Mrs. Charles Titus charged her husband with deserting her and her three week-old baby. She said she refused to work or contribute to her support. Titus said he had been ill and the case was held over until a doctor examines him to determine if he is able to work.

CASTORIA

For Infants and Children. The Kid You Have Always Bought. It is a remarkable wrinkle-removing formula. One ounce powdered castor oil dissolved in a half pint which has been used as a face bath, this is so effective that just one application causes the finer lines to disappear and soon even the deepest ones go.

happenings of the Week

HARVARD'S PRESIDENT IS BEING FETED IN BERLIN.

Prof. A. Lawrence Lowell, Harvard University President, is being feted in Berlin.

Prof. A. Lawrence Lowell, Harvard University, is being feted in Berlin. On his arrival in Berlin he delivered a lecture before a University audience. The rector of Berlin University, Count Wolf von Baudissin, delivered an address of welcome and Professor Edward Meyer spoke in behalf of the faculty of philosophy.

RECIPROCAL SYMPATHY IS NECESSARY

If Japan and States Would Lay Basis of Peace and Good Will.

ANCESTOR WORSHIP HURTS JAPS' CAUSE

Must Adopt Cosmopolitan Faith Abroad, Says Dr. Ebna, Japanese Editor - Unity of Thought Between East and West.

Tokio, July 18.—The negotiations between the United States and Japan over the California land bill stirred up in Japan widespread discussion by publicists and preachers of the broad subject of the future of Japan in her relations with the countries of the West.

This discussion showed an earnest effort to seek the causes of the discrimination against Japanese in California and in other places, including Canada and Australia. Some conservative newspapers criticized what they claimed to be the practice of the Japanese authorities in California in encouraging the registration of children born of Japanese parents as future subjects of the Japanese Empire, instead of allowing them to become as they would, citizens of the United States.

Considerable publicity is given here to an article by Rev. Danjo Ebina, a Christian pastor and editor-in-chief of the Shinjin magazine. The clergyman argued that the question between Japan and the United States, was not one that would end with those two countries, but one that would develop eventually between Japan and Canada, between Japan and the countries of South America, —indeed anywhere where the Japanese might flourish. He declared that the great cause of Japanese isolation was the insistence upon ancestor-worship and contended that the great solution of the whole question was a patient campaign to obtain the right of naturalization in America.

"Must the Japanese live everywhere as sojourners," Dr. Ebina asked, "live everywhere but one that foreigners, everywhere except where they have conquered? The development of our race demands that this should not be so."

The abandonment of ancestor-worship and the adoption of a cosmopolitan faith were needed to enable the Japanese to assimilate abroad and thus open up a new universe for the Japanese race throughout the world.

Unity of thought between East and West is pleaded for in the first annual report of the Association Concordia of Japan, which includes some of the leading men of the Empire in educational, scientific and business fields. The Association declares that, although in its more superficial aspects the intercourse between the East and the West is growing increasingly intimate and their scientific interests are becoming wider, there is still a sad failure on each side to appreciate the deeper things of the spirit which underlie the life of the other. Without any doubt the removal of causes of irritation as regards political and commercial affairs is an imperative duty, but the creation of a reciprocal sympathy is equally urgent if Japan and the United States would lay secure foundations for international peace and good-will.

The report contends that henceforth no nation can maintain its life apart from the onward movement of the world's thought and that the world's civilization will hereafter flow in one strong current.

Inasmuch as such problems as immigration and colonization complicate relations and endanger the peaceful progress of the world by unduly emphasizing national and racial differences, the Association holds that it is imperative to foster mutual sympathy and a sense of common interest. It will strive therefore to promote a deeper sympathy and respect between the two great civilizations.

This work will take the practical form of the publication of a review, with the object of guiding the current thought, the establishment of lecture courses, the interchange of visits of distinguished scholars representing the best thought of the East and the West, and finally of international congresses. The association will also cooperate with various international bodies of similar kind in facilitating investigations and in accelerating friendly intercourse among nations.

Mr. Siroku Ebana, who was sent to California by the governmental party of Japan, sent home a report in which he declares that despite numerous strong points in favor of the Japanese abroad, they still retain their peculiar traits which prevent them from associating with people among whom they live. He strongly urges the Japanese to pay more heed to this point, as otherwise he fears for the future of Japanese in foreign lands.

The Japanese, he asserts, enjoy high repute in labor circles in Hawaii and give satisfaction to their employers in general, but even in Hawaii some signs are already visible of the exclusion of the Japanese in the future. For instance, the land owners in Hawaii every year send over for laborers from Portugal and Spain and give them higher wages than the Japanese.

Mr. Ebana cites the report of the Hawaiian Chamber of Commerce, in which it is alleged that the Japanese do not care to fraternize with the Hawaiians from Portugal and Spain and their own customs and habits. The report claims that the Japanese settlers do not take any interest in the welfare of Hawaii, and it would be better for Hawaii to replace them by Spaniards, Portuguese and Filipinos.

Mr. Ebana cites the report of the Hawaiian Chamber of Commerce, in which it is alleged that the Japanese do not care to fraternize with the Hawaiians from Portugal and Spain and their own customs and habits. The report claims that the Japanese settlers do not take any interest in the welfare of Hawaii, and it would be better for Hawaii to replace them by Spaniards, Portuguese and Filipinos.

BATHURST

Bathurst, N. B., July 17.—Miss Annie Burns, trained nurse, of Boston is spending the summer with her parents, Mr. and Mrs. F. J. Burns, Dr. Coffey paid Summerdays a visit last week.

Thomas McInerney and wife of Boston are visiting Mr. and Mrs. John McInerney.

Miss Nellie McInerney, has returned to Newton, Mass., to resume her studies in the hospital there.

TENDERS, addressed to the undersigned at Ottawa, and endorsed on the envelope "Tender for Steamers," will be received until noon of the Twenty-eighth day of August, 1913, for the construction of a single screw steel steamer of the following leading dimensions:—

Length between perpendiculars 115 feet
Length over all 144 feet 6 inch.
Breadth moulded 30 feet
Depth moulded 13 feet

Plans, tender forms and specifications of this steamer can be seen at the office of the Purchasing Agent of the Marine and Fisheries Department, Ottawa, at the offices of the Collectors of Customs, Toronto, Collingwood and Port Arthur, and at the Agencies of the Department of Marine and Fisheries at Montreal, Quebec, St. John, Halifax and Charlottetown.

Plans, tender forms and specifications can be procured from the Contract Agent, Ottawa.

The tender form is embodied in the specification and must be accompanied by an accepted cheque on a chartered Canadian Bank, equal to the price of the whole outfit of the tender, which cheque will be forfeited if the successful tenderer declines to enter into the contract prepared by the Department or fails to complete the steamer in accordance with the contract.

Cheques accompanying unsuccessful tenders will be returned. The Department does not bind itself to accept the lowest tender.

Newspapers copying this advertisement without authority from this Department will not be paid.

ALEX. JOHNSTON,
Deputy Minister of Marine and Fisheries,
Dept. of Marine and Fisheries,
—4225 Ottawa, 21st June, 1913.

THE MCKEE FURNACE COMPANY, LIMITED.

Public Notice is hereby given that under the Part of Chapter 78 of the Revised Statutes of Canada, 1906, known as the "Companies Act" letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 17th day of May, 1913, incorporating James Tennant McKee, of Union Point, Fairville, mechanical engineer, Thomas Edward Powers, insurance broker, James Starr Tait, John McMillan Trueman and George Hedley Vickers, barristers-at-law, and William Alexander Connor, bank manager, all of the City of Saint John, in the Province of New Brunswick, as follows:—

"To acquire the Canadian rights to the 'McKee Fuel Saver' patented No. 147448, to sell, install, outfit for sale, to lease and generally to deal in the said device and other devices and furnace appliances; to engage in and conduct a general engineering business; the operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of 'The McKee Fuel Saver Company, Limited,' with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said Company to be at the City of Saint John, in the Province of New Brunswick."

Dated at the office of the Secretary of State of Canada, this 21st day of May, 1913.

THOMAS MULVEY,
Under-Secretary of State.

SHERIFF'S SALE

There will be sold at Public Auction on Thursday, 21st day of August, A. D. 1913, at 12 o'clock noon, at Chubb's Corner, so called, in the city of Saint John in the City and County of Saint John, all and singular, all the interest of Eugenia L. H. Smith in all that lot of land described in a deed thereon from one William Seely to Eugenia L. H. Smith as "all those other lots of land and premises situated on the south side of Seely street and described as follows:—

Commencing on the south side of Seely street, eight feet 18 1/2 inch from the eastern side line of Goodrich street; thence running easterly along Seely street aforesaid one hundred and twenty (120) feet more or less to the eastern side line of said William Seely's lands; thence southerly at right angles to Seely street along the said eastern side line of said lands ninety-seven (97) feet six (6) inches to the rear of lots fronting on Weston Avenue; thence westerly parallel to Seely Street aforesaid along said rear line one hundred and twenty (120) feet and thence northerly at right angles to Seely street ninety-seven (97) feet six (6) inches more or less to the place of beginning, being lots numbers 7, 8 and 9 of said plan." Same having been levied on and sold by me under an execution issued out of the Supreme Court, King's Bench Division, against the said Eugenia L. H. Smith and Herbert J. Smith, at the suit of Fred F. May. Dated this 18th day of June, A. D. 1913.

S. S. FOREST,
Sheriff of the City and County of St. John.

ANXIOUS TO HAVE IT DEFINITELY SETTLED

Com Schofield Invites Injunction Proceedings Against Tuberculosis Hospital.

Com. Schofield, chairman of the St. John County Tuberculosis Hospital Commission, has sent a formal invitation to M. G. Teed, who is representing the property owners who are protesting against the erection of the hospital on Merritt street, to go ahead with the injunction proceedings, which he has threatened to take. The commissioners want to have the matter threshed out in the courts as soon as possible so they will know where they stand.

If the courts refuse to grant an injunction it is the intention to proceed with the construction of the hospital at once, and it is hoped that if a start can be made in a short time the building will be completed before winter sets in. If the courts grant an injunction restraining the commission from building the proposed site, a new location will have to be secured and the building will not be up till next year.

TENDERS.

TENDERS, addressed to the undersigned at Ottawa, and endorsed on the envelope "Tender for Steamers," will be received until noon of the Twenty-eighth day of August, 1913, for the construction of a single screw steel steamer of the following leading dimensions:—

SYNOPSIS OF CANADIAN NORTH-WEST MINING REGULATIONS.

COAL.—Coal mining rights may be leased for twenty-one years, but not more than 1500 acres can be leased to one applicant. Royalty, five cents per ton. In unreserved territory the tract must be reserved to the Crown in person, and personal application to the District Agent of the Mining Department must be made in all cases before the lease is granted. Application for the district must be made in all cases before the lease is granted. Application for the district must be made in all cases before the lease is granted.

PLACER MINING CLAIMS are 500 feet long and from 1000 to 2000 feet wide. The fee for a claim is \$100 and must be expended in development work each year.

DREDGING.—Two leases of five miles of river may be secured to one applicant for a term of 30 years. Rental, \$1000 per year. The fee for a claim is \$100 and must be expended in development work each year.

DEPARTMENT OF THE INTERIOR, N. B.—Unauthorised publication of this advertisement will be paid for.

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS.

THE sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-Agent for the District, and personal application to the District Agent of the Department of the Interior must be made at the office of any Local Agent of Dominion Lands (not sub-agent) on certain conditions.

On certain districts a homesteader in certain circumstances may be granted a lease in each of six years from date of issue of the lease. The area of cultivation is subject to reduction in case of rough, scrubby or stony land after report by the District Agent.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emptive right, may apply for a lease in certain districts. Price, \$1 per acre. The area of cultivation is subject to reduction in case of rough, scrubby or stony land after report by the District Agent.

W. W. COOK,
Deputy of the Minister of the Interior,
Department of the Interior,
Ottawa, 21st June, 1913.

LOST.

LOST—At Brown's Flats, a purse containing the sum of \$81.00. The finder will be rewarded by returning the same to F. F. Glegg, Hampton.

LOST—A necklace of Roman pearls between the corner of Duke and Germain streets and Rothesay, via Prince William street tramcar and I. C. R. to Rothesay, on the 12th train yesterday. Finder will please return to this office.

CANOE LOST—Any information regarding a grey and green Stanton canoe that drifted from Ononetto shore on Thursday night will be gladly received by Mrs. F. J. G. Knowlton. Finder rewarded.

EDUCATIONAL

Havergal Ladies' College
JAVIS ST. TORONTO

Principal - MISS KNOX

Thorough education on modern lines. Preparation for honour matriculation and other examinations. Separate Junior School, Domestic Science Department, Gymnasium, Outdoor Games, Skating, Hockey, Swimming Bath.

HAVERGAL-ON-THE-HILL College Heights, Toronto

A second Junior School to be opened for the convenience of pupils resident in the Northern and Western parts of the City. Large playing grounds of three acres—tennis, tennis, basketball. Under the direct supervision of Miss Knox, assisted by specialists in Junior School teaching and in the Languages.

For illustrated catalogues and prospectus apply to the Registrar.
R. M. L. CHAMP, Hon. Sec. Treas.
School will reopen Sept. 17.

UNIVERSITY OF NEW BRUNSWICK
FREDERICTON, N. B.

Next Session Begins September 18, 1913.

The University offers complete four-year courses in Arts, Civil Engineering, Electrical Engineering and Forestry.

Attention is called to the enviable record of our graduates in all of the above departments.

Among the Scholarships available at entrance at The Wilnot Scholarship (\$300), an Alumni Scholarship (\$150), an Asa Dow Scholarship for First Class Male Teachers (\$100), Fourteen County Scholarships (each \$60).

WRITE FOR A CALENDAR.
C. C. JONES, Chancellor.

UPPER CANADA COLLEGE
TORONTO

Premier Boys' School of Canada

Founded 1882 by SIR JOHN COLBORNE, GOVERNOR OF UPPER CANADA.

Senior and Preparatory Schools in separate modern buildings, 50 acres playing and athletic fields, with tennis, gymnasium and full equipment. Specially constructed detached infirmary, with resident nurse. Summer Camp at Lake Temagami, conducted by the Physical Instructor of the College, trains boys to take care of themselves in the open.

BIG, HEARTY BABY BOY

Mrs. Beck's Fondest Hopes Realized—Health, Happiness and Baby.

Upper Lahave, N. S., Can.—"I wish to thank you for the benefit I received by taking Lydia E. Pinkham's Vegetable Compound for female troubles from which I was a great sufferer, so that I was completely run down in health. Other medicine did not help me, but Lydia E. Pinkham's Vegetable Compound made me well and strong. I now have a big, hearty baby boy, and praise your medicine for the wonderful lot of good it has done me."—Mrs. ISABEL BECK, JR., Upper Lahave, Lunenburg Co., N. S., Canada.

The darkest days of husband and wife are when they come to look forward to a childless and lonely old age.

Many a wife has found herself incapable of motherhood owing to some derangement of the feminine system, often curable by the proper remedies.

In many homes one childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal.

If you have the slightest doubt, that Lydia E. Pinkham's Vegetable Compound will help you, write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass., for advice. Your letter will be opened, read and answered by a woman, and held in strict confidence.

AGRICULTURE The Encouragement Of Good Roads

Although encouraging the establishment of macadamized roads, the Quebec Government does not neglect the earthen roads, as will be seen by the following circular, addressed to the Minister of Agriculture and Roads to the rural municipalities:

DEPARTMENT OF ROADS, Province of Quebec, Quebec, April 14th, 1913.

Sir, The Government of Quebec, as you know neglects nothing that might tend to supply the Province with good roads. A proof of this fact is furnished in the laws and the subject which were adopted at its instance by the Legislature. These laws adapt themselves to the needs of the municipalities, requirements which vary according to the volume and importance of traffic, to the nature of the ground and to the resources of each locality.

In other cases, and it is to this point that I specially invite your attention,—an earthen road is sufficient. Whether an earthen road is really sufficient, or whether a municipality contents itself with it on the score of economy, and to avoid the cost of a macadamized or gravelled road, there is one thing that must not be lost sight of, namely that an earthen road is only satisfactory when it is kept in good repair. In fact an earthen road badly maintained is never sufficient, for it does not meet the demands of the least traffic nor those of the most important law or sound business-like administration.

I will not enter into more detailed explanations. I will only add that the immediate duty of your municipal council is to do everything in its power to meet the demands which I have enumerated. For this purpose it has at its disposal the municipal law and the laws regarding roads; it has in particular at its disposal the laws of 1911 (articles 2012, 2013, 2015, 2016 and 2019), which guarantee to rural or village municipalities certain grants, varying from \$100 to \$500, and which it costs them for the maintenance of their roads. When we think of the little work, and above all the view that rural roads which are accomplished on country roads up to within the last few years, it is impossible not to be struck by the practical advantages that this law offers for their improvement. As a mat-

ter of fact it infers but one management with a constant surveillance and a serious study of the roads of a municipality, and it makes provision for an expenditure of money by those primarily interested in the roads, as well as by the Government, which cannot be without good results. Just how far this is, or will be, understood by municipal councils it is difficult to say for these councils have not yet received any formal instruction regarding the application of the law.

The freedom of action which has been left them is a mark of confidence, on the part of the Government in the spirit of initiative of the rural population of the province. This spirit has manifested itself in no certain manner, and has set well the expectations of the Government, that the latter believes the time has arrived to give a definite impetus to the improvement and maintenance of earthen roads. The result will be, we believe, a considerable increase in the mileage of roads that will be above all to be desired, a rapid increase in the mileage of roads that will be at all times passable.

In future, in order to receive the subsidy provided for by the articles of the act above cited, (the subsidy for the repairing, the improvement and the making of roads), municipalities, except in a case where it is clearly and incontestably proved to be impossible, must adhere to the following conditions:

1. To apply a part of the amount which it proposes to expend, in virtue of a by-law conformable to article 185 of the Municipal Code, or in virtue of article 1080, to the maintenance of all the roads affected by this law or by article 1080, and this in accordance with the enclosed circular entitled, Ordinary Maintenance.

2. To apply a certain sum to make permanent repairs in accordance with the enclosed circular entitled, Permanent Repairs.

3. To keep duplicate accounts of the works which it undertakes, on payroll forms, similar to the specimen copies enclosed herewith which will be furnished by the Department of Roads, and of which one copy must be sent to it at the end of the season, at the same time as a report, as mentioned in the following paragraph:

4. To forward to the Department of Roads at the end of the season each of the reports of which a blank form is enclosed, and for each of the roads improved or maintained, namely, those mentioned in the ordinary maintenance reports and Report of repairs and permanent improvements of earthen roads, together with a state-

ment of expenses incurred, to be made on a form furnished by the Government.

5. To inform the Minister of Roads not later than the 1st of September, that the municipality has conformed with the law and with the present instructions, and that it has improved or proposes to improve in a permanent manner, certain roads or parts of roads which it must designate.

Referring you to the enclosed circulars, which deal with maintenance and the permanent repairs of roads, I may remark that the use of the road machine and the split log drag is absolutely indispensable to the making of a good road. The road machine is economical, because it does the work of fifteen men; and it is especially advantageous in this respect that it permits the rapid making of a uniform road, which is scarcely possible by manual labor except at a very extreme cost. As to the split log drag, it costs scarcely anything, for almost any horse-drawn machine will do the work, and it is very convenient for reshaping and crowning a road, etc., after storms. The ordinary harrow may be to certain extent replaced by a road machine. This latter should be used at the very opening of the season, when the soil is still fairly soft; if this is delayed too late the soil becomes too hard, and it is necessary to plough up the road, in order to use the machine which necessarily increases the outlay of both time and money.

If there are large stones which cannot be removed by the road machine, they must be disposed of by two men armed with picks and crowbars who work in the ditch, and if necessary, be blasted out. If certain roads, routes, or parts of roads are given to the contractor, the Council should fix the time at which the different roads, routes or parts of roads or routes should be worked with the machine, and should insist upon the work being done during the period indicated, as a condition of the contract. Generally speaking, the Council should exercise a direct control over the work which it executes, whether the same is done by day labor or by contract.

I ask you, sir, to acknowledge receipt of this letter and to be good enough to communicate it to your municipal council.

I have the honor to be, Your obedient servant, JOS. ED. CARON, Minister of Agriculture and Roads.

The Standing Crop Competitions And Their Lessons

A thoughtful perusal of the report of the Standing Crop Competitions of 1912, which can now be obtained from the Department of Agriculture, Quebec, will repay every farmer interested in improving the yields of his fields. The object of these competitions, as is well known, is to encourage the production and use of good seed—seed true to variety name, free from admixtures of foreign grains and of weed seeds and seed of hardy and self-sustaining strains. The observation of the judges engaged in the competition is that such seed is rare in this province. Even those farmers who are alive to the importance of good seed find difficulty in obtaining it through the ordinary channels. The only satisfactory way is to grow it oneself on a special plot set aside for the purpose. To start such a plot a supply of pure seed can be obtained through the Dominion Experimental Farms or the Canadian Seed Growers' Association. Very little labor is involved in growing seed grain in a plot of this kind, and if the work is well done the seed may be disposed of at a price that will well repay the effort. Some knowledge of varieties and some skill in detecting impurities in the stand-

ing crop are the necessary qualifications, and these qualifications any man of average intelligence ought to be able to attain. Reading the report, particularly the comments of the judge, one is impressed with the prevalence of weeds, weeds everywhere! Sow-thistle and wild-oats, barnyard grass, and Canada thistle, and many other weeds, are to be seen on the roadsides, in the pastures and among the grain. Of course the scarcity of labor has much to do with it, but then—some farmers keep their fields clean and why cannot the others? The growth of hard crops such as corn, potatoes and roots, would do much to solve the problem, and the farmer who would also help. What is most wanted is more of the spirit of the old Chateaugay farmer who declared: "I don't care to allow a weed to grow upon my farm as a noxious weed."

The treatment of seed oats for smut appears to be generally neglected even in the best farming districts of the province. The judge in one such district writes: "Not a single farmer treats his seed for smut, although it is causing great damage in many places. I saw some fields of grain where 20 p. c. of the crop was attacked by that parasitic disease. Several farmers do not know the disease, though very prevalent on their farms." This last sentence leads us to observe that the farmers who are generally successful in this sort of work are those of learning some useful things from the judges—all of whom have had long experience training for their work. Thus the man who did not know there was smut in his oats might have learned from the judge that by simply pushing over a mass of the standing oats with a cane, he would find most of the smutted heads six or eight inches below the surface. Similarly, the simple device of working towards the sun, when looking for impurities such as boarded heads in a field of barley or wheat, or of oats in a field of oats, might never occur to the man who had never seen a competent judge at work. That our farmers appreciate such opportunities of picking up useful information is apparent from the comments of the judges upon the interest manifested in these competitions.

Maple Syrup And The British Market

In an interview with Mr. Beckles Wilton, he discusses the prospect of introducing maple syrup and sugar to the British market, and we endorse most heartily the view that Dr. McGill's recommendation that adulterated maple products should be heavily fined, and that a portion of the proceeds should be awarded to the person or persons furnishing evidence leading to conviction, is the most effective way of dealing with the problem of adulteration in the maple trade, and which, according to Mr. Wilton, are the greatest obstacle in the way of establishing a market in the Old World. At the same time we cannot agree with Mr. Wilton that it is not at present practicable for a British dealer to obtain a supply of pure syrup in the Province of Quebec.

In the first place, there are dealers, well established in business, who have a clear record for the sale of pure maple syrup. A study of the Bulletin of the Laboratory of the Inland Revenue Dealer to discriminate between such honest dealers in pure goods and the adulterators. In the second place, there is no difficulty in obtaining pure goods direct from the producers, especially now that they have a co-operative society. Adulteration by the producer is, we have every reason to believe, a rare practice. The only objection to drawing direct from the pro-

ducer is that the products of the different makers would vary in color, flavor and density. To convert such miscellaneous goods into a uniform product for the market would require the establishment of such a mixing plant as the dealers throughout the Province of Quebec operate. No British concern which can establish a trade in maple products in the old country is likely to set up in business for fear of not being able to obtain pure goods. The real difficulty would be that as soon as a market was established the Canadian producer would be invaded by his competition, and even more formidable in Great Britain where the properties of pure maple syrup are not generally known, than in Canada, where the genuine syrup is familiar to all who have lived in the eastern provinces,—although some of them may be suspicious of the best quality of goods on account of its light color. Mr. Wilton's reference to the adulteration of the adulterator with his "molasses, glucose, West Indian syrup and bark" calls for a word of comment. The simple truth is that under present conditions no such chemical adulteration on the part of the adulterator is called for. All that is necessary is to avoid giving the retailer a guarantee of purity with the adulterated goods. Under the Adulteration Act (Sections 33 and 34) the person ac-

Cutworms Doing Much Damage

Life History. At the beginning of the growing season, the caterpillar often finds in the morning, young plants cut off near the surface of the ground, that in the evening before were strong and healthy. On stirring the soil near by, he may find hidden in the ground a greasy-looking caterpillar, the caterpillar, or cutworm, so called from its color, or just below the surface of the loose soil or newly made beds. Owing to their destructive practice of cutting off a whole plant in order to devour a portion of its foliage, they do a great

deal of apparently needless damage. After they have become fully grown, when they change to adults, they stage in the ground and in early summer the moths appear, many of them making their presence known in our houses by their attraction to light. Before very long another brood of caterpillars comes upon the scene, often more numerous and more destructive than the first. Some of them climb up into fruit trees and destroy the foliage others attack large crops, vegetables, their grape vines, the plants in flower gardens, etc., while occasionally a single species appears suddenly in enormous

numbers and sweeps like an army over the land devouring everything that comes in its way. Remedy. Happily a very simple and completely effective remedy has been found for these destructive creatures. It is called the "poisoned bran-mash" and is made in the following manner: Mix half a pound of Paris Green in 10 lbs. of bran (the proportion for larger or smaller quantities is 1 to 100); the poison should be added to the dry bran, little by little and stirred all the time till the whole is tinged with the green color, then add water sweetened with sugar or molasses, till the mixture is sufficiently moistened to crumble nicely through the fingers. If bran cannot be procured, shorts or flour may be used, and for field work may be distributed dry by means of seed drill. The mash should be scattered about the plants that are liable to attack in the evening, and it is in preference to their ordinary vegetable food. When they begin to feed the effects of the poison they suffer off to find a higher plane of nutrition in the evening, and the result is that the worms will be regrettably found in the morning just below the surface of the ground, often in surprising numbers. Young plants and cauliflowers, tomatoes, etc., may be protected when set out by wrapping a bit of newspaper around the stem between the root and the surface of the ground. The worms will not attempt to bite through or climb it. The Department of Agriculture, Fredericton, Horticultural Division.

BIG CARTAGE COMPANY RECOMMENDS

MOLASSINE MEAL

THIS IS WHAT THEY SAY: THE SHEDDEN FORWARDING CO. LIMITED Carriage Agents for The Grand Trunk Ry. System, The Intercolonial Ry. System, The Montreal Ry. Co. of Canada, Limited. 402 Board of Trade Building, Montreal. Dear Sirs—I have much pleasure in recommending your "MOLASSINE MEAL" which has been used by this Company for several years with good results. Yours truly, (Signed) G. E. BELLEFLORE, General Manager

ROYAL WARRANT After applying the Molassine Meal to the manure, the manure becomes a very important feature with them. "MOLASSINE MEAL" will do as much for your horses—try it. Put up in bags containing 100 lbs. Get it at your Dealers or write us direct.

Teach the children to spend their pennies for these wholesome sweets. COWAN'S MAPLE BUDS. They're not Maple Buds unless they're Cowan's. THE COWAN CO. Limited Toronto, Ont.

TOPICS OF SPORT AT HOME AND ABROAD

BANGOR WAS LEADING WHEN GAME CALLED

Owing to the threatening state of the weather at three o'clock yesterday afternoon there was only a small crowd of fans present at the Marathon grounds when Bangor started in a game with the Marathons.

Shankey was in the box for the Greeks and a new man named Ryan was the catcher. Ryan is a slightly built young man and the game did not last long enough to get a line on him. Phinney was the twirler for the visitors and Brooks caught.

Dolan opened the first inning for Bangor with a single to centre and went to second on a wild pitch. Connaughton drew a base on balls and shortly afterward, when Watt held the ball too long, Connaughton and Dolan worked a double steal. Boardman, a late addition to the Bangor outfit, filed out to Pinkerton at second. Wildes and Brooks struck out.

For the Marathons, after O'Brien and Pinkerton hit out to the outfield, Shankey sent a long one out to Red Wildes in centre field. The fielder misjudged the fly and after getting it into his glove he dropped it. Black singled to left and Watt retired the side by flying out to second.

Reed opened the second with a single to third and stole second. Tewhey, who started in the game, was taken ill and retired, his place at bat being taken by Wakefield, who hit out to second. Reed went to third on the play. Matthews singled to left and Reed scored. Phinney struck out and Matthews was caught trying to steal second.

The Greeks in this inning went out quickly.

For Bangor in the third inning Dolan singled to right. Connaughton beat out a hit to third. A passed ball allowed the runners to advance a base. Boardman hit a sacrifice fly to left, which scored Dolan. Brooks struck out and Reed filed out to right field.

At this stage of the game the rain was pouring down in torrents and after waiting for a half hour and there being no let-up, Umpire Labelle declared the game off for the day.

Owing to the wet weather in St. Stephen yesterday there was no game and the Fredericton team did not leave the capital.

UMPIRE PROTECTED BY POLICE

Philadelphia, July 18.—Exciting scenes were witnessed during and after a two inning batting rally which gave Cincinnati the victory here today 5 to 2. The visitors led 2 to 0 until the eighth inning when the home team took the lead. With one out in the ninth Mayer, who had taken Chalmers' place, gave Bescher a pass. When Bescher was called safe by Byron on a steal of second, Doolin protested that he had touched the runner. Bescher scored and Bates got on third. The Philadelphia players renewed the argument regarding the decision on Bescher, and Manager Doolin and Moran were ordered to the club house by Byron.

Seaton went in to pitch and Hobbittell's triple and Tinker's single scored two more runs, winning the contest. After the game a crowd of fans made a rush for Umpire Byron, when he tried to reach the umpire's dressing room under the grandstand. The cushions were thrown at Byron and efforts were made to strike him, but he was protected by Umpire Ricker and policemen and reached his quarters safely.

U. S. TEAM WON FROM CANADIANS

Wimbledon, Eng., July 18.—The United States team today won from Canada on the famous courts of the all-England Lawn Tennis Association, the two singles matches played in the final round of the preliminary tournament to select a team to challenge England for possession of the Dwight F. Davis international lawn tennis trophy.

R. Morris Williams, of Philadelphia, beat B. P. Schwengers, the Canadian champion, in the first match in three straight sets, 6-4, 6-2, 6-4, and Maurice E. McLoughlin, of San Francisco, won the second match from R. B. Powell, Canadian captain likewise in three straight sets, 10-8, 6-1, 6-4.

Experts here consider the commanding lead thus obtained virtually assures to the United States the right to meet England next week as only one win in the three remaining matches is needed to complete Canada's elimination.

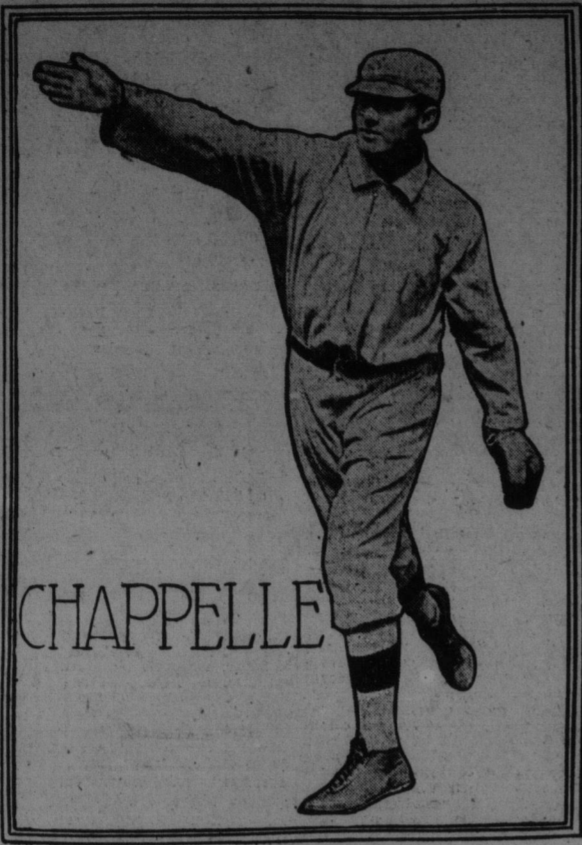

Both Williams and McLoughlin won in convincing style. Williams scored a total of 106 points to Schwengers' 75, while McLoughlin totalled 124 points to Powell's 99.

Schwengers, though he took the games to 6-4 in two sets, never really seemed dangerous against Williams.

BELMONT'S TRACEY WON.

Handover Park, England, July 18.—August Belmont's Tracey today won the Bellipse stakes of \$50,000 for three and four year olds over a course of a mile and a quarter. Louvers was second and Babelor's Wedding third. Seven ran. Tracey, who was the favorite, was ridden by Danny Maher. The betting was 2 to 1 on Tracey, 6 to 1 against Louvers and 100 to 6 against Babelor's Wedding. Tracey was the horse thrown by the man, Harold Hewitt, while running for the second gold cup on June 19.

THE WHITE SOX GET FIELDER CHAPPELLE

Larry Chappelle, the sensational outfielder of the Milwaukee team of the American Association, was sold to the White Sox.

For him President Comiskey gave outfielder John Beall, a catcher, whose name was not made public, and a "cash consideration." Chappelle is to report at once. He has been batting around .350 and fielding with the best of them, and practically every club in the major league bid for him.

THE WHITES WON'T MEET LANGFORD

San Francisco, July 18.—Sam Langford, the negro pugilist, arrived here today from Australia after an absence of nearly two years. Matches were hard for him to find when he left and they look no more plentiful now.

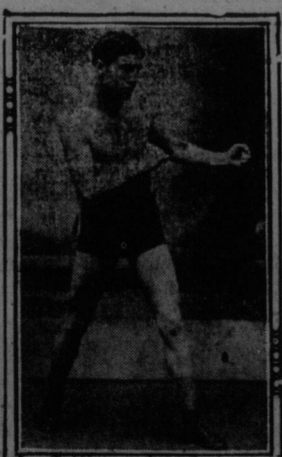

Arthur Pelkey, the last recruit among the white hopes, announced a few hours before the ship was in sight that he had drawn the color line.

Jess Willard will not meet a negro. No other white men, heavy or clever enough to give Langford a creditable workout, is in sight this side of the Rocky Mountains.

WANDERERS DEFEATED STELLARTON

Halifax, July 18.—Stellarton cricketers were defeated this afternoon by the Wanderers, who scored one hundred runs to the visitors' total of fifty-four. It was an exceptionally interesting game, and Stellarton put up a good fight, but weak batting was responsible for their defeat. They were the bowlers also were in tip top form, the Wanderers' usual stand-bys failing to make large scores.

RITCHIE AND BRITTON LIKELY TO FIGHT

"Jack" Britton and "Willie" Ritchie will likely meet in a championship contest. John Tortorich, a fight promoter from New Orleans, has offered a purse of \$20,000 for a twenty round bout at his club. "Dan" Morgan has accepted for Britton, and now it is up to Ritchie, but there is hardly any chance of him passing up the big roll of long green.

THE WHITE SOX GET FIELDER CHAPPELLE

Larry Chappelle, the sensational outfielder of the Milwaukee team of the American Association, was sold to the White Sox.

For him President Comiskey gave outfielder John Beall, a catcher, whose name was not made public, and a "cash consideration." Chappelle is to report at once. He has been batting around .350 and fielding with the best of them, and practically every club in the major league bid for him.

LONG DISTANCE RACE TODAY IN PUT-IN-BAY

Cleveland, July 18.—A fleet of sail boats gathered from Toronto, Buffalo, Erie and other Great Lake ports, lies in Rocky river harbor here tonight. They are ready for the long distance race to Put-in-Bay tomorrow, which will be the curtain-raiser to the Perry centennial regatta of the Inter-Lake Yachting Association at the bay, all of next week.

Tonight visiting yachtsmen were banqueted at the Cleveland Yacht Club. Prominent among the guests were Commodore Aemilia Jarvis, of the Royal Canadian Yacht Club, of Toronto, and A. W. Finley, the Boston yachtsman.

CIBOU II. WON RACE AT SYDNEY

Sydney, July 18.—The race for the Ross Cup was sailed here today under fair yachting conditions. A light wind was blowing at the start which gradually lessened, and the return was practically a drifting match.

Cibou II, sailed by S. G. Dobson, Royal Cape Yacht Club, was first on time allowance, covering the time some nine minutes behind Scrapper II. The result:

Elapsed. Corrected.
Cibou II . . . 3:08.39 3:13.58
Scrapper . . . 3:59.20 3:17.42
Marion III . . 2:14.50 3:20.18
Althet 3:08.50 3:27.56
Anolus 3:24.16 3:29.40
Pirate II . . . 3:30.30 3:36.50
Hawke 3:40.00 3:40.00
Vato 3:24.38 3:29.28

INVITES HALIFAX BOATS.

The Echo is in receipt of a letter from Henry T. Hoag, Secretary of the St. John Board of Trade, regarding the speed boat race on the harbor of that city, August 2, for the Norton Griffiths Cup. Mr. Hoag says: "The race is open to the world for speed boats 40 feet and under. The course will cover a distance of about twelve miles. Race to be run under American Power Boat Club rules for rating and handicap; all boats to be measured and weighed in St. John. The winner of each year's race will be awarded a miniature of the big trophy. Dr. J. H. Barton, of St. John, donates last year's shield to the credit of his boat "Patricia."

"We are enclosing herewith copy of deed of gift for this trophy. We would like to have some of your fast boats compete in this race, and it is our wish that all possible offers be given this deed of gift in order that all owners of motor boats may become familiar with the conditions governing the race."

Beyond a doubt there are in local waters several craft capable of competition in this race, and it would seem a good opportunity for them to show their speed. Mr. Clifford Jack's "Scout" is one of the Halifax craft which could do well in the race, while there are others not so well known.—Halifax Echo.

BASEBALLISTS ATTENTION!

John J. Bradley offers \$10.00 to the player in the N. B. and Maine League who hits the Royal Arms advertising sign on the Marathon grounds with a fairly batted ball during the league game this week or next.

BASE BALL TODAY AT 3 O'CLOCK

St. John fans will have an opportunity to see the rejuvenated Bangor team in action this afternoon, when they will meet the Marathons in a game that should prove a pitchers' battle. Bangor defeated the Marathons twice this week and were leading in yesterday's game, when the rain made it impossible to continue.

This afternoon Charles will be the pitcher for St. John, while Bein will be back in his old position behind the bat. Hoper, Bangor's latest find in the pitching line, who held the hard-hitting Marathons to five hits and gained ten men when they last faced him, will perform for the visitors.

The Bangor team today is faster than at any time this season and the prediction of baseball followers is that they will speedily emerge from last position and make it interesting for the other contenders for the championship of 1913. The game will be called at 3 o'clock and with fine weather the attendance should be large.

BASEBALL IN THE BIG LEAGUES

AMERICAN LEAGUE.
Washington, 5; St. Louis, 1.

At St. Louis—000100000004—5 12 2
Washington . . . 00000010000—1 7 1

Batteries: Adams and Ostow; Alchison and Higgins.

No Game, Rain.

At Jersey City—Baltimore-Jersey City game postponed, wet grounds.

No Game, Rain.

At Montreal—Buffalo-Montreal game postponed, rain.

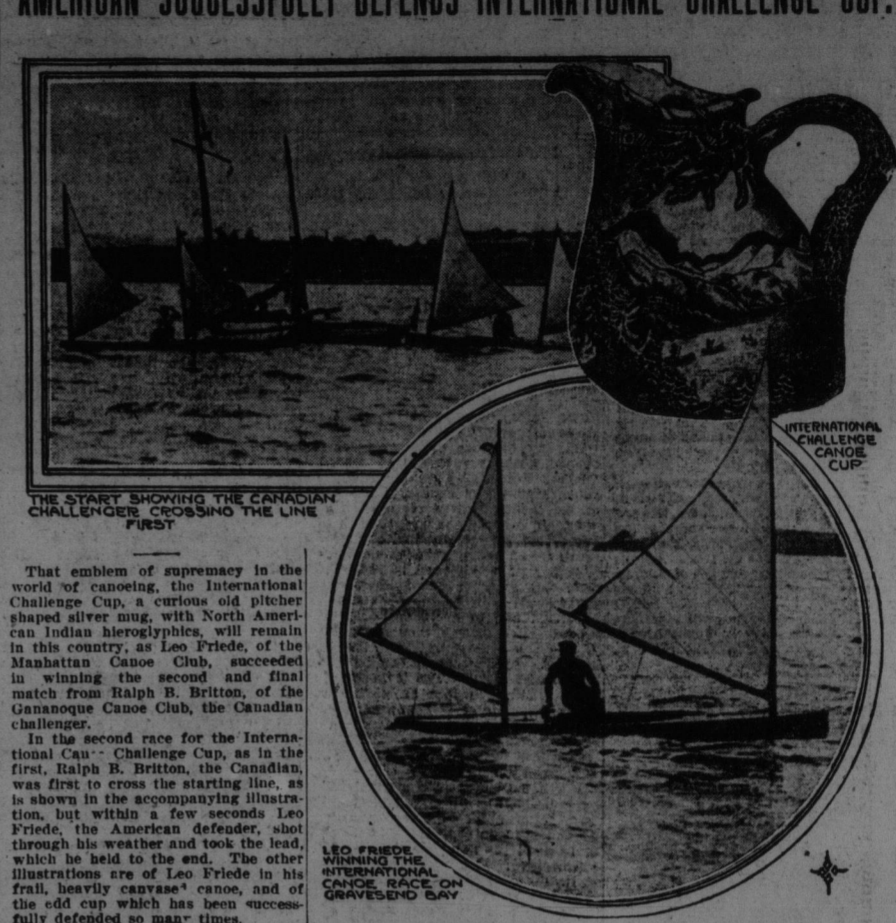

Toronto 3; Rochester 2.

At Toronto—
Rochester 000010001—2 4 1
Toronto 100200003—3 5 1
Batteries—Quinn and Jacklitch.

TOUR OF WORLD CERTAINTY.
Chicago, July 18.—The round the world tour of the Chicago Americans and New York Nationals became a certainty yesterday when Charles Comiskey, owner of the White Sox, posted a forfait necessary to assure transportation. The teams will sail from Vancouver, B. C., on Nov. 19, making the trip to the Pacific coast in a special train. Several exhibition games will be played en route.

So far six Giants and six of the White Sox have announced their intention to make the tour. John McGraw, manager of the Giants, has posted a guarantee for 25 persons and Comiskey for twice that number.

AMERICAN SUCCESSFULLY DEFENDS INTERNATIONAL CHALLENGE CUP.

That emblem of supremacy in the world of canoeing, the International Challenge Cup, a curious old pitcher shaped silver mug, with North American Indian hieroglyphics, will remain in this country, as Leo Friede, of the Manhattan Canoe Club, succeeded in winning the second and final match from Ralph B. Britton, of the Gananoque Canoe Club, the Canadian challenger.

In the second race for the International Canoe Challenge Cup, as in the first, Ralph B. Britton, the Canadian, was first to cross the starting line, as is shown in the accompanying illustration, but within a few seconds Leo Friede, the American defender, shot through his weather and took the lead, which he held to the end. The other illustrations are of Leo Friede in his frail, heavily carved canoe, and of the odd cup which has been successfully defended so many times.

GRAND CIRCUIT RACES.
Pittsburg, July 18.—After vainly trying to put the Brunot Island track in condition, managers of the Grand Circuit races this afternoon at 2.40 o'clock cancelled the programme for the day.

FLYING BOAT COVERS NINE HUNDRED MILES
Detroit, July 18.—Beckwith Havens completed a flying boat trip from Chicago to Detroit shortly before four o'clock this afternoon. He followed the route planned from Chicago to Detroit aviation course and covered nine hundred miles. It is said to have been the most remarkable trip ever undertaken by flying boats. J. B. Verplanck, owner of the flying boat, accompanied Havens, who started from Chicago on July 8. Roy I. Francis and Glenn L. Martin decided on the 15th at Pontwater, Mich., to give up the race, as the management had withdrawn the prize money owing to the fact that there were only three starters where twenty had been expected.

O'TOOLE MAY BE OUT OF BALL FOR SEASON.
Pittsburg, July 18.—Marty O'Toole, of the Pittsburg National League Club pitching staff, was discharged from a local hospital today, where he underwent an operation for appendicitis on July 3. O'Toole was greatly weakened and has been warned that he must not indulge in any brisk exercise for at least some weeks. By some it is believed O'Toole will hardly be able to play ball again this season.
