Poetry.

A SIGH.

In the days when earth was young,
Love and laughter roamed together;
Love took up its harp and sung;
Round him all was golden weather.
But there came a sigh anon—
What will be when life is gone?

Laughter then would try his skill,
Sang of mirth and joy undying;
But he played his part so ill,
He set echo all a-sighing.
Ever came an undertone—
What will be when life is done?

Then forever since that time
Love no more can live with laughter;
For, bright as in the summer prime,
Winter pale will follow after,
Love in no forth must dwell with sighs;
Joy was left in Paradise.

GOING TO TOWN.

Sadie Goodrich had a rich mother, and beautiful home; but she had no father. He had been dead so many years that Sadie could not remember him. There were no other children, and Sadie and her mother lived just out of the city, and were as happy as the days were long. But when a while Mrs. Goodrich would sigh, and say, "I wish I knew where poor Carrie is!" Carrie was Mrs. Goodrich's only sister, whom she had not seen for ten or twelve years. She didn't even know where she lived. Carrie had married very young, and gone away out West and to California, and there had been some trouble between her and her father, and Mr. Goodrich. I believe these two gentlemen did not like the man she married. So, she separated, and wrote no letters. And by-and-by Mrs. Goodrich's father died very suddenly, and then Mr. Goodrich died, and no answer came to the letters that were sent here and there to Mrs. Carrie Blake telling her. And sometimes Mrs. Goodrich thought that her sister was still angry, and didn't want to have anything to do with them, and then she thought that poor Carrie might be sick, or poor, or dead, and then she felt about her.

"I used to be very fond of my sister," she said to her little girl, "just as you would be of yours, if you had a sister a good deal younger than you. Carrie was ten years younger than me, and only nineteen when she married. She would be twenty-nine now. If you had a little sister as much younger, she could be only a year old; for you are only eleven. Carrie was very pretty, and I used to be proud of her. She had yellow curly hair, and large black eyes, and her skin was as white as milk. This looks like her, but not so pretty."

Mrs. Goodrich would then show Sadie a miniature painted on ivory, and Sadie would look at it, and say, "Oh, isn't she pretty! I wish she would come and live with us, mamma!"

This happened over and over, but Sadie never got tired of hearing the story, and seeing the beautiful picture.

One day Mrs. Goodrich came from town with a rocking-carriage for a little boy in the neighborhood.

"Put it in the garden, John," she said to the coachman. "And this evening I want you to carry it over to Mrs. Porter's."

It was then about six o'clock, and in half an hour they would have their tea.

"Just time for me to have a good ride in Charlie's rocking-carriage," Sadie said.

So she ran down the walk, and got into the carriage.

It was a delightful ride, for the seat was nicely cushioned with velvet; there were garnet silk reins, and the rockers were smooth, and the carriage pretty painted.

"I'm going to town, mamma," called out Sadie, seeing her mother pass by the door on her way up stairs. "What shall I buy for you?"

Mrs. Goodrich came and stood in the front door, smiling down on her daughter.

"You may bring me one each of us a sister," she said. "And be sure you get back to tea."

Then the mother went up stairs to change her dress, and Sadie chirped at the "wooden horse," and rocked as hard as she could. "I'm going to town, home," she said. "Hurry! I'm going after two sisters, one for me and one for me."

Then she rocked harder still till the gravel flew, and the carriage did really go a little way at a time, getting nearer and nearer the gate, just as you have seen a rocking-chair rock all round the room. John the coachman came past leading the horses to the stable; the gardener came in, and a visitor went out. Each one stopped a moment to look at the little girl

in the rocking-carriage, and to each one she said that she was going to town.

By-and-by she found herself closer to the gate, and then she was tired enough to rest. As she stopped, pulled her horse in with a "Whoa!" and then dropped the reins, she saw that there was a little girl standing and looking at her through the gate. She was one of the most beautiful little girls that ever was seen, though she looked pale, and her clothes were poor. Her eyes were large and black, and had a bluish-velvet shade to them, like ripe grapes, but her skin was as fair as a lily, and her long wavy hair was a light yellow. This little girl could not have been more than five or six years old, and she looked at Sadie with sad and steady eyes.

"O little girl! who are you?" cried Sadie. "You look just like my Aunt Carrie."

The child said nothing, only looked steadily through the gate at the pretty garden and house, and the nicely dressed little girl riding in that most beautiful carriage. Sadie jumped out and ran down to the gate.

"Come right in and let my mother see you!" she said, eagerly, grasping the little stranger's arm.

The child looked frightened, and tried to pull away, turning and holding out her hands to somebody. Then Sadie saw that there was a poor woman sitting down by the roadside.

"I didn't mean to frighten her," Sadie said. "I only wanted her to come in for mamma to see. Would you come too, and rest? And if you want some supper, you shall have some."

The woman got up and came slowly toward the gate, taking the child's hand when she reached her, leading her back. She looked very pale and tired.

"I have walked a good way," she said, "and I would like to rest. Come, let the little girl want us to go in."

When she saw that her mother was going, little Sadie went quite willingly, and they all walked up the garden path together, the two children in advance, and the woman following.

When Sadie and her little friend reached the front door, Mrs. Goodrich was just coming down stairs.

"Why, my child!" she said, "who have you got there? Why, what a pretty child!"

"I've been to town, and this is my little sister," Sadie said. "And your big sister is just outside the door."

"What do you mean?" her mother said, but kept looking at the little girl. She sat down in one of the hall chairs and drew the child to her.

"Who does she look like, mamma?" asked Sadie. "I thought in a minute, and made her come in for you to see. Isn't she just like Aunt Carrie's picture?"

Mrs. Goodrich still kept looking at the child. "It is strange!" she said to herself. "I didn't think there were two in the world with such eyes and hair together."

Sadie glanced toward the door and saw the child's mother standing there, looking at little Sadie and Mrs. Goodrich, and tears were rolling over her cheeks. As Sadie looked, the woman exclaimed, "Isa!"

The child turned quickly, and Mrs. Goodrich lifted her face as quickly, and the two women looked steadily at each other.

The stranger never moved, only leaned against the door, never even noticed the child when Isa went to her, only looked over her head towards Mrs. Goodrich.

Sadie began to think that it was very odd, and she was a little frightened when she saw that her mother's face turned very red, then very pale, then that she got up and almost ran toward the door.

"Who are you? What is your name?" Mrs. Goodrich cried out.

"O Isa, am I so changed that my own sister does not know me?" exclaimed the stranger, bursting into tears.

Then Sadie began to think that she was losing her senses. For her mother cried out, and threw her arms around the woman's neck, and the woman faint, and the servant came running with water and smelling-salts, and they carried the woman into the parlor, and laid her on a sofa, and Sadie's mother cried over her, and kissed her, and called her poor dear.

But at last it all came round right. The stranger was better, and sat up, and then Mrs. Goodrich brought Sadie to her, and told her to kiss her dear Aunt Carrie and coax her to stay and live forever with them.

For this was indeed Mrs. Goodrich's sister, Carrie Blake. Her husband was dead, and she was poor, and she had come there to see if her sister still cared anything about her.

"I got no letters, and I didn't know that father was dead till I reached town," said she. "And I only dared to come to you, because I thought you must be lonely."

Well, they made Mrs. Blake and Isa stay there and live with them, and never were people happier.

But Sadie always said that she brought her aunt and cousin from town, when she went there in the rocking-carriage.

Mrs. Blake looked poor and old when she came, but she has got back her good looks now, and there isn't a prettier woman in town.

An Act to further facilitate the Construction of the Grand Southern Railway.

Whereas it is deemed desirable to grant power to certain property holders in the County of Charlotte to aid in the construction of the Grand Southern Railway, by the issue of debentures or certificates of debt, with power to levy assessments upon the said County for the payment of the same, with interest; be it therefore enacted by the Lieutenant Governor, Legislative Council and Assembly as follows:

1. The General Sessions of the Peace for the County of Charlotte are hereby authorized and empowered to borrow such sum or sums of money, in loans of not less than one hundred dollars each, not exceeding fifty thousand dollars in the whole, to be appropriated and applied according to the provisions of this Act.

2. When and as soon as it shall be certified to the said General Sessions, by the Government engineer, or a competent engineer approved of by the said Sessions, that five miles of the said railway is graded and ready for laying and receiving the rails, the said General Sessions shall pay to the said Grand Southern Railway Co., or such other company as shall build the said Grand Southern Railway, the sum of five thousand dollars on the receipt of a similar certificate of each successive five miles being so graded and ready for laying down and receiving the rails until thirty miles of the said Grand Southern Railway are graded as aforesaid, and when it shall be certified as before to the said General Sessions, by such engineer aforesaid that the remaining portion of the said line of railway is completed and in good working order, with the necessary stations, station houses and rolling stock, the said General Sessions shall pay to the said Grand Southern Railway Co., or such other company as shall build the said Grand Southern Railway, the balance of the said sum of fifty thousand dollars.

3. It shall and may be lawful for the said General Sessions to issue debentures with coupons at a rate of six per centum per annum payable semi-annually to the holder thereof in such form and at such place or places as the said General Sessions may deem expedient, which debentures and coupons shall be respectively negotiable in the same manner as promissory notes payable to the holder or bearer thereof.

4. The debentures shall be sealed with the common seal of the said General Sessions, and be signed by the chairman of the said Sessions and countersigned by the Clerk of the Peace for the said County of Charlotte, and shall be consecutively numbered according to the times at which the same shall be issued and shall be made payable in not less than five years and not exceeding fifty years from the respective dates of issue, at such place or places as the said Sessions may deem expedient.

5. All moneys loaned to the General Sessions of the Peace for the County of Charlotte under the provisions of this Act shall be paid by the lenders thereof to the Treasurer of the County of Charlotte, and by him paid to the said Grand Southern Railway Company or such other company as shall build the said Grand Southern Railway, by order of the said General Sessions, the said County Treasurer holding and paying the same exclusively for the purposes of this Act.

6. The said General Sessions are hereby authorized, empowered and directed every year to order assess and levy a rate on the whole of the inhabitants of the said County of Charlotte liable to be rated or assessed for any rate or assessment within the said County of a sum sufficient to pay the interest on the debentures under this Act, and a further sum of not exceeding two thousand dollars as will pay such, and so much of the principal sum borrowed as the said General Sessions may deem expedient, besides the charges for assessing and collecting for the purpose of discharging the principal and interest of the loans contracted by virtue of this Act, until the same shall be paid off; the said several sums to be levied, assessed, collected and paid in such proportion and in like manner as any county rates for public charges, only that the tax upon the poll of each inhabitant shall be not less than half a dollar, and when collected shall be held by the County Treasurer for the payment of the said interest, or interest and principal as the case may be, exclusively for the purposes of this Act.

7. The moneys so assessed shall from time to time be applied in payment of the said debentures and the interest thereon and the said County Treasurer shall when

and so often as he may be directed by the General Sessions so to do, give one calendar month's public notice by advertisement in one of the newspapers published in the County of Charlotte, calling in such and so many of the said debentures whether due or not as the said General Sessions may be prepared to pay off, specifying the number of such debentures in such advertisement and the same by and under such order as aforesaid shall pay off accordingly, and from and after the expiration of such notice the interest on such debenture shall cease.

8. Provided always that this Act shall not come into operation or be in force until it shall be determined by a majority of the rate payers in the said County of Charlotte liable to be rated and assessed thereunder that they desired that the said Act may be in force, which said determination shall be arrived at in the manner following, that is to say: The assessors of rates of the several parishes in the said County of Charlotte are hereby authorized and required within two months after the passage of this Act to make in like manner as valuations of property and income are now made by the Assessors of Rates, a list of all the persons liable to assessment under this Act, and deliver such list to the Town Clerks of the several parishes in the said County within four months from the passage of this Act, and such Town Clerks within twelve months from the passing of this Act by written or printed notices to be by them posted up in three or more public places in the said parishes respectively, make known that they call together and will hold a public meeting of all persons liable to be assessed under the provisions of this Act, in their respective parishes, and also fix in such notice the times and places, and which shall not be less than six days from the time of posting up and publishing such notices, and on the day and hour (which shall not be later in the day than 11 o'clock in the forenoon) and at the place in such notice named for each parish, each of the said Town Clerks shall hold such meetings and shall preside at the same, and not before four o'clock in the afternoon of the same day shall close the said meeting; they shall put the question to each person as he presents himself to vote, and whose name is entered on the said list so furnished as aforesaid, whether this Act shall be adopted or not, and shall truly enter his answer "yes" or "no" opposite his name on the said list; the president or manager of any corporation shall be entitled to vote in respect of the property of such corporation liable to be assessed under this Act, and shall vote in the parish where such property is situated; the said Town Clerks immediately after such voting shall transmit the aforesaid lists with the vote thereon to the Sheriff of the County of Charlotte, and if it shall appear to the said Sheriff that the parties who at the meetings in the several parishes in the County have voted "yes" represent a majority in number of the ratepayers present in person or by proxy at such meetings liable to be rated and assessed under this Act, to be estimated by the lists so furnished as aforesaid, then the said Sheriff shall forthwith certify the same to the Governor in Council and the Governor in Council shall thereupon announce the same by proclamation in the Royal Gazette of this Province, whereupon this Act shall be in full operation, and shall have effect; but if the Sheriff in counting the votes aforesaid, and referring to the said lists shall find that the persons who shall vote at such parish meetings throughout the County in favor of the adoption of this Act do not amount to a majority in number of the ratepayers of the said County, the said Sheriff shall certify the same to the Governor in Council whereupon this Act and everything therein contained shall be and become utterly null and void, anything herein contained to the contrary notwithstanding; and in case of any dispute as to the qualification of any person whose name appears on the said lists, the said Town Clerks respectively shall and may decide the same on the oath of the parties or other evidence which oath the said Town Clerks are hereby authorized to administer and the decision of the said Town Clerks respectively shall be final and conclusive for the purposes of this Act, and any party entitled to vote under this Act may do so by proxy upon such proxy producing and filing with the Town Clerk where the party he represents is entitled to vote, a written authority signed by the said party for whom he votes, such authority to be proved by oath or otherwise to the satisfaction of the said Town Clerk, which oath the said Town Clerks respectively are hereby authorized to administer.

9. The Octopus and the Rats.—The aquarium of the Zoological Station at Naples was, last autumn, attacked by a great number of rats, which not only did considerable mischief to the woodwork, but even caught and devoured a number of the animals kept

in the tanks. In an attack on an octopus however, one of these depredators got by far the worst of the battle, as next morning nothing remained of the four-footed gourmand but the bones and a part of the skin. Though this achievement cannot be compared to the exploits related by M. Victor Hugo, it is interesting as showing that even in captivity a healthy cuttle-fish is well able to take care of itself.

A Yankee out West, who recently wrote home to his mother that he had seen a live Hoosier, has sent her home another epistle on Western etiquette. Here it is: "Western people go to their death on etiquette. You can't tell a man here that he lies, as you can down East, without fighting. A few days ago a man was telling two of his neighbors in my hearing, a pretty large story. Says I, 'Stranger, that's a whopper.' Says he, 'Lay there, stranger,' and in a twinkling of an eye I found myself in a ditch, a perfect quadruped, the worse for wear and tear. Upon another occasion, says I, to a man I never saw before, as a woman passed him, 'That isn't a specimen of your Western women, is it?' Says he, 'You are afraid of the fever and ague, aren't you, stranger?' 'Very much,' says I. 'Well,' replied he, 'that lady is my wife, and if you don't apologize in two minutes, by the honor of a gentleman, I swear that these two pistols—which he held in his hands—shall cure you of the disorder entirely; so do not fear, stranger.' So I knelt down and apologized. I admire the country much, but darn me if I can stand so much etiquette; it always takes me unawares."

ANCIENT WEAPONS.—An exhibition of ancient and modern weapons has been opened at Birmingham. They date from the fourteenth century. Among them is a breech-loading air-gun, made by Nock, an Englishman, somewhere about 1380. It has seven barrels all of which explode with one blow of the hammer. There is also a beautiful breech-loader, bearing the name of Aquafresca, Borgia, 1694. There are many exquisite breech-loading pistols of ancient dates, with ingenious mechanism, and the first attempt at the revolving principle, in the shape of a double-barrelled gun, the barrels turning on a pivot. Many of the guns have reservoirs in the stock for ammunition. One curiosity is a single-barrelled gun to hold two charges. One charge was rammed home, and several were inserted, after which the second charge was placed in the barrel. The top charge was exploded by a hammer about a third of the way up the barrel, and a hammer at the breech then discharges the second.

FAULT-FINDING.—Find fault when you must, in private, if possible, and some time after the offence, rather than at the time. The blamed are less inclined to resist when they are blamed without witnesses. Both parties are calmer, and the accused person may be struck with the forbearance of the accuser, who has seen the fault, and watched for a private and proper time for mentioning it. Never be harsh or unjust with your children or servants. Firmness with a gentleness of demeanor and a regard for the feelings, constitutes that authority which is always respected and valued. If you have any cause to complain of a servant, never speak hastily, wait, at all events, until you have had time to reflect on the nature of the offence.

"Is there a ford here?" asked an English gentleman, who, is making a tour in the west of Ireland, was suddenly stopped by a mountain stream. "O, to be sure, your honour!" said an honest native, "there was once a ford here." "When was it?" asked the gentleman. "It was before the bridge was built, yer honor," answered the good-humored Irishman; but after the passenger asked the bridge it got out of habit. "Well," said the traveller, "now that the bridge is broken down, I suppose the ford may have got into habit, again. Is it safe?" "To be sure, yer honor—all but in the middle—but that is nothing; and if you can swim, why, there is not a better ford in all the country." "But I cannot swim," replied the gentleman. "Then, yer honor," retorted Paddy, "the only safe way that I know of is as soon as you get out of your depth to walk back again."

The gallant secretary of a life insurance company being in command of a platoon during the late unpleasantness at New Orleans, struck up the gun of one of his men about to fire, on a staff officer, with the exclamation, "Hold! don't shoot at him; we've got a pretty one on him."

A father at Dubuque makes his children address him as follows: "Dad, respected and revered father, I'll take another 'tater'."

"The proper study of mankind is man," says Pope; but the popular study is how to make money out of him.

Telegraphic News.

LONDON, May 8.
Sir John Holker, Attorney General, has accepted the seat on the English Bench made vacant by the death of Judge Pigott.

A special despatch from Berlin to the Times reports that a working engineer, residing in the suburbs of Berlin, has been arrested while prowling around the mansion of Prince Bismarck. A loaded pistol was found in his pocket. He is temporarily lodged in a lunatic asylum.

The Prussian police have received alarming notices of plots against Bismarck and Minister Falk.

The Prince Bishop of Breslau has been removed for violation of the Prussian ecclesiastical laws, and sent to the Bohemian frontiers.

The budget was discussed in the commons last night. Mr. Gladstone severely criticised the financial policy of the administration, and was replied to by the Chancellor of the Exchequer, who defended the system pursued. Robert Lowe charged that the exchequer accounts have been manipulated to produce a fictitious surplus.

A POOR OUTLOOK FOR SHIPPING.—The market for freights remains exceedingly dull and depressed in all departments, and with the tonnage supply increasing, the tendency of rates is to a still lower range. It is very difficult in any trade, to stock money enough to pay expenses, to say nothing of profits, and unless the markets soon takes a favorable turn the only alternative for owners of American vessels will be to lay them up. We have known the outward rates to be lower than at present, but on those occasions ship owners were compensated by return freights. But all this is changed. From the leading ports of Europe there is little or no freight coming beyond what the steamers can carry, and they find it a losing business at the current rates, especially as the immigrant traffic has dwindled to small proportions. The prospect for ship owners is dreary, but then they are probably doing as well as are the great majority of merchants engaged in other departments of trade, for if we are to give credence to reports in commercial circles, a profitable business now a-days is rather the exception than the rule.—New York Shipping List.

HALIFAX SCHOOL BOARD.—A change in the composition of the Halifax School Board is proposed, and a bill has been introduced into the Legislature to secure this object. The present Board is composed of seven citizens (including the Chairman) appointed permanently by the Government, and six Aldermen, appointed annually by the City Council. The bill provides that a new Board of twelve members shall be appointed, half by the Government, and half by the City Council, and these from their own number, shall elect a chairman. Two Government, and two Council appointees shall retire annually, and the term of office shall be three years. To meet this provision at the outset the two gentlemen whose names appear first on the Government list shall hold office for only one year, the next for two years, and the same order will be observed in regard to the Council's representatives.

Some of the Presbyterian papers in the United States are advocating the introduction of the responsive use of the Psalms in their church worship; and they repudiate the idea that there is anything in such responsive services that belongs exclusively to Episcopacy or any form of church government.

CHATHAM BRANCH.—A meeting of the Chatham Branch Railway Company was held in the Secretary's office on Tuesday, and the following Directors were re-elected to office:—Alexander Morrison, F. E. Winslow, J. B. Snowball, W. M. Kelly, and J. F. Letson, Esqs., and at a subsequent meeting of the Board of Directors, Alexander Morrison, Esq., was re-elected President, and A. D. Sheriff, Esq., Secretary. A resolution was passed at the meeting of Stockholders appointing Messrs. Kelly and Snowball a committee "to negotiate with the Dominion Government to endeavor to have the Chatham Branch utilized in connection with the Intercolonial," which means we presume, that the committee must endeavor to induce the Government to take the Branch off the hands of the company.—Herald.

The Tallest Chimney in the World.

The tallest chimney in the world is the Townsend chimney, Glasgow, Scotland. It was built by Robert Corbett, of Glasgow, for Joseph Townsend, of Crawford Street Chemical Works. The total height from foundation to top of coping is 468 feet, and from ground line to summit, 454 feet; the outside diameter at foundation being 50 ft., at ground surface 32 feet; and at top of coping 12 feet 8 inches. The number of bricks used in the erection were as follows: Common bricks in chimney, 1,142,532; composition and fire bricks for inside cone, 157,465; common bricks for flue, etc., 100,000; total, 1,400,000. The weight of bricks at 5 tons per 1,000 is equal to 7,000 tons. When within five feet of completion, the chimney was struck by a gale from the northeast, which caused it to sway 7 feet 9 inches off the perpendicular, and it stood several feet less in height than before it swayed. To bring back the shaft to its true vertical position, "sawing back" had to be resorted to, which was performed by Mr. Townsend's own men, working in relays, four at a time sawing, and two pouring water on the saws. The work was done

from the inside on the original scaffolding, which had not been removed. Holes were first punched through the sides to admit the saws, which were wrought alternately in each direction at the same joint on the opposite side the inclination, so that the chimney was brought back in a slightly oscillating manner. This was done at twelve different heights, and the men discovered when they were gaining by the saws getting tightened by the superincumbent weight.

Megantic Railway.

A contract has been signed for the construction of that portion of the Lake Megantic Railway line from Moosehead Lake to the Canadian boundary. Fifty miles of the road from Sherbrooke, stretching east, will be opened this year, and the remaining portion of the American line is provided for. The new contract will, therefore, fill the remaining portion of the gap, except about eighteen miles from the Piscataquis road to the above named lake, which portion, no doubt, can be easily built by the Piscataquis Company. This road, when completed, will shorten the distance from the Maritime Provinces to Montreal, as compared with present routes, 118 miles.

REMOVAL.

The Standard Office has been removed to Mr. John Bailey's Building, Water Street, opposite Mr. Wm. Bradley's store. Entrance from side door.

The Standard.

SAINT ANDREWS, MAY 12, 1875.

Annexation Mania.

Our neighbors over the Border still hanker after a union with Canada, notwithstanding their assertions to the contrary. They appear to have periodic attacks of annexation fever. An article in the Morning Chronicle published in Washington states, that this long-wished-for union, is to be consummated on July 4, 1876. Our readers will no doubt be surprised to hear this startling news, but they will make due allowance when they know that it is a political dodge. We have only space for the following extracts:—

"A convention to take into consideration the best means for the speedy union of the United States and the Canadian Dominion will assemble in Buffalo, N. Y., on July 4th, 1875. Three delegates from each Congressional District in the United States, and three delegates from each Parliamentary District in the British Provinces will compose the Convention."

"To encourage, increase, and consolidate the friends of this union into active co-operation will be the purpose of the Convention. It is believed that the time for such union is exceedingly opportune, and through this Convention arrangements may be inaugurated by which it may be effected on the 4th July, 1876, the Great American Centennial."

STEAM COMMUNICATION.—The question is frequently asked, "Is there to be direct steam communication between the Border ports and St. John?" The subsidy offered to the St. George steam tug to run between St. George and St. Andrews and connect with the International Steamers at Eastport has not yet been accepted, and the arrangement with the St. George to run once a week to Grand Manan has not yet been effected, but it is hoped that matters will be settled within a few days, and that St. George and St. Andrews will have direct steam connection with the International Steamers, and the Islands a weekly steamer to the main land. The Hon. Mr. Gillmor is striving hard to effect these objects, and the Hon. Surveyor General is also lending his aid for that purpose.

THE WATCHMAN of the 8th inst., the second issue, is a splendid number—its contents are varied, instructive and interesting, requiring great labor, diligent research, and an intimate knowledge of public affairs, with a large amount of ability to produce. The printing also is excellent, and reflects much credit upon the publishers, Messrs. McKillop & Johnson. Subscription \$2 per annum. As intimated last week, Mr. John Livingston is editor and proprietor.

The emigration fever for the "land of gold" continues unabated. Some of the best young men, whom the County can ill afford to spare, have gone, and others will follow next week. Can no inducement be held out to the bone and sinew of the country to remain in the Province? They complain of want of employment, and urge this as their motive for leaving their native country.

The Martha A. is now loaded and ready for sea. As noticed last fall in these columns, the vessel which had been wrecked at L'Etang with a load of hard coal, was purchased by the present owners—Messrs. R. & J. Glass and R. McQuoid, towed here and repaired, and is now as staunch and sea worthy as she was a year ago. Our young friend Capt. R. Glass is master.

The Advance man of Chatham, has a vein of humor running even through his philippics. His latest is on a recent event; the introduction being headed "Another Goner." He does not state where to, but leaves his readers to imagine whatever they please—a state of bliss, or an elysian shore. It is a new way of announcing the dying of "this silly world which binds two willing hearts."

HOTEL IMPROVEMENTS.—Morrison's Hotel has recently undergone several improvements and additions, having been newly painted and papered, and fitted up for the reception of summer visitors. The rooms are large, well ventilated, and furnished, and the arrangements of the bed rooms are such, that families can be together in a suit of apartments to themselves. The larder is well supplied, this however need hardly be said, as all who have visited the house once are sure to return to it again. The large dining hall has been greatly improved, and indeed the House, which is located in one of the most pleasant parts of the Town, is a desirable retreat for families or others, who can enjoy the pure air of St. Andrews, with sea bathing, boating or fishing. No efforts will be spared on the part of the host and hostess to make their house and its surroundings agreeable. Attached to the premises is a bar where those who require, will be furnished with choice liquors. A large and well adapted Stable has been lately built, with excellent stalls, and an ample supply of hay and grain; the coach house is also arranged for the reception of waggons, &c. Mr. Morrison's Card may be seen in our advertising columns.

Mr. Clark has removed to his house on Queen Street, in rear of his former Hotel, which was destroyed by fire last July.

The Central Exchange, R. Adams, is also being fitted up.

The Passamaquoddy House, Mrs. MacLeod's, is being prepared for summer tourists, and the general landlady is ready to wait upon old and new customers.

Mr. Kennedy has also enlarged and increased his hotel accommodation, and will be able to entertain a large number of visitors.

Miss Ellen Rogers, has been appointed teacher of the Primary School, her mother having resigned that position.

Death of F. A. Morrison, Esq.

A telegram was received this morning, of the sudden death from erysipelas, of F. A. Morrison, Esq., at St. John, last evening. He was confined to his bed from Saturday last, and was attended by Dr. Berryman and Dr. Bayard, but was not considered in danger until last evening, when he began to sink and expired at half past eleven. He was senior member of the law firm of Messrs. Morrison & King, a rising member of the bar and leading counsel. Mr. Morrison was a native of St. Andrews, where he leaves four sisters to lament the loss of an affectionate brother. His remains are to arrive here tomorrow, and it is expected the funeral will take place on Saturday afternoon.

The Despatches announce the loss of another steamer the "Schilla," bound from N. York for Hamburg—wrecked off Seilly Isle, on the night of the 7th inst., in a thick fog. Two hundred passengers are supposed to be lost. Five passengers and two of the crew are reported saved.

ST. JOHN PACKET.—The schr. Charity, Capt. King, continues to make weekly trips between St. John, St. Andrews and St. Stephen. During the winter, with the exception of the cold snap when the Bay was so full of ice the Charity arrived regularly.

STRIKES appear to be the order of the day among misguided men in several cities and manufacturing districts. Notwithstanding high wages, while the times are so dull, still these men persist in a course which must result to their injury. In St. John another Society (the Riggers) struck on Friday last, sympathizing with the Laborers' Association. Advice from the City inform us that "no more men are wanted as there are sufficient to perform all the work required." The merchants and mill owners have won the day—capital and fair wages have triumphed.

The farmers are busy sowing and planting the ground however is still cold, and vegetation backward. We understand that a large breadth of land will be sown in wheat in some districts of this and the Parish of St. Croix.

The Polynesian which was detained in the ice for twelve days, has arrived at Quebec, and will sail next week for England. This is the steamship Lord Dufferin and family had taken passage in.

T. T. Odell, Esq., went West, by rail, on Monday last.

Rev. Mr. POLLOCK, who has been in Scotland for the past few years, has accepted a Professorship in the Presbyterian College, Halifax. The Rev. gentleman is a brother-in-law of the Rev. J. R. Cameron, of St. John.

(From the Tribune, May 7.)
A POSTAL GRIEVANCE.—In justice to our venerable brother of the Standard, we must explain that he is not, as Mr. Campbell's letter assumes, the author of a recent communication in the TRIBUNE.

NEW FIRM.—It will be noticed that the firm of J. W. Street & Co., has been dissolved, and that a new firm has been formed by the surviving partner Mr. Forster and Mr. T. H. Street, under the style and firm of "Street & Company," who will continue the business.

A Congregational meeting is to be held in the Scotch Church, on Friday evening as

half past seven, to moderate a call to the Rev. Mr. CLARK.

NEW PROCESS OF DENTAL SURGERY.—Mr. Napier, an English dentist, announces what he considers to be something new in dental surgery, especially in a case where the teeth were extremely sensitive, and it became necessary to file them down for the purpose of introducing artificial teeth on the stumps. For the sake of avoiding pain in the operation as far as possible, ether spray was first made use of in reducing the sensibility of the teeth; a piece of cotton, dipped in ether, and laid first on the teeth and then on the instrument, being found to answer a still better purpose. While engaged in this operation it occurred to Mr. Napier to avoid the usual practice of dentists (of extirpating the nerve), with which object he took a bit of hard wood, dipping it in nitric acid, and with this cauterizing the exposed portion of the nerve in each tooth successively. He then filed the teeth down to the level of the gums without producing any pain whatever. He found that in this way the stump of the tooth remained perfectly healthy, giving no pain of any kind; and the subsequent experiences of the patients were of the most satisfactory character.

IMITATING ENAMEL ON IRON.—F. W. Oliver's process consists in producing on iron various designs of different colors, and imitating vitreous enamel in the following manner: A crystalline appearance is given to tinned iron by means of a mixture of water and sulphuric and nitric acids, applied thereon, and afterwards washed off. An impression of a design is made on suitable transfer paper, on which coatings of solid white and silver bronze dust and colors are applied. The plate, prepared as above, is coated with a mixture of turpentine and copal varnish: it is then heated, and the design transferred thereon in the usual way, and the plate is baked and polished.

A DANCE ON THE BANKS.—The vessels fishing on the Grand Banks have been troubled, this season, by fields of ice. On St. Patrick's day, a number of vessels being caught in the ice near the shore, the men had a grand dance on the ice field, which extended as far as the eye could reach.

We have much pleasure in copying the following paragraph, and join in congratulating our friend on his preference: The Rev. Geo. J. CAIE was, on the 19th ult., elected assistant and successor of the Rev. Dr. Stevenson of Forfar, Scotland. Mr. Caie had been officiating in the congregation for some time. This is one of the six largest and best parishes in Scotland, having respect to emoluments. In regard to number this church has 2,772 communicants, the largest roll in Scotland. We may heartily congratulate Mr. Caie on his settlement. His health continues good.—Tel.

Daily and Weekly Tribune.

We have made arrangements, under the new postal law, for preparing THE TRIBUNE to all of its subscribers and the Daily will, hereafter, be sent for \$5, and the weekly for \$1, per annum, post paid.

THE WEEKLY TRIBUNE is a large 32 column paper, 28 of its columns being devoted exclusively to reading matter. It gives all the telegraphic news of the week, carefully condensed summaries of local events, independent discussions of live social and political questions, shipping news, stories, poetry, and spicy paragraphs on men and things. It gives twice as much reading matter as any other daily paper in the Province.—Tribune, May 8.

GAMBLING IN HIGH LIFE.—Some little excitement is going on in London about a vice which threatens to become a fashion in the highest circles of society. Ladies of high rank and great wealth, for lack of something better to do, have set the example of gambling at cards for large stakes, and in one or two apparently decorous drawing rooms sums of money of an appalling amount have changed owners. Scandal whispers that a nobleman of high rank has been obliged to sell estates which have been in the family for centuries in order to clear himself of the difficulties in which his wife had involved him by her passion for gambling. The Dutchesse of Manchester is said to have lost £140,000 sterling.—Chicago Tribune.

Signor Wandanna, performing in connection with Gibb's Zoological Exhibition and Variety Entertainment, while engaged in executing his marvellous feats of sword and bayonet sawing, at Pike's Opera House, Tuesday evening, accidentally cut himself internally and is now under medical treatment. Inflammation has resulted, but the physicians think that with proper care he will recover in a few days.

A BEAR HUNT.—William Dumphy and Charles L. Harrison, of Athol, left home on the 26th ult., for the purpose of gathering cranberries. Shortly after entering the woods near H. W. Baker's they discovered what appeared to be the winter residence of a bear, and upon close examination the party found the old bear and her family "at home." Dumphy volunteered to stand sentry, while Harrison left for the village for help and firearms. Having procured assistance, one of the party, whose bump of caution was largely developed, thought it prudent to go into the contemplated fight fully prepared and before starting back noticed and obtained the company of the

resident physician. Returning to the spot the party found Dumphy and the bears each anxiously contemplating the situation. A shot from the gun, skillfully handled by Dumphy, despatched the old bear. The two cubs were captured alive, and are now in possession of Dr. Hodgson and W. O. Elderkin.—Amherst Gazette.

ROGERS, the murderer of Seely, was arrested at Masquah on Monday last, by Chief of Police and assistants, and is now safely lodged in St. John jail.

A THWIFTING CURT.—The Ottawa Free Press says: "Toronto furnishes a striking instance of what an enterprising spirit in promoting railway enterprises will do for a community. It is but a few years since the Credit Valley, Toronto, Grey and Bruce Northern Extension and Nipissing Railways were mooted, and within the last few years the energy and prudent liberality of the people of Toronto have carried all these schemes into effect. In 1872 the total assessment of the city of Toronto was \$32,000,000. The extraordinary impetus given to business, the increase of population, and to the value of property, and to the production of wealth, by the promotion of railway enterprises, is shown by the fact that the assessment of Toronto for 1875 shows \$46,680,347, an increase in three years of fourteen millions and a half of dollars. The annual debt incurred by the issue of debentures for aid to these railways is now fully met by the special rate upon the increase of the assessment alone. The lesson is one which can be advantageously studied by the citizens of Ottawa."

India-rubber sidewalks are coming into fashion out West. For small towns they are admirable—combining economy and durability. The first experiment was made in Danville, Iowa, where three hundred yards were put down on one of the principal streets. All the boys in the place ran over it, but there was no noise. A leading merchant stopped in front of his house, and then jumped for his horse. The elastic forces hidden in the rubber threw him over the gate to the roof of the piazza. But after a few trials he was able to alight on the steps with the graceful accuracy of a flying squirrel.

It is proposed by some of the leading philanthropists of Nova Scotia, to elect an inebriate asylum in that province. Would it not be well for all who feel interested in such a movement, to advocate the erection of a Maritime Inebriate Asylum. Who will deny that such an institution is the greatest need of the hour.

HARD TO BEAT.—The Amherst Sentinel says that Mr. Andrew Cotter, of Middleboro' in this county, a short time ago, sold to Mr. Thomas Vaunton, butcher of Chatham, N. B., a pair of oxen, 6 years old, weighing 4,700 lbs. This is probably the finest pair of oxen raised within the province during the period.

The two principal hotels in Chatham are now, and have been for some time past, conducted on the temperance plan, no liquors being kept in connection with them. Liquor can be obtained, though, in the town.

Ballasting on section 10 of the I. C. R. commenced on Monday last. There is one locomotive at work just now, but two more will likely be at work in a week.—Advocate.

The meeting of the British Social Science Association will be held at Brighton in October next, and there will be an exhibition of appliances and apparatus relating to the sanitary and educational systems.

WANTED.—Information of THOMAS GEORGE, who resided at Chamcook about 26 years ago, and is supposed to have removed to Richibucto, or perhaps Nova Scotia. By communicating with the Editor of this paper (St. Andrews Standard), he will hear of something to his advantage.

Is ELIZABETH HANCOCK, a native of Ashburton, England, who worked in St. Andrews nearly forty years ago, will send his address to the Standard Office, he will receive information of interest to him.

RE-ARRANGED.—At St. John, on the 10th inst., by the Rev. Howard Sprague, A. M., John Spence, of Portland, to Nellie A. Townshend, daughter of Mr. John Townshend, of Chamcook, parish of St. Andrews.

Friday, 16th day of January, 1875.

PRESIDENT:
HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

WHEREAS it has been represented that large importations of Coal Oils are continually taking place in various ports in the Dominion, and that many of which will not stand the fire test required by the Inland Revenue Act, 1868, and amendments thereto; also that large importations of certain products of Petroleum, such as Gasoline, Benzine and Benzole, are being made, such articles being very explosive at a very low temperature.

His Excellency, on the recommendation of the Honorable the Minister of Customs, and under the provisions of the 17th section of the Act passed in the session of the Parliament of Canada, held in the 31st year of Her Majesty's reign, chapter 69, and entitled "An Act to increase the excise duty on spirits, to impose an excise duty on refined Petroleum, and to provide for the inspection thereof," has been pleased to order, and it is hereby ordered, that with a view of the better regulation of the foreign Petroleum trade and the security of the lives and property of Her Majesty's subjects, the following regulations be and they are hereby adopted and established, that is to say:—

1. From and after the date thereof, the officers appointed to gauge and test spirituous liquors, wines, &c., at the respective ports of Toronto and Hamilton, in Ontario; the port of Quebec in Quebec; the port of St. John in New Brunswick; and the port of Halifax, in Nova Scotia, shall be and they are hereby appointed inspectors of imported refined Petroleum at those Ports respectively; and that the respective Collectors of Customs at all other ports and outposts in Canada shall be and they are hereby appointed inspectors of imported refined Petroleum at their respective ports; and that they shall consider competent for that purpose.

2. That the instrument to be used, for testing all imported refined Petroleum shall be the "Coal Oil Pyrometer," made by Charles Potter, Toronto, Ontario, and all such Petroleum as will not stand the fire test of 106 degrees, as required by section 2 of chapter 15, of 24 Victoria, when used according to the instructions accompanying the same shall be dealt with as may be ordered by the Minister of Customs in each case.

3. That every package of imported refined Petroleum, imported as before provided, shall be legibly marked or stamped in such manner as the Minister of Customs may direct.

4. That no imported refined Petroleum, which will not stand the said test, whether designated as "Coal Oil," "Naphtha," "Benzine," "Benzole," "Paraffine," or other oil or fluid, shall be manufactured or produced by any process or treatment whatever, shall be admitted to entry for consumption or Warehouse in Canada, unless the importer shall have procured a license from a Collector or other proper Officer of Inland Revenue, authorizing him to import and keep the same on hand.

Representative and Champion of American Art Taste.
PROSPERITY FOR 1875—EIGHTH YEAR.

THE ALDINE,
THE ART JOURNAL OF AMERICA,
ISSUED MONTHLY.
"A MAGNIFICENT CONCEPTION, WONDERFULLY CARRIED OUT."

The necessity of a popular medium for the representation of the productions of our great artists, has always been recognized, and many attempts have been made to meet the want. The successive failures, which, so invariably followed each attempt in this country to establish an art journal, did not prove the indifference of the people of America to the claims of high art. So soon as a proper appreciation of the want and an ability to meet it were shown, the public at once rallied with enthusiasm to its support, and the result was a great artistic and commercial triumph—THE ALDINE.

THE ALDINE, while issued with all the regularity, has none of the temporary or timely interest characteristic of ordinary periodicals. It is an elegant miscellany of pure, light, and practical literature; and a collection of pictures, the most specimens of artistic skill, in black and white. Although each succeeding number affords a fresh pleasure to its friends, the real value and beauty of THE ALDINE will be most appreciated after it is bound up at the end of the year. While other publications may claim superior cheapness, as compared with rivals of a similar class, THE ALDINE is a unique and original conception—alone and unapproached—absolutely without competition in price or character. The possessor of a complete volume can not duplicate the quantity of fine paper and engravings in any other shape or number of volumes for ten times its cost; and then, there is the chronic, besides!

The national feature of THE ALDINE must be taken in no narrow sense. The art is cosmopolitan. While THE ALDINE is a strictly American institution, it does not confine itself entirely to the reproduction of native art. Its mission is to cultivate a broad and appreciative art taste, one that will discriminate only on grounds of intrinsic merit. Thus, while placing before the patrons of THE ALDINE, as a leading characteristic, the productions of the most noted American artists, attention will always be given to specimens from foreign masters.

The artistic illustration of American scenery, original with THE ALDINE, is an important feature, and its magnificent plates are of a size more appropriate to the satisfactory treatment of details than can be afforded by any inferior page. The judicious interposition of landscape, marine, figure, and animal subjects, sustain an unabated interest, impossible where the scope of the work confines the artist too closely to a single style of subject. The literature of THE ALDINE is a light and graceful accompaniment, worthy of the artistic features, with only such technical discussions as do not interfere with the popular interest of the work.

PREMIUM FOR 1875.
Every subscriber for 1875 will receive a beautiful portrait, in all colors, of the same noble dog whose picture in a former issue attracted so much attention.

"MAN'S UNSELFISH FRIEND"
will be welcome in every home. Everybody loves such a dog, and the portrait is executed so true to the life, that it seems the veritable presence of the animal itself.

Besides the chronic, every advance subscriber to THE ALDINE for 1875 is constituted a member, and entitled to all the privileges of THE ALDINE ART UNION.

The Union owns the originals of all THE ALDINE pictures, which, with other paintings and engravings, are to be distributed among the members. To every series of 5,000 subscribers, 100 different pictures, valued at over \$2,500 are distributed as soon as the series is full, and the awards of each series as made, are to be published in the next succeeding issue of THE ALDINE. This feature only applies to subscribers who pay for one year in advance. Full particulars in circular sent on application enclosing a stamp.

TERMS.
ONE SUBSCRIPTION ENTITLING TO THE ALDINE ONE YEAR, THE CHRONIC AND THE ART UNION,
\$6 per annum in advance.
(No charge for postage.)
SPECIMEN COPIES OF THE ALDINE, 50 CENTS.

THE ALDINE will, hereafter, be obtainable by subscription. There will be no reduced or club rates; cash for subscription must be sent to the publishers direct, or handed to the local canvasser, without responsibility to the publishers, except in cases where the certificate is given, bearing the fac simile signature of James Sutton, President.

CANVASSERS WANTED.
Any person wishing to act permanently as a local canvasser will receive full and prompt information by applying to

Dr. J. Walker's California Vinegar Bitters are a purely Vegetable preparation, made chiefly from the native herbs found on the lower slopes of the Sierra Nevada mountains of California. The medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked, "What is the cause of the unparalleled success of Walker's Bitters?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease man is heir to. They are a gentle Purgative, as well as a Tonic, relieving Congestion or Inflammation of the Liver and Visceral Organs, in Bilious Diseases.

If men will enjoy good health, let them use VINEGAR BITTERS as a medicine, and avoid the use of alcoholic stimulants in every form.

E. E. McDONALD & CO.,
Druggists and General Agents, San Francisco, California, and cor. Washington and Chatham Sts., New York.

No Person can take these Bitters according to directions, and remain long unwell, provided their bones are not destroyed by mineral poison or other means, and vital organs wasted beyond repair.

Grateful Thousands proclaim VINEGAR BITTERS the most wonderful Invigorant that ever sustained the sinking system.

Bilious, Remittent, and Intermittent Fevers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississippi, Ohio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Brazos, Rio Grande, Pearl, Alabama, Mobile, Savannah, Roanoke, James, and many others, with their tributaries, throughout our entire country during the Summer and Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive derangements of the stomach and liver, and other abdominal viscera. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to Dr. J. Walker's Vinegar Bitters, as they will speedily remove the dark-colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

Dyspepsia or Indigestion, Headache, Pain in the Shoulders, Congestive Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad Taste in the Mouth, Bilious Attacks, Palpitation of the Heart, Inflammation of the Lungs, Pain in the region of the Kidneys, and a hundred other painful symptoms, are the offspring of Dyspepsia. One bottle will prove a better guarantee of its merits than a lengthy advertisement.

Serofia, or King's Evil, White Swelling, Ulcers, Erysipelas, Swelled Neck, Goitre, Scrofulous Inflammations, Indolent Inflammations, Mercurial Affections, Old Sores, Eruptions of the Skin, Sore Eyes, &c., &c. In these, as in all other constitutional Diseases, WALKER'S VINEGAR BITTERS have shown their great curative powers in the most obstinate and intractable cases.

For Inflammatory and Chronic Rheumatism, Gout, Bilious, Remittent and Intermittent Fevers, Diseases of the Blood, Liver, Kidneys, and Bladder, these Bitters have no equal. Such Diseases are caused by Vitiated Blood.

Mechanical Diseases.—Persons engaged in Painting and Miners, such as Plumbers, Type-setters, Gold-beaters, and Miners, as they advance in life, are subject to "paralysis of the Bowels." To guard against this, take a dose of WALKER'S VINEGAR BITTERS occasionally.

For Skin Diseases, Eruptions, Tetor, Salt Rheum, Boils, Spots, Pimples, Pus-tules, Bells, Carbuncles, Ringworms, Scald Head, Sore Eyes, Erysipelas, Itch, Scurfs, Discolorations of the Skin, Humors, and Diseases of the Skin of whatever name or nature, are literally dug up and carried out of the system in a short time by the use of these Bitters.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. No system of medicine, no vermifuge, no cathartic, will free the system from worms like these Bitters.

For Female Complaints, in young or old, married or single, at the dawn of womanhood or the turn of life, these Tonic Bitters display so decided an influence that improvement is soon perceptible.

Jaundice.—In all cases of jaundice, rest assured that your liver is not doing its work. The only sensible treatment is to promote the secretion of the bile and favor its removal. For this purpose use VINEGAR BITTERS.

Cleanse the Vitiated Blood whenever you find its impurities bursting through the skin in Pimples, Eruptions, or Sores; cleanse it when you find it obstructed and sluggish in the veins; cleanse it when it is foul; your feelings will tell you when. Keep the blood pure, and the health of the system will follow.
