### Manufacturer's Agents AND IMPORTERS.

LINEN GOODS of every kind. BLACK GOODS, CRAPES, &c., RAMWORTH'S SEWING COTTONS.

### Mercantile Summary.

THE Molson's Bank, building at Ridgetown is about ready to move into. It is a nice building, built at a cost of \$5,000, and would do credit to a larger town.

MR. R. M. CALDER, who has long been in the dry goods business in Chatham is in difficulties. He has been sued by several firms and the bailiff in possession.

It is stated by the Summerside Journal, that the price paid by the bank of Nova Scotia for the banking premises of the bank of Prince Edward's Island was \$14,875.

Mr. Thomas Plummer for several years with the Bank of Montreal in Belleville left on Wednesday for Portage la Prairie where he enters upon his duties as agent for that bank. His many friends in Belleville wish him much STICCOSS.

MR. WM. CORBOULD, lately manager of the Bank of Hamilton at Wingham, has been presented with a handsome gold watch, chain and charm, accompanied by an address at the hands of his friends on the occasion of his removal to Port Elgin.

THE largest sailing ship that ever was built has just dispatched from Belfast, Ireland. She is made of steel, 299 feet long, will carry 9,600 tons dead weight, has four masts, and is called the Lorn Downshire. She will make her first voyage to San Francisco.

THE bee crop in Ontario is a failure this year. The reason is probably the wet weather which has characterized this season. Mr. Jones of Beeton and other intending exhibitors at the Toronto and Provincial exhibitions will not exhibit in the apiary department this year in consequence.

THE new loan society formed in St. Thomas will be known as the "St. Thomas Savings' & Loau Society." The provisional directors :-M. Gilbert, president; John E. Smith, vice. Directors-W. E. Idsardi, J. H. Wilson, Ald. Moore, Cole and Hunt, D. McLaws, E. G. O'Donnell, A. J. Leitch, reeve of Dunwich, J. S. Upper, C. Whitwam: with A. McCrimmon, sec-treas.

THE water-melon trade is a lively one in New York city during the season. It is estimated that the city can consume 200,000 melons in a week, while fully 300,000 melons a week are shipped to the watering places and to New England from the metropolis. The first supply came from Florida, and the Florida melons command an average price of one dollar apiece. The next came from Georgia.

MB. W. B. TORRENCE, lately performing the duties of accountant in the Bank of Commerce, Brantford, has been transferred to a like position in the head office of that institution in this city. His old associates in Brantford, regretting his departure, and rejoicing at his well-merited promotion, presented him, on Saturday last,

with an elegant silver-plated water pitcher, cup, and fish-knife and fork.

THE Herdic Coach system in the city of Philadelphia, has been discontinued. It did not pay.

THE aggregate traffic of the Midland Railway to Aug. 12th shows an increase of \$153,932 over last year.

Or the \$10,000,000 worth of bonds issued by the Canada Pacific Railway Co., more than fourfifths has already been taken up.

THE arrangement to establish a connecting link between the Grand Trunk Railway Co. and the North Shore Railway Co. was confirmed at a meeting held on Tuesday last.

An increase of \$1,541 in the week's traffic receipts of the the Toronto, Grey & Bruce railway, is indicated by a return made on August 19th. The Northern & North Western shows an increase of \$613 for a like time.

THE N. Y. Times in describing an encounter at fisticuffs between two members of the Produce Exchange, alluded to the defeated man in these terms "Mr. Fox, as before stated, is a broker, and his cheek sustained no injury.

THE ratepayers of Pictou, N. S., have voted a bonus of \$50,000 to the Great American and European Short line Railway Co. The grant will be paid over when Oxford and New Glasgow are connected by the rails of that company.

THE good results of the deepening of the ship channel between Montreal and Quebec have been noticeable in a most gratifying manner this season, the shipping companies being saved large amounts in lighterage, etc. As an evidence of the success of the work accomplished it may be stated that the Allans have decided to sell their iron Glasgow-built lighters, also the powerful tug used for towing.

MESSES. WURTELE & Co., wholesale dealers in dry goods in Winnipeg have assigned to Messrs. Moffatt & Bathgate of that city. Their liabilities are about \$44,000 with assets of a similar amount. They had not sufficient capital to succeed in Manitoba, where expenses of all kinds are so very high. However it is thought that if their affairs are not complicated with the old Quebec house they may get a settlement with creditors.

Ir would seem a little strange that the Underwriters' Association should increase the rate of premium in Winnipeg, just at a time when the water works are being completed. The fact that many new buildings are being erected in all parts of the city, without any regard to the building law, will no doubt to some extent account for this action on the part of the companies. This is like some of the sanitary regulations in that city, which are good, were they not permitted to practically become a dead letter.

THE result of the annual meeting of the Credit Foncier Franco-Canadian, held in Paris last week, is looked for with considerable interest. the special business to be laid before the meeting being the advisability of making further loans in Canada, and the consideration of the recent amendments to the act of incorporation. company has loans out to the amount of about one and a half millions, but has done no new business since last December, and the local management is awaiting further instructions on this point.

THE report of the St. Paul, Minn. & Manitoba Railway Co. presented at the late annual meeting indicates that the Company is in a most prosperous position. The surplus net revenue for the year, after paying the fixed charges and

gentlemen were unanimously elected directors for the ensuing year. Geo. Stephen, D. A. Smith, Jas. J. Hill, R. B. Angus, John H. Kennedy, D. Willis, Jas. and R. B. Galusha.

THE town of St. Johns, Que., and its transfluvian sister town of Iberville are likely to become the Staffordshire of Canada. Besides the six potteries, some of them on a very extensive scale, already in operation there, two other similar concerns are now preparing for work. The larger of these will make a specialty of drain pipes and tile goods generally, the other will run on Rockingham and can-ware. Messrs. Wm. Livesley & Co., who have only been a short time in operation, are now adding a third kiln to their establishment, and are going into the production of decorated ware, samples of which have been highly spoken of.

CAP. SHAW, the chief of the London (Eng.) Fire Department arrived in New York on Tuesday of this week. In an interview with a Times reporter he remarked "if we had such building laws as you have here we should never have a very disastrous or destructive fire in London, in my opinion. Your building laws are the best in the world, and ought to give you almost absolute safety against destructive conflagrations." "Providing they were carried into execution, they probably would," interjected the reporter. "Ah, but you ought not to say that; it is a reflection on your commissioners. You have a most absolutely perfect law and Commissioners to enforce it. Why shouldn't that give you safety ? "

WE have received from the British American Bank Note Company, which has a capital of \$200,000, a circular setting forth some facts in connection with its history during the past sixteen years. The work of engraving and printing bank notes implies great responsibility as well as great care and skill in workmanship. When all this is assured, it is well that the work should be entrusted to one establishment, for it is evident that the more you multiply the printing material, such as plates and dies used in this work, the greater opportunities you give rogues to make counterfeit paper. At all events, no change should be made while the work is well done and at a reasonable price. This company, in the language of the circular, has been entrusted with the engraving and printing of all the Dominion Notes, Postage and Revenue Stamps, &c., required by the Government, under the several Administrations for sixteen years past, and has at present the printing of ninety-nine per cent of all the Bank Note circulation of the Dominion. The President and Manager may with some degree of pride, be permitted to point out that he has personally had the management of bank note engraving and printing since the first note was printed in Canada, and the continued responsibility of supplying the notes to the Bank of Montreal for the last thirty years, and all the other Banks (with two or three exceptions) since they were incorporated.

THE affairs of the old grocery firm of T. W. Robinson & Co., Peterboro, are in a very bad shape and it has suspended payment. About two years ago Mr. James Elliott became a partner. He was then supposed to be worth over \$20.000 but the addition of his capital was not sufficient to save the firm from ruin. There is now a contest between creditors as to who will get the first chance. Messrs, Lightbound, Ralston & Co., Montreal, have a claim of \$14,000 which they are pushing; one of the banks claims about double this amount. In any event the general creditors need not expect much as the liabilities are estimated from \$80,000 to \$100,000 dividends on stock is \$985,000. The following and assets about one fourth the latter sum. The about \$1,000.

real estate owned by the firm is heavily mortgaged.

Among the business changes of the week is the admission of Mr. Peter Ryan into the firm of Messrs. J. J. Walsh & Co., brokers in this city; the new style is to be Walsh & Ryan. In Guelph O'Donnell & Hazleton, grocers, &c., have dissolved; George W. Hazleton continues. In Hamilton Thos. Irwin, dealer in stoves, &c., has admitted John T. Irwin a partner; the style is now Thos. Irwin & Son. King & Harrison, tailors, have dissolved partnership; the former continues the business. John E. & A. Rogers, dealers in boots and shoes in Jarvis have dissolved partnership; Andrew Rogers continues. In Millbrook Philp & Kirkpatrick, stoves and tins have dissolved; Thos. H. Philp continues. Husband & Horswell, dealers in dry goods in this city have dissolved; the former continues under the style of A. C. Husband.

THE daily papers contain long accounts of the defalcations of Mr. James Hunter, a Montreal broker. The first fact brought to light was that he had borrowed, for his own use, \$35,000 on Bank of Montreal stock, entrusted to his keeping, under power of attorney, by Mrs. Phillips. The excuse was that he had reason to believe Mrs. Phillips had made her will in his favor, and he anticipated the assumed bequest in this way. Inadequate as was this plea, the statement soon followed that he had converted other people's money to his own use; and now Mr. Hunter is missing. None of the statements are made before a court, though that relating to the Phillips' estate was admitted by Hunter. It is a vulgar case of defalcation, in which extravagant living is said to have played a part. Should Mr. Hunter be found, he will undoubtedly have to face a criminal prosecution. If half the reports we hear are true, the delinquent merits severe pun-

A circular tells the lucky receipient of it, that "The American Grain Company is content to do business on sound business principle, and to make from 50 to 500 per cent. yearly without assuming large risks of loss, paying its shareholders monthly cash dividends of such money as can be made." Moderate indeed, easily content, only 50 to 500 per cent! But then the hope of something beyond these paltry gains is encouraged. The circular winds up with this delicious prospect: "Any month may give you a 25 to 100 per cent. dividend." Indeed! The stock has been increased to \$250,000, and the circular tells that about one-half of it is for sale. It is added that bank men in eleven different States have bought. Nevertheless, we must ourselves decline such tempting offers, while we leave others to their own judgment. A very little of that commodity ought to suffice for direction.

JOSEPH MARTIN, jr., a Toronto tailor, has cleared out, and Messrs. Gault Bros. in Montreal have possession of the stock .--The assets of S. Martin & Co., engaged in the salt trade in this city were to be sold on Tuesday last. Ardagh & Meredith, dealers in gent's furnishings have assigned to Wm Petley; stock is now being taken and the real condition of the firm is not yet known. --- A few days ago, Mr. J. A. Nelles of Guelph, bookseller, presented his creditors with a statement of his affairs and was then granted an extension of time. Since then it is stated that his wife sold her property in Clinton, and about \$2000 was put into the business. It is now thought that with a little more attention to his affairs he may succeed. Campbell & Lindsay, a waggon making firm at Glencoe, are in trouble. The bailiff has been put in possession of their premises. Liabilities are said to be between \$3,000 and \$4,000; assets

The president of the Midland Railway, Mr. Geo. A. Cox, and Mr. R. Jaffray, returned from London, England, a few days ago. While there, they were successful in placing on the market, at '95, some \$610,000 of the Company's bonds. These bear five per cent. interest. In round numbers the total indebtedness of the different lines forming the Midland system is now \$8,000,-000. And what is satisfactory is the fact that already the net earnings of the present mileage is more than sufficient to pay the interest on the Company's indebtedness. This is in marked contrast with its condition a few years ago. The work of construction on the connecting links between the different lines is being rapidly pushed forward, and those in control are entitled to much credit for the vigorous manner in which the Company's affairs are administered.

-A correspondent calls attention to what he considers an inaccurate statement of the ratio of expenses of American Life Insurance Companies. In our yearly summary of life insurance business by leading companies, which for 1881 appeared on page 183 of this volume, we quote the management expenses of the American companies without including taxes. This, says our correspondent, "makes their expenses appear smaller than they are, and is unjust to Canadian companies." We find the expenses of the four American Life Companies to be, including taxes, as under :-

Company.	Year.	Per \$100 Incom
Ætna.	1879 1880 1881	\$10.47. 11.87. 13.49.
Equitable.	(1879	15.20. 16.32. 16.12.
Union Mutual.	1879 1880 1881	25.13. 26.55. 25.83.
Travellers.	{1879 1880	16.75. 13.61. 8.00.

FIRE RECORD.

ONTABIO FIRES.—Farmersville, Aug. 20.—
T. G. Stevens' furniture factory and dwelling house burned, loss \$3,000, factory not insured, house insured for \$1,000.—St. George, 10th.

—Dr. Patten's house, barn, 70 loads of barley, 40 tons of hay, and 20 pigs; insurance \$500; loss fully \$3,000.—Enniskillen, 14th.—The barn and contents of Geo. Dennis destroyed; insurance \$1,000 in London Mutual.—Br. lleville. insured \$1,000 in London Mutual.—Belleville, 16th.—Wm. Alford's store and bwelling on Cannington road destroyed; loss \$3,000; insured \$1,800.—Elizabethtown, 17th.—S. M. Falk. ner's barn and contents burned; loss 1,500; not ner's barn and contents burned; loss 1,500; not insured; supposed incendiary.——Smith's Mills, 11th.—The barns and outbuildings of Geo. Gibbons were struck by lightning and completely destroyed; loss \$500; partly insured.——Tilsonburg, 15th.—Mr. McDonald's barn with 500 bushels whoat destroyed; not insured.——Tweed, 16th. — Mr. Arthur Williams' barn burned, loss about \$1,000; insured \$600; supposed incendiary.—Orangeville. 16th.—The posed incendiary.—Orangeville, 16th.—The stables of the Gordon House with contents comstatics of the Gordon House with contents completely destroyed; loss about \$2,000; not insured.——Sharbot Lake, 11th.—Newman's saw mill burned; loss about \$2,000; not insured.——Tamworth, 12th.—Jones' woollen mill and nearly all the contents destroyed, Friday last; loss estimated \$6,000; no insurance.

OTHER PROVINCES.—St. John N. B.—The drying-room of Park's cotton mill damaged \$400. Quebec, 14th.—Losses by late fire as follows:
J. Plamondon's store and residence, \$8000,
partly insured. J. M. Pelletier's block, \$6,000.
Mr. Gagnon's building and stock of fire the store of the store partly insured. J. M. Pelletier's block, \$6,000. Mr. Gagnon's bui ding and stock of furniture, \$9,000, insured \$5,000. Mr. Mecleries boot and shoe store, \$6,000, insured \$4,500 in Royal and \$1,200 in Queen. McHugh, wooden house, \$600. Blouin, butcher, \$1,000, and Dion, grocer, \$3,500 or over.——St. Roch's, Que., 19th.—Roy's packing case, factory, Richard's leather tip factory, the residences of Messrs. Chevret, Roofer, Drolet, and Cote destroyed; loss will exceed \$40,000; Mr. Roy losing \$30,000, with only an insurance of \$7,000. The following companies are interested. Lancashire \$3,400, Citizen's are interested, Lancashire \$8,400, Citizen's \$1,000, Canada Fire and Marine \$600, Fire Insurance Ass'n \$500; the Quebec loses nothing.

THE QUEBEC LOAN AND THE NEW TAXES.

The result of the recent offer of the new loan to the public shows that the credit of the Province of Quebec, in spite of the rapid accumulation of the public debt, still remains good. If we may believe the unofficial statements which have been made on the subject, several times the amount asked for were offered, and it was made known in advance that no offer below par would be made. The rate of interest to be paid is five per cent. The loan is made payable in Canada, a condition of which it is difficult to see the advantage. There might be an apparent saving in exchange, but it would be only apparent, except for any part of the loan which may be taken in Canada; any foreign house making a bid for the loan would take into account the expense of obtaining the interest from Canada. The statement has been made that in Canada, a million and a half being asked for, two millions were offered, and that three times the amount required was offered in England. Several offers it seems, come from England: some English houses were willing to pay a premium for the loan provided it were made payable in England. This fact shows that a loan payable in Canada could not be made in the English market on the same terms as one payable there. An equal premium on a loan payable in Canada would of course be more advantageous; but without being able to make a comparison of the different tenders it is impossible to say whence the best offers come. While there is no dispute that no part of the loan has been taken below par, conflicting statements have been made as to the precise price; some statements say the sale was at par, others made before the division had been determined on, that a premium would be realized.

The general fact that the Province of Quebec is able to make a five per cent. loan remains. This, the appeal to capitalists has demonstrated in the most practical way. Mr. Wurtele may fairly be congratulated on the result. Under other circumstances, such as a temporary scarcity of loanable capital, the result might have been different; but it is not the less true that the debt of the Province has, under confederation, been increasing too rapidly. We are told indeed, that new loan adds nothing to the debt, since it is merely the conversion of floating liabilities into funded debt. But this does not mend matters; the objectionable thing was the increasing of this floating debt-

And further railway obligations have been assumed just at the moment when the sale of the Provincial railways brought a partial measure of relief. No one who looks on in cool blood can 'convince himself that this is prudent, whatever may be the feelings of the actors in this particular. Borrowing for railway purposes was pushed to a dangerous extent; and although the serious complications which were at one time threatened. have been avoided by the sale of the roads, there is much need that the lessons of the past should be allowed to influence the future policy of the government. But the same restless desire to push railway construction beyond the limits of prudence and the means of the Province, seems as if it might, in the end, force the Province to its fate. The clergy who laudably interest themselves in colonization, bring pressure to bear on the Government and the legislature in favor of grants for colonization railways. The House forcing the Government compels a continuation of the dangerous course. The clergy may be excused for not understanding financial questions, but not for pushing things too far in an absence of the knowledge which should govern the decision.

Despite the sale of the railways and the

new loan, it will depend entirely upon the legality of the new taxes whether there will be revenue enough to meet the expenditure. Payment of the taxes on the banks and the insurance companies is being resisted; and by the time that the Privy Council can decide on the legality of these taxes, some substitute may have been found. The Government is in immediate want of the money which these taxes would yield; and unless it can compel payment in the meantime, some financial shift will once more have to be made. Of course the Government will collect the taxes, in the meantime, if it be in its power to do so. The legality of the new taxes will probably turn upon the question whether they are direct or indirect; the Provinces having power to levy only direct taxes, except some others which are specified. If a tax on an insurance company falls ultimately on its clients, that would make it indirect, and therefore such as the Province has no power to levy; and the same would be true in the tax on the banks. The incidence of a tax is sometimes difficult to prove, As a general principle, it must be assumed that no one would sell insurance without requiring the purchaser to pay all the costs incident thereto and the question is whether the courts could assume this principle, which would seem to be self-evident, or whether special proof would be required. Competition sometimes makes insurance companies do very irrational things; but even if it could be shown that no special charge was made to cover this tax, it would still follow that it ought to be covered in this way and might reasonably be assumed to be. With the banks, the matter is more complicated. An insurance Co. is merely a seller of insurance; the business of a bank is extremely multifarious. If insurance companies found it difficult to apportion the amount of tax chargeable to each customer, a bank would find it quite impossible. But the principle that the customers both of the bank and the insurance companies must pay all expenses of all kinds, remains

There is something like a sign of relenting on the part of the Government for having passed this law, though the confession of repentance is not direct. The treasurer, Mr. Wurtele, is credited with expressing the hope that the reign of this tax might be short; not that he objects to its form or incidence, but because he thinks the necessity for it may soon cease to exist. Mr. Wurtele defends this tax, so long as it is a necessity, on the ground that it falls on people well able to pay. But bank stocks are largely held for investment by widows and other persons who are by no means exceptionally well to do; and the same is true, to some extent, of insurance stocks. As for the equity of the tax, no tax on capital without respect to its productiveness, can be equitable. If, as sometimes happens, too often with insurance companies, there is no profit, any tax on the capital is a confiscation. Taxes ought to be arranged, whenever possible, as to be payable out of revenue and not out of capital. A tax which takes the exceptionable form of being levied upon capital may be paid out of the product of the capital; but where there is no product, as will happen in exceptional cases, there is properly nothing to tax. We cannot agree with Mr. Wurtele that this tax is unexceptionable in form; and we trust that his prediction, that, whether constitutional or not, it will prove to be only of a temporary character.

#### AMERICAN SHIPPING.

Under the modest title of "A Glance at American Maritime Affairs," Lieut. Kimball, of the United States Navy, enters, in the International Review for July, with some feeling and not a little sarcasm, into an enquiry as to the causes of the decline of his country's merchant shipping. One can scarcely wonder that an American should write feelingly upon this subject, when from carrying 92 per cent. of her own imports and exports in American ships fifty years ago and 70 per cent. twenty-five years ago, United States bottoms now carry only 16.2 per cent. of her own ocean trade.

The causes of this decline Lieut. Kimball considers to be : Lack of legislative protection in a protectionist country and lack of armed protection during the war of the Rebellion. The preventives to its revival have been: Excessive local taxation; excessive prices (in America we presume) of iron ships: exorbitant consul fees; oppressive measures as to advance pay for distressed seamen; high wages of crew owing to general high prices. The writer takes the ground very strongly that judging from the statistics which he finds in Blue Books, in order "to revive the merchant marine of our country, we must regain our foreign carrying trade; and to do this last we must own and employ in the trade iron and steel ships." Before we state the remedies he suggests, it may be well to note a few of the writers' figures and

The beginning of the decline of the United States foreign carrying trade was simultaneous, it appears, with the beginning of the withdrawal of protection from the United States mercantile marine. "To be of anterior occurrence," acknowledges the Lieuten-

ant, "does not prove any event to be a cause;" but he, nevertheless, appears to think the decline "the effect of baneful legislation," for "by 1830 all important maritime countries, except France, had been released from discriminatory duties laid by us upon their shipping." It was in that year that a treaty was made with Great Britain, giving her certain advantages in favor of her colonies which were to be reciprocated by like advantages to our colonies," says the essayist, "when we had none, and when it would seem, under our form of government, we never could have any." With a few spasmodic stoppages the foreign carrying trade of our neighbors across the great lakes, has gone on losing, more or less rapidly ever since the year last mentioned.

As long ago as 1815 was begun the withdrawal of protection to the United States mercantile marine. In that year the United Kingdom was released from discriminatory ad valorem duties, and the release of other important countries followed: Spanish North American Colonies, 1819; Russia, Netherlands, Sardinia, and Republic of Columbia. 1824; Denmark, 1826; Bremen, Hamburg, etc., Sweden and Norway, and dominions of the Pope, 1827; Brazil and Prussia, 1828; Austria, 1829; and in 1830 "we made the famous treaty, before alluded to, by which we gave up these duties on merchandise in British Colonial bottoms in return for like favors for our own colonial shipping-save the mark !"

From 1830 to 1855, being able to produce the material cheaply for wooden ship-building, having skilled labor, capital and seamen, the American ocean marine was doing pretty well, losing ground but slowly-10 of 1 per cent. annually-and that was the time of the fast American tea clippers and of American ocean packets. In 1855 about one-fifth of the world's ocean carrying trade was done in steamers, and in that year the States put forth 243 steamers and 507 square-rigged sailing-craft, 750 in all. By 1860, however, while the steam-carrying ships of the world had reached 30 per cent. of the total, the States launched but 410 craft, of which 264 were steam and 145 square-rigged sailers. The majority of the steamers, however, was for the coast-wise trade, so that American ocean carriers were on the decline.

Official statistics show the total tonnage of the United States in 1860-1, the first year of the civil war, to have been 5,385,000 tons, of which 2,496,000 tons was employed in the foreign trade: 2,704,000 tons in the coasting trade; an 1 283,000 tons in the whale and cod fisheries. By 1865, from various causes, mostly arising out of the rebellion, the total tonnage had declined to 4,082,000 tons. The coast-wise tonnage had increased slightly it is true, but foreign trade tonnage had lost 60 per cent., the whale fishery 25 per cent., and the cod fishery about 8 per

Year. 1861 1865		Coasting trade. 2,704,544 2,865,323	Whale and Cod fisheries. 283,580 117,638
Loss	1,487,743	889,211	165,942

Lieut. Kimball, to a great extent, mistakes the nature of the difficulty. American shipping does not require to be hemmed in by restrictive laws—of these it has more than panies have been induced to reduce rates

enough-it wants to breathe the air of freedom. The heavy consular fees which he points to are a discredit to the American nation, and they ought to be reduced to a reasonable figure. If American ships, as is alleged, truly we believe, cost so much more than English as to make competition impossible, the remedy is to remove the restriction which prevents Americans buying foreign vessels. If the interest on capital invested in American ships is greater than that on capital invested in English ships, the case is not exceptional; the same comparison would hold in any other kind of enterprise. That American vessels, in New York, should be burthened with a tax of  $2\frac{1}{2}$  per cent., while English vessels are taxed only one per cent. on their net earnings, is discreditable to American finance. Another difficulty stated is that seamen's wages are higher in the States than in England; to which we answer, that, in an international competition, the Americans cannot afford to pay more, since to do so is incompatible with success. And Mr. Lieut. Kimball assures us that plenty of labor can be got in the States at English prices. Protection will never revive American shipping. Bounties, which the writer recommends, would never make a self-sustaining commercial marine. Lieut. Kimball's figures are useful as show ing the decline of American shipping; but his proposed remedies are useful only so far as they recommend the removal of burthens: they are mischievous when they encourage the hope of bounties, which are not likely to

### FIRE PROTECTION AND FIRE IN-SURANCE.

The true relationship between water supply and fire insurance is that the former should lessen the hazard to be protected by the latter, and that, in consequence thereof. the rates of premium should be reduced. But an ample water supply is merely a means to an end, and it is essential that there should be promptitude, power and judgment in its application, else it is a deception and

- 1. Some towns provide the apparatus without the water, some the water without the apparatus, and some both water and apparatus without judgment in their care and application. And yet all these towns demand reduction of insurance rates, however imperfect may be the considerations they offer as inducement.
- 2. There is, however, in connection with fire protection, another snare equally deceptive and fatal to the fire insurance companies, viz: the practice, by some proprietors, of reducing the amount of insurance carried in consequence of their presumed safety from total losses.
- 3. In addition to these there is the selfdeception which trusts so implicitly to the fire protection as to discard the protection of fire insurance altogether.
- 4. In turn there are fire insurance companies which have avoided or have discontinued business in places whose fire protection has proved delusive or has been proven ineffective because some other of the com-

below those warranted by the facts of the places.

- 5. There are many towns whose fire protective arrangements, however perfect, are rendered unreliable by the laxity or favoritism of the authorities in the enforcement of building laws and laws for the storage of inflammables and explosives
- 6. In some of the provinces the fire insurance companies are specially taxed in various towns and cities for the maintenance of fire departments, not one of which is reliable in case of need.

In reference to all these places and these differing lines of conduct it should be enough to say that the successful prosecution of the business of fire insurance is dependent on a proper appreciation of the risks to be carried, the collection of proper rates, the issue of proper forms of policies, and the proper adjustment of losses. The basis is the proper appreciation of the hazards. If the insurance company is deceived by an appearance of fire protection which proves ineffective, then of course, the rates of premium it has charged will have proved inadequate, whether a fire has occurred or not, because to all the companies, except those whose business is confined to very small circles, the actual fire hazard of its whole business will assert itself in due proportion, just as effectually as though each risk could be measured in a liquid measure, and a certain proportion of the whole must run over the general recept-

It is therefore evident that the mere fact of fire protection is of no importance whatever, to the fire insurance companies if the hazards of the risk be accurately estimated and adequate premium collected, indeed, if the motto "the more risk, the more premium," were really in vogue, as it should be, then the companies would be interested in the increase rather than the decrease of hazard, because it would bring them a larger income with presumably larger profit on the same number of risks, and, consequently, with less labor and expense. The only limit in this direction is when an aggregation of risks causes a "conflagration hazard." Indeed, if the presence of this hazard were comprehended and rated, its existence would be for the interests of the companies.

It may surprise and offend some people to be told that all efforts on the part of managers of insurance companies, for the improvement of fire protection in any place, arise from either that patriotism which overcomes their business instincts, or from that ignorance which prevents them from properly estimating and assessing the hazard of risks as presented to them, or from that want of firmness which prevents them from insisting upon such rates as are adequate to the risks, or from the inability of the proprietors to pay adequate rates of premium. But we could not by any other process arrive at a proper demonstration of the point we wish to impress upon our readers, which is, that it is of absolute importance to the fire insurance companies that they should not be deceived by the appearance of fire protection where it does not truly exist, but it is not of importance to them whether there is any fire protection or not, so that it is a violation of all the rules of common sense either to ask an insurance company to subscribe for the procurement of fire protective apparatus, or to tax them for its maintenance, or for them to busy themselves in such matters.

It is the want of business tact and management which causes any action on the part of the insurance companies in connection with fire apparatus or fire departments, except in the shape of declarations such as "The fire department and appliances of the city of L. having been so improved as to warrant a reduction of rates of premium now current there, it is now determined that such reduction shall at once be made on all new risks and all risks presented for renewal of policies," or "The fire department and appliances of the city of M. having been demonstrated to be less effective than was allowed for in the computation of rates of premiums, it is resolved that increase of such rates will at once be required on all new risks and renewals."

Those who, defending on the supposed efficiency of a fire department, obtain amounts of fire insurance so small as to be disproportionate to the amount at risk, perpetuate a fraud which may act like a boomerang to them. They cause the insurance company to be in peril of a total loss of the amount of the policy by any small fire, and they expose themseves to the danger of the total ruin in case the fire gets beyond the control of the fire department. They get the benefit of a reduction of premium by reason of the fire department, but, not content therewith, they seek an undue advantage over the insurance company and are properly served when their dishonest calculations lead them astray. The fire insurance companies are fast losing control over this very important factor in the calculation of fire insurance without notice until required.

As for those who rely on the supposed efficiency of the fire department to go without insurance altogether, we have nothing to do with them if they are rich enough to make insurance companies of themselves.

There only remains for our consideration the action of some of the companies in so reducing rates of premium as to cause sensible companies to avoid or withdraw their agencies from such places, as was done by the Liverpool London & Globe, and Scottish Imperial to the destruction of the Stadscona some years ago. As, however, such avoidances or withdrawals must be matters of judgment and would appear sensible, there can be no discussion as to their advisability. It therefore only remains for all places, whether towns, villages, or cities, to be sure they have that protection which they think, and assert, they have, and for the fire insurance companies not to be deceived by appearances.

### LUMBER.

At all points we find the prevailing impression to be that prices of lumber are at as low a point as they can be expected to reach, and so far from going lower, that they are much more likely to go up. Western dealers, according to Chicago papers, hold very firm views, which appear justified by the active request for lumber; while in the Eastern markets a prospect of activity, arising from the remarkable yield of the situation of its head-quarters, its members

United States crops, renders holders sanguine, and stimulates purchases. As was stated in our columns last week, the feeling among mill men on the Ottawa is one of confidence as to prices; their only apprehension appears to be that their stock of logs will not hold out.

The crop of logs in Canada was not a large one, the crop floated to the mills we mean, for those "hung up" cannot be taken into the account. The Manitoba demand has been remarkable, shelter being needed for the thousands who are flocking thither, and there is no sign of its abatement. Then the advance in lake freights on Wisconsin and Michigan lumber, rendering that article dearer to the buyers in Albany and Buffalo, makes an increased draft upon Ontario's limited stock. For, presumably, they find ours cheaper, -since the freight on the Michigan article counter-balances the duty upon the Canadian article, at all events they can get it more conveniently-from the Georgian Bay, across Lake Ontario or from the Ottawa tributaries down the St. Lawrence and Richelieu, than the American lumber carried along the whole length of Lakes Michigan, Huron, St. Clair and Erie. Respecting present prices, compared with those of former years, a well-informed dealer in Ontario, Mr. J. C. Miller, has this to say:

"The price of Lumber fell so low during the depression, that the Retail Traders appear to view the rapid advance made since the fall of 1879 as inordinate, and have unwisely allowed their stocks to run down to a very low point, contending for the last two years that prices must drop. The answer to this contention has been an increase in the price of Timbered Lands, of Labour and supplies of all kinds, much greater than the advance in the price of lumber."

We observe here a contention, which has been maintained by a number of other dealers, this year, that the advance in the selling price of lumber at the mills is not equal to the enhanced cost of making it; labor, limits, and supplies having increased in price at a greater rate than the manufactured article. Estimates of the percentage of this difference vary, some regarding it as trifling and others as by no means inconsiderable, but opinions agree as to the fact. The natural desire of the manufacturer to retain his former ratio of profit adds another element to those which make for higher prices. Activity in business, here and in the, States; extending railway construction; large and increasing immigration; besides the natural increment of the population, all these are features which tend to confirm the view that lumber is likely to advance in price.

### THE FORESTRY CONGRESS.

The Forestry Congress held at Montreal this week will serve to fix public attention to the growth of trees in old settlements and treeless wastes and the preservation of existing forests. To the Congress, many members of the Forestry Association went. with a view of bringing about a union of the two bodies. This latter society was organized at Chicago in 1875, and from the

must comprise many who have a strong conviction of the necessity of tree planting in the almost treeless region of the Western prairies. The congress divided into three sections, and as there were sixty-one papers, some of considerable length, to read, this division of labor was necessary.

On the third day, Wednesday, the Congress concluded its business with the following practical recommendations: "1. The reservation of all pine and spruce lands unfit for settlement for lumbering purposes exclusively. 2. The prohibition of burning brush by settlers in the vicinity of fir trees during May, June, September and October. 3. The division of timbered country into districts, and the appointment of forest police under a Superintendent with magisterial powers, whose duty it shall be to detect and punish offenders, and provide for the extinguishing of fires. 4. The cost of maintenance of this protective force might partially be met by the imposition of a moderate tax on the parties owning or leasing timber lands." It is easy enough to legislate on this subject, but very difficult to enforce the laws. The arm of the law is feeble almost to paralysis in the depths of the forest. The reservation of all pine and spruce lands unfit for settlement is a judicious recommendation, and one which it would seem easy to carry out. But experience shows that this is not always so easy as it seems. The late Mr. Sandfield Macdonald had a strong impression that such a reservation was desirable in many parts of Muskoka; but though he was at the head of the Government, he was not able to make that view prevail. A clamor for free grant in the Muskoka district was raised, and so strong did it become that the Government was unable to resist. One member of the House, unmoved by the popular cry, declared, just as the bill was being passed, that if there were a place of future punishment, those who seduced, poor ignorant settlers into rocky and sterile regions, would suffer for their sin. There is no doubt that many a settler there is merely wasting his time in that region and preparing a heritage of poverty for his children. And it is scarcely less than criminal to entice ignorant men who desire to farm, into a region unfit for agriculture. There are many good spots in Muskoka; but a large proportion of the settlers had better have gone elsewhere.

But even a reservation of timber, on nonagricultural land, would be useless without some guarantee for its preservation from fire. The congress calls for legislation to prohibit farmers from starting bush fires in the months of May, June, September and October. This restriction it is, of course, desired to extend to agricultural districts, properly so called. To this the farmer might raise an objection. To him, the primeval forest is a plague and a hindrance; if he could not remove it, agriculture would be impossible, and the country must have remained a wilderness. It is desirable, of course, to interfere with the operations of clearing as little as is possible, consistent with the general safety; but the general safety must here be our guide. If this restriction were imposed, the result would be to add another reason to the sum of those

which inclines the preference of farmers for

It is admitted that such a law could not be carried out without the aid of a forest police force. Farmers would shrink from encountering this force, while the choice of location was still open to them; and when it was not, collisions, possibly disastrous, between farmers and forest police would occur. Valuable as our forests are, agricultural lands when denuded of the forest, are worth more than when clothed with it; not only it is desirable to preserve our timber, it is no less desirable to bring our rich forest lands under cultivation. What is wanted is a reasonable compromise between the two interested, if absolute reconciliation be impossible. And we fear the forestry congress has scarcely hit upon a practical compromise.

Tree-planting interests very large sections of country, the new north-west and the old settlements. The planting of forests en bloc is not the most desirable thing or the most likely to take place. There are many gaps in old settlements that would be the better for being filled: road-sides, spaces around the farmstead, bits of inferior land and other spots where shelter from the sun is desirable. On the naked prairie there are still more spots for planting, without attempting to create forests. The Western States have become alive to the necessity of planting and steps been taken to ensure it, including both premiums and penalties. In the north-west, where land is abundant and trees rare, there is no reason why plantations of several acres in extent should not be made. The selection of trees must first of all have reference to the climate, since a large tree, in its natural home, dwindles to a shrub farther north. The requirements of the section of country where the trees grow must be considered. If a rapid growth be of more importance than quality of wood, as it may be where shade is required, inferior trees which soon mature, must be preferred. But where it is possible to make a selection, this operation should be done with care. As a matter of course, the best timbered trees must recommend themselves, unless arbitrary selection or an indolent want of care about what is accepted, gain sway.

Our most valuable trees are black walnut, butternut and hickory. Limitations of climate must of course be taken into account: but most trees can be raised much further north than where they grownaturally. The English walnut, as we now call it, is a native of Arabia; and it is now found that the Canadian walnut, to which no writer has assigned a further natural growth than Cobourg, can be successfully grown in Quebec. Butternut grows naturally at least a hundred miles further north. Both these trees would, it is believed, succeed in the North West. But there is no excuse for Ontario farmers not growing them along their fences; and they might with equal preference grow hickory. Besides the wood of these trees, the nuts are valuable and would become more so if more generally

In our streets, we want more variety among the shade trees. The horse-chestnut and the maple, though good in their way, can here preefer no claim to monopoly. That variety of linden tree which is cultivated in Prussia, notably Berlin, has more perhaps than any Canadian tree to recommend it as a shade tree; and in Halifax, N. S., the fashion of growing it in the streets has been, we think very wisely set. In private grounds also, we want variety, and suffer much from not getting it. The tulip tree, which is seldom seen, and the leaf of which Ruskin excludes from the list of the beautiful, is nevertheless a fine tree with a fine flower, and it grows naturally sometimes—it is seldom met with in great numbers any where in Canada—a hundred miles north of Toronto. At least three of the southern magnolias will grow well, in favorable situations, in Toronto. While selecting the best trees for general growth, in the places where they will be of most use, let us not neglect variety.

### THE HARVEST.

After all, the English harvest is better than the average of the last few years, the best in three years. The home yield will be between ten and eleven millions of quarters, while the consumption is twenty-five million quarters, of eight bushels each. The acreage under wheat in France is over five times, in Russia ten, in Italy four, in Spain over three, in Austro-Hungary three, in Germany one and a half, in Turkey and Bulgaria twice as great as in England; but in none of these countries is the English average per acre-latterly fallen to twentyeight bushels-attained. The estimates of the United States wheat crop vary from 550,000,000 to 570,000,000 bushels. The English crop has decreased from 4,000,000 to 3,000,000 acres; and as the average cannot exceed 11,000,000 quarters, unless the area now annually planted with this crop be increased, and as this cannot suddenly occur to any great extent, the English deficiency which may be counted on, 14,000,000 quarters, is a known quantity.

In the supply there is not the same element of certainty, though that has perhaps a tendency to be an increasing quantity in view of the United States production and that of our own North-West. The competition is coming to be more and more among the sellers of wheat, while the buyer is surer of a supply at a moderate or decreasing price. The Canadian surplus, which may be expected rapidly to increase in the future, is not sufficient to make much impression on the world's market price. In future, this may cease to be true; for we are one day destined to be one of the great wheat-growing countries of the world.

-Like Winnipeg, the principal towns in Manitoba can boast of a fair share of trade. People in every department of business are very busy. This is especially true of Brandon. It has, probably, made more progress in the one year of its existence than any other place in Canada. The town is beautifully located on the sloping bank of the Assiniboine River. In a sanitary point of view, it ought to be one of the healthiest places in the province. There can be no difficulty in having a perfect system of drain-

to make the most of the situation. weeks ago they voted \$50,000 for street improvements; and this summ is to be expended as rapidly as possible. Some months since, a couple of our chartered banks located there, and already there are about twenty stores of various kinds, which supply goods to settlers sometimes two hundred miles distant. Of course it is not expected that people will long travel so far to get their hardware, groceries, etc.; other towns will spring up westward. Northward, already, are Rapid City and Minnedosa, neither more than thirty miles distant; both will secure a fair share of trade in that direction.

-In point of growth, while Portage La Prairie may not have made quite such rapid strides as Brandon, it has a remarkably substantial and finished appearance considering its age. It resembles an Ontario town in many respects. Miles of graded streets and broad sidewalks may be driven or walked over. It does not seem out of place to call it the garden city of the province. Already it appears to have accumulated some surplus capital, no less than three joint stock companies having been organized there by local men. The Milling Company will have its large elevator and flouring mill completed as soon as the growing crop is ready for grinding. The Biscuit Manufacturing Company has its building completed and the machinery is now being placed; no doubt it will be ready quite as soon as the milling company can supply it with flour for baking. The Knitting company has secured a site and is collecting the material for building. Buildings for the felt paper mill are ready for the machinery. Brickmakers expect a large demand for their product. There are no less than four brick yards, and in at least one of them steam-power is used for grinding the clay. While all these signs of substantial progress exist, one cannot but think that building lots are held at too high prices. Last spring's prices probably discounted the rates that may reasonably be expected for years to come. Lots a little east of the town, say half a mile, located in a low, wet marsh, were sold by speculators at prices varying from \$20 to \$50 a foot frontage. These will require several feet of earth to bring them up to the prairie level, which is there very flat and difficult to drain. If the purchasers were sane men, it is but fair to assume that they had not seen the property before buy-

-When the Pacific Railway is running regular trains from Thunder Bay, Emerson will practically cease, at least in the summer season, to be the gateway of the Province. The St. Paul, Minneapolis and Manitoba Railway, when completed from Fargo northward, on the west side of Red River, will also carry its freights past that town, connecting with the C. P. R., Winnipeg and Pembina Mountain branch road. In view of this prospect, the residents are making great efforts to get a line built northwest from there, a distance of eighteen miles, to connect with the Pembina Mountain branch also, with a view of drawing trade from the far west to the boundary line. At Emerson a good healthy business is age. Its residents, too, seem determined done by the principal shops. In addition to

this there is a saw mill, implement factory and a good lumber yard, largely, if not entirely, owned by a well-to-do Torontonian. There are also two bank agencies and a private bank. The curiosity of a stranger is somewhat excited here when he sees about sixty feet of a bridge, in a perfect condition, standing on the top of the highest bank, about thirty or forty feet above the water now in the river. He is told that it floated there, and it would seem is allowed to stand as a monument of the great freshet that flooded that part of the country last spring. No person would think it possible that the streets in that nice little town had been so recently covered with water to the depth of several feet. West Lynne is now reached by a floating bridge, which takes the place of the old one on the bank of the stream.

-At present the Southwestern Railway is built only as far as Carman, a distance of fifty miles from Winnipeg, and trains occasionally pass over it. But it is not known when it is to be extended beyond that point. It is stated that the delay is caused by the Dominion Government not locating the road and not making the promised grant of land to the Company. Thus far the line is of but little value, as it passes over a low, flat prairie which will not be cultivated for years to come. Beyond the present terminus the country is very much better, and along the proposed line a considerable acreage of grain was sown with the expectation of having the railway to carry the surplus grain to market. But in this expectation the farmers will be disappointed, and will not be able to turn their crops into money so readily as they expected.

### MANUFACTURERS' NOTES.

There are now employed regularly at the Knitting mill of Messrs. Ellis & Stokes at Port Dover, more than one hundred hands. The firm is adding new machinery to keep pace with an expanding business.

At Plattsville—which has two new wooden bridges besides one of iron—the flouring mills are doing a very active business. That of Messrs. Snider & Stickle is running night and day. It has besides the water-power, a forty-horse-power steam engine; there are now five sets of rollers and more of the new improved ones called the "Boston rollers" are about to be put in.

Messrs. Tew & Maishall are just now overhauling their flouring mills says the Woodstock Sentinel. They are putting in eight sets of rollers, and four new water wheels, "The Arcumeatian," manufactured by Goldie & McCulloch of Galt, and other new machinery.

A St. Thomas Manufacturing Co. has had an excellent season in Manitoba so far, having disposed of no less than 90 mowers. They intend shipping 300 sleighs to the Prairie Province for the winter trade

The Lindsay Post hears that an order for the construction of the new iron bridge for the Midland Railway has been given to the Toronto Bridge Company. The bridge will cross the river east of the town, and will form a part of the new arrangement connecting the Omemee and Wick links.

There were 27,275 tons of refined copper taken from the mines at Houghton, Keweenaw, Isle Royal and Ontonagon counties Michigan, during the year 1881. The Commissioner of

Mining Statistics places the total production of refined copper from the mines of Lake Superior ending with the year 1881, at 328,238 tons 1,370 home of the company will be in Chicago. Mr. pounds, representing a value of \$151,571,458.

The Lindsay Paper Mill Company is wanting a large quantity of rye, wheat, oat and barley straw, delivered at the mill. "Raw material" we presume.

The memorandum of association of the Moncton N. B. Knitting Company has been forwarded to Fredericton. About half the capital stock of \$30,000 has been subscribed, and among the names appended are good responsible men.

Joshua Adams' woollen mill in Sarvia operated by Mr. Totten has been bought by Mr. Ross, of Schomberg, Ont., formerly of Exeter, for \$6,000. The new proprietor comes into possession on the 1st of October.

The hub, spoke and bent stuff factory of Messrs. Vanstaden & Co. which was removed to Sarnia from Strathroy in February last, is stated to have doubled the extent of its out-put. It is also claimed that a great saving is effected from the advantageous position of Sarnia. One of the proprietors gives the Observer the following instance :-- "It costs, to carry 180,000 spokes from Leamington to Strathroy, by rail at \$4 per M. \$720.00, 180,000 spokes from Learnington to Sarnia by water \$225.00. Hence the direct saving on this one shipment is \$495. Their works comprise a two storey stone and brick building 105x30 feet, and a wing also of brick and stone 60x25 feet, besides the store houses blacksmith shop, and drying room. The principal market for their mannfactures is Montreal, but they dispose of large quantities in other places and contemplate breaking ground in the Northwest.

### BRITISH AMERICA ASSURANCE COMPANY

Since the publication of this journal began, fifteen years ago, its readers have been accustomed to find in our pages the annual report of this company, in the month of August. But this time they must postpone the pleasure until February next, the time authorized by Parliament, which is more convenient, as the resort is then made to the Government. However, as we do not publish the report, we will refer to some of the changes that have taken place in the affairs of the company during the year. It is generally known that a gradual change has been effected in the proprietorship, followed by an entire alteration in the policy and management of the company. Mr. John Morrison, who has taken an active part in the control and working of the company for more than a year, was, a few weeks ago, appointed Governor, in place of Mr. Peter Patterson, resigned. Mr. Morrison's policy has been to make a general reduction in the extent of the risk assumed on any particular property. And this policy the board has carried out. The company has also ceased underwriting in Europe.

Mr. Boult, manager, is now over there endeavoring to wind up that part of the business. The Governor thinks that he will find an abundance of territory on this side of the Atlantic, if proper exertions be made. In the United States, with about two exceptions, the general agency system has been abolished and "specials" are employed who are to report directly to the chief office here. These reports will be passed directly into the hands of Mr. Silas P. Wood, the newly appointed secretary who has earned a good reputation in connection with the Niagara Fire Insurance Company, and who must necessarily have a good general knowledge of the business across the border. Among the special agents employed are Mr. S. W. Eastman, who will report on the risks in

Eastern States, and Mr. Charles H. Hibbs for New York and Pennsylvania. The western home of the company will be in Chicago. Mr. Frank Van Voorhis will select the specials to do the work in the Western States. They will report directly to him. Some change will be made in Montreal as Mr. M. H. Gault has resigned his position as manager for the Province of Quebec, and at the end of the year will cease to have supervision down there. Good results are expected by the directors from these changes, in the shape of a much larger margin between income and expenditure.

### THE U. S. BANKERS' CONVENTION.

The annual bankers' convention is this week held at Saratoga. A number of papers were read, but while we write (Thursday) no conclusion of the proceedings has reached us. The President, Mr. Geo. L. Coe, of New York, read a paper in which he discussed the question, "What will be the basis upon which the currency of the country shall hereafter rest?" He pointed out that since the present system was established, as a war measure, the population has grown from 30 to 53 millions, and the wealth of the country has increased in proportion. But Mr. Coe does not appear to have answered the question he undertook to discuss. Mr. John Thompson, in a paper on "Our financial situation, and the dangers of the future," alluded to the great shrinkage in the price of stocks and the great decline of speculation within a year. According to him the outside public has ceased to buy on margin; and he thinks the danger of a financial revulsion has been removed. And he asks:

"Will it be averted for an indefinite period? I think there is no class of business men so prone to look intensely on the present and overlook the future as bank managers. For example, in the city of New York, the great money centre of the continent, we watch our Clearing House balances; if we are creditors we rush out to loan; if we are debtors we call in money; we watch our securities to see that they are good with a margin; if a customer fails, the discount clerk must inform us how much we are hit. We then groan over taxation and read the newspapers—the country prospers and we make dividends—our text is 'Sufficient for the day is Does it ever occur to the bank the evil thereof.' ing community that the political elements of this country are inflammable; that monopoly on one side is arrayed against strikes on the other; that hundreds of millions of wealth are accumulated by a dozen citizens against millions of restless, impecunious voters. Let us as a body resuess, impecunious voters. Let us as a body of bank managers, stockholders, and depositors look more at the political dangers that surround us while going through the daily routine of accounts and business. I repeat, 'the political elements of the country are inflamable.'"

Dr. Lyman Atwater desling with a similar

Dr. Lyman Atwater, dealing with a similar subject, says:

"We may not overlook the raids sometimes made on the currency and loanable funds of society generally by the Nimrods of speculation in stocks or commodities. It is not uncommon for these to adopt devices to screw up n artificial or fictitious stringency in the money market in order to force holders on borrowed means to sell low and to beguile others to make time sales low, after which the former will let loose the money they have clutched to swell prices and reap a corresponding harvest at the expense of their victims or dupes. Such are some of the causes which, acting singly or jointly, induce an undue contraction of available currency and call for a proportionate elasticity, so far as practicable, to make good the deficit."

Mr. Atwater advocates the dangerous scheme of making silver a legal tender equally with gold; the effect of which would, of course, be to banish all the gold, the dearer currency, from the the country.

On the question of savings' banks deposits, Mr. R. M. Nelson made some suggestions worthy of consideration:

"In order to avoid, as far as possible, all

temptation to do more than one's duty, as trustee, or to manifiest special financial skill, or to make the earning of interest paramount to absolute safety, I would adopt certain rules. deposits, which do not come from savings, but which are the capital of persons who have acquired wealth, should be rejected. They can invest their own funds, and they are likely to withdraw their deposits suddenly and in large sums."

On some points of common interest agreement is pretty sure to be come to.

### Correspondence.

### CEREALS AND FLESH FOODS.

To the Editor of the Monetary Times.

Your correspondent—READER, in endeavoring to reach the bottom of the principle of domestic economy, strikes wide of the mark, inadvocating that people should eat only the products directly from the earth. It is quite true, that that system would require a smaller space of the earth's surface to support a given number of people, but the surface of the earth is quite large enough to furnish all its present inhabitants with the kind of food they now eat. Meat, milk, eggs &c. are only cereals, fruit and vegetables passed through an additional process, the waste being thrown back to the earth and the essence used as food. There is no doubt that a variety is good for human beings, and why should the variety not be in kind as well as in degree? Exceptional cases of better health may be quoted Vegetarians, which may arise from other causes, such as greater care or regularity, but the people of nations whose diet is wholly or chiefly vegetables are inferior, mentally and physically to those who use partially, animal

If we except the Bible as of Divine origin, it shows the will of a Superior Being that man should eat animal food, for there is not only the permission, but the direction as to what animals should be eaten. Or if we accept the Bible as only a guide for moral and physical development (and no one can deny its wisdom in that respect) then we have still a good authority for continu-ing the use of animal food.

It may be stated that entirely vegetable food is preferred, is in fact a necessity to certain animals to maintain their existence, but on the other hand, animal food is absolutely neces for other species to live and perpetuate their kind.

While directing attention to the preparation of vegetable matter in better form and greater variety may do much good, the advocacy of vegetarian diet exclusively, is sure to be abortive.

If we were to pursue the economical aspect to its logical conclusion, and discard all endeavor 115 logical conclusion, and discard an education to please ourselves or others, and merely maintain an existence, our clothes, houses, ships, railroads, pictures, and ornaments are useless, for we could have huts or caves to live in, and cloth without shape or pattern to protect us from the elements.

COMMON SENSE.

### O-U-GH!

To the Editor of The Monetary Times:

You made hwat apears to me a good point in You made awat apears to me a good point in your last week's issue, hwen, in refering to my method of "speling as I speek;" you sed I shoud, to be consistent, alter the last silable of my name to "ow," or "off." I am glad to find you so ardent an advocate of fonetik speling. You ar, indeed, more radical than the most radical fonologists,—for the fonetic reformers do not advocate any changes in the speling of proper names—persons and places—until the fonetic method prevails in ordinary words. This, I fear wil be the somehwat distant future; and hence I do not see hwy I shoud be cald upon to sacrifise hwat mice be termed my "euphonious queue" before people with simpler names, make the more practical chanjes askt by speling re-

I am wiling, however, to make the alteration you sujjest, on this one condition: that you, or some other etimolojist, wil tel me hwat shoud be the new ending of the name aforesed. This is a fair condishun, for you, as an etimologist, claim to be able to define, from the speling of a word, its derivation, meaning, and pronunciashun. Now take this word: "Ben-gough." The first The first

silable we may pas; but hwat shal we do with the second? Shall we make it go-off,—or gow, like plough,—or go—(long), like though,—or guf, like nough,—or go—[long), like though,—or guf, like tough,—or goo, like slough,—(pronounct like slew),—or the Sootch sound of enough, (eneuch.)

The speling, you see, must accord with the sound, or it wil not be fonetic; but hwat is the sound? I confes I don't kno hwat it shoud be. I pronounce it like Ben-goff; but others—hoo ar etimologists, and therefore, perhaps, beter judjes, call it Ben-goo, and Bing-gee, and Pink-

I have given you a hard conundrum, but you mustn't blame me for a natural anxiety to hav mustn't blame me for a natural anxiety to hav the opinion of an editorial etimologist on this variable name I am forst to cal my own. I hav heard of a man named "Ough." It is sed he is cald simply Mr. "O." This is simple enuf, surely, but you mustn't folo this rule in deciding on my name, or I wil confront you with another and a biger man cald John B. Goff, hoo spels his name precisely like Mr. O., merely prefixing a hard "G."

In anxious suspens, I remain, your sufering reeder, THOS. BENGOUGH. TOBONTO, Aug. 22, 1882.

[Perhaps amongst our numerous readers there is some person, in the capacity of Etymologist qualified to speak on this matter. We lay no claim to the title which Mr. Bengough bestows upon us. Seriously speaking, we are of opinion that the owner of the name is the only proper authority for its pronunciation. If Mr. Bengough calls it "Bengoff," this should be regarded as the accredited pronunciation. Some ill informed persons would address the talented ex-principal of Upper Canada College as Mr. Cock-burn whereas that gentleman is known only as Mr. Coburn (his own pronunciation); of course if Mr. Bengough's brother George, prefers "Binggee," and the cartoonist Mr. J. W., for euphony would much rather have it " Pink eye," why then the family must fight it out amongst themselves and establish an authentic pronunciation. However we presume that "Bengoff" is their unanimous choice, and "Bengoff let it be. How would it do to submit the subject to the coming convention for discussion? ]

## ATTEMPT TO DEFRAUD A LIFE INSURANCE COMPANY.

The South Australian newspapers for April contain reports of the trials in progress that month of a number of persons most of them of excellent position in the community, charged with banding together to swindle co tralian life insurance companies. The accused were James Barker, a confidential and trusted agent of the leading company of the country, the Australian Mutual Provident, Drs Morrison and Horton, reputable medical practitioners, William Hicks, medical student, William Forsyth, described as an "agent" and one Otto Aloys Du Barry. The original conspirators were Barker, Horton, Hicks and Forsyth. They formed them elves into a regular association to rob the insurance companies. Each contributed an equal sum for expenses, each had his particular part in the game to play, and collectively they had regular meetings, which they faceti-ously termed "board meetings," at which they arranged for matters as they progressed. The scene of their operations was first at Adelaide, but it was subsequently changed to Melbourne. They began by procuring insurance on the life of David Weatherhead for £3,000 in the Australian Mutual Provident, of Sydney, £5,000 in the Australian Alliance, of Melbourne, and £1,000 in the Colonial Mutual, of Melbourne. Weatherhead was an invalid in the last stages of con-sumption. He was so weak that "he could not get in or out of a cab without assistance." "He could not walk or stand and had to be washed and dressed by others." Besides this he was a person in destitute circumstances, having been luced to that condition by continued ailment. For a considerable period, when actually out of hospital, he was supported by the conspirators. "His clothes were shabby and he had a new rig out, which was paid for by Barker."

Weatherhead for six years, that his health was good, and that he was a fit subject for insurance. Another "friend" was induced to certify was induced to certify the same The conspirators, after having obtained the policies, were careful to keep the dying man out of sight. He was secretly removed to Melbourne. The plan was to ship him to England. Hicks taking charge of him. It was expected that he would die on the voyage, and

pected that he would die on the voyage, and that the captain could be bribed for £100 to certify that he had died of dysentery. He was not however able to leave his bed at Melbourne and finally died, watched by Hicks, four months after the insurances had been effected.

The glad tidings were telegraphed by Hicks to his fellow conspirators. They wired funds for the burial expences and there were a good many telegrams that passed between all the parties. A conference was held at Melbourne, and steps taken to obtain the first policy money from the taken to obtain the first policy money from the Australian Mutual Provident. Declarations as to the identity of Weatherhead, with the necessary medical and legal certificates were duly prepared. Forsyth, as the assignee of the policy applied for payment. To his astonishment, he met with a refusal. Suspecting instantly that the scheme had miscarried, he had just time to make his escape to parts unknown. Barker and Hicks and Drs. Horton and Morrison were arrested. Hicks betrayed his fellows by turning "Queen's evidence," and the remaining rascals were brought to trial at Adelside on April 18.

The most extraordinary thing about this The most extraordinary thing about this "Romance of Crime," as the Australian newspapers call it, is the way the wickedness was found out. After the death of Weatherhead, while the telegraphing was going on vigorously and hilariously among the conspirators, Hicks carelessly threw the telegrams he had received the floor of his lodgings. In one of these upon the floor of his lodgings. In one of these tell-tale despatches he was advised by Barker, as a matter of security, to seek other quarters. as a matter of security, to seek other quarters.

An inquisitive landlady, one Mrs. Littlewood, gathering the litter for removal, first satisfied her natural curiosity by examining it. Her indignation was excited by the prospect of losing her lodger. She at once suspected that one who could be so base as to contemplate such a course must be up to some mischief. She put the telegraphic matter together wormed out the secret from it, took it to Mr. Main, the manager of the Melbourne branch of the Australian Mutual, and placed it in his possession, first stipulating, ingenious old soul, that she should have £50 reward for her services.

Trials were had of each of the three cases in the supreme court at Adelaide, before Justice Boucaut, beginning April 18 and ending April 28. Hicks was the chief witness against the con-spirators, but there was much corroborative testimony. Forsyth did not appear. DuBarry was discharged. Dr. Morrison was found guilty but recommended to mercy. Dr. Horton and but recommended to mercy. Dr. Horton and Barker were found guilty. Before sentence was pronounced, Barker asked for leniency on account of his family. He said that he had been drawn into the matter by Hicks and thought that he He said that he had been drawn was doing no harm as long as the doctors passed was doing no narm as long as the docute passes, the applicant. Dr. Horton said he had thrown Hicks out of a window for making a rassally proposal to him and Hicks had sworn his ruin. Dr. Morrison said that he was entirely innocent. The conclusion of the varied and exciting drama was as follows:

was as follows:

His honor, addressing Barker, commented upon the enormity of the offence of which he had been found guilty. The jury could not have arrived at any other decision in regard to him. His sentence would be two years hard labor, cumulative on each offence. As to Horton his Honor said he had no doubt as to the propriety of the jury's decision. He had degraded a great and noble profession, and his punishment would be two years had 'labor. The recommendation to mercy would have weight with him in More. to mercy would have weight with him in Morto mercy would have weight with him in Morrison's case. He had been prompted by a most wicked man. His sentence would be twelve months hard labor. The prisoners on receiving sentence were painfully affected.

—To show what kind of pay the "working man" can earn in Winnipeg, we give below the statement of the Free Press as to the current rates of wages per day in that city: Carpenters, \$2.50 to \$3.00; bricklayers, \$3.00 to \$4.00; stonecutters, \$4.00 to \$5.00; machinists, moulders, \$3.50; shoemakers, \$2.50 to \$3.00; blacksmiths, \$3.00; tailors, \$2.50 to \$3.00; cooks, per month, \$25.00 to \$30.00; general servants, per month, \$20.00; farm laborers (with board) per month, \$40.00: railway laborers, per It was this person who signed the application for insurance. Dr. Horton gave the medical certificate of physical soundness. Barker, as agent, made a report that he had known

That the advance of civilization and the growth of enlightened ideas involve an increase in the cost of living there are abundant evidences The augmented tastes, desires and employments, which make us so different from our forefathers, entail an expense that has to be met by all but the lowest grade of people. Increase of income, mental or monetary, is followed by a superior style of living. The artisan promoted to a foremanship leaves a poor dwelling for a better; the foreman risen to a successful employer goes into a higher social region. So leverage of thrift, ascends en masse in the seale. It is much the same in all civilized nations. The luxuries of yesterday have become the necessaries of to-day, and hence the increased cost of living. Chamber's Journal recently had an instructive and interesting article on the subject. It says:—"While wasteful ostentation is disappearing among participated. an instructive and interesting article on the subject. It says:—"While wasteful ostentation is disappearing among particians, and millionaires are rebuked for thrusting their metallic superiority under our noses, the toilers of the field, the forge, and the factory are compelled to live in a style never known to the sons of toil before. Dignity needs substance for its manifestation; thus the workman demands wages adequate to his exalted sphere. House rents increase, food it dearer, education is a growing tax, amusements and holidays dip deeper into our pockets. Limited income frequently means unlimited anxiety in making both ends meet. The pressure of obdurate circumstances compels further economy, or further cumstances compels further economy, or further efforts to increase income, and whichever mode of relief is sought, the result is to augment capital."

—The cigar-making industry is reported to be increasing steadily in the Metropolis. During the past seven months 441,236,000 cigars were made here, being an excess of over 45,000 000 over the product of the same period in 1881. There were also manufactured 207,000,000 cigarettes, and 3,261,000 pounds of smoking and chewing tobacco and snuff. This increased activity of the manufacturers was attained moreover, under the rather anomalous accom-paniment of a languishing seed-leaf trade in all excepting the Havana and Sumatra seed-leaf. During the year ending June last the tobacco imports aggregated 775,000 pounds, as against 350,000 in 1881. The exportation of American tobacco has been in marked contrast to the importation of foreign leaf, however. It is found that the American product cannot successfully compete with that grown in Brazil, Sumatra, and other Eastern localities, and can be exported. at low prices only. The crop prospects of the at low prices only. The crop prospects of the American plant, moreover, are not particularly promising, and it is predicted by a commercial journal that the yield outside of New York, Ohio, and Wisconsin will be much below the average crop. The tobacco revenue receipts for the year amounted to \$47,391,988. Tax was Tax was paid on 3,040,975,395 cigars, 553,401,828 cigarettes, 156,458,033 pounds of smoking and chewing tobacco, and 4,867,568 pounds of snuff. Cigarettes were the only products which did not pay an increase in tax money .- N. Y. Times.

An incident, related to illustrate the simple honesty of the natives of a sister State, who are represented as being people whose promise may always be relied upon, is as follows: "In the rural portion of the State referred to there is a

man who is an acknowledged leader of politics in his district, and among his followers is a man who had considerable influence with the bummer element. The first mentioned man has, among other worldly goods, quite a number of hogs, and the other fellow used to shoot one of the and the other fellow used to shoot one of the porkers whenever he wanted some meat, because it was easier to supply bacon this way than to hustle for it. The boss politician knew full well who it was that was killing his pigs, but, not wishing to lose the support of the fellow, he never prosecuted him The thing got so monotonous, however, that something had to be done onous, however, that something had to be done to stop the slaughter; so one day the boss said to the offender: 'Say, look here. I want you to quit shooting my pigs. I desire to allow them to grow to a proper size before they are killed, and I want to kill them myself. If you will give me your word that you'll not shoot any more of them, I'll agree to give you 500 pounds of pork a year. What do you say? Is it a bargain?' 'All right replied the other; 'I give you my word that I'll not kill any more of your swine on the terms you propose; but—'after a pause, 'I'll lose pork by it.'"—Cincinnati Enquirer.

—An Illinois merchant who was taking baking powder in bulk from a Chicago firm, called at headquarters the other day to say that there was something wrong with the goods.

"I don't think so," was the reply; "we make the heat article sold in the west."

"I don't think so," was the reply; "we make the best article sold in the west,"
"I think we ought to have a more perfect understanding, continued the dealer. "Now, then, you adulterate before you send to me, then I adulterate before I ship, then the retailer adulterates before he sells, and the consumer can't be blamed for growling. I wanted to see if we couldn't agree on some schedule to be followed."
"What do you mean?"

"Why, suppose you put in ten per cent. of chalk, then I put in twenty per cent of whiting then the retailer puts in thirty per cent. of flour gives the consumer forty per cent. of baking powder, and unless he's a born hog he'll be perfectly satisfied. You see if you adulterate 50 per cent on the start, and I adulterate as much more and the retailer adulterates as much as both together, it's mighty hard for the consumer to tell whether he's investing in baking powder or putty, we must give him something for his money, if it's only chalk."—Exchange.

-There was once four flies, and, as it happened they were hungry one morning. The first settled on a sausage of singularly appetizing ap-petizing appearance, and made a hearty meal, petizing appearance, and made a nearly mean, but soon died of intestinal inflammation, for the sausage was adulterated with aniline. The second fly breakfasted upon flour, and forthwith succumbed to contraction of the stomach, owing succumbed to contraction of the stomach, owing to the inordinate quantity of alum with which the flour had been adulterated. The third fly was slaking his thirst with the contents of the milk jug, when violent cramps suddenly convulsed his frame, and he soon gave up the ghost, a victim to chalk adulteration. Seeing this, the fourth fly muttering to himself, "The sconer it's over the sooner to sleep," alighted upon a moistened sheet of proper exhibiting the counterfeit presentment of a death's head, and the inscription "fly poison." Applying the tip of his proboscis to the device, the fourth fly drank to his heart's content, growing more vigorous and his heart's content, growing more vigorous and cheerful at every mouthful, although expectant of his end. But he did not die. On the contrary, he throve and waxed fat. You see, even the fly poison was adulterated.—German attris.

The Canadian Fruit Export Company, capital \$100,000, has now been completely or capital \$100,000, has now been completely organized, and is ready to set to work. At a meeting of directors, Mr. E. K. Greene was elected president, Mr. D. T. Irish, of the Express Company, Vice-President, and Mr. J. N. Greenshield, secretary-treasurer. Mr. G. A. Cochrane was appointed business manager, and the President, Vice President, and Mr. T. Craig, of the Exchange Bank, were named an executive committee to draft, by laws, which has since been done. The object of the Company, which holds the patents of Mr. Cochrane's two fruit savers, is to transport to the European markets our softer fruits, such as peaches and Fameuse apples, in boxes which allow the free circulation of air round each single fruit. Some Fameuse apples which had been kept two years by this process were turned out in first-rate condition the other day.

Cannington merchants and their clerks amuse themselves during the dull times practising

### Commercial.

#### MONTREAL MARKETS.

Montreal, 22nd August, 1882.
There has been very little activity in the wholesale markets during the past week, but there has been a fair jobbing demand in most lines. Bright sugars have been in fair request, deal of Halifax has changed hands, but prices if anything favor buyers. Opium and Quinine have advanced in price; and the advance in Green Hides has been the cause of stiffening Leather, as also the extra demand for that article in the English market to which large ship-ments are being made weekly, and realizing better prices than here. The weather is splendid for harvest operations. The city is filled with visitors to the Forestry and Science Associations now in congress here

ASHES.—Pots.—There have been fair sales of this kind of ash during the week at prices ranging from \$5 up at \$5.05 and 5.12\frac{1}{3}, the market closes steady at these prices. Pearls.—There has been no movement of pearls since early last week when a sale was made at \$7.50 which is still the nominal price. Receipts of ashes during the week were Pots 121 brls; Pearls 23 brls; deliveries for same time Pots 116 brls;

Pearls 43 bris.

BOOTS AND SHOES.—No change since last report. Travellers have now nearly all returned home, and the volume of Business done is satishome, and the volume of Business done is satisfactory. No change in prices at present, we quote as under. Men's Thick Boots wax \$2.50 to \$2.35; do split do \$2.00 to \$2.25; do Kip Boots \$2.50 to \$3.25; do Calf Boots, pegged, \$3.75; do Kip Brogans \$1.35 to \$1.40; do split do \$1.00 to 1.10; do Buff Congress \$2.10 to \$2.25; do Buff and Pebbled Bals, \$2.00 to \$2.40; do split do \$1.50 to \$1.75; Shoe Packs \$1.10 to \$2.10; Women's Peb. and Buff Bals. \$1.15 to \$1.50; do split Ba's. \$5c to \$1.10; do Prunella Bals. \$5c to \$1.60; do Congress \$5c to \$1.60; do Buskins, do fine 80c; Misses' Peb. and Buff Bals. \$1.00 to 1.15; do split Bals. \$6c to \$1.00; do Prunella Bals. \$1.00 to 1.15; do split Bals. \$6c to \$1.00; do Prunella Bals. \$1.00 to 1.15; do split Bals. \$6c to \$1.00; do Prunella Bals. \$1.00 to 1.15; do split Bals. \$6c to \$1.00; do split Bals. \$7\frac{1}{2}c; do Prunella Bals. \$6c to \$1.00; do split Bals. \$7\frac{1}{2}c; do Prunella Bals. \$6c to \$1.00; do split Bals. \$7\frac{1}{2}c; do Prunella Bals. \$6c to \$1.00; do split Bals. \$7\frac{1}{2}c; do Prunella Bals. \$6c to \$1.00; do split Bals. \$7\frac{1}{2}c; do Prunella Bals. \$6c to \$1.00; do split Bals. \$7\frac{1}{2}c; do Prunella Bals. \$6c to \$1.00; do split Bals. \$7\frac{1}{2}c; do Prunella Bals. \$6c to \$1.00; do split Bals. \$6c

neavy enemicals in England are said to be weil silled up with orders and the market there rather firmer; in this market the trade has not been large for these goods and prices are unchanged. In drugs a fair jobbing business for the season has been experienced, while we note an advance in quinine and opium. We now quote as under—Bi Crab Soda, \$2 90 to \$3.00; S·da Ash, \$1.50 to 2 50 for high test. Bi-Chromate of Potash, per 100 lbs., \$12.50 to \$14.00; Borax, refined, 17 to 20c; Cream Tartar Crystals, 29½ to 31c; do., ground, 31½ to 33c; Caustic Soda, white, \$2.25 to \$2.40; Sugar of Lead, 12½ to 13c; Bleaching Powder, \$1.55 to 1.75; Alum, \$1.80 to \$2.00 Copperus, per 100 lbs, \$1.00 to \$1.25, nominal; Flowers Sulphur, \$2.75 to \$3.00; Roll Sulphur, \$2.12½ to \$2.25; Epsom Salts, \$1.25 to \$1.40; Sal Soda, \$1 to \$1.20; Saltpetre, \$10 to \$11; Sulphate of Copper, \$5.25 to \$5.75; Quinine, \$2.75 to \$3.00; Shellac, 35 to 45c; Castor Oil, 10 to 11c.; Gum arabic Sorts, 20 to 22c.; ditto White Gum, 25 to 40c.

Dry Goods.—Our wholesale dealers have had a criter work than the last reported. filled up with orders and the market there rather

DRY GOODS.—Our wholesale dealers have had a quieter week than the last reported. Buyers e not been very numerous in the city, but have not been very numerous in the cuty, but no doubt with so many public meetings in which a great number of country merchants are interested, they will take this opportunity of being here and at the same time make purchases. The harvest seems now to be pretty well assured and as many buyers are in the habit of putting of huming till the wearlies of the harvest are here. buying till the results of the harvest are known we may expect a busy time for a few weeks to come. Retail merchants here have been fairly busy. Money is coming in on the whole quite

busy. Money is coming in on the whole quite equal to the average at this season.

Fish.—There is very little fish coming in yet but there is a fair demand for dry cod at 5½ to 5½c. Herrings are still in very limited supply, sales are reported at 5½ to 5½c.

Furs.—Full reports of the Leipsic sales have

russ.—Full reports of the Leipsic sales nave not yet been received, and there is nothing in our local market worthy of note.

Freights.—Market dull and rates have a downward tendency, and engagements have been made at lower figures than during the previous week. We now quote grain to London, Bristol, Liverpool and Glasgow, 3/6 to 4/8. Other rates are unchanged.

FLOUR.—Receipts during the past week, 9637 brls. Total receipts from 1st January to date, 473,044 brls., showing a decrease of 18,232 brls.

on the receipts for the same period of 1881. Shipments during the week, 18,232 brls.; total shipments from 1st January to date, 379,0089 brls., being an increase of 46,780 brls. on the shipments for the same period of 1881. The market has been quiet and unsettled so that it has not been easy to fix quotations—the tendency on the part of holders has been to make concessions to induce sales. Yesterday the market was, if anything, stronger and closes to day fairly active at steady prices, which are market was, it anything, stronger and closes to day fairly active at steady prices, which are much the same as a week ago. We quote: S. Extra, \$6.05 to \$6.10; Extra Superfine, \$5.70 to \$0.00; Fancy, 5.60 \$5.65 nominal; Spring Extra, \$5.60 to 5.65; Strong Bakers' Flour, American, \$7.50 to 8.00; do, Canadian, \$6.50 to 6.75; Superfine, \$5.00 to 5.10; Fine. \$4.00 to 4.25 Middlings, \$3.80 to 4.00; Pollards, \$3.50 to 3.75; Ontario Bags, medium, \$2.80 to 2.85; do. do., Spring extra, \$2.70 to 2.80; do. do. Superfine, \$2.50 to \$0.00; City Bags, delivered, \$3.50 to 3.60; Oatmeal, \$5.65 to 5.75 for Ontario; Cornmeal, 4.25.

Grain.— Wheat—Receipts for the past week, \$2.95 for high; total receipts for the past week,

382,667 bush.; total receipts from 1st January to date, 3,930,612 bush.; being an increase of 395,674 bush. on the receipts for the same period of 1881. Shipments during the week, 326,217 bush.; total shipments from 1st January to date, 2,811,694 bush.; being a decrease of 367,373 bush. on the shipments for the same period of 1881. The market is dell and inactive, and only a few small lots changing hands. For Canada white winter holders are asking \$1.18, on the spot. We quote \$1.16 to 1.18; Canada Red winter \$1.30 to 1.35; and Canada spring \$1.20 to 1.25 Maize nothing doing, quoted nominally 90c. in bond. Peas are worth from 92c. to 93c. per bush. Oats in round lots are placed at 47c. to 48c.; and in a retail way nothing can be had under 50c. Rue is quoted at 72c, but we have

to 480.; and it a retail way nothing can be had under 50c. Rye is quoted at 72c., but we hear of no sales. Barley is nominal.

GROCERIES.—Teas—The chief run is still on the finer grades of Japan, which are scarce. Medium grades are taken at 37½ to 40c.; and low grades at 14 to 20c. There is also a scarcity of this grade; the amount of business done has been small. Coffee is form but haviness in city of this grade; the amount of business done has been small. Coffee is firm, but business is of a jobbing nature, and chiefly to the local trade. Mocha is firm at late quotations. Java, as to quality, has been selling at 16 to 26c.; Maracaibo, 11 to 16c.; Jamaica, 18 to 12c. Sugar—There has been a brisk demand for bright sugars, and indeed, has been greater than the transport and in songeonence a good deal of turn-out; and in consequence, a good deal of Halifax has been selling in this market, which is apparently wanted in the west. We quote granulated 9½ to 9§c.; and Grocers A 8½ to 9c.; Yellow, 7 to 8§c. The market for Raw Sugar has low, 7 to 88c. been steady, and small lots have been changing hands at 7½ to 7½c. Molasses are in small supply, and Barbadoes is held for 53c.; being an advance on last week's price; and a lot to arrive has been placed at 52½c.; other kinds are firm as last quoted. Syrups are in active demand at 60 to 70c.; being an advance of from 3 to 5c. since last week. Rice—A good business doing at \$3.50 to 3 75; it is as much as the mill can do to meet the demand Spices are very firm, and meet with a good deal of enquiry. We quote Black Pepper at 16 to 16½c.; a round lot, however, changed hands a shade under our inside quotation. White Pepper is firmer, and now worth from 25 to 26c. No change to note in any other kind of spice. Fruit—We have no new fruit in the market yet: there have been sales of currants at 6 to 6½; Eleme Raisins which are taking the place of Valencias are selling at 8 to 10c.; very little fruit now in first hands.

Hides.—Last week after our report was sent

off Butchers' Green Hides advanced 50c. all round, but to-day the advance has been lost and quotations are again \$9, \$8 and \$7 for Nos. 1, 2 and 3 respectively. Lambskins, 45 to 70c.

HARDWARE.—Business in Pig Iron has been quiet, prices are maintained but stocks are low, but at our quotations holders are firm. Tin Plates are very firm at quotations. A good many Canada Plates have changed hands at ather under our grotations. rather under our quotations, Ingot Tin and Copper in limited demand. The general feeling is one of confidence in the market and a strong is one of confidence in the market and a strong upward tendency prevails. We quote:—

Pig Iron, per ton, Coltness, \$23.50 to 24.00:

Siemens, \$23.00 to 23.50 Gartsherrie, \$22.50

\$23.00: Summerlee, \$22.00 to \$23.00;

Langloan, \$22.50 to \$23.00; Eglinton, \$20.50 to \$21.00;

Carnbroe, \$00.00 to 20.50; Hematite, \$27.00 to 28.00. Bars, per 100 lbs, Scotch and Staffordshire, \$2.00; Swedes, \$4.00 to \$4.25: Norway, \$5.00 to \$5.25; Lowmoor and Bowling \$6.25 to 6.50. Canada Plates per box, Glamorgan and Budd, \$3.25 to 8.30;

(none in market). Penn, \$3.15 to 3.25; Hatton, \$3.00 to 3.10; Thistle and Clifton, \$3.15 to 3.25; Tin Plates, per box, Charcoal IC, \$5.25 to 5.50; Charcoal IX, \$7.00 to coal IC, \$5.25 to 5.50; Charcoal IX, \$7.00 to \$7.25; ditto, DC. \$4.75 to 5.00; ditto, DX., \$6.50; to 6.75; Coke IC., \$4.35 to 4.50. Galvanized Sheets, 7 to 7½c; Tinned Sheets. No. 26. Charcoal, 10 to 10½c; ditto Coke No. 24, 8½ to 9; Hoops and Bands, per 100 lbs., \$2.50 to \$2.60; sheets best brands \$2.75 to \$3.00; Boiler Plate per 100 lbs. Staffordshire \$2.75 to 3.00; Russian Sheet Iron 12½ to 13c. Lead per 100 lbs:—Pig \$4.30 to \$4.40; Sheet \$5.50; Bar \$5.00 to \$5.50; Shot do \$6 to \$6.50 Steel, cast 11½ to 12c; Spring \$3.25 to \$3.50; Tire, \$3.50 to \$3.75: Sleugh Shoe, \$3.00 to \$3.25. Ingot Tin 25 to 26c.; Bar Tin 26 to 27c.: Ingot Copper 18½ to 19½c; Sheet Zinc \$5.50 to \$5.60; Spelter \$5 to \$5.25. Horse Shoes, \$3.90 to \$4.00. Glass, boxes 50 ft. up to 25 in. \$2.00, 26 in. to 40 in. \$2.10; 41in. to 50in. \$7.00 to \$2.00, 26 in. to 40 in. \$2.10; 41in. to 50in. \$2.35; 51in to 60in. \$2.50.

LEATHER. -A rather firmer tone prevails in the market the past few days in consequence of the advance in Hides and tanning material as well as the improved market for our goods in England. Stocks are still very large in some England. Stocks are still very large in some descriptions of goods, though liberal shipments to Europe are tending to reduce the surplus. Holders of best B.A. Sole are very firm at outide quotations, while ordinary and inferior Sole are quiet and unchanged. Upper and Splits are now firmly held, as late sales in England have now nrmly held, as late sales in England have been more satisfactory than the rates lately ruling here. Good Heavy Harness is wanted and commands full rates. We quote: Hemlock Spanish Sole BA. 25 to 26½c; do, No. 2 BA. 22 to 23c.; No. 1 Ordinary Spanish, 25 to 26c; No. 2 ditto 22 to 22½c; Buffalo Sole. No. 21 21 to 23c; ditto, No. 2, 19 to 21c; Hemlock Spanish, No. 2 1 21 to 23c; ditto, No. 2, 19 to 21c; Hemlock 21 to 23c; ditto, No. 2, 19 to 21c; Hemlock slaughter, No. 1, 26 to 28c; Waved Upper, light and medium, 32½ to 37c; ditto ditto, heavy, 32 to 34c. Grained, 32 to 36c. Splits, large 21 to 28c; ditto, small, 16 to 22c. Calfskins (35 to 40 lbs) 65 to 75c.; ditto (25 to 34 lbs) 60 to 70c; Sheepskin Linings, 25 to 50c; Harness, 26 to 34c. Buffed Cow, 13 to 16c. Enamelled Cow, 15 to 16c. Patent Cow, 15 to 16c. Pebble Cow, 11 to 15c; Rough, 22 to 27c.

OILS.—There is a rather better enquiry for cod oil and some large parcels have changed

cod oil and some large parcels have The fish oil market is firm with ligh. hands. nands. The fish oil market is firm with ligh. stocks and fair demand. We quote Cod oil A. Newfoundland 60 to 62½c.; Halifax 57½c. Seal.—There is no change to note on pale or straw, steam refined is firm at 72½c. Petroleum.—There is no change in this del artment of trade, the enquiry is improving and likely to continue so from this one. likely to continue so from this out. Prices keep very steady, car lots 18½ to 18½c; broken lots 19 to 19½c; single barrels 20 to 21c; but there has been very little doing in round lots. Linseed Oil is steady at 70 to 72c. for raw, and 73 to 74c. for boiled, but these figures would be shaded for a round lot.

Provisions .- Butter .- Receipts for the week week 947 pkgs; shipments 1,347 pkgs, no improvement is noticeable, the demand keeping provement is noticeable, the demand keeping very light, we quote Creamery 20½ to 21½c.; Eastern Townships, 19 to 20c; Morrisburg and Brockville 18 to 19c.; Western 15 to 16½c. Cherse.—Receipts 27,701 boxes; shipments 32,594 boxes market quiet and steady, holders apparently more willing to sell. We quote for fine to finest 10½ to 11c. Pork.—Market is dull, prices well maintained. Canada short cut \$26.00, Western mess, \$24.50 to 25.00 Lard is firm at 15½ to 15½c. Hams.—Canvassed 16½ to 17c; Bacon 13 to 14c.; Eggs.—The demand is much easier, buyers have operated largely at 20c but easier, buyers have operated largely at 20c but holders are now asking 21c.

SALT.—There is a good movement in salt, imports are not heavy, and stocks are not accumulating. Freights are a little easier. We now quote Coarse 62½ to 67½c.; and Factory filled, \$1.40 to 1.45.

Wool.-The business done in Foreign wool has been limited. Sales of Greasy Cape are reported at 17½ to 19c.; Australian has also changed hands from 23 to 32c. For Domestic wool there is very little inquiry, and transactions are so few and far between that there are no fixed prices, and it may be considered as quite

MANUFACTURERS OF Platform and Counter Scales of every description. HAMILTON, ONT.

quiet. Provisions are steady, and groceries have been fairly active in the country business for the season. Next month seems likely to bring considerable improvement, for a fairly good crop is now assured, and sales to the ccuntry have not for some time been very brisk. It is true, however, that money seems somewhat inclined to harden, but this it may fairly be hoped will not amount to any serious obstruction; and with payments to good as they have been of late, there seems little reason to fear that any serious result would ensue from any probable advance.

CATTLE.—Receipts have been very small indeed, and the tendency of prices has been upwards, closing at a rise of about 25c.; but as the shipping demand has been very slack it is the shipping demand has been very slack it is by no means certain that this will be maintained. Extra choice beeves for export have stood at \$6.00 to 6.25; fair to good at \$5.25 to 5.50; common at \$4.00 to 4.25, and inferior at \$3.00 to 3.50. Calves—Picked, averaging not under 100 lbs. have been steady at \$6.00 to 8.00; and Sheep have been in good demand and firm; heavy weights for shipment have been worth \$5.00, and average qualities from \$4.00 to 4.50 per cental. Lambs scarce and wanted at former prices; first class have been worth \$4.50 to 5.00 and inferior \$3.00 to 4.00 per cental. Hogs have been scarce; firmer, and wanted at \$7.00 to 7.50

FLOUR.—Dull, inactive and weak; old grade Superior Extra sold in the better part of week to \$5.35, but this week there has been scarcely any business done, though nobody would have sold under the above price and some not at that; Extra has been nominal at \$5.30, and other grades not offered. Bran—Scarce and other grades not offered. Bran—Scarce and rather firmer at \$13.00 to \$13.25 for carlots. Oatmeal—Very scarce; carlots have been wanted at \$5.50, but not offered; and small lots have risen to \$6.00 to \$6.25.

Grain.—The market has generally been very quiet in consequence of small offerings. Wheat has been fairly steady but inactive. No 9 Evil.

quiet in consequence of small offerings. Wheat has been fairly steady but inactive; No. 2 Fall sold last week and on Tuesday at \$1.10 f.o.c., and new do, at \$1.08 f.o.c. on Tuesday, closing easy with \$1.14 the best bid for old No. 2. Spring scarce; No. 1 sold on Tuesday at \$1.20 ond No. 2 last week and on Tuesday at \$1.20 ond No. 2 last week and on Tuesday at \$1.18. Sules of spring yesterday on pt., but admitted to be close on Tuesday's prices. Oats—Very scarce and in active demand at an advance; cars of Eastern to arrive sold on Monday at 59c., and cars of Western on track last week and on Tuesday at 60c, which price was freely bid yesterday, street prices up price was freely bid yesterday, street prices up to 63 to 65c. Barky.—The only movement has been the sale of the first load of new on Monday at 79c., but this is regarded as a very fancy price, as the load was light and discolored, and such a price is not likely to be repeated. Peas.—None offered, nor would cars have brought over 81 to 82c. for No. 2; street receipts nil. Rye.—Neither offered nor wanted, and prices purely nominal. Stocks of flour in store on August 21st, 1892, 475 bbls. against 1051 bbls. on August 14, 1883, and 375 bbls. on August 22, 1881. Those of grain were as follows on the dates indicated:

RISHT MOLO SP JOHOW	D OH SHO	THEOD INVITO	w
	Aug. 21	Aug. 14	Aug. 22
	1882.	1882.	1881.
Wheat, fall	50,712	60,228	29,046
Wheat, spring		39,418	14,041
Oats		2,195	2,180
Barley	4,802	5,132	18,574
Peas	4,723	4,723	631
Rye		5,284	
Corn		• • • •	• • • • •
Malt			• • • • •

Grain, total ....100,386 116,980 GROCERIES.—A steady business has been done with the country, but jobbing has been quiet. Tea—Lines on the spot have been moving rather low; one line of fourth Young Hyson sold at 20c; two lines at 21c.; one line of seconds at 25c.; and one of firsts at 36c. Japans have sold to the extent of about 600 boxes in one lot on p. t. Blacks have changed hands at 20c. for low-grade Congon; at 34c. for two lines of medinum Congou; and at 30c. for Scented Orange Pekce. Lines on English account have been wanted, and Young Hyson sold at 1/ to 1-½d. Coffee—Easy, with sales of job lots at 18.c for Singapore Java; at 10 to 10-½c. for fair; and Pac. for inferior Rio. Sugar—Quiet, and rather easy. Scotch refined has sold by the carlots at 6-\frac{3}{4}d. for dark in hhds., and 7\frac{1}{4}d. for medium in bags. Raws easy; with medium Porto Rico sold in car lots at 7\frac{1}{4}c. Canadian

yellows have been quiet in job lots, but selling fairly well to the country at a slight decline. Granulated in lots not under 25 barrels was offered at 9½c. Syrups.—The factories have advanced prices ½c. per lb., but no change has, thus far, been made here; stocks light and held firmly. Fruit.—Scarcely anything doing because there is scarcely anything to be had; stocks of box fruits are almost the stocks of box fruits are almost and the stocks of box fruits are almost than the stocks of box fruits are almost and the stocks of box fruits are almost than the stocks of box fruits are almost than the stocks of box fruits are almost the stoc exhausted, but new Valencias are expected to arrive in about three weeks. Choice currants to arrive have sold at 6½c. for a lot of 50 barrels, but besides this nothing appears to have been done save with retailers. Rice.—Stocks very done save with retailers. small; no job lots offered but they would readily have been taken; small lots of Arracan \$3.75 to 3.85. Fish.—Scarcely any, save Cod, on hand and but little of it, which is up to \$6.00 per quintal: all else nominal. Tobacco.—Quiet and unchanged but held firmly both by manufacturers and by grocers. Liquors.—No change of any consequence, sales fair at former prices.

HARDWARE.—The market has been fairly active and a healthy feeling generally apparent with prospects of a good fall trade; but no change is reported in prices.

HIDES AND SKINS .- There has been no change in prices of green hides but all offered readily taken as before; Cured scarce and firm with sales at 8½c and 8½c., the latter for selected. Calfkins.—Scarcely any offered: prices nominally unchanged. Sheepskins.—Green have been fairly abundant and selling as before at 60c; but

country lots offered slowly and going at 40 to 50c.

Hors.—Very scarce; stocks in this market are almost run out; one lot sold last week at 36c., but at the close there seemed to be none offered and 37½c. had been bid for a lot lying at a point east for which 40c. was asked.

LEATHER.-Trade has been fairly active, but with little or no change in the situation. Spanish Sole has been scarce and held higher, but

all else has remained as previously reported.

Lumber.—The fact that parts of this city are overbuilt with dwellings, the rents obtained for many of them not yielding a satisfactory return for the high-priced material and labor put into the buildings, is likely to lessen what was expected to be a lively local demand this fall, But it does not appear to affect prices here, which, as elsewhere are firm, especially for bill stuff. We make few if any changes in quotations. Laths are in short supply, and have been in decided request; one mill reports having received more orders for lath this summer than it could turn out in three years. Mest mills preferring not to bother making them for present prices, which they say do not pay. The price has advanced in Bay City, Mich., to \$2.25 to \$2.50 per. M., which is in very marked contrast with the \$1 per. 1000 lath (nearly equal to 500 feet lumber) which for years was the prevalent but inadequate price. Shingles are in fair

-The quietude usual to the summer season has continued, and prices have remained unchanged at 18c. for single barrels; at 17½ for lots of five to ten barrels and 14c. for cars at Petrolia. American oils are generally

Provisions.—The market has generally b quiet. Butter-Has been less in demand for shipment and shippers have not been inclined to pay over 16 to 161 for selections at which they could not get them; choice dairy for local use scarce and firm at 18 to 19c. for small lots on the spot; medium and inferior selling rather more freely at from 13 to 15c. Country more freely at from 15 to 15c. Country stocks are said to be now very large and English advices discouraging, *Cheese*—Small lots of choice have been steady at 11½ to 12c., and skim at 10c. There was a lot of 100 boxes of fine sold at 11c. Eggs.—Have sold rather better and closed rather firmer at 161 to 17c. for round Pork-Small lots have sold steadily at lots. \$25 and cars have been held at \$24.50. Bacon There has been a steady demand maintained for long clear which has sold at 13c. for half-car lots, at 13½c. for tons and 14½c. for cases; Cumberland quiet to 12½c. for case lots; breakfast bacon is almost finished. Hams—Have been in active demand; canvassed have sold readily at active demand; canvassed have sold readily at 15½ to 16c. and smoked at 15c. while pickled are held at 14c. Lard—Quiet and unchanged at 15½ to 16c for small lots. Salt—So little Liverpool in the market that quotations may be regarded as nominal; dealers say that round lots are held at equal to 72 to 74c. Canadian unchanged at \$1.30 for car lots and \$1.32 to \$1.35 for small lots. Dried Apples—Finished, but with dealers offering to sell at 7 to 71c.

Wool.—Fleece has remained quiet with buyers and sellers apart; there was, however, one lot Ottawa, 16th July, 1882.

of about 5000 lbs, sold to a dealer at 20c. Super lots at 26 to 27c. Extra very scarce with a few lots sold at 33 to 34c. Lambs' wool active; a good deal sold at 27c.

### TRADING IN ALEXANDRIA.

Arthur Sullivan bought a carpet in Alexandria and the purchase took him three months. One morning, so runs his narrative, he was passing by one of the bazaars where tapestries and such things are sold, where a particularly handsome and rich fabric caught his eye. He went in, and, after pretending to look over a lot of things which in reality he did not want, he said to the

which in reality he did not want, he said to the man who solemnly presided over the place, and what is the price of that carpet?"

"That," responded the dealer, "is not for sale. I purchased that particular carpet at a great cost to feast my own eyes upon. It is magnificent—superb. I could not part with that. No, by Allah!" or words to that effect.
"Will the English gentleman have a cup of coffee The English gentleman would. He would also The English gentleman would. He would also have a cigarette. After that, he went away. In a day or two he came around again, and once more made the pretence of looking through Macdallah's stock. He had obviously failed to fool the sly Egyptian before as to the article he really wanted, so he took more time to it upon

really wanted, so he took more time to it upon this occasion. As he expected, the sedate owner of the bazaar finally approached him.

"I have concluded, after several sleepless nights," said the merchant, "to part with that carpet. It grieves me very much to do so, for I have become very fond of it. I had hoped that it would be the light of my eyes in my old age. But the Prophet has counselled unselfishness among his people, and I will sell to the English gentleman."

"How much?"

' How much?"

"How much?"
"One hundred pounds."
"Nonsense. I'll give you £5."
The Egyptian's dignity was obviously wounded An expression of absolute pain crossed his face. But he forgave Arthur, and they had another week or so he dropped around again. After going through the regular business of looking over the stock, he was agaid approached by Macdallah.

"I have concluded, after much thought," said that worthy, "that I asked you too much for the carpet the other day. When Macdallah feels he is in the wrong he is quick to acknowledge it. The English gentleman can have the beautiful carpet for £90.

"Now you acknowledge your error," replied Mr. Sullivan, "I will confess that I was wrong in offering you only £5 for your carpet the other day. I did that in joke of course. I didn't mean it. Bless you, no. And since you are prepared to make concessions, I will do the same. Instead of 51 I will give you 61."

More coffee and another cigarette. The next

time Mr. Sullivan went around the merchant took off 51 more, and the purchaser added 11. So it went on, with haggling and coffee, until Mr. Sullivan had finally agreed to give 121, at which price he took away the carpet. It would have cost about \$250 in London. He says that the kind of business mentioned is considered the strictly proper thing in Egypt and Turkey. But Americans, he adds, are spoiling the trade in this direction. While he was in Alexandria a gentleman named Morgan, from New York, came along and visited the bazaar of Macdallah. Three carpets struck his fancy and he priced them. "Three hundred pounds," said Macdal lah. "Well," replied Mr. Morgan, "that seems a fair price, and I'll take them. Here's your money." The next time Arthur Sullivan saw money." The next time Arthur Sullivan saw the merchant he was almost tearing his hair with rage against the "dog of a Christian." He explained the matter in an injured tone to the sympathizing Englishman, adding that Mr. Morgan's method was not "business."

One day, just as Commodore Vanderbilt was about to leave his office, he turned to his grandson and said: "You stay here a while and help —," naming his confidential clerk; "he has some clipping to do." The clerk went to the safe and got out a box of bonds, and the two sat down, each with a pair of scissors, and began to clip. Clip! clip! clip! was all the sound heard in the room for an hour. Then another box was brought out. Snip! snip! snip! for another hour. This was kept up until dark, when the young man exclaimed: "I say, don't you think we have clipped enough? I am don't you think we have clipped enough? I am getting tired." "Yes," we have done enough for to-day; we can go on with them to-morrow." "How much have we done so far?" asked the young man. "Let me see," said the clerk reyoung man. "Let me see," said the clerk reflectively; "we have clipped the coupons of \$18,000,000 worth of bonds." He did not seem startled, because it was an old story to him, and he was not half done yet.

\$100,000 Quarantee Fund, Deposited with Dom Gov. 50,000

Hon. ALEX. MACKENZIE, M.P., President. Hon. ALEX. MORRIS, M.PP., JOHN L. BLAIKIE, Esq.,

The Tontine Investment Policy of The North American Life Assurance Company combines in one form the greatest number of advantages attainable in a Life Insurance Policy. It appeals at once to the intelligence of all who understand the principles and practice of Life Insurance.

All Policies whether on Life or Endowment Rates are subject to me higher charge in Premium Rates, in taking the "Tontine Investment" form. The extra benefits of this class are conditioned only upon continuance of the Policy for a certain specified term or Tontine period of ten, fifteen or twenty years, selected by the insured himself.

Two things most desired in Life Insurance are the certainty of prefection in early death and prefit in long life. These are combined in the "Tontine Investment Policy" of the North American Life Assurance Comp'y, which also issues Annuities and all the ordinary approved forms of Life Policies.

Agents wanted. Apply to

WM. McCABE, Managing Director.

SIMONDS PATENTED PROCESS,

Having given such general sati faction, owing to their uniformity of temper, we have at a great expense appplied the principle to the tempering of Cross-cut Saws. having frequently been asked to do so; and hereafter our Cross cut S. ws will be Etched and known as such. Those who like a nicely tempered Saw will do well to give them a trial.

Ask your Hardware Marchant for the SIMONDS

Ask your Hardware Merchant for the SIMONDS SAW, and see that it is etched as such.

## UNION MUTUAL

LIFE INSURANCE COMPANY OF PORTLAND, MAINE.

INCORPORATED IN 1848.

JOHN E. DEWITT, President. HENRY D. SMITH, Secretary.

DANL. SHARP, Vice-President. NICHOLAS DEGROOT, Asst -Secretary.

Government Deposit at Ottawa, -\$115,000 00 Assets, about \$7,000,000 Surplus over all Liabilities, 8650.000 00 Dividends to Policy-holders, to 31st Dec., 1880, \$3,936,118 04 \$17,491,996 95 Total Payments to Policy-holders, -

This is the only Company that issues Policies giving the benefits of the Maine non-forfeiture law, and specifying in definite terms by its Policy Contract, that there can be no forfeiture of the insurance by non-payment of premium after three annual premiums have been paid, until the value provided for is exhausted in extended insurance, and every policy issued, states in plain figures, the extended insurance and cash value as the case may be (after the third year), according to the number of full annual premiums paid. NOT MERELY ESTIMATES BUT ACTUALLY GUARANTEED and after being in force THREE FULL YEARS the policy BECOMES INCONTESTABLE. Matured policies are payable at once without rebate of interest on receipt of satisfactory proofs of death, together with a valid discharge from proper parties in interest, the Company waving the usual delay of ninety days required by interest, the Company waving the usual delay of ninety days required by most Companies.

The guaranteed extensions and cash values do not include the Dividends which will accrue to the Policy.

Agents wanted in unrepresented districts. For further particulars apply to

#### Cheap Life Insurance.

[From the Ætna Quarterly.]
The co-operative assessment associations have secured a large membership from their representations that they furnish cheap insurance. Men have been induced to join these associations because they recognize the uncertainty of life, and their duty to provide for their families in event of death. They have been led to believe it is the only true form of insurance, and superior to the well-tested plans in use by the legitimate companies. We have frequently shown through the columns of this paper that the representations of these associations and their over-sanguine agents are delusive and untrue, and that they are unworthy of confidence or patronage, having no permanent basis to stand upon.

THE ÆTNA LIFE INSURANCE CO'Y,

of Hartford, Conn., was early in recognizing that a considerable number of those seeking insurance desired it upon the most inexpensive plans. With a view of meeting the popular demand it organized a copyrighted system, which combines the utmost cheapness, safety and equity. The plan requires only a minimum rate, and avoids the necessity of taking large premiums for the sake of returning large dividends. It gives all the advantages obtainable under more expensive policies. It is peculiarly adapted to those who desire to secure the largest amount of insurance at the least possible cost; to those who want immediate protection, but are not ready or able to pay for endowments or other plans more expensive. not ready or able to pay for endowments or other plans more expensive, and for those who wish insurance for a limited time, or for a specific purpose. The accumulations under this plan are kept distinct and separate, and the insured receive the benefit of them by the application of the surplus at stated periods.

There is, therefore, no further necessity or excuse for trusting the future happiness and support of dependent ones to the deceptive and uncertain system of passing round the hat after the funeral, for the ÆTNA LIFE INSURANCE COMPANY issues policies secured by an accumulation of

\$27,000,000 to back up its promises, and at less expense than the article obtainable of any co-operative company, whose certificates are of no permanent

Circulars giving the full particulars of the plan above referred to, can be obtained by addressing the company,

Railways.

## Intercolonial Railway.

THE ONLY CANADIAN

### ALL RAIL ROUTE

Between Eastern and Western Canada.

By this route frequent change of cars and all ver-ations Customs regulations are avoided. Pullman Cars run through between Montreal, Halifax and St. John.

The Intercolonial is yearly becoming a Popular and Favourite Route for Tourist and Pleasure Travel. Sea Bathing and Tourist tickets are now being issued at very lew rates. The finest Salmon and Trout fishing in America is to be found in Rivers and Lakes along this railway. There is also excellent sea and surf bathing

excellent sea and surf bathing
Close connections are made weekly at Rimouski
with the Allan Royal Mail Line to and from Liverpool, making the shortest ocean passage between
Europe and America. Passengers for Europe leaving Montreal by the Mail Special on Saturday morning will join the Mail Steamer at Rimouski the
same evening.

IMPORTERS and EXPORTERS will find it advantageous to use this route, as it is the quick-est in point of time and the rates are as low as by any other. Through freight is forwarded by fast special trains.

Through express trains run as follows:

GOING EAST.
Leave Toronto 7.12 a.m.
" Montreal 10.00 p.m.
" Quebec 7.30 a.m. GOING WEST.
Leave Halifax 6.15 p.m
St. John, N.B., 10.30 p.m. Arrive Quebec 8.50 p.m. next day. "Montreal 6.30 a m. " Quebec 7.50 a.m. next day. Arrive St. John, N B, 6.00 a m., day after. " Halifax 10.00 p.m., day after.
Toronto 11 15 p m.
do.

The Pullman cars which leave Montreal on Monday, Wednesday, and Friday run through to Halifax without change, and those which leave Montreal on Tuesday, Thursday, and Saturday, run through to St. John, N.B., without change.

All information about the route, and also about freight and passenger rates, will be given on application to
