The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

DEVOTED TO PRONUNCIATION AND AMENDED SPELING.

S U P L E M E N T (OCT.
1902.)

THE WEL-NOWN LATIN HIM
BY ST. BERNARD OV CLAIRVAUX (klérvô)
AND A TRANSLA'N IN SIENTIFIC FONOTIPY
(SISTEM OV EVACUSTES A. PHIPSON
IN HWITC NO NIU LETERZ AR RIKWAIRD)
WITH APROXIMAT CLASIC PRONUNCIATION
IN THE VULGAR ("ENGLISH") NOTATION

Jesu dulcis memoria,
Dans vera cordi gaudia;
Sed super mel, et omnia,
Ejus dulcis praesentia!

Nil canitur suavius,
Nil dicitur jucundius,
Nil cogitatur dulcius
Quam Jesu, Dei Filius!

Jesu, spes poenitentibus,
Quam pius es petentibus,
Quam bonus te quaerentibus!
Sed quid invenientibus?

Nec lingua valet dicere,
Nec littera exprimere,
Expertus potest credere
Quid sit Jesum diligere!

Sis, Jesu, nostrum gaudium,
Qui es futurus praemium;
Sit nostra in te gloria
Per cuncta semper saecula.

Amen.

NOTE.—This attempt at rendering Latin sounds according to the so-cald "English" method, advocated by som reformers, wel exemplifies its cumbrous and awkward character, which woud be stil further accentuated if it wer proposed to indicate also the quantity of vowels and emfasis of silabls. Yet to anglicize Latin and Greek in this way is no more absurd than to rite Mohammed, Punjaub, Juggernaut, Cawnpore, for Muhammad, Panjâb, Jagannâth, Kânhpûr.

NEW SPELING

PLATFORM.

1. An alfabet intended for use by a vast community need not attempt an exhaustiv analysis of elements of uterance, and a representation of the nicest varietis of articulation; it may wel leav room for the unavoidabl play of individual and local pronunciation.—*S. R. A. Buletin.*

2. No language has ever had, or is likely to hav, a perfect alfabet: and in changing and amending the mode of ritng a language alredy long ritn, regard must necessarily be had to what is practicaly possibl quite as much as to what is inherently desirabl.—*S. R. A. Buletin.*

3. The Roman alfabet is so widely and firmly establisht in use among leading civilized nations that it can not be displaced; in adapting it to improved use for English, eforts of scolars shud be directed towards its use with uniformity, and in conformity with other nations.—*Ibid.*

4. Preserv, while useful in transition, the traces of order and system alredy existing.—*New York Home Journal.*

5. Keep in view the co-operation of reforms in pronunciation when desirabl to restore breaks and complete the regularity and symetry of the language.—*Ibid.*

6. Keep in view the adoption of a comon standard of values among all nations uzing the Roman alfabet.—*Ibid.*

7. The right spelng of a word may be said to be that which agrees best with its pronunciation, its etymology, and with the analogy of the particular clas of words to which it belongs.—*Philologic Museum*, vol. i, 647. [The three together, namely, pronunciation, analogy, derivation, (PAD), ar the tripod on which Orthografy rests. Pronunciation is the most important in determining word-forms. Where P. is uncertn, varying, or conflicting, A. or D., or both, wil decide uzualy—especialy requisit in a language, like ours, ful of weak vowels.]

8. The fonetic party defeat their own object by demanding too much. Their treatment of English is so ruf that they hav found no genral favor. It wud be suficient to change words in which corect pronunciation is manifestly difrent from spelng, but they wud go farther than this and change evry word.—*H. B. Wheatly, in Transactions of Philologic Society, 1867.*

9. Orthografy and orthoepy, tho about co-extensiv, do not quite coincide, Dr J. A. H. Murray (as president of the Philologic Society, in *Annual Adress, 1880*) said:

"Speling wil always lag a certn way behind actual speech, especialy the careles, lawles speech of familiar conversation. In my opinion, therfore, it is ful to aim at representing this in practical spelng; let us aim at providing a means of spelng what men MEAN to say, AIM at saying, and in mesured or formal speech or song DU say, not

at the shortcomings which, tho inseparabl from speech, ar none the less unintentional, and to be discouraged. Evry system of ritng, except one on a purely fysiologic basis, like Bell's Visibl Speech, must be not merely conventional, but even to some extent inconsistently conventional; we shall do wel if we can arrive at the stage of ritng English in a way that shall practically represent the ideal of speech to which all educated Englishmen [and speakers of the language genrally] approximate, tho none may reach it, and which is as far removed from the slurd or imperfect uterance of the average Londoner (which seems to be the cynosure that attracts some authors of proposed systems), as it is from the arcadic or even semi-foren pronunciation of distant provinces. This bears I think on such maters as the representation of obscure and unaccented vowels . . . ritng sounds which educated men aim at producing, not what men in a hury actualy succeed in producing! If the reader aim at the former, he may be trusted always to reach the latter; if he aim only at the latter, he wil soon fall short even of them, and want stil newer spelng for his stil more defectiv uterance."

10. Orthografy is conventional.

11. Orthografy reflects "formal speech" (Murray), "vocabulary speech" (Bell), liturgic or solem speech, not colloquial talk.

12. The distinct speech aimed at is cosmopolitan, free from local or dialect tinge.

13. Where varietis of pronunciation prevail, Orthografy shud be non-committal.

14. Evry language has its own orthografy (or literary dres) and literature, which ar interwoven. A singl symbol may be approximatly universal; a set of word-forms, its spelng, is peculiar to each tung, and reflects its own speech customs. Universal orthografy is a dream, a delusion, and a snare. Dr A. J. Ellis (in *Encyclopedia Brit.*, vol. xxii, p. 390) says:—

"The modes of combining sounds in these three languages [French, German, Italian] and English ar so difrent that the alfabet has to be difrently conceivd for each. This is the final breakdown of universal ritng. An English, French, German, and Italian reader each requires an alfabet founded on his own linguistic habits, and very insufficiently comprehends any other."

15. The requirements of the printer, as wel as of literature, alike demand spelng fixt for almost all words.

16. Language restricts itself for expresing tho't . . . to a very limited number of typical vowels and consonants. Of the large number of sounds . . . catalogd from the varios English dialects, those only can be recognized as constituent elements of the language which in, and by, their difrence from each other convey a difrence of meaning. Of such pregnant and tho't-conveying vowels, English possesses no more than twelv.—*Max Mueller On Speling.*

17. Make only final changes, such as wil not hav to be set aside in subsequent revizions.—*Home Journal.*

18. Orthografy is the revers of presnt Speling, characterized by Prof. Sayce as:

"A mere series of arbitrary combinations, embodiment of wild geses, etymologis of a prescientific age, haphazard caprice of ignorant printers."
