AS TO STATISTICS GENERALLY

The growth of life assurance within the recollection of the present generation is a circumstance to be reckoned in discussing statistics. Indeed, the recent development of insurance of all kinds has made, and is making, great demands upon statistical studies and conclusions. Statistics have been called the science of counting the science of author, Counting, but this definition is too narrow. An author, Mr. Boy Mr. Bowley, thinks it may be rightly called the science of average by Mr. W. I. of averages. But the definition given by Mr. W. I. King, M.A., declares it to be: "The method of judging collective, natural or social phenomena from the results obtained by the analysis of an enumeration or collection

The growth of the science of accounting and the

demand for uniform systems of accounts for all municipalities emphasizes the need of correct statistical methods emphasizes the need of correct statistical ^{methods}: Again, numerous commissions have lately ^{sprung} into being the second seco sprung into being, whose duties vary from the govern-ment of cities to the regulation or investigation of all private or come to the regulation or these private or governmental activity. The decrees of these ^{commissions} must rest largely upon statistical information. Every insurance company must base its rates upon computation insurance company must base its rates upon computations derived through the study of large masses of data, and new statistics and new calculations must continually be made, for conditions of life are ever changing. An example of this is the novel subject of the insurance example of this is the novel subject of the insurance example of this is the novel subject of the insurance example of this is the novel subject of the insurance example of the subject of the subject of the insurance example of the subject of t the insurance of working men against unemployment. It is trub It is truly said that "practical statesmen and men of affairs are find in statistics a affairs are not the only ones who find in statistics a waluable ally. . . The biologist thereby

verifies the laws of variation and heredity. The economist seeks to establish laws of population, of wages, of prices, or to show the connection between financial crises and unemployment. The sociologist would demonstrate the relationship of sales of alcoholic liquor to crime, poverty, suicide." As one author puts it: The proper function of statistics, indeed, is to enlarge individual experience.

It is a common thing to find, even in these days, people distrustful or contemptuous of statistics. The writer recalls an instance where, calling upon a merchant in the province of Quebec not many years ago to ask for some trade figures for use in a compilation then being made, the merchant asked: "What good is it? Do I get any benefit?" The reply was that the benefit would be rather that of the community than of the individual. The opinion of the merchant was that such figures would be useless---"Mais, quelle sottise, c'est tout-à-fait inutile."

One class of people is disposed to think, when confronted with a mass of tables designed to prove soand-so, that "figures will not lie"; another class, a little more learned, are prone to call all statistics tissues of falsehood. There are true and false statistics. An amusing example of failure to observe intelligently, appears in the book of a recent writer on Socialism, the main thesis of which is based on an erroneous table taken from a government report, the errors in the table being so glaring as to be at once evident to any one in the least familiar with statistical data.

The importance of accuracy in statistics is steadily becoming more apparent in many directions. In manufactures, in engineering, in commerce, in transportation, as well as in scientific pursuits, statistical information

is needed in a thousand ways, and incalculable dangers and losses may proceed from inaccurate compilations. It thus comes about that great care and minute pains are taken to secure economic or sociologic data. In order to secure advance information as to grain crop conditions of the world, the large speculators on the Chicago Board of Trade have employed a number of enumerators or correspondents, the results of whose counts or estimates they compile. This procedure entails a heavy expense, and is beyond the means of most scientific enquirers. The great universities are coming more into view as compilers of valuable technical information for use in the sciences and in business. By means of the censuses of different nations and statistical bureaux there has become available a great mass of figures and facts suitable for expediting the world's progress. These facts and figures, by the labors of independent enquirers, have been so analyzed and their essence applied that many things and enterprises, hitherto remote and difficult, have been made easy in the modern world of traffic.

BACK TO THE SIXTIES

Canada revealed an astonishing appetite for money last year. It has done so for several years. As to the coming year, no sign of slackening is apparent. The cause of development means a continuous and heavy supply of funds. Capital from abroad in hundreds of millions of dollars is swallowed quickly by legitimate enterprises. Still more is wanted. For a half century forward we shall be asking for money to develop mines, timber, and industries, for money to finance many other necessary enterprises. Yet, a glance at the files of The Monetary Times of forty years ago, reveals the fact that in January, 1869, our banks were complaining of lack of business. The report of the meeting of the Banque Jacques Cartier, held in Montreal, at that date, tells a story in striking contrast to that of prosperity chronicled in our present issue. The Hon. J. L. Beaudry, president of the bank, which long ago ceased to exist, told the shareholders of smaller profits, of serious fluctuations in general business, and of failures which "succeeded each other with alarming rapidity." The result of the harvest was below the average. "Here," said the president, "as elsewhere, after many years of prosperity, an annoying reaction has made itself felt, and confidence strongly shaken, in paralyzing business, has produced an unproductive accumulation of capital. To such an extent is this the case that never in Canada was so much capital seeking employment."

Since those days, despite periodical depressions, much business history has been written. This year bank profits have been good, general business excellent, failures few and the harvest satisfactory. The reserve fund of the bank mentioned was equal to nine per cent. on its capital. To-day, that fund in the case of many banks, is considerably over fifty per cent.

Every page of the old issues exhibits an interesting comparison with happenings of these times. Good farm lands in the township of Dysart, in the county of Peterborough, Ontario, were being offered for sale by the Canadian Land and Emigration Company at \$1.50 per acre. The Niagara District Bank, in January, 1869, declared a dividend of 4 per cent., which compares with many bank dividends in these days of three times that percentage, and more. The Toronto Board of Trade then, as now, were opposing the construction of the Georgian Bay Canal, passing a resolution to the effect that the shipping and commercial interests of the Dominion or of the Province of Ontario did not require that undertaking. Since then, Sir Robert Perks has become interested in the project and has hopes one day of building the canal.

The Bank of England rate on January 1st, 1869, was 3 per cent. Money was plentiful in the Montreal market, and our banks were supplying commercial wants "at 7 per cent. for good paper." The Montreal money market report of *The Monetary Times* this week fortyfour years ago, stated that towards the spring "our moneyed men must find some new channel for investment, but what direction it will take it is impossible to say."

The only prospectus printed in the issue of our journal under review was that of the Ontario Peat Company. The company's property was situated in the townships of Humberstone and Wainfleet, Welland, Ontario. The prospectus quoted an engineer's report estimating the estimating the quantity of peat contained in these lands at "three millions of tons at the very least." The docur ment certainly reflected the optimism of the prospectus writer of the sixties. "Peat," said the document, "can be laid down as if be laid down on the banks of the canal (Welland) at the cost of from \$1 to \$1.25 per ton, and can from the near the form thence be forwarded by water to market in all directions, at small cost, and without transhipment; to say nothing of the facilities and advantages afforded by no less than five railways, one of which, the Buffalo and Lake Huron, passes within twenty chains of the property. In addition to these advantages, the fact may be noticed, that about thirty versel thirty vessels pass through the canal every day during the season of navigation, the steamers requiring fue for their own use, and the sailing vessels seeking and goes, and requiring ballast westward to Chicago and other points. The demand for this fuel for private consumption will be very great when its superior qualities become more widely known. Already railways and steamers are beginning to use it instead of wood and coal, with the most activity coal, with the most satisfactory results, experience having proved that one ton of peat is equal to about one and one-third cords of the best hard wood."

With a view to the full and proper development of the property, it was proposed to organize it with a capital of \$120,000, in 2,400 shares of \$50 each. Of this sum \$50,000 was to be retained by the directors for working capital, the balance to be applied to the put chase of the real estate.

Forty years ago was not too far back for the promotion of doubtful companies in Canada, and *The Monetary Times* then was busy as it has been since in showing unscrupulous promoters in their true light. 1869, the Honeysuckle and Bumblebee Mining Companies were making things interesting in Nova Scotiathese concerns were exposed by this journal, which said in its issue at that time: "The promoters of one of these companies pocketed eighty thousand dollars for an area that cost them (palm grease excepted) about two thousand five hundred dollars!"

Private banks were in evidence in the days of sixtynine. Commodities were quoted at prices so low that, compared with those of to-day, the increased cost of living looks even more formidable. Just as our style of prosperity has changed since bankers were lamenting the lack of work for their money, so also has feminine style of dress changed, for one of the regular advertisers in our early issues was "Robert H. Mr manufacturer of hoop skirts and crinoline steel., which Gray's industry was carried on in Toronto, from which city The Monetary Times has been published contains ously every week since 1867, the year of Canada's confederation.

LA BANQUE INTERNATIONALE

Judge Leet's decision-When?

SMALL CHANGE

Dominion Canners' shareholders can stand any amount of dividend increases—canned or otherwise.

If Professor Fisher's plan for standardizing the dollar is a hit at the cost of living, the affirmative vote is unanimous.

T

UNITED STATES STEEL CORPORATION IN CANADA

Probable Effect of Establishment of Canadian Plant-Its Present Organization in the Dominion-Iron and Steel Imports

The fact that the United States Steel Corporation has for several years been acquiring real estate at Sandwich, Ontario, led to the theory that at some time or another that cor-poration would establish a plant there. The time has ap-parently arrived, as, according to a dispatch from New York at a meeting of the directors of the United States Steel Cor-poration it was decided to build a new plant at Sandwich, Poration it was decided to build a new plant at Sandwich, costing approximately \$20,000,000, to manufacture practical-ly all classes of steel. The company has about 1,500 acres of land with at the steel. of land, with 1½ miles of waterfront opposite Detroit, Michi-gan. The corporation will probably erect a number of blast furnaces in addition of the structural and bar mills. furnaces in addition to wire, rail, structural and bar mills. Tinplate and tube works may also be erected. All the details have not yet been arranged but it is likely that a bond issue to meet not be an arranged but it is likely that a bond issue to meet part of the cost of construction of the new plant will be negotiated by the cost of construction of the beginning of be negotiated. No date has been set for the beginning of construction, but work will probably be started as soon as all arrangements have been made. To operate the plant, a new subsidiary of the United States Steel Corporation will be organized in Canada.

Room for all, Says Plummer.

Mr. J. H. Plummer. Corporation, discussing the above announcement, said:— "There is room for us all in Canada, and it is certainly in the hands of strong people. The Dominion Steel Corpor-Steel Trust or anybody also." Steel Trust or anybody else."

Mr. J. R. Wilson, a Montreal director of the Dominion Steel Corporation, and also identified with the Canadian Steel Foundries, said: "One may draw his own conclusions as re-gards competities." Rards competition. For instance, in the buying of ore the Dominion Steel Company pays about \$1.75 per ton, while the United States Company pay \$3 to \$4 for the same, and experience and money, can and are selling their finished pro-recent advance of steel prices. recent advance of steel prices.

"Though I believe the United States Steel Corporation will do us no material harm, it is true there will be a great deal sharper material harm, it is true there plant begins to deal sharper competition immediately the plant begins to operate at Sandwine Any competition will be felt largely operate at Sandwich. Any competition will be felt largely in the West, where the country is growing and the demand be felt for the East I do not believe the competition will **Complains of** Complains of Dumping.

In the annual number of The Monetary Times, publish-and Coal Company, complains of the extent to which Canada was utilized last user dumping market illustrated by Was utilized last year as a dumping market, illustrated by the fact that of the entire export of pig iron by the United of finished products an enormous tonnage was disposed of in the the same market at prices in many instances 20 to 25 per cent. below that the time the ware selling raw pig iron five ^{cent}, below that at which they were selling raw pig iron five

years previously. Canadian steel manufacturers are anticipating early re-the budget speech which is not due, however, for several enormous home demand coupled with good trade and high

enormous home demand, coupled with good trade and high tries, owing to the ill judged action of the United States pro-to a last year and the imadequate customs tariff applying ducers last year and the imadequate customs tariff applying the United States pro-to a considerable percentage of steel products imported from ings much less than they should have been under normal

Sandwich, where the United States Steel Corporation will Ontario, on the Detroit River. About two miles northeast of division of the Ortand Trunk Railway. The town is on the Railway and has a population of approximately 2,300. United Steel's Present Canadian Interest.

The United States Steel Corporation is already doing Steel Products Considerable business in Canada through The United States considerable business in Canada through The United States Steel Products Company, which has charge of the corpora-canadian Steel and Wire Company of Hamilton, Ontario, is already controlled by The United States Steel Corporation,

but it is not a very large plant, and up to the present time almost solely has been manufacturing farm fencing. This plant is under the management of R. S. Rider, and is not operated through The United States Steel Products Com-

pany. The head office of The United States Steel Products Company is in the Hudson Terminal Buildings, New York City, with Canadian sales offices in the Bank of Ottawa Building, Montreal, and at 220 King Street West, Toronto. The chief products sold are those of the Carnegie Steel Company, The products sold are those of the Carnegie Steel Company, The American Steel and Wire Company, the American Bridge Company, the Illinois Steel Company, the National Tube Company and the Lorain Steel Company. The Montreal sales force has been specializing on Carnegie Steel products and the steel pipe made by the National Tube Company. The Toronto sales force has been specializing on the Carnegie Steel products and the triangular mech. concerts winforce Toronto sales force has been specializing on the Carnegie Steel products and the triangular mesh concrete reinforce-ment made by the American Steel and Wire Company. Mr. C. B. Rittenhouse, Mr. C. L. Kelley and Mr. George A. Childs are the managers of the Montreal office. Messrs. Fred and C. H. Bruncke manage the Toronto office. The principal sales made up to the present time in Canada by the United States Steel Products Company have been structural steel shapes, bars, rods, steel sheet piling, wire mesh con-crete reinforcement and steel pipe. It is not believed that any great quantity of wire rope, nails and the many other pro-ducts of the United States Steel Corporation, have as yet en-tered Canada. tered Canada.

Steel Imports from United States.

The imports of iron and steel and their manufactures from the United States have almost doubled during the past few years, as the following table shows :-

mports from Jnited States. 1908	39,699,913	Free. \$6,663,160 6,944,686
		7,598,002
1911 1012		8,093,006

The iron and steel imports from the United States upon which duty was paid have increased since 1908 by \$32,810,-990 or 83.9 per cent. Those which came in free have increas-ed \$1,429,846 or 21.4 per cent. The largest items of our iron and steel imports from the period begins roughlie last wave as follow:

The imports of iron and steel from the United Kingdom last year were valued at \$13,802,461.

Big Merger Story Indefinite.

A Camadian press despatch from Montreal says :- "An American syndicate, backed by a billion dollars and headed by Mr. C. M. Schwab, is after the Canadian steel companies. It is known that influential capitalists have been approached in the matter and that a handsome offer has been made to J. H. Plummer for control of the Dominion Steel Corpora-tion. The proposed combination comprises The Bethlehem tion. The proposed combination comprises The Bethlenem Steel Company. The Midland Steel Company, The Pennsyl-vania Company. The Cambria Steel Company, and Labelle Iron Works, the Dominion Steel Corporation and the Steel Company of Canada. There is no doubt whatever about the offer to Mr. Plummer, but it is also said that he declines to recommend a sale."

In response to an inquiry addressed by The Monetary Times to the Steel Company of Canada. Hamilton, Mr. C. S. Wilcox, president, says: "We have had no communication

with United Steel Corporation on subject mentioned." Mr. Thomas Cantley, of the Nova Scotia Steel Company, wires: "Have not been approached by United States Steel Corporation

tion." Senator Curry telegraphs The Monetary Times as fol-lows: "The United States Steel Company have not ap-proached our company, directly or indirectly, with a view to absorbing any of our companies." Mr. J. H. Plummer has not yet replied to the inquiry of The Monetary Times, but it is generally understood that the plans of the syndicate have been laid before him and before other leaders in the steel industry in Canada. The scheme has been taken up by a powerful group of United States capitalists, and they are now actively at work on it. The Morgan firm is understood to have named the price at which it would underwrite the bond issue. The projected capitalization of this merger is \$1,100,000,000, divided, it is understood, into \$200,000,000 bonds, \$500, 000,000 preferred and \$400,000,000 common stock. Whether or not it will be actually consummated, is another story. or not it will be actually consummated, is another story.

ACTIVITY ON MONTREAL STOCK EXCHANGE

Most of the Stocks are Inclined to Rise-Causes of Some of the Movements

Monetary Times Office, Montreal, January 8th.

The Montreal stock markets are experiencing somewhat Ine Montreal stock markets are experiencing somewhat unexpected activity. The movement started with Richelieu and Ontario towards the end of the year, this stock advanc-ing from around 110 or 111 to 117 in a few days, and then to 118 or 119, around which prices it has held. Afterwards, Montreal Power began rising, and from around 225 quickly ran up to 230. Later, the rise being continued, Power made 226 and then ran up a couple of prints. 236 and then ran up a couple of points. Meantime, Shaw-inigan was playing is part, advancing from 137 to 148. Brazilian did not lag behind and from 88 and 89 ran Brazilian did not lag behind and from 88 and 89 ran up to above 90 and then made 95, and is now 98 to 99. Ottawa Power rose from 170 to 180, and during the past few days has made practically 190. Detroit, which not long ago was around 70, is now close to 80, and Laurentide has had an eight-point advance to 230. Tucketts, Canadian Cottons and Textile have had their turn for a few points, and Tram Power has experienced a rise, while Tramways has gone out of sight, probably on account of scarcity of stock rather than on its merits. McDonald, National Brick and Wayagamack have all advanced, as has practically every stock of any general interest. up to general interest.

Interesting as are these occurrences, they are not more interesting than the stories which are prevalent in broker-age circles regarding the cause of the movements.

Power and Shawinigan.

Take the case of Power, for instance, and Shawinigan, both of which stocks have already advanced more than ten points. No definite statements have been heard in connection with these stocks other than that they are going higher and that this advance will be more than justified by the news which will shortly be announced in connection with the financial reorganization of Cedar Rapids. It may be remembered that this latter power was secured a few years ago by Mr. D. Lorne McGibbon who later sold control to Montreal Light, Heat and Power and the Shawinigan Water and Power Company interests. Last week, a meeting of the company was held at which the shareholders authorized the directors to proceed to increase the authorized bond issue to \$15,000,oco from the previous \$10,000,000. Only about \$1,500,000 of these bonds have been issued so far, the common stock issue being possibly \$8,000,000. A trust company is engag-ed in preparing an announcement of the rights of shareholders of Montreal Light, Heat and Power and of Shawinigan Water and Power to subscribe to the new issue.

As for Brazilian, it is claimed that an active buying movement has developed in London and that a number of large buying orders have already been filled here. Also, it is said Toronto interests are buying. Ottawa Power has become prominent with an advance of about 20 points. Buy-ing by insiders is still in progress, and it is expected that in a few days, the remaining ten points separating the market from 200 will be crossed. One broker predicts 225. These predictions are given for what they are worth. Something of importance is taking place in Ottawa Power and an of-ficial announcement will shortly be made.

Detroit and Laurentide.

The cause of strength in Detroit is that an increased dividend is anticipated. Brazilian is a 6% stock and being a public utility with earnings said to be considerably more than enough to pay the dividend, expectations of higher prices need not be explained.

Laurentide may have a further rise on the strength of the water-power situation as well as on account of the interpower proved position of the company as a result of the removal of the prohibition against the export of pulpwood from its limits. Also, the approximation Also, the announcement is made that the Laurentide Company has secured ownership and the power rights of the Canada Iron Corporation in the St. Maurice River, placing itself in a position to develop 80,000 horse-power in stead of the 50,000 horse-power previously anticipated. It is assumed that when the company gets ready to finance the project, rights of some character will be forthcoming to shareholders shareholders.

It is thought that the earnings of Tuckett's amply justify the declaration of a dividend. Or, to put the matter more accurately, should the earnings continue at their present rate, a dividend will be justified during the summer.

Cottons and Textile.

Canadian Cottons is said to be in line for a further increase in price, owing to liberal earnings. Although no dividends are being paid on the common stock of the company, it is said that not less than 8% is being earned, and as the stock is quoted around 35, it is considered that an advance is justified on the outlook is justified on the outlook.

Dominion Textile has always been a heavy stock to move, so that its slight advance in the recent movement is not at all surprising. Two textile garment manufacturing concerns are also active—Tooke's and Converter's. latter is paying 4% and is selling under 50, while Tooke's not on a dividend basis but is selling at a little short of It is claimed that the latter will go on a dividend basis for spring, the earnings being enough to justify this. As if Converters, there is every reason to think that it shortly receive an increased dividend, the earnings of the company being at least twice the amount required to pay the stocks will advance. Dominion Textile has always been a heavy stock Accordingly, it is expected that the price of both dvance.

A number of other stocks could be mentioned, of which it may be said that the future holds out good prospects will that by the end of the present users and the prospect will that by the end of the present year, all being well, they will

ROYAL BANK'S REPORT

Previous mention has been made in The Monetary Times of the report of the Royal Bank of Canada for the year ended November 30th, 1912. The report and statement were pre-sented to the shareholders of this investment the appual of the report of the Royal Bank of Canada for the year energy November 30th, 1912. The report and statement were pre-sented to the shareholders of this institution at the annul meeting at Montreal on Thursday. They indicated substation tial growth of the bank in all directions. EVERY DOLLAR IS WORKING OVERTIME

In Development of Western Canada's Resources and of Dominion Generally Says a Well-known Canadian Banker

Monetary Times Office,

Winnipeg, January 7th.

Western Canada is most prosperous, and the land under western Canada is most prosperous, and the land cultivation by reason of the immense area covered, is assured year of the immense area covered, is assured Year after year of bountiful harvests, even should unfavorable climatic conditions occur. With a wheat crop approximating ractional part of the cultivable land under plow; with the tide of immigration are increasing, not only in quantity, but tractional part of the cultivable land under plow; with the tide of immigration ever increasing, not only in quantity, but direction. Winnipeg, the focal point of Western Canadian the beginning of things. Mr. C. W. Rowley, of the Canadian Bank of Commerce,

Mr. C. W. Rowley, of the Canadian Bank of Commerce, peaks of the past year and the great possibilities of Western Canada's future in the following terms:-

One only has to take up the papers and read the splendid Statements of all the financial, railways, industrial and public utilities corporations to see that the country is prosperous, and to see that the to see that the resources of all are actively, with advantage and fully employed, and that the growing pains of the country are as apparent. are as apparent to-day as they have been during the past few vears. Let us hope that the British investor takes a larger interest in active industrial enterprises as well as making in-vestments in active industrial enterprises as well as making investments in active industrial enterprises as well as making in-vestments in some of the many gilt-edged financial stocks or high class bonds, and thus take a more permanent interest in this country, which at present is but an infant in all its wealth and size which are now awaiting development and wealth and size which are now awaiting development and cultivation. Opportunities are Being Grasped.

"When using the word 'cultivation,' diversified farming is meant, not 'wheat mining' as Sir William Whyte so truly "Our cousins from the middle south are not at all slow in offering the grant country truities of investment this country Our cousins from the middle south are not at all slow in offers. One has only to look at the make-up of many of the largely interested in all active mercantile development. Inlargely interested in all active mercantile development. cluded in this class are brokers, grain merchants, elevator owners, coal barons, lumber manufacturers, line lumber yard ers, coal barons, lumber manufacturers, line lumber , incen, farm implement dealers, etc., etc., as well as stockhold-ers in mortraplement dealers, etc., etc., as banks, etc., which for the sister set of the conding November 30th, 1912 which for the to this the capital of the United States' settlers, amounted to this the capital of the United States' settlers, the combined to \$162,000,000, and is about ten times as much as more British settlers, and in this respect Canada presents a to work and also offers boundless opportunities for women of the and resource. Industrial Increases are Marked.

"The past year has shown a steady increase all over ada in inducer has shown a steady number, larger busi-thThe past year has shown a steady increase all over Acanada in industrial plants, size and number, larger busi-and better wholesale and jobber, extensions of railways, more movement of crops increase in all class of buildings and imand better equipment of same with the result of a very free movement of crops, increase in all class of buildings and im-improvement in construction. In Winnipeg especially a decided able, with the ultimate object of developing and making more nationalities into generations and assimilating some thirty and Empire.

^{chappire.} ^{chappire.} ^{chappire.} ^{chappire.} ^{all} ^{over} ^{chappire.} ^{chappire.} ^{all} ^{over} ^{chappire.} ^{cha} aunder, so that instruction and assistance may be given that the line of intensive and diversified farming in order other states. A second diversified farming in order other states.

"The waterways of Canada can also be greatly improved made to compare the panama and made to carry much of her merchandise. The Panama pecial should mean much of her merchandise. The Panama Quebec. It will not have much effect on the through freight traffic of the railways. On the other hand, the increased seaboard, will, if one can judge from the past, give them active "Good roads, improvement and increase in good hotels, is, and has been, working overtime for some years, and the business men generally should consider seriously the flotation and made to carry much of her merchandise. The Panama period should many much to this country generally, and es-

of securities in connection with their businesses in order to have them properly capitalized and working easily with sufficient liquid assets and capital for the necessary expansion so that commercial development is on sound, broad lines for the present and the future. From the active demand for money and the increased cost of living (which necessitates a larger income to live than before) it seems apparent that the borrower must pay an increased rate for his money, as evidenced recently by sales of securities in London, New York, Toronto and Montreal, and does not mean a loss of confidence in this country."

FIRST WITH THE NEWS AGAIN

The Monetary Times last week was able to announce exclusively :-

(1) The proposed amalgamation of the Guarantee and Sterling life insurance companies.

(2) The proposed stock issue of the Niagara Falls Power Company, and

(3) The fact that negotiations were actually in progress for the absorption of the Canada Interlake Line by the Richelieu and Ontario Navigation Company.
 The Monetary Times is not only a paper of opinior and of reference value, but it is also first with the news.

FORECAST OF ONTARIO COMPENSATION REPORT

"I shall not recommend any scheme that will involve the right to lump sum payments. It is desirable that there should be opportunity given to the Board to authorize that," said Sir William Meredith, at a hearing of the Ontario Workmen's Compensation Commission this week. "This legislation is social. There is no disguising that fact. The very basis of it is to prevent the injured work-man becoming a charge upon the community. "If this were not so, one of the primary objections of the scheme would be defeated. If we allow compensation in a lump sum it might be squandered, and if that were permitted, it would defeat our primary object. "I am at the present time against any such step that will keep any manufacturer or a railway out of the act. It is my advice that at the beginning it would be desirable not to include the railways, but they could be brought in and subjected to the operations of the Board after some ex-perience as to how best they are to be grouped. "There can be no legislation that will imply any guar-antee upon the province.

"It is estimated that the Compensation Act will affect 400,000 people, and mean the expenditure of \$250,000, a large portion of which must be shouldered by the province."

CUARANTEE AND STERLING LIFE COMPANIES' MERCER

As exclusively announced by The Monetary Times last week, the Guarantee Life Insurance Company of Canada, promoted by Controller McCarthy; and the Sterling Life Assurance Company of Canada, promoted by Mr. J. W. Garvin, B.A., of Toronto, are to merge. The amalgamated company will be known as the Sterling Life Assurance Company of Canada, with Controller McCarthy as presi-dent, Mr. W. B. Unsworth as secretary-treasurer, and Mr. J. W. Garvin as managing director. The Sterling Life shareholders will elect five directors at the organization meeting to be held in the near future, and the subscribers of the Guarantee Life will elect four. As the Dominion Insurance Act provides that as soon as \$250,000 of the capital stock is subscribed and to per cent. paid thereon, the organization meeting shall be held, As exclusively announced by The Monetary Times last

As the Dominion Insurance Act provides that as soon as \$250,000 of the capital stock is subscribed and 10 per cent. paid thereon, the organization meeting shall be held, it is expected that the joint company will organize not later than March 1st, and that it will begin the sale of life in-surance about June 1st. As much of the company's money will be invested in the Western provinces subsidiary boards of directors are being formed in Winnipeg and Vancouver, and the capital stock is being sold generally throughout the Dominion. When the flotation is concluded the amalgamated com-pany will have a subscribed capital of \$100.000, with \$250, 000 paid thereon on capital account. and \$125,000 paid into the treasury on premium account. The provisional directors of the Guarantee Life are: Controller McCarthy. J. Mc-Lenaghen, W. B. Unsworth, W. C. Gall and G. F. Scott, all of Toronto; and of the Sterling Life, A. E. Munn of Orillia, and W. H. Shaw, W. W. Hiltz, N. R. Lindsay, W. H. Elliott, Dr. G. B. Smith, A. P. Poussette, K.C., and J. W. Garvin, of Toronto. The company has offices at 302 Kent Building, Yonge Street, Toronto.

PULP AND PAPER SITUATION

United States Manufacturers Complain, and Canada is the Burden of Their Sorrow-Dominion is Making Rapid Strides

The paper makers of the United States are dissatisfied with matters generally. The past year has been reported as one of small profits. The outlook is thought unsatisfactory and Canada figures as one of the adverse factors. According to a Wall Street authority prices have been unsatisfactory, especially in the case of the news printing industry. While prices have been maintained by some manufacturers, there is no disposition towards an upward tendency. It is the statement of the industry that in all standard grades of paper early steps should be taken for readjustment of prices. Manufacturers assert that the prices have been practically stationary for the past 10 years while cost of materials and labor have increased considerably.

How this Reciprocity Works.

Through the so-called reciprocity legislation the paper pulp manufacturers of the United States are confronted with the interpretation of the Treasury Department or Section II. of the reciprocity act, which is in effect to-day, in spite of the fact that Canada did not accept the proposition made by the United States as to reciprocal relations. The result of this ruling has been extremely detrimental to United States, manufacturers allege, and has caused large importations into the United States of wood pulp and printing paper. These importations reached high water mark in 1912, and their is no sign anywhere of their cessation. After the passage of this act, in 1911, capitalists, knowing from the United States tariff board's report that paper could be manufactured in Canada at \$5.35 a ton cheaper than it could in the United States invested leaved in the United States, invested largely in new mills in Canada, some which have just begun to operate and others will soon have their product on the market. The desirability of the United States market has led to most of the extra production being shipped to the United States, so that at present importations are coming in at the rate, it is said, of 125,000 tons a year.

Covernment and Private Wood.

Under this interpretation of the act, the Canadian manufacturer can ship his paper and pulp into the United States free, if he declares that it was manufactured from unrestricted wood, that is, wood from land of private ownership as dis-tinguished from wood from government land. The result is that large amounts of Canadian paper, made from govern-ment wood, is shipped into the United States free of duty because the manufacturer declares it was made from private wood. Under the old Payne-Aldrich tariff schedule, the duties were assessed at the rate of \$5.75 per ton on paper made from restricted wood and \$3.75 on paper made from un-restricted wood. Under the ruling of the United States treas-ury department these duties have been eliminated on the bulk of the importations. When United States paper is shipped into Canada the Dominion Government levys a duty of \$6 a ton, while 75% of the paper imported into the United States from Canada comes in duty free.

The attitude of the United States Government has led foreign governments to claim, under their favored-nation treaties, the same privileges accorded Canada. The United States general appraisers have held that the favored-nation clause is not binding. If the Customs Court should reverse this decision, the manufacturers of the United States believe that the paper market there would be flooded with a surplus production of all foreign countries. During the latter part of November a suit was instituted to test the constitutional-ity of this interpretation in the Board of United States General Appraisers by the Cliff Paper Company, of Niagara Falls. At present the paper market in the United States is receiving large quantities of paper and pulp from Sweden, Norway and Germany. The foreign manufacturers are paying duties on these importations under protest and are waiting the outcome of this test suit. It is estimated that should the Government lose the wood pulp case it would have to re-fund, to the importers, a sum well over \$3,500,000.

Canada Is Making Strides.

Canada has certainly made strides during the past year or so in paper manufacturing. Mr. E. B. Biggar, of Toron-to, a Toronto pulp and paper authority, says that Canada's growth of the two industries has exceeded that of any single nation in the world since wood became a raw material for paper making. A remarkable feature of this development has been the number and capacity of the new mills devoted to news-print, these mills representing the last word in mill designing, in capacity of paper machines and in rapidity of production. The following is a list of these news-print paper mills :---

Falls, Ont. Sault Ste. Marie Mill, Ontario International Falls Mill, Fort Frances, Ont. Ontario Paper Company, Thorold 100 150 Price Brothers and Company, Jonqueires, Que. Edwin Crabtree and Sons, Quebec Smaller new mills and additions to old mills, say 170 1,200

Thus there has been an increase of 1,200 tons per da in news-print. It is not strictly correct to say that this is the work of a calendar work work of a calendar year, for some of these new mills were started in the latter part of 1911, while two of them are pot yet finished and will not be in operation till the middle of 1913, but the increase which can be are the transformed and will still 1913, but the increase which can be credited to 1912 will still be about a thousand tons per day. be about a thousand tons per day.

Other Mills to Obtain Concessions.

Mr. John Norris, chairman of the committee on paper of the American Publishers' Association, says that the action removing the restriction upon the exportation of pulpyood from the Crown lands of four large mills, viz. : Laurentide Belgo-Canadian, Price Brothers and Commended Wayasam Belgo-Canadian, Price Brothers and Company, and Wayagan ac, insures the admission into the United States free of im-port duty of all the products of the United States are a port duty of all the products of those mills, which have a producing capacity of 480 tons per day of news print and 50 tons per day of kraft poper

tons per day of kraft paper. "It is inevitable," he says, "that the other and smaller mills in that province will obtain a similar concession ontario they ask for it and that the news-print paper mills in Onter oncession wards will be forced by competition to obtain a similar concession from the second se will be forced by competition to obtain equal concession from that province. British Columbia removed its restrictions last summer for the Powell D

tions last summer for the Powell River Mill. "The action of the provincial governments is carculated to stimulate new production in Canada to supply the dur and increasing market in the United States. The high appe which the United States has imposed on news-print aptr made from Crown land wood min made from Crown land wood, viz., \$5.75 per ton, put plate mine from Crown land wood, viz., \$5.75 per ton, put a pro-mium of \$2 per cord on freehold wood in Quebec and placed a corresponding burden on the paper makers in Northern New York for all the wood they brought from Quebec. Abolition of Import Port

Abolition of Import Duties.

"The abolition of import duties on the products of Crow s removes the competition of the products of the for wor lands removes the competition of the products of Company from Canadian freehold lands. The action of the Provincial Council is a distinct advance toward a healthier condition of the paper industry, helpful to Canadian producets, and helpful to America the paper industry, helpful to Canadian producers, and pair ful to American paper makers who have been forced to pair the cost of the retaliatory method. the cost of the retaliatory methods of both governments. is a substantial beginning toward the sweeping away of even restriction upon the interchanges of

is a substantial beginning toward the sweeping away of even restriction upon the interchange of wood and pulp and pape on both sides of the border." The United States and Canada international paper ation is therefore decidedly interesting. Mr. William Price, of Price Brothers, paper manufacturers, believes that the latest action of Sir Lomer Gouin will moving the embargo on paper cut from Crown lands ers, believes that the latest action of Sir Lomer Gouin in re-moving the embargo on paper cut from Crown lands with mean an increase of \$1,000,000 per year to the manufactur-ers of Quebec Province. "In adopting this policy," Me Price stated, "the provincial Government has followed in steps of the McBride Administration."

SMALLER FIRE LOSS AT SYDNEY

During the past year the Sydney, N.B., fire department responded to one hundred and five calls of fire, the larged number of calls yet registered in one year. Seventy one these were bell alarms, the remaining thirty four being the remaining thirty-four being the

is found at Sooke, Bugaboo Creek, Sarita, Nootka, Campbell

River, Quatsino and other points. Vancouver Island produced, according to the Tyee Cop-per Company manager's estimate, "about one-half of all the copper that has come from the entire Pacific coastal district during the five years ending April, 1910. There is five hun-dred thousand horse-power of water-power available, though

resent development is less than 50,000 horse-power There is a supply of marble, brick clay, fire clay, gold and silver, quicksilver, talc, and various other metals and natural products, sand, gravel and building materials.

There are two cement plants, one fully equipped and run-

ning, and the other soon to be ready. Agriculture, horticulture, fruit and berry growing, poul-try-raising and live-stock breeding are profitable and being

developed. Valuable fisheries are also among the island's resources; whale fishing is carried on at Sechart and Kyuquot, control-led by Messrs. Mackenzie and Mann. Salmon is abundant. Halibut is caught in large quantities on the west coast. Nanaimo the large herring industry is under the control of Iapanese.

WALL STREET'S VIEW OF BANK ACT REVISION

"In Canada banking reform has never been an acute political issue. The people have been generally satisfied with the banking system," says the Wall Street Journal, "largely because the note issue was elastic and accommo-dation could be obtained by solvent merchants at rates which were reasonable and which were nearly uniform throughout the Dominion. With the development of the country, the bankers have gotten together at each ten-year revision of the banking law and have consulted with the government as to changes called for by the progress of the country.

country. In spite of the fact that Canada has long been held up as the great example of successful note issue through a plurality of banks, there has been a steady tendency toward practical centralization, such as has occurred under similar conditions in Mexico. This tendency was clearly pointed out by Professor Joseph French Johnson, in his admirable monograph for the National Monetary Commis-sion, in which he exhibited a sort of cross-section of Cana-dian banking by examination on the spot. The Bank of Montreal stands at the centre of the system and takes the initiative when important steps are necessary to avert the initiative when important steps are necessary to avert the consequences of a failure or to maintain confidence. The reforms which are now pending between the bankers and the government tend still further toward the centralization of responsibility, by providing for central gold reserves and a more rigid system of audit, the latter under the direc-tion of the banks in the main, but capable of being taken in hand by the government in case of need.

"It is not quite clear from the published reports what "It is not quite clear from the published reports what purpose the rold reserves are to serve except to create a certain fund of gold and Dominion notes, in the hands of trustees to strengthen the assets of the bank. Additional bank notes are apparently to be issued upon the central gold reserves, but if the amount cannot exceed such re-serves, the only element of elasticity involved is the subserves, the only element of elasticity involved is the sub-stitution of notes for coin, without any increase in the net circulation. Apparently, however, the provisions of the law of July 20, 1908, are not to be disturbed, permitting issues of notes during the crop-moving season under special tax to the amount of 15 per cent. of paid-up capital and reserve funds.

"In the stress of 1907 the bank note circulation was inadequate for moving the crops and a special dispensation was granted by the government for the issue of additional notes upon the deposit of securities, guaranteed by the Bank of Montreal. It was this expedient which led to legal sanction for emergency issues in the future under the act of 1908. The difficulty at that time appeared to be that the increase of hardwise expired had note heat pace with the exof 1908. The difficulty at that time appeared to be that the increase of banking capital had not kept pace with the ex-pansion of the Northwest. The banks continued to estab-lish branches in the new country wherever they were re-quired, and to lend at reasonable rates to borrowers, but the demand for currency outran the legal limit of issue upon existing capital. This evil will be remedied in part perhaps by the notes which may be issued upon imports of gold, and a still greater security than heretofore will be intro-duced into the system as a whole by the manner in which the hanks will be knit together by the more thorough method the banks will be knit together by the more thorough method of auditing which is to be established."

The Dominion Atlantic Railway, which is controlled by the Canadian Pacific Railway, will be practically reconstruct-ed. At Yarmouth, the terminus of the Dominion Atlantic Railway, a new 520-foot modern wharf, with a warehouse will be built. Along the line ten wooden bridges will be re-placed by modern steel structures.

ers on the Marr buildings were Mr. A. C. Chapman for Mr. Marr, and Mr. R. C. Donald for the company. On the main building the full amount of insurance carried, \$3,000, was allowed, while on the show cases and furniture in this build-ing Mr. Marr was allowed \$300 damages. On the small building Mr. Marr was allowed \$300 damages. On the small build-ing at the rear, burned to the ground, \$250, and on the barn and building occupied by H. C. Cameron, he received \$50 and \$75 respectively. This makes a total of \$3,675. Of the \$3,000 on Mr. Marr's big building, \$2,000 was in the Sun and \$1,000 in the Rimouski. The Melanson Company loss on building was adjusted at \$200, by Mr. L. B. Read, of Moncton, acting for the Fidelity Underwriters and Northern, and Mr. E. Fairweather, of St. John, for the Anglo-American and United London and Scottish. The Melanson Company's loss on stock was adjusted by Messrs. E. Fairweather and C. E. L. Jarvis, of St. John. The amount was \$200. Other companies having insurance on the Melanson Company stock were the Liverpool, London and Globe, and Hudson Bay were the Liverpool, London and Globe, and Hudson Bay Company, \$500 each.

NEW BRUNSWICK LIFE UNDERWRITERS

The annual meeting of the Life Underwriters' Associa-tion of New Brunswick was held on January 4th, in Bond's restaurant. Mr. W. B. Scarcliff, the retiring president, enter-tained the members at lunch, after which officers were elected as follows:--Mr. F. S. Farris, Excelsior Life, president; Mr. C. A. Owens, Federal Life, vice-president; Mr. R. L. Sipprell, Dominion, secretary: Mr. W. W. Titus, National, treasurer. Messrs, W. B. Scarcliff, London; G. W. Merritt, Great West; I. W. V. Lawlor, New York; G. C. Jordon, Sun, and P. A. Bohan, Metropolitan, executive. The membership of the association is increasing.

Competition Would Cut Rates.

List of Casualities.

Twenty-six Casualties Occurred During the Past Season—Attitude of Lloyds Underwriters

MARINE INSURANCE ON ST. LAWRENCE ROUTE

The St. Lawrence route last year, was the subject of considerable discussion among marine underwriters. Hon. J. D. Hazen, Minister of Marine, issued an invitation to Canadian shippers to prepare a plan of marine insurance, and said that the Dominion government would give a workship scheme subtraction to Canadian shippers to prepare a plan of marine insurance, and said that the Dominion government would give a workship scheme subtraction to Canadian shippers to prepare a plan of marine insurance, and said that the Dominion government would give a workship scheme subtraction to Canadian shippers to prepare a plan of marine insurance, and said that the Dominion government would give a workship scheme subtraction to Canadian shippers to prepare a plan of marine insurance, and said that the construction of the construct

the Dominion government would give a workable scheme substantial financial aid. A plan has not yet been prepared. The reply of Lloyds to this suggestion was that the steady increase in rates is due to the fact that underwriters cannot make the business pay; in other words, that their rates of premium are based on actual experience, and that even at the admittedly high level of premiums now ruling losses are very frequent and the business extremely hazardous

As regards this attitude on the part of Lloyds underwriters, is stated, that if their views were wholly fallacious marine insurance rates to the St. Lawrence would have been cut down long ago by Continental competitors, who are noting if not enterprising in such matters. Underwriters say, however, that whereas the cost of insurance against marine risks has been reduced on almost every other route in the world, as the result of Continental competition for the business, few attempts have been made to divert St. Lawrence risks from the London market, the experience of those under writers who have endeavored to cater for such business at "cut-prices" being too well known to tempt others to follow their example.

The following table shows the number of accidents which occurred on that route during the past season of pavigation."

Slight damage Near Bersimis pending. S.S. "Canada" Collided with fishing boat Grand River

The season was a severe one for underwriters the world over, and as the above table indicates, the St. Lawrence did not escape its share of accidents, though fortunately there was no loss of life entailed by any mishap occurring between Montreal and the Gulf. There were no serious accidents above Quebec, though the Lake Champlain and the Hung mean were both aground on mud banks for a short time. Below Quebec marine accidents were as a rule more serious. included the grounding of the Manchester Importer on White Island, for about half an hour, collision with submerge do by the Manchester Inventor, some miles to the east of Belle Isle, a collision between the Empress of Britain and the the Corsican with an iceberg 120 miles east of Belle Isle. which necessitated her being fitted with a new stem, the grounding of the Bellona in the Upper Traverse, and of the Gladstone and Royal George on the Isle of Orleans. A change in the pilotage system may be made during the current year. The insurance rates were not raised as a result of the accidents tabulated above.

GENERAL BANKRUPTCY COURT ADVOCATED

Mr. James Bicknell, K.C., Suggests Its Establishment and a Bankruptcy Law for the Dominion

As a result of the important paper read by Mr. James Bicknell, K.C., at the annual meeting of the Ontario Bar Bankruptcy Court and bankruptcy law for the Dominion, a committee of five has been appointed to draft a communi-Bicknell pleaded for a uniform law.

ation to commercial bodies urging their co-operation. Bicknell pleaded for a uniform law. "Creditors in Toronto and Montreal," he said, "should be able to know that the remedies against a defaulting debtor resident in Halifax are equally as good and as readily available as the remedies against a debtor in Vancouver. "The administration of the bankruptcy laws should be and the judges of the various county and other local courts should be Referees in Bankruptcy. "Upon the commission of an act of bankruptcy the tradit."

"Upon the commission of an act of bankruptcy the creditors should have a summary and speedy remedy against the entire estate of the debtor.

Satisfactory Account of Transactions.

"If a debtor is not able to give an adequate, reason-his failure his future earnings should be impounded for the benefit of his poet. benefit of his past creditors until they have been sufficient to pay a tracerult to pay a reasonable percentage upon the dollar of his "A course of the second second

"A central bureau should be established in each pro-"A central bureau should be established in each pro-all bankruptcies would be supervised, thus ensuring both law should be available to all debtors, both traders and nontraders. "Every

"Every debtor should be compelled to submit a full statement of his assets and liabilities and the reasons for thereafter be examined in open court before a judge in the answer all questions, and should thereupon be called to or any of his creditors, which might be put to him by counsel prevarication or failure to make a satisfactory explanation should be punishable as contempt."

Parliament Could Create Court.

"In the development of Canadian commerce transconti-al systems of the development of Canadian commerce transcontihental "the development of Canadian commerce transconte-hecessary," Mr. Bicknell argued. "Similarly under the with their head offices in the monetary centres and branches Mr. the entire Dominion." spread over the entire Dominion.'

Mr. Bicknell stated that the Dominion Parliament has ion over the entire Dominion, " bankruptcy having jurisdic-bankruptcy law does not tend to increase the number of ber of failures in Canada during the past three years as "In the number in the United States and England. In Find the United States in 1006 there were 15,600 failures, were

"In the United States and England England and Weisse The same year there were ⁽¹⁾ In the United States in 1906 there were 15,690 failures, ^{1,8,606}, and and Wales during the same year there were ^{3,606}, and in Canada in 1900 there was one failure to every ^{were of the population, so that it would appear that there ^{ruptcy law} as many failures in a country without a bank-^{enactment}.}

"The particular point to be observed is that every debtor a judicial tribunal respecting his conduct, and he must be ompelled to submit to a public examination before sompelled to explain the reasonable and probable causes of his incapable of obtaining credit and should be incapable be incapable of obtaining credit and should be incapable of holding public office and positions of trust."

GREAT BRITAIN'S PRODUCTION

The British board of trade census of production shows, eries, all industries, including agriculture and the fish-tween & dutput of the United Kingdom in 1907 was be-Out of this total of nearly £1,500,000,000 sterling, over \$400,000,000 worth of goods were exported, leaving the \$1,000,000,000 British coods for the home market at more than The optimized at about

The tax-paying class. Kingdom was between £1,633,000,000 and £1.833,000,000.

RAILROAD EXPENDITURE WILL BE HEAVY

All the Important Roads Have in Hand Lengthy **Construction Programmes**

President E. J. Chamberlin, speaking of construction work on the Grand Trunk Pacific Railway, says the problem from now on to completion will be wholly one of labor. "We expect to have the line in operation for through traffic by the beginning of 1915. It is just a question of getting the requi-site amount of labor into the territory in which we are building; it is simply a matter of displacing so many million tons of earth and getting enough men to do it expeditiously. At present we have about 10,000 men at work.'

This year the Canadian Northern Railway will construct 978 miles of road to complete the Transcontinental line. This mileage includes 350 miles from the summit of the Rockies to Lytton, B.C., and 300 miles along the north shore of Lake Superior.

Canadian Northern in Ontario.

Work will be commenced by the Canadian Northern Rail-way between Toronto and Hamilton during the spring. The right of way between Hamilton and Niagara Falls is being secured.

The company hopes to finish the road from Toronto to Niagara at the same time as the Canadian Northern Railway transcontinental. Provision for through connection with New York, via an American line, and bridge connection with New gara Falls, remains to be made.

Satisfactory headway is being made in completing the line between Toronto and Ottawa.

The line between Ottawa and Montreal will be ready next spring, and early summer should see a Canadian Northern Railway passenger service between Toronto and Montreal.

Four Track System.

The Canadian Pacific Railway will shortly commence work on a four track system between Brandon and Fort William.

Forty million dollars will be expended in Montreal by Forty million dollars will be expended in Montreal by the railways within the next two or three years. This large outlay is being undertaken by the Canadian Northern, the Grand Trunk, and the Canadian Pacific Railways, with the Canadian Northern assuming over half the expenditure. With the formal acceptance of the plans for the tunnelling of the mountain, the Canadian Northern Railway expect to commence operations early in the spring upon this task.

The Grand Trunk Railway expect to spend between \$9,-000,000 and \$10,000,000 in the elevation of their tracks and in the building of a new station at Montreal.

Six New Lines.

The Canadian Pacific will apply for an act authorizing it to construct six new lines and extending time for completion of five others, already authorized.

It will also incorporate the Quebec, Portland and Inter-national Short Line, from La Patrie South to the Interna-tional Boundary, following North River to Newport, Vt., to the main central in Eaton. This is supposed to be part of the plan for shortening the distance between Montreal and Portland over Main Central Portland over Main Central.

A new railway project is announced through application to incorporate the All Red Line Railway, from the Eastern boundary of the Province of Quebec westerly to Winnipeg, with branches to Ottawa, Port Arthur and Fort William.

ANOTHER STEAMSHIP LINE FOR MONTREAL

That a new line of steamships will come to Montreal in the spring is the announcement of Mr. L. E. Geoffrion. Inquiries in shipping circles leads to the belief that the new line will be La Compagnie Generale Transatlantique. The

line will be La Compagnie Generale Transatlantique. The French line applied for harbor accommodation last year, but none was available. Later they applied for a berth alongside the new shed, No. 16, on the Victoria Pier. In connection with Montreal harbor matters, the Min-ister of Marine and Fisheries is considering a powerful type of Russian icebreaker with a view of maintaining winter navigation to at least as far as Ouebec. He thinks that Montreal will never handle the grain trade she should but will see much of it diverted by way of Buffalo until the channel has been sufficiently improved and insurance rates lowered so as to make it worth while for shipowners to send their ships there in ballast for the sake of the heavy cargoes their ships there in ballast for the sake of the heavy cargoes they can always take away.

Carmangay, Alta., has organized a volunteer fire brigade and its fire hall has been completed and equipped.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies-Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

International Nickel Company.-The International Nickel Company will double the capacity of its plant at Copper Cliff. Inside of two years, it is said, the plant will be turning out 100,000 tons.

Northern Ohio Traction and Light Company.--Gross passenger earnings of the Northern Ohio Traction and Light Company for the year 1912 were \$2,494,791, an increase over 1911 of \$23,426.

Western Canada Power Company.-A London cable states that it has become known there that certain negotiations have been opened up by which the British Columbia Electric expects to secure the controlling interest in the Western Canada Power.

Cape Breton Electric Company.-Earnings of the Cape Breton Electric Company, Limited, for the seven days end-ing December 21st, 1912, and for the corresponding period preceding years were: 1912, \$4,907; 1911, \$4,871; inof crease, \$36.

Nova Scotia Steel and Coal Company .- The Nova Scotia Steel and Coal Company has decided to open a new colliery at Sydney Mines, bringing its total up to six. The company's coal output, by this means will be increased from 850,000 to 1,000,000 tons annually.

Muskoka Navigation Company .- After having failed to pay any dividend for thirteen years, the Muskoka Naviga-tion Company, Limited, at their annual meeting, held at Toronto, declared a dividend of five per cent. The reports presented were of a very satisfactory nature. Mr. Hugh C. McLean was re-elected president of the company, and the other officials were retained.

Duluth-Superior Traction Company.-As a result of the buluth-superior Traction Company.—As a result of the strike which commenced on September 9, earnings of the Duluth-Superior Traction Company for the year 1912 show a decrease of \$49,439 from those of 1911. Gross passenger earnings for the year were \$1,059,907 compared with \$1,-109,346, a decrease of 4.5 per cent. During December earn-ings were normal, and showed a good increase over Decem-ber, 1911. December earnings were \$98,395, against \$93,908, an increase of \$44,86 or 4.8 per cent an increase of \$4,486, or 4.8 per cent.

Porcupine Townsite Mines Company .-- An agreement between the shareholders of the Porcupine Townsite Mines Company and an English syndicate has been ratified by the former by which the Townsite Company will cease to exist and a new company will be formed in London with a capital of \pounds 75,000 in 300,000 shares of five shillings each. The stockholders in the Canadian company will receive one share for each ten shares now held. With \$100,000 in the treasury the English company will start operations in the spring.

Canada Cement Company.-The Canada Cement Company, Limited, are promoting a line of steamers for the purpose of carrying coal from Cleveland to Montreal, and taking return cargoes of cement to the upper lakes as it requires a large quantity of United States coal at the different cement plants. The new company is to be known as the Canada Cement Transport, Limited, Mr. Levy McMillan being ap-pointed marine superintendent of the Canada Cement Com-pany, with jurisdiction over the steamship department.

St. Lawrence Refineries, Limited .- Bids of 87 have been made, it is said, for the common stock of the St. Lawrence Sugar Refineries, Limited, and of 101 for the preferred stock. It should be remembered, of course, that these bids would not go on record as the stock does not appear on the regular stock exchange list or on the unlisted department's list, so that the bids would simply be of a private character between brokers. If these bids were made it would indicate that the people who want the stock must be convinced of its earning powers, the price of the common being high for a non-dividend payer and the preferred being also high for a preference stock.

Macdonald Company, Limited .- At a meeting of the directors of the A. Macdonald Company, Limited, —At a meeting of the di-rectors of the A. Macdonald Company, Limited, held at Win-nipeg, Mr. G. P. Grant, president of the Dominion Bond Company, of Toronto, was elected president; Mr. T. H. Watson, of Toronto, vice-president, and Mr. H. C. Cowdry, secretary-treasurer. Mr. W. P. Riley, of Port Arthur, Ont., head of the Riley-Ramsey Company, was elected general manager, and it was decided to acquire his company. Follow ing the directors' meeting, it was announced that there would be no change in the policy of the Macdonald Company. Au nouncement is said to be expected shortly of the declaration of a dividend. It is said to be expected shortly of the declaration of a dividend. It is said that the company will pay 5 per cent.

Nipissing Mines, Limited.—During the month of Decem Nipissing Mines, Limited.—During the month of Decem-ber the Nipissing mined \$460,052 net and shipped ore of an estimated net value of \$261,396. Something of the extent of the Nipissing operations may be seen from the fact that during the month of December alone 440,000 ounces were mined from one vein, the Meyer. Another vein produced 130,000 ounces, another 54,000. During the month the high grade mill treated 164 tons of ore and shipped 422,495 ounces of bullion. It is interesting to notice that in shaft 80 near Cart Lake, a small open vein containing more or less near Cart Lake, a small open vein containing more or less high-grade silver has h high-grade silver has been cut, and that the management thinks this may be the main vein. The character of por Seneca-Superior vein has mode for the character of por Seneca-Superior vein has made finds in this section of portential importance tential importance.

La Rose Mines, Limited.—During the past twelve months La Rose made a profit on operations of a million dollars: Production for the year tota:

duction for the	year 1912:	
Tons.	Ounces.	Gross.
3,327	2,900,000	\$1,800,000
Approximate	expenses	800,000

At the end of the year La Rose had a surplus of \$1,000,000 and a surplus and \$1,000,000 and a surplus and \$1,000,000 and \$1,000,000,000 and \$1,000,000 and \$1,000,000 and \$1,00 Profit \$1,000,000 750,000, made up as follows :----

Cash on hand		\$1,500,000
Ore in transit	••••	250,000 \$1,750,000

Toronto Railway Company.—The Toronto Railway Company's receipts from passengers in 1912 amounted to \$5,73,874, an increase of \$572,556 over 1911. Calculating of an average fare of something in the neighborhood of four cents, the passengers carried during 1912 numbered and 132,000,000, as compared with 120,007 \$44 in 1911, was 132,000,000, as compared with 120,997,844 in 19¹¹, was ten per cent. bigger in numbers and in receipts than it was during 1911.

Toronto's total receipts from street railway percentage for the calendar year were \$798,958.56, as compared with the following amounts for other versas following amounts for other years :-

1906	\$218.063.48
1907	419,606.91
1908	447,397.67
1909	507,827.49
1910	596,297.35
1911	687.650.00
1912	798,958.56
	190110

Besides the above percentages, the city of Toronto For ives a mileage rental of For besides the above percentages, the city of Toroniv For receives a mileage rental of \$8000 per single track mile. Join the past year the mileage checks total \$90,950.40. In Add these receipts totalled \$84,458.00; in 1910, \$83,040.00. ing mileage and percentage together, Toronto received from the company for 1912, \$889,908.96.

EMPIRE TRADE MAP

A new map of the world has been compiled by Mr. Ben H. Morgan, F.R.S.S., F.R.C.I., of London, England It shows at a glance the location of the world's principal primary products, the services of transport and intercom-munication, while inset maps indicate to the export chant and manufacturer where he can establish his agencies and branch houses with a view to working the British map pire's principal markets. The practical value of the the is obvious, while its educational possibilities and resultant advantages to the manufacturer. trader and citizen pire, old or young, are invaluable. Mr. Morgan's map is another link in the chain Messa.

Mr. Morgan's map is another link in the chain Messer vices welded by him for the good of the Empire. have W. and A. K. Johnston, geographical printers, have the graved and printed the trade and industrial map of world, which will have a large demand.

For improvements to the McKellar Hos-extension of the municipally-owned street railway, and for an spending \$50,000 on enlarging and equipping the Col-ate Institute 50,000 on enlarging and equipping the Dr.

extension of the municipally-owned street railway, and for an incinerator plant, \$35,000.

MUST INSTALL BRICK PLANTS

Order-in-Council Issued-Lease Holders Will Have to Use Their Clay Within Two Years

Lessees of Western clay lands in future must make bricks as well as stock sales. An order-in-council has been issued regarding the leasing and administration of lands containing limestone, granite, slate, marble, gypsum, marl, gravel, sand or any building stone, in the provinces of Mani-toba, Saskatchewan and Alberta, and the Northwest Terri-tories; within twenty miles on either side of the main line of the Canadian Pacific Railway in the province of British Columbia, and in the tract of three and one-half million acres acquired by the Government of the Dominion from the pro-vince of British Columbia. The order amends the existing regulation so as to include the leasing of Dominion lands containing deposits of clay, subject, however, to the following additional conditions :-

Within Two Years.

r. The lessee of a clay location shall, within two years from the date of the lease, erect upon the lands described therein, or on lands acceptable to the Minister, a plant suitable for the manufacture of brick or other clay products, and he shall, within the same period, furnish evidence, **sup** ported by affidavit, showing the character and value of the plant installed and the date of its installation. If the requir-ed plant is not installed within the time specified, and if evidence of its installation is not furnished within the same time, the lease shall be subject to cancellation in the discretion of the Minister. Provided, however, that the Minister shall not require that the value of the plant so installed shall exceed the sum of \$10,000.

Must Start Manufacturing.

2. The lessee of a city location shall, during each year of the term of the lease after the second year, manufacture from his leasehold and produce ready for shipment not less than noo,000 bricks, or their equivalent in some other form of clay products, to the satisfaction of the Minister. If dur-ing any year, after the second year of the term of the lease, the lessee fails to furnish satisfactory evidence of his having done so, the lease shall be subject to immediate cancellation in the discretion of the Minister.

BANK CLEARING HOUSE RETURNS

NO BETTER PAPER

"There is no better financial paper published than The Monetary Times, in my estimation."— Extract from letter of December 17th, 1912, of Mr. A. Allayne Jones, President, Canadian Development Company, Vancouver, B.C.

The Grand Trunk Pacific has carried 30 million bushels of grain to the head of the lakes as against 15 millions a year ago.

NEW CHARTERED COMPANIES NUMBER SEVENTY-THREE

Three Corporations With Capital of One Million Dollars and Over-New Trust Organization

Company promotion was a feature in Canada's develop-ment during the past year, and 1913 has commenced with seventy-three companies being incorporated, their total capitalization being \$10,699,020. The largest companies this week being :-

Alphonse Racine, Montreal	 \$1,500,000
Bankers' Trust Corporation	 1,000,000
Denis Advertising Signs, Montreal	 1,000,000

Grouping the new concerns according to the provinces in which the head offices are situated, we have the following results :-

Province.	No. of companies.	Capitalization.
Quebec	20	\$3,404,900
Ontario	8	1,495,000
Manitoba		3,669,120
British Columbia		2,130,000
Total		\$10,600,020

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors :-

Brantford, Ont.—Brantford Courier, \$100,000. Reville, Misses. F. M. Senn, M. C. G. Hawkins. F. D.

Three Rivers, Que.-La Compagnie Theatrate de Trois-Rivieres, \$49,500. J. A. Carignan, T. Richard, C. H. Moineau.

New Westminster, B.C.—Moresby Island Development Company, \$250,000. MacLean-Burr Auto Company, \$25,000.

St. Narcisse, Que.—La Compagnie Industrielle de Saint Narcisse, \$20,000. J. X. Cossette, A. A. Trudel, J. A. Gravel.

Florence, Ont.—Florence Power, Light and Milling Com-pany, \$5,000. J. A. MacLean, S. P. Campbell, W. R. Hickey, Bothwell.

St. Basile, Que.—Harvay Chemical Company of Canada, \$100,000. A. Marcotte, D. Belanger, St. Basile; F. Vanasse, Montreal.

Lauzon, Que.—Lauzon Dry Dock Land Company, \$75,-000. J. G. T. Charland, Lauzon; F. X. G. Charland, G. S. Hunton, Montreal.

Victoria, B.C.—Genoa Bay Lumber Company, \$100,000. Bonnet Shop, (milliners), \$25,000. Victoria Construction and Engineering Company, \$100,000.

Louiseville, Que.—La Compagnie Electrique de Louise-ville; \$49,400. J. A. Bourbeau, Quebec; C. Caron, Louise-ville; W. B. Lafreniere, Maskinonge.

Hamilton, Ont.—National Canners, \$40,000. G. J. Nichols, J. Casson, R. Tresidder. Elk Fire Brick Company of Canada, \$40,000. J. D. Ramsay, W. G. Bauer, C. W. Cle-well, St. Mary's.

Toronto.—Surani Oil Fields, \$200,000. J. E. Evans-Jackson, London, England; P. H. Simson, Berka Buzen, Roumania; A. A. Dickson, Toronto. Preston Limited, (stock-brokers), \$50,000. C. M. Preston, H. G. Smith, J. F. Boland. Bankers' Trust Corporation, \$1,000,000. N. A. Belcourt, E. R. E. Chevrier, A. W. Guertin, Ottawa. M. Joss and Loewen-stein, \$100,000. W. N. Ferguson, J. T. White, A. W. Hunter.

Vancouver, B.C.-Orr and Ebbage \$50,000, (financial and Vancouver, B.C.—Orr and Ebbage \$50,000, (financial and insurance agents), Bentinck Logging Company, \$500,000. Anglo-Canadian Savings and Trust Company, \$500,000. Cousins Inlet Trading Company, \$250,000. British Columbia Co-operative Settlers' Association, \$10,000. Holmwood and Holmwood (Canada), \$10,000 (insurance). Port Thompson Townsite, \$100,000. Bentley Company, \$10,000. A. R. Coutts and Company, \$50,000, (electric light). ORGANIZING INTERNATIONAL BROKERS' ASSOCIATION

The International Association of Brokers will hold its ratification meeting at the Waldorf-Astoria, New York City, on February 20. Several city chairmen for the organization committee have been appointed, and they in turn will name other brokers in their respective cities in order to make this first meeting of the association successful

The cities for which chairmen have been appointed and names follow :-their names follow :-

New York, Norbert R. Pendergast; Cleveland, C. W. Osborne; Philadelphia, George J. Childs; Denver, C. W. Savery; Toledo, Charles M. Cook; Detroit, Lewis G. Gorton, Toronto, M. R. Edgar; Pittsburg, Charles A. Parker; St. Louis, Little and Hays; Chicago, Frederick W. Hall; Mont real, O. B. D'Aoust; Lawrence, Kans., E. O. Perkins; Mont falo, George M. Kellogg; Bloomfield, W., Va., J. Ellow Hall; Indianapolis, Livingstone Investment Company; M. bile, Ala., MacArthmey and Schley; Bangor, Me., M. bile, Ala., MacArthney and Schley; Bangor, Me., Shute; Troy, N.Y., Charles A. Stone.

Mr. J. N. Sechrest, of Buffalo, chairman of the organize ation committee, has received many letters from brokers, de-claring the need of such an organization as is proposed. Mr. Sechrest himself

Mr. Sechrest himself says that the association will be the sentative of all the reliable back back presentative of all the reliable brokerage houses brokeri United States and Canada, and that more than 500 brokeri

Further information and copies of the proposed consti-tution of the association may be obtained from Mr. Sechrest, or any member of the organization committee Mr.

Several prominent men are to address the association at the first meeting. At the banquet to be held in the evening. Mr. Norbert R. Pendergast, of New York City, will act toastmaster.

Much interest is being manifested in this associationly Canada. Mr. O. B. D'Aoust, of Montreal, was actively identified a few years ago with the formation of a similar of ganization in France. He is heartily in favor of the American organization.

GERMANY DESIRES MORE TRADE

She is a Large Buyer of Canadian Wheat-Tariff and **Treaty Suggestions**

The German export report draws attention to the existing trade between Canada and Germany and shows a desire for inc. This trade between Canada and Germany and shows a desire for increasing same, as will be seen from the following ex-cerpts:—"So far we have not been over lucky regarding our trade relations with Canada, as may plainly be seen from the figures of last year's trade between Germany and the Dominion

During the year of 1912 our imports from Canada have for the first time exceeded our exports to that country. Up to 1912 the exports were considerably larger than the imports in spite of the very unfavorable treatment which German 800ds received a spite of the very unfavorable treatment which German goods received under the existing tariff conditions in Canada.

"During the year of 1912, however, as far as the returns have been published, the mutual trade relations have changed to such an extent that the imports from Canada will have a value of more than 60,000,000 marks, while our exports to Canada are hardly likely to reach those of 1911 of about 43,-000,000 marks.

Resulting Chiefly From Two Causes.

"This change is chiefly due to two causes, first, the enormous increase in our import of wheat and feeding materials, and, second, to the complete elimination of our sugar "Appendix to Canada."

"Apart from these two, the decrease in our exports of iron and cotton goods to Canada has been a considerable item. "In following of the second secon

"In 1911 our imports of Canadian wheat amounted already In 1911 our imports of Canadian wheat amounted anomy, to 14,300,000 marks, as against 2,900,000 in 1910. During 1912, however, it has reached the figure of at least 48,000,000 marks, as may be gathered from the returns already pub-lished.

"The imports of feeding materials (oats, etc.) from Can-ada amounted in 1911 to not over half a million marks; in 1912 they will a ¹⁹¹² they will have a value of approximately 3,000,000 marks. Furthermore, the imports of Canadian machinery, especial-

ly sewing machines, have increased." After referring to the fact that Canada maintains her lest taries

After referring to the fact that Canada maintains not highest tariff rate against Germany, while France and cer-article continues have favorable treaty arrangements, the

Provisorium Referred to Negotiations.

"The only means to effect a change in this very un-satisfactory state of affairs consist in an improvement of that such a change with Canada and it certainly is high time

that trade relations with Canada and to the such a change was effected. "When in the beginning of 1910 the present trade pro-visorium with Canada and to the present trade pro-When in the beginning of 1910 the present trade pro-visorium with Canada came into effect, German industrial circles were as a whole satisfied with the agreement, which at least removed the Canadian surtax on German goods. "However, it must take for granted that the provisorium

"However, it was taken for granted that the provisorium d soon by the way taken for granted that the provisorium However, it was taken for granted that the provisorium would soon be followed up by a proper treaty, which would put German goods in the Canadian market on the same basis is French one. as French ones. It is specially stated in the provisorium that negotiations for a proper treaty would start as soon as been done so far in this direction. "Is it possible that the difficulties in coming to a just

"Is it possible that the difficulties in coming to a just the statistical metric with canada are insurmountable? With

the statistical material now available, we can prove to Canadians the material now for the German market for the Cerman market for t Canadians the importance of the German market for their soods and the importance of they derive from a continued soods and the importance of the German market for then enjoyment of the German preferential tariff. Elimination of Differential Treatment.

"These advantages are far greater than those granted are lower, especially on wheat than those levied by France. Furthermore, there should be no objection to granting Can-ada still greater advantages for the import of wheat, dressed meats and dairy products to Germany.

"We must insist, however, on the complete elimination of differential ^{Any} differential treatment of German goods as against French ones or any other streatment of German goods as against French ones or any other non-British ones.

"For any other non-British ones. "For this purpose it would be advisable that the repre-munication with individuals who, on account of their social. an industrial and commercial standing, are in a postion to wield industrial and commercial standing, are in a postion to wield an influence in Canadian political circles. which so far seems to have been done only to a very small degree."

fifteen.

The number of directors of the Peace River Land and Investment Company, Limited, has been increased from nine to

LAST YEAR'S GOLD PRODUCTION

It Exceeded That of Previous Year by Five and Half Million Dollars-India Presents a Problem

The world's production of gold during 1912 was \$5,500,000 greater than in 1911, the total having been \$465,000,000, according to a preliminary estimate of Mr. George E. Roberts, director of the United States mint. Gold production in the United States amounted to \$91,685,168, compared with \$56 800 or or in U.L. California. Induction \$28,286 with \$96,890,000 in 1911. California led with \$19,988,486; Colorado was second with \$18,791,710; Alaska third with \$17,398,946; Nevada fourth with \$13.331,680, and South Dakota fifth with \$7,795,680.

Of the world's production the Transvaal and Rhodesia made a gain of about \$20,000,000, and Canada gained nearly \$3,000,000. The United States, Mexico and Australasia lost about \$16,000,000, and in the rest of the world the produc-tion was about what it was last year. Since 1908, when the production of gold in the world was \$442,475,000, the annual increase has been comparatively small.

Requirements of Dominion and Republic.

The mint service of the United States during the year sold \$38,000,000 worth of gold bars for consumption in the arts in this country and Canada, as against \$35,000,000 in 1911. The net consumption of new gold, including coin for such uses, in the United States and Canada was about \$35,-000,000, and in the world, excluding Asia, probably between \$100,000, and \$115,000,000. The absorption of gold by India, which has been at-

The absorption of gold by India, which has been at-tracting attention for several years, was again a noteworthy feature. The net imports of India in 1909 were approxi-mately \$50,000,000; in 1910, \$90,000,000; in 1911, \$116, 000,000, and in 1912 approximately \$140,000,000. The movement of silver to India also continues to be very heavy. The importations of silver, in ounces, during 1912 have been exceeded only once in the history of India in 1906.

Increase of Silver Production.

The increase of gold in the monetary stock of the United States in 1912 was approximately \$90,000,000. The gold holdings of the United States Treasury increased about \$70,000,000, chiefly in bullion, represented in the circulation

\$70,000,000, chiefly in bullion, represented in the circulation by certificates. The production of silver in the United States during 1912 amounted to 62,369,974 fine ounces compared with 60,-399,400 fine ounces in 1911, the chief gains in production having been made in Utah and Colorado. Nevada ranked first in production with 13,042,118 fine ounces, Utah second with 12,795,072 ounces, Montana third with 12,338,589 ounces, Colorado fourth with 8,350,316 ounces, and Idaho fifth with 7,703,121 ounces.

DEBT

It all began so lightly, even so blithely—not a burden at all, just a pleasant favor. You had left your money in your other suit. Your friend was ready with the five dollars that solved the evening for you. It was so easy that you tried it again, and you gave some other fellows the chance to show their good will for you. Then the trick of asking for it became a habit. Then the other men, with whom you'd gone to school and grown up, began to buy motor cars, and you thought a neat runabout would be nice for you. So you pulled out the insurance policy which was to protect your wife's old age, and you borrowed money on that. Later came a chance to "invest" in an oil company which had just de-veloped a "gusher," all of it a "sure thing." So you mort-gaged the house in which you live. All the time the family eveness hant mine higher so family you wort to a loan expenses kept going higher, so finally you went to a loan shark and paid out money to get more money to pay the bills, the mortgages, and the interest which came tumbling in with almost every mail. And now your back is bent and almost broken with the great load of debts—a pack as heavy as Christiam's load of sin in "Pilgrim's Progress." And the hill grows steeper with each step, the burden heavier. And soon you'll go toppling down, head first, and there'll be an end of the stumbling and striving. Better not get into debt! Thank God if you're not in debt! If you already are, cut down expenses. Give up the motor car. Quit speculating. Start saving. Lead the simple life, the really simple life.— Start saving. Le Collier's Weekly.

An order-in-council has been passed amending the har-bor regulations of Canada and prohibiting the discharge or disposal of oil, tar or other dangerously inflammable mater-ial in the water of any harbor of the Dominion. I ne order provides for a fine of \$50 for violation of its provisions, with a further penalty of \$10 for every twelve hours during which the offerer continued the offence continues.

DEBENTURES AWARDED

Mantario R.M., Sask.—\$5,000 5½ per cent., 20 instal-ments, to Flood Land Company, Regina. London, Ont.—\$231,400 4¼ per cent., 10, 15 and 30 years, to Messrs. Wood, Gundy & Company, Toronto.

ONTARIO HYDRO-ELECTRIC COMMISSION

The total revenue of the Ontario Hydro-Electric Com-mission for the past year reached \$511,801.88. These re-ceipts were for power delivered, including charges for ad-ministration, general expenses, operation, maintenance and interest. The expenditure reached \$456,635.43; the total for the fourth quarter, with a tremendous increase in power pur-chased, was but \$28,000 above that of the first quarter. The surplus on the year was \$55,166.45, half of which was rolled up in the last quarter. This has been nominally set aside as a "depreciation reserve."

HARRIS BOND HOUSE HAVE CANADIAN BRANCH

Messrs. N. W. Harris & Company, of Boston, one of the largest and most important bond houses in the United States, have opened a branch office in Montreal under the management of Mr. G. E. Wills. Although the company are only now establishing such a branch for Canada, they have been doing business here for more than fifteen years. Their business is confined solely to the highest grade of investment bonds. The Harris organization, since it started business has purchased and placed over \$\$ 250,000,000 safe business, has purchased and placed over \$1,250,000,000 safe investments. During the first week in January their cus-tomers received interest on over \$250,000,000 of current investments.

The total loans of the Harris Company to Canadian railroads, public service corporations, and municipalities amount in the aggregate to over \$45,000,000. They took over \$10,000,000 of Montreal Tramways bonds last year and several other similar issues, as well as a small block of Halifox municipal

several other similar issues, as well as a small block of Halifax municipals. Mr. Wills, who will represent the company in Canada, has been with the Harris corporation for a number of years, and has latterly represented them in Toronto and Montreal. He is well known and liked in Canadian investment spheres, and there is no doubt that the Harris Company's new ven-ture, under his charge, will be successful. Mr. N. W. Harris, one of the principals of the company, contributes an interesting story to the annual number of The Monetary Times.

BOND NOTES

Asked if he had heard any complaints in London on the subject of overborrowing by Canadian municipalities and general business organizations, Mr. Sifton, premier of Alberta, who has just returned from England, said: "I heard no such suggestions. The British investor realizes, I think, that the enormous growth of the West requires large capital sums if development is to proceed in a brisk manner. The disposition, we noticed, is to look for higher interest on the money invested. Investors in general are looking for higher and higher interest, and Canadian municipalities, 1 think, will in the future have to pay more money for their financial accommodations when they go to London than they have done in the past. Our bonds were underwritten and offered at ninety-seven, and the public response was very fair. The amount of that issue was £1,000,000, and the bonds will carry interest at the price they sold at, a shade over four per cent." over four per cent."

A Montreal city loan of \$6,000,000 at 4½ per cent. is awaiting flotation in London. An offer was made the other day, but it was too low, and was not accepted. As soon as it is issued, another loan of seven million dollars will be called for.

During the five years ended December 31st, 1912, Lon-don, Ont., sold on nine occasions bonds amounting to \$1,295,952, and of this amount the sum of \$935,022 repre-sents the city's borrowings for the past three years, \$439,000 being borrowed in 1912. The following table shows what the money cost the city:-

	Per cent.
June, 1908	· 4·55
October, 1908	. 4.20
February, 1909	
October, 1909	
February, 1910	. 4.40
June, 1910	. 4.40
March, 1911	. 4.20
March. 1912	. 4.40
December, 1912	. 4.80

The last sale of \$231,400 cost the city a little over 434 per cent. Messrs. Wood, Gundy & Company have handled over \$650.000 in three of the latest sales.

PROCRESS OF THE BANK OF TORONTO

One of the most substantial and conservative institu-tions, the Bank of Toromto, has again demonstrated that a sound business policy and profitable operation may travel together. Maintaining its high position in the business world, it made net profits last year of \$835,787, or about 17 per cent. on the average paid-up capital for the year. The reserve fund was strengthened by a sum of \$301,950. The reserve fund was strengthened by a sum of \$391,950, making that account at the end of November, 1912, \$6,000, 900, 91 \$1,900,900 in excess of peid on mind the strengthened by a sum of \$391,950, peid the strengthened by a sum of \$391,950. 000, or \$1,000,000 in excess of paid-up capital.

The shareholders of the bank met in Toronto this week and were presented with a good report of the year's results The bank's resources were steadily loaned throughout the twelve months, thus creating an increase in profits. Cent stockholders shared in this gain, as a bonus of 1 per cent was paid in addition to the regular 11 per cent. dividend After discussing general conditions in Canada, Mr. D. Coulson, the president, stated that while large sums of money have again been obtained abroad by our railroad companies, municipalities, and large industrial corporations and have been used by them in furthering their develop ment, yet the banks have been called upon to an unusual extent, and their loans to the public in Canada show an increase on November 30th, 1912, of more than \$100,000,000 over the corresponding period of last year. The advances and bills discounted of the Bank of To-ronto The shareholders of the bank met in Toronto this week

The advances and bills discounted of the Bank of To-ronto show an increase for the year of over \$4,700,000. These are all made in Canada, and the large increase shows that the bank has tried to most the most the provest of cusshows These are all made in Canada, and the large increase shows that the bank has tried to meet the requirements of cus tomers with their expanding trade. This has been specially true so far as the Western provinces are concerned. amount loaned by this bank west of Lake Superior is more than double the amount supplied by that part of the country, and it will probably be found to be true of the banks gen-erally that they have used their Eastern resources nex-freely in aiding in the development of the newer provinces. The following figures show at a glance the increase made in some of the accounts of the bank:— Increase

		for year
Capital \$	5,000,000	\$ 391,95
Rest and profits carried forward		105,682
Deposits	41,622,345	495,08
	5,474.917	4,773,640
	45,066,977	2.158.80
Assets	59,226,548	: have

The management, directorate and shareholders bar good reasons for feeling satisfied with their fifty-seventh annual statement.

Careful estimates place the salmon pack for the entire Pacific coast for 1912 at 5,905,120 cases, worth between \$35, 000,000 and \$37,000,000. The pack is the largest on record, although the current year is the tween the largest on exceed although the current year is the year of the big run, exceed, ing that of last year by a few thousand cases.

Peterborough has been fortunate in escaping from dam-age by fire in the past year. Fire Chief Howard states that during the year the brigade responded to 131 alarms and was the total amount of fire loss during the year on the states that the total amount of fire loss during the twelve months \$20,134. In 1911 there were 126 alarms and total damages of \$22,798. The biggest fire during the year just closed vas that in the Cameron store a few works of \$22,798. The biggest fire during the year just close of that in the Cameron store, a few weeks ago, with a \$1,000. \$7,000. Two fires during the year, causing a loss of \$1,000. were due to lightning.

Mr. J. A. Ruddick, Dairy Commissioner for the Dominion says that not a solitary pound of Canadian butter had been shipped to Great Britain since last March, as compared with shipments of 34,000,000 pounds in 1903, the record year of exports to the old country. "This is great doinging country, exports to the old country. "This is great dairying country, said Mr. Ruddick, "one of Britain's principal sources of sup ply a few years ago, found it points for the sources of the said Mr. Ruddick, "one of Britain's principal sources of supply a few years ago, found it necessary last year to go to the opposite end of the earth (New Zealand) for supplies to for her own people, and the indications are that the imports pounds."

pounds." The nominee for the presidency of Calgary's boar of trade for the coming year is Mr. J. W. Campbell, Supplies ing director and first vice-president of General Supplies Limited, and president of the Federated Engineering in Supplies Company, Limited, of Toronto, a director of the Vancouver Portland Cement Company. Other nominations Vancouver Portland Cement Company. Other nominations in W. H. for the various offices are: First vice-president, Mr. W. Vancouver Portland Cement Company. Other nominal H. for the various offices are: First vice-president, Mr. M. Berkinshaw; second vice-president, Mr. A. McKillop; third vice-president, Mr. J. A. Valiquette. Council: Messrs. A. Allan, J. A. Brookbank, D. G. Campbell, A. F. Cross, F. E. Dagg, J. W. Davidson, W. G. Fowler, W. Georgeson, M. Graves, M. D. Geddes, T. A. Hornibrook, R. J. Hutchir F. F. M. Macbeth, P. D. A TRIP THROUGH THE PROVINCES

NEW BRUNSWICK

Saint John.—The year 1912 has been a notable one in the industrial and commercial history of New Brunswick. The like is true with regard to agriculture and the develop-ment of recover with regard to agriculture and the development of resources generally. A good deal of progress has been made with the St. John Valley Railway, which will con-nect Grand Falls and St. John, and it is possible that a por-tion of this line with the st. John valley Railway, which will contion of this line will be ready for operation by the end of this year. The line will be ready for operation by the end of this in year. The Gibson and Minto Railway, thirty-three miles in length, which will connect the Canadian Pacific Railway with the Queen's County coal fields is not quite completed. output of coal from the mines will be in operation, and the output of coal from the mines will be greatly increased. Last timental Railway was in concation with a limited service. tinental Railway was in operation with a limited service. Arrangements had been made to construct a bridge across the St. John Phad been made to construct a bridge across the St. John River at St. Leonards, which will connect **the** International Railway from Campbellton to St. Leonards across the provide the state of ross the province, with the railway system of the state of Maine.

Turning to agriculture it is to be noted that the province has gained this year an experimental farm, a Canadian Pa-cific Railway demonstration farm, and the assurance of the establishment establishment of two agricultural schools. A number of English farmers have settled in the province during the past year, and under the ready-made-farm scheme a number demand for farm lands, and also the formation of a number of companies for colonization purposes. Great promise was of companies for colonization purposes. Great promise was made with the orchard industry, and arrangements com-pleted for the orchard industry of commercial orchards pleted for the planting of a number of commercial orchards next spring. The department of agriculture also appointed important branches, shown hushandry, poultry raising, and mportant branches, sheep husbandry, poultry raising, and fruit culture.

ther culture. With regard to natural resources, there has been a fur-ther development of natural gas, which has been piped into mines, and also at the Gloucester County iron mines. The town at Chamcoolt town at Chamcook.

A number of new manufacturing industries have been established at St. John and other points. At St. John the West St. John new wharves and a new grain elevator for the has a Pacific Bailway are under construction, and there Canadian Pacific Railway are under construction, and there has been more building and a new grain elevator, and there in

^{as been more} building and general construction, work in ^e city than at an end of the start o the steady increase in equipment provided each year for wharf and warehouse accommodation at St. John, despite the steady increase in equipment provided each year for years past. Fortunately two new steamship berths, as well Canadian Pacific Railway will be ready this year, and the line between St. John and Vanceboro to handle the increased up the steady the year, the year, and the straffic.

Wholesale trade has been active throughout the year, and merchants in all lines express themselves well satisfied tinue to show an increase. Bank clearings at St. John con-outlook for the new year is very bright.—Acting Secretary, but Board of Trade

John Board of Trade.

Fredericton.—A spirit of greater optimism than has ever ed existed seems to pervade the community and continued expansion is expected.

ed expansion is expected. During the past year construction was commenced on Coal Railways. The former line will run from Grand Lake to St. John Valley and the Fredericton and Grand Lake to St. John and will open up a large agricultural territory Grand Trunk Pacific Railway at Grand Falls. This route transcontinental railway looking for the shortest haul to the way will be located in Fredericton, as this city is the ter-teason of the Intercolonial and the valley line will be leased Lake to grand the Intercolonial managing board. By und the construction of the Fredericton and Grand and operated by the Intercolonial managing board. By teason of the construction of the Fredericton and Grand coal from the Grand Lake mines and become the distribut-local manufacturers. The statement has been made that the the hydrogeneous when the new railway is completed, will rival power charges, when the new railway is completed, will rival the hydro-electric power rates of Upper Canadian cities.

The Dominion Government established the experimental farm at Fredericton during the year. Two new larriggam factories and tanneries were put up, and a new foundry was established. The Donald Fraser and Sons' Company, Lim-ited, acquired the Scott lumber mills and lands and will cut several millions feet during the coming season.

The Bank of Commerce opened a branch bank in Fredericton in October last.

Three water power companies commenced preliminary work to supply Fredericton with cheap hydro-electric power from the St. John River.

The city council offers a free site, free water and ex-emption from taxation to sterling, bona fide industries.-George M. McDode, publicity commissioner, Fredericton.

Campbellton has now reached its most critical period **Campbellion** has now reached its most critical period since the great fire of 1910. However, on the whole, trade has been as good as could be expected under the circum-stances, and a number of new buildings have been erected. For next season prospects are very fair. Both lumber and shingle markets are good, perhaps better than they have been for a long time. There is a fair prospect of the establish-ment of a pull here in the entire which would mean ment of a pulp mill here in the spring, which would mean considerable aid to the town. Besides this there are nego-tiations under way for the establishment of a factory for manufacture of railway supplies.—John T. Reid, town clerk.

PRINCE EDWARD ISLAND

Farm land, buildings, &c., were valued in the recent census returns at \$34,379,515, being an increase of \$8,589,-333 in ten years, or 33%. The production of the census year in field crops, and

fruit grown, in live stock, animals slaughtered, dairy pro-ducts, wool, eggs, honey and maple sugar marketed, was \$11,967,425, being an increase of 60% over the production of 1901.

To the value of live stock on the farms should be added at least \$4,000,000 on account of the black fox industry. This enterprise has shown a most remarkable development and many considerable fortunes have been realized in it. There are now over 120 ranches containing hundreds of very valuable animals, which at present sell for \$10,000 and upwards per pair.

Many new companies have been formed to carry on foxbreeding, oyster culture and other industries. The farmers have had good crops and better prices than

before.

The production of the fisheries is not materially different from previous years, which has been slightly over a mil-lion dollars in value, the greater half being in lobsters. There are 187 lobster canning factories surrounding the island. The entire production of the island during the clos-ing year should run close upon \$16,000,000, or \$170 per

The outlook toward the future is bright in this province. This arises in part from the promise of a car ferry to connect the island with the mainland at a narrow portion of the strait, where the water is only eight miles wide. \$1,400,000 for this purpose was voted by parliament at its last session, and surveys and estimates have been completed. The ferry promises to give continuous crossing where heretofore in the winter there has been frequent interruptions on account of the ice.

Another promising line for development and investment is afforded by the oyster areas of the province which were last year transferred wholly to the control of the provincial government and which they are now taking vigorous and well-considered measures to restore. Oysters of the finest quality in great abundance grew naturally all around these shores. Twenty years ago almost three-fourths of the oyster product of the Dominion came from the island. From over-fishing and neglect the fishery has been depleted. The en-tire area made up of beds still productive and other areas now non-productive but affording excellent soil for oyster culture is at least 100,000 acres. Of this about 18,000 acres was this year carefully surveyed for leasing and the number of applicants for leases exceeded expectations. A field for investment is available and already capitalists are becoming interested. government and which they are now taking vigorous and interested.

Again, the island is a summer resort for tourist visitors. This traffic also awaits, and is possible of great develop-ment. The car ferry, the oyster industry, and the develop-

ment of the summer tourist business brightens the business and trade outlook for Prince Edward Island, although with-out these the past year has been a prosperous one.—J. E. B. McCready, publicity agent for Prince Edward Island.

ONTARIO

Weiland .- The general situation and outlook in the Welland district for the coming year is exceedingly bright and from present appearances it would seem that this year will

be one of the best that Welland has ever experienced. We have secured here in the last year two new indus-tries in the Welland and Terminals and the Northern Steel Company; in addition to this the Metals Chemical Company, Toronto, are now building a plant here which will employ a large number of people and the Empire Cotton Mill have decided on a location and are building their new plant which will employ about 500 people at the start. All of the factories located here are building additions and enlarging their plants, and some doubling their capacities. Consider-able house building is going on and large additions to the population taking place.—J. D. Payne.

Campbellford's progress is as favorable a. can be wished along the lines of all growth that comes to any community from year to year. During the past few years some extensive work has been carried on by the government in the erecting of the Trent Valley Canal, together with private enterprises in the building of power houses for the transmitting of electric energy to this town and to outside points.

Few towns, if any, possibly have better advantages to offer to intending manufacturers and industries. The withdrawal of funds for investment in the West has been much felt. To a large extent people have forwarded their total savings, either for investment or real estate speculation, and in a great many cases have withdrawn the loanable value of their insurance to keep pace with the call for Western transactions.

The exodus of Bulgarians returning to take up arms has been heavily felt by employers in this district, and with the withdrawal of funds, this town has lost perhaps some \$60,-ooo alone taken with the people.

The crops have been about the average. Prices have been good for all stock. Cheese this year has commanded a higher price than during the past few years, that is, through-out the season. The general outlook for all trade is good.—

C. H. Harris, Secretary, Board of Trade. Woodstock's progress during the past year has been satisfactory. Municipal improvements include an excellent lighting system. Many residences have been built and there

is evidence of much building being done this year. Woodstock has at present 35 industries, and practically without exception all have had a successful year, and have experienced great difficulty in keeping pace with their orders. Among the new industries secured during the past year might be mentioned the Harvey Knitting Company; the McKinney Lumber Company, Limited, planing mill, etc.; and the Canadian Morehead Manufacturing Company, Limited. Several of the manufacturing companies here have made large additions to their plants during the past year and have very largely increased the number of their employees. The

very largely increased the number of their employees. The Oxford Knitting Company have doubled their factory capa-city and are employing a large staff of operatives. The Canada Furniture Manufacturers, Limited, have built several fine additions to their factories here within the last twelve months, and have for some time been working overtime to fill their orders. The Standard Wire Fence Com-nany Limited and the Hamilton Tube Company Limited pany, Limited, and the Hamilton Tube Company, Limited, have completed arrangements for an amalgamation of the have completed arrangements for an amagamation of the two companies at Woodstock, and a new factory of the same size as the present Standard Wire Company factory is now under way, and will be completed this year. The Woodstock under way, and will be completed this year. The Woodstock Floral Company during the past summer have erected five large new greenhouses, each 225 feet long, and now have one of the most complete floral equipments in America.—H. Sykes, Secretary Board of Trade.

Sudbury.—This town is growing very rapidly. Houses and offices are exceedingly scarce. There is room here for several small manufactures, a woolen mill, a foundry and machine shop, a wagon and sleigh shop would do well here. There is an exceptional opening for a large restaurant The floating population is large, from one thouwell run. sand to fifteen hundred people. It is estimated there is at least twelve hundred meals per day are served by the Chinese restaurants.

nese restaurants. Within six miles of Sudbury there is at present distri-buted in wages by the mines alone about \$3,000,000 per an-num; the lumbering and pulpwood industry adds nearly another \$1,000,000; and the Canadian Pacific, Canadian Northern, and Algoma Eastern Railway considerable more. Vigorous preparation is being made by the Canadian Cop-

ing a railroad from Sudbury, north-west to the Grand Trunk Pacific and the depart Pacific, and the department promised the board of trade that a sum will be placed in the estimates at the coming session to locate the line, and build it into the clay belt on to the Grand Trunk Pacific.—J. F. Black, President, Board of Trade. Trade.

Hamilton .- This city enters the new year enjoying Each largest measure of industrial prosperity in her history. year, for the past few years, has exceeded the previous one in development and expansion, but 1912 was in advance of all previous years. On every hand are indications of great prosperity. During the past year twelve new factories, with an invested capital of over two million dollars, have located in this city.

Three new factories are under construction at the pre

sent time, which will employ 1,500 men by this spring. The National Steel Car Company have had a large force The National Steel Car Company have had a large force of men employed erecting their plant, which will cost nearly three-quarters of a million dollars, will employ 1,000 men early in the new year. It will have a capacity of from thirty to thirty-five steel and wood freight cars per day. The Dominion Steel Castings Company are putting up factory on Depew Street, to cost \$300,000, and about 400 hands will be employed, and it will have a capacity of 12,000 tons per year.

The Canadian Porcelain Company are erecting a \$150,000 will employ 125 to 150 men at the start, and will manufacture vitrified white porcelain for electrical and other purposes. plant on 20 acres of land adjoining the golf links.

Among the other industrial acquisitions secured by Ham ilton this year may be mentioned: Canadian Knitting Com-pany, Buffalo Brake Beam Company, Fretz Canning pany, Harper, Presnail Cigar Company, Hamilton Steel struction Company, Hamilton Trolley Wheel Company, ilton Gas Mantle Company.

There is reason to believe that Hamilton is enter ing upon a period of greater development and growth attraction for manufacturers seeking location is the fact that raw materials entering into the raw materials entering into the construction of machinery is manufactured and can be purchased in Hamilton. Advisional factories also strengthen the labor market, which is another important factor.

A start has been made on improving Hamilton harbor, and the Dominion government will likelly spend a million do-lars in the next few years, deepening the bay along the water front, so that navigation will be safe for the largest freighters, will also play an important part in Hamilton's future industrial prosperity, as will the installation of the municipally-owned hydro-electric department, which Hamil-butes power for manufacturing and lighting at cost. ton Industrial outlook for the coming year is very promis-ing.—H. M. Marsh, Commissioner.

MANITOBA

Duck Lake.—The crop in this district was fully up 55 that of recent years, averaging: Wheat, 25 bushels; oats, are bushels; and barley, 50 bushels to the acre. Collections in somewhat late, but have been concelled and Marchants and somewhat late, but have been generally good. Merchants in this town report a successful year. this town report a successful year. A new flour and oatmeal mill is expected to be in operation here this spring, with a capacity of 400 barrels daily.—Hamforth, Secretary Board of Trade.

Pilot Mound, Man .- Despite the wettest harvest sea on record, there will be moderate return. In August but most promising crop for 15 years past seemed probable, still that estimate was somewhat lowered by a cold, wet fall. Still this district had and will continue to have a fairly good share of prosperity.—H. M. Speechly, M.D., Secretary Board Trade.

Rapid City.—The crop is not netting up quite as much money as it did a year ago. The rains were not as early in July as further West—in Saskatchewan—and the dry weather made a great difference in the crop. After the rains in made a great difference in the crop. After the rains in

e 11 THE MONETARY TIMES

July the straw grew very rank, and there was a very heavy growth in the straw, and very little grain in proportion. Business seems bright, and farmers are meeting their paper satisfactorily. satisfactorily. The prospect for next year looks good; there has been much summer fallow done, and it has been well Worked, and the moisture of the late summer and fall raims are stored up to the fact the present year's crop. One are stored up in the land for the present year's crop. thing that the farmers should go into more extensively, and that is stock raising. As an example, a party bought four pigs, and all the feed for them, the returns of these two that were sold netted a little more than the cost and feed of the four. Stock-raising should be encouraged by the banks, and money should be advanced to the farmers to the banks, and money should be advanced to the farmers to buy stock and to allow him to use up his feed and receive a larger proc. larger profit on his grain than he would get otherwise. Beef has paid well in this district, and if the farmer, instead of selling his oats and barley to the grain dealer, would buy cattle and food the second profit would be obtained.—H.

Cattle and feed them a larger profit would be obtained.—H. W. Harvey, secretary-treasurer, Board of Trade. Dauphin.—For Dauphin the year 1912 was most pro-sperous. The city's indebtedness totals \$440,000. \$75,000 in debentures, yet to be put upon the market, the greater amount debentures, yet to be put upon the market, the greater amount of this was incurred in the installing of public utilities, sew-

The assessment of \$1,628,054 at the present time is low, there being many new residences, stores and factories erected since the assessment was made, which will bring it near the three millions

The sewerage system is nearing completion. The water system, which will, when completed, be one of the best and cheapest operated in Western Canada, ob-tains its supply is the system from a soft spring lake, and tains its supply in the mountain from a soft spring lake, and is conversely in the mountain from a soft spring lake, and is conveyed to the city by gravitation, giving ample supply

for domestic and fire-fighting purposes. The Government erected a Dominion lands title office during the part ways the Canadian Northern Railway built Buildduring the past year; the Canadian Northern Railway

it is estimated, cost \$30,000.

The crops were very satisfactory. They had a set-back at one time owing to the excessive rain. This caused a de-lay in the harvest properties obst with the help of the mild lay in the harvest operations, but with the help of the mild open weather to the end of November cutting and threshing were continued. to the acre was obtained. An average of about 34 bushels of wheat

Two banks have notified their intention of locating here, making five branches. The Bank of Montreal has secured premises on Main Street.—Langdon, secretary, Dauphin Board of Trade.

SASKATCHEWAN

Saskatoon.-The civic census taken on October 25th. ^{Saskatoon.} The civic census taken on October 25..., ¹⁹¹², makes the population 27,527. And it even does not ^{include} all the people. Nevertheless, 50 per cent. increase in ^{one} year is

one year is most encouraging. One interesting phase of our development is that the and eight storied blocks of metropolitan type are now being and eight storied blocks of metropolitan type are now being constructed lies of metropolitan type are now being constructed. Industrial enterprise is expanding steadily and solidly. Last Austrial enterprise Oats Company, of Chicago, decided to locate their sole western Canadian plant at Saskatoon.

Quite a number of small manufacturing concerns have established within the past year, all of which show every League has been working quite energetically, and has ar-inevitable effect of the money received in payment for crops inevitable effect of the money received in payment for crops will be an increase even upon the activity which now char-tion of the amount of our commerce. Some indica-fect of the amount of our be active to the amount of the second payment for the acterizes every department of our commerce. Some indica-tion of the amount of such money may be gathered from the hauled out of the 125 mile stretch of the Canadian Northern 16,000,000 included a large proportion of flax, and could, Mailways Goose Lake line, running to our south-west. These 16,000,000 included a large proportion of flax, and could, mately \$16,000,000. And the Goose Lake line is only one for Western Canada's development than the last two com-bined.—F. Maclure Sclanders, Commissioner. bined. F. Maclure Sclanders, Commissioner.

ALBERTA

Vegreville.—The past year in the Vegreville district has heen one of increased activity in every branch of business. being in advance of the town review it with gratification as completed the liquidation of their debts. Crops have been

good in yield and quality, in many cases the best that has ever been grown here. Cattle have been brought in for sale to the stock dealers in large numbers; 125 carloads were shipped during one month (October).

In regard to municipal improvements, Vegreville has its waterworks completed, and also its power house of solid brick. A large reservoir has been constructed on the north-ern limits of the town. The sewerage system is being installed and a considerable distance of piping has been laid. An abundant supply of good water has been obtained at a depth of 100 feet, which will be available for domestic use and fire protection as soon as the pumping machinery can

be erected. Natural gas, it is expected, will be available in sufficient force to provide light, heat and power for industrial pur-

There has been a steady increase in the population, and the school house has been doubled ,its original size. An-other attractive feature for Vegreville is the new line connecting Vegreville with Calgary, from which place the distance to be completed is now only 35 miles. The town is on the main line of the Canadian Northern Railway, being 72 miles east of Edmonton. The new line will thus make Vegreville a centre of business importance, having outlets to two large cities, viz., Edmonton and Calgary. Manufactures and industries at present established com-

prise a sash and door factory, electric light plant, machine shop, flour and grist mill, brick yard, cheese factory, and

creamery. The prospect of the situation for Vegreville is therefore of the brightest.—Secretary, Board of Trade.

BRITISH COLUMBIA

Salmon Arm.—The municipality contains about 72 square miles of exceedingly fertile country. Its cultivatable land includes splendid benches for fruit growing, notably apples, while the extensive Salmon River Valley and other smaller valleys provide very rich bottom lands, specially suited to hay, dairy and general mixed farming. It is the shipping and business centre of a large outlying district surrounding the Shuswan Labe Salmon Arm.-The municipality contains

district surrounding the Shuswap Lake.

The outlook for Salmon Arm for the coming year is promising. During the past year the city was incorporated, and let contracts for a water system costing \$45,000, electric light system costing \$22,000, and added largely to the sidewalks at a cost of \$4,000. By-laws will be introduced early in 1913 for authority to borrow \$45,000 for sewers and \$20,000 for roads.

An agricultural hall standing in 25 acres of ground within the city limits was erected, meeting a long-felt want for adequate accommodation for agricultural and fruit shows. Important new trunk roads are being made by the government, providing better communication with the more distant parts of the Salmon River Valley and with Enderby in the Okanagan.

Land is being cleared and cultivated, and new orchards are coming into bearing. 500 to 600 acres have been planted in trees during 1912, and it is estimated that 500 acres are cleared ready for planting this spring. 2,000 acres are at present in orchard, 150 acres of which are in full bearing.

At present there are no manufacturers established here. As compared with previous years production has greatly

increased.

The quantity has increased about 50% in the last two years, and 36 carloads of fruit were shipped last year.

600 tons of hay were sold at \$20 per ton.

The district produced about 40 carloads of potatoes and 45,000 gallons of milk were shipped at 30c. per gallon.

In view of this agricultural development the careful attention of the directors of the various associations interested is being given to the extension and perfecting of the sell-

ing organizations, so as to keep pace with the increased out-put.—J. D. Macev, Secretary, Board of Trade. **Revelstoke.**—Notwithstanding the set-backs, great as they were in 1911, a movement was put on foot to organize a progress club to act in conjunction with the board of trade, until Revelstoke has now a strong organization. Recogniz-ing the possibilities of the district for attracting the tourist traffic a suggestion was made and followed to build an auto-mobile road to the top of Mount Revelstoke. The provin-cial government was approached on the subject and a grant of \$10,000 obtained with which to start it. A survey proved the route feasible to an altitude of 6,500 feet above sea level, opening up a park of several thousand acres of the grandest and most beautiful scenery imaginable. It is expected that further grants will be made with which to complete this

The Dominion Sawmills commenced operations again in the spring, the company having been reorganized and its finances placed on a stronger basis.

The city streets have been improved by grading and macadamizing and about five miles of cement sidewalks have been added to those already laid.

The sum of \$100,000 has been expended on, and 18 miles of roads outside the city have been added in extensions opening up more of the surrounding country to settlement and bringing nearer the time when Revelstoke will have connections with other towns by this means as well as by rail. The construction of these roads is necessarily slow ow ing to the difficulties to be overcome, but once completed they are built for all time to come.

The Canadian Pacific Railway built large oil tanks and installed all their locomotives with oil burners. This does away with the use of coal for the whole mountain section. They are also at present erecting a large gas plant for the purpose of supplying gas to all their cars between the coast and Winnipeg.

Revelstoke is anticipating building a new post office, city hall, high school, also a brewery, tourist hotel, govern-ment wharf, Canadian Pacific Railway extensions, enlarge-ment of the shops and freight sheds, &c., the building of a railway through the Big Bend country, street improvements and the throwing open to settlement of all the available Do-minion lands in the vicinity and within the railway belt which have in the past been held under timber leases, and not been available to settement.

The farmers and fruit growers in the district of Revelstoke and Arrow Lakes and districts immediately west of Revelstoke also had a most prosperous year in that just closed .- H. H. McVity, secretary, board of trade.

ONTARIO'S LIVE STOCK

The numbers of live stock in Ontario are as follow, with comparisons :-

	1910.	1911.	1912.
Horses	724,384	. 727,916	742,139
Milch cows	1,052,796	1,045,610	1,044,177
Other cattle	1,514,332	1,547,595	1,580,603
Sheep and lambs	1,065,101	1,040,245	1,021,848

RED DEER'S SMALL FIRE LOSS

Ten fires and eight false alarms is the report of Red Deer's, Alta., fire department for 1912.

The average number of men responding to fires has been 18.7; the average number of men responding to false alarms, 14.7; the average number of men attending practices, 13.8. The total loss by fire was \$1,105.00, of which 75 per cent. was covered by insurance.

The cause of fires was as follows: Children playing with matches, 2; hot ashes piled against a building, 1; chimney fires, 2; coal oil coffee boiler exploded, 1; coal oil lamp ex-ploded, 1; spilled gasoline and a lighted match, 1; unaccount-able, 1. Three thousand feet of hose was laid and one hun-dred and three gallons of chemical were used in extinguishing the fires.

At the present time there is a total of twenty-three men and officers in the brigade.

The fire alarm system has been responsible for some of the false alarms and, while it has proved fairly successful, the town has outgrown this primitive kind of system, and should have a modern fire alarm system, is the opinion of Fire Chief Meeres, who adds: Our building by-laws are away out of date, and at this time of rapid growth their revisement is a vital question if we are to maintain our reputation of small fire losses.

On account of the extensive building, and largely increased value of buildings at risk, the ratepayers must be prepared to spend a large sum of money to increase the efficiency of the fire department.

A branch of the Canadian Bank of Commerce has been opened at Pandora Avenue and Cook Street, Victoria, B.C., under the temporary management of Mr. R. S. Ross.

SUCCESSFUL SHIPPING SEASON ON ST. LAWRENCE

Montreal's Passenger Traffic Broke All Previous Records-Many Improvements Were Made, Including the Establishment of a Floating Dock

An increase in passenger traffic and enhanced rates for freight, marked the past St. Lawrence navigation season. The size and tonnage of steamore place in the season. The size and tonnage of steamers also increased.

Important changes took place both in the port itself and Important changes took place both in the port itself and in its directors. The resignation of the harbor commission ers, Messrs. G. W. Stephens, C. C. Ballantyne, and L. Geoffrion, was not the only change that has occurred in the management. Early in the season Hon. James McShane re-signed the post of harbormaster, and was succeeded by Captain L. E. Demers, who, till then, had been wreck com-missioner. Captain Demers was succeeded in the wreck commissioner's court by Captain H. St. George Lindsay. The most important works the succeeded in the

The most important works that were completed hat port were eclipsed by the arrival of the floating dock Duke of Connaught, which was formally opened by the Governor-General, whose name it bears, in November. Works com-pleted within the harbor include the No. 2 grain elevator opened by the Minister of Marine and Ficharian Hon. Jun opened by the Minister of Marine and Fisheries, Hon. I.b. Hazen, the new sheds at the Tarte Pier occupied by the Elder Dempster Company, the Houd I Dempster Company, the Head Line, New Zealand Shippi Company, and Furness, Withy & Company. The new sh No. 16, at the Victoria Pier, was also completed.

Receipts for Seven Months.

The past season was a record one with regard to the toms receipts. Increases were shown each month over corresponding month of the previous year. The receipts dur-ing the seven months of population of the \$15,500. ing the seven months of navigation amounted to \$15,00,000 (124.53, an increase owned) \$4,333,134, or more than 33³/₃ per cent. The figures of the several months are given herewith:

Maý June	\$2,144,476.10
June	\$2,144,47 80 1,949,077.80
July	1,949,07.54 2,251,657.54 2,318,871.70 2,318,871.70
October	2,348,995 2,276,878.59
November	2,210,

Harbor Commissioners' Returns.

The Harbor Commissioners' Returns. twelfth international congress on navigation, held at of in delphia, the delegates having previously made a tour of spection over the inland waterways of the Dominion. The reciprocity agreement with the British West Indies will re-sult in direct steamship communication between Canada and sult in direct steamship communication between Canada and British West Indies next year and the between Canada

British West Indies next year and benefit Montreal. A record season is reported from the offices of the nin hor Commission of the season is reported from the offices of an is A record season is reported from the offices of the Har-bor Commissioners. The revenue of the port showed an in-crease for the past season over that of 1911 of \$30,773.18 the figures for the two years being \$461,396.43 for 1912, compared with \$430,623.24 during 1911. The total invaria-was made up of the following amounts: Wharfage invaria-increase \$6,000; wharfage outwards, an increase of \$55,000 increase \$6,000; wharfage outwards, an increase of \$55,000 and a local traffic increase of \$19,273.19. There was a shat decrease to report in the number of sea-going vessels 730 arrived in port, the number being 26 less than last year, but vessels for this year, instead of 762 for the 1911 season; but there has been an increase of \$702 for the 1911 season; bar vessels for this year, instead of 762 for the 1911 season; but there has been an increase in tonnage, that for this year have ing been 2,403,024 tons account and the last ing been 2,403,924 tons against 2,338,252 for last.

Satisfactory Year for Shipowners.

From a shipowner's point of view the year was satisfied. Passenger traffic, especially the year was satisfied to be a sa tory. Passenger traffic, especially west-bound, increased ten per cent, this estimate being a conservative one. Freight past, and there was no trouble last unprecedented for the of water in the ten was no trouble last unprecedented the dept past, and there was no trouble last year with the depth of water in the ship channels, as there was previously hear rainfalls, having been over two feet throughout the search Labor troubles caused practically no inconvenience, Labor troubles caused practically no inconvenience, minor difficulties that arose were soon remedied.

Montreal's navigation season opened with the arrival of the Canada liner "Nieten" on May 1st, and closed with the departure of the "Bray Head" on December 3rd. dred and twenty-five individual ships entered the port during the navigation season.

The Bank of Nova Scotia has opened a branch at parhousie, N.B., with Mr. J. W. Macdonald as acting manager.

SUPPOSED INFERIORITY OF FIRST AND SECOND BORN MEMBERS OF FAMILIES

Theory Should be Supported by Positive and Convincing Proof-Statistics Used at Present Prove Very Little

BY T. B. MACAULAY, F.I.A., F.A.S.

There is a general impression that while the study of eugenics may be interesting, it can be of but little practical value, owing to numerous and obvious difficulties in apply-ing to the improvement of the human race the principles and methods which can be used in animal and plant breeding. Students of the science, while frankly recognizing this diffi-culty, have endeavored, nevertheless, to make their investi-stions as practical and helpful as possible. It has been thought by some that one foothold for practical work has members of families which certain authorities claim to have superior to their elder brothers and sisters, then it is evi-dent that the prevailing tendency towards small average superior to their elder brothers and sisters, then it is evi-dent that the prevailing tendency towards small average families has a most serious significance apart altogether from its numerical effect upon the population, while all in-fuences which tend to increase the size of families tend also prevent degeneration, and to improve the quality of the have also been made in this connection. Used as Texts for Criticism.

It is, for example, claimed to be proved that the average families of the inferior classes of the community are even larger than those of the normal population.

Assuming the soundness of these theories, they have been used as texts for the criticisms of the child-labor regu-lations, and of the criticisms of the child-labor regubeen used as texts for the criticisms of the child-labor regu-lations, and of other enactments designed to improve the condition of the poor. These various assertions, therefore, deserve to be investigated most carefully, not merely for their own sake, but because of the far-reaching character of the theories of which they are the foundation.

Before me is Professor Karl Pearson's "First Study of the Statistics of Pulmonary Tuberculosis." If I venture understand that I fully appreciate the great achievements have made his name a household word amongst students rearson's paper, just mentioned, contains an analysis of having one member in the Crossley Sanatorium. Tuberculous Families, humber of Fach Glass of Sibling.

rofessor Pearson says :---

Professor Pearson says:--buit up of families in all stages of development. There will be some in which both oldest and youngest siblings have eldest have and the youngest have not, and some in which the the eldest are in it and the youngest have not reached it. and we might expect, out of the totals that pass through, pen to be elder or younger siblings. In other words, if we we might expect that as far as position in family is con-tamily." would be drawn indifferently from all parts of the

The ratio of the 381 patients to the 2,164 members of the families to which they belonged is applied to the number of children of each order of birth, and the claim is then made that the resulting calculated numbers as given above are the numbers that should have been in the sanatorium if the liability to tuberculosis were equally great in all mem-bers of each family, regardless of their order of birth. (See above table.) The actual number of inmates, it will be seen, are, among the early births, greatly in excess of the sup-posed normal numbers as calculated by Professor Pear son, and are less than the numbers calculated for the later births. births.

Professor Pearson further presents a diagram which vividly illustrates the supposed greater liability to tuber-culosis of the early born, and the supposed comparative im-munity of the later born, and adds: "It will be obvious on

T. B. MACAULAY, F.I.A., F.A.S.

mere inspection of this table, or of the accompanying graph, that the excess of elder born, and defect of younger born, is most marked."

The conclusion, as voiced by Professor Pearson, is: "In general, whether we deal with all tuberculous stocks, or only with those having no parental history, the elder offspring, especially the first and second, appear subject to tuberculosis at a very much higher rate than the younger members. If this concil incidence works working for the formation members. If this special incidence on the earlier be found to be true for other forms of pathological heritage, we have to be true for other forms of pathological heritage, we have a very serious factor of national deterioration introduced by the growing limitation of the family. It is further con-ceivable that any class which reproduces itself largely from the elder children, e.g., the peerage, as far as the father is concerned, would tend on the average to more rapidly de-generate. The substantiation in other cases of this patho-logical weighting of elder children, which appears true for the cases of tuberculosis and insanity, would be a eugenic fact of the greatest importance. The limitations of the family may not only be an evil, if it leads to a smaller rela-tive output of the mentally and physically better stocks, but even in the case of feebler stock, it may lead to a rela-tively larger proportion of the more affected individuals being added to the community."

Problem of Practical Eugenics.

In his pamphlet on "The Problem of Practical Eu-genics," the professor reproduces the diagram above men-tioned, and adds other similar diagrams, showing the sup-posed greater liability to insanity, crime and albinoism, among the earlier born. He adds :--"If our observations are correct, and I believe them to be so, then the mental and physical condition of the first and second born members of a family is differentiated from that of later members. They are of a more nervous, and

157

less stable constitution. We find that the neurotic, the in-sane, the tuberculous, and the albinotic, are more frequent among the elder born. Dr. Goring's results from criminality show the same law. The diagrams I put before you bring show the same law. The diagrams I put before you bring this out; you see in the tuberculous, the insane and criminal stocks that the first few members are weighted. But the stocks that the first few members are weighted. But the result of this law is remarkable. It means that if you reduce the size of the family you will tend to decrease the relative proportion of the mentally and physically sound in the com-munity. You will not upset this conclusion in the least, if, as I suspect, the extraordinarily able man, the genius, is also among the early born. For you will not lose him if you have a larger family, although you will lose the sounder members if you curtail it."

From these supposed facts the professor draws some far-reaching conclusions, even claiming that they require a modification of the Mendelian theory. These arguments are certainly plausible, and the conclusions derived there-from are most interesting. Before, however, we accept these conclusions, let us carefully consider the nature of the evi-dence on which they are based.

Shown by Statistics.

Let us consider first the statistics of tuberculosis. It is perfectly clear that the sanatorium contained larger proof the 381 families. Does this, however, prove that early born children are more liable to the disease than later born of the same families? Not at all. Such a condition as that shown by these statistics was inevitable, and could have shown by these statistics was inevitable, and could have been foretold. Suppose, for instance, that of the 381 families included in the statistics, one consisted of fifteen children, the eldest twenty years of age, the youngest six months. If the eldest were the one who had developed tuberculosis, and entered the sanatorium, then all the fourteen younger brothers and sisters would be carefully tabulated and in-cluded in the numbers of tuberculosis stocks of the later born. Because fewer of such later born, and, therefore, young siblings habies perhaps had become inmates of the born. Because fewer of such later born, and, therefore, young siblings, babies, perhaps, had become inmates of the young siblings, babies, perhaps, had become inmates of the sanatorium, we are asked to accept that fact as proof that later born children are superior to their elder brothers and sisters. It may be claimed that a family of fifteen is an extreme supposition, but the statistics before us include not only a family of fifteen children, but one of twenty-two. It is not wonderful, however, that the statistics also show that at least the youngest eight of that family (all of the eight being probably young children, some of them possibly in-fants), were not inmates of the sanatorium, there being no inmates belonging to any group beyond the fourteenth born.

Must Substantiate Assumption.

We are, however, told that "while a certain number of families exist with young siblings in which the older alone are likely to suffer, there are others in which the older are dead, or past the danger zone, and in which only the younger are likely to suffer," and he makes the assumption, therefore, that there will be enough older members of fami-lies whom he considers to be dead or past the supposed "danger zone," to offset the younger siblings.

Unless this assumption be substantiated, that there is a special danger zone, and enough members of the families beyond it to affect the younger siblings, the foundation of the whole theory and of its developments is removed, and the entire structure collapses like a house of cards. When the vital importance of this assumption is thus realized, we would expect that some proof would have been produced in support of it, but the foundation is simply assumed to be there, and a great edifice is then endeavored to be built on it. To those who think the assumption is sound, we commend the following statistics from the report of the Registrar-General of England and Wales, 1891-1900:---

Annual Mortality from Phthisis per Million Living at Various Ages.

Ages	· 0-4	4 5-9 3 206	10-14 368	15-19 1144	20-24 1730	25-34 2135
Ages 35	-44 4 592 2	45-54 2362	55-64 1881	65-74 1154	75 and over 437	All ages 1391

In the face of such figures it is difficult to see how the claim can be supported that the older members are "past the danger zone," and, therefore, not likely to become in-mates of a sanatorium. Not until age 75 does the death rate from phthisis descend to the neighborhood of what it is below age 15 is below age 15.

To sum up: In these tables the inclusion of children and babies who are not yet old enough to be exposed to the dangers in question, very clearly makes it inevitable that the groups of later born, to which these children belong, will show a more favorable percentage than the groups of early born, who are of necessity grown up. Professor Pearson, however, contends that there are as many people dead, or who have passed through the supposed danger zone, as there are children in the families not yet old enough to as there are children in the families not yet old enough to be exposed. This may be so, or may not be so. It is a tremendous assumption to make, and he does not produce proof in support of it. The diagrams p

The diagrams produced in regard to insanity and crime are, as already mentioned, similar to that relating to tuberculosis. I have not before me the statistics upon which they are based, but there is little doubt that they have been prepared in the same manner. If so, the inclusion of young children among the latter births renders these results also

The later born groups, which include a considerable number of children, naturally have not developed as large a proportion of insane persons and article because the older a proportion of insane persons and criminals as the older adult members of their families. It cannot even be claimed that there is a danger zone in inconity of a such as

adult members of their families. It cannot even be claimed that there is a danger zone in insanity and crime, such as was claimed for tuberculosis. The older siblings have in reality had just so much longer time to develop insanit or criminal propensities than the younger ones. Let us consider, for example, the inmates of any pen-tentiary or asylum. Is it not certain that many of those inmates have brothers and sisters younger than themselves? Is it not equally certain that many of those younger siblings are so immature that, merely because of their youthfunger they have not yet committed any crime of sufficient import ance to place them in the penitentiary? Some of them may be little more than babies—some of them actual babies. Can it reasonably be claimed that because these babies have not yet entered the penitentiary they are superior in moral quality to their elder brothers and such as the superior in moral not yet entered the penitentiary they are superior in mora quality to their elder brothers? Only the adult members of the families have had the area of the adult members the families have had the opportunity to develop criminal propensities.

Suggestion of Danger Zone.

In regard to tuberculosis, the consideration of the question is complicated by the suggestion of a danger zone, the claim that there may be sufficient persons past that zone to offset those who have not a sufficient persons past that zone

Even those who have not yet reached it. Even those who believe there is such a zone in the case of tuberculosis, will, however, hardly be likely to argue and if two criminals or insane persons be each aged twenty into one of them has a brother fifteen years older (age third five), while the other has a brother fifteen years younger (age five), then the elder brother may be envideded to have to offset those who have not yet reached it.

five), while the other has a brother fifteen years younger (age five), then the elder brother may be considered to have passed the danger zone of crime or insanity, and to be no more likely to have developed criminality or insanity than the child of five, and that the man of thirty-five may be properly offset against the child of five. Apart altogether, however, from the effect of including in the statistics the undeveloped members of the families, another consideration, not, however, probably productive of as marked an effect on the statistics would lead us to expect the the early born groups would show higher percentages of individuals lacking in robustness, or even given to crime. of individuals lacking in robustness, or even given to crime. If one or other, or both parents die, for example, of con-sumption, at comparatively early ages, their average family will certainly be much smaller than in the case of couples neither of whom die prematurely.

Fail to Prove Point.

Parents of criminal, or semi-criminal tendencies, more over, may not remain together sufficiently long in the other riage state to have large families, though, on the other hand, some paupers and others may have families over the average. The children of these small tuberculous or born ral families would, of course, all fall into the earlier some groups, and as a result of heredity we would expect some what larger percentages of weak or criminal children are those groups. That, however, in no way indicates that early born children are inferior to later born of the same families Statistics which combine small and large families pose. They may prove that tenth born children are superior to the average of all form Parents of criminal, or semi-criminal tendencies, mot

one heterogeneous group are clearly valueless for our pur-pose. They may prove that tenth born children are superior to the average of all first or second born children, including those of families which contain but one or two members an undue proportion of these latter being possibly from con-sumptive or criminal parents. But such statistics prove nothing as to the superiority of later born children over we are considering. elder born of the same families, and that is the point we

We now, however, come to another point which claimed to have been made. It is stated that families on taining tuberculous, insane or criminal members. are, is the average. larger than those of the total population this contention well founded, or is it, too, a statistical fallacy? I quote again from Professor Pearson's Study of the istics of Tuberculosis:-

female pedigrees 5.59. Mr. Schuster finds the mean size of American statistics 6.08, and from English statistics for probably completed families 6.19.

"It would thus appear that fewer offspring are not born to stocks tainted with pulmonary tuberculosis. "There is no reduced fertility in the case of tubercu-losis; in fact, their fertility is as great as that of any other class in the community." in the community."

The professor compares the results obtained as above with the while, and claims that these statistics show that "the of normals."

Do these figures really prove that the tuberculous families of the community are on the average as large, or larger, than those of normal stocks? Most decidedly not

Average is Overstated.

The mean family as given represents the mean for those particular 381 families, but it does not, and cannot, repre-sent the average size of tuberculous families in the com-munity as a whole. It is, in fact, impossible to ascertain the average size of a family in this manner. Statistics com-piled in this way must always, and inevitably, overstate the average. These 381 families are treated as though they were indifferently chosen from the tuberculous families of the community, but this is not so. Such a selection is one phase. bability of any marriages or of families, and the pro-torium is in direct proportion to the number of living chil-children are very likely to be included. children are very likely to be included.

Marriages with but few children are correspondingly less likely; while childless marriages will not be represented a chance of build with ten children has ten times as great chance of being included in the statistics as a marriage with but one child.

marriage with twenty-two children, like the one men-A marriage with twenty-two children, like the one mode tioned in the statistics, has twenty-two times the chance of being included that a marriage with but one child has, for there are twenty to the may develop tuberculosis being included that a marriage with but one child has, for there are twenty-two children who may develop tuberculosis as against one in the other case. The mean family derived from statistics so compiled clearly does not, and cannot, country, and to compare a result so found with the average size of a family in the community as a whole is to deceive ourselves. Suppositious Case is Taken.

Perhaps we will better appreciate the nature fallacies if we apply the same rules and reasoning by which a community which contains 1,000 families of one child 1,000 other families with ten children each. These of course, of exactly 5.5 To simplify the problem, let us so evenly distributed that there are precisely the same num-to forty-four inclusive, and that the ages of the children is a purely artificial grouping, but its very simplicity will of course, quite proper for us to ignore families of which momary tuber closes, or of an asylum or penitentiary. The for course, quite proper for us to ignore families of which monary tuberclosis, or of an asylum or penitentiary. The for convenience, divided evenly from ages twenty to forty-the families are arranged according to order of when these materials are arranged according to order of when these materials are arranged according to order of course, the following is the result:— A = 3 = 4 = 5Perhaps we will better appreciate the nature of these, fallacies if we apply the same rules and reasoning by which they are produced to be produced to

May I take the liberty of applying in friendly banter professor's words and arguments to the above supthe

positious case? "It will be obvious on mere inspection of this table,

positious case? "It will be obvious on mere inspection of this table, or of the accompanying graph, that the excess of elder born, and defect of younger born, is most marked. Testing by the usual process for goodness of fit we conclude that the probability of such a distribution of older and younger members of a family occurring by random selection lies between one and two in the ten millions trials." We thus make what on its face would appear to be a very wonderful discovery. "It is very evident that a much larger proportion of the older born members of families be-come professors, and the first born are evidently peculiarly subject to this dread complaint. These statistics in regard to tuberculosis, insanity, crime and albinoism, furnish con-clusive evidence that the older born, and particularly the first born, are on the average inferior physically, mentally, and morally, and that the later born are their decided su-periors in these respects." According to Size of Family.

According to Size of Family.

According to Size of Family. A further and most interesting and important point is to be noted as to the fertility of professorial stocks. Group-ing the professors in our statistics according to size of family, we find that twenty belong to families of one, and 128 belonged to families of ten. In the 148 families there were thus 1,300 children, the average size of the family being 8.8. This is a surprisingly high figure, and, of course, enormously greater than that of the general popu-lation. It furnishes convincing proof that "the families of the affected are larger, not smaller, than those of normals." The results are, in fact, so striking that we must really conclude that there is some connection between fertility and the tendency to professoritis. The exact nature of that con-nection and which is cause and which is effect, we are not vet able to say, but the fact of a connection is obvious. It yet able to say, but the fact of a connection is obvious. It is not impossible that by increasing the number of professorships we may be able to bring into operation a force that may effectively combat the tendency towards degeneration in the community resulting from race suicide, for with their large average families, the numbers of later born, and, therefore, superior individuals, would be greatly increased. These statistics, moreover, confirm the necessity of modi-fying seriously our conceptions of the Mendelian theory, as already pointed out in connection with our study of tuberculosis.

Positive and Convincing Proof Must be Civen.

This is precisely the reasoning which is used as proof of the theories in connection with eugenics, which we have been discussing.

In conclusion, it will be noted that I do not claim that elder born children may not possibly be inferior, on the average, to later born of the same families. What I do say is, that we should not be asked to accept this theory, and the far-reaching conclusions based on it, without positive and convincing proof. The statistics, such as those given by Dr. Rivers and Professor Pearson, in reality prove nothing. If this theory be correct, it should be easy to establish that fact without relying on fallacies. Exclude, from the

that fact without relying on fallacies. Exclude from the statistics all families with less than, say, five children; exclude, also, all children that are too young to have been fully exposed to the risk under consideration; compare the later born with the earlier born of their own families only; make allowance for the fact that in cases where the risk is later born with the earlier born of their own families only; make allowance for the fact that in cases where the risk is continuous. or partly continuous, during adult life, a man in middle or old age has had a longer time to develop the trouble than one just reaching manhood: carefully exclude all other sources of error; then give us the results, and we will judge of the truth or otherwise of the theory. It is quite possible that the offspring of immature parents may be less robust than others; but the assertion that the first child born to a couple who marry at age thirty is more likely to be a degenerate one than the same child would have been had his parents married ten years earlier and had several children before him, will require a lot of proof.

EXPORTS OF FLOUR AND GRAIN

Big Business from the Port of Montreal Last Year-No American Corn Was Shipped

The total exports of grain from Montreal, during the past season, showed an increase of more than 9,000,000 bushels compared with 1911. In the latter year, over 5,890,000 bushels of American corn were exported from Montreal, 5,890,000 while last year not one bushel left that port. This was due to the short crop in the United States. The largest part of

CANADIAN COLD MOVEMENT

Representatives of the Canadian banks with branches in New York think that a flow of gold to that centre from Canada is not a likely happening of the near future. There is not sufficient inducement in the shape of high call money to cause such a return movement. The Canadian banks are still finding more profitable use for their funds at home. Their charges for mercantile advances range from 6 to 7%, and will probably continue so well into the present year. At the same time the gold movement did not arrive at

this settled condition as early as is commonly supposed. Shortly after the beginning of December, New York recovered a portion of the gold which the Canadian banks had re-quisitioned late in November.

SASKATOON UNDERWRITERS' PROPOSAL

How to obtain better protection for holders of life in^{sur}, ance policies was considered by the Saskatoon Underwrit^{ers} Association at their annual meeting. It house the for Association at their annual meeting. It was decided to for quest the provincial government to make it compulsory for wan, to obtain a dominion charter before an environment license. wan, to obtain a dominion charter before a provisional license is granted. Besides more adequately and provisional license

wan, to obtain a dominion charter before a provisional field is granted. Besides more adequately protecting policy he ers, this would relieve the provincial government of the ne cessity of looking into the standing of such companies. W. The following officers were elected:—President, Car Welch. Northern Life; 1st vice-president, W. J. Smith, Life; ada Life; 2nd vice-president. W. H. Becker, London cor-secretary-treasurer, C. Melville Pearson. The executive Un-sists of these officers and Messrs L. H. Colwill, George derwood, and C. P. Thomas.

THE BANK OF TORONTO

Report of the Fifty-Seventh Annual General Meeting

The fifty-seventh Annual Meeting of the Stockholders of this Bank was held on 8th January, 1913, at the Head Office,

^{chis} Bank was held on 8th January, 1913, at the term
 ^{con} Wellington Street East, Toronto.
 The Chair was taken by the President, Mr. Duncan
 ^{coulson}. Mr. Thomas F. How, the General Manager, acted
 ^{as} Secretary, and Messrs. George R. Hargraft and E. M.
 ^{chadwick} were appointed Scrutineers.

The Secretary then read the following Report:-The Directors of the Bank of Toronto beg to present The Directors of the Bank of Toronto beg to plate their Report for the year ending 30th November, 1912, accom-panied by a statement showing the condition of the Bank on that date and the second the operations for the year. that date and the result of the operations for the year.

The Bank Act, which has recently been introduced by the holders of Finance, provides for the appointment by the stock-the balance sheet to be accented by the Directors at the Anthe balance sheet to be presented by the Directors at the Annual Meeting. In anticipation of this proposal becoming an enactment, the stockholders will be asked to appoint an auditor or auditors to represent them in making this examination, and to give in a report at the next Annual Meeting.

The Directors have, with the deepest regret, to record the death of their former President, Mr. W. H. Beatty. For over thirty years he had been a member of this Board, and his thirty years he had been a member of this Board, and his great ability, wide experience, and thorough loyalty to the Bank's interests were freely devoted to its service. The vacancy thus caused has been filled by the election of Mr. J. L. Englehart, Chairman of the Temiskaming and Northern Ontario Railway Commission, and a large stockholder of the Bank.

The Head Office and Branches of the Bank have undergone the usual careful inspection. At the Head Office a Committee of the Board have, as usual, verified the Cash, Securities, and Loans at the Head Office, and have examined the returns received from all the Branches of the Bank and verified the figures contained in the balance sheet, which is herewith presented.

All of which is respectfully submitted.

D. COULSON,

President.

THOS. F. HOW, General Manager.

After the Report had been read, the President addressed the meeting as follows :-

Centlemen :- Before moving the adoption of the Report which has just been read I desire to make a few remarks, larging to some extent upon the topics suggested in the Report.

General Conditions :--- The year has been an eventful one, and here it has been characterized by great expansion and activity in general business, and by an unusual demand for money.

On the Continent matters have been unsettled and financial disturbance has been general. Germany has been under financial strain for more than a year past; Italy engaged in a war that has drawn heavily upon her resources; the war in the Balkans has wasted enormous sums of money, and the unrest created by the war and the jealousies existing between the Nations have produced great uneasiness and financial disturbances in Russia and Austria. In many of the Continental countries hoarding has been general, and large sums of money have been hidden away.

The trade of Great Britain has never before reached such volume. The number of unemployed there has never been so small, and the prosperity of the country has never been more marked.

In the United States there has been an improvement in conditions throughout the year, and a marked increase in development.

In Canada the returns from the Department of Trade and Commerce show a very large increase over any preceding year. The volume of imports and exports for the twelve months ending 31st October, 1912, amounts to very nearly one billion dollars, as compared with a total of \$804,000,000 for the year ending 31st October, 1911.

These figures relate only to foreign trade, but there has been as great an increase in the domestic trade.

In manufactures the capital invested increased from \$446,goo,ooo in 1900, to $\$_{1,247,583,000}$ in 1910, and the products of these factories increased from $\$_{481,00,000}$ to $\$_{1,165,975,000}$. The increase for the years 1911 and 1912 has been at even a higher ratio. Expansion of industrial enterprises has been everywhere manifest, and the addition to their capitalization has been large.

The Immigration Department estimates that the country has received this year an addition of 394,984 persons. These add to the prosperity of the community, in that they become producers as farmers and artisans, and in turn become cus-tomers of our merchants and manufacturers. They in many cases brought with them considerable sums of money and per-sonal effects. The Department has assumed that for the year 1911-1912 the approximate value of cash and effects brought in by the 133,710 settlers from the United States amounted to over \$201,012,000.

We know what the large addition to its population has done for the city of Toronto. To provide homes for the new-comers, schools, sidewalks, sewers, lighting, water, and street railway facilities, large sums of money have been ex-pended, and the benefits accruing from the increase in num-hars have extended in every direction bers have extended in every direction.

When it is considered that what has taken place in Torwhen it is considered that what has taken place in 107-onto is going on throughout the whole Dominion, and especi-ally in the Western part of it, it is not to be wondered at that there has been rapid growth, increased expenditure on the part of Municipalities, and the need of large sums of money to provide for what is absolutely necessary.

Borrowings abroad have again been heavy, being estimat-ed at over \$180,000,000. This money has been obtained by our governments, municipalities, railroads, industrial establishments, land, and public utilities companies. Prosperity caused by the expenditure of money thus obtained is not always on a sound basis, and it is only to the extent that this money is being expended in enterprises that are stable and profitable that the country can hope to bear the heavy interest charge that is being laid upon it.

In consequence of the unsettled condition of affairs in Europe and the demands made upon loanable capital from every source, there is manifested an unwillingness and an inability to make loans at present. It is necessary that this situation should be carefully considered, and that prospective borrowers should proceed cautiously. Enterprises in this borrowers should proceed cautiously. Enterprises in this country are so large and development so rapid that there is not sufficient money in the country to continue to expand as it has been doing. We are, therefore, dependent on outside financial assistance, and if this is to be withheld for a time we must adapt ourselves to the changed conditions. The country has, however, been favored with good crops, we have a rapidly growing producing territory, our mines are yielding more largely than ever, our manufacturers are intelligent and quick to anticipate conditions, and we must, therefore, regard fundamental conditions as satisfactory, but the necessity for caution is imperative.

Loans.-While large sums of money have been obtained abroad by our railroad companies, municipalities, and large industrial corporations, and have been used by them in fur-thering their daudors. thering their development, yet the Banks have been called upon to an unusual extent, and their loans to the public in Canada show an increase. Canada show an increase on the 30th November, 1912, more than \$100,000,000 over the corresponding period of last year. year.

The advances and bills discounted of this Bank show a increase for the year of over \$4,700,000. These are all made in Canada, and the large increase shows that we have tried to meet the requirements of the shows that we have tried to meet the requirements of customers with their expanding trade. I may say that this I trade. I may say that this has been specially true so far as the Western Provinces are concerned. Complaints are fre-quently made by those professing to represent the West that the Banks are not doing full institution. quently made by those professing to represent the West use the Banks are not doing full justice in extending loans to that part of the country. It has been stated that deposits of the West have been used for the promotion of enterprises the East. The reverse, we believe, is the case. It is certainly true of this Bank that the amount loaned west of Lake Su-perior is more than double the amount means that by that part perior is more than double the amount loaned west of Lake of the country, and we believe it will be found to be true of the Banks generally that they have used their Eastern re-sources very freely in adding in the loaned to be newer sources very freely in aiding in the development of the newer Provinces. Provinces.

Deposits.—I should, perhaps, comment on the fact that the total deposits appearing in the statement show but a moderate increase over last ways to be out last moderate increase over last year. At the time of our last Annual Report we had several large deposits of a special character. These amounts have have deposits of a special These amounts have been withdrawn as expendi-these with the up less have been withdrawn as expendence of the section with the up less have been with the probability of the section with the probability of the section with the probability of the section of the s These temporary deposits represent a large sum. Their place has, however, been taken by a steady and general increase in deposits at all of the branches of the Bank, especially those that are designated as Saving's deposits, which show a very satisfactory growth. ture in connection with the undertakings was incurred. satisfactory growth.

Profits.—Owing to our resources having been steadily loaned throughout the year, profits show an increase, and your Directors decided to pay a bonus of one per cent. to the share holders, in addition to the recular of the recular of the share holders, in addition to the regular eleven per cent. to the shard for the year. for the year.

Bad and Doubtful Debts.—The usual careful examination of all loans and investments has been made, and full provi-sion has been made for events sion has been made for everything regarded as doubtful, the times like the present, when there is great prosperity, of losses are usually much below the average, but for a term years there is an average area to be average and the second years there is an average amount required to provide for a term tingencies. We have, however, as in former years, not only set aside sufficient to provide for what we at present regard as doubtful, but have also provided an amount equivalent to a reasonable average.

Branch Banks.—The number of our branches has been increased by 16, largely in the Western Provinces. We have now in all 116 branches. These new branches are not in all cases immediately profitable but in a character they become now in all 116 branches. These new branches are not in an cases immediately profitable, but in a short time they become so, and they add to the Bank's ability to serve the public. There has been an increase in the number of branches of Banks in Canada during the year ending 30th November 230, the total number of banking offices in Canada now being 2,790.

I believe it is quite safe to assert that no country so well served by its banking system as Canada. There do not a place of importance that is not, as a rule, overbanked them to an Even the smaller places have facilities furnished them to the unusual extent conditions of the state of the st unusual extent, and it must be taken as an evidence of the desire of the Banks to afford to the desire of the Banks to afford to the people of Canada facilities at their discussion facilities at their disposal, and, in this way, further the interests of the country

Bank Premises.—This account has increased during the year \$705,689.96. This amount, however, has been expendition connection with 32 buildings. In each case the expenditure has been necessary and will prove profitable to the Bank. The new Head Office building is approachimately explained by the second secon The new Head Office building is approaching completion, we hope to occupy it within a short time. The expenditure sidering that is necessarily been large but the expenditor we hope to occupy it within a short time. The expenditu-upon it has necessarily been large, but not too great of sidering that it is to be the Head Office and the position was Bank occupies in the community. The present building finest erected over fifty years ago, and was in those days the first banking office in the city. Circumstances and the growth of banking office in the city. Circumstances and the growth of building is generally regarded as a dignified one, and we building is generally regarded as a dignified one, and we an ornament to the city whose name the Bank bears. believe that it will be the means of adding largely to the busin ness and earning power of the institution ness and earning power of the institution.

Audit.—In the Bank Act submitted to Parliament it provided that the Stockholders of a Bank at its Annual Meet-ing must elect an Auditor or Auditors to verify the figures presented to the Stockholders in the Annual Statement. With proposal made by the Minister of Finance is in accord with the practice in Great Britain, and has been found to be satis-factory there. factory there.

Farmers' Loans.—Another feature in the proposed Bank Act relates to loans to farmers, and a clause has been added to the Act permitting Banks to make advances to them on the security of security of grain and cattle in their own possession, enabling a pledge or an assignment to be taken as security.

It is but right that farmers should have privileges en-Joyed by others, but too much importance should not be at-tached to the benefits this clause of the Act may afford. Such advances advances, even though accompanied by security under the Act, must rest the individual bormust rest largely upon the responsibility of the individual borrower. The grain given as security remains in his custody, and therefore the security remains in his custody. and therefore the personal element must be largely considered A_{+} ed. At present advances are made to farmers without this security, and as freely as they will probably be made with it, west, and the compaction that exists between Banks, the West, and the competition that exists between Banks, the cases should be few in which responsible farmers do not receive the accommodation to which they are entitled.

I have only to refer to the loss the Bank has sustained through the death of Mr. Beatty. For the past two years he had not been able, on account of ill health, to be much Board the Bank has never had a more loyal friend and ad-of his office, and as you are all aware, he had marked ability of his office, and, as you are all aware, he had marked ability and a wide knowledge of business.

PRINCE EDWARD ISLAND

The Smallest Canadian Province is Progressive and Shares the General Prosperity of the Dominion

Prince Edward Island was taken into the Confederation

Prince Edward Island was taken into the Confederation on July 1st, 1873, and is the smallest province of the Do-minion. Its area is 1,397,991 acres or 2,184.36 square miles. From 1534 to 1798 it was known as Isle St. Jean, when Duke of Kent. The population was then 9,676 and in 1822 it Duke of Kent. The population was then 9,676 and in 1822 it $w_{\text{Was }24,600}$. It grew to 62,678 in 1848, to 80,857 in 1861 and to 94,021 in 1871.

to 94,000. It grew to 62,678 in 1848, to 80,657 in 1848. The Dominant Provincial enumerations. The Dominion census gave it a population of 108,891 in 1881, of 109,078 in 1891, of 103,259 in 1901, and of 93,728 in

With a population of 9,531 less than in 1901 it has 14,369 farms, being an increase in the ten years of 355. The farm land occupied is 1,202,347 acres, of which there is owned 1,160,168 acres and leased or rented 42,179 acres. in c¹he land in natural forest has an area of 316,409 acres,

the land in natural forest has an area of 316,409 acres, eld crope in forest has an area of 316,409 acres. in field crops 477,698 acres, and in pasture 284,923 acres. Orchard and Nursery Products.

Small fruits have an area of 114 acres, vegetables of 1,171 acres, and orchards and nurseries of 4,350 acres. The occupiers of farm holdings ten acres and under num-ber 1,284, of 11 to 50 acres 2,840 of 51 to 100 acres 5,495, of The occupiers of farm holdings ten acres and under num-ber 1,284, of 11 to 50 acres 3,849, of 51 to 100 acres 5,495, of biers of less than one acre are 10 less than in 1901, but all occupiers increased during the ten years from 14,014 to 14,369.

Occupiers increased during the ten years from 14,014 to 14,369. There were strong to trees bearing and 58,342 non-There were 147,637 apple trees bearing and 58,342 non-and 160,124 bushels of further with 115,091 and 82,000 in 1900, in the former and 159,421 bushels

and 160,124 bushels of fruit in the former and 159,421 bushels

Peach and pear trees bearing were 1,620 in 1910, and Non-bearing in 1900. The yield in 1900 was 324 bushels and Plum and cherry trees peach 61.018 bearing and 35,-

Plum and cherry trees numbered 61,918 bearing and 35,-93 non-bearing in 1900, with a yield of 22,103 bushels, and 19,109 bearing and at the parting in 1910, with a yield of ^{49,199} bearing in 1900, with a yield of 22,103 busilets, ^{12,807} bushels

Dairying and Agriculture.

^{factories} in 1910 was \$561,756, against \$567,802 in 1900. The value of butter, cheese and condensed milk made at value of the products of all factories in 1910 was 3,136,470, ^{against} \$2,326,708 in 1900, being an increase of 34.80 per cent. The values of longer conducts and of buildings, rents and The values of lands owned and of buildings, rents and lements give of lands owned and of buildings, rents and The values of lands owned and of buildings, rents and implements given in table viii. had in 1911 a total of \$34,369,-of live stock were \$7,489,754, an increase of \$8,589,333; the values the values of field crops, vegetables and fruits \$6,833,597, an TL of \$2,052,646.

The values of \$2,052,646. being an increase of \$836.390; and of dairy products sold \$2,-the farm in increase of \$1,054,648. Animals slaughtered on 934 the farm in 1911 had a value of \$859,625, an increase of \$296,-

It has been a source of great satisfaction to the Board that we had amongst our Stockholders, in the person of Mr. Englehart, one who will worthily fill the vacancy caused by Mr. Beatty's death.

I have now to say, gentlemen, that I will be very glad to answer any questions relating to the Report, and beg to move, seconded by the Vice-President, that it be received and adopted.

This motion was carried, and also a resolution expressing the hearty thanks of the Stockholders of the Bank to the Presi-dent, Vice-Presidents, and Directors for their management of its affairs during the past year.

A motion was also passed appointing Mr. Geoffrey T. Clarkson as Auditor to represent the Stockholders of the Bank of Toronto, and to report to them (in accordance with such requirements as may be imposed upon Auditors by the Bank Act), upon the Statement to be presented by the Directors of the Bank at the next Annual General Meeting.

The following Directors were elected for the ensuing year:-William George Gooderham, Robert Reford, Charles Smith Hyman, William Stone, John Macdonald, Albert Edward Gooderham, Nicholas Bawlf, Duncan Coulson, Joseph Hender-son, Frank Stephen Meighen, Jacob Lewis Englehart.

At a subsequent meeting of the new Board, Mr. Duncan Coulson was unanimously re-elected President; Mr. W. G. Gooderham, Vice-President, and Mr. Joseph Henderson, Second Vice-President.

Wool, eggs, honey and wax and maple sugar produced in the census year had a value of \$593,334, being an increase in ten years of \$260,116.

The number of weeks of hired labor on farms was 42,-668 in 1910, with a value of \$256,115, as compared with 93,795 weeks in 1900 with a value of \$346,241.

The total areas of field crops in the Island was 478,366 acres in 1911 as compared with 477,698 acres in 1910 and 447,737 acres in 1900.

The highest average value per acre for grain crops is the highest values of crops of all kinds are credited to hay and clover, oats and potatoes, being \$5,399,215 from 427,326 acres for those three crops in a total of \$7,044,827 from

506,432 acres for all crops. This is \$12.63 per acre for hay and clover, oats and potatoes, as compared with \$20.80 per acre for all other crops.

The increase in values of lands, crops and farm imple-ments in the province is evidence of improved methods of farming.

Fox Ranching Grows.

A comparatively new industry has recently been developed on the island for which the climate proves to be well adapted, namely, the founding of ranches for propagating the black fox, an animal famous for the fine quality of its fur. The census has not yet taken account of this industry, but the men who have taken hold of it and the capital that has been invested in it will not allow it to be ignored. A sale of one ranch has recently been made for \$600,000. The ranches are scattered all over the province and extend in area from a quarter of an acre to five acres.

PROCRESS WITHOUT BONUSING

Hon. Charles Stewart, minister of municipal affairs for Alberta, stated in a recent interview that he was of the opinion that it would be in the interests of the cities of the West if they could come to a mutual understanding on the ques-tion of bonusing new industries. "The spirit of the West," he said, "is one of progress; and it is a very fine spirit, but there is just danger that in order to secure advantages at the present day we may place too big a mortgage on our future.

The principle of prohibiting towns and rural municipal-ities from giving bonuses to industries has been embodied in the towns' act and the rural municipalities' act of Alberta. Hon. Mr. Stewart stated in the course of an interview that the bonus clause in both acts in Alberta had been received with a great deal of satisfaction. Indeed it seemed to be one of the most popular parts of the act. The act prohibits bon-uses of money, free light or power and exemption from taxation

Medicine Hat is the only city in Alberta offering a bonto new industries, the town giving free natural gas. Possibly Medicine Hat would object to a no-bonus agreement among the various cities, but Mr. Stewart points out that a nominal charge for a natural utility which can be produced very cheaply would meet the requirements of the case.

ANNUAL GENERAL MEETING

The Forty-Fourth Annual General Meeting of the Share-holders of the Royal Bank of Canada was held January 9th, in the Board Room at the Head Office of the Bank, 147 St. James Street, Montreal.

Among those present were :-

· · · · · · · · · · · · · · · · · · ·	
C. R. Hosmer,	Fayette Brown,
E. F. B. Johnston,	A. Haig Sims,
N. B. Smith,	E. L. Pease,
T. J. S. Skinner,	Dr. Alfred McDiarmid,
H. S. Holt,	Hugh Paton,
C. S. Wilcox,	F. J. Sherman,
Stuart Strathy,	G. F. Greenwood,
T. J. Drummond,	J. McK. Rea,
A. J. Brown,	John Wood,
W. J. Sheppard,	Wm. C. Ball,
W. H. Thorne,	C. E. Neill.

On motion of Mr. A. J. Brown, seconded by Mr. T. J. Drummond, the President, Mr. H. S. Holt, was requested to take the Chair.

Mr. C. E. Neill acted as Secretary of the meeting and Messrs. C. R. Hosmer and A. Haig Sims were appointed scrutineers.

The minutes of the last Annual General Meeting and Special General Meeting of July 3rd were taken as read and were confirmed. The Secretary was then called upon to read the annual report of the Directors, as follows :-

DIRECTORS' REPORT.

The Directors have pleasure in submitting to the shareholders the Forty-Third Annual Report covering a period of eleven months ending November 30, 1912, accompanied by the Statement of Assets and Liabilities.

The assets of the bank have recently been subjected to the usual careful re-valuation.

Your Directors have to record with deep regret the death of their late colleague, Mr. F. W. Thompson, who joined the Board on February 14th, 1906. Mr. Albert J. Brown, K.C., was elected to fill the vacancy on the Board.

In accordance with the authority granted by the Share-holders at the Special General Meeting held July 3rd, 1912, the authorized Capital Stock of the Bank has been increased,

with the approval of the Treasury Board, from \$10,000,000 to

The Agreement to purchase the Assets of the Traders Bank of Canada, approved by the Shareholders on July 3rd last, was sanctioned by the Treasury Board in due course. After a thorough investigation the business of the Bank was After a thorough investigation, the business of the Bank w taken over on September 3rd, and your Directors are pleased

to report that it has since proved entirely satisfactory. In accordance with the By-Law enacted at the Meeting of the Shareholders held July 3rd, 1912, increasing the number of Directors to sixteen, the following were added to the Board :--Board :-

Mr. C. S. Wilcox, Mr. A. E. Dyment. Mr. E. F. B. Johnston, K.C., Mr. W. J. Sheppard,

The Board has also to report the purchase of the business of the Bank of British Honduras, Belize, B.H., on advantage ous terms. This Bank had a capital of \$100,000, surplus of \$80,000 and deposits of approximately \$400,000. In addition to the one hundred to

PRESIDENT'S ADDRESS.

The adoption of the report was moved by the President. Mr. H. S. Holt, who spoke as follows:— I beg to move the spoke as follows:—

1 beg to move the adoption of the report. The statement presented to you to-day includes the assets of the Traders Bank of Canada, purchased in September last. Eliminating the figures of that bank, our deposits in creased \$10,145,093 during the 11 months, and commercial loans \$6,467,285. Twenty-eight new branches were opened. The new issue of capital stock of the theory is the thereholder

The new issue of capital stock offered to the shareholders in December, 1911, viz., \$2,000,000, and the issue the \$3,360,000 in September last to the shareholders of Traders Bank of Canada as the purchase price of the assets of that bank, were both fully absorbed. The unallotted fractional shares were advertised for sale and disposed of in there is no float. due course. At the present time, so far as we are aware, there is no floating supply of Royal Bank shares. To effect the purchase of the Texture that the formation

months, especially in view of the heavy incidental expenditure for new stationery, new bank notes, etc. the large influx of new capital during the year, we are grati-Considering fed that we have been able to maintain our percentage of earnings. The increase in combined capital and reserve in the past twelve months amounted to \$10,920,000, which should show good results in the coming year.

I am pleased to say that the business of the Traders Bank has proved to be of superior quality. The potential value of the increased facilities of a hundred branches, mostly in the prosperous Province of Ontario, and the addi-tion of 1.800 new shareholders, cannot be over-estimated. The subsequences inspection of the business imposed no light the subsequent assimilation of the business imposed no light task upon the executive of this bank. The whole machinery is now running smoothly and efficiently, which is abundant

proof of a good organization. The bill to revise the Bank Act and extend the charters of the ball to revise the Bank Act and extend the House by of the banks, which was recently introduced in the House by The banks, which was recently introduced in the flourse of These are in the interests of both the general public and of the banks, and will be the our hearty acceptance. The present outlook could hardly be better. At the same time in our optimism. It the same time, we should be cautious in our optimism. must not be forgotten that the most influential factor in our progress is the forgotten that the most influential, and that the progress is the investment of foreign capital, and that the interruption of this flow would have adverse results, especi-ferings of securities have here unfavorable for some months ferings of securities has been unfavorable for some months past, which is no doubt primarily due to the Balkan War, which has shaken confidence throughout Europe, and secondly to the large borrowings of our municipalities. The financial to the large borrowings of our municipalities. to the large borrowings of our municipalities. The mancial conditions abroad are reflected here in the present money stringency. With peace concluded, the demand for new capital to repair the waste will be very great,—consequently the expectation is for firm rates for money for some time to come.

GENERAL MANAGER'S REPORT.

In seconding the adoption of the report, the General Manager, Mr. Pease, said :--result of our operation of our provide the months past may be briefly

result of our operations for eleven months past may be briefly summarized as follows :-

We paid the usual dividend of 12 per cent.; transferred \$75,000 to Officers' Pension Fund; reduced Bank Premises being the premium received on new capital stock issued, and forward to the pert year's account \$610,219,—or Carried forward to the next year's account \$610,219,—or \$209,000 more than we brought forward in December last. We have in addition we brought \$200,000 for rebate of interest ^{\$209,000} more than we brought forward in December last. We have in addition set aside \$200,000 for rebate of interest on unmatured bills, which was necessitated by the fact that Canada. Of course this fund remains an asset of the bank. 8. Bank Premises after writing off \$300,000, are valued at

Bank Premises, after writing off \$300,000, are valued at Bank Premises, after writing on 2500, \$5,520,000. This amount includes the premises taken over from The Traders Bank of Canada at the very conservative valuation of \$2,356,000. Negotiations to sell several of their buildings are now under way, which, when accomplished, buildings are now under way, which, when accomplished, will effect a very large reduction in the account.

Through the addition of 725 Traders Bank employees to staff, large addition of 725 the Pension Fund by the

the staff, large contributions to the Pension Fund by the shareholder. shareholders are rendered indispensable for some time to come, in order to me rendered indispensable for some time to come, in order to maintain it on a proper basis. You will therefore be asked to maintain it on a proper basis. be asked to pass a resolution authorizing an annual contribu-tion of \$100,000 to the present fund out of profits for five years. With these contribution authorizing by the present assess-With these contributions, supplemented by the present assessment of ment of 3 per cent. on salaries, we hope to build up in five years a fund that. I am years a fund that will meet actuarial requirements. sure you will appreciate the great importance of treating the staff with liberality, and adequately rewarding them for the the success of the bank depends upon the loyalty and con-cont of the staff which now numbers 2,617.

tentment of the bank depends upon the loyany tentment of the staff, which now numbers 2,617. Our liquid assets amount to \$73,428,782, being 47.64 per essets, of our total liabilities to the public, and our total trade total liabilities to the public, and our total trade total liabilities to the public by the sum of \$19,552,249.

According to the latest returns, the total field crops of ada last you the latest returns, the total field crops of being According to the latest returns, the total field crops of an increase of \$45,000,000 over 1911. Gross railroad earnings increase of \$45,000,000 over 1911. Gross railroad earnings increase of \$45,000,000 over 1911. Gross railroad earnings increased over \$26,000,000; bank clearings \$1,752,000.-bank over \$26,000,000; bank clearings \$1,752,000.-bank over \$26,000,000; bank clearings \$1,752,000.-¹¹gs increased over \$25,000,000 over 1911. ⁰⁰⁰; bank note circulation \$13,435,000; public deposits in bank and other savings bank deposits \$2,417,000; commercial ^{10ans} \$102,767,000. Exports increased \$18,121,000; imports \$86,973,000; customs receipts \$33,500,000. Immigration reached 354,237, an increase of 21,000—immigrants from Great Britain numbering 138,121, and from the United States

133,712. In Mr. E. R. Wood's review of the Bond Market in Canada in 1912, the total Canadian bond issues are placed at S261,917,000, compared with \$269,312,000 in 1911, of which Government issues represented \$35,639,000; municipal \$45,-792,000, railway \$69,639,000 and miscellaneous \$110,846,000. Great Britain absorbed 77.53 per cent. of these issues, Can-ada 13.84 per cent. and United States 8.63 per cent.

In considering the amount of foreign capital invested in the country, we should include investments in mortgage Records are not yet available for the past year, loans. but at the close of the fiscal year 1911 there were over eighty registered companies doing a strictly mortgage loan business with aggregate loans of \$248,164,260, being an increase of \$16,018,690 over 1910. Besides these, numerous English and American insurance companies lend largely in Canada on mortgage.

The above figures denote splendid progress during the year. There is only one fundamental defect in the trade of the country, viz., the adverse balance of trade. I do not think we attach sufficient significance to this adverse balance, I do not which has been growing steadily in the past five years. excess of imports for the fiscal year ending March 31st, 1908, was \$90,000,000; 1909, \$48,000,000; 1910, \$90,000,000; 1911, \$175,000,000; and 1912 \$243,000,000, the excess for the eight months ending November 30, 1912, being \$200,000,000. Our exports to the United Kingdom have continuously exceeded our imports during the last ten years, the maximum being 72 millions and the minimum 27 millions but the exceeded of the ending the second seco our imports during the last ten years, the maximum song millions and the minimum 27 millions, but the excess of imports from the United States has steadily increased from \$40,000,000 in 1002 to \$235,000,000 in 1911-12. The inward \$49,000,000 in 1902 to \$235,000,000 in 1911-12. The inward balance has grown in spite of the increase of \$105,000,000 in our agricultural and other exports in that period.

It is remarkable that the value of the annual production of our factories is estimated to have increased from \$480,ooo,ooo in 1900 to approximately \$1,462,000,000 in 1912. Practically all of this is marketed in Canada, and yet is short of the home demand, which explains the excess of im-ports. It is to be hoped that the shortage will be overtaken in the near future and that our manufacturers will have a surplus for export. Meanwhile the adverse balance is more than offset by the great wealth brought in by immigrants, estimated last year at \$160,000,000 in cash and in kind—and by the large amount of foreign capital annually coming into the country.

While the outlook in Canada is exceedingly bright, there are evidences on many sides that we are straining our pros-perity. There is too much inflation. It would be the part of prudence to retrench in our expenditure until we have harvested another crop.

WEST INDIES.

Turning to our interests in the West Indies: CUBA.

Cuba's imports for the fiscal year 1911-12 were \$119,-000,000 and exports \$146,000,000. The sugar crop of 1911-12 amounted to 1,895,000 tons, the largest in the his-tory of the island. One hundred and twenty million dollars may be considered a reasonable estimate of the value of this rop, and on this basis an increase of \$43,000,000 is shown over the previous year, 1910-11. The crop just beginning will be a record one, with reasonably good weather. Esti-mates reach as high as 2,350,000 tons, or about 400,000 tons more than last year. Prices are now lower than in 1911-12, but this unforce that facture may be partially offset by the more than last year. Prices are now lower than in 1911-12, but this unfavorable feature may be partially offset by the expected greater extraction of sugar from the cane. Many mills have been enlarged and provided with technical improvements, and the cane area is being largely extended. is interesting to note that the production of sugar in 1899, when we established our first branch in Cuba, was about

300,000 tons, against 1,900,000 tons last year. The tobacco crop of 1911-12 is of average size, but the best in several years as regards quality. Its value is placed at \$34,000,000. The new crop gives promise of being the largest in many years, and the condition of the industry was never so satisfactory as at present.

Satisfactory conditions prevail in the cattle business. Owing to a high protective tariff there have been no import-ations during the year. The natural increase is enough to provide for the local consumption, and satisfactory prices are being obtained.

The railway companies show substantial increases in earnings over the past year, and many securities listed on the stock exchange are twenty to thirty points higher than they were last year.

Business conditions generally are sound and the outlook is very hopeful. General Menocal's election to the presi-dency last fall ensures an honest and economical administra-

THE ROYAL BANK OF CANADA

Annual General Meeting

(Continued from Page 165.)

tion. He is an experienced business man of high character and enjoys great popularity.

PORTO RICO.

Porto Rico produced a crop of 371,000 tons of sugar last year, about 21,000 tons more than the previous year. The prosperity of this island, which had been continuous since the American occupation, suffered a reaction during the past twelve months, caused by the lower sugar tariff agitation in the United States, and land values, which had reached excessive figures, as we mentioned last year, have severely declined. Pending definite action by Congress regarding the tariff, the sugar industry in the island will probably remain in a depressed condition. A moderate reduction would not seriously affect the industry. It would diminish profits, but these have been excessive under the present free tariff which was the cause of the inflation of land values. It is inconceivable that the United States, with a consumption of sugar last year of \$400,000,000, would do anything to imperil the industry in Porto Rico, her own colony.

A contributory cause to the present setback was the outbreak of the bubonic plague, which, however, has been controlled. Fortunately the coffee and fruit crops last year were unusually large, with good prices, and this has helped out the situation. Our business in the island, I am pleased to say, is on a sound basis. No losses have been made and none are anticipated.

BANK OF BRITISH HONDURAS.

As mentioned in the Directors' report, we have purchased the assets of the Bank of British Honduras, Belize. This Bank was established in 1902. While a small institution, it was very successful, dividends latterly having been paid at the rate of 20% per annum on its capital of \$100,000. There is no other bank in the colony.

BRITISH WEST INDIES.

The business of our branches in the British West Indies where we are represented—Jamaica, Bahamas, Barbados and Trinidad—continues to be quite satisfactory. The crops in these islands suffered more or less last year from drought. Otherwise general conditions are not much changed. The oil industry in Trinidad is developing slowly but satisfactorily. The reported damage in Jamaica from the hurricanes in November last was greatly exaggerated. The trade of this island is steadily increasing, as indicated by the growth of over $\pounds_{1,000,000}$ in exports in ten years, and $\pounds_{1,143,000}$ in imports.

MR. E. F. B. JOHNSTON.

Mr. E. F. B. Johnston, K.C., made the following remarks :---

Mr. President: It is with feelings of great satisfaction that the Ontario members of your Board have listened to the remarks of yourself and Mr. Pease, Vice-President and General Manager. As one of the Ontario members I desire on my own behalf, as well as on behalf of my co-directors, to say to you that the result of six months careful study of the affairs of the Royal Bank and its management have impressed us with confidence in its progressive and conservative management. Our connection with the Traders Bank, of which, as you are aware, we were three of the Directors, afforded us a fairly correct estimate of the practical requirements of a bank, as well as giving us some knowledge of the wants of the public. We kept before us the fact that we were the trusted agents of our fellow-shareholders. To the great body of depositors who entrusted their funds to those in control of the bank's affairs, we felt a still graver obligation For them, especially we were trustees, and we were fully aware that by both shareholders and depositors a very great confidence was reposed in us. We proceeded cautiously. The result was a unanimous approval of our negotiations and final arrangement with the Royal Bank. Our people had They had the before them the full details of the proposition. unqualified recommendation by us, as their directors, that the union would inure to the benefit of both banks, and to-day, as a result, I believe we have one of the strongest and most progressive banks in this country.

I mention these preliminary matters because it is well to understand the fundamental principles which govern the situation as regards the bank and the public, and to consider the moving causes which led up to the amalgamation.

And let me point out that what I have to say to you is not based on the technical or professional knowledge or theories of a banker. As those who watch the game often see and hear more than the players do, so it may be that an outsider and a layman may be able to put things after his own fashion and thereby give to you and the public some ideas which may be useful and more or less instructive. I want to put on record some reasons why we approved of the amalgamation, and why I think it is a matter of great advantage to the community, as well as to the banks immediately concerned.

First.-It is fundamental that the continuous control of money is the greatest necessity in banking business. If bank is able to meet all the reasonable requirements of the public who deal with it, it is serving one of the great objects of the banking system. It can only do so by being ready at all times to more than the serving of the service of the servic all times to meet the proper demands made on its resources. Whether it be the borrowing customers or the depositors, their wants must be attended to. Failure in either case means loss of business on the one hand, or want of con-fidence and perhaps disaster on the other. The withdrawal of deposits means consistence for the other. fidence and perhaps disaster on the other. The withdraw of deposits means scarcity of funds for legitimate borrowers, and therefore, both progress and stability are endangered. Strength and solidity in a bank increase the supply of money, and the public are in concentration of the this and the public are in consequence better served. That this has been the case, in the has been the case in the present instance is underiable. Our deposits have increased, and the united bank is every day growing in strength and usefulness. The old Traders Bank depositors have continued and is. Bank depositors have continued and increased. There has not been a withdrawal, except in one or two cases, where the ordinary current of husing and increases, where the ordinary current of business would have shown the same re-sult if the union had not taken place. This shows that this source of supply was not affected, except for the better. shows also that our depositors, as well as our shareholders, approved of and conference of the set approved of and confirmed the act of amalgamation, and enabled us to continue and increase our usefulness as a public financial institution financial institution.

Another feature we looked for was economy in manas ment. The present relative cost is and will continue to be maintaining two separate less than the aggregate cost of maintaining two separations corporations. We have even at this early day realized on properties rendered unnecessary by reason of the change, and which has resulted in handsome profits, and in the near future, a still greater saving will be effected in this direction. In course of time, a saving in the meltinitie of the fields can In course of time, a saving in the multiplicity of officials can be accomplished, or the work over he ultiplicity of officials be accomplished, or the work can be eventually done for less money as the older and birth money as the older and higher paid members of the executive staff retire on allowers are money as the older and higher paid members of the execu-tive staff retire on allowance, and other arrangements are made for the performance of the duties. Cost of advertis-ing, always a very serious item, will be substantially lesd of ed by reason of there being one bank advertising instead of two, and other elements of expense can be moderated with-out any disadvantage or loss. The opening of new branches, where one will serve all the purposes of two, means a great saving, as all new branches must necessarily involve and saving, as all new branches must necessarily involve sum siderable loss for a few years. This means a very large is in the case of an expanding and process are very large is in the case of an expanding and progressive bank, and much more than much more than most people imagine. A bank cannot stand still. The moment it does in a group of the can The moment it does in a growing country like Can ada where new demands for money are being daily created, it begins to lose its footbold and other for the stitutions it begins to lose its foothold and other financial institutions forge ahead and capture the head other financial institutions. forge ahead and capture the business and its connections. It is, therefore, necessary to business and its connections It is, therefore, necessary to keep advancing, even if the out lay is great. We have only to look at our great West, to say nothing of the progress being made in the provinces, nothing of the progress being made in the older Provinces, to feel that hundreds of thousands of dall to feel that hundreds of thousands of dollars must be spent in opening new branches before much much must be had, in in opening new branches before much return can be had, order that a bank may be able to bell order that a bank may be able to hold its own and increase its business so as to keep step with the its business so as to keep step with the onward march of com-mercial and industrial development.

Stability is another feature of the gravest importance, and this we considered very material in our negotiations. As an outsider this element appealed to my mind with convincing force. A large institution, well managed, control ling great resources, having the confidence of the public, so of able to meet all the demands made on it for the purpose its customers, must be stronger and better able to weit a commercial storm than an institution not so favorably sita to meet all the demands made on it for the purpose watch. The barometer of a bank is a peculiarly sensitive atticle. There is sometimes difficulty in accounting for the adden rise and fall of the financial mercury. Difficult side against by cash reserves, liquid assets, or other available against by cash reserves, liquid assets, or other available to fengland" is a common comparison, and it shows the atof England" is a common comparison, and it shows the and fortunately our Canadian banks generally are in a posand fortunately our Canadian banks generally are in a selves. With large resources and assets available at a moment's no-With large resources and assets available at a moment's no-With large resources and assets available at a moment's no-With large resources and assets available at a moment's no-With large resources and assets available at a moment's no-With large resources and assets available at a moment's no-With large resources and assets available at a moment's no-With large resources and assets available at a moment's no-With large resources and assets available at a moment's no-With large resources and assets available at a moment's no-With large resources and assets available at a moment's no-With large resources and assets available at a moment's no-With large resources and assets available at a moment's no-With large resources and assets available at a moment's no-With large resources and assets available at a moment's noword the public so the public so the public shareholders of the Traders Bank as well as to the his

sourceful bank, could not be expected to exist to the same extent. Personally, I look upon public confidence founded on the stability of any institution as the greatest feature in the mind of the same in the local terms that when they the mind of the people who desire to know that when they leave their money in the Savings Bank over night, they are sure to find in the savings bank over night, they are sure to find it safe and certain in the morning. And what-ever on good grounds increases this feeling of security is in the interact of the interest of general public credit, as well as for the benefit of the individual interested.

The interest of the shareholder is another matter we had to consider. He invests his money in bank stock, and had to consider. He invests his money in bank stock, and ought to have a reasonable prospect that his shares are of continuing value, and will bring him fair dividends. This condition cannot safely be created, except by means of a strong financial body with plenty of readily available assets, a proper earning power, and a large surplus fund to meet any possible contingency. The forcing of a few hundred shares of any ordinary banking or other institution on the market may materially decrease values and cause complica-tions. It is only when a corporation is fortified by ready tions. It is only when a corporation is fortified by ready resources and backed by public confidence that such sudden movements are not dangerous. It would be idle to argue that under former conditions the market value of Traders Bank shares could be maintained against adverse circum-stances in the same way as the shares in the present amal-Bank shares could be maintained against adverse circum-stances in the same way as the shares in the present amal-gamation. Bank stocks have, like all others, their rise and fall, but the fall, even when it reaches its limit by force ot general financial conditions, does not carry with it per-manent or critical results. if the Bank's foundation is solid. We feel that, notwithstanding all our faith and pride in the commercial crisis than we would have been in the smaller institution. The shareholders' interest is one of great im-portance, and as his means are practically the foundation his interest should be entitled to weight, more, at any rate, of refusal by a bank to discount an uncertain security. of refusal by a bank to discount an uncertain security.

Having made these few observations from an outside point of view, and having indicated briefly some of the rea-sons why we and having the Powel Bank I shall trouble Sons why we came over to the Royal Bank, I shall trouble you with a came over to the that in the practical result of you with a few facts showing that in the practical result of the union of the two banks, the statements I have made are verified, and the general conditions underlying safe and successful banking have been accontuated. successful banking have been accentuated.

Let us see how the public are affected by the union. The Traders Bank had one of the best connections in the Province of Ontario, but had no agency east of Montreal. as far as Vancouver. The Royal Bank had extensive facili-lateness in that part of Canada east of Montreal, but owing to province in entering the field was not strong in Ontario ties in that part of Canada east of Montreal, but owing to lateness in entering the field was not strong in Ontario branches. The time for union was, therefore, opportune. We gave you Ontario, with all its resources—manufacturing. Quebec, New Brunswick, Nova Scotia and the seaboard, umbia connection was of great value. You also gave us the Vest India business, and well-established offices in New by the resources of the other. There was practically no to meet the demands of the public on your Bank would have cost you. auplication. To have opened sufficient agencies in Ontario to meet the demands of the public on your Bank would have our business eastward and opened offices in London and on us, we would have been compelled to spend hundreds cf under the dollars. I say "exigencies." because we had was not a case of resting on our oars. We had reached that sary to in order to keep our business, it because neceswas not a case of resting conditions to be had reached that point when in order to keep our business, it became neces-brofits would have been absorbed for some years in endea-dividend rate could not have been increased for some years, our shareholders were fairly entitled to in order that they stock be benefited by the consequent increased value of their might be benefited by the consequent increased value of their stock. We ware also have a stock we ware also have a stock as the stock we ware also have a stock as the stock of the stock as the stock of the stock as the stock of the stock o might be benefited by the consequent increased value of their stock. We were already a strong, active, healthy bank, but fields new to us in order to increase our existing business senting the cost would necessarily have to be withdrawn from four yeas. The expense of running the offices for three or otherwise have gone in the way of loans to customers, and stage of that banking and preat expenditure to reach the you in Ontario and parts of the West by a fair exchange and is carrying on the united business are less than two to three million deliver mill be added in the next few the aggregate cost of two separate banks. At least from two to three million dollars will be added in the next few years to funds available for commercial purposes by the

disposal of large and valuable properties not now required. And I will show you that competition has not been lessened, nor has a single customer suffered.

As to competition, I may state that out of the combined agencies, amounting to 320, there were only sixteen places where both banks did business. This is another example of the exact fitting in of the functions and conditions of each institution. In at least four out of these sixteen branches, the chief business of the Traders Bank was receiving de-posits. This leaves only twelve in which there could be any semblance of competition. And in this connection let me say that not a single former customer has been refused accomthat not a single former customer has been feitised accom-modation, and not a new applicant for credit has been turned away where the security offered has been deemed satisfac-tory. In four places out of the twelve, agencies of other banks were opened before we had closed our arrangements with the Royal Bank. This leaves only eight branches by the closing of which the public could possibly be affected, the closing of which the public could possibly be affected, and in all of these the Royal Bank continues to do business. In these eight places, which represent the largest cities in Canada, such as Montreal, Toronto, Ottawa, Winnipeg, Vancouver, etc., there are large agencies of all the **old** leading banks, and many of the younger banks as well. The banking facilities in these eight cities are undoubtedly ample. In the remaining 312 points, where we have agencies, the situation remains absolutely as it was before the amal-gamation. gamation.

I am glad to say that the Traders Bank staff was taken over in a body and given substantial advantages in the way of pensions, etc., which did not exist in connection with the Traders' Bank.

Traders' Bank. In every way the amalgamation will be found to be most beneficial, and, speaking from a personal knowledge of the circumstances, I have no hesitation in stating to this meet-ing that the Royal Bank has gained by the acquisition of the Traders Bank, and the shareholders. customers and de-positors of the Traders Bank have greatly advanced their own interest, and the country is, and will be, better served and provided with greater banking facilities than if the two hearly had continued separate from each other banks had continued separate from each other.

MR. STUART STRATHY.

Mr. Stuart Strathy, late General Manager of the Traders Bank of Canada, spoke as follows :---

The Shareholders of the Royal Bank of Canada are 10 be congratulated upon the organization which took over so successfully the business of the Traders Bank of Canada. The transfer was made without the slightest disturbance to the business of either bank.

The report was then unanimously adopted. On motion of Mr. H. S. Holt, seconded by Mr. E. F. B. Johnston, K.C., the by-laws of the Bank, with amendments, were re-enacted. On motion of Mr. A. J. Brown, seconded by Mr. W. J. Sheppard, an annual contribution to the Officers' Pension

Fund was authorized.

The usual resolutions expressing the thanks of the Shareholders to the President, Vice-President and Directors and to the General Manager and Staff, were unanimously

and to the General Manager and Staff, were unanimously carried. The President and General Manager replied. The ballot for the election of Directors was then proceeded with and the scrutineers reported the following elected Directors for the ensuing year: H. S. Holt, E. L. Pease, E. F. B. Johnston, Wiley Smith, Hon. D. Mackeen, Jas. Redmond, G. R. Crowe, D. K. Elliott, W. H. Thorne, Hugh Paton, T. J. Drummond, Wm. Robertson. A. J. Brown, W. J. Sheppard, C. S. Wilcox, A. E. Dvment. At a subsequent meeting of the Board of Directors. Mr. H. S. Holt was unanimously re-elected President, Mr. E. L. Pease, Vice-President, and Mr. E. F. B. Johnston, K.C., second Vice-President, for the ensuing year.

GRAND TRUNK IS CENTRAL TOPIC.

Before Charles M. Hays came into the service of the ad Trunk Bailway, that company was the "easy mark" Before Charles M. Hays came into the service of the Grand Trunk Railway, that company was the "easy mark" of its rivals and connections on both sides of the line, says the Providence Evening Bulletin. On the one hand, the Can-adian Pacific, aided by powerful politicians, made the Grand Trunk a mere switching yard. On the Vermont side of the line, country politicians legislated it out of opportunity even to collect its just credits, due for car mileage balances. Tim-idity and indecision marked its policies. Mr. Hays changed all that; but the question is now. Is the change permanent? all that; but the question is now, Is the change permanent?

The ballot for the election of Directors was then pro-Grand Trunk Railway in New Hampshire is sending out a letter to the associates and directors of Southern New England Railroad Corporation and to the organizations and in-dividuals whose support of the Grand Trunk may have been induced by my assurances of its good faith, in which he pur-ports to show how he, President Fitzhugh and others were tricked in abandonment of Grand Trunk project. Judge Re-mick is caustic in his expressions and suggests legislation to secure control of Boston and Maine Railroad."

DEBENTURES FOR SALE

DEBENTURE TENDERS

TOWN OF KAMSACK

Sealed tenders will be received by the undersigned up to January fifteenth, 1913, for the purchase of :---

- (a) \$2,000.00 Hospital Grant debenture bearing interest at the rate of 51/2 %, repayable in five equal annual in-stalments of principal and interest of \$468.35 and pay-able at the Canadian Bank of Commerce, Kamsack, Sask.
- (b) \$5,000.00 Road improvement debenture bearing interest at the rate of 5½%, repayable in fifteen equal annual instalments of principal and interest of \$498.13 and payable at the Canadian Bank of Commerce, Kamsack, Sask.
- (c) \$20,000.00 Town Hall debenture, bearing interest at the rate of 5½%, repayable in twenty equal annual instal-ments of principal and interest of \$1,673.60 and payable at the Canadian Bank of Commerce, Kamsack, Sask

Debentures to bear interest from date of issue of coupons.

Tenders will be opened at eight o'clock on the evening of the 15th January, 1913. The highest or any tender not necessarily accepted.

A. A. CRAWFORD,

Secretary-Treasurer.

Kamsack, Sask., 6th December, 1912.

CITY OF LADYSMITH, B.C.

Sealed tenders will be received by the undersigned till 6 p.m. January 27th, 1913, for \$7,750 (seven thousand, seven hundred and fifty dollars) 6% (six per cent.) 15 (fifteen) year local improvement debentures of the city of Ladysmith, B.C. N. A. MORRISON,

January 1st, 1913.

City Clerk.

FORTY-FIVE YEARS' INVESTMENT IN INSURANCE COMPARED WITH THE SAVINGS BANK

An interesting example of an investment made in life insurance in 1867, with an United States Company, by the late Frank Goodwin, of Portsmouth, N.H., on a policy issued to him for \$5,000, recently became a claim by the death of the insured. This policy required an annual premium of \$214.10. The contract called for the payment of this sum each year for ten years; when all premiums should cease and the policy become paid up and payable at his death. The insured paid each year's premium in cash, thus allowing all dividends to accumulate, and after he had ceased to pay any more premiums he continued to allow the dividends to ac-cumulate, until at the time of his death they had reached the sum of \$3,582, making the value of his policy as a claim \$8,582. The total amount paid to the company was only \$2,141, ten annual premiums, showing the company to have paid to the beneficiary \$4 for every \$1 paid to the company.

The following is a history of the policy: Issued August 31, 1867, \$5,000. Life, 10-premium plan, annual premium, \$214.10.

Original insurance Dividends additions declared on policy	\$5,000 3,582
Amount of claim paid by company to annual premiums paid to company	\$8 ,582 2,141
D	

Return over cost realized by the heirs \$6,441

If Mr. Goodwin, when he took this policy, had elected to place a sum equal to his annual premium each year for 10 years in a savings bank at 3½ per cent. compound interest and let it remain there until his death his estate would have

Difference in favor of the bank\$ 84.02

But, although the bank would have paid to his estate \$84.02 more than the insurance company, he would not have had the 45 years of insurance protection for \$5,000 in 1867 to \$8,582 in 1912 that the insurance company gave.

TENDERS FOR DEBENTURES

Sealed tenders marked "Tenders for Debentures," will be received by the undersigned up to 5 p.m. January the 25th, 1913, for the purchase of \$50,000 debentures, repay able in forty equal annual instalments, with interest at 5 per cent.

This issue is for the purpose of purchasing site and erecting thereon a four-room school.

The highest or any tender not necessarily accepted.

EDW. J. BAKER, Secretary-Treasurer.

The St. Agnes Roman Catholic

Separate School District No. 22, Moose Jaw, Sask December 21st, 1912.

TOWN OF MINNEDOSA, MANITOBA

TENDERS FOR DEBENTURES

Tenders are invited for the purchase of the following debentures :-

- 1. \$10,000 five per cent. General Debentures, repayable as to principal on March 1st, 1941, interest payable annually on March 1st, Sinking Fund.
- \$16,500 five per cent. Local Improvement Debentures, repayable in 20 equal consecutive annual payments of \$1,324.00 each comprising principal and interest on March 1st each year. First payment March 1st, 1914, computed from March 1st, 1913.

Tenders must be given for each parcel. Successful ten derer to pay at par in Minnedosa. Tenders to be received by undersigned not later than January 31st, 1913.

G. T. TURLEY, Town Clerk, Minnedosa, Man.

WASTE OF NATURAL CAS

Much has been written about the saving effected b using natural gas in gas engines to generate power, instead of burning the gas under boilers to generate power from steam. Experiment has shown that the amount of gas re quired per hour, for the development of the borsepower, steam. Experiment has shown that the amount of gas to quired per hour, for the development of one horse-power, varies from 9 cubic feet, with the highest type of internal combustion engine, to 130 cubic feet with of ordinary steam engine. In other words, the efficiency the gas is over fourteen times as great when used in gas engines as when used for generating steam under boilers. It has also been suggested, in other countries that pro-

It has also been suggested, in other countries, that pro-visions be made for preventing the use of natural gas such purposes as lime and brick burning. etc., in order to conserve this ideal and economic fuel for domestic and other less wasteful industrial purposes, for which, owing to nature, it is especially useful.

We, in Canada, need not at present consider the above refinements in the use of natural gas. Natural gas and North-West Territories are disposed of under Domithe laws. These laws make no provision for preventing waste of natural gas, and the consequence is that consider able waste occurs.

The importance of natural gas in Alberta may be realized when it is considered that a company is now piping matural gas from Bow Island to Calgary a distance of 175 miles. In addition to supplying Calgary, the company branch lines to Lethbridge, MacLeod, Granum, Nanton, Claresholm, Brooks and Okotoks.

The province of Ontario has reduced the waste of na tural gas to a minimum by causing all abandoned wells to be plugged and by levying a tax of two cents per thousand feet, with a rebate of 90 per cent. when the gas is used.

Brigden, Ont., board of trade officers and committee for 1913, are as follows:—President, Mr. J. C. Massie first vice-president, Mr. John Hayne; second Mr. president, Dr. M. Galbraith; secretary-treasurer, W. J. Brownlee; council, Messrs, D. McDonald, John Wheeler, T. E. Poland, F. McLean, W. J. Grey.

WINNIPEC'S FIRE REPORT

Six hundred and ninety calls out of a total number of 1,-451 received by Winnipeg's fire department during 1912 were alarm false alarms or else small chimney fires. The false either false alarms or else small chimney fires. either false alarms or else small chimney fires. The false alarm cannot be guarded against to any great degree, and is one of the greatest evils against which the department has to contend. The fire department cannot ignore a call. There a day; being 121 more than last year. The total number of The list of casualties is slightly heavier than in previous The. there having been two firemen killed and six injured.

The list of casualties is slightly heavier than in previous years, there having been two firemen killed and six injured. fire, most serious fire of the year was the Radford-Wright well as several private citizens. Other serious fires were the ial or and Company the Blackwood Brewery and the Imper-Hobbs and Company, the Blackwood Brewery and the Imper-ial Oil Company's plant.

The equipment has made great advancement and there are three more fire halls this year than previously. There men. This force consists of one chief, two assistants, one class. master mechanic, one motor mechanic, one secretary, clerk, 13 captains one lightenants six engineers, and s clerk, 13 captains, 14 lieutenants, six engineers, and six as-tor car for the assistant chief is a move that has been much with appreciated and which at the same time is helping to do away with the formal which at the same time is nelping to do thrilwith the romance of the department, a romance made thril-ling to the even by the manual price of horses.

ling to the eye, by the prancing of horses. There are six chemical fire engines, 15 horse-drawn wag-s, three motor fire engines, three fire engines, three ¹here are six chemical fire engines, 15 horse-drawn was aerial ladder trucks, seven hook-and-ladder outfits, etc., 90 55,000 feet of fire boce. There are 201 fire alarm boxes. 55,000 feet of fire hose. There are 291 fire alarm boxes.

There is talk of double tracking the Temiskaming and Northern Ontario Railway.

MARITIME TRUST CORPORATION

A new financial company known as the Maritime Trust poration has commenced business at Halifax. The in-Corporation has commenced business at Halifax. The in-itial capital of the company is \$150,000. Mr. Blake G. Bur-rill, who is well known in Nova Scotia, is the manager of the new company.

The policy of the company will be directed to the carry-ing on of a trust business, acting in the capacity of administrators and executors, trustees, agents for estates, etc.

The directors are:-Hon. G. E. Faulkner, Messrs. C. J. Burchell, Thomas Notting, E. J. Murphy, E. K. Spinney, Augustus Cann, Jacob Bingay, J. H. Winfield, Bowman B. Law, and W. H. Brookfield.

The headquarters of the Maritime Trust Corporation will be at the corner of Hollis and Salter Streets, Halifax. The investments to be dealt in will be carefully approved securities; real estate will be handled, rents collected, and all the functions of a trust company will be performed.

Hon. George E. Faulkner, Messrs. Charles J. Burchell, Edward J. Murphy, and Augustus Cann are the president and vice-presidents, and Mr. Blake G. Burrill is manager. Mr. Burrill began in the investment business twelve years ago. From 1905 to 1908 he was with the Royal Securities Corporation and since then he has been engaged in the de-velopment of water power at Yarmouth, giving to that town its light, power and tramway enterprise.

The Maritime Trust Corporation will soon occupy its permanent office, and in the meantime has temporary quarters at 173 Hollis Street, Halifax. The corporation will also open a branch at Yarmouth.

The head office of the Alberta Land Company, Limited, has been changed from Ottawa to Calgary, and the 15,000 shares of the capital stock of the par value of \$100 have been sub-divided into 300,000 shares of \$5 each.

First New Year's Issue in London — Cedar Rapids Financing-Municipal Bonds

The expected January rush of new capital issues has be-The British Columbia Electric Railway is offering in gun. London £750,000 four and a half per cent. debentures at 98 for extension purposes.

At a meeting of the shareholders of the Cedar Rapids Manufacturing Company, a resolution to retire such of the \$10,000,000 authorized bonds as were issued originally was passed. This was followed by a resolution to replace that issue with an issue of \$15,000,000 forty-year 5 per cent. first mortgage gold bonds, to be issued from time to time as required for the development of the property. Both resolutions were carried unanimously. A plan which will provide for a bond and stock issue, with Montreal Power and Shawinigan shareholders having the right to subscribe, may be adopted.

Grain Growers' Bonds.

In order that better provision may be made for the hand-ling of farmers' grain in Alberta, the provincial government will guarantee the bonds of the Grain Growers' Grain Com-pany, whose headquarters are in Winnipeg, to the extent of The company in return will build sixty at least \$1,000,000. elevators in the province during the year, and will be in condition to handle a large proportion of the crop of this year. At present the company is doing a large business in Manitoba.

The Royal Bank of Canada is one of the two bidders for the Government of San Domingo's bond-secured loan of \$1,-500,000 gold, issued under the sanction of the United States Government. The only other bidder, so far, is the National Bank of San Domingo. The opening of the tenders has been postponed from January 1 until January 10.

Point Grey's Finances,

An approximate financial statement has been prepared by Comptroller Floyd, of receipts and expenditures of Point Grey municipality, B.C., during the past year. It shows the total receipts of the period to be \$1,279,027.04. Expended on roads was \$544,000.87, and on sidewalks \$24,929.07. General expenditures amounted to \$146,610.83. \$113,184.72 was applied to interest on loans, bank commission and to sinking funds

The largest items under receipts were the amount receiv-ed from treasury certificates, \$809,374.50, \$159,092.66 from 1911 roads loan debentures, \$127,532.53 from general and school taxes, and \$114,882.97 from special taxes. Other sums received were \$20,300.62 from tax arrears, \$10,000 as government grant for the Marine drive. Money received from miscellaneous sources raised the sum total to considerably over

Five bids were received for the \$231,400 debentures of London, Ontario. As previously noted, the award was made to Messrs. Wood, Gundy and Company, Toronto. Messrs. J. and L. M. Wood, the Montreal bond house, have prepared a short folder primarily for distribution in the United States. They have included therein a few pointed arguments showing that a great many dependent which best arguments showing that a great many dangers which best the path of the investor in the neighboring republic can be avoided altogether in Canada avoided altogether in Canada.

COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore, so pounds, for the week ended January 3rd :---Peterson Lake, 87, 562; Dominion Red. 84, 107; Hudson D. C. Sar, Penna 562; Dominion Red, 84,197; Hudson Bay, 61,825; 20,30; Canadian, 61,804; Cobalt Lake, 64,094; Coniagas, 20,30; La Rose, 236,385; Cobalt Townsite, 103,500; McKinley-Dar ragh, 224,800; Temiskaming, 61,115; Kerr Lake, 60,628; th tal, 1,342,314 pounds, or 671 tons.

In 1904 the camp produced 158 tons, valued at \$316,217 905, 2,144 tons, valued at \$316,217 in 1905, 2,144 tons, valued at \$1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons: in 1014 2016 tons; in 1909, 29,941 in 1910, 34,041 tons; in 1911, 25,089 tons.
