I was troubled, for over a year, with Loss of Appetite, and General Debility. I commenced taking Ayer's Pills, and, before finishing half a box of this medicine, my appetite and strength were restored.—C. Comp. Debiar, Com.

Ayer's Pills are the best medicine known to me for regulating the bowels, and for all diseases caused by a disordered Stomach and Liver. I suffered, for over three years with Headache, indigestion, and Consignation. I had no appetite, and was weak and nervous most of the time.

BY USING three boxes of Ayer's Pills, and, at the same time dieting myself, I was completely cured. My digestive organs are now in good order, and I am in perfect health.—Philip Lockwood, Topeka, Kans. Ayer's Pills, have benefited me wonderfully. For months I suffered from Indigestion and Headache, was restless at night, and had a bad taste in my mouth every morning. After taking one box of Ayer's Pills, all these troubles disappeared, my food digested well, and my sleep was refreshing.—Henry C. Hemmenway, Rockport, Mass. The one great want of the present is systematic farming. We need to incorporate into our daily duties some method by which we can know, when onto the control of the present of the British officers detailed to purchase Canadian horses for the British army have commenced their labors in Ontario, and though their first efforts of the present of the British officers detailed to purchase Canadian horses for the British officers detaile chase Canadian horses for the British oats at any work to which he may be the results are reached, what has been the measure of our success. In no might be wished it is to be hoped that other way can we make the farm a before they complete the tour of source of profit or know how to direct our efforts aright. Day and weeks are spent, yee, worse than wasted upon labor that never yields the slightest return. To know what te do and how to do it there must be system matic work. The brain must direct and the hands perform if the highest less in the realized. There is as much acid for the use of the brain in farm work as in any other avocation. Farming is not all mechanical labor, there must be the intelligent, progressive thought behind the plow in order that there is at least the work be done in the best manner. Everywhere the demand is felt for more systematic work if we would be completed the total of the visits of the stay of more systematic work if we would as the consumers, and the first of the visits of the British officers our farming is not all mechanical labor, there were thought behind the plow in order that there is at least one of the order that there is at least one of the order that there is at least one of the order that there is at least one of the order that the consumers, and the flowers be domen in the beginning of the use of Ayr's Sarsaparilla. more systematic work if we would realize profit.

Perhaps in no one direction is this more apparent than in our methods or methods in feeding. Acting on the principle that cattle eat only what they need, abnormal appetites have been created, and in feeding these the stock has been permanently injured. It is a mistaken notion that cows need all they will eat. They require only what can be thoroughly digested and assimilated, more than it is awniful. Do not take this statement for anything more than is intended. There must be no stinting or starving of the stock, but there should be a careful adjustment of quantity to the best needs of the creature. Doing this we shall find profit in feeding. The question to be considered is now to feed hay for the best reacting as soon as the farmer is up, this to be followed by another at milking time, the none at noon, another at night, and the last thing before going to be de a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and a good fork full to keep the more and the nancher and good forker, the more and good forker, the more and good forker, the proposed the more and good forker, the proposed the good forker, the good forker, the proposed the good forker, the good forker and the proposed the good forker and the good forker and the good forker, the good forker

In the war of 1870 the German military authorities made good use of the thorough information they had previously gained as to the condition of the army and armaments of France. Since then the French and all other War Departments have been very careful to conceal their preparations. Hence it is really impossible to decide how much truth is in the report that Russia has developed a new, strange and fearful weapon from experience gained by some of her officers who served against the Chinese in the Kashgar campaign Everybody knows that the Chinese formerly used missiles to which the English gave the unpleasant name of "stinkpots." The composition with which they were filled is not exactly known, but there can be little doubt that it diffused an aroma more vile than the whole seventy famous odors of the city of Cologne. The new and interesting rumor is that the Russian military authorities have discovered a composition even more awful than that to which we refer, and are now filling millions of shells with it. One of these shells, it is said, will, if exploded in a town, force every banne being within half a mile to withdraw. The odor is said to be simply unendurable. A doz-n sb-lls dropp-d soldier sicker than a small boy after ten minutes' smoking of blackstrap in an old tobacco pipe. The effect of a few of these singular missiles upon a brigade of infantry "Truth is mighty, but it doesn't prevail here," is what a man had tacked above his throes to which those of sea sickness are said to be pleasant. To this condition a whole

to be pleasant. To this condition a whole army may be reduced by half an hour's artillery practice. Then the Russians will advance and capture their enemies. This plan would be impracticable if the ingenuity of certain Moscow savants had not discovered an antidote to the effects of the odor. With FOR IMPROVING and preserving the health of your Horses and Cattle, use "Maud S." Condition Powders.

This every Russian soldier will be supplied so the rumor goes. It is easy to see that the Czar's enemies will be placed at an enormous disadvantage if all this be true.
Still it is certainly very curious that no in-

vention for overcoming an enemy through his nose has hitherto been employed by European area permeated by their aroma. These might easily be utilized in war. How interesting and bloodless would be a battle between two great hosts with such artillery. One can how York woman understands nothing she admires.

The exhausted and drowsy feelings, common to spring time, indicate an impure and soluggish condition of the blood, which may be remedied by their aroma. These might easily be utilized in war. How interesting and bloodless would be a battle between two great hosts with such artillery. One can fancy the infantry trying to charge with the bayonet and every soldier holding his nose as though approaching a Rykert. Such a spectacle would take all the glamor and poetry from battle, and no realistic artist could ever again find a thrilling subject on a foughten field. The nation with the most

There are few comedians now on the stage the one of your popularity. There are few comedians now on the stage the one of your popularity. In "Pa," Mr. Russell has a comedy exactly suited to his peculiar style, and he makes the must of it. An entirely new repertoire of seegs and specialties, for which Mr. Russell if so faminous, has been introduced this season viz: "Lit's all over with the Ladies," "They're the picture of their Pa." "Matters that make me tired," and all of the Harrigan new songs.

Sir Charles, the standard bred stellion, owned by John McCoy of St. Marys, is said to be the only hong standing for service in York County, that can claim to be a sire of trotters. His daughter Mand C., trotted last fall in her four year old form a fourth heat in 2:45. King Charles, the very elegant young horse owned by David Atherton, is also very fast. Mr. Atherton expects to give him a four-year old record of 2:35. Grimpos. syoung stanton owned by S. H. McKee, trotted

joung stamon owned by S. H. McKee, trotted quarters when only six monthe old, in one minute, a four minute gait. This youngater is very promising, and is the best bred colt in this county. Biddy Mac, a very handsome filly owned by Mr. McCoy, proved on the ice this spring, that there was no colt of her age could go with her. Parties intending to bried would do well to look at Sir Charles and his colts, before deciding what horse they will patronize. See first page.

DETWEEN eight and ten years ago, a medicine was introduced to the public, and suffering humanity was invited to try the same.

The proprietor knew from experience, that success was certain, but the human breast—so imbued with prejudice that it forms one of the strongest barriers to break down and the greatest enemy to overcome before any headway can be made towards the manion of success. Truth has often proved itself to be "stranger than fiction," and it is a fact as solid as truth that SMITH'S CHAMOMILE PILLS have now become one of the leading Patent Medicines of the present day, from north to south, and from east to west, they are to be found in the homes of the ruch and poor. All classes of society use them, and they are by thousands declared to be Worth their Weight in Gold

For a Weak Stomach, Impaired Digestion, and all disorders of the Liver, they act like "MAGIC," and a few doses will be found to work wonders on the most important organs in the human machine. They strengthen the whole muscular system, restore the long-lost complexion, bring back the teen edge of appetite, and arouse into action, with the rose-bud of health, the whole physical energy of the numan frame. These are "facts" admitted by thousands, embracing all classes of society; and one of the best guarantees to the nervous and deblitated is, Smith's Chamemile Pilis have the largest sale of any Patent Medicine in the Dominion.

The prisoner, Scales, was a repulsive looking fellow of about twenty-five. He was more a lithe and active than a powerful man, but was nevertheless, by reason of his brutal and vinductive disposition the terror of all the peaceably disposed men of the corps He had served in the army for about three years, during which period he was always in trouble. On the return of the regiment from abroad, he came to us from the depot with an extremely bad character, and this evil reputation he afterwards consistently maintained. At the reduction of the army referred to in the Colonel's remarks, the services of Mr. Scales would to a certainty have been dispensed with had he not at the time been a deserter. Being appreh-nded and brought back to the corps at though be was rigorously kept out of bar racks, carried on with the soldiers a brisk the beginning of the scare occasioned by the disturbed relations of Prussia and France, he received two months' imprison ment, and was sent to his duty. Fredericton, N. B., CLAIRVOYANT PHYSICIAN H IS marvelous power whilst in trance of dis-cribing the physical condition and disease of a patient, either personally or by lock of hair with such unfailing accuracy, is remarkable.

of a patient, either personally or by lock of hair with such unfailing accuracy, is remarkable.

All Hair may be sent from any distance by letter, and should be cru close to the head, and not handled if possible by any person but the patient. Most of his patients have been from the higher walks in life, having been consulted by two of our Lieutenaut Governors and several members of the Legislative Council and Assembly, also Ministers, Judges, Lawyors, Government Officials and leading business men of this City and Province. But in order to reach a class that could not pay his former price of \$6.00 for one examination and prescription, he felt it advisable to reduce the fee to \$2.00. Patients unable to attend personally, can have lock of their Hair brought ir or sent by letter, (with fee) and thus ascertain the condition of a patient and avoid the expense of sending for Doctors at a distance. His remedies are simple and most-ly composed of herbs, a great-many of which can be gathered in the country.

Inclose \$2.00 with lock of Hair giving name and address, and I will give you an examination and prescription, or examination \$1.00.

Examination personally or by Hair, 50 cents, or by Hair sent by letter with fee, \$1.00.
