A SUMMARY OF FINANCIAL, COMMERCIAL AND MINING NEWS.

Vol. 2. No 66.

MONTREAL, SATURDAY, AUGUST 19 1899.

Published Daily at 4.30 p.m. Price 3 cents

MINERAL PRODUCTION IN ONTARIO, 1898.

Mr. Archibald Blue, Director of the Ontario Bureau of Mines, estimates the total value of this production as \$7,202,891. The following are some of his figures: Petroleum and its products, \$1,970,534; Natural Gas, \$301,600; Copper, \$268,080; Nickel, \$514,220; Pig Iron, \$530,789; Iron Ore, \$48,875; Gold, \$275,078; Silver, \$51,960; Salt, \$278,886; Gypsum, \$4,000; Graphite, \$6,000; Mica, \$7,500.

Persons employed, 7,478; wages paid to them, \$2,456,785.

There will be a large increase in these figures for this year.

SUPERIORITY OF NICKEL STEEL.

British Admiralty tests show that, in 12 months the sea corrodes wrought iron, 1.89 p.c.; mild steel, 1.72 p.c.; nickel steel, 1.36 p.c.; as against corrosion therefore, nickel steel is the best.

That, after 5 blows from a 1000-lb. weight, falling from a distance of 3 feet, a carbon steel bar was fractured, and after 12 blows broken; whereas, 7 blows were required to fracture a nickel steel bar of the same dimensions, and 35 to break it. In point of resistance therefore, nickel steel is 147 p.c. better than common steel.

From the latter power a saving of 25 p.c. in weight could be effected by using nickel steel for the cylindrical boilers on large steamships.

IRON AND STEEL BOUNTIES.

The resolution proposed by Hon. Mr. Fielding and ratified by the House of Commons last month contains the following particulars about the renewal and gradual extinction of bounties on Canadian iron and steel:

- (a) From the 1st of July, 1902, to the 30th of June, 1903, both inclusive, the bounties shall be 90 per centum of the amount fixed by Chapter VI of the Acts of 1897.
- (b) From the 1st of July, 1903, to the

30th of June, 1904, both inclusive, the bounties shall be 75 per centum of the amount fixed by the said act.

(c) From the 1st of July, 1904, to the 30th of June, 1905, both inclusive, the bounties shall be 55 per centum of the amount fixed by the said act.

(d) From the 1st of July, 1905, to the 30th of June, 1906, both inclusive, the bounties shall be 35 per centum of the amount fixed by the said act.

(e) From the 1st of July, 1906, to the 30th of June, 1907, both inclusive, the bounties shall be 20 per centum of the amount fixed by the said act.

Provided, however, that if any steel ingots be made from puddled iron bars manufactured in Canada, no bounty shall be paid on such steel ingots.

The said bounties shall cease and determine on the 30th of June, 1907.

This payment of bounties on iron and steel by the Dominion Government has been in existence for 14 years and amounts, counting from 1884 up to June, 1898, to \$1,116,238.61.

Bounties for pig iron.....	\$952,487.75
Steel Billets and Ingots.....	144,318.71
Puddled Bars.....	19,432.61
Total.....	\$1,116,238.61

From July 1st 1897 to June 1898.

Bounties for pig iron	\$165,654.25
" Billets.....	13,642.35
" Ingots.....	54,411.68
Puddled Bars.....	7,705.78
	\$240,812.06

The above bounties have been received by the following Companies, in shares proportionate to their output: Steel Co., of Canada, George MacDougall, Londonderry Iron Co., Can. Iron Furnace Co., Nova Scotia Steel Co., New Glasgow Iron, Coal & Ry. Co., Pictou Charcoal Iron Co., Hamilton Blast Furnace Co., Ontario Rolling Mills Co.

These companies and others that may arise have thus still seven years of Government fostering care, before being required to become self supporting.

STRAWS.

The Mikado Gold Mining Co. North Western Ontario has given the official returns for the first six months of this year 1899. They announce 1,894 oz. gold and 1,012 oz. bullion from Cyanide. Total 2,906 oz. As there are about 2 oz. to the ton of ore, the total output of ore shipped from January to the end of June amount to 5,500 tons.

The Regina in the same district though returning \$28,733.23 in 7½ months is merely paying its way, owing perhaps to over development and to unskilful management.

The Brookfield Mine produces annually 4,000 oz. of bullion, the vein of 14 inches, yielding \$17 per ton. The property has a 20 stamp battery and a Thies chlorination plant.

The Consolidated Cariboo Hydraulic Mining Company near Quesnelle Forks, B.C., is an immense undertaking. At the mine, it uses annually 75,000 lbs. of dynamite, 5,000 lbs. of black blasting powder, 100,000 lbs. of other mining supplies. It has 33 miles of canals, three storage reservoirs, covering 2,184 acres with a storage capacity of 1,016,000,000 cubic feet of water. \$1,000,000 have been expended since 1894 in equipment and \$500,000 in gold has been secured in the development work. The Company's leases contain 400,000,000 cubic yards of high grade gold bearing gravel.

An American importer of Canadian graphite writes to a Canadian company: "The goods give perfect satisfaction and a good quality of flake is scarce in this market. We have one customer, who stands ready to contract with us for one ton per week and this is only one of a great many contracts we can secure."

NEW YORK EXCHANGE.

BANK STATEMENT NOT QUITE AS WAS ANTICIPATED—L. N. LEADING FLAT—LONDON HOLIDAY.

New York, August 19.

To-day being a stock exchange holiday in London, we shall have no prices from that quarter, consequently we have no way of judging just how London takes the strength of our market yesterday. In the last few days, however, the speculative public in that quarter has made a complete change of front and purchases for their account have been gradually growing larger each day until yesterday they assumed considerable proportions.

London and the continent were buyers of almost all the International listed stocks in yesterday's market, while yesterday's market was distinctly strong, and also one of the broadest of the week, in the late dealings it was rather held in check by uncertainty as to what to-day's bank statement would show. Guessers as usual have been at work and their estimates are various. The consensus of opinion, however, seems to be that to-day's statement will be somewhat less favorable than that of a week ago. The increased speculation in the stock market will probably be reflected in a moderate increase in the loan item, while it also seems quite probable that there will be a decrease in reserves. It is well to remember, however, that last week's predictions were made for a poor statement, and that a good one came as a surprise and resulted in a sharp covering movement, money having been distinctly easy all week and should a good statement be issued to-day it seems quite likely that the market for week will close with considerable buoyancy. There can be no doubt but that during the present week the short interest in the market has been increased. This increase, however, has been more in the specialties than throughout the general list. T C I and L N continue to be on good demand, the latter leading flat while the supply of the former is by no means large, people well informed on the stock predict that the short interest in T C I will be given a twist some time next week which they will not soon forget.

The demoralized trade conditions and hostile legislation have created quite a pessimistic feeling in regard to Con. Gas. This feeling is reflected in a growing short interest and yesterday a.m. the stock was in good demand in the loan crowd, at one time being flat bid. There are only a few instances, however, and throughout the general list it may be said that commission houses and some of the small traders are still carrying a great many stocks that would be thrown overboard on any decided slump in prices.

REVIEW FOR THE WEEK.

The inner workings of the market last week were of a very complex character and were interesting to trace analytically, but a way through the labyrinth of them is by no means easy. While the foreign listlessness, strongly in contrast with the usual invigoration, was traceable to Transvaal and money uncertainties and to reflected American inactivity, and while there were obvious such home influences as a strong short interest in Leather pfd. and in Tennessee Coal and Iron, amounting in the latter to 50,000, also bearish tactics, followed by buying in the case of a prominent Broadway House, when Tobacco rose; still there was much in the week's market movements which proceeded from very obscure causes. The effects of these were obvious enough, but a clear reason for their active existence is wanting. Sugar, for example, which figures in the week's list as never selling higher than 164 $\frac{3}{8}$ was rided once and, as the week's result, fell $\frac{3}{8}$ from its highest pitch last week. No one can tell why this was done, and it remains an unexplained fact of the week's market.

There was also great selling by insiders, but why this was done is equally mysterious. The vicissitudes of Brooklyn Rapid Transit, too, landing it 1 point below its previous mark, are only partially explained away by the \$150,000 loss owing to the strike, and by the rumored dissatisfaction with the management of Mr. Rossiter. Another strange effect, too, was the decline of B. Q. 1 $\frac{3}{8}$, though there was much demand for it, but little responsive selling.

Why some of the Rails, like St. Paul, Chicago and N. W., with Pennsylvania, should, on the reports of great earnings, have advanced from $\frac{1}{4}$ to 5 1-2 while others declined, is one of the many eccentric evolutions of the market, for which sufficient as well as efficient causes exist, but which on the surface seem not at all what might have been expected. Yesterday again American stocks appeared to have re-awakened interest in London. There was strong bullish feeling about them, especially Rails, and there was a good deal of buying. A strong bearish influence, however, exists here, which finds expression in the declaration that present high prices have fully discounted the future, prosperous though it will be. This influence is not unchecked or unchallenged, for many leading speculators announce a firm belief that business is such as to warrant hopes of advancing values. Of the 24 stocks on the Exchange News list six have advanced, two are on the same level, and sixteen have declined. Those advanced are as follows: T.C.I. 10 $\frac{1}{4}$, advanced to 92, A. M. T. 8 $\frac{3}{8}$ to 125 $\frac{3}{8}$, St Paul 5 1-2 to 137, S. W. Co. 2 $\frac{1}{4}$ to 62 1-2, Chicago & N. W. 1-2 to 162, Penn. R. R. $\frac{1}{4}$ to 137. Those the same are: Con. Gas 181, L. P. R. 75. Those lower are: P.O. $\frac{1}{8}$ to 122, U.P. $\frac{1}{8}$ to 45, Sugar $\frac{3}{8}$ to 164 $\frac{3}{8}$, R. I. $\frac{3}{8}$ to 119, Anc. 1-2 to 58, Ax. 1-2 to 43, Cen. $\frac{3}{4}$ to 139, Rubbe: $\frac{7}{8}$ to 51. U. P. pfd 1 to 77, B.R.T. 1 to 115, B. & Q. 1 $\frac{1}{8}$ to 137, P. M. 1 $\frac{1}{8}$ to 47, Man. 1 $\frac{1}{8}$ to 118, N. P. pfd 1 1-2 to 77, M. R. 2 to 209, A.B. 8 to 190.

CRIPPLE CREEK NEWS.

DAMON.

Splendid Showing in this Property—
Rich Ore Encountered.

It seems impossible for Damon to lose sight of ore in the mine, and it is literally true that one cannot throw a stone in the present workings without hitting an ore shoot. Veins that have heretofore been looked upon as of not much account have been found to contain good ore shoots, and instead of there being but one shoot in the big dyke that was cut some time ago, there are several of them.

When the first news of the rich strike in Damon was made public, the workmen had penetrated about 17 feet into the big dyke where the ore shoot was discovered. Since then they have cut entirely through this dyke and it is found to be about 40 feet wide.

It was known that a very rich ore shoot had been entered and the returns on the ore shipped from it verified all that had been said about the value of the strike. This first ore shoot was found to be about eight feet wide, and was only a short distance north of where the dyke had been entered.

Since then it has been found that there are no less than three ore shoots in this dyke. One of them is eight feet wide, and is the one first struck, and in addition to this there is another separate and perfectly distinct ore shoot and at a greater distance, and this shoot is about 15 feet wide. Then there is a third shoot, distant from the other two, lying south of the line where the dyke was entered, and this third shoot is about 12 feet wide.

As is well known there has been some marvelously rich ore taken from the first of these ore shoots, as well as from the other two. The uncovering of this ore appeared to verify the prediction of a prominent mining engineer to the effect that Damon was on the top of a large and rich ore shoot.

But the average shipping value of the ore is what counts, and it is well known that a large body of medium grade ore is more desirable than a "pocket" of rich stuff. The average shipping value of the ore taken clear across the 8-foot and 12-foot ore shoots is better than two ounces or \$40 gold to the ton, while the average shipping value of the ore taken across the 15-foot shoot is better than one ounce gold per ton.

But rich as this big dyke is in ore. Damon is not compelled to rely wholly upon the dyke for its ore. Quite unexpected-

ly good ore has been encountered in a vein that was not supposed to carry any values worth shipping. This vein is one that runs into (or out of, as the case may be) the big dyke. It was cut in the shaft and a drift was started south but no good values were found. Then a cross-cut was started resulting in the finding of the wonderful ore in the big dyke.

When Jerry Johnson recently opened up ore it made the Damon people think that possibly they might run into something if they ran a drift north from the shaft on the vein. This drift was started, and after going about 20 feet from the shaft, they encountered an ore shoot which is a splendid one and assures them of ore in addition to the good stuff in the dyke.

Although this ore was found in the Diamond claim of the Damon Company, there is no reason to believe that it will be confined to that claim, for from the dip to the vein and the ore shoot it is more than likely, in fact, almost sure, to be opened up in the Hardwood claim of the Damon Company.

The 40-foot dyke which holds such fine values passes out through the Diamond endlines undoubtedly, and lies in the same direction as the length of the claims. Thus not only will the Damon claim have it but it will be found in the Hardwood claim as well.

STRAWS.

There is a mining boom in Cape Breton. Besides the Dominion Iron and Steel Company at Sydney, projecting its vast enterprise, the Nova Scotia Steel Company purposes erecting an additional furnace in the same neighborhood.

The output of Coal in the North West Territories for 1898 as given by Government official returns is:

CHICAGO MARKET.

CHICAGO MARKET—August 19, 1899.

FROM OUR SPECIAL CORRESPONDENT.

**MARKET STRONG ALL ROUND—
WHEAT $\frac{1}{2}$ HIGHER AT LIVERPOOL.**

Chicago, August 19.

In opening to-day the market was strong all round, wheats being all $\frac{1}{2}$ higher, Corn, $\frac{1}{8}$, $\frac{1}{4}$, higher, Oats, $\frac{1}{8}$, $\frac{1}{4}$, higher, while every class of provision was at about 3c of an advance. Yesterday at Bartlett-Frazier's, Montreal orders came to buy wheat, and this morning there was reported from Chicago 1c advance per bush.

Liverpool—Wheat $\frac{1}{2}$ higher, affected by American advice; corn $\frac{1}{2}$ higher.

Curb wheat, 72 $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{2}$; corn 30 $\frac{1}{2}$.

Grain received:

Wheat, Car lots 115 shipments	none
Corn " 298 "	269,773
Oats " 608 "	47,375

Primary receipts last week 588,456, shipments 215,179.

Four ports, 215,568, shipments, 53,826

At Chicago received to-day: Hogs, 12,000; Cattle, 200; Sheep, 1,000.

At Kansas hogs, 2,500; cattle 20.

At Omaha, hogs 5,000, cattle 600

Northwest cars, Minn. 162, Duluth 70.
