be rig rei qu'il cet de vue ge ation ués The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\longrightarrow$  (meaning "CON-TINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

1	2	3

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont l'i couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière irnage de chaque microfiche, selon le cas: le symbole  $\longrightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrant la méthode.

# INSTRUCTIONS

FOR THE

# TRAINING OF VOLUNTEER CORPS.

I. VOLUTIER corps being composed, for the most part, of men whose time is much occupied with their ordinary pursuits, and who consequently are not able to spare many hours for drill, it is recommended that every volunteer be provided with a copy of this drill book, in order that he may read the instructions between the drills, which will be found a great as instructe.

If. No instructor could possibly teach a whole company of untrained men placed together in two ranks. In the following system the volunteers will first be instructed in small squads, in open files, and in single rank. The drills will then be repeated to larger squads in two ranks, and linally, when the volunteers have learned all the preliminary parts of their drill, they will be exercised together as a company.

III. When a corps of volunteers is first assembled, if there are no regular drill instructors attached to it, the comm.nding officer would do wisely at once to select a certain number of the members, in the proportion of about 10 or 12 per cent, to act as such. These men may alterwards become non-comrissioned officers, and rank according to the aptitude they show for military daties.

IV. The volunteers thus selected should first be trained in a squal by themselves, after which they will be employed in drilling the remainder of the corps, and time will eventually be gained.

V. The corps being assembled, and the drift instructors ready to begin their work, the colunteers will be divided into as many squads as there are instructors, and each instructor will proceed with the following drifts.

**VI.** The volunteers, when at drill, must remain perfectly silent, and give their whole attention to their instructors.

VII. The volunteers should be perfect in one drill, before they proceed to mother; each drill may be repeated as often as it is found necessary, and time will permit.

VIII. A system of mutual instruction will frequently be found advantageous; as the volunteers get more acquainted with their drill, each in succession may be called out, and directed to put the squad through one or two exercises, under the superintendence of the instructor.

### FIRST DRILL.

#### Section 1. Squad falling 1a.

The squad will fall in, in line, that is side by side. The right hand man being first placed, the remainder will then fall in one after the other, tonching very lightly towards him; the tidek part of the arm just below the chow is the purt that should keep the tonch, and will be the principal guide when marching.

#### Section 2. Telling off.

The volunteers will number off from right to left, each man calling out his number thus,— "one," "two," "three," &e., the right hand man being "one."

It must be explained to them that odd uumbers are called right files, even numbers left files.

#### Section 3. Method of Teaching. ,

In all the following exercises, the instructor will first give the word of command in the margia distinctly, in the ordinary tone of his voice, the volunteers remaining steady; he will then explain to them, in the words of the text, the movement required. This done, he will repeat the word of command in a lowd tone, the first or cantionary part, slowly and distinctly, the hast, or excentive word or aviiable, on which the men will move as directed, sharply and decided v.

# Section 4. Opening for Squad Drill.

RIGHT T

PACE FOR-WARD, LEFT FILES ONE PACE STEF and the left files will take on: mace to the rear, both with the lef ect, and then stand perfectly still.

### Section 5. Position of the Volunteer.

The instructor will place each volunteer in his proper position as follows:—The shoulders square to the front, heels together, toes turned out, so that the feet may form an angle of 60 degrees, the arms hanging straight down from the shoulders, palms of the hands flat to the

AC 901 P2 no. 10 20 PXXX

> thighs, the body straight, but inclining forward, so that the weight of it may bear principally on the fore part of the feet, the head erect, but not thrown back, and the eyes looking straight to the front.

> The above position should be perfectly easy and natural, without any stiffness or constraint.

## Section 6. Dressing in Open Files.

EVES-RIGHT.

DRESS.

On the words EYES-RIGHT, the eyes will be directed to the right with a slight turn of the head.

On the word DRESS, each volunteer, except the right-hand man, will extend his right arm, palm of the hand upwards, nails touching the shoulder of the volunteer on his right, at the same time he will take up his dressing in line by moving till he is just able to distinguish the lower part of the face of the second volunteer beyond him; in so doing, care must be taken that he carries his body by kward or forward with the feet, moving to his dressing with short quick steps, that his shoulders are kept perfectly square, and the position of the volunteer retained throughout.

EYE8-FRONT.

SQUAD,

STAND AT-

EASE.

On the words EYES-FRONT, the eyes and head are to be turned to the front, the arm dropped, and the first position of the volunteer resumed.

Dressing by the left will be practised in like manner.

Section 7. Standing at Ease.

On the word STAND AT EASE, bring the left foot about six inches to the front, the greater part of the weight of the body on the right leg, the left knee a little bent; at the same time strike the palms of the hands together, and pass the right hand over the back of the left, letting them hang easily together in front of the body; the whole position should be easy.

At the word ATTENTION, draw SQUADback the left foot, drop the hands ATTEN to the sides, and resume the first TION. position taught.

In facing, the left heel never quits the ground,

\* Section 10. Dressing in Close Files.

On the word EYES RIGHT, 10m the head and eyes slightly to the right, and on the word DRESS, shuffle up or back with very short steps, till you can just see the low-RIG11Ter part of the face of the second DRESS. man from you : at the same time, touch very lightly towards the flank on which you are dressing.

In like manner volunteers will be taught to dress by the lefi.

These practices should be repeated several times, after which the volunteers will be dismissed, in the following manner.

Section 11. Dismissing a Squad. TO THE

RIGHT-As already explained. FACE.

> On this word the volunteers will take a side pace to their left, at the same time striking the palms of their hands together in front of the body; after which they will disperse quietly.

To save time, the volunteers should be warned, previously to being dismissed, when and how they are to fall in for the next drill.

## SECOND DRILL.

## Section 1. Falling m, and Facings in Clove Files.

The squad will fall in, and tell off as at the first drilf, but will remain in single rank, in which order they will first practice the facings, judging their own time.

#### Section 2. Cadence and Longt of Pace.

It will not be necessary to teach volunteers to march as accurately and rigidly as soldiers of the line, but practice in the quick and double march is necessary to enable them to move together.

The length of the pace in the quick march

The time or cadence is, in the quick march march 108 steps in a minute, in the double march 150.

Section 3. Marching in Quick Time.

On the words, by THE RIGHT, OF BY THE LEFT, remain steady; it is simply to warn you which flank is to direct during the march The man on the named flank will take two points, such as stones or tufts of grass, one beyond the other, straight to his front to march on, and as he approaches the nearest point, when marching, he will select a fresh one further off, so that he will always have two to keep him straight : the remainder of the squad will touch very lightly towards him. The flank which direets is called the pivot flank, the opposite flank the reverse flank.

Before the squad is put in motion the time should be beaten on a drum ;\* when the drum ceases, the instructor will at once give his command.

\* To enable the drummer to bent time correctly, a pendulum should be used; a variety of instruments are constructed for this purpose, but a leaden plummet suspended by a string, that is not liable to stretch, will do as well. The length from the point of suspension to the centre of the plummet must be as follows:

			Iuches.	Hundredths.
Quick time	-	-	12	98
Double time.		-	6	26

BY THE RIGHT (OR LEFT).

On the word MARC	
gether with the left	foot, keeping
the time given on	the drum as
nearly as possible.	

QUICE-MARCH.

HALT.

RIGHT

ABOUT-

TURN.

While marching, retain the position already taught, the body inclining well forward; let the arms and hands hang easily, neither clinging to the thighs nor partaking of their movements.

On the word RALT, complete the pace you are in the act of making, bring the heels together, and then stand still.

The volunteers should not be halted if they lose step, but he allowed to move on some distance.

RIGHT ABOUT-FACE, BY THE RIGHT (OR LEFT) | back again. QUICK-MAECH, HALT-

FRONT. As already taught.

The volunteers should also be taught to turn to the right about while marching. The turn should be completed in three short steps. The fourth must be a full pace in the new direction.

## Section 4. Stepping Out and Stepping Short and Marking Time.

Although 30 inches is the regular pace in quick time, a volunteer may occasionally find it necessary to lengthen or shorten his pace in order to conform with the movements of the rest of the squad; he may also mark the time by raising the feet alternately, without gaining ground. When necessary, the whole squad may be ordered to MARK TIME. If required to mark time for purposes of drill, from the halt the command will be MARK TIME.QUICK, on which the squad will mark time, commencing with the left foot.

#### Section 5. Wheeling.

NIGHT- { On the word WHEEL, the right-WHEEL, } hand man will face to the right. On the word MARCH, the righthand man will stand fast; the remainder of the volunteers will wheel round the right or pivot man, tonehing towards him and looking outwards for the dressing. The left-hand or outward man will move at a full pace of 30 inches and look inwards.

On the word NALT, the squad will halt, and every man will look to his front, unless ordered to dress.

Wheeling to the left will be practised in like manner.

A squad may also wheel in any direction while on the march, by the words RIGHT (or LEFT) WHEEL, on which the pivot man will mark time, moving his shoulders round as the squad wheels round him; in other respects the wheel will be performed as already explained. On the word FORWARD, BY THE RIGHT (OR LEFT) the squad will move on in the direction it happens to be facing when the word is given.

A squad may be wheeled from the halt on a moveable pivot; the pivot man marking time, as he does when changing direction on the march. In this case the command will be on THE MOVE, RIGHT (OR LEFT) WHEEL, QUICK-MARCH - this would be done if the squad were intended to move forward in any direction alter wheeling.

Section 6. The Diagonal March

RIGHT (OR LEFT) | HALF- {

FACE.

As already taught.

On the word MARCH, step off, each man moving straight to his front and retaining during the march, his relative position with the rest of the squad.

HALT- As already described.

If the march has been properly performed when the squad is halted and fronted, it will' be found in a line parallel to its original position.

Volunteers while marching to the front in line will also be taught to incline to either flank by a half turn in the direction required, as follows:-- BY THE RIGHT (OF LEFT) QUICK-MARCH.

RIGHT (0) LEFT) HALF-TUEN.

FRONT-TURN BY THE RIGHT (OF LEFT).

If the ner while move str REAR TEN When right file

BY THE NIGHT (OR LEFT) As already described. QUICK-MARCH

On the word TURN, each volunteer will turn his body the eighth RIGHT (OR | LEFT) of a circle to the right (or left), as HALFdirected, and move on in a diagon-TURN. al direction, without checking the pace.

FRONT-On the word must turn to the TURN BY THE front and move on in line to the RIGHT (OR original front.

LEFT),

If the squad inclines to a flank in this manner while retiring, and is required again to move straight to the rear, the word will be REAR TURN.

When marching diagonally to the right, the right file will direct, when to the left, the left file will direct, without reference to the flank that was previously directing.

Sec. 7. Breaking off and Re-assembling.

TO THE RIGHT FACE, FO As already taught. A FEW MOMENTS ONLY, BREAK OFF.

RIGHT

The right or left hand man being placed, on the word FALL IN, the squad will form upon him at once FALL IN. in the place they previously occupicil.

This should be done frequently ; it is a very important practice.

Section 8. Marching in Double Tene.

The time will first be given on the drum.

BY THE	On the word MARCH, step off
RIGHT (OR	with a good long swinging step
LEFT).	(36 inches), the body well forward,
	and carried smoothly to the front,
	shoulders square, the whole posi-
	tion easy and clastic.
HALT.	As in quick time.

Volunteers must also be practised in changing the pace without halting, from quick to double and from double to quick.

## THIRD DRILL.

#### Section 1. File Marching.

Volunteers should never be required to march any distance in files, in close order, except when extending from "the Halt;" it is not therefore necessary for them to attain great accuracy in this difficult movement. The movements described in sections 2 and 3 of this drill are taught in files, as they will be found hereafter to apply also to fours.

TO THE

QUICK-

MARCH.

THE

BY THE

RIGHT (OR

LEFT).

RIGHT (OR As already described. LFTT)-FACE.

On the word MARCH, step off together with the left feet, one behind the other. In this march you must keep step, and take care to step off at once at a full pace.

On the words Halt-Front, halt 11.41.1% FRONT. 7 and face to the original front.

Volunteers while marching to the front in line should also be faught to furn to the right (or left) into filens follows:

On the word Turn, which should be given us the left foot is coming to the ground, turn the SQUAD TO body at right angles to the direction in which you have been moving, and move on at once, without chesting the pace, in the new direc. --- in file.

On the word Turn, which should be given as the right foot is coming to the ground, turn again to the front and move on without checking the pace in line. (OR LEFT).

> Volunteers will turn to the left in like manner, the word being given as the right foot is coming to the ground, after which they will turn to the front, the word being given as the left foot is coming to the ground.

A volunteer will always turn to the right, on the left foot ; and to the left on the right foot. If the word turn is not given as the proper foot is coming to the ground, the volunteer will move on one pace more and then turn.

#### Section 2. Wheeling in Files.

The squad, when marching in file, must be laught to wheel in either direction, files following suecessively without increasing or diminishing the distance from each other; in this movement each file will make its separate wheel on a pivot moveable in a small degree, without altering the cadence of the march, but lengthening the pace a little with the outward foot.

# Section 3. Files Forming Squad.

When a squad is in files, and the original right file is leading, it is called right in front. The direction in which the men are facing is then called the front ; their left, which was the original front, is termed the pivot flank ; their right the reverse flank. When the original left file is leading, the squad is called left in front ; right is then the pivol, and left the reverse flank.

FRONT FORM-SQUAD.

Right

(or Left)

Wheel.

Second Drill. As soon as the quarter circle is completed, the word Forward will FORWARD he given, if the march is to be continued, or Halt-Dress, if the squad is to be halted.

To the Front in Qaick Time .---When the squad 'marching' in files is ordered to form to the front, the

leading file will mark time ; the re

maining files, when right is in

front, will turn to the left; and

wheel to the right, looking to the

outward flank and feeling inwards, as described in section 4 of the

IN DOUBLE TIME. FRONT FORM-SQUAD.

TALT-

FRONT.

OR HALT-

DRESS.

To the Front in Double Time. -When a squad marching in files, right in front, is required to form to the front, in double time, the leading file will move on stendily in quick time, the remainder will make a half turn to the left, double up to their places, and take up the quick time successively as they arrive in line with the leading file.

To the Pivot Flank .- A squad will form to the pivot flank, the original front, simply by halting and fronting as already described. | bands.

ON THE LEADING FILE. RIGHT FORM SQUAD.

ON THE LEADING FH.E. RIGHT

ABOUT

FORM-

SQUAD.

RIGHT CLOSE.

QUICK-

MARCH.

To the Reverse Flank .--- When marching in file, right in front, at this word of command, the leading file will turn to the right, take two paces to his front and hait; the remainder of the squad will form on the left of the right file in succession.

To the Right About .- At this word the lending file will wheel to the right about, and take two paces to the front after wheeling ; the remainder of the squad will march on in files, wheeling to the right on the spot where the leading file has wheeled, forming to the right by snecessive files, as already described.

When marching in files, left in front, a squad will be formed to the front, to the pivot flank, to the reverse flank, that is the left, or to the left about, on the same principle as it is formed when the right is in front.

# Section 4. The Side or Closing Step.

On the word Alarch, each volunteer will turn his eyes slightly to the right, and will carry his right foot as far as the foot of the man next to him, and instantly bring up his lefi heel to the right, he will then proceed to take the next step in like manner. The directien must be kept in a straight line to the flank.

During the side step, the touch must be kept to the closing flank.

At the word Halt, the volunteers SOUADwill bring their heels together, turn HALT. their eyes to the front, and remain sleady.

Volunteers will also be practised in closing to the left in like manner.

Volunteers will also be practised in taking any named number of paces to either flank, the word to be given thus, Three Paces Right Close, Quick-March; no word Halt is then required.

Before dismissing the squad, when the drill is perfect, the volunteers should be warned to assemble the next time with their rifles in their

# FOURTH D RILL.

### Section 1. Manual Exercise.

This drill applies equally to corps armed with the long and short rifle.

The volunteers will fall in as usual, with their rifles in their right hands, and will first be taught to stand with their arms at the shoulder as follows ;

The rifle when at the Shoulder is to be carried in the right hand at the full extent of the arm, close to the side; guard to the front, with the forefinger and thumb round it, the remaining fingers under the cock ; the upper part of the barrel close in to the hollow of the shoulder.

They will then be taught the following movements:

Ist.

SECURE

ARMS.

TWO.

2nd.

SHOULDER .

ARMS.

Seize the rifle with the left hand at the lowest band, raising it a few inches by slightly bending the right arm, but without moving the barrel from the shoulder, and slip the thumb of the right hand under the cock, bringing the fingers ander the guard to the front, and slanting downwards : both arms close to the body ; left hand square with the left elbow.

Pass the rifle round to the left side, and cant the butt to the left rear, with the right hand, bringing the rifle under the arm ; then drop the right hand to the right side. The cock to be close up under the armpit, the barrel to be uppermost, the neuzzle slanding downwards to the hight front; the rifle to be firmly grasped with the left hand, which is to be rather below the hip; the left cloow a little to the rear : the lock not to be visible.

N.B. In marching or standing at case, the right hand is to grasp the rifle above the lowest band, the sling or stock to rest on the left arm, and the left hand to lay hold of the right arm above the wrist.

> Carry the rifle to the right side with the left hand, and seize it with the fore-finger and thumb of the right hand round the gnard (remaining fingers under the cock) at the full extent of the arm without constraint, the left hand to steady it in the shoulder, arm close to the body.

7

Bring the left hand to the left ) side.

Seize the rifle with the left hand, thumb and fingers round the piece, the little finger in line with the point of the right shorlder, but without moving the barrel therefrom, and close to the body,

Sho the rifle down with the left hand as low as the left arm will admit, keeping the arm and rifle close to the body, and with the right hand, which is to seize the rifle between the bands, place the burt quietly on the ground even with the toe of the right foot, bringing the left hand at the same instant to the left side ; the right arm to be slightly bent, the thumb round the barrel, pressed against the thigh, fingers shutting I towards the great d.

1st. At the word Fir, place the thumb of the right hand, as quick as po sible, behind the barrel.

2nd. As some as the word of command is fally given, take a gripe of the firelock, and push the mazz'e a little forward, grasping the beyonet with the left hand, the elbow kept well forward, so as not to interfere with the left-hand man, and fixing it with the utmost celerity. The instant this is done, return, as quick as possible, to the Order as above described, and stand perfeetly steady.

Raise the rifle with a short jerk of the right hand, and seize it as described in the "position at the MOULDER shoulder; at the same time ARMS. seize the vifle also with the left hand in line with the elbow to steady it in the shoulder, arm close to the body.

Bring the left hand to the left TWO. ) side.

6th. Seize the rifle with the left PRESENT- hand as in the first motion of ARMS. " Secure Arms."

9th.

CHARGE-

**BAYONETS** 

TWO.

Raise the rifle with the right hand perpendicularly from the shoulder to the *polse*, bringing it in front of the centre of the body, lock to the front; at the same time place the left hand smartly on the stock with the fingers pointing upwards, the thunk close to the forefinger, the point in line with the month, the wrist on the trigger guard, the left clow close to the that, the right clow and butt close to the body.

Bring the rifle down with a quick motion as low as the right hand will admit without constraint, guard to the front, and grasp it with the left hand, the little finger touching the projection above the lock plate, thumb between stock and barrel, at the same time draw back the right foot so that the hollow of it may touch the left heel; lightly holding the small of the butt with the relat hand, fingers pointing rather downwards; the rifle in this position to be tetally supported with the left hand, close in front of and opposite the centre of the body.

Bring the rifle to the right side, and seize it with the right hand, the thumb and forelinger round the guard at the tall extent of the arm, remaining fingers under the cock, bringing the left hand square with the left elbow and the right foot to its original position, both arms close to the body

Bring the left han by to the side.

The same as the first motion of "Secure Arms,"

Bring the rifle in the left hand to a diagonal position across the body, lock to the front, and seize the small of the butt at once with the right hand, thumb and fingers round the stock, the left wrist to be opposite the left breast, both elbows close to the body, the muzzle slanting upwards, so that the barrel may cross opposite the point of the left shoulder. On the word *Bayonets*, the frontrank men will make a right halfface, the right toes to point to the right, the left fall to the front, and bring down the rifle to nearly a horizontal position at at the right side, with the muzzle inclining a little nywards, the right wrist to rest against the hollow of the thigh below the hip, the themb of the right hand pointing to the numzle. The rear-rank men will stand still, remaining at the "Port."

Whenever a company in line charges with bayonets, the whole are in the first instance to advance in quick time with shouldered **arms**; at the command *Prepars to Charge*, the rifles of the front rank will be bronght to the long trail, and those of the rear rank to the slope; at the word *Charge*, the rifles of the front rank will be bronght to the charging position, and the pace increased to the double march, carefully avoiding too much hurry. On the word *halt*, both ranks will halt and shoulder arms.

10/h. Raise the rifle to a perpendicular position at the right side, and seize it with the right hand as described in the position "at the shoutder," at the same time face to the front, the left hand holding the piece above the lowest band square with the left elbow, both atms square to the body.

Two. (Bring the left hand to the left) and to the left

11th. SLOPE-A R 51 S. Secure Arms."

GASE.

TWO.

THREE.

15th.

ORDER-

ARMS.

Volunteers will be taught these movements, | judging their own time, in the same manner as they have been taught the facings.

When the volunteers are required to go through the manual exercise at a review, they will perform it judging their own time. If the platoon exercise is to follow, the three last commands will be omitted, viz., Order Arms, Unfix Bayonets, Stand at Ease. The platoon exercise will be performed with fixed bayonets.

Section 3. Marching with Arms.

The volunteers will then be practiced, with their arms, in marching and turning, in quick and double time. In turning to the right about with trailed arms, they will bring the rifle to a perpendicular position on the first step of the turn, and trail again on the fourth.

When moving the trailed arms, at the word Halt, arms are to be ordered, and when the men are at the halt, with ordered aims, on the word Quick or Double March being given, arms are to be trailed, as they step off, without any command to that effect. If volunteers are required to move a named number of paces backward or forward, or to move to a flank by the side step, when at ordered arms, the rifle is merely to be raised from the ground, the barrel being kept close to the shoulder; this position of the rifle is called the shert trail.

In ordering arms from any position, the greatest care is to be taken to prevent the rifle falling on, or striking the ground, and it is not to be unnecessarily shaken in performing any of the motions of the manual exercise.

#### Section 4. Method of Piling Arms.

For this practice the squad will be formed in two ranks or lines, one behind the other, the rear rank a pace and a half (45 inches) trom the front rank to the heels of the other. It will then be told off from right to left, the front-rank men only ealling out the numbers, but the rear-rank men equally attending to and remembering them.

At the word Pile, the front rank will draw back their right feet in order to face to the right about; at the word Arms, the front rank will face about, bringing their rifles with them to ordered arms; the whole will then place the butts of their rifles botween their feet, locks from them, barrets to the right, after which the right file rear rank and the left file front rank will incline their rifles towards each other, and cross rannods. The frontrank man of the left file, with his left hand, round the muzzle, bearing it from him, and with the right hand he will pass his own ramrod between the ramrods and muzzles of the two firelocks already crossed; the left file rear rank will then lodge his rifle between the muzzles of the rifles of the front rank, sling uppermost. When there is an odd file, that is a right file without a left file, each man of the file will lodge his rifle against the pile nearest his right hand,

STAND CLEAR.

STAPD TO,

ARMS.

10

PILE-ARMS

Ranks take a pace of ten inches backwards and face towards the pivot flank.

Ranks facing towards the pivot flank, will face inwards and elose on their arms by taking a pace of ten inches forward.

At the word Unpile, seize the rifle with the right hand under the top band, front rank at the same time drawing back their right feet in order to face to the UNPILEright about; at the word Arms, unlock the ranirods without hurry, by inclining the butts inwards, and come to ordered arms, the I front rank will then *front*.

It is necessary to be eareful in piling and unpiling arms to prevent damage being done to the ramrods and sights.

Odd numbers are right files, even numbers left files, as already described, excepting when the left file of the squad is an odd number, in which case it will be a left file, and

the left f will be left of th file, that Should t rank ma invariabl

#### Section 1. Platoon Exercise.

PLATOON To serve as a caution, the squad EXERCISE standing with shouldered arms. MOTIONS.

STANDING. From the Shoulder -- Seize the rifle as described in t .st movement of "order arms," and make FRONT (OR a half face to the right, left toes pointing to the front, right toes PREPARE to the right, eyes to the front. TO LOAD.

> As a Front Rank.-Carry the left foot ten inches to the left front in a diagonal direction, carrying the body with it. .1s a rear runk .-- Carry the left foot six inches to the front, moving the body with it, shoulders to be square to the front. Bring the rifle down in the left hand, and place the batt quietly on the ground against the inside of the left foot, barrel to the front; at the same time slip up the left hand, and seize the rifle round the nose eap, thumb pointing to the muzzle, arm close to the side; carry the right hand at once to the pouch (elbow to the rear), take up a cartridge, holding it with the forelinger and thumb close to the top, with the bullet in the palm of the hand.

Bring the cartridge to the forefinger and thumb of the left hand, and carefully tear off the end without spilling the powder, then replace the finger and thumb as before.

Bring the eartridge to the muzzle, and pour the powder into the barrel, turning the elbow up, and palm of the hand to the front,

Reserve the cartridge by turning the knuckles to the front, and put the bullet in the barrel nearly as far as the top, still holding the paper close above the bullet, elbow up.

By a turn of the wrist from left to right, and dropping the elbow into the side, tear off the paper; when this motion is completed, the little finger is to rest against the side of the barrel, the knuckles inclining towards the ground.

Seize the head of the rannod between the forefinger and thumb, knuckles towards the body.

Force the ramrod up and seize it in the middle between the first two fingers and thumb of the right hand, the remaining fingers to be closed in the hand, knuckles towards the body, elbow as high as the wrist.

Draw the rannod straight out, turn it over towards the front, and place the head of it on the bullet, still holding the ramrod with the two first fingers closed in the hand, knuckles to the front, elbow near to the ramrod, shoulders square.

Force the bullet down till the second finger touches the barrel, bringing the elbow close to the body.

Slip the right hand up to the point of the ramrod, and seize it between the first two fingers and thumb, knuckles to the front, the arm to be kept as close to the ramrod as possible.

Force the bullet steadily to the bottom, bringing the elbow down close to the body, inclining the knuckles to the right.

By two firm pressures, raising the ramrod about one inch on each occasion, ascertain that the bullet is resting on the powder; all strokes which may indent the point of the bullet to be carefully avoided.

# RETURN.

WWO

Draw up the ramrod and seize it in the middle as in the first ( motion of the " rod.'

Draw the ramrod straight out, turn it over, the point towards the front, and put it into its place, pressing it towards the body in so doing to prevent the point catching the hand, raise the right hand, place the second joint of the forefinger on the head of the rainrod and force it home; then seize it between the second joint of the forefinger and thumb, and slip the left hand down at the same instant to its full extent and seize the rifle.

Turn the shoulders and body a half face to the right without moving the feet, bring the rifle to the right side, in a horizontal position, with the left hand, which will grasp it behind the lower band, thumb between stock and barrel, at the same time nieet the small of the butt with the right hand, lingers behind the trigger guard, half cock the rifle with the thumb, left arm close to the body. As a front rank, the small of the butt must be pressed against the hip; as a rear rank, four inches above it.

Advance the fingers to the nipple, and with the forefinger ( throw off the old cap.

Carry the hand to the cap pocket, and take up a cap between the forcinger and thumb, the remaining fingers to be closed in the hand, elbow to the rear.

Put the cap straight upon the nipple, looking to the front after doing so.

Press the cap home with the flat part of the thumb, with the fingers closed in the hand and against the lock plate.

Bring the hand to the "small" of the batt, and hold it lightly with the fingers behind the trigger guard, thumb pointing to the muzzle.

Carry the right hand to the sight, and with the forefinger and thumb adjust the sliding bar, placing the top even with the line, or to the place that indicates the elevation necessary for the distance named; then raise the fiap without a jerk, from the top. if required ; after which bring the hand back to the small of the butt, and full cock the rifle, and hold it lightly with the fingers behind the trigger guard, thumb pointing to the muzzle, and fix the eye steadfastly on some ob-

jeet in front. Bring the rifle to the shoulder. carrying it well to the front, so as to clear the body as it goes up, keeping a firm hold of it behind the lower band with the left hand; raise the right elbow as high as the shoulder and a little forward; press the butt against the snoulder with the left hand,

PRESENT.

er without the n of the hand, the cock fulls eeping the eye on the object.

Bring the rifle to the capping position, and shut down the flap, but without moving the sliding bar, and immediately seize the iffe with the right hand close in front of the left, fore arm close to the barrel; and after a pause, taking the time from the right, turn the barrel at once downwards, and bring the rifte to a perpendicular position opposite the right breast in the right hand, then seize it with the left hand at the nose cap, and come to the position of "prepare to load," second motion.

The volunteer should always be taught to aim at some positive object when bringing his rifle to the "Present;" for this purpose small bulls-eyes should be painted on a wall or fence, one above another, two and four feet from the ground, and at lateral distances of three feet; they should be white, the size of a crown piece, with black centres the size of a shilling.

Particular attention is to be given to the following points, in the "Present." The body is to be firm and upright, the butt to be pressed firmly into the hollow of the shoulder, the rifle to be held firmly in the left hand the sight to be upright, and in aiming, the muzzle to be steadily raised until the top of the fore-sight is aligned upon the object on which the right eye is fixed, through the bottom of the notch of the back-sight, the left eye being closed and the breathing restrained. In delivering the fire, the trigger is to be moved by pressure alone, without any motion of the hand, eye, or elbow; the right eye to continue fixed on the object after snapping, to ascertain if the aim has been deranged by the movement of the trigger or body.

#### To Shoulder and Order from the Section 2. Capping Position.

SHOULDER ARMS.

TWO.

FIVE.

READY. Drop the left hand to the side.

To Shoulder .- At the word shoulder, bring the left foot back

to the right. At the word arms,

turn upon the heels to the front,

at the same time bring the rifle

to its place at the shoulder, seiz-

ing it with the right hand.

To Order .- At the word "order," bring the left foot back to the right, and seize the rifle with the right hand close in front of the left; fore-arm close to the barrel. At the word arms, face to the front, and with the right hand place the butt quietly on the ground, and drop the left arm to the left side, in the position at ordered arms, explained in the manual exercise.

#### To Load from the Order. Section 3.

When required to load from the "Order," on the words Prepare to Load, the volunteer will make a half face to the right, as in loading from the shoulder, moving his rifle with the body. On the word Two, he will bring his rifle with the right hand to the loading position, seizing it at the nose cap with the left hand; in all other respects he will proceed as already described.

#### Section 4. To come to the "Ready."

From the Shoulder .- Make a right half face, the left foot to point to the front, the right foot to the right, at the same time seize the rifle with the left hand, the little finger in line with the l right elbow.

Bring the rifle to a horizontal position at the right side, grasp-ing it firmly with the left hand behind the lowest band, thumb between the stock and barrel, left arm close to the body; as a front rank the small of the butt must be pressed against the hip; as a rear rank, four inches above it. Then carry the left foot, as a front rank, ten inches to the left front in a diagonal direction, carrying the body with it; as a rear rank, six inches to the front, moving the body with it, and proceed as already described in the "Ready."

From the Order .- Make a right half face as before described, carrying the rifle round with the body.

After which the volunteers will be taught to load in quick time. That is, on the word in quick time load, they will go, nrough all the motions, and when loaded and capped they will wait at half-cock, at the capping position for further orders. When a corps is required to go through the platoon exercise at a review or inspection it will be performed first in slow time then in quick time, as above doscribed, but not by motions.

## SIXTH DRILL.

Section 1. Formation of Squad in Two Ranks.

Three or four squads will now fall in together with ordered arms in two ranks, formed as described in Section 4 of the Fourth Drill.

Section 2. Telling off.

The squad will tell off as described in Section 4 of the Fourth Drill.

Section 3. Manual and Pletoon Exercises.

The volunteers will then be ordered to shoulder arms, and will be practised in two ranks in the menual and platoon exercise, as already taught. Before loading or firing, the rear-rank men will, on the caution, invariably take a pace of 34 inches to the front, so as to lock up close to the front rank; and after they cease firing and are loaded, the rearrank meu will take a pace to the rear, to resume their proper distance. When formed in two ranks the cautions "as a front (or rear) rank" are of course unnecessary.

#### Section 4. Movements in two ranks.

Volunteers must also practise, in two ranks, all the movements they have learned in one, the rear-rank men being careful to preserve their proper dist nees from their respective front-rank men, and their covering in rear of them.

When wheeling from the halt, the pivot man of the front rank will face as already described, his rear-rank man will uncover and double in rear of the second file, thus, when wheeling to the right, the right-hand man of the front rank will face to the right, his rearrank man will take one pace to the rear with his right foot, then one pace to his left with his left foot; he will regain his place during the wheel. If a squad is required to wheel back from the halt, the caution will first be

given, on which the pivot man will face, but in wheeling back his rear-rank man will not uncover; the volunteers will then be faced about and wheeled rear rank in front.

When marching in files the rear-rank meu must dress by their respective front-rank men.

In forming to the reverse flank, or to the right or left about, the rear rank will proceed as described in Section 3 of the Third Drill; the froat-rank men will move round their respective rear-rank men, and form successively in front of them; when forming to the front the rear-rank man of the leading file will drop to the rear of the front-rank man while the squad is forming; the rest of the rear-rank men will follow their front-rank men.

In the diagonal march the rear-rank men must preserve their relative positions with their front-rank men, so that when they halt and front they will be found in their proper places.

#### Section 5. Firings.

The volunteers must also be practised in firing volleys and in independent file firing, as follows.—

	VolleysOn this caution the
VOLLEY.	Volleys.—On this caution the rear rank will close up, as above directed.

AT-YARDS ( As already taught in the planEADY. ( toon exercise.

PRESENT. As already taught.

FILE FIR-

ING FROM

THE RIGHT | File firing.—On this caution (or LEFT) the rear rank will close up, an or FROM above described.

BOTH FLANKS.

COMMENCE .

On this word the flank file will make ready and fire, front-rank man first, rear-rank man immediately afterwards; they will then load; as the flank file comes to the present the next file will make ready, and so on for the first round, after which the files will fire and load independently. When only a few men are firing in the same direction, they must fire the first round very slowly, each file waiting till the file next to it is nearly reloaded; but when the whole corps is firing in one line the men may fire rather faster.

.

On this word each file will complete its loading, and "shoulder arms;" if any man has "made ready," he will half cock his rifle; the rear-rank men will resume their proper distance as they shoulder.

As a general rule it will be advisable, when firing volleys or file firing, to direct the front rank to fire kneeling.

Section 6. The Formation of Fours.

SQUAD. FOURS-DEEP.

On the word *deep*, the left files will double behind the right files by taking a pace to the rear with their left feet, and a pace to the right with their right feet.

On the word front, the left files will move up in line with the right files, by taking a pace to the left with their left feet, and a pace to the front with their right feet.

On the word about, the whole squad will face to the right-about. and the left files will double in the proper rear of the right files. by taking a pace to the front with the right feet, and a pace to the left with their left feet.

On the word front, the whole squad will face to the right about and re-form two-deep, as already described.

On the word right, the squad will face to the right, and the left files will form on the right of the right files, by taking one pace to the right with their right feet, and one pace to the front with their left feet.

On the word front, the squad will face to the left and re-form I two deep, as already described.

On the word left, the squad will face to the left, and the left files will form on the left of the right files, by taking one pace to the left with their left feet and one pace to the rear with their right l teet.

On the word front, the squad will face to the right and re-form FRONT. I two deep, as already described.

By the arrangement of the odd and blank files, when such occur, as explained in Section 4 of the Fourth Drill, the left four of a squad or company will always be complete

The squad will be practised to form fours on the march. In these formations the left files will move precisely in the same manner as they do when forming from the halt, the right files marking time two paces to enable them to do so. When forming fours to a flank, the volunteers will turn instead of facing. When advancing or retiring, the words of command for forming four deep will be, fours deep, and for forming two deep, form two deep. When moving to a flank in fours, on the words. front (or rear)-turn, the volunteers will turn as ordered, and then form two deep without further word of command.

A squad moving to a flank in fours may be ordered to form two deep, on which the left files will fall back or step up to their places in file; and at the word form four deep, the left files will resume their places in fours.

S. 7.- Wheeling in Fours, and forming Squad from Fours.

Wheeling .-- A squad taking ground to a flank by fours, will wheel to the right or left, in the same manner as it wheels in files, eachfour wheeling successively round the same point.

Forming to the Front .--- When a squad taking ground to a flank by fours is ordered to form to the front, the leading file will mark time, the remainder will turn, if right is in front, to the left, if left is in front, to the right, form two deep, and proceed as described in Section 4 of this Drill.

Forming to the Reverse Flank or to the Right or Left about .- When a squad is ordered to form to the reverse flank, or to the right or left about, it will at once form two deep, and then proceed as described in Section 4 of this Drill.

#### Section 8.- A Squad formed in Fours closing on a Flank, and Re-forming Two Deep.

ON THE A squad having formed four deep must be taught to close on RIGHT (OR ] the right or left; the four men on LEFT) the named flank standing fast, the CLOSE. QUICKremainder closing on them by the MARCH. | side step.

g formed four ght to close on he four men on anding fast, the on them by the FROM THE RIGHT (OR LEFT) RE-FORM TWO DEEP QUICK -M A R C H.

The re-forming two deep, on the words quick-march, the four men on the named flank will stand fast, the remainder will open out from them by the side step, and the left files will move up to their t. places in line in succession as the intervals are oneued for them.

These formations must also be practiced during the march; on the words on the right (or left), close the files on the named finalk will continue to march straight to their front, with a short pace, the remainder will close on them by the diagonal march.

On the words from the right (or left,) reform two deep, the four men on the named flank will continue to march to the front with a short pace, the remainder will incline outwards, and the left files will move up into the intervals, in succession, as they are opened for them.

A large squad or company may in like manner be taught to close ou its centre, and re-form two deep from the centre.

### SEVENTH DRILL.

Section 1. General Rules for Extending in Skirmishing Order.

I. The volunteers will next be taught the following movements, which are necessary in skirmishing:

II. An intelligent man should be placed in the centre of the squad for these movements.

III. In extending, as a general rule, it is the business of the rear-rank man of each file to regulate the distance, and of the frontrank man to look to the direction.

IV. The number of paces that files are to extend from each other may be specified in the caution by the commander thus:—three paces from the right-extend. When no number is specified, six paces will be the regulated distance between files.

V. Men in extended order may be directed to increase the distance between their files any given number of paces, from either flank, the centre, or any named file. The command will be given thus, to eight paces from the right-extend; if no number of paces is specified, or if the bugle sound the extend, the skirmishers will open out one-half more than their original extension; thus, if they are at six paces distance, they will open to nine.

A squad may be extended from the right file, left file, or centre file or from any other mamed file. Section 2. Extending from the Halt.

The front-rank men will move direct to the flank, covering correctly on the march, the rear-rank men will cast their eyes over the inward shoulder, and tap their respective front-rank men, as a signal to halt, front, and kneel, when they have gained their proper distances.

#### Section 3. Closing on the Halt.

ON THE RIGHT (CENTRF, OR NO — FILE)-CLOSE. On the word *Close*, the file on the named flank, or the centre or named file, will raise, order **arms**, and stand at ease; the remainder will rise, face towards it, **and** close at quick time, halting, fronting, ordering arms, and standing at ease, in succession as they **ar**rive at their places.

The file on which the skirmishers close may be faced in any direction; the remainder will form upon it, facing in the same direction.

#### Section 4. Extending on the March.

On the word Extend, the file on the named flank, or the centre or named file, will continue to move straight forward in quick time; the remainder will make a FROM THE half turn from the flank from RIGHT which they are ordered to extend (LEFT, and move off in double time. As CENTRE, soon as each file has extended to or No its proper distance, it will turn to FILE)its front and resume the quick EXTRND. time, the rear-rank men covering their front-rank men, and the whole keeping in line with the directing file.

When a company, extending on the march, is halted before all the files are extended, the remainder will make a second half turn outwards into file, break into quick time, shoulder arms, and complete their extension as from the halt.

#### Section 5. Closing on the March.

ON THE RIGHT (LEFT CENTRE OR NO -FILE)-ADVANCE.

On the word Close, the file on the named flank, or the centre or named file, will move steadily on in quick time; the remainder will make a half turn towards it and close in double time, turuing to the front and resuming the quick time as they arrive at their place.

When a company, closing on the march, is halted before all the files are closed, the remainder will make a second half turn inwards into file, break into quick time, and complete the formation as from the halt.

Section 6. Advancing in Skirmishing Order

COMPANY ADVANCE.

On the word Advance, the volunteers will raise and step off in quick time; with trailed arms, keeping their distances from the centre.

COMPANY-RETIRE.

Section 7. Retiring in Skirmishing Order. On the word Retire, the volunteers will rise, face to the right about, and step off in quick time, rear-rank in front, keeping their distances from the centre.

Volunteers in exended order will invariably face or turn to the right about, whether they are advancing, retiring, firing or not firing.

#### Section 8. Inclining to a Flank.

TO THE BIGHT (OR LEFT) INCLINE.

ADVANCE,

OR

RETIRE.

On the word Incline, the skirmishers will make a half turn to the flank to which they are ordered to incline, and move in a diagonal direction, until they are ordered to resumo their orginal direction to the front or rear, by the word of command Advance or Retire. If the skirmishers have made a half turn, and are again ordered to incline in the same direction, on the second word Incline, they will complete the turn, and will take ground to the flank in file.

On the word halt, when volunteers are inclining, they halt, front, RALT. and Imeel.

When inclining to the right, the right file directs; when inclining to the left, the left tile directs. On the word advance or retire, the centre file resumes the directior .

#### Skirmishers changing Front or Section 9 Direction.

1. From the Halt .- A line of shirmishers halted, can change front on any two named files that may be placed as a base for the rest to form upon.

A change of front in this manner may be made at any angle.

CHANGE

FRONT

TO THE On the caution the two named RIGHT (OR files will rise, and the instructor LEFT) ON will dress them in the direction THE TWO required; as soon as they are RIGHT (OR placed they will again kneel.

LEFT) FILES.

DOUBLE-

MARCH.

On the word march, the whole will rise, and if all the files are to be thrown forward on a flank. they will make a half-face inwards, and run across by the shortest way to their places in the new line, dressing on the two base files, as they successively halt, and then kneeling.

If all the files are to be thrown back on either flank, they will turn round, move across and halt. front and kneel successively as they arrive at their places in the new line.

If the change is on two central files, part of the company will be thrown forward and the rest back, as above described.

On the March .- A line of skirmishers on the march may change its direction gradually, on the same principle as a company wheels when SKIRMISH-ERS, RIGHT in close order. On the word wheel, (OR LEFT) the pivot file will halt, and the re-WHEEL. mainder will circle round it. the front-rank men looking outwards for the dressing, and the rear-rank men keeping the distances from the pivot flank.

On the word forward, the whole line will advance by the centre in EORWARD. the new direction.

Section 10. Firing in Skirmishing Order.

The men of a file must always work together : both men should never be unloaded at the same time; they will fire alternately, commencing with the front-rank man. On broken ground the volunteers must take advantage of all cover, and when advancing or retiring they will ran CAV RE

s work together ; aded at the same ely, commencing broken ground itage of all cover. g they will ran from one place of cover to another, the two men of each file keeping together and taking care not to get in the way of other files. When moving, the loaded man should always be nearest to the enemy.

Section 11. Forming Rallying Square.

The instructor will place an officer or man as a rallying point in front of the squad, facing the supposed enemy. He will then call out any two men from the ranks, and direct them to fall in on the right and left of the rallying point, facing outwards; then three more men, who will form in front of those posted, facing to the front; then three more, who will form in rear of them, facing to the rear. The instuctor will next cause four men to take post at the four angles, and others to complete the different faces of the sqaure, and so on, till all the men are formed. Each man as he moves to his place will fix his bayonet. After this, the squad will be dispersed, and the rallying point being placed, the volunteers will be ordered to form rallying square, on which they will run in, and form as above described ; the great object is to form a compact mass us quickly as possible; provided the volunteers crowd close together round the rallying point, and face outward, it matters little what places they take.

Section 12. Preparing for Cavalry.

When the square is to prepare for cavalry, upon the word ready. the first and second rank will sink down at once upon the knee, asa front and rear rank kneeling, in the manner prescribed when at the capping position, and at the same time they will place the butts of their rifles on the ground against t e inside of their right knees, locks turned uppermost, the muzzle slanting upwards, so that the point of the bayonet will be about the height of a horse's nose; the left CAVALRY, { hand to have a firm grasp of the rifle immediately above the lowest band, the right hand holding the small of the butt, the left arm to rest upon the thigh about six inches in rear of the left knee. The third and fourth ranks will make ready as a rear rank standing. Muzzles of rifles to be inclined upwards. The standing ranks will fire by files, and the kneeling ranks in volleys h- word of command.

FREPARE

TOR

READY.

When the sides of the square are less than four deep the front rank only will kneel.

In this manner dispersed parties may be formed to resist an attack of cavalry in an open country, either in one or more squares, according as they may be more or less dispersed ; each square consisting of any number of men. Every man will run to the nearest rallying point, but the larger the square the safer it will be.

Section 13. Re-forming Squad.

When the square is to be reformed into a squad in line, the right or left hand man will be RE-FORM placed facing the supposed enemy, SQUAD. and the remainder of the men will form upon him.

#### EIGHTH DRILL.

### Section 1. Forming and Numbering Off the Companies.

The company will fall in in two ranks with ordered arms, in the same manner as the squads have been taught.

It will then number off from right to left. and will be divided into two subdivisions ; and four sections, as nearly as possible of equal strength.

When one subdivision has a file more than the other, it will be the right subdivision ; if one section has a file more than the rest, it will be the first or section ; when two sections have a file more each than the other two, they will be the first and fourth, that is, the right and left sections. If three sections have a file each more than the remaining section, the first. second, and fourth will have the extra files, the third being the weakest.

# Section 2. Post of Officers.

When a company is in column with other companies the post of the captain or senior officer present is on the pivot flank of the front rank; the remaining officers and the serjeants are called supernumeraries. The post of the senior supernumerary is in the rear of the second file from the reverse flank, that of the second senior in rear of the centre of the company, the rest of the supernumeries will divide equally the spaces in the rear of the two subdivisions.

When a company is in line with other companies or is formed singly in line, the post of the captain is on the right of the front rank, that of the senior supernumerary in rear of the

second file from the left, the otther supernumeraries will be posted as in column.

In column the post of the covering serjeant is in rear of the second file from the pivot flank. In line, on the right of the rear rank, covering the captain.

When a company is formed in column of subdivisions, the post of the captain is on the pivot flank of the leading subdivision, that of renior supernumerary on the pivot flank of the tear subdivion, and that of the second file from rhe reverse flank of the rear subdivision. the iest of the supernumeraries retain their posts in rear of their respective subdivisions.

When a company is formed in column of sections, the post of the captain is on the pivot flank of the leading section, that of the senior supernumerary on the pivot flank of the third section, that of the second senior supernumerary on the pivot flank of the fourth section, and that of the third senior supernumerary on the pivot flank of the second section, the rest of the supernumeraries retain the posts they occupied in line.

In column of subdivision or sections, the post of the covering serjeant is in rear of the second file from the pivot flauk of the leading subdivision or section.

In the above formations the supernumeraries form a third or supernumerary rank, which is one pace from the rear rank when the company is in column with others, or is formed in column of subdivisions or sections, and three paces when it is in line with others or is formed singly in line.

When there is not a sufficient number of serjeants with a company, corporals should be taken from the ranks to take their places.

When a company is in column of subdivisious or sections and the right subdivision or section is leading, the column is called right in front : when the left subdivision or section is leading. the column is called left in front. When right in front, the left is the pivot flank. The same rule applies equally to the companies of a battalion, a column being called Right in front when number 1 company (which is on the right when in line) is leading, and Left in front when the highest numbered company (which is on the left when in line) is leading.

When the captain falls out in order to drill his company the next senior will take his place.

#### Section 3. Dispersing and Assembling.

Volunteers after being told off and proved should be wheeled into column of sections; and I

their leaders placed in front of them, so that they may know each other, and during a drill the company should frequently be dispersed and then ordered to close again, on which the men will run in and form on their section leaders, who will stand in a row one behind the other, to mark the left of their respective seetions in regular order, at section distance from each other. Volunteers must also be taught to form company at once on the captain, or on either of the flank men.

#### Section 4. Advancing, Retiring. Wheeling, &c.

The company will be practised in advancing and retiring in line, in wheeling, and in all the movements they have learned in squad drill in two ranks.

#### Wheeling into Column of Sub. Section 5. divisions or Sections.

LODGE-ARMS.

At this word the men will port arms, and in so doing the front rank will take a side pace to the left, and the rear-rank will take a side pace to the right, and after a pause the company will break off, and quit the parades without notice.

A company without arms will be dismissed in the same manner as a squad, see Section 11 of the First Drill, excepting that the rear-rank will take a side pace to the right.

#### NINTH DRILL.

### Section 1. The Company Extending. Closing, &c.

The company must be practised in extending and closing from the halt and on the march, advancing and retiring, inclining to the right and left, and changing front, as already described.

The volunteers should also be instructed to form close column of sections from extended order on any section ; but their usual formation will be on the second, that section closing on its left file. They should also be practised in forming rallying square or squares, as already described.

One subdivision should also be taught to extend while the other remains at 150 or 200 paces in rear of its centre to support it ; when two companies are moving together, one will support the other.

#### Section 2. The Alarm, or Look out for Cavalry.

When skirmishers are unexpectedly attacked by cavalry, the bugle will sound the alarm, or the words look out for cavalry will be given, on which the skirmishers will at once form close column of sections, and prepare for cavalry, unless in disorder or scattered, in which case they will form rallying squares, which may be signified for parade purposes by the double being sounded after the alarm. The supports will form close columns of sections and advance by command of their captains. If one subdivision only is skirmishing, supported by the other, on the *alarm* each will form a rallying square. When the *commence firing* sounds, the support will halt and prepare for cavalry, and both squares will commones firing.

#### Section 3. Skirmishers Closing on the Support.

Calling in Skirmishers.—On the words close on supports, or the bugle sound close, the two centre files will retire in quick time, opening out as they move to the rear to clear the front of the support; the remaining files will close upon them on the march; when at quarter distance in rear of the support they will turn inwards, shouldering arms as they turn; and when they meet in rear of the centre of the support, they will halt front, order arms, and stand at case.

Closing for Cavalry .- When skirmishers are not closely pressed by cavalry, the word or sound close will be given, followed by the alarm or word look out for cavalry, on which the support will advance, and if it is a company it will form subdivisions on the march, if a subdivision it will form sections. The skirmishers will move to the rear at the double, closing on the inward files or subdivisions (or sections), as described in the preceding paragraph, except that the centre files will incline outwards when they commence to retire, in order to keep clear of the front of their support. As the skirmishers approach the support, the latter will halt, the rear subdivision (or section) closing on the leading subdivision (or section), each fixing bayonets as it comes to the halt; the skirmishers will turn inwards, and form close column or subdivions (or sections) in rear of the supports, fixing bayonets as they halt and front. The square will then be ordered to prepare for cavalry, as described in Section 7 of the Eighth Drill.

If skirmishers cannot reach the support, which will be signified on parade by repeating be alarm, they will, if a company, form comtext Equare, if a subdivision they will form a super the support will also form

relating quare; the support will also form actively or callying square.

# section 4. Relieving Skirmishers.

When skirmishers have suffered considerable loss, when they are fatigued by continued rapid movements, or when their supply of ammanition is getting low, it will be advisable to relieve them.

The most convenient method of effecting the relief is to order the support to extend and relieve its skirmishers.

When retiring, the successive relief of the skirmishers by supports, is the most effectual method of keeping an enemy in check. The officer commanding a support should therefore be constantly on the look-out for good positions, in which he may extend his men with advantage, such as a bank, a ditch, a wall, or such like cover. After relieving, the new skirmishers must hold their position until ordered to continue the retreat. retir

S

T

W

E

The following general rules are laid down for relieving skirmishers under the different circumstances:

Relieving Skirmshers that are halted.—To relieve skirmishers that are halted, the support will extend in the rear, out of immediate reach of the eneny's fire, and then run up to the old line. The old skirmishers on being relieved, will run straight to their rear, and when out of immediate reach of the enemy's fire, will close on the centre and form support.

Should an immediato advance be intended, the old skirmishers, on being relieved, will remain lying down till the new skirmishers have gained sufficient distance to their front; they will then rise, close on the centre, and form support.

Relieving Skirmishers that are advancing. —The support will extend on the march and then double up to the old skirmishers, chauging into quick time as it passes through them, on which the old line will lie down and wait till the new skirmishers are sufficiently advanced to protect them from immediate fire, when they will rise and close to the centre, forming the support.

Relieving Sharroshers that are returing.— To relieve skiencher that are retiring, the support with halt, and front, at a considerable distance in the rear, and will then extend, each man, if possible, getting under cover. When the old skirmishers arrive within about twenty or thirty paces of the new, they will run through them to the rear and then close on the centre and form support.

## Section 5. Reinforcing or Extending a line of Skirmishers to a Flank.

Reinforcing.—Any part of a line of skirmishers may be reinforced, by throwing forward the supports or part of them in the same manner as they are thrown forward when relieving skirmishers, but on joining the old line, both will remain and skirmish together, dividing the distances. A line of skirmishers may be diminished by calling in any portion of them, who will relief of the most effectual check. The sold therefore good positions, a with advanwall, or such new skirmishtil ordered to

of a line of skirthrowing forward a the same manner hen relieving skirold line, both will dividing the diss may be diminishof them, who will retire in the same manner as skirmishers are brought in when relieved. In this case, the remaining skirmishers will divide the space left by those who have retired.

Extending.—When it is necessary to extend exirmishers to a flank, without weakening the rest of the line, fresh skirmishers, with supports of equal strength, may be extended in the rear, and then ordered to double up and join the general line.

When a captain brings up his company to relieve or reinforce another that is extended, he must call out for what purpose he is come, that the captain of the old skirmishers may know how to act.

#### PROVING.

#### Section 6. Proving a Company.

After a company has been told off on parade, it will be proved in the following manner :

Mark time-Quick. Subdivisions right-Wheel (when in eschellon), Mark Time. Re-form Company.

Subdivisions left-Wheel (when in eschellon), Mark-Time. Re-form Company.

Sections right-Wheel (when in eschellon), Mark-Time. Re-form Company.

Sections left-Wheel (when in eschellon), Mark-Time. Ro-form Company.

The Company will then be turned to the right about, and proved in the same manner, rear-rank in front. Halt-Front.

Fours-Deep, Front.

Fours-Right, Front.

Fours Left, Front.

Fours-About, Front.

The Company will also be proved, rear-rank in front, in forming fours to the right and left on the march as follows :

Mark-Time-Quick.

Right A bout--Turn.

Fours-Right, Rear-Turn.

Fours-Left, Rear-Turn.

Halt-Front.

Form close column of Sections, Quick-March, Reform-Company, Quick-March.

Right sections, first and third, Order-Arms. Left sections, second and fourth, Order-Arms, Right subdivision, Stand-at-Ease.

#### Section 7. Marching at Ease.

Volunteers shou d not be required to march long distances at attention; they should be ordered to *March at Ease*, on which they may earry their rifles in any manner they please, and loosen out their files to the reverse flank; but they must take eare not to hang back, and open out to the rear, nor loose their places, lest they retard other corps that may be following them. On the word *Attention*, they will close in again ou the pivot flank, and trail arms properly in the right hand.
