BRITISH NEWS.

From the Bristol Daily Advertiser, March 31.
LIVERPOOL CHOLERA.—By the Ship Liverpool, which arrived at this port yesterday, we have received London papers to Sunday, Feb. 19, and Liverpool papers of the 20th. The alarm occasioned by the appearance of the Cholera at London had in a great measure subsided. The whole number of cases, which had appeared there, was 33, and the number of deaths was 19. Of the deaths five occurred on the 18th. There were no new cases reported on that day. There had been no case in Liverpool, and one in Paris. The appearance of the disease at Paris, together with the news of its existence in London, had caused considerable alarm on the Continent. There had been 18 cases and 11 deaths at Glasgow. Some of the physicians, to account for the failure of proofs of the contagiousness of the disease at London and elsewhere in England, had advanced the opinion that it was not the Asiatic Cholera.

It appears from a paragraph in the London Courier that the conference of Ministers on the Affairs of Greece had nominated Prince Otto, second son to the King of Bavaria, to be king of that country. He is said to be a young man of excellent character, of good appearance, but he is only seventeen years of age. It is suggested that each of the three powers who are parties to the conference, Great Britain, France and Russia, will send a councillor to assist the young king in his government.

The Wellington steam vessel which took emigrants to Belle Isle to join Don Pedro's expedition had returned to the North Channel. The expedition sailed from Belle Isle on the 10th, and consisted of 2,000 seamen, mostly Englishmen, and offered by Englishmen, the whole in high spirits.

Count Orloff, aid-de-camp of the Emperor of Russia, has been charged with a mission from the Emperor to the Netherlands, to attempt a settlement of the differences between that country and the Allied Powers.

A Committee of the House of Lords has reported an important measure for the pacification of Ireland. It proposes an entire extinguishment of the tithe system in Ireland. The object of the bill is to relieve the tillage of the soil, which has not received their titles, sums of money proportionate to their respective incomes for 1831. The title also by its being converted into a debt to the Government, will be enforced in a less obnoxious manner than before. For the full details of the bill, see a separate article in this issue, either in the form of a tax on land, or an exchange in land.

LONDON, Saturday, Feb. 18, half past seven.—A private express from Paris has brought us all the papers of Thursday, and a letter from our own correspondent dated Thursday evening. The chief object which seemed to attract attention in the French capital was the mission of the Russian Count Orloff to the Emperor. It was well known, amongst the best informed persons, that he was sent expressly by the Emperor Nicholas to endeavout to prevail upon the King of Holland to consent to the treaty framed by the London conference; but it was thought that, if the object of the King could be reduced to minor details, the Emperor would take upon him to obtain the necessary modifications in the treaty in question. The news of the cholera having reached London appears to have created great alarm in Paris, and this was considerably increased on Thursday by its becoming known, that two more deaths of Cholera had just occurred in the French capital, in one of which death had already ensued. It appears certain, that a telegraphic dispatch had been sent by the French Government to London, with orders that the expedition to Italy should not sail. This was in consequence of an assurance made by Count d'Appony, the Austrian Ambassador, that the Roman States would be immediately evacuated by the Austrian troops. One of the opposition papers admits, however, that the expedition had not been recalled, though it expresses a belief, that, on its arrival, the evacuation of the Roman States will have taken place. The funerals in Paris had been slightly depressed. The 3 per cent closed on Thursday at 66 60.

The French Government has made a highly satisfactory concession to English trade. It has agreed to diminish the tonnage duty on English ships in French ports from four francs to two francs, on a ton of one half; or, for a ton of 50, to 18 3/4. We have, of course, accepted the position with pleasure, as a near approximation to the duty paid by French shipping in our ports, (which is 10) and an earnest of final perfect reciprocity.

From the London Sunday Times, Feb. 19.
The Foreign news of the week is of little importance. We find the French Deputies have been rigidly examining the Ministers' Budget, and demanding redress under every head of expenditure.

The French squadron, which had been ordered for Ancona is now to proceed to the Morea, there to cooperate in carrying into effect the decision come to, with respect to the future destiny of Greece, by the Five Great Powers. The Austrians have wholly, or nearly so, withdrawn from Romagna, and the Papal States are likely to be restored to tranquillity.

From the New-York Daily Sentinel, March 30.
LIVERPOOL FROM ENGLAND.—By the packet ship York, Capt. Bursley, arrived last evening from Liverpool. London papers to the 22d and Liverpool to the 24th Feb. have been received. The news is not of much importance.

The alarm respecting the cholera in London had almost entirely subsided. Most persons did not believe the disease in question to be cholera, and it was a fact that during the fortnight after its appearance, out of a population of nearly a million, only forty-five cases had occurred, and twenty-eight deaths.

The total number of cases of Cholera in England and Scotland to the 20th Feb. (exclusive of London), was 3064—deaths 1300.

Cholera in Edinburgh.—There have been seven cases of cholera since our last, four of which have proved fatal. Three of the cases are in a family from St. Leonard street, of the name of Elliott. The father and son, who were both labouring under the disease, were removed to the Drammont-street hospital on Thursday forenoon. The former died soon after being conveyed there; the son is recovering.—*Edinburgh Courier.*

The different clauses of the Reform Bill had passed through a committee of the House of Commons; that bill, however, was still occupied with the Schedule of the Bill, which contain the names of the places to be disfranchised or enfranchised, and of course afford sufficient room for objections on the part of the reformers. The ministers have still large majorities in the lower house, and carefully abstain from making their intentions known as to the manner in which they intend to carry the Bill through the House of Peers.

(From the Liverpool Mercury, Feb. 24.)
In conclusion, we cannot better show the exaggerated nature of the cholera-phobia, now prevalent, than by a reference to the report of the Central Board of Health, dated Wednesday, from which it appears that through this alleged terrific and contagious disease has now been in London, or said to have been there, for more than a fortnight, out of a population of nearly two millions, only forty-two cases had occurred; that there were then only five cases remaining; and that the total amount of cases remaining in England and Scotland was 123. The total number of deaths, since the commencement of the disease, is only 1496, and supposing these to have been every one cases of cholera, which is more than doubtful, the result is by no means such as should "fright the idea from its propriety," since it is certain that, even in ordinary times, a far greater number fell victims to the typhus fever, and other maladies of the country.

IS. PARLIAMENT, Monday, Feb. 21.—Cholera in London—Colonel Evans gave notice that he would on Tuesday present a petition from several medical gentlemen, praying for an inquiry into the alleged existence of the cholera in London.

Mr. Robinson found that, as considerable doubts existed in the city, and also amongst medical men, whether the cholera had really made its appearance in London at all, and also whether it was a contagious disease, some facility should be afforded at the custom house in giving bills of health to vessels quitting the port of London.

Mr. F. Thompson would not take upon himself to decide whether the cholera existed in London or not, but Ministers had adopted every mode of obtaining accurate information on the subject, by consulting the

ablest medical men who had seen the disease in India, and they could not, with propriety, of food thick towards the countries, have pursued any other course than that which they had taken.

REFORM.—The Times of the 22d says—"In the debate last night, Sir R. Peel, with great address, threw out about respecting the creation of peers, which was assailed by Mr. Stanley; but we confess that we should have been better pleased had the Ministers, instead of displaying their skill, met the question boldly and decidedly. Having *cart blanche* from the king to create as many peers as are necessary to secure the success of the bill, why do they not avow their intentions in such an emphatic manner, as to cut off the hopes and paralyze the exertions of their now confident and active opponents?"

The Liverpool Mercury of the 24th says—"Ministers have only one way of securing the measure from the machinations of both its avowed enemies and its pretended friends, and that is by such a creation of Peers as may secure its passing unaverted through the House of Lords. They are deeply pledged to the public, and we trust that having the consciousness that they are supported by a patriotic monarch, and by the almost unanimous voice of the people, they will not a second time endanger the success of the measure by neglecting the means necessary to secure it. We are strengthened in this hope by the declarations made by Earl Grey, in the course of a speech delivered at the Mansion House dinner on Saturday last. He said that in originating the great question of Reform, he was aware that he had incurred a great responsibility, but he could no more doubt the propriety of so urging that responsibility than he could doubt that the great measure would be eventually crowned with success. He was aware of the anxiety felt on this subject by the public; and he would not allow himself to doubt that their wishes would be realized—for the great measure was advancing steadily to a certain and successful issue. They might rest assured that no effort on the part of himself or his colleagues would be spared to aid in perfecting that great work. If it had experienced some delays, the fault was not in them. They had ever used their best endeavors to accelerate its progress, and he hoped the time was not far distant when they should be enabled to congratulate each other on its completion."

From the London Courier, Feb. 22.
We were able to state exclusively on Saturday, upon the authority of our Paris Correspondent, that the French Minister for Foreign Affairs had signified to the Spanish Ambassador in Paris, the determination of the French Government not to permit the King of Spain to send troops to the assistance of Don Miguel.

We are now informed from a source entitled to the highest credit, that a note to a similar effect, and in almost as strong terms, has been sent by Lord Palmerston to Mr. Zea Bermudez, the Spanish Minister at this Court.

The last despatches from Madrid led no doubt of the existence of a treaty between Ferdinand and Don Miguel, by which they bound themselves mutually to assist each other. Up to that time, however, Ferdinand had not openly sent any troops into Portugal, and the arrangements were made in a very private manner.

An article from Vienna states that the typhus fever, much more destructive in its effects than the cholera, has broken out in Galicia.

Died, on Sunday, at Wiverton-hall, near Dingham, aged 45, Mary, wife of John Musters, Esq., of Cambridge, and Amey Hall. Mrs. Musters is the lady to whom Lord Byron's early poems are addressed, and to whom he was so passionately attached. She preferred, however, Mr. Musters to the lame half-brother of her husband. Mrs. Musters was the daughter of that Chaworth, of which ancient Nottinghamshire-house she was heiress. On the death of the late Mr. Musters they resumed the name, and the name of Chaworth ceased in the county. On the occasion of the sinking of Colindale-hall in the month of October last, Mrs. Musters was at home, and took refuge in the shrubbery. Since that period she has never recovered her health.—*Nottingham Review.*

Such is the mildness of the season, that in some parts of the neighbourhood of Chard, primroses already give the hedges a vernal appearance.

The gallant officer and humane man Col. Brereton, was the son of Mrs. John Kemble by her first husband, Mr. Brereton, the Comedian, of Drury Lane Theatre.

The Scilly Islands, after having been for nearly 200 years under the sway of the noble houses of Godolphin and Osborne, have again passed into the crown, on the expiration of the lease granted to the Duke of Leeds, who thereby resigns his titles of Governor and Lord Proprietor of Scilly. At present the Islands are held by the Duke of Cornwall, but what their ultimate destination may be is not known.

It is stated in a foreign journal that the flattering picture of the prosperity of the United States, given by President Jackson in his Message to Congress, has produced such an effect in Hesse Darmstadt, and in other parts of Germany, that numbers of families are making preparations to quit their country for ever, and settle in the United States.

It is stated that the Duke of Reichstadt (Napoleon's son) was near to be married at Vienna to the Arch Duchess Theresa.

From Canton.—We are indebted to a friend for the Chinese Courier to Dec. 8. The Courier of the 8th announces the arrival at Canton of the British Government ship Challenger, as an event curious of the British fleet. This event is said to have caused some degree of excitement amongst the Europeans, but the Chinese did not seem to apprehend any serious disturbance. It is stated that on no previous occasion has so formidable a demonstration been made by the officers of the British Government, and that the officer in command of the fleet is not one from whom the Chinese can expect much concession, or in whose counsels they may hope for wavering or irresolution. Some reports appear to anticipate a favorable issue to the controversy. It remarks—

"The season is nearly finished, and less commercial inconvenience is now to be dreaded by the Company, than at the period when it was formerly contemplated to stop the trade. Let not the Chinese boast that they violated the treaty of the British Factory, insulted the national flag, and repulsed a force despatched expressly to extort redress for the multiplied insults and indignities which they have so long inflicted on all foreigners with impunity."

Capt. Freemantle, the commander of the Challenger, it is stated, was intrusted with an official communication from the Governor General of India, to the Governor of Canton, which was intrusted to deliver to his Excellency in person. It was anticipated that Chinese pride would recoil at this breach of etiquette, and that the Governor would refuse to receive the despatch from the hands of an officer inferior in rank to himself.—*Boston Daily Advertiser.*

Gale at Manila.—The most destructive gale took place at Manila on the 13th Nov., by which nearly all the vessels in the harbor were driven on shore; in the vicinity of the city it was computed that 10,000 houses were blown down and that 70,000 men, women and children were homeless. The convents have given \$25,000 for the relief of the sufferers."

UNITED STATES.

Twenty-two Emigrants, on their way to the Oregon territory, have arrived in Baltimore from Boston. They have with them the necessary travelling and camp equipages, and are about to take up their line of march, through the West to that distant land.

At Savannah, Georgia, on the night of the 14th of March, "a killing frost" occurred, by which ice was formed as thick as a dollar, and the peaches and such vegetables as were above ground, were cut off. The weather on the 18th was still more severe, ice being formed half an inch thick.

There are now finished, in progress, and projected in the United States, two thousand nine hundred and thirty-eight miles of Rail Roads.

The whole amount of money expended on the public buildings at Washington, up to 1830, is stated to be 3,228,879 dollars. Of this the Capitol alone has cost 2,492,844 dollars.

Contrary to the expectation of many, the rise of the Ohio was not followed by an inundation at New Orleans.

The number of sleep in the United States is estimated at 20,000,000.

The militia force of the State of New-York, according to the returns for 1831, is 189,034.

Latest from Buenos Ayres.—By the Brig Eagle, Capt. Wade, arrived at this port yesterday from Buenos Ayres, we have received the British Packet and Argentine News of Feb. 4th, which states, that a decree was published the day previous, providing, that no printing office shall be established without the previous permission of the Government, that no periodical whatsoever shall be published without such permission, nor without the name of the Editor being attached to each number; and that only citizens of the Republic shall receive such permission.

The paper contains an account of illuminations and other demonstrations of joy for the conclusion of the civil war in all the Republic.—*Boston D. Adr.*

THE OBSERVER.

ST. JOHN, TUESDAY, APRIL 10, 1832.

Our English advices this week are down to the 22d of February from London, and 24th from Liverpool, received by way of New-York. Very little of importance is furnished by them. Doubts began to be entertained in London as to the real nature of the disease which had appeared in certain parts of that city, under the terrific form of Asiatic Cholera—very few additional cases having occurred, and the alarm of infection having in great measure subsided. The next accounts will probably decide the question, and unveil the extent of the danger.—There had been several new cases in Edinburgh and Glasgow, and from the latter city the disease had spread to the manufacturing town of Paisley, where previous to the 19th Feb., 26 cases had occurred, 16 of which proved fatal.—This fearful scourge of nations is also stated to have made its way to the French capital.

A general excitement was caused in our mercantile community last week, by the current report of an inaccurate or error having been detected in the recently enacted Revenue Law of this Province, by which it was feared every article of Food, &c. not "the growth, produce, or manufacture of the United Kingdom," imported into this Province, would be subjected to a Provincial duty of ten per cent.—Had this construction been correct, the produce of our Sister Colonies, as well as the imports of Tea, and various articles of Food, from the United States and elsewhere, would have been burthened with this heavy and obnoxious impost.—Petitions to the Executive were in course of preparation, praying the suspension of the clauses by which a fruitful branch of our Commerce was exposed to sudden blight, when fortunately on a second reading of the Act, and consideration of the objects contemplated by the Legislature, the claim was found to be groundless, and the ten per cent. was construed to bear only upon those articles to which the Imperial duty applied, the chief or only one of which, we believe is *American Wheat Flour*. It is satisfactory that the misinterpretation has been corrected before any interruption has been suffered in the trade.—The additional tax upon wheat flour about to go into operation will have a tendency to give further protection to the Agriculture of the country, and will in a great measure be felt only by a class well able to bear it: while Rye Flour, Corn Meal, and Colonial produce, will still be admitted duty free.

Weather.—The weather continues remarkably cold for the season; the thermometer yesterday morning standing at 14, which is certainly very low for this advanced period of the year. The travelling on the Kennebecak River is said to be yet perfectly safe.—There is every appearance of a very backward spring, and in Nova Scotia, we learn, prospects are equally unfavourable.—Last Tuesday night and Wednesday forenoon, we were visited with a snow storm, almost as severe as any we have had during the last winter.

MILITARY MOVEMENTS.—It is understood from good authority, that the Rifle Brigade, at present on service in the Garrisons of Fredericton, St. John, and St. Andrews, will be removed to Halifax about the month of June next, and will be succeeded in this Province by the 34th Regt., at present in Nova Scotia.

BANK DIVIDENDS.—An half yearly dividend of five per cent by the Bank of New-Brunswick, payable on the 13th instant; and four per cent by the Charlotte County Bank, has been declared.

Crown Lands.—A list of new Rules and Regulations, respecting future grants of Dandin this Province, is copied into this paper, from the last Royal Gazette. It is accompanied, (in the Gazette) by forms of Petition, &c. which may be obtained by parties making application, from the Agent of Emigrants in this city.

Grammar School.—The distribution of prizes to the Scholars most distinguished at the late semi-annual examination, took place this morning.

The brig James Lawes, arrived this morning from Cork, with 20 passengers, all in good health and comfortable condition. The Visiting Physician, however, as a precautionary measure, has directed the vessel to be detained at the Quarantine ground, until the passengers have scalded and washed their clothes, bedding, &c.

Schr. Edward, Sneden, hence for New York, put into Digby last evening, with 4 feet water in her hold; and some of the crew frost bitten.—Vessel discharging.

The supposed case of Cholera at Topham, State of Maine, an account of which we gave in our last paper, turns out to be of mere ordinary sickness. The Physicians who visited the patient have denied its being a case of Cholera, and state that "the family and neighbourhood are wholly free from every thing like infectious disease, and that no cause of alarm exists."

ST. GEORGE'S SOCIETY.—At the Meeting of the Society, on the evening of Monday the 2d instant, the following Gentlemen were chosen Officers—**Benjamin B. HAZEN, Esquire, President,** **JOHN V. THURGOOD, Esquire, Vice-President,** **THOMAS SANDALL, Esquire, Treasurer,** **JOHN J. ROBERTS, Esquire, Secretary.** **Committee.**—NEVILLE PARKER, Esquire, Mr. GEORGE BRACE, Mr. ANTHONY R. TREBO. [Courier.

CHAMBER OF COMMERCE.

Pursuant to Public Notice, a General Meeting of the Members of the Chamber of Commerce of this City, was held at the Exchange Coffee-House on Friday, at noon.

A Report of the proceedings of the Committee for the past year, prepared according to the Rules of the Society, was read, accepted, and ordered to be printed. After the retiring of L. DONALDSON, Esq. from the Chair, it was taken by Wm. WALKER, Esq., and on motion of JAMES T. HANFORD, Esq., seconded by JOHN ROBERTSON, Esquire:—

Resolved unanimously, That the Chamber of Commerce cannot witness the retirement of L. DONALDSON, Esq. from the Chair of the Committee of this Society, of which he has been the able and indefatigable Chairman for the last three years, without sincere regret at the loss which his resignation compels them to sustain, and the expression of their thanks for his valuable services.

The Members then proceeded to elect a Committee, when the following Gentlemen were chosen:—

WILLIAM WALKER, Chairman.
JAMES KIRK, Deputy Chairman.
JOHN ROBERTSON, Secretary.
I. WOODWARD, Jr., Secretary.
WILLIAM LEAVITT,
JOHN V. THURGOOD,
JAMES T. HANFORD,
E. DE W. RATHBORN,
A. MCKENZIE.

Together with the Members of the Legislative Assembly for this City and County, (being the non-elective part,) compose the Committee for the ensuing year.

ANNUAL REPORT.

THE COMMITTEE OF THE CHAMBER OF COMMERCE, before retiring from office, have prepared the following Report of their proceedings during the past year, according to the Rules of the Society, which they beg leave to submit:—

A request having been made by the Province Agents in London, for a statement of the value of all the Saw Mills in the Province, with an account of the Lumber produced at each, its value at the ports of shipment, the extent of the Province concerned, and the number of persons in the Province concerned in the manufacture of Timber and Deal. Your Committee collected the information from Gentlemen residing in various parts of the Province, and forwarded a full report to the North American Colonial Association. That statement, at one view, points out the vital importance of the Timber and Deal Trades to this Colony; like documents having been found, on the consideration of those papers, to induce His Majesty's Government to pause before it adopts such a Resolution in such Colonies as import into Great Britain from the North American Colonies, as will eventually in their mercantile ruin.

Your Committee have much satisfaction in stating, that the efforts of the Chamber of Commerce, in bringing under the view of the Legislature the serious evil produced on the Nova Scotia Colonies, by the enormous Law Fees charged on suits brought in Court in this Province, have, at length, led to the appointment of a Commission, by the Lieutenant-Governor, to inquire into, and report on, the state of the Law Fees, &c. &c. by October next, and from the professional talent of the Gentlemen appointed, no doubt can exist that such a full statement, and recommendation will be made on all matters connected with these important subjects, as by leading to a great alteration in existing regulations, and simplifying the whole, will satisfy the public, and do honor to themselves.—Copies of the Report of the Commission, together with the Board, are ordered to be laid before your Gentlemen.

The sediment and alluvial soil brought by the vast body of water which falls from the River St. John into the Bay of Fundy at this Port, has led to the increase of some Sand Banks near its entrance; the attention of the Legislature has been drawn to the subject, and the proper authorities, and such measures will, we doubt not, be adopted, as may prevent an increase of the evil.

It is with the highest satisfaction, that your Committee advert to the manner in which the shores of Nova Scotia, in this Province, from Cape Sable and the North American Colonies, are now lighted, and the fact is stated, that no appropriations have ever been made by the Province, which have given such entire satisfaction, as the sums expended in those useful, and so long delayed, undertakings.

A communication was sent to London, urging that inquiries should be made as to the authority under which American vessels are of late, admitted into the Province, to trade with the Province of Nova Scotia, and in order that its advocates may know the laibors of its members, and become more intimately conversant in its details, they recommend that a material charge take place in the list of Gentlemen composing the Committee.

Before concluding, your Committee beg to notice that the general state of the trade of the Province is good, and that, this year, they anticipate a great increase.—The reports of 87,000 tons of fish were declared, and we most ardently hope will succeed,—the building of Ships, to a considerable extent, is now going on,—the advantages resulting from navigation are increased,—and the general trade of the Province seems on the advance.

It is a singular fact, that while the Canadas, with a vast population and capital, and a more advanced state of agriculture, export only about 376, 60, for each person, this Colony exports about 45 10, independent of the freights made by her vessels; clearly showing how very advantageous our situation is, as compared with other Colonies, and how fast our trade, capital and agricultural improvements, would advance, were there not serious, though not natural difficulties, checking the advance of the Province.

Before concluding, your Committee beg to notice that the general state of the trade of the Province is good, and that, this year, they anticipate a great increase.—The reports of 87,000 tons of fish were declared, and we most ardently hope will succeed,—the building of Ships, to a considerable extent, is now going on,—the advantages resulting from navigation are increased,—and the general trade of the Province seems on the advance.

It is a singular fact, that while the Canadas, with a vast population and capital, and a more advanced state of agriculture, export only about 376, 60, for each person, this Colony exports about 45 10, independent of the freights made by her vessels; clearly showing how very advantageous our situation is, as compared with other Colonies, and how fast our trade, capital and agricultural improvements, would advance, were there not serious, though not natural difficulties, checking the advance of the Province.

their successors to persevere in bringing the remedy before the Legislature, year after year, until a majority is applied.

The duty on Wines imported into the Province, being the same on every quality, and supposing a reduction in that on the lowest quality, not only more correct in principle, but might also encourage a trade to arise with Countries producing such, and from which our Fish, &c. are, by the very high duty now existing on inferior Wines, virtually excluded: Your Committee prayed the Legislature to alter the whole scale, and substitute, in a great degree, an *ad valorem* duty.—The House of Assembly, however, thought it better to retain the charges as they have hitherto existed.

A Petition, praying that no duty should be laid on British Goods, was also forwarded to the City and County Representatives; but though much was said on this head during the preceding session of the Legislature, no motion was this year made on the subject, and we are happy to say, the matter seems to have passed over for some time to come.

Application has been made to the Corporation of this City, praying that the number of persons appointed Inspectors of Pickled Fish, may, in future, be limited to a very few, and that those parties who are appointed, may be selected from the best of the trade, and loss has arisen, during the past year, from the bad state in which Gasparous were landed in the West Indies. No doubt this request will be attended to, the more especially as it is found that the Province Law is inadequate to secure the desired object, and as this becomes, consequently, the only mode by which so serious an evil can at present be remedied.

The duties on Coals exported from Great Britain to her Colonies, and to Foreign States, having been altered during the last year; and your Committee, being desirous that liberty should be given to export from this Province, any Foreign Stone, British Coals in British Vessels, on the payment of the like export duty, at the Colonial Custom-House, as would have been exacted in Great Britain, on such Coals being sent direct from Great Britain to such Foreign Countries—petitioned Lord GREY, His Majesty's Principal Secretary of State for the Colonies, praying that such an alteration should be made, as would do away with the restrictive clause in 6th Geo. 4, cap. 114.—A few vessels arriving from Great Britain with Coals, as ballast, from an overstock in this market, frequently find themselves unable to dispose of the same without loss; and your Committee think, if the restriction before noted was taken off, it would not only remedy that evil, but it would become the interest of very many vessels, resorting to this Colony for Timber and Deals, to bring out Coals, and thus not only the shipping employed in the direct trade between Great Britain and the Colony be advantaged, but profitable employment also be afforded to the small vessels owned in the Colony, transporting such Coals to various parts of a distant and remote part of it as respects the trade with China will be done away, and thus another shack be removed from British subjects, which to carry on a fair and useful trade with a friendly State.

No satisfactory answer has yet been submitted to the Petition sent to Great Britain on the subject of the Tea Ship; but, as the Charter of the East India Company expires in 1834, we sincerely hope, that a part of its assets the trade with China will be done away, and thus another shack be removed from British subjects, which to carry on a fair and useful trade with a friendly State.

In all communications with the Executive of this Province, as well as that of Nova Scotia, your Committee have met with prompt attention; and they have much pleasure in stating the fact, in letters thereby to encourage their successors in applying to the respective Governors for the promotion of any good, or to remedy any existing mercantile evil.—they are also happy to state the friendly correspondence, and ready co-operation, which have been kept up between them and other Associates of a similar nature in the Sister Colonies, and with the North American Colonial Association in London, and would earnestly recommend to their successors the continuance of such friendly intercourse. They would beg to observe, that they have much gratification in stating the particular and prompt manner in which all communications of years past have been attended to by the President of the Halifax Chamber of Commerce, the Hon. JOSEPH ALLISON, and they think it a duty to name it, as that Gentleman having retired from the situation; and they feel confident of receiving similar attention from his successor in office, Hon. S. CUNNINGHAM.

Persons belonging to the Chamber of Commerce, wishful to obtain more minute information concerning the matters before noticed, for themselves or friends, may refer to the Secretary, who will at all times have pleasure in affording such—particularly as many of the minor labors of the Committee are necessarily unrecorded in this report.—The advantages which have resulted from his services in this respect, from the Chamber of Commerce, are acknowledged, and it is the opinion of your Committee, that they may still be very far extended; consequently, they earnestly call on the mercantile community liberally to support the institution, and in order that its advocates may know the labors of its members, and become more intimately conversant in its details, they recommend that a material charge take place in the list of Gentlemen composing the Committee.

Before concluding, your Committee beg to notice that the general state of the trade of the Province is good, and that, this year, they anticipate a great increase.—The reports of 87,000 tons of fish were declared, and we most ardently hope will succeed,—the building of Ships, to a considerable extent, is now going on,—the advantages resulting from navigation are increased,—and the general trade of the Province seems on the advance.

It is a singular fact, that while the Canadas, with a vast population and capital, and a more advanced state of agriculture, export only about 376, 60, for each person, this Colony exports about 45 10, independent of the freights made by her vessels; clearly showing how very advantageous our situation is, as compared with other Colonies, and how fast our trade, capital and agricultural improvements, would advance, were there not serious, though not natural difficulties, checking the advance of the Province.

GRAMMAR SCHOOL.

At a Meeting of the Directors of the Grammar School, in this City, held on the 10th instant, pursuant to notice given at the last Semi-Annual Examination, the following Prizes were adjudged:

Prizes were subsequently, at the request of the Board, distributed by Mr. PATERSON to the other Classes, as follows:

To Robert Davern, Class Superior, for a Memoir of Agriculture, founded upon the Life of Agricola by Tacitus. To George Lory, Class Superior, for a Translation of Tacitus de Agricola.

FROM THE ROYAL GAZETTE APRIL 4.

His Majesty, with a view to prevent the delay, expense and inconvenience incident to the method now in use of issuing Grants to purchasers of Land in this Province, has been pleased to direct and require, that in making all Grants of Land hereafter in this Province, the following Rules and Regulations be observed:

1. That all Fees of Office upon the application for, or upon the issuing of any Grant of Land, or Ticket of Location of Land, or in or about making any Survey of any land so to be granted, or in or about the registering of any such Grant or Ticket, shall be paid by the applicant, and shall be paid in full at the time of the application.

2. No Lands to be sold to any person, in the name or on the behalf of His Majesty, until the same shall have been surveyed, and rendered distinguishable by a reference to the public Charts and Surveys in the Office of the Commissioner of Crown Lands.

3. Any person desirous of purchasing Crown Lands, shall intimate such desire by subscribing a Petition addressed to the Lieutenant Governor, indicating, with reference to such public Charts and Surveys as aforesaid, the precise piece or parcel of Land which he or she may be desirous to purchase, and the price at which he or she may be desirous to purchase the same.

4. Every Petition shall be in the form contained in the Schedule marked A, and that all such Petitions be ready prepared in blank, and that such blank forms shall be delivered gratis to every person who shall make application for the same; and that every such Petition shall be delivered at the same Office of the Commissioner of Crown Lands, and bound up in one or more successive volumes or volumes, to each of which shall be subjoined an index, shewing the name of every applicant, the description of the land applied for, and the date of every such application.

5. It shall be the duty of the Commissioner of Crown Lands, or in his absence his proper Deputy, at the foot of every Petition to signify either that the same is approved, or that the Governor's decision thereupon is postponed; and, in case of such postponement, the Commissioner of Crown Lands shall state shortly, in writing, at the foot of the Petition, the reason why the same is postponed, and shall, with the least possible delay, bring every such Petition, as last aforesaid, under the consideration of the Governor for his decision thereon.

6. Whenever any such application as aforesaid, shall have been approved by the Commissioner of Crown Lands, or by the Governor, (as the case may be), the applicant shall, on application at the Office of the Commissioner of Crown Lands, or by him deposited in the hands of the said Commissioner, or Grantee therein named, or by his, her or their lawful agent or agents, in his, her or their behalf, in testimony of his or her acceptance thereof, each execution by the Grantee or Grantees, and the delivery of such original Grant to him, her or them, to be, in each case, attested by the Commissioner, by an endorsement to be subscribed upon such original grant, or in case of his absence by some one of his Deputies.

7. A duplicate copy of every such Grant to be forthwith made by the Secretary and Registrar of the Province, to be preserved and recorded amongst the Records of his office.

8. The Governor may cause Crown Lands to be put up to sale by Public Auction in any case in which it shall appear to him that the interest of the Crown Revenue or the welfare of the inhabitants requires or will be promoted thereby; and may also cause any such Lands for any term not exceeding twenty years, at the best reserved rent which can be obtained; but no covenant to be contained in any such lease for the payment of the expiration of any such term; and in the making of all conveyances in pursuance of any sales by Auction, and in the granting of any such leases as aforesaid, the foregoing regulations to be followed and observed with such variations only as may be unavoidable.

9. The Governor is authorized to make an absolute sale and alienation, in Fee Simple and Perpetuity, of all Quit Rents reserved and now payable upon Lands heretofore granted, to the Proprietors for the time being of any Lands subject to and chargeable with the same, who shall on or before the 24th day of June, 1832, offer to purchase the same, and after the said 24th day of June, 1832, to any other person or persons who may be willing to effect such purchase; and in effecting the sales of any such Quit Rents, the foregoing regulations respecting the sale of Lands are to be observed and followed in all respects by the Commissioner of Crown Lands, with such variations only as may be unavoidable.

CIVIL APPOINTMENTS. Appointed to be the Tide Surveyor for the Port of Halifax, in the County of Kent, Benjamin Dawson, Esq. to be Tide Surveyor, at the Port of Bathurst, in the County of Gloucester.

Windsor and Dalhousie Colleges.—A written Message was transmitted from his Excellency to the House of Assembly, on Friday, which stated the desirability of a union between King's and Dalhousie Colleges. The message gave various reasons for such junction, and submitted the matter to the Legislature. Accompanying this document, were statements respecting the establishment and funds of the two institutions.—Halifax Recorder.

House of Assembly.—A Bill, giving to Cape Breton three additional members, viz.—one to the township of Sydney, one to the township of Arichat, and one to the County, has passed the House. His Majesty's

FOR SALE,

BRITISH NEWS.

From the Boston Daily Advertiser, March 31.
LATEST FROM EUROPE.—By the Ship Liverpool which arrived at this port yesterday, we have received London papers to Sunday, Feb. 19, and Liverpool papers of the 20th.

It appears from a paragraph in the London G. that the conference of Ministers on the affairs of C had nominated Prince Otto, second son of the King of Bavaria, to be king of that country.

The Wellington steam vessel which took emig to Belle Isle to join Don Pedro's expedition has returned to England. The expedition sailed from the 10th, and consisted of 2000 men, 1000 Englishmen, and 1000 Spaniards, the latter in high spirits.

Count Orloff, aid-de-camp of the Emperor of Russia, has been charged with a mission from the Emperor to the Netherlands, to attempt a settlement of the differences between that country and the A. Powers.

A Committee of the House of Lords has reported an important measure for the pacification of Ireland. It proposes an entire extinction of the tithe system in Ireland. To effect this object the government is authorized to advance to incumbents of Parishes, who have not received their tithes, sums of money proportionate to their respective incomes for 1831.

WEST OF SCOTLAND
INSURANCE OFFICE.
The Subscriber begs leave to inform the Public, that he has lately received instructions to take Risks at lower rates than heretofore; and also, to issue New Policies at the reduced rates for all Insurances now effected, at the termination of the Present Policies, instead of Renewal Receipts.

FIRE INSURANCE.
DEW, RATCHFORD, AGENT for the ETHERINGTON INSURANCE COMPANY, of Hartford, Connecticut, continues to issue policies, and renewal receipts, for Insurance on Houses, Barns, Stores, Mills, and other buildings, vessels in port, or on the stocks, Household Furniture, Farmers' Stock, and Uterials, Mercantile, Manufactory, and every other description of property, against Loss or damage by Fire, on liberal terms.—It is a notorious fact, that the subject of insuring against fire, does not receive from the inhabitants of this Province that attention which its importance demands; and the premiums for fire insurances particularly, bear so very small a proportion to the value of the property insured, that much less sympathy is felt for those sufferers who may have neglected to avail themselves of the means of providing against such calamities.

THE capital of this Company, \$200,000, has been paid up, and invested in the best securities; independently of which, a SURPLUS FUND of more than \$25,000 has been set apart to meet the occasional claims for losses, and the stock bears a high premium. The Agent will at all times attend personally to the survey of buildings on which insurance is desired within the City; and applications in writing (post paid) from all other parts of the Province, describing the situation and the property to be insured, will receive prompt attention.

NOTICES.
THE Subscribers caution all Persons against purchasing a Note of Hand, granted by James Davidson, Jr. and Dominicus Milliken, of Magalloway, dated in October, 1830, payable to James T. Hanford, 12 months after date, for £23:15:9; or thereabouts: the said Note being forwarded in a letter to James T. Hanford, which it was originally given being a balance due from James Davidson, Jr. to the late firm of Downham & Wheeler, is now settled, the Note can be of no use to any person.

ALL Persons having any legal demands against the Estate of PETER DUFFUS, late of this City, Esquire, deceased, are requested to present the same, duly attested, within Twelve Months from this date; and all those indebted to said Estate, are desired to make immediate payment to

THE Subscribers having a Power of Attorney Note of Hand of Mr. THOMAS SMITH, late Merchant of this City, together with Mr. DANFORD, his Assignee, by which they are authorised to collect the Debts due Mr. SMITH, requesting all persons indebted to him to call and settle the same without delay, or they will be put in suit.

THOSE Persons who are indebted to the late Company of JAMES ROBERTSON & Co. of this City, will please call and settle with the Subscribers, who are the Attorneys of JOHN M'FAR, Assignee of the surviving Partner, ANDREW M'FAR, as well as of the said ANDREW LYMBURY; and such persons are hereby notified that payment to any other person or persons will be illegal.

ALL Persons having demands against the Estate of the late CAMPBELL GIBB, of this City, Teacher, will be pleased to present the same to the Subscribers, in Three Months from this date; and those indebted to said Estate, are requested to make immediate payment to
