

BUILDING OF H.W.&G. ROAD.

Believe That Start Will be Made This Coming Fall.

London Asks Pertinent Queries About Hydro Power Matter.

Complaint About Board of Education and Letting of Tenders.

Complaints have been made that the Building Committee of the Board of Education let the contract for the painting of the new addition to the Barton street school to D. Kemp at \$1,562 or \$162 higher than the tender of Robert Stamp & Son.

The line-up of the City Hall nine for its game with the press team tomorrow will be as follows: Venator, Mathews, Spence, Kappelle, Kent, Stewart, Anderson, Faulkner and Nicholson.

Mayor Macklin, of Goderich, called on Mayor McLaren today.

The aldermen will visit Maple Leaf Park tomorrow night to ride the figure eight and inspect the other attractions.

The delay in beginning active building operations on the Hamilton, Waterloo & Grand Rapids Railway, repeated announcements that the work would be under way before the first of June, has caused Galt and other municipalities which would benefit by having such direct connection with this city to despair of the road being built for some years.

Here is one of the queries London will fire at the Hydro-Electric Commission tomorrow at the conference to be held in Toronto:

Is it true, that a year ago, when the city of Hamilton intimated that it would buy 1,000 horse power from the commission, merely as they believed, to keep the prices of the Cataract Company down, the commission asked the Hamilton representatives to let this matter rest in abeyance for a while until the other municipalities were bound by contract, as they (the municipalities) could not consent to that city coming in under special terms?

Commenting on this, the London Advertiser says:

There is no doubt that the municipalities, London particularly, would not have signed the contract had it been known that Hamilton was to be allowed to have special privileges later.

City Solicitor Waddell has prepared for the Fire and Water sub-committee a draft of the agreement it is proposed to sign with the Cataract Power Company for the mountain waterworks system.

The aldermen will go over it to-day and if the company approves of it a fifty horse power motor will be installed at once.

Stewart & Witton this morning took a permit for the Boys' Orphanage to be built on Park street, adjoining St. Joseph's Convent. It will cost \$15,000. Hancock Bros. are the contractors.

PLAYGROUNDS.

Formal Opening Thursday or Friday of This Week.

The committee on playgrounds are as busy as beavers in arranging for the opening of the playground at the Hess street school. The apparatus has arrived, and no time will be lost in installing the equipment.

BROKE GROUND

Work on Hydro Station at Dundas Begun To-day.

The Hydro-Electric contractors this morning broke ground for the main switching station on Sydenham mountain, near Dundas. Twenty-five men and several teams were at work excavating for the power house and reservoir.

Few people stick to the man who thinks everybody stuck on him.

MOHAMMED ALI MIRZA THE DEPOSED SHAH OF PERSIA. Mirza became shah in January, 1907, and immediately took steps to overthrow the constitution, which he had signed and sworn to protect a month before when he was crown prince.

YOUNG SHAH WEPT

When Parting With His Parents—The Ex-Shah Reconciled to His Fate.

London, July 19.—The Teheran correspondent of the Times describes the affecting scene at the parting of the new Shah from his parents. Both his mother and father broke down at the thought of parting with their favorite son, and offered their second son in his place.

NEW YORK TUBES

Two New Tunnels Opened To-day With Much Noise.

Will Revolutionize Traffic in the Great Metropolis.

New York, July 19.—Two more of the subterranean arms by which New York is drawing closer its suburbs, quickened with life to-day when the first electric train of steel cars whizzed through the new "McAdoo tube" from the Church street terminal in New York to Jersey City.

The two tunnels opened to-day are only a step in the plan which in a comparatively brief time will relieve New York of the embarrassment of its insular situation and make it possible for the traveller from the west, the south, New England—from any point in the country, in fact—to go through the city without leaving his train for a cab, trolley car or ferry.

The opposite banks of the lower Hudson now are only three minutes apart. The twin tubes given over to traffic to-day connect downtown New York with the New Jersey mainland as a whole and with the Pennsylvania railroad station on the Jersey shore in particular.

To-day's event was marked by a celebration in Jersey City, which followed the arrival of the first tunnel train this morning. As the train sped under the river every steam tug and locomotive up and down the great waterway let loose its whistle.

GROCERS' PICNIC.

Wednesday—store closed all day. An abundant supply cooked meats, hams, tongues, beef, cottage veal loaf, potted chicken, tongue, turkey, duck, chipped dried beef, dainty biscuits in small packages, sardines, shrimps, blotters, salmon, past in small glass jars, pickles and olives in small bottles. We expect to be very busy to-morrow. Kindly favor us with your order as early as possible. No Beach delivery Wednesday.—Bain & Adams.

IN ZION CITY.

Chicago, July 19.—Zion City, the town of one religion, is receiving its first touch of denominationalism. Under the administration of a receiver, the Methodists and the Baptists have gained a foothold within the territory that was closed to every faith but one during the lifetime of John Alexander Dowie. Both the Methodists and Baptists held meetings yesterday in the Zion City Hotel, formerly known as Elijah Hospice.

THE BEST PIPE TOBACCO.

Rose Leaf smoking mixture is a delightful blend of high-grade tobaccos that smokes cool and sweet. The large tins are sold for 75 cents only at peace's cigar store, 107 King street east.

SAFETY DEPOSIT BOXES

To rent at \$2 a year and p.w.s. for the storing of deeds, bonds, stocks, wills, silver and other valuables. READERS BANK OF CANADA.

THE MAN IN OVERALLS

Now every one will have a fighting chance for his life. Feed it on pure milk, and be thankful.

Perhaps the Public Library building could be made into a Labor Temple.

So many going to the grocers' picnic that we may as well make it unanimous.

Never mind if you don't pass. There is lots of time. You will be all the better next year.

The distributors of dodgers who litter the streets with them will have to dodge the police.

But isn't there a big slice of the side of the mountain still to be acquired by the city? We should have that for a hanging garden.

Times would be better here if Hamiltonians would patronize Hamilton instead of Toronto.

Shop in the forenoon and avoid the rush later on.

But have the Chinese Sunday school scholars nothing to say on their own behalf?

Am I to understand that the Hydro organ objects to the city getting special privileges from the Hydro Electric Commission?

Ladies, it will now be safe for you to appear in the streets of an evening.

What's the idea of bringing Americans for the Technical School? Can't we find Canadians?

Now, mothers, see that you get some of that pure, fresh, clean milk for baby. It's a matter of life and death.

Then here we are told by a contemporary that people are becoming too liberal and broad-minded to go to church in warm weather. The devil can find dupes to believe anything.

Don't be too positive. There is a chance that you may be wrong and the other fellow right. I've been mistaken myself.

Everything is arranged now for the grocers' picnic except the weather. The President is attending to that. He won't trust the committee.

It's not much to ask the buying public—to go shop that the stores can be closed at 5 o'clock this and next month.

Possibly the Mayor might be able to get a public statement made as to the proposed disposition of the Patriotic Fund. The veterans and the subscribers would like to hear from the trustees.

How are you and the housefly getting along together? I would think after the awful reputation it has got lately you wouldn't give it house room. Are you using sticky paper or the other kind?

Father, I wouldn't let Johnnie run wild altogether these holidays. An hour a day spent going over his lessons wouldn't hurt him. But let him choose the hour.

The best way to have good neighbors is to be a good neighbor yourself. The people next door or across the street, may just be as anxious as you are to be friendly. Anyway you don't need to act up or be distant because they may do so or be. We go through this world only once as far as I understand, and the best plan is to make the best of it.

If your rent has been lowered this year, as it should have been, don't blame the landlord. Perhaps he needs the money more than you do.

If you want to get a good shakedown, try a ride on the Brantford street cars. Just like a trip on a stormy sea.

Talking about the city beautiful, a drive in the neighborhood of Hamilton these days would convince you that for beautiful surroundings there are few places more beautifully situated.

Brantford is a nice city. But those flat wheels are awful.

RESERVED.

Celebrated Explosion Cases Before Privy Council In England.

Those two celebrated cases, Collins vs. Dominion Natural Gas Company, and Perkins vs. Dominion Natural Gas Co., have been before the Privy Council of England, and judgment has been reserved.

The gas company's appeal was heard on July 8th and 9th. Sir Robert Finlay, who was attorney-general in the Baldwin Government, and is considered one of the greatest lawyers in England, represented the company, and was assisted by Mr. Geo. Lynch-Staunton, of this city. Mr. G. Farmer represented Collins, and Mr. D'Arcy Martin was for Perkins. The argument lasted the whole of two days.

The Hamilton lawyers will be home about the middle of August.

Learn to Swim

Is easy if you wear one of our swim-ming collars. Your head can't sink, and it leaves your arms free to stroke out. When you want a bathing cap to keep the hair dry, we have them at all prices. Come in and let us show you "these goods." Parke & Parke, druggists.

TIME! TIME!

Look at the advertisement in this issue and post yourself about the train times for the grocers' picnic on Wednesday. There will be many trains and an abundance of cars, but the time is important. Never was a better programme of sports arranged for any picnic. Go and enjoy it.

MURDEROUS ATTACK ON FRED PORTEOUS.

Mark Tompkins, An Old Convict, Arrested—Remanded For One Week To-day.

Shortly after 12 o'clock on Saturday night a daring attempt was made by two highwaymen to hold up Fred J. Porteous within a few feet of his own doorstep. They tackled the wrong man, however, as Mr. Porteous stands six feet in his socks, has plenty of grit, and is perfectly capable of looking after himself in any company. He runs a large meat and produce store at the corner of York and Bay streets, and it was after leaving there with the day's receipts in his pocket that the hold-up took place. Walter Clark and William McLaughlin, two friends, met him at the door of his store as he was locking up, and walked as far as the front door of his house, which is just around the corner on Bay street. There they stood chatting for a few minutes, and then proceeded south on Bay street. They had gone scarcely half a block when they heard a scuffle and someone yelling for help. Recognizing the voice as that of Porteous, they started to run to his rescue, but before they could get there saw two men run out of the door at the side of the house and make off, with Porteous at their heels. They decided to join in the race, and followed Porteous. The thugs ran as far as the corner of Bay and York streets, and then split, one continuing down Bay street and the other turning west on York. The three pursuers wheeled into the wake of the man on York street, and some record sprinting was done as far as Caroline, where the man in the lead turned towards the bay. Porteous seeing a man walking towards them yelled to him to stop the robber. As quick as lightning the stranger stuck out his leg and the fleeing robber tripped and fell. Before he could regain his feet Porteous made a flying leap and landed on his back. Clark arrived at this juncture, and with the help of the stranger the three had no difficulty in holding their man.

S. S. PUPILS AT ENTRANCE.

All Recommended Pupils From Four Schools Passed.

Rev. Father Lyles, Secretary of the Separate School Board, and Superintendent of the schools, has made up a statement of the number of Separate School pupils recommended by the Board of Examiners for entrance to the Obligate, who have been successful. The statement will be of especial interest in view of the much larger percentage of failures, than usual. It shows that the failures, among the Separate School pupils at least, were chiefly among those who were not recommended, but who tried the examinations. Here is the report:

Table with 3 columns: School Name, Recommended, Passed. Includes St. Mary's school, Sacred Heart, St. Lawrence, St. Thomas, St. Patrick, etc.

The total recommended were 62, and 31 passed, a percentage of a little over 50 per cent. It will be noticed, however, that four of the schools passed all of those recommended. The only exception is the Sacred Heart school, which passed only 50 per cent. Sacred Heart is a girl's school and the girls were among those who wrote in the Technical School attic. In addition to the complaints already heard from this place, it is said that the girls in the back part of the room had great difficulty in hearing the dictation.

CALLED OFF.

Action Against Fort Erie License Holders Withdrawn.

Mr. P. E. Miller, of Bertie Township, Welland, brought an action some time ago to have the liquor license at the Fort Erie race track cancelled on the ground that the accommodations were poor and inadequate. The allegation was made that the License Commission issued the license without the proper equipment existing, and a notice of motion was served to restrain the proprietor from selling liquor until the action could be tried.

GRASS TIRES.

A New Wrinkle In Running an Automobile.

Although the automobile has the horse beaten in some ways, in others it hasn't. Yesterday automobile 4061, owned by Felix Critch, came to grief while in the country. One of the tires was punctured, and as it was very difficult to put another tire on the four occupants of the auto, thought the best thing to do was to stuff the tire with grass. They proceeded to pull enough to do so. The process of putting grass in the tire had to be repeated a number of times, as it kept falling out, but the cyclists arrived in the city without any further trouble, but to the great amusement of those who saw the incident.

WORKED IN TORONTO.

Toronto, Ont., July 19.—It has been learned that Hector Mason, drowned in Elb Lake on Friday last, formerly worked for the Canadian Gas, Power & Light Co., of this city, but he had no relatives here.

HEAVY COURT FOR MONDAY

Police Drag Net Resulted in 24 Cases To-day.

A Dundas Man Was Sent Down for Three Months.

Domestic Affairs of Walter and Mrs. Higham Aired.

Crowded to overflowing was the Police Court this morning by those curious to see what Magistrate Jelfs would hand out to the 24 prisoners that the police drag net had caught. The dark brown liquid, known as stagger juice, was responsible for submitting many candidates for examination. Many were Sunday drunks and the Magistrate looked curious as their means of procuring the wherewithal was divulged.

Samuel Foy, aged 18, of Dundas Road, was charged with vagrancy. He pleaded piteously with His Worship to give him a chance to go to St. Kitts, where he had a job, but the Magistrate expressed his determination to rid the city of such parasites, and Foy will occupy apartments in a large building situated in Toronto for the next three months.

Thomas Coates was charged by Harry Kempf, proprietor of Germania Hotel, with child stealing. Coates, when asked "Guilty or not guilty," replied "Ephraemically not guilty." The boy alleged to have been kidnapped, was Norman, son of Henry Kempf, aged 4 years.

Tom Rowan, witness, said he saw Coates with three children, going towards the mountain, and stopped him, saying: "What are you doing with these children?" Coates replied "None of your business."

The Magistrate was of the opinion that there was not sufficient evidence to back up the charge, so the case was dismissed. The domestic felicity of Walter and Mrs. Higham, 291 St. James street, north seemed for some time to have been marred. Hubby was charged with non-support by his wife, and she told a long tale of his gross negligence of her and the children, and how for three months she had not received a cent from him. She said she spent his time in the pool rooms. Mrs. Higham, a clean, smart-looking young woman, also told the court of her struggles to make ends meet. Hubby became quite effusive in his promises to her, when he spoke, and pleaded with the Magistrate to lay down any conditions, and whatever they were he would go by them, but she refused. He claimed to have money in the bank to the sum of \$20, but to that story there seemed to be a wealth of doubt. Finally, he was remanded for three days, as the police have been interesting themselves on his behalf, and made this request:

David Melville, alias John Jones, of Stoney Creek, had to face two charges, one of being drunk on Sunday and another of assaulting P. C. Duffey. Melville on Sunday morning was sleeping in a doorway on James street north, in an advanced state of inebriety when the constable arrested him and started him on his homeward way, but Melville had an overwhelming desire to exhibit his pugilistic abilities, and said to the police officer: "If it were not for the clothes you have on I'd kick the stuffing out of you." The prisoner was given a chance to get by him, but persisted in his notorious conduct, and made a plunge at P. C. Duffey and bit the officer's thumb. Melville said it was all new to him, as he was in a state of mental oblivion, owing to imbibing more than usual.

Henry Dohy and Thomas McCarthy, of 174 MacNab street north, were right, and nice-looking boys of 18, were charged with vagrancy. Several constables swore that they were night prowlers. Dohy maintained that for the past 10 months he had been working nights. He was discharged and McCarthy was remanded.

Complaints have been lodged with the police against Hannah Weinstein, of 148 John street north, alleging that she was keeping a disorderly house. P. C. Gibbs was told off to watch the house on the night of July 5 and saw many men go in, and on Saturday night the place was raided and the keeper arrested, together with a young man named William Arnold, who was charged with being a frequenter. This morning Mr. H. Carpenter appeared for the defendant, Mrs. Weinstein, and pleaded not guilty at first, but after the evidence pleaded guilty. She was sent down for two months, and was removed to the cells in a hysterical condition.

William Arnold, Main street, charged with being a frequenter, was remanded. The philosophy of paying for what he ate did not appeal to James Jamieson, of 256 MacNab street north. He went into a restaurant and had a meal and went away without paying. Jamieson said he was drunk and had the money in his pocket. He was fined \$5 for drunkenness. He was also charged with vagrancy and was remanded on that charge for inquiry.

SUMMONED.

Dog Cases to Come Up at Police Court To-morrow.

Since the dog catchers went out of business the by-law relating to the confinement of the canines has been completely ignored, and the owners of gardens and lawns have been sending in numerous complaints to the police. To meet this difficulty instructions were issued to the members of the police force a few days ago to acquaint themselves with the names of the owners of stray dogs and apply for summonses. This has been done, and two or three cases will likely be tried at the Police Court to-morrow.

PERSONAL.

Mrs. E. D. Ross and Miss Leslie Ross left last week on a three months' trip through British Columbia and to Seattle. Mrs. Mowat, Toronto, is visiting her sister, Mrs. D. J. Pean, at Key West Villa, Van Wagner's Beach. The many friends of Wilfrid J. Land, 64 Smith avenue, will be pleased to hear that he has accepted a position as auditor with the firm of Hudson & Standfield, Auditors, of Toronto, Ont. Miss Anna Warren Smith, daughter of Inspector J. H. Smith, who is director of the choir of Park Street Church, Chatham, left for her home here to-day, and will also spend part of her vacation in Muskoka.

Love Finds the Way

Lady Melville's bosom heaved and her eyes flashing fire, asked: "How?"

"Yes, I shall be most happy, most delighted," said Mr. Besant, in confident and most assured tones.

The spy drew her back to the chair, and with her hair clasped in her hand, whispered in her ear.

Lillian looked at her father uneasily, and with her hair clasped in her hand, whispered in her ear.

"I know who stepped in to rob you of him. It was Harcourt. He whisked of a shame that stunned his love.

What did it mean—how could he be compelled to stay at the hotel?

Remove Lillian Melville, become mistress of Rivershall, and I will prove to him that it was a shadow, and that you were not too base to be Claude Ainsley's wife."

Mr. Besant laughed boisterously. "A rest for ten miles! That has a cool hundred wouldn't hurt me."

Lady Melville's face flushed and her eyes flashed with an intense longing.

Lillian glanced at the window—trying hard for an excuse—but James, the groom, was pacing her own and Mr. Besant's horse, and there seemed no escape.

"How?" she breathed.

"I have a ready wit, my lady. I go to him in tears and penitence and confess a crime, tell him that in a fit of jealousy I concocted the vile story and palmed it off on Lord Harcourt."

"Let me think, let me think," she murmured. "Oh, if it could but be!"

"I shall be," replied the temptress. "Trust me; you are prompted by love. I am nerved by a still fiercer passion—hate. Promise but to help me if I call upon you, and I swear that Claude Ainsley shall return to you; refuse me, and I shall marry Lillian Melville."

Maddened by the words and scornful tone, the tempest woman sprang from the chair and caught at a small jewel cabinet.

"Dear papa," said Lillian, with something on her eyes, "I wish he had been able to come this morning."

Her face was livid, her lips ablaze, her fingers trembling so that they refused to insert the key.

"Ahem, yes," said Mr. Besant, but not very cordially. "Here we are at the boundary," he added, as he pulled up at the narrow road that divided a portion of the Rivershall estate from the house.

"His wife!" she breathed. "Never! Take this and do your work!"

"There's another way of doing that, and a better," he said.

"Go to bed—and sleep!"

He bowed, suddenly grew crimson, and was staring at what he called her.

"Then, with the packet in her hand, she glided from the room."

"No, no," said Lillian, getting out with words with difficulty, and speaking with a strange dignity.

"No sooner had the door closed than Lady Melville with a stifled cry fell full length in a swoon upon the white, spotted rug that stood before her toilet table."

"No, no," said Lillian, getting out with words with difficulty, and speaking with a strange dignity.

"Then she dropped into a chair and commenced removing the wrappers of the packet. There were many of oiled skin and paper, the last covered a small silver box upon which was cut, as if with a penknife or scissors, in large letters, the words, 'Deadly Poison!'"

"No, no," said Lillian, getting out with words with difficulty, and speaking with a strange dignity.

"I thought so!" she muttered. "I thought so! Ah, ah! how the web weaves! High and low the same strings move us. Little did my ladyship think while I acted my part what my real motive was. Well, if the high-born Lady Melville can poison the woman who stands between her and her love, how should I shrink from taking revenge upon the woman who ruined the man I love?"

"No, no," said Lillian, getting out with words with difficulty, and speaking with a strange dignity.

"CHAPTER XXVIII. Sir Ralph and Lillian were back at Rivershall three days before the one fixed for the expiration of Mr. Clifford's holiday."

"No, no," said Lillian, getting out with words with difficulty, and speaking with a strange dignity.

Lillian was not sorry to get back—indeed, she had been conscious of a distinct longing for the old place for the last week, but now she was back she seemed to miss something."

"No, no," said Lillian, getting out with words with difficulty, and speaking with a strange dignity.

"It was a great change from a quiet filled with amusing visitors to a quiet old Rivershall, she told herself."

"No, no," said Lillian, getting out with words with difficulty, and speaking with a strange dignity.

"Sir Ralph might also have felt dull—he kept to his study for the first two days, and saw little of Lillian; when he did, however, he was more than ordinarily loving with her, but his tenderness was tinged with a shade of sadness which was perfectly inexplicable to the beautiful girl and troubled her."

"No, no," said Lillian, getting out with words with difficulty, and speaking with a strange dignity.

"It was, however, soon explained. The second morning after their return Miss Lucas entered Lillian's own room—a charming little boudoir near the picture gallery—with a message from Sir Ralph. He was going for a ride; would Lillian like to accompany him?"

"No, no," said Lillian, getting out with words with difficulty, and speaking with a strange dignity.

Lillian jumped up and ran down to tell him she would be delighted.

"No, no," said Lillian, getting out with words with difficulty, and speaking with a strange dignity.

"She found him already booted and spurred and more cheerful with her than had been yesterday."

"No, no," said Lillian, getting out with words with difficulty, and speaking with a strange dignity.

"What a lovely morning," said Lillian, running off again to get her habit on.

"No, no," said Lillian, getting out with words with difficulty, and speaking with a strange dignity.

AT R. MCKAY & CO'S. TUESDAY, JULY 20, 1909

Fill Your Hot Weather Needs Now and Save

Hamilton's best store places before you grand chances to save in just the goods one wants for the hot months—positively savings of one-third to one-half. Will you share in Tuesday's specials? And don't forget you will find scores of attractive lines on sale tomorrow not advertised. Come.

BOARDERS WANTED

BOARDERS WANTED—ENGLISH PREferred. 152 Ferguson avenue north.

FOUR MORE DIE.

Berlin, July 19.—Four more persons, who were severely burned last night as the result of a fire which followed the explosion of a motor cycle during a race at the Old Botanical Gardens, died today. This makes a total of eight deaths. Over twenty other spectators were severely injured and a dozen slightly injured.

Permanent Success Demands Constant Advertising. Consider the world and his wife in the shade, during these sultry days, reading their favorite magazines and NEWSPAPERS, and keep up your bombardment. It is good business, and it pays—economic advertising. Use the Times---Results

OBITUARY. Death of Mr. Edward Williams—Late Mr. Wilson. Samuel Wilson, the well-known hotel man who passed away suddenly on Saturday, was born in this city and had resided here all his life. Deceased was the proprietor of the Vineyard Hotel, 22 and 24 Main street east. He had not been in good health for some time and on Saturday morning he was taken suddenly ill and passed away in a short time. He was 51 years of age, was a member of Barton Tent, K. O. T. M., and of L. O. L. 1019, which they will have charge of the funeral to-morrow afternoon. Deceased leaves a wife and four daughters, Georgina, May, Gertrude and Jennie.

CADET CAMP. Collegiate Boys Had a Glorious Week of It. The first annual camp of the Hamilton Collegiate Institute Cadet Corps is now an event of the past. The week's outing certainly was a pronounced success. It was, to say the least, a grand closing for the successful work in drill during the past term. Probably this is the last time that many of the cadets will don a soldier's uniform during their school life, but one fact may be stated, that, as now they go out to travel life's way, the thought of the pleasant hours spent in drill on the Collegiate campus under the faithful guidance of Instructor Syme, the strict military discipline of camp life, and the jolly tales told round the camp fires on Carpenter's beach will never leave their memories.

THE LIVERPOOL & LONDON & GLOBE INSURANCE COMPANY. CREAR & BURKHOLDER, 412 Federal Building, Phone 610, House 278.

If You Want the News Read the Times. Time Ads Bring Results. Call for letters in boxes 1, 4, 8, 13, 19, 22, 31, 32, 35, 36, 49, 51, 55.

ADMIRAL BERESFORD. Hero of Alexandria Will Open Canadian National Exhibition at Toronto. Admiral Lord Charles Beresford, who has accepted an invitation to visit Canada to open the Canadian National Exposition at Toronto, is known to fame as the great leader in the national defence movement now agitating the whole empire.

HELP AND ENCOURAGE BANDS. To the Editor of the Times: Sir—In the Times of July 16th, a new article on "Band Night" refers to two or three little things that could be done to enhance the pleasure of the citizens who attend these open air concerts.

Eclipse Passes Unobserved. Although preparations were made at the United States Naval Observatory to observe the eclipse of the sun on June 17, cloudy weather spoiled all the plans. Inasmuch, says the Scientific American, as the eclipse was only partial in these latitudes, where few if any white men, with the exception of Commander R. E. Perry and his crew, are to be found, the eclipse was not of much astronomical importance.

FLOW OF SAND IN TUBES. The flow of sand through tubes has been studied by C. E. S. Phillips. It seems, says the Scientific American, that the rate at which the free surface of a column of sand descends in a powder from an orifice at the lower vertical tube, owing to the escape of powder from an orifice at the lower end, is independent of the head of sand above the opening. These experiments are intended to throw light upon the manner in which this result is brought about.

Elephant mothers of ninety years old are not uncommon. Few companies will insure a bartender.

DELAWARE PARK SURVEY. Lots in this Survey are selling rapidly. The prices range from \$30.00 to \$8.00 per foot. SPECIAL ATTENTION. On Westmoreland and Eastbourne Avenues, commencing 100 feet south of Delaware Avenue, and extending southerly 280 feet, there are 28 choice lots. One-half of the lots in this group are sold. The remaining 14 are still for sale at \$17 per foot. The price will be raised \$1 per foot or \$40 per foot on the 26th instant. They are well worth \$20 per foot. Move quick and secure your choice.

Our Popular West Mount Survey of Choice Home-Sites. West Mount lots are selling rapidly. Why? Because the location and price cannot be duplicated. If you want an investment or home-site buy now before prices are advanced. Our City Office Will be Open From 9 to 12 o'clock. Our Branch Office, Corner Aberdeen and Flatt Avenues, Will be Open Evenings Only From 6.30 to 8 o'clock. H. H. Davis, Manager, Phone 685, W. D. Flatt, Room 15, Federal Life.

Should Be Abolished. Cooking during the hot sultry weather should be entirely abolished. That, however, seems impossible. The nearest approach to that happy situation is cooking with an Artificial Gas Range. By this reliable method you cook coolly, quickly and for less money. \$17.00 will buy you one of the best ranges on the market. Why not drop in and get yours to-morrow, or phone No. 89. HAMILTON GAS LIGHT COMPANY. PARK STREET NORTH.

BENEFIT SOCCER. Westinghouse Defeated All the Hamilton Teams. The soccer game between the Westinghouse and the picked team, which was played on Saturday at Cotter's Field for the benefit of T. Knowles, who had his knee-cap broken in a recent game, proved very interesting, but Westinghouse maintained their supremacy over the best that can be put on the field. Westinghouse won, 3-0.

INSULTING WOMEN. To the Editor of the Times: Sir—Will you be so kind as to allow me a space in your paper with regard to the insults heaped upon the Hamilton women? (As something be done to stop these men? What are the Police doing? It is the worst thing that has ever happened in Hamilton. And can the newspaper have the power to do the sort of thing. I hope the council will pass a by-law to put an end to this sort of thing, and I hope the Chief of Police will look after these men. Now, Mr. Editor, in thanking you for space, yours truly and against these hold-up men. BEN SMITH, City Hospital.

REGAL SHIRT. Employees Had a Fine Time at Mohawk Park. A very enjoyable picnic took place on Saturday, when the employees of the Regal Shirt Co., Limited, were entertained by the management at Mohawk Park, Brantford. The party went by special cars over the Brantford & Hamilton line, and after a record run reached Mohawk Park, where the fun began.

W. C. LAIRD IS CHAMPION. Rochester, N. Y., July 19.—Toronto won all the honors of the League of Women Lakes golf tournament by capturing the individual championship on Saturday afternoon. Having won the team championship on the first day, all that remained was the individual title, and this Toronto made sure of when W. C. Laird defeated G. T. Curtis, the champion of Rochester, in the finals.

More Shakes. Athens, July 19.—Further earthquake shocks were felt to-day at Anafitua and the neighboring region, but no casualties were reported.

Author's Dead. Little Rock, Ark., July 19.—Mrs. Susan Pierce Stephens, known to the literary world as "Sheppard Stephens," daughter of the late Bishop Henry Niles Pierce, of the Episcopal diocese of Arkansas, died yesterday.

THE HAMILTON TIMES

MONDAY, JULY 19, 1909.

REMOVE THE STAIN.

The only plea made by the hired organs of the Hydro-Electric ring in defence of the vicious legislation in denial of civil rights and the security of private property which Whitney has forced through the Legislature is that what they are pleased to refer to as the cheap power policy of the Government is popular. But this very plea is an argument against the enactment of the piratical legislation objected to. If this scheme is as popular as the hired mouthpieces would have us believe, it should be quite unnecessary to resort to legislation confiscating private property, denying individual rights which were supposed to be secure in every British country, and closing the courts of justice to the petitions of those who have been wronged. No good cause can be served by such legislation; and no Government or Legislature should be allowed to forward a bad cause by such means. However good or however bad this power scheme may be, the legislation which sacrifices private property and rights, stands condemned. No people who make and enforce laws against sheep-stealing, hen-roost robbery and burglary can afford to tolerate the enactment of laws which make legal conduct on the part of the Provincial authorities beside which such crimes appear almost virtuous. One of the mouthpieces of the conspirators against the constitutional rights of the people puts forward the pitiful excuse that Prof. Dicey, of Oxford, could not have been thoroughly informed when he so severely denounced this legislation and found the remedy for it in the power of disallowance. No honest, intelligent person or paper would venture such an excuse. An act of the Legislature speaks for itself; and Prof. Dicey was in possession of the words of the statute which has so outraged opinion in all British countries. He dealt with it from the point of law, and its effect upon the rights and liberties of a British people. He was naturally horrified to discover that such a measure could find a place on a statute book under the British flag. He reasoned that while matters of property and civil rights were committed to the Provincial Legislatures it was possible that the Privy Council might regard such an act as no law at all. His opinion was that the remedy for such a tyrannical abuse of power lay in the federal authorities' power of disallowance.

And Prof. Dicey is right. It should be Sir Wilfrid Laurier's duty to see that action to remove this disgrace from the Ontario statute book is promptly taken. The Hydro-Electric scheme is not and should not be dependent for its success upon any such legislative abortion. Anything that is good in the Hydro-Electric scheme exists independently of such an outrage; and the good features will remain and may be utilized when the disgrace imposed upon Ontario has been removed. If, indeed, the scheme cannot be carried out except by the wholesale deprivation of private rights and the legalization of the spoliation of the individual, it ought to fail. No matter what the result to the scheme or the schemers, it is the duty of the federal authorities, to whom the power of disallowance is entrusted for the protection of the Canadian public against injustice, to see that this legislation is promptly disallowed.

SLAUGHTER OF INNOCENTS.

Of the 6,946 deaths recorded in the last report on the city's vital statistics, no less than 1,291 were of children under one year. Of these, in turn, more than one-fourth died in the two hot months of the summer, July and August. And of the 315 children dying in these two months, 201 were listed under the ominous "diarrhoea and enteritis" class. —Detroit Free Press.

In other words, most of those little ones were poisoned by improper food, mostly by impure milk, the essential diet for babies being milk, and pure milk being almost unobtainable by city dwellers under ordinary conditions. The Detroit board of health is taking the matter up, and will make an earnest effort to lessen this slaughter of innocents. And it can be lessened. Rochester, N. Y., has furnished a demonstration of what can be done by a campaign of education and by placing pure, wholesome milk within reach of the mothers of the city. The infant death-rate has been reduced one half in a few years. Much attention is now being given to the subject in intelligent communities. People spend much money and put forth great efforts to save a few dollars of taxes; why should they not spend and labor to save thousands of precious lives? Economy, humanity, duty makes the work one of the greatest moment.

Hamilton is to attempt to lessen this criminal waste of infant life. The Milk Commission organized by the Medical Society, the Board of Health and the Victorian Order of Nurses will grapple with the evil of poisoning the helpless little ones by improper food, and will try to give the mothers pure milk for babies, and to instruct them how to feed them and care for their comfort in summer. The Finance Committee of the Council could not see its way to vote the small sum required for the beneficent work, so these societies, through the commission organized, are taking up the burden, confident that an intelligent and humane public will not see the effort fail for lack of support. Indeed the Times will be astonished if the Council hold aloof from a work so beneficent and refuse to the saving of the children and aid so freely voted to infinitely less worthy causes. The milk depots in the butter market

building and at the City Hospital will furnish mothers pure milk from healthy (tested) cows, sanitarily handled, at a cost of about one cent a feeding for a baby during the hot months. Valuable hints as to care of the little ones are also given to all who apply. Mothers, the utilization of these advantages may mean much to you. Thousands of baby lives have been saved by this means; your baby may be saved from serious sickness, perhaps death. Will you risk its precious life by neglect?

WILL BUILD IMMEDIATELY.

William Mackenzie, of the C. N. R., has returned to Toronto after two months spent in Great Britain, where he was successful in floating some large loans for his railway. Mr. Mackenzie intimates that the line from Niagara Falls, passing through Hamilton, to Toronto, will be commenced almost immediately. It will be a steam railway, although part of the Electric Development Company's right of way will be used. This sets at rest, for the present, at least, the rumors that it was to be an electric railway. As yet, apparently, no preparations have been made for connecting the line with the C. N. R. system at Port Arthur, but it is thought that ultimately that is the intention of the promoters. This declaration of the C. N. R.'s intentions is of considerable importance to Hamilton. The immediate building of the line will not be without its effect upon business; and we may look for some important developments which have been foreshadowed by the activity manifested in railway circles of late by the securing of options upon valuable blocks of land in the city. Important moves which may have the most beneficial influence upon the future of Hamilton are pending.

REVIVAL OF CRICKET.

There are evidences of a healthy reaction against the violence of modern sports, and a desire on the part of sane seekers after healthy amusement to return to more moderate forms of exercise. Perhaps the long-distance pedestrianism of recent years, culminating in the vice of "Marathonism," with its trail of ruined-for-life young men and its stimulation of the betting evil, has had not a little to do with making milder exercise more popular. At any rate, there has been a marked revival of cricket, where it had all but died out, and both alley and lawn bowling, golf and tennis have grown in popularity.

Cricket is eminently the gentleman's game both by historical association and as a matter of choice. It does not demand exceptional physical powers, and it does not dangerously exhaust its devotees. It requires deftness such as is produced by native skill and careful training of hand and foot and eye. It calls for no extraordinary risk of life and limb; and it leaves the players exercised but not exhausted, and better fitted for the serious work of life. And the good feeling prevailing among the wielders of the willow is proverbial.

It is an old game—how old exactly it is hard to say. It is mentioned in 1508 in English works, and it is supposed to be identical with the game of "club ball" of the 14th century. As it was known in Queen Elizabeth's time, it probably had its origin in a game known as "Rounders" or "stool ball." Lord Chesterfield, in the early years of the 18th century took up the game heartily, and Eton is credited with being the first public school to adopt it. It was the custom in those times to keep the score by notched tally sticks. The ball used had heavy outstanding cross seams, fitted for very hard hands indeed. The bats were curved, and the fielders were arranged almost in Indian file, not distributed about as in the modern game. In 1774 "a committee of noblemen and gentlemen" met in the Star and Garter Inn, Pall Mall, and laid down rules for the conduct of the game. The Duke of Dorset and Sir Horace Mann were members of that committee. County matches were common then, the first recorded being Kent vs. England, in 1711.

It is in the interest of pure, moderate, healthy sport that there should be a revival of cricket. Its influence physically, mentally, socially, is good. It furnishes the proper quota of exercise, without excess, and interest without rabidity. It is a young-old game that will ever have its attractions to gentlemen sportsmen.

EDITORIAL NOTES.

President Taft says he feels strongly "the call of the country for a downward revision of the tariff." Will he do his share towards securing it?

What has become of all those bitter campaigners against the Ross rifle? The monotony of the story of its successes discouraged them?

The Toronto bakers are increasing the price of pies and cakes 20 per cent. That should not be a serious matter. Where domestic science is taught, home-made pies and cakes are always obtainable.

The United States tariff conferees have voted bonds to the amount of \$397,000,000 to pay for work on the Panama Canal. It is a big instalment, but "more" is the cry.

The Canadians have won another prize, the Jubilee Challenge Cup, given for the highest aggregate scores in the McKinnon and Knapton matches. The Canadians have made good scores in the Graphic competition.

Holding up business men in the street and attempting to relieve them of their

valuables is not a performance to be encouraged. It is to be hoped that Saturday night's attack will be so promptly and effectively punished that another will not soon be made.

The retirement of Von Buelow and the appointment of Von Bethemann-Hollweg to the German Chancellorship, is accepted as restoring the autocratic power of the Kaiser. It remains to be seen how the Reichstag will take it.

One hundred and forty British warships dropped anchor at the mouth of the Thames the other night. It was a defensive fleet of some moment. Its tonnage was 750,000; its cost \$310,000,000 to build, and it was manned by 42,000 picked seamen. Who said "naval decadence"?

Sixty-nine of eighty-eight young men who were applicants for admission to the United States Marine Corps, failed to meet the physical tests. Some United States papers, which have been reflecting upon British physical decadence, might draw inference from this circumstance.

There are rumors that negotiations are going on for the purchase of the Allan line by the Grand Trunk Pacific. By the contract with the Government the C. P. R. is required to have lines of steamships on both the Atlantic and Pacific. It is possible that the present rumor may have some basis of truth.

The Toronto Mail and Empire takes great pleasure out of the coal strike situation. It fairly screeches with glee at finding that the Yankee union refuses to accept the conditions and persists in making war upon the Canadian organization and continuing the strike. It seems to think that in some way the U. M. W. helps it in casting discredit upon the Lemieux Act and the Canadian Department of Labor's efforts to promote peace.

Don Carlos, the Pretender to the Spanish throne, died yesterday in Lombardy. In the early seventies, Don Carlos was a power in Spain, practically reigning over a considerable district in the north of the kingdom. He was the undisputed male heir of the House of Bourbon, and the French Royalists frequently sought to induce him to put forward his claim to the throne of France. He leaves one son, Don Jaime, who is an officer in the Russian army.

It is sad to learn that the Franco-Canadian treaty does not please Uncle Sam. Under its terms, Canadian manufacturers of agricultural implements, electrical machinery, etc., enjoy considerable tariff advantages which, added to the cheaper Canadian prices of steel, wood, etc., will, it is feared by United States manufacturers, turn a large part of this trade to Canada. It is highly probable that the great manufacturing industries of Hamilton will profit largely by the terms of the treaty.

Up in Chatham, License Inspector French's residence has been bombarded with bricks. The outrage is charged against "Indian listers," for whom the Inspector has been making it hot. Somewhat over 20 years ago, in Scott Act times, the back wall of License Inspector Israel Evans' house was completely blown out by dynamite, and the Inspector and his daughter narrowly escaped with their lives. The perpetrator of the crime was convicted and sentenced to 14 years' imprisonment. He did not live out his term, but before dying explained that he had been hired to commit the crime. Inspector French appears to have got off easily.

The Peterboro' Review declares that the creation of local defence fleets by the various British nations "is the foe of peace and unity," and is calculated "to bring the whole scheme for the solidarity of the Empire into well-merited contempt." The Review sorrowfully admits that this policy was advised by Great Britain. Has it ever occurred to our contemporary that there was a chance—just the barest possible chance, you know—of Great Britain and her daughter States being right in this matter and the Review and its few political partisans who talk contributions, or gifts of Dreadnoughts, being wrong? It is a question worthy of its consideration, unless it lays claim to infallibility.

In speaking of the talk about "the unity of the British Empire" indulged in at the Imperial Press Conference, W. T. Stead remarks: "There is a great deal of highfalutin talk as to our imperial destinies which might be exchanged with profit for one hour's serious practical consideration of the question as to how far it is possible to run a parti-colored empire, in which the white minority of the King's subjects absolutely refuse to recognize the right of their fellow-subjects to travel, settle, or to trade in all parts of the King's dominions." That is a very pertinent remark. There are some difficult problems to be dealt with before these imperial issues are settled.

WARNING TO WOMAN.

Murder is the hidden serpent in every bit of forbidden fruit. The unfaithful wife carries in her hands two lives, sometimes more. She arms her paramour with the foul weapons of beastly lust, and her husband with the weapons of revenge. She makes war to the death. There isn't an illicit affair in Detroit to-day that hasn't the possibilities of a murder dormant in it—a nascent murder which requires only a spark, a word, a false step to bring it into actuality. Think of the murder cases you have read about this summer, and you will be surprised to see that all of them can be traced back to illicit relations between a man and a woman. When a woman murders her character, her home life, it is a mighty small step from that to the murder of a living body. It is a natural law that evil carries within it its own poison—it

extinguishes itself by extinguishing those who practice it. The moment a man or a woman misteps, the law begins to grind and the end thereof is death.

Our Exchanges

YOU BET. (London Free Press.) The Ross rifle seems to have hit the bull's-eye at Bisley.

SWIMMING HOLE. (Kingston Standard.) The ideal plan would, of course, be to have a swimming pool in the basement of every school where the children could be taught to swim.

LET THE POLICE DO IT. (Ottawa Journal.) At whatever hurt to the feelings of the individual, but in the interest of the great mass of the taxpayers, the police should clear the streets of bad dogs.

WHY THEY GO. (Toronto Star.) Seven people out of ten who go to public dinners do it because the rest do; because it is the fashion of hospitality to vie in out-dinnering and out-specifying the other fellow.

GUARANTEED GOODS. (Life.) Customer—Can't you give anything off to a clergyman?

Tradesman—Not in this instance, sir. You see these goods is different from yours. These are guaranteed goods.

THE DIPLOMATIC SEX.

(Detroit Times.) Mrs. Green—The doctors say a good cry is healthful. Mrs. Wise—I know it is. A good cry gets me and the girls a month at the seashore each year, and we come back as hard as nails.

THAT PIKE. (Toronto News.) A pike was caught in Burlington Bay which was trying to digest a bar of solder and a piece of lead pipe. It would have had the Newmarket Canal inside also, but it was an Opposition fish and couldn't swallow it.

TERMS, CASH. (New York Herald.) Landlord of Hotel—May I ask you, sir, what that coil of rope is in your bedroom?

Guest—That is a new patent fire-escape. I always carry it, so that in case of fire I can let myself down from the hotel window. Landlord—I see. Our terms for guests with fire-escapes, sir, are invariably cash in advance.

REFUSES TO FIGHT. (Montreal Star.) We refuse to fight with Sir James, because he has already enough troubles with his friends in other quarters. If there were no other reason, we would, however, like to see him step forward, in his own inimitable way, and admit his mistake in ascribing utterances and motives to us which are utterly unjustifiable.

RECIPE FOR KEEPING COOL. (Ottawa Free Press.) Say to yourself aloud, slowly and convincingly, the following: "I am seated in a wicker chair on the northwest corner of a country porch. The breeze is from the northwest. My elbow is on a table. On this table is a tall glass containing a cooling compound. At regular intervals I raise this tall glass to my lips. The chinking of ice falls pleasantly on my ears. I am about to light a 5-cent cigar and send for more of the cooling compound."

Repeat this formula until chilled through.

ASSOUAN. (Kansas City Journal.) Although he was mild in his speech and manner, the old gentleman played golf well. But once when he made a fizzle he ejaculated vehemently the word "Assouan!" A few moments later, when he made another bad play he repeated: "Assouan!"

The fourth time one of his friends said: "I certainly do not want to be inquisitive, but will you tell me why you say 'Assouan' so often?" "Well," said the old gentleman, "isn't that the biggest dam in the world?" He was a clergyman.

CUTE ANSWERS

Showing the High Intelligence of Toronto Public School Scholars.

(Toronto Telegram.) Wealth of ideas, rather than accuracy of knowledge as gained in Toronto Public Schools, is illustrated by the following.

These are real answers to geography questions asked at the recent entrance examination into the Toronto High Schools: AUSTRALIA RELEED BY LAWYERS. 1. We get salt from Petre. 2. Australia is governed by a party of barristers from the British Empire. 3. Canada is governed by the Mayor and aldermen. Australia by the people. 4. Some of Canada's imports are rice, tea and blanc mange. 5. New Orleans is noted for being the home of Joan d'Arc. OCEAN THROUGH GREAT LAKES. 6. The Government of Australia is quite different from that of Canada; it always has a half-holiday on Saturday afternoon. 7. The water from the Atlantic Ocean runs through the great lakes, right up to Winnipeg, so they can never run dry. RIVER RUNS WINDMILLS. 8. One use of the St. Lawrence is that the current is so swift that it runs numerous windmills along its banks. 9. Buenos Ayres is noted as a sea-port, and also for the bad smells in that neighborhood. 10. Australia's Government is not as good as Canada's, chiefly because I will not throw my own Government down. CAMBRIDGE A MANUFACTURER. 11. London manufactures all kinds of goods. Sheffield manufactures cutlery, and Cambridge manufactures students. 12. Naples is noted for where they kill a dog with gas and then bring him to life again. 13. Cork manufactures bottles.

The eagle is a noble bird, but the common hen is after all, perhaps, of more value to mankind.

RYERSON.

First Anniversary of Grouping Church in the East.

Large numbers of the members and adherents attended the services in Ryerson Methodist Church yesterday, it being the first anniversary. Rev. E. B. Lancelotti, of First Methodist Church, addressed the gathering in the morning, and as Ryerson was started as a Sunday school he had a talk for the young people.

He spoke of the need of making a good impression in early life, as the early impression generally governs the later life. The marks on the end of a person's thumb never change, and that is used as a means of discovering criminals, as no two persons make a like impression. In comparison with the impression of the thumb is that of the life of the individual, for the foundation that it laid in early life plays an important part afterwards. He had put in a term in Kingston penitentiary as chaplain, and the first time he saw a man brought in and given a number instead of his name he realized that the life of that man would always bear the marks of his prison term. A boy always carries a jack-knife, and if the knife is not sharp more energy is needed to make it cut, and so it is in human life, if a life is kept dull and not used properly more energy is needed to accomplish anything. God has given each one talents, and He expects all to use them to the best advantage. The hands were given to work with and man has accomplished a great deal with them. In closing he said he was glad to see so many young people in the congregation, and to have an opportunity of addressing them.

In the afternoon Dr. Thomas Wickett addressed the Sunday school and dwelt upon the necessity of more thoughtful work among the primary classes. As a means to this end, he thought the scholars should be given a certificate for memorizing, and when they had secured a certain number of certificates they should be given a diploma. One certificate could be given for the memorizing of the books of the Bible; another for learning the apostles' creed, and others for learning other portions. He said the reason he advocated such a plan was that the children might be taught while young to know the portions of the Bible which would be the foundation of their life.

Mr. Thomas Morris, the superintendent, in a short address, said that a year ago a start had been made and since then there had been a remarkable increase. Then fifty members attended, and at present there are about 130. Although the start had been made in a tent and on a rainy day, it proved to be a good one, and it was not long before the present building was erected. The Sunday school had not only proved self-supporting, but paid the interest on \$1,000. Special music was provided at both services.

DUNDAS.

Rebekah Picnic—Good Citizen Going to Paris.

Dundas, July 19.—The Daughters of Rebekah picnic in the park on Saturday afternoon was very enjoyable and successful. The local members were joined by a good-sized contingent of Hamilton sisters in the afternoon. The affair closed early in the evening. U. M. W. members have for several years been at the head of the mechanical department of the Dundas Star. Leaves in a few days to become business manager of the Paris Review. This change on his part gives the Review a capable newspaper man, and the town of Paris a good citizen. The afternoon address in the Y. M. C. A. yesterday was given by Eddie Norton, and was much appreciated. Mrs. John Lumsden is visiting friends in Brantford. Choir Leader Carey and Frederick Barrett sang "The Holy City" in the Methodist Church yesterday morning in a way so pleasing that many of the congregation would have liked it repeated at the evening service. Mrs. G. N. Pirie and Miss Pirie and Miss Helen Bain left for Muskoka to-day.

GOOD SERMON.

First Methodist Sunday School Boy In the Pulpit.

At the morning service in First Methodist Church yesterday, the preacher was Mr. R. E. Zimmerman, a Hamilton young man, who two or three years ago was connected with the Sunday School of the church, and who is now a divinity student at Victoria University. He has had a year at evangelistic work and a year in college, and gives promise of a bright future. He has a full, rich voice and good language, an earnest and unaffected manner. He preached yesterday under rather trying conditions, as might be expected when a youth returns to a church where he was so recently a school boy, but he made an excellent impression. His text was Ephesians 1:1. He showed the influence, great influence, example has the benefit of imitating something perfect, and of taking the Saviour as the perfect example.

JUVENILE TEMPLARS.

The attendance on Saturday afternoon at the weekly meeting of International Juvenile Temple, I. O. G. T., in the C. O. F. hall, was the smallest for many months past. Mrs. Robert Morrison, superintendent, presided, and was supported by Mrs. C. A. Lundy, A. S. T. W. The superintendent submitted her report of the recent annual picnic, which showed that the event had been a great success, financially and otherwise. Miss Grace Stavon, of Pride of the West Lodge, Toronto, and a former zealous officer in International Temple, was present and delivered a brief but neat speech, in which she eulogized the good work being done among the children here. Next Saturday afternoon, Miss Lizzie Smith, the Temple's former talented pianist, will provide a programme of first class merit.

CASTORIA.

The Kind You Have Always Bought. There are only two lawyers in Iceland.

Tuesday, July 20, '09 SHEA'S Store Closes at 5 o'clock

PUBLIC OWNERSHIP.

Why It Is Popular With Ardent Advocates.

Why is it that a man working for a private employer can accomplish more than eleven times as much in a day as a man doing precisely similar work for the city? And why should work done for the city cost fifteen times as much as the same quantity of the same work done for a private employer?

Why should the city pay a clock repairer \$11.63 per hour for tinkering at its clocks? Why not save money by throwing away a clock as soon as it got out of order and buying a new one? Why is it that the city is obliged to pay sixty cents each for common wardrobe hooks and five cents each for two screws to put up each hook, making the total cost of each hook seventy cents, when the plain citizen can go into any hardware store in the land and buy the same kind of hook with the screws thrown in for six cents? And why does it cost the city an additional \$1.51 to put up each hook, making the grand total cost \$2.21 per hook?

Why does a given quantity of rubber hose that costs other purchasers \$196 cost the city \$300?

Why do gas mantles retailed everywhere at twenty cents each cost the city forty cents when purchased in quantities?

Why do brackets retailed at forty five cents cost the city three dollars?

Why did the city with an assessed valuation of \$4,590 cost the city \$247,053 when bought for park purposes?

Why does it cost the city \$825 a load to haul dirt when a private citizen can get it hauled the same distance under identical conditions for \$1.47 a load?

These are sample computations from rather a long list pronounced at the first budget exhibit of the Bureau of Municipal Research, which was held recently. In reality they were aimed at a specific city, the metropolis of a well-known English-speaking nation of North America, but as fate would have it the conditions outlined in the computations depicted with startling fidelity the situation in about every community in the land big enough to be afflicted with a municipal government. Finding the shoe fitted cities everywhere proceeded to wear it. From "Making Government Good" in the August Technical World Magazine, Chicago.

Where Turner Went to School.

During a visit of the members of the London and Middlesex Archaeological Society to Brentford Mr. Fred Turner, the local librarian, told them that after many years patient searching of records, he had at last discovered the house where J. M. W. Turner, the artist, went to school. Turner, said the librarian, came to Brentford in 1785, and lived in a house in the historic market place, with his Uncle Marshall, who was a butcher. He went to school at a house situated in Brentford High street, now used as a clothier's shop. Mr. Turner showed the members of the Association a copy of Boswell's "Antiquities of England and Wales," containing seventy plates, colored by Turner when a boy at school, for which he was remunerated at the rate of two pence a plate.—From the London Standard.

CANADA WON JUBILEE CUP.

New Bisley Trophy Is First Won by Canadian Team.

Some Good Individual Scores In Several Matches.

Staff Sergt. Bayles Won First Prize In Wimbledon.

Bisley Camp, July 19.—By securing the highest aggregate scores in the MacKinnon and Kolapore competitions the Canadian team also gets the Jubilee Challenge Cup. This is a new cup, specially donated by the National Rifle Association to commemorate the jubilee meet of the National Rifle Association.

The Canadians made good scores in the graphic competition. Lieut. Morris, of Bowmanville, made a possible, and there were several near possibilities. The following were the scores at 500 yards:

Table with 2 columns: Name and Score. Includes Copping, Montreal (555444-32), Creighton, Toronto (555554-34), Forrest, Vancouver (555555-34), etc.

The members of the Canadian team are cashing in well in the Graphic and Daily Graphic matches. The following are some of the money prizes:

Table with 2 columns: Name and Prize Amount. Includes Mitchell and Forrest (810 each), Richardson (810), etc.

THE WIMBLEDON CUP. In the Wimbledon Cup competition Bayles was first, with 555. He tied three others with the score of 500, among them being Lieut. Mortimer.

FINE OUTING

Enjoyed by Employees of Canadian Colored Cotton Co.

The overseers, second hands, third hands, carpenters and machinists of the Canadian Colored Cotton Mills Co. Limited, MacNab street north, held their annual outing on Saturday. Leaving the city by boat they proceeded to Oaklands, where a fine game of baseball and other sports were indulged in, ending up with an hour's fishing, in which they were very successful, catching quite a plentiful supply of fish.

In response to several invitations, William Henry, founder of the Royal Life Saving Society, will visit Canada in August with the object of extending the organization.

EMPLOYEES OF TUCKETTS

Had a Fine Outing at the Falls On Saturday.

On Saturday afternoon the employees of the Geo. E. Tuckett & Son Company, constituting Local No. 48 of the Tobacco Workers' International Union, held their annual picnic at Niagara Falls. The attendance was fair, the day fine, and the enjoyment all that could be desired.

The holders of any of the above names can secure their prize checks by calling on Mr. Broughton, Secretary-Treasurer, 310 King street west, in the evenings, after 7 o'clock. The races were run off in good style, the results being as follows:

PRINTERS IT.

Had a Great Time at Nash's on Saturday.

The printers had their annual picnic on Saturday at Nash's Grove, and, as usual, it proved a great success. The excursion left the Terminal station on the H., G. & B. cars at 2 o'clock, and after arriving at the grounds started in to enjoy themselves in the best manner possible.

A programme of races was run off and resulted as follows: Three-legged race—Waite and Dickson. Jockey race—Wilson and Huhn. Obstacle race—Dickson. Fat men's race—Quinn. Shoe Race—Quinn. Consolation race—Campbell.

MAY BLOSSOM.

Comedy Drama at Mounaint Theatre This Week.

The comedy drama "May Blossom" will be the offering for this week by The Summers Stock Company at Mountain Theatre, East End Incline. This piece is one of the best obtainable and was written by Belasco and De Mille, two of the most favorably known playwrights and producers in America.

ACCOUNTANTS.

Annual Meeting of the Ontario Institute.

The twenty-sixth annual meeting of the Institute of Chartered Accountants of Ontario was held here in the Board of Trade rooms on Saturday afternoon. Representatives were present from various parts of the Province, the majority of whom came up from Toronto on the afternoon boat.

The following officers were elected: President, G. N. Stiff, Toronto; First Vice-President, B. E. Young, Toronto; Second Vice-President, A. K. Bunnell, Brantford; Secretary-Treasurer, Arnold Brantford, Toronto; Registrar, T. Watson Sime, Toronto; Council, A. K. Brinnell; G. L. Blatch, Ottawa; W. C. Eddis, Toronto; Geo. Edwards, Toronto; J. W. Johnson, M. P. E., Belleville; W. E. Kernahan, Toronto; F. H. Macpherson, Windsor; Arnold Morphy; W. R. Mirvis, Peterboro; G. N. Stiff; C. S. Scott, Hamilton; W. B. Tindall, Toronto; Oslar Wade, Toronto; Harry Vigeon, Toronto; R. E. Young, Auditors; J. W. Eddis and D. A. McCannell, Toronto.

THE EVERETT TRUES ENJOY A VACATION IN THE WOODS—NO. 1.

SO THIS IS THE DUMP YOU PICKED OUT FOR THE TENT, IS IT? LOOK AT IT, MRS. TRUE! WEEDS, STONES, ROTTEN LOGS, AND

OF COURSE, NOW, YOU START IN WITH YOUR OLD KICKING AGAIN! GET BUSY AND HELP CLEAN UP THE PLACE, OLD CHRONIC!

Principals in Sensational Domestic Tragedy in Illinois.

MRS. J. B. SAYLER, of Crescent City, Ill., whose husband, a banker, was shot and killed in his home by Dr. W. R. Miller, who had been paying marked attention to Mrs. Saylor for months. Miller, who claims self-defence, is under arrest, and Mrs. Saylor is also locked up as an accessory.

DR. W. R. MILLER, Crescent City, Ill., physician who shot and killed Banker Saylor, to whose wife he had been paying ardent attentions.

MRS. W. R. MILLER, Who had been sent by her husband to visit relatives in Pennsylvania before the murder of Banker Saylor.

Church and Clergy.

More than two hundred organized Methodist Episcopal churches are located in the city of Chicago. John M. Comstock, State statistician of the Congregationalists in Vermont, reports the smallest number of additions to the church in his State during any year since 1882. There is a loss of ninety in the total membership of the 213 churches of the denomination. The figures dropped to 21,965. The total additions were 865, of which 467 were on confession of faith.

Noon meetings in Wall street have been resumed under the auspices of the evangelistic committee of New York city. They will be held in front of the new City Bank building on the site of the former United States Custom House. The Rev. Nelson P. Dame, rector of St. Paul's Church, Ossington-on-the-Hudson, will preach at the meetings throughout the summer.

Mr. Gordon Grant, inspecting engineer of the Transcontinental Railway Commission staff, has accepted the position of chief engineer vacated by H. D. Lumsden at a salary of \$10,000. He will commence his new duties in a few weeks. At least the thermometer is one thing that can always be depended upon to rise to the occasion.

IN ALASKA.

Men Who Killed Guards in Siberia Now on American Soil.

Cordova, Alaska, July 18.—Among a party of 100 Russians who arrived here on the steamer St. Croix, from Nome, yesterday are several who are believed to be political convicts who escaped from a penal colony in the interior of Siberia several months ago. The party reached Nome from Siberia on the Russian steamer Vasyg and immediately embarked for this port. The uniforms worn by the men are believed to have been taken from the guards, killed in the battle at Chukotok, near the Arctic circle, last March, when the convicts defeated a company of pursuing Cossacks.

BOLD BRIGANDS

Hold Up and Rob Travellers of Money and Jewelry.

Kill Man Who Resisted and Tie Up Tollgate Keepers.

Berlin, July 17.—Brigands held the highway between Augustowe and Lipsk on the Russo-German border all day of this week, and captured some fifty or sixty travellers, whom they relieved of money and jewelry estimated in the aggregate at \$25,000. Most of the victims were horse dealers on their way to the annual horse market at Lipsk. One of the exploits of the highwaymen was to seize a toll-gate house. They bound the keeper and his wife and stationed one of their number, dressed in the gate-keeper's uniform, outside the gate. Passants were allowed to pass on the payment of the usual fee, but prosperous-looking travellers were overpowered and robbed, and then imprisoned in the attic of the gate-keeper's house or the outhouses, while the horses or vehicles were assembled in the walled court yard.

After the total of forty persons relieved of their money had sufficed, the bandits gathered together the best animals and made their departure, but before they left they shot dead in sight of the others a man named Pahl, of Augustowe, who had offered resistance. The son of the gatekeeper returned late in the afternoon and released the prisoners. The German Government has taken up the matter with the Russian authorities.

NEW G. M.

Masonic Career of R. W. Bro Judge D. F. MacWatt.

London, July 19.—Nothing has been left undone to make the meeting of the Grand Lodge of Masons, which opens here on Wednesday, a success. The reports will, it is announced, show a most prosperous condition. The Grand Secretary's report will show receipts from all sources of \$4,776.25, with a total expenditure of \$41,573.62, including \$24,362,000 for benevolent grants.

R. W. Bro. Judge D. F. MacWatt, of Sarnia, who is now the Deputy Grand Master, and will be the new Grand Master, was born at Navin, Scotland, on July 9, 1853. In 1869 he came to New York and subsequently to Canada in 1873. He first saw Masonic light in Corinthian Lodge, No. 90, Barrie, in June, 1885, and was master of the lodge before 1891. He has been D. D. G. M. of Georgian district, No. 9, was the first Grand Superintendent of the Georgian district under the Grand Chapter of Royal Arch Masons of Canada; was also Provincial Prior of the Toronto district of Knights Templars; Past Grand Master of the Royal and Scept Masters, and President of the Order of the High Priesthood for the Province of Ontario. He has presided over Barrie Lodge of Perfection at T. P. G. M., and has been W. M. Sovereign of the Rose Croix Chapter of the same place. At Ottawa, in 1896, he was elected a sovereign grand inspector-general, 33rd degree A. and A. S. E. He is also a supreme grand master of the Knights Templars body of Canada.

FALLEN LOW.

Once Prominent Pastor of New York Arrested as Drunk.

New York, July 16.—The Reverend Robert Morris Kemp, once chief vicar of old Saint Paul's, and counted a forceful preacher, was discharged by Magistrate Cornell in the Jefferson Market this morning, after he had spent most of the night before in a cell in the Charles street station under the charge of intoxication. When the Reverend Mr. Kemp appeared before the court this morning, colorless, dishevelled and very unsteady on his legs, the magistrate looked over him critically. Kemp complained at the station the night before that he had lost his diamond ring, a watch and chain.

DEFIANCE BY LORDS.

Budget Will be Treated as an Ordinary Measure.

London, July 18.—A statement made by Lord Lansdowne in a political speech makes it apparent that the Unionist Lords intend to disregard precedent and treat the budget when it reaches them from the House of Commons as they would any other measure. Heretofore the House of Lords has not interfered with the financial measures of the Government of the day, the imposition of new taxes and expenditure being considered entirely in the hands of the House of Commons.

THE FARM

THE SILO AND THE CORN CRIB.

On many farms, when the silo comes in, the corn crib goes out. Drill-corn in seed at the rate of half a bushel per acre, takes the place of hill planting in check rows. With early corn, grown in hills or drills, rigidly thinned, and properly cultivated, well-cared stalks will enrich the silo content. Ideal silage is supposed to combine the high nutritive value with succulence. But we are not so sure that we can afford, without losing more than variety in diet, to discard roots and corn in the ear. Once a man gets the silo habit, he does seem to grow averse to dry-curing fodder, and husking corn, and caring for both. The labor problem worries him, and after the grain harvest he appears to become busier than before; so the surplus corn remaining after the silo is filled is slashed down, shocked up, and all fed to the cattle unhusked. But then, after all for feeding hogs, horses, cattle and poultry, what better adjunct have we than a long, airy crib, packed with well-hardened ears of corn? It has made savings-bank deposits grow, and helped to pay for countless farms.

KNIFE USED IN FAMILY ROW.

Toronto, July 19.—As a result of a family quarrel at 23 Duchess street yesterday Frederick Oliver, who is under arrest on a charge of being drunk, bears two knife wounds on his face, while his wife, Elizabeth, and his daughter, Mildred, are locked up on charges of wounding. The police have a kitchen bread craver that is supposed to have been used in the affray. Why is it that the woman who runs a beautiful establishment is always so homely?

FINCH BROS., 29 & 31 King St. W.

THE FARM

Canadian farmers who throw a few ears of corn in the feed box, with about half or two-thirds the usual quantity of oats, generally have sleek-looking horses, that stand a heavy day's work without flinching. And there is reason for it. The Ohio Experiment Station made a comparative study of the value of oats and corn for work horses, and the conclusions of the investigation, given elsewhere, are worth study, and suggest the question, Is it not worth while to continue or revive the corn crib in silo districts? What say our readers: (1) What has been their experience in feeding corn to horses? (2) What is to be said about good silage as a horse food? (3) Is it not practicable to utilize the corn crib and the silo on the same farm?—Farmers' Advocate.

Knife Used in Family Row.

Toronto, July 19.—As a result of a family quarrel at 23 Duchess street yesterday Frederick Oliver, who is under arrest on a charge of being drunk, bears two knife wounds on his face, while his wife, Elizabeth, and his daughter, Mildred, are locked up on charges of wounding. The police have a kitchen bread craver that is supposed to have been used in the affray.

Why is it that the woman who runs a beautiful establishment is always so homely?

MACKENZIE'S NEW ROAD

From Niagara Falls to Toronto With Extension to Ottawa.

Brought Home Ten Million Dollars From London, England.

Will Use the Electrical Development Right-of-Way.

Toronto, July 19.—Mr. William Mackenzie, President of the Canadian Northern Railway, and the dominating figure in the electrical situation in Ontario, returned home yesterday. During the past two months Mr. Mackenzie has been in the old country money markets, and has sold debenture stocks for two portions of the Canadian Northern Railway system. The first was an offering of £1,200,000 of four per cent debenture stock, guaranteed by the two western provinces which the new lines are designed to benefit. These were sold at 97 1/2. The second was an issue of £800,000 four per cent debenture stock, which sold at 92, and it is in this last issue that public interest in this Province was centered. The prospectus of the issue stated that the proceeds of the issue would be applied towards the construction of a line from Toronto to Niagara Falls, with an extension from Toronto to Port Hope, Belleville, and Smith's Falls, to Ottawa to join existing lines to Montreal and Quebec via Hawkesbury.

At his home last evening Mr. Mackenzie stated to a representative of the Globe that work upon the line to Niagara Falls would be commenced in the near future. Mr. Mackenzie said it was to be expected that the new line would be a steam railway at first, and that a part of the Electrical Development Company's right-of-way would be used. As to the question of terminals, he said the project had not yet advanced so far that their location had been definitely settled. The present terminus of the Electrical Development Company's pole line is near the north limit of the city, close to Mr. Mackenzie's residence, but the railway magnate would not say that the method of entering Toronto had yet been arranged. He said, however, that it might be necessary to deviate from the present right of way at some point between this city and Niagara Falls, where it is practically certain the new line will cross the Niagara River.

LONDON MARKET EASY.

With regard to the London market Mr. Mackenzie said that money rates were still very low, and that he could see nothing that would cause any considerable strengthening of the market in the near future. "Just before I left London over-night money was lending at one-half of one per cent," said Mr. Mackenzie. "The market was in a receptive condition for new issues, and all of the Canadian loans which were put on while I was there went very well. We intended that our offering of debenture stock covering the proposed western lines and guaranteed by the prairie provinces should be offered at 99, but the Grand Trunk Pacific fours had just been sold at 97. However, the public response to our western issue was very satisfactory, the whole amount being subscribed. There is, as far as I could discover, no sentiment against Canadian securities in London as the result of any legislative action which has been taken in this country. If that is the case, I do not think it is all a matter of price, and our securities bring what they are worth in competition with other offerings. With the new British stock and income taxes proposed there is a great deal of dissatisfaction, and the protests from the city have been most vigorous. It remains to be seen, however, just what influence the masses will have. They are little injured by the new taxes and they will possibly cordially support the legislation. It is undoubtedly true, however, that the flow of British money into foreign investments, but it has been going there for a long time. If, to escape the new taxes, a British investor in foreign securities, he will be forced to invest the income also, for the income tax laws are very strict, much more so, for instance, than they are here."

C. N. R.'S ACTIVITIES.

As to his own enterprises, Mr. Mackenzie said that the Canadian Northern would build between four and five hundred miles of new lines in the west this summer. He made the important announcement that the line from Selkirk to Port Arthur was practically located, and that it would be a good working line. The building of new lines in the west would have to be proceeded with rapidly as the country developed. Manitoba was pretty well served with railroads now, he said, but farther west there were great openings. From Quebec to Garmouche Junction Mr. Mackenzie travelled on the new line of the Canadian Northern Quebec system, which is not yet opened to the public. He expressed himself as being highly pleased with this bit of roadbed, a portion of which is laid along the shores of the St. Lawrence, following the course of the river.

"We must keep on building, and so we must keep on borrowing," said Mr. Mackenzie, "and when you go for anything, even to borrow, it is very satisfactory to get what you want."

THE RIO DIVIDEND.

As chairman of the board of the Rio de Janeiro Tramway, Light & Power Company, Mr. Mackenzie discussed the recent break in the price of that stock. He did not know the reason of the break, but he had been told that continental centres had overbought. They had put the stock up a little high for a non-dividend payer. The underwriters had taken it high, but they were looking ahead a few years. Then it was possible that some selling had come from the estate of Charles Morrison, the great British capitalist, whose death occurred recently.

"Mr. Morrison," said Mr. Mackenzie, "accumulated a great deal of his wealth by underwriting issues of stock, and he probably had considerable holdings of the Latin-American securities. As to a dividend on the Rio, I can only say that the board has now considered the matter. For myself I believe in being conservative, and I think a four per cent dividend would be that. I have not authorized any statement that the dividend would be five or six per cent, but when the board goes over the statements I cannot prophesy what it will do. You see, the Rio plan is still incomplete. When the certification of the system

is complete, which I hope will be by the end of the year, and the gas works are finished, which will be by the end of next year, the operating costs will be largely reduced and a corresponding return made possible. In the meantime there will be plenty of use for any surplus." In connection with the Rio matter Mr. Mackenzie mentioned that he had met Dr. Pearson, the moving spirit in many Latin-American enterprises in London, and he had assured him that the damage to the Mexican Power Company's dam at Necaxa had been greatly exaggerated.

NO BID FOR LIGHT STOCK.

Mr. Mackenzie appeared interested in the latest details concerning the future of the Toronto Electric Light Company. He said that he had not given the company much thought while abroad, and that he had certainly authorized no offer for the control of the stock. Not in this connection, but in another period of the interview, in discussing, in fact, the recent fusion of the Mexican Power and Mexican Tramways Companies, Mr. Mackenzie remarked the vast economies which resulted from the operation of power, lighting and tramway plants by a single company. He said that this was being demonstrated daily, and that he returned from his latest trip to the centres of Great Britain more convinced than ever of the future of public ownership. The Toronto Railway Company this year, he thought, would turn over half a million dollars to the city. That was proportionately as well as any city was receiving from its tramway system. "At the same time the Toronto Railway Company earns more money per capita of population than any city that I know of. What's the reason? The people here ride a great deal, that's all. The city of Toronto is prosperous. Very few cities have advanced as it has in the past seven years. It probably felt the commercial setback less than any other city."

Mr. Mackenzie will make an inspection of the western Canadian Northern lines within a short time. He was very pleased to hear of his partner, Mr. D. D. Mann's, estimate of a western wheat crop of 140,000,000 bushels, and more pleased to think that the Canadian Northern would carry its full share of the crop this year.

Gas Distended His Stomach

Caused Palpitation, and Prevented Sleep. When Health Was Gone, Cure Followed Use of "Nervine."

"My last wish will be," writes Harry P. Pollard, a well known boot and shoe tanner of Hartford, "that everyone with a bad stomach may learn as I did, before it's too late, that Nervine is the one remedy to cure. Why, I was in mighty bad shape, my digestion was all wrong, and every night I would wake with a start and find my heart jumping like a threshing machine. This was caused by gas on my stomach pressing against my heart. When I started to use Nervine I got better mighty fast. It is certainly a good remedy for the travelling man, keeps your stomach in order, cures cramps, prevents indigestion or rheumatism, breaks up chest colds and sore throat—in fact there hasn't been a ache or pain inside or outside for the past two years that I haven't cured with Nervine. Do you wonder I recommend it?"

For general household use Nervine has no equal; it will cure the aches and ailments of the entire family—refuse anything but Nervine, 25c per bottle, five for \$1.00, all dealers or the Cattaraugus Co., Kingston, Ont.

COW CAUSES DUEL.

Two Killed and Three Injured in Mississippi.

Union, Miss., July 17.—One old cow, which would not have brought \$50 on the market, caused a bloody pistol battle in the streets of this little town today. It resulted in the killing of two men, the fatal injury of two more and the serious wounding of another. The dead: E. J. McDonald, cattleman, and Peter McDonald, his brother. Fatally injured: Charles Chisholm, cattleman, and Joseph Miller, a friend of Chisholm. Seriously injured: Murphy McDonald, son of E. J. McDonald.

The fight was between the McDonalds on one side and Miller and Chisholm on the other, two factions which have quarrelled for many years. Both Chisholm and the McDonalds claimed ownership of the cow. Miller and Peter McDonald started the row in front of the Union Bank. Revolvers were drawn and the shooting commenced. Chisholm and E. J. McDonald came up about this time and joined in. Peter McDonald fell first, and Miller was the next. E. J. McDonald and Chisholm for a while shot desperately until both fell, McDonald dead and Chisholm mortally wounded. Murphy McDonald, who appears to have been a would-be peacemaker, was seriously wounded. All the men are prominent in this section of the State.

SPANISH PRETENDER.

Bourbon, Who Claimed Throne of Spain, Expires in Varez.

Rome, July 18.—Don Carlos of Bourbon, the pretender to the Spanish throne, died today at Varez, in Lombardy. Don Carlos, Duke of Madrid, who claimed under the special law of succession established by Philippe V. to be the legitimate King of Spain by the title of Charles VII, was born at Laybach, Austria, March 30, 1818. His father, Don Juan, was the brother of Don Carlos, Charles VI, known as the Count de Montemolin, in support of whose claims the Carlist risings of 1848, 1855 and 1860 were organized.

PAY DAY WAS QUIET.

Military Guard Placed Over Coal Company's Offices.

Both Operators and Strikers Claim They Are Sure to Win.

Report That Company's General Offices Were to be Dynamited.

Glacé Bay, July 18.—Entering on the third week of the strike at the collieries of the Dominion Coal Company, both the U. M. W., the P. W. A. and the Dominion Coal Company are as confident of victory as ever. The company and the P. W. A. point to the fact that on Friday and Saturday of last week over 4,000 tons was taken from the mines each day and about 3,000 tons more from the bankhead, and claim that this shows the strike is gradually breaking up. The U. M. W. declare that their men are standing by each other loyally, and that they will continue to do so until their demand for recognition is granted. They say they are taking care of all their men who need assistance, and they can easily continue to do so for a very considerable time. They also claim that they have the company so badly crippled that it is only a question of time before they win.

In consequence of a rumor that an attempt would be made to blow up the general offices of the Coal Company, a guard from the Royal Canadian Regiment has been on duty there for the past two nights. There was some speculation as to why this guard should have been stationed there, and why they first made their appearance on Saturday night, but during yesterday it developed that information had been received by the company that an attempt might be made to blow up the building. Whether it was from strikers or a gang of thieves with designs on the \$100,000 stored in the building for the payment of the men at a number of the mines that the attack was feared is not known.

All the officials of the Coal Company denied knowledge of reasons for the detachment of troops being stationed at the offices when questioned today, but it later developed that a man came into No. 2 colliery office and stated to an official there that the general office would be blown up during the night. The officials of the company did not believe that there was anything in the report, they did not care to run any chances, and a cordon of sentries was placed around the building.

Not for many years has there been such a quiet pay night in Glacé Bay as Saturday night proved to be. Not one arrested for drunkenness was made; not a drunken man was seen on the streets. There were crowds on the sidewalks, but they were highly orderly. All the town policemen were on duty, and in addition a guard of the Royal Canadian Regiment was mounted on the Bank of Montreal and the company's offices, where a large amount of money was stored for the payment of the men at many of the mines. It was a fine tribute to Chief MacIsaac and his men, to License Inspector Phillipot, and to the citizens generally, that there was absolutely no disorder. As a general thing there are anywhere from ten to a score of arrests on a pay-night, for in a mining town of twenty thousand inhabitants some of it is almost certain to find its way over the bar. There are no licenses in Glacé Bay, and since the inauguration of the strike all the bars have been closed up tight.

The last two or three days have brought few developments. The company claim that the output on Saturday was about the same as Friday, when they state 5,000 tons of coal was secured from the banks and mines. These statements are, of course, denied by the U. M. W. men. Men are leaving the country and others are being brought in. A contingent of forty or fifty left tonight to work on the G. T. P., and about two hundred more men arrived by the steamer Cleland from Montreal on Saturday. Revolvers were taken out here and placed at work at various points. The company claim that they will increase their output materially in the coming week, while the U. M. W. deny this.

The statement that the conciliation board in the dispute at Sydney Mines had found against the U. M. W. caused a lot of interest here, and it is very generally believed here to mean another strike. It is not likely that any action will be taken until the report of the board is made public.

WIND STORM.

Cyclone Razes House and Blows Inmate Into Haystack.

Wilkie, Sask., July 18.—A small section of country near here was swept by a cyclone on Friday night, which wrecked two houses and destroyed considerable property in its path. The house of James Rasbarough was completely destroyed, the floor being carried a distance of a quarter of a mile, while the remainder of the house was smashed to kindling wood. Rasbarough was thrown from his bed to a straw stack and suffered a dislocated shoulder. A load of hay was driven fifty rods. A hay rack was carried one and a half miles, and a land roller one hundred rods over a barb wire fence.

WESTERN TRAGEDY.

Girl's Dead Body Found in a Farm Slough.

Balaoreas, Sask., July 18.—The body of Mabel Bruce, a young girl, whose mysterious disappearance near Garmock on July 9 had aroused suspicion of foul play, was found in a slough yesterday on the farm where she was working. Evidence of a struggle marked the corpse, and the police are certain that she was murdered. She had gone out to bring in cows when she disappeared.

ATHENS SHAKEN.

More Villages Destroyed—The Death Roll Unknown.

Athens, July 17.—There were further earth shocks in the Province of Elis today. Two people were killed and fifty others injured at the village of Uposanti, where molten lava is flowing from a fissure in the ground. Practically all the houses in the village have collapsed. At Damiza four persons have been killed and twenty-four others escaped. The population of the stricken villages are living in the open without shelter. The authorities are making all haste to organize relief. Later advices say that several of those injured at the village of Uposanti have since died. The village of Damiza is in ruins, and a number of other villages, including Lopei and Maringki, also suffered terribly, but the death roll is not known. Relief trains are now on the way to the stricken region.

TIMES PATTERNS.

A PRETTY MODE FOR THE LITTLE MISS.

No. 8534.—This charming little model with side edges laped over the front in novel fashion, is something entirely new and exceedingly smart. The dress is in one piece from neck to hem and closes in the back. The fullness may be held in place around the waist by a belt of the material, or left to hang loose. Linen, gingham, pique and serge are all suitable for development. The pattern is cut in 5 sizes, 4, 6, 8, 10, years. The 8-year size requires 2 1/2 yards of 44-inch material.

A pattern of this illustration will be mailed to any address upon receipt of 10 cents in stamps or silver.

Address, "Pattern Department," Times Office, Hamilton.

It will take several days before you can get pattern.

"Only Six Weeks to Live"

Constipation, Biliousness, Indigestion, Rheumatism.

A Dying Woman Rescued Through the Timely Use of Dr. Hamilton's Pills.

"My doctor told me I had only six weeks to live—that nothing human could help me, but to-day I am hearty and well, because I took a long treatment with Dr. Hamilton's Pills—they saved my life."

Continuing her declaration, Mrs. Jamieson says: "I had from childhood been a sufferer from biliousness and liver complaint. I suffered excessively from wind and could not eat my food without feeling ill afterwards. Sometimes I was so bad I couldn't stand up straight for the pain. The wind struck in my stomach, chest and sides, and always caused headache, dizziness, or any form of one or more of aches and pains—I became rheumatic because my blood was so poor. The benefit I received from the first box of Dr. Hamilton's Pills encouraged me and I continued their use three to five pills a week, for several months, and was cured. At times I seemed one moment of aches and pains—I became rheumatic because my blood was so poor. The benefit I received from the first box of Dr. Hamilton's Pills encouraged me and I continued their use three to five pills a week, for several months, and was cured. A 10c Cake of Infants' Delight FREE

On Saturday we will print a Coupon in this paper good for a regular 10c cake of Infants' Delight Soap, Free with a 5c purchase of Taylor's Borax Soap.

Taylor's

Infants' Delight Borax Soap

We want you to know how superior this soap is for toilet, bath, or for the baby. So we are going to give you a full-sized cake, worth 10c, when you buy a 5c cake of Taylor's Borax Soap.

Twice as good as ordinary soap for the same money. A cleanser and purifier as well. The borax softens hard water and makes washing easy. It whitens and sweetens the clothes, and lessens the amount of rubbing necessary.

Buy a 5c cake on Saturday and learn the difference. Find out how the borax and pure coconut oil combine to make a powerful cleanser—a better soap than you supposed possible before.

Don't Overlook this Opportunity to Get a Free Cake of Superfine Soap

JOHN TAYLOR & CO., Limited, Toronto

MOONLIGHTER.

SCOTSMAN'S EXTRAORDINARY STORY OF HARNESSTHEFTS.

He Started Operations in Toronto and Then Visited Brampton, Lambton, Malton, Grimsby, Clarkson, and Erindale.

Guelph, July 18.—In his cell in the county jail here, William Smith, the alleged harness thief, who was arrested in Toronto, and who is charged in all with twenty-three thefts, made a signed statement of his operations covering many of the thefts with which he is charged. It was made at considerable length to High Constable Medewether.

Smith, who is a Scotchman, states that he worked for years with farmers in the vicinity of Milton, and also in Guelph for a time before going to Toronto. There he got into the harness business, buying and selling, and fell in with a lot of people who went about "three sheets in the wind," and talked of getting harness on moonlight nights without the owner's consent.

"But," said Smith, "I went out solely on my own hook in the latter part of March. The first place I went to was Brampton, where I stole a set of double harness and a set of silver-mounted single harness. The next harness I stole was in Lambton, silver-mounted coach harness. The next trip was back there, and I got a set of brass-mounted single harness with wooden hames and brass tops. I guess I went to Brampton again next and stole a set of single nickel-plated harness. My next trip was to Malton, where I got a set of single, mounted harness. It was the only one stolen there, and the authorities ought to be able to find the owner. It was some distance from the station. From Malton I think I went to Grimsby. I got a set of silver coach harness and a complete set of double harness, medium weight. After that I went to Clarkson and got a set of single harness, Erindale comes next. There I got a set of silver-mounted and a set of rubber-mounted single harness, a single brass-mounted set, with brass hames, which are in Toronto now, and a set of double harness, heavy and nickel-plated, complete. These are all in Toronto. Then comes Grimsby again, two more sets, which are in Toronto, then two more sets at Brampton, one from Mr. McClure. Another set was taken at Weston, and at Guelph I took three single sets and one double set."

Cooling Medicines For Summer.

English fruit salts, 25c bottle, or 40c lb. Persian sherbet, 40c lb. English citrate magnesia, 25c bottle, or 50c lb. Phosphate soda, 25c bottle. Pure West India lime juice, 25c large pint bottle. Junket tablets, 10c bottle. Rennet wine, 25c bottle. At Gerrie's drug store, 32 James street north.

Emigration From Britain.

London, July 18.—The British emigrants to Canada in 1908 numbered 81,321, as against 151,216 the previous year. To the United States they were 96,869, as against 170,264 for the previous twelve months. Emigration from England in 1908 was the smallest in 31 years.

UNION MEN KILLED.

They Attack Non-Union Engineer. Who Uses Gun.

Cleveland, Ohio, July 17.—In a fight growing out of a strike of employees of the Lake Carriers, Richard Brown and Wm. Woods were shot and killed here to-night, and one man was shot in the arm. James P. Purvis, 32 years old, a marine engineer of Detroit, was later arrested. Union cards were found on both of the dead men.

Purvis is a non-union chief engineer on the steamer Centurion, which arrived here early this evening. After leaving his boat at the Cleveland & Pittsburgh dock he was attacked by three men. He escaped and was again attacked. Upon the second attack he drew his revolver and fired several shots. Woods dropped dead with a bullet in his head. A policeman, attracted by the shooting, captured Purvis and Brown. Brown escaped, but was captured again, and begged for a chance to rest.

LAWLESS MONTREAL.

A Pole and His Wife Held Up and Shot.

Montreal, July 18.—Another daring burglary and shooting case occurred on Forsyth street on Saturday night about 11 o'clock. Two men entered a little grocery kept by a Pole named Bacloski, and after demanding tobacco, one of them pulled a revolver and shot Bacloski in the groin, while he also wounded Mrs. Bacloski in the shoulder. The two then rifled the till and got clear away. They, however, only secured three dollars for their trouble. Bacloski is seriously wounded, but his wife will recover. No description has been secured of the bandits, and the chances of catching them seem slim.

CASTORIA.

The Kind You Have Always Bought

An appeal has been taken to Osgoode Hall by A. R. Cunningham on behalf of Kingston Chinese laundry proprietors against the license tax imposed on all local laundries by the City Council last Monday. The claim is that the tax is prohibitive and therefore illegal.

The Winnipeg Industrial Exhibition closed on Saturday evening, and was by far the most successful in the history of the association. The receipts were \$14,000 in excess of last year. The attendance for the week was 115,000. A party of Toronto engineers viewed the Trent Valley Canal, which is now open for 165 miles.

DEATH AND PANIC.

RACING MOTOR CYCLE EXPLODES AND FOUR DIE.

Plunges Into Crowd of Thousands of Spectators, Kills Two Women Instantly and Saturates Bodies With Oil—Stand Catches Fire and Many Are Trampled.

Berlin, July 18.—Four persons were killed, more than twenty severely hurt, and a dozen others slightly injured as the result of an explosion of a motor cycle, and a fire which followed it, during a cycle race at the old Botanic Gardens this evening. Thousands of spectators had gathered around the track, which was opened for the first time only a few days ago. An endurance race was on, some of the best-known cyclists, including Stelbrink, Contente, Ryser and Stoll participating.

After a few laps the tire of one of the pace-making cycles burst and the rider lost control. The benzine exploded in a burst of flame, and the machine leaped into the air and hurled itself against the barrier, which broke down.

The rider was thrown off and fell against other competitors, who were pitched to the tracks, several of them being severely injured. So terrific was the speed of the motor cycle that it continued on its course after the explosion, crashing into the public stand, hurling spectators right and left and setting on fire several women's summer dresses. Two women were instantly killed, and their bodies, saturated with flaming benzine, were burned to cinders. The wooden stand caught fire and the flames flashed in the faces of bystanders, who, with clothing ablaze, rushed out shrieking with pain and fear, until cooler-headed onlookers threw them to the ground and trampled out the flames.

A panic ensued, in which a great number, including children, were badly trampled. Eighteen men and four women were seriously injured, two of the men having since died. The hospital surgeons say that several others are in a hopeless condition.

IS YOUR WIFE BAD TEMPERED?

Chances are she has corns that ache like fury. Buy her a bottle of Putnam's Corn Extractor. It acts painlessly, gives instant relief, and cures every kind of corn. Insist on getting only Putnam's.

HINDU PREDICTS TRAGEDY.

Intimates That Greater Assassination Than That of Wylie is Plotted.

London, July 18.—Grishnavarma, the notorious editor of the Indian Sociologist, writes a long letter from Paris in defence of Dhanrao, the murderer of Sir William Wylie. He denies any complicity in the assassination, but describes the assassin as a martyr in the cause of Indian independence. He reasserts his doctrine that political assassination is not murder, and avers "that there are even in England some big-minded, thoughtful publicists who agree with him."

C. M. Hays sails on the Lusitania to-day. Interviewed, he said that the C. T. P. would be completed from ocean to ocean in three years.

NOW HIS OWN CHANCELLOR.

Emperor William's Autocratic Power Restored.

The New Chancellor Believed to be Only a Figure Head.

New Official a Friend of Sovereign He is to Advise.

Berlin, July 18.—Germany's change of pilots—the retirement of Prince Buelow and the accession of Dr. Theobald von Bethmann-Holweg as the fifth chancellor of the empire—practically re-establishes the autocratic power of the Kaiser in foreign affairs. At least, the fatherland finds itself exactly where it was before the outbreak of the national storm of indignation last November.

That is the overshadowing feature of the historic event which took place in Berlin last Wednesday under such amazing circumstances—amid the simple environment of a terrace back of the royal castle and in full view of the street full of gaping, awe-struck citizens. William II. has done many strange things in his time, but none more staggering than this open-air setting for a solemn act of state has been recorded for many a day.

With the departure of Von Buelow the one breakwater between the Kaiser and a self-willed, personal government has undoubtedly been swept away. The new Chancellor is an absolute amateur in the subtle field of diplomacy and foreign politics. Not only has his bureaucratic career been confined to the narrow provincial lines of local government and home administration, but his entire makeup, bearing and temperament are of a character wholly different from that regarded as essential for a statesman required to deal with professional diplomats.

It hardly seems likely that such a man is a chancellor to keep much of a check on the ardent William. One of Von Buelow's cardinal virtues was his ability to manage the Kaiser. He had always done so with more or less success, but had contrived to accomplish the trick thoroughly since the country expressed its opinion of William's policies last winter. Nobody knows for certain, but the keenest observers believe that the Kaiser now regards himself as "a free man" again, and that he will proceed without much delay to demonstrate the prophetic accuracy of Bismarck's statement when the present Emperor was still in his teens: "This young man will be his own chancellor."

Von Bethmann-Holweg, however, may prove to be made of tougher fibre than people think. He enters his offices as Von Buelow's direct political heir. The chancellorship was bequeathed to him exactly in the same fashion that Theodore Roosevelt handed down the presidency to William Taft. He has been Von Buelow's candidate from the start, and is unquestionably pledged to continue the Von Buelow policies. If he finds the backbone to do so, all will be well, and William will remain in the state of partial eclipse which the nation ordered for him in November.

The new Chancellor has a marked strain of Jewish blood in his veins through the Bethmann branch of his family, the founder of which was driven from Holland in the seventeenth century by anti-Semitic persecution. With the Colonial Secretary, Herr Dehnburg, he becomes the second Imperial Cabinet Minister of Semitic origin.

No contemporary German statesman has ever been more intimate with the Kaiser than his new Prime Minister. They were students together at Bonn University, and fraternity brothers in the famous Borussia Society.

OFFICIALS SLAIN.

Hunted Thief in Paris Turns Upon His Pursuers.

Paris, July 18.—Deputy Chief Blot and Inspector Nugat, of the Detective Department, were shot dead last night by a man named DeLuna, whom the police had been hunting in connection with thefts from picture galleries. DeLuna committed suicide.

A search of the rooms occupied by DeLuna confirmed the suspicion that he was engaged in the robbery of viroies, twenty-third century crucifixes, and other valuable antiquities, showing such expert knowledge in selection that only a trained antiquarian could have detected the choice.

CUT THE CUTS.

San Francisco Publishers Eliminate Pictures as Result of Strike.

San Francisco, July 18.—Nearly three weeks ago zinc etchers on all San Francisco newspapers were discharged because they refused to allow printers to handle rouse blocks as bases of cuts. The etchers demand more pay before they will return.

The publishers of the San Francisco papers have decided to eliminate all illustrations in daily papers, and for the first time in twenty years all the local papers will appear without a single cut. Whether this drastic rule will apply to Sunday supplements remains to be seen.

Atlantic City Excursion.

\$11.00 round trip from Suspension Bridge, via Lehigh Valley Railroad, Friday, July 30th; tickets good 15 days. Particulars, 64 King street east, Toronto.

North Toronto ratepayers carried a by-law authorizing the expenditure of \$140,000 for sewage and \$30,000 for parallel streets to Yonge street.

Two armed men, answering the description of the Ducks train robbers, were seen near Lytton, B. C., late on Friday. A posse of police is in pursuit.

LIFE FOR A HAT.

A Drowning in the Don—Other Deaths in the Water.

Toronto, July 19.—Frank Thoms was drowned in the Don about 5 o'clock yesterday afternoon. Thoms, who was about twenty-five years of age, and resided with his parents at 440 King street east, was crossing the river in a punt when his hat was blown off, and in attempting to recover it he lost his life. The body was not recovered for fully forty-five minutes.

Niagara Falls, Ont., July 18.—Ethel, the nine-year-old daughter of James Leblond, is missing, and is thought to be drowned in the Niagara River. Leblond kept a curio store at the Maid of the Mist berth, and the child was last seen at 7.30 to-night when she went down to the steamer Maid of the Mist to get her hat.

Monston, N.B., July 17.—Charlie Kinzie, aged ten, was drowned in the Petitcodiac River near here, where he was bathing. He was carried out by the current in the river, which took him half a mile before he sank for the last time.

Toronto, July 19.—"Notify friends of Hector Mason, 28 Edward street, Leblond kept here last night. Body was drowned here last night. The foregoing telegram, signed H. N. Cockburn, of Elk Lake, was received at 28 Edward street, on Saturday. Mason is not known here."

New York, July 18.—Ten persons were drowned this afternoon, two of them little girls, when the excursion sloop Roxana, carrying 22 passengers, was capsized by a sudden squall in Lower New York Bay, midway between Coney Island and the Hoffman Island. The captain and the twelve survivors were picked up under great difficulties, in a rough and choppy sea, by a tug.

SHOT BURGLAR.

Dying Man Recovered Sufficiently to Shoot Negro.

Atlanta, Ga., July 18.—While on his deathbed and in a stupor C. B. Walker, a business man of Atlanta, was revived by the presence of a negro burglar in his room. Walker immediately seized a pistol, which was on a table near the bed, fired three shots, at the negro, who fled. The burglar was not recovered. The physicians had announced there was no hope for Walker's recovery and had retired. In the room with the sick man were a trained nurse and his wife. About 2 o'clock this morning Mrs. Walker and the nurse, who had dozed off, were roused by pistol shots and saw Walker upright in bed firing at a negro, who was escaping through a window.

As Walker fired the last shot the negro screamed and the sick man dropped the pistol and fell back on the bed into a death stupor from which he did not rally. Physicians consider the case remarkable, because Walker was suffering from a stroke of apoplexy.

BURNED TO DEATH.

Girl's Little Brother Saw "a Nice Little Fire."

Fesserton, July 17.—A sad affair occurred here yesterday morning when Dora, the seven-year-old daughter of Mr. and Mrs. Charles Jacobson, lost her life in the fire which destroyed her father's residence. The fire started in the bedroom in which Dora and her little brother Harry slept. Mrs. Jacobson smelt the smoke and went to ascertain the cause, and met little Harry on the stairs, who said: "There's a nice little fire in my bedroom."

She rushed upstairs and tried to get the little girl out, but the room was already full of fire, and she could not gain an entrance. Mrs. Jacobson gave the alarm and in a short time there were lots of helpers. However, all attempts to save the child were unsuccessful, as the fire had got such a headway.

TO INCREASE BIRTHS

A Plan in France to Give Bonuses For Children.

Paris, July 18.—The grave problem presented by a declining birth rate is again distressing France, which is particularly engaged at this moment in weighing the merits claimed for a plan proposed by Prof. Charles Richet of the Academy of Medicine, and M. Leroy-Beaulieu. The scheme provides a system for bonuses for children, the bonus growing as the number of children in one family grows; that is, while the parents get nothing in consideration of the first child, they get \$100 for the second, \$200 for the third, and so on.

Professor Richet believes that births will be increased annually by 750,000 to 1,000,000, at a cost to the State of \$6,000,000 annually. This expenditure is to be met by death duties. They "plan" having a tax of 50 per cent. on all collateral bequests and confiscate half the estate in case of an only child. M. Leroy-Beaulieu further would reduce the salaries of unmarried employees of the State as well as those of young men after marriage.

Naturally the proposition has aroused warm opposition. It is asked whether the class which would be reached by such an offer is one worthy to be the parents of future generations. There are not lacking those who affirm that the prosperity of France rests on the principle of the small family, and who foresee revolution, chaos and national poverty if large families become general.

The Kind You Have Always Bought

The Right House

HAMILTON'S FAVORITE SHOPPING PLACE

Right House quality at clearance prices That is the whole story in a nutshell

As you have no doubt already discovered, the only way we can keep up our July Clearance Sales so long is by continually adding new shipments and special purchases as they come to hand. Some of THE RIGHT HOUSE bargains are sold out rapidly and it is unavoidable that some customers should be disappointed. For instance those \$2.19 Hammocks were quickly cleared out, and some sizes in reduced lines of Hosiery, etc., do not stay on our counters long. Still you will never have any trouble getting something in the same line. For Tuesday's business we give special prominence to several opportunities to get reasonable garments and goods at really amazing reductions—remembering the all-important fact that these are all RIGHT HOUSE qualities.

THOMAS C. WATKINS

Size 9 feet by 12 feet, \$25.00; real value \$30.00

THOMAS C. WATKINS HAMILTON ONTARIO

A MURDEROUS GUN.

A Weapon That Reloads Itself Automatically.

Ever since men began to kill each other, which was very soon after selfish interests began to clash, a good share of their leisure time has been devoted to the elevating pursuit of inventing instruments for that killing. From the time when the early prowler in the primeval forest discovered that, by trying to the end of a stick the stone destined to crack the skull of his enemy, he could make the crack more surely deadly, his inventive genius, sign as it is of his high rank among the creatures, has been busy over this problem. How to strike, with fatal effect upon his foe and with safety to himself has been his study and that one eye should be opened at this late day to almost ludicrous imperfections in our most cherished killing machine, the rifle. Yet it is only a few years since the smoke of black powder was done away with and comparatively a matter of days since young Mr. Maxim produced his sound-choking flame-suppressing device. And now comes news from Sweden that an inventor there has found means at last, to stop the kick which has made sore shoulders from the time of the first blunderbuss was discharged, and has constructed a weapon that will drop men so fast that a single marksman may dispose of a regiment in an hour.

Eleven hundred and twenty-five shots to the hour from a gun that is carried in the hand and fired from the shoulder is a high record. If the gun is smokeless and kickless, it is convenient to handle and but little trouble to operate. Swedish Mr. Sjogren has made a distinct subtraction from the demerits of the rifle

POOR DOGGIE.

Enforcement of Dog By-law is Causing Trouble.

Bramford, July 18.—The local authorities have a sort of civil war on their hands in the enforcement of the new dog by-law, recently passed by the City Council. It is a most drastic enactment, and provides for the impounding of any dogs which are running about the streets without their owners, or doing damage or raising disturbances, whether they have tags or not. Citizens can seize any dogs themselves and have them locked up. The police have started in to enforce the by-law to the letter, with the result there is no end of trouble. Many prominent citizens whose dogs have been captured are hot. A meeting of dog-owners has been called to protest, and a petition is in circulation calling for the repeal of the by-law.

800 DESERVE ROPE.

A Comprehensive Report on the Adana Massacres.

Constantinople, July 18.—The report of the court-martial held at Adana in connection with the massacre there condemns the Vail and other local officials. It is announced that ten of the murderers already have been hanged, and adds, 800 deserve death, 15,000 deserve penal servitude for life and 80,000 deserve minor punishment. If the Government decides to carry out the punishments, they will establish a cordon around the town and deal with the matter expeditiously. The court, however, recommends that as a general reconciliation has occurred, universal amnesty should be granted on the occasion of a national fête.

Gossip and Comment That Texas horse meadow is no green one. Wins in record time at 10 to 1 and runs best when 7 to 5.

SAINTS LOST THE GAME, BUT WON TITLE IN FIRST SERIES.

W.E.P.C. Put Up Good Ball on Saturday. The Inter-City Record to Date.

A fair-sized crowd was in attendance at the Britannia Park on Saturday afternoon, when the last game of the first series in the Inter-City League was played, in which the contenders were the West End Pleasure Club and St. Patrick's.

The merit of George Goulding's performance at Winnipeg on Saturday is best displayed by a comparison with former existing records for the mile and three mile walks.

England is to have a fight that all America would like to see. Jen Driscoll, the cleverest of the clever, the boy who beat Abe Attell at his own game.

Jack Johnson's path as a champion does not seem to be such a smooth one after all. Those who talk of fighting him are numerous, but those who really are willing to face the music are not so noticeable.

Kerr won for the Irish. London, July 19.—(C. A. P. Cable.)—Bobby Kerr, the Canadian sprinter, representing Ireland, his native country, in the annual international games with Scotland at Dublin on Saturday, won the 100 yards dash in a shade better than 10 1-5 seconds.

Lacrosse scores. At Montreal—Toronto 6, Nationals 4. At Toronto—Martlands 6, Shamrocks 4.

How teams in the big leagues stand. NATIONAL CLUBS. Pittsburgh 56 21 727. Chicago 46 24 586.

HAMILTON RIDING CLUB'S COMPLIMENTARY PICNIC.

Old Sol smiled on the fourth annual picnic given by the Hamilton Riding and Cross Country Club on Saturday afternoon at Mr. Thomas Yeo's farm, Ryekman's Corners.

Considerable amusement was created in the cigarette race, in which the contestants had to run 25 yards, light a cigarette and run back to the scratch line.

The picnic was a success in every way, and when the farmers departed early in the evening they all expressed their hearty appreciation of the entertainment the club had provided for them.

AQUATIC SPORTS AT VICTORIA YACHT CLUB.

Successful in every way was the aquatic carnival held by the Victoria Yacht Club on Saturday afternoon. A capital programme of water sports was held in front of the club house, and for those who were unable to get a point of vantage to see the sport music for dancing was provided in the ball room.

Among the victors at the club house on Saturday afternoon was Commodore Lennox, of the R. H. Y. C. Races.

SVANBERG BEAT TOM LONGBOAT.

Toronto, July 19.—Four thousand wildly-cheering spectators saw John Svanberg, the speedy Swedish-American runner, defeat Tom Longboat, the Canadian Indian, Saturday night at the Idland in a 15-mile race in the fast time of 1:23.24.

Longboat's friends were not disappointed by his showing. Although he did not win, the Indian hugged his man well, and it must be remembered that he was running the other man's race, a distance in which he is never at his best.

Table with columns: Club, Won, Lost, Pct. Includes National, American, Eastern clubs.

TOURENNE'S HANDICAP.

Mackenzie Horse Made Canadian Record. Trotting at Tillsonburg on Saturday.

Fort Erie, July 19.—R. J. Mackenzie's Tourenne ran his best race of the season when he won the mile and a sixteenth handicap Saturday in 1:44.45, making a new Canadian record.

The weather was fine, and the attendance, about 7,000 persons, being surpassed only by Derby Day. Royal Onyx won the six furlongs handicap in the closing stripes from Hambridge and Little Osage.

The Niagara Selling Stake was won by W. H. Fizer's Al Muller, from Fulford and Sal Volatile. Eye White, also from the Fizer stable, won the two-year-old race, but Bob R. had him doing his best at the finish.

Good old John Carroll beat eight others in the mile and 70 yards race, and Zippo beat Reimore in the closing stripes, and Jockey Howard pulled up and dismounted.

Zippo was bid up \$305 over his entered selling price and retained. He made a new track record in his race.

The celebration of the twenty-fifth anniversary—the quarter centennial—of the Detroit Driving Club, July 26 to 30, promises to be a memorable event.
