CALL OF THE WEST.

The growth of Western Canada and the free trade demands from the farmers to Sir Wilfrid Laurier bring into prominence the question of Canadian tariff reform. To complicate the situation are the proposed revision of the United States tariff in the near future and the call by Imperialists for a larger British preference. Canada will arrange its tariff to suit first its best interests, with the next thought for trade within the British Empire. "Punch" has a cartoon this week representing Sir Wilfrid Laurier as a moth flitting over a wheat field under the beams of a free trade star, and remarking: "Well, after all, it is a long way off. There is no risk of singeing my wings just yet." This seems to express the situation.

As is the case in most countries, the manufacturers of Canada, representing an enormous sum of invested capital, have helped largely to frame the economic policy of Canada. At the annual meeting of the Canadian Manufacturers' Association in Halifax in 1902 the association resolved that under the changed conditions obtaining in Canada a thorough revision of the tariff was necessary, "upon lines which more effectually transfer to the workshops of our Dominion the manufacture of many of the goods which we now import from other countries." In any such revision it was declared that the interest of all sections of the community, whether of agriculture, mining, fishing or manufacturing, should be fully considered with a view, not only to the preservation, but to the further development of all these great national industries. Further, that while such a tariff should primarily be framed for Canadian interests, it should nevertheless give a substantial preference to the Mother Country, and also to any other part of the British Empire with which reciprocal preferential trade can be Canadian conditions, based in principle upon, and ap-

arranged, recognizing always that under any conditions the minimum tariff must afford adequate protection to all Canadian producers. This resolution was reaffirmed at the annual meeting in 1903, with three important additions: "(1) That, except in very special cases, we are opposed to the granting of bounties in Canada as a substitute for a policy of reasonable and permanent pro-(2) That we are strongly opposed to any recitection. procity treaty with the United States affecting the manufacturing industries of Canada. (3) We recommend that the Dominion Government establish in Canada a permanent tariff commission of experts, who shall have constant supervision of tariff policy and changes, The annual conventions of the association in 1904 and 1905 reaffirmed the resolution of 1902 thus expanded, and it probably represents to-day the sentiment of the great body of Canadian manufacturers, including Americans, who have established industries in Canada.

But the farmers of the Canadian North-West have declared themselves as a force. Instead of being opposed to reciprocity with the United States, they are in favor of it; instead of accepting protection as a help to the development of Canada, they are disposed to regard it as a hindrance, to the West anyway. To illustrate how sharply opposed are the economic views of the farmers to those of the manufacturers, the fact may be recalled that the latter have steadily insisted that the policy of the age is protection to home industries and enterprises, and that as far as the home market of Canada is concerned it is necessary to adopt the same measures as the rival of Canada, and in adopting them to make them thoroughly efficient. The theory on which an immediate revision of the Canadian customs tariff was demanded in 1903 was that it should be framed especially to meet

3

proximating to, that in force in the United States, "a tariff that shall protect Canadian interests and pursuits as efficiently as the tariff of the United States protects the then president of the association made substantially the following declaration in 1965: "Any other basis would be injurious to Canada, and not only injurious to Canada, but for that very reason detrimental to the ultimate progress of the Empire. We want to make in Canada everything that we possibly can, and what we must import we want to purchase from our own family rather than from strangers. Most significant of all, from the manufacturers' point of view, was the evidence that their principles had numerous Several Canadian exhibition authorities have asked adherents in the agricultural West. When the Canadian Mr. Theodore Roosevelt to act as opening day attraction. Tariff Commission was in session at Winnipeg, a deputation of about thirty members of the Winnipeg branch of the association appeared before the Commissioners to express their belief in a reasonable increase in the gen-eral protective tariff "as a means of building up varied industries in Canada, affording employment for all classes of our citizens and creating a home market for our farmers, while at the same time giving a preference to goods of British manufacture."

From Manitoba, Saskatchewan and Alberta to-day a demand from the farmers has arisen that the manufacturing interests shall be accorded only such protection tion. He was told by the president of the New York as a revenue will allow and no more. Speaking for the agricultural interests of Western Canada, those who signed the Manitoba memorial stated :-

"The Western farmers will watch with intense interest the negotiations between the United States Gov- regard Mr. Roosevelt's wishes, he explicitly urged that ernment and our Government regarding reciprocal trade, the former President's wishes be learned and consulted, and strongly urge that everything consistent with na- and when he learned from the vice-president of a plan to tional honor to secure such a measure should be done." oppose Mr. Roosevelt, he "peremptorily declined to be This is in striking contrast with the Winnipeg memorial drawn into a fight with Mr. Roosevelt, and again renewed of 1905, which was the work of the Manitoba vice-president of the Manufacturers' Association. He referred to the mistaken notion in the East that the West must always be a purely agricultural community. It was his though Roosevelt is, to a large extent, still pulling the belief and that of his associates that the natural re-sources of the West are such that it may have interests as varied as those of the East. He admitted that it would take time to establish them, but he was quite confident that the higher the tariff against the United States is made the more quickly will industries of all kinds be established in the West. Then followed this: "We believe that the people in the Canadian West should do their own manufacturing so far as possible; but when we cannot get what we want right here at home we think that our fellow-Canadians in Eastern Canada, who are helping us in building up and developing the West, should get a preference over all outsiders." This tariff history is regarded by the United States

press as an entire change of desire. One New York contemporary' thinks that experience of the policy of the West buying first from Eastern Canada, then from Great Britain and then from foreign countries has not commended itself to the farming community who are creating the wealth of the Canadian West. These writers overlook the fact that our prairie provinces are people by several hundreds of thousands of former American farmers. Although they have become Canadian citizens, they have a most natural desire to trade with their actual relatives. American sentiment is not an unimportant factor in the Western call for free trade and reciprocity with the United States.

The West is primarily a wheat and grain-growing country. While manufacturing industries will, in due course be established at points west of Winnipeg, the three prairie provinces can never become a manufac-turing centre. It will always be East and West-manufactures and agriculture. One of the chief reasons for

commodities. Freight rates have perhaps an equally important bearing on prices as have tariffs. With a proper control and adjustment of rates, with more rapid delivery the industries of that country." In reply to the criticism from Eastern manufacturer to Western consumer, it is that the principles of the association lacked sincerity in likely that the free trade cry in the West may not be advocating preferential trade on the basis that the mini- so loud. Protection is avowedly for the protection of a mum tariff should be protective to Canadian industries, country's industries. The policy of the present government seems to be a gradual lessening of protective tariffs until one day possibly the manufacturing interests of Canada will be able to swim unassisted and yet prove equal to competitive tides. Therefore, it looks, as "Punch" says, that Sir Wilfrid Laurier's wings will not be singed yet.

EXHIBITIONS AND POLITICS.

Recent events in New York city show that he has much to occupy his attention without crossing the international boundary line for engagements. The Republican State committee, by a vote of twenty to fifteen, refused to recommend him for temporary chairman of the State convention which will meet at Saratoga next month. Although Mr. Roosevelt especially endorsed a certain bill, the legislature refused to pass it. These two incidents have drawn the ex-President from the onlookers' stand into the fighting arena. As an example of political strength, comes a declaration of President Taft's posi-County Republican committee that the absence of any authoritative information as to his attitude, was seriously misleading many Republicans. President Taft, in his letter of reply, declared that, so far from desiring to dismy urgent advice that there be a personal conference with him."

If this is actually a Taft statement, it looks as strings at Washington. Shortly prior to the next Presidential election, the drama will probably be written and the stage settings arranged in order that Roosevelt may enter, almost unannounced and flourishing the proverbial big stick. To close observers, the possibility of the big game hunter again dictating policies at White House seems by no means remote. Roosevelt as President was almost ruthlessly aggressive, although he carried a goodly bottle of political soothing syrup for later application. Taft has been anxious to please nearly everybody with the result that that extreme diplomacy has been cultivated, apparently obliterating prominent points of character. The contrast between the two men may decide Roosevelt's fate should he again become a candidate for the Presidency.

His career has been remarkable. It is the more so when one analyses his actual deeds. As chief of the New York police, and later as mayor of the city, none of his accomplishments would entitle his name being added to a legitimate roll of fame. His expedition with the roughriders tickled the popular fancy. As President of, the United States, his campaign against trusts and combines made him the man of the day, but in reality there was more noise than action. Roosevelt has not made a name for himself by any great contribution to science, art or literature. His aggressiveness, outspokenness, untrammeled originality and ruthlessness have made him the centre of a crowd of sycophants. Possibly he represents the spirit of the United States. His reception in Europe might at first sight disprove that. But Roosevelt was accepted abroad on the American rather than the European standard. Had he been taken overseas on the European standard, the daily press might have given him the farmers' demand for free trade is the high price of two lines instead of two columns, while his head would

not have been far above the crowd of Americans always touring Great Britain and the Continent. But Roosevelt, family to learn English; salary no object." This adverwith his wonderful news instinct, knows what to do and tisement in a Toronto paper may be an indication of how how to do it in order to get two columns on the front page. He knows how to push above the crowd of citizens. This ingenuity and an unusually determined character have moulded success. These attributes will probably give him a third term as President.

FIRE INSURANCE IN BRITISH COLUMBIA

The fire insurance commission recently appointed in British Columbia has presented its report to the provincial government. It was generally recognized that fire insurance matters in our Pacific Coast province were somewhat lax. The commission recommends the creation of an insurance department, which, if properly conducted, should [plation. do much to overcome the difficulties which have occurred in the past. One of the most involved problems for solution was the question of insurance with unlicensed companies. As is known, during the recent discussion in par-liamentary committees respecting the Dominion's new insurance Act, lengthy argument occurred on this particular point. The result was that insurers were per-mitted to insure freely in whatever companies they desired. Unlicensed companies were told that they must not solicit business in Canada. Making the usual allow- well shaken before taken. ances for human nature and the law, this practically means that unlicensed companies will continue to do business as heretofore. Aside from all other considerations, an eminently unfair feature is that certain companies may enjoy the privileges of the underwriting field without being subject to the penalties and without contributing one cent to the up-keep of the insurance department at Ottawa. Neither do they make investments in Canadian securities nor hold real estate in the shape of office buildings in Canada.

No doubt the British Columbia insurance commission was to some extent guided by the decision last year of the Dominion Government. It recommends that no unlicensed company or association of underwriters or their representatives should be permitted to solicit fire insurance in British Columbia. It also ecommends that all insurers shall be permitted to place their insurance freely with such unlicensed companies or associations of under-writers, including mutuals and Lloyds, and that they should have the right to obtain inspection of their risks and adjustment of their losses, upon obtaining a license for that purpose.

The Monetary Times cannot yet see the logic of such legislation. The law says that before a company may write fire insurance it must obtain a government license. Then, in direct opposition, the law explains how an unlicensed company may do business in the province. Eritish Columbia has lost an opportunity of setting an example in legislation making. At present, perhaps, the results of the invasion of Canada by unlicensed fire' companies are not sufficient to indicate their serious nature. When the country is more thickly populated and development has proceeded further, many unpleasant and unprofitable incidents are likely to occur as the result of the reckless operations of these companies. British Columbia has at least made a step in the right direction by the creation of an insurance department, an example which might well be followed by other Western provinces.

EDITORIAL NOTES.

The proposed British Columbia fish trust will probably turn the economic scales.

Farmers of Whitemouth, Manitoba, have successfully dispatched two bears with rifles and pitchforks. It is understood that their next encounter will take place on the Montreal Stock Exchange.

"Japanese boy wishes housework position in private Japan will solve the American Asiatic problem.

The loan clause of the average life insurance policy is an admirable feature, but it is likely that those who are using it in order to purchase automobiles, as reported by a Montreal insurance man, will later regret borrowing to buy luxuries.

* * * *

The farmers of the West are calling for governmentowned railways. The average cabinet minister cannot grow wheat, and the average government cannot successfully operate a railroad. So long as we have enterprising corporations running freight trains, with a proper control of rates, the government road may remain in contem-

Imaginative Western reporters have compounded a mixture of five British nobles, an English member of parliament, some mysterious silence and a little prairie optimism. The result is a fourth transcontinental railroad for Canada. his bottle should be placed on a shelf until the Canadian Northern stretches from coast to coast and the Grand Trunk Pacific is carrying sufficient freight to pay its interest charges. Lastly, the mixture should be

Three gentlemen, closely identified with various Canadian steel interests, are in England. This has led to a rumor that there may be arranged an amalgamation of the Dominion Steel Corporation and the new Canada Steel Corporation. The Monetary Times several months ago suggested the consummation, perhaps in the distant future, of a large Canadian steel merger. Such an event is naturally denied by those chiefly interested, and possibly it has as yet found little room in their thoughts. The industrial tendency of the present day i s towards combination. With increasing competition and growing markets, a consolidation of our steel companies in due course is not unlikely.

* * * *

The article in last week's Monetary Times regarding the investment of foreign capital in Canada, contained the following statement as to the disposition of Canadian Pacific stock: "Nearly all of our four per cent. perpetual. debenture stock and of our four per cent. preference stock is held in Great Britain. Of the common stock, holders in Great Britain have approximately sixty-five per cent. About fifteen per cent. is held on the continent and the remaining twenty per cent. is divided evenly between Canada and the United States." A New York contemporary says that the calculation that sixty-five per cent. of all the outstanding capital stock of this road is held in Great Britain and only ten per cent. by Canadian investors, is probably accurate. The statement was obtained by The Monetary Times from Mr. Shaughnessy, president of the road, and its accuracy is, therefore, indisputable. The figures suggest to the New York critic the extent to which Canadians have relied upon foreign capital to finance their expansion, and the small amount of capital they have been able to find for themselves. In the last few months the disinclination of the English investor to produce new capital as rapidly as it has been asked for has caused some anxiety in the Canadian money markets. This disinclination affects not so much Canadian Pacific securities (if it affects them at all) as the output of miscellaneous Canadian securities, the recent supply of which on the English market has been enor-mous. Very few Canadian undertakings have the capacity of the Canadian Pacific Railway to make new capital at once and continuously productive. The inevitable number of inferior promotions has followed the good ones to Great Britain during the recent "boom in Canadians," and that is perhaps the whole trouble.

REGISTERED STOCKS OR BEARER SECURITIES.

London Financial Houses Give The Monetary Times Their Views on this Subject, an Important One in View of Canada's Many Monetary Pilgrimages.

The issue in London in June of £453,600 four per cents. of the city of Vancouver was only partially successful. The stock was registered instead of to bearer, and this being stock was registered instead of to bearer, and this being somewhat of an experiment with Canadian municipal securi-ties overseas, there was a susposition in some quarters to ascribe the comparatively peor reception of the loan to that fact. A London contemporary, for instance, in analysing the result of the issue, stated that the investing public "has now become educated to the point that it no longer wants a The wideawake investing public of the registered stock. present day wants bearer stock, for the simple and sufficient reason that bearer stock can be passed from hand to hand. In the case of a colonial bond, such as the Vancouver four per cents, the bearer certificate has the great additional advantage that income-tax on the uncarned income derived from it need not be paid so long as the interest does not come into this country. Mr. Lloyd George himself stated in the House of Commons, on Wednesday, that under the Finance (1909-10) Act, 1910, an individual is not required to include in his statement of fixome, for the purpose of assessment to supertax, income derived from capital invested out of the United Kingdom, which is not at any time received, or brought, or remitted into the country."

"Public Does Not Prefer."

Commenting upon this article, another London contem-porary, "Canada," expressed considerable surprise at the above statements. "We cannot allow such a statement to pass unchallenged," it said. "The veriest tyro in finance must know that in the British market registered stock has must know that in the Brigsh market registered stock has greater attractions than bearer bonds possess, ind, jaugeu by the fact that a higher price is always obtainable for a stock that is inscribed, the public does **not** prefer the latter security. Confirmation of this statement can be obtained by enquiring of any leading financial issuing house in London. The real cause of the comparative failure of the Vancouver loan was the fact that the market for Canadian provincial and municipal securities, was suffering from congestion owing to the merely moderate success attending the flotation of the city of Winnipeg loan at 103, and the almost complete failure of the Manitoba loan at the same price. The city of The city of Edmonton issue was also only poorly responded to by the public. These contretemps together with the knowledge that the cities of Toronto and Montreal are only awaiting a favorable opportunity to appear as borrowers, were surely favorable opportunity to appear as borrowers, were surely sufficient explanation for the non-success of the Vancouver issue, without attempting to belittle the class of security offered. It is interesting to note that the city of Chicago within the last two months, after inviting tenders for several million dollars of 4½ per cent, bonds, failed to get a single bid at over par. Canadian municipalities are fortunate in having the Eondon market behind them; the anomaly exists all the same that the city of Vancouver should be able to borrow on better terms than Chicago, one of the greatest cities in the world."

Question of Market Conditions.

So far as the Vancouver toan is concerned, The Monetary Times is inclined to think the question of registered stock or to Times is inclined to think the question of registered stock or to bearer had little influence on the reception of the loan. Market conditions appear to have been largely responsible. On the other hand, considerable difference of opinion exists amongst authorities as so the merits of the two forms of securities. The Monetary Times has obtained the opinion of several leading London mancial houses interested in the floatetion of Consultant interested in the flotation of Canadian issues

"The question appears to us top comprehensive for the laying down of hard and fast principles," writes an importlaying down of hard and fast principles, writes an import-ant firm, which interestingly summarizes the situation. "Each form of security has several advantages and disad-vantages which must be considered concurrently with the particular character of the security to be issued, as well as with the class of investor to whom it is intended The securit increase of the Government stamp percention duty from * 1/2 per cent. to 1 per cent. on all bearer securities negotiated in this country (Great Britain), constitutes a heavy item of expense in connection with the issue of bearer bonds in London. In the case of municipal offerings, where tenders are and in London, it seems probable that this increased stamp duty will tend to outweigh other considerations involved in the selection of the form of security, and have the effect of causing financial houses to make arrangements for the issue of such loans on this side in the form of registered stock.

"When a new issue of registered stock is made, such stock is registerable into the first subscribers' names free of

stamp duty. All subsequent transactions in the security are, however, subject to an 'ad valorem' stamp duty of 1/2 per cent., payable by the purchaser, and in addition, a fee of 2/6 per deed of transfer is usually charged by the registrars.

'As a dealer in buying stock always runs the risk of not being able to sell it immediately, and would, therefore, have to take it up into his own name or into that of his banker, paying thereon the above-mentioned 1/2 per cent. stamp duty and fers, the result is that in registered stock it is, gener-"is all aking, impossible to have so free a market, or obtain as cleve a price when dealing, as in bearer securities.

usuall in favor of registered stocks is that they can ight in multiples of £1, and are, therefore, more the for the small investor, who can thus purchase area ats that will absorb the exact sum at his dis Many of these small investors do not care for the reposal sponsibility of holding bearer securities when they can have a certificate in their own names which is only transferable on a separate deed of transfer signed by them. Moreover, they a separate deed of transfer signed by them. Moreover, they prefer to have their dividends mailed direct to their registered address, instead of having to detach coupons, and have them presented at a bank for payment.

Those Who Prefer Bearer Securities.

"On the other hand, the higher grade of securities are very largely held by insurance companies, and financial and public institutions, who would undoubtedly prefer to hold a bearer security that could be readily used for purposes of collateral, and which would have the more active market that bearer securities usually promote. To cater for the small bearer securities usually promote. To cater for the small investor when it is decided to issue bearer bonds, some part of the issue is occasionally made in bonds of as small a denomination as £20, while in France it is almost the invariable custom to have all bonds in denominations of 500 francs.

"The foregoing are, in our opinion, the most important points for and against each form of security that have to be considered; but if we were to attempt to sum up the position in a general way, we should say that where the standing of the issuing authority, municipal or otherwise, is high, and is sufficiently known to investors in this country (Great Britain), to justify expectations of a broad market in its securities, then there is very little to choose between the two forms of security, the balance of favor perhaps being slightly with registered stocks. In cases where the borrowing corporation is not well known over here, we should be inclined to recommend bearer bonds."

Thinks Price Was Too High.

Another house states that the great finance houses, insurance companies, and the continental market, demand bonds, but the general English investor will not have bonds at any price. Consequently, when the demand for securi-ties is a special one, caused by a plethora of money in the financial centres, bonds are in demand, but when the demand for securities is a general one, registered stock is required. The same firm thinks that the failure of the city of Vancouver loan was simply due to the fact that it was offered at too high a price, the securities of the greatest cities in the United Kingdom, Australia, New Zealand, South Africa, and the United States, including the city of New York, being ob-tainable to yield a higher rate of interest.

Registered Stock Likely to Become Popular.

From a prominent London house which has interested considerable English capital in Canada, comes the opinion that registered stock is likely to be more popular than bearer securities, if the price is favorable, and it is made free of stamp duty by the issuing authorities. ("It is preferred to beater securities for the reason that there is not the same danger of loss, and the interest is remitted regularly to the registered holder, who is not obliged to cut off coupons and pay them into a bank for collection. 'The issue of registered stock is perhaps a little more expensive to the municipality if the stamp duty is commuted; otherwise it is cheaper, as there is no stamp duty on the first certificates issued, and the subsequent duty is a matter between the seller and the buyer."

The stamp duty on bonds remains at 1/2 per cent. instead of being increased to 1 per cent., as was proposed. The commutation stamp duty on municipal securities is at the rate of 1s. per \pounds 100 per annum, and if the stock is made duty free it adds to its value.

"The cost of keeping registers of stock is also more expensive than the charges that are made by banks for the payment of bond coupons. Bearer securities are much more popular on the Continent than registered stock, and if there is a likelihood of any securities of the kind being marketed on the Continent, this fact should be borne in mind."

Call loans elsewhere Circulation	114,685,539 71,006,005	1	130,173,902 79,781,631	102,436,037 80,929,290	-21.3 + 1.4	-10.6	C. M. Martin

Financial preparations for the coming crop movement are seen in the statement of the Canadian chartered banks for July. Call loans were reduced during the month by \$28,for July. Call loans were reduced during the month by ϕ_{20} , 500,000. Of that sum, \$27,000,000 were withdrawn from the foreign call loan market. The decrease in that item from the June figures is 21.3 per cent., the domestic call loans having declined 2.4 per cent. Call loans out of Canada is the, only account showing a decrease from the previous July figures, the amount then being \$114,000,000, while this year, that sum is reduced to \$102,000,000, a loss of 10.6 per cent Deposits on demand show a slight decrease of approximately \$12,000,000 or 4.4 per cent.

The loan situation is, for more than one reason, the most important at the present time of year. While general busi-ness is suffering somewhat from summer slackness, the bank statement shows that our general ma agers have perfect confidence in the commercial future. Current loans in Canada increased during July by \$4,000,000, or 0.5 per cent., this being an increase of 20.9 per cent. over the previous year. The following table shows the course of the loans account for the past thirteen months :--

学会是个中国了:	Current	· Call
Loans-	in Canada.	in Canada.
1909—July	\$539,821,041	\$54,603,054
August	543,154,663	56,680,172
September	560,206,621	56,124,620
October	579,837,956	56,006,065
November	590,291,944	57,875,677
December	592,741,812	. 63,554,222

RECISTERED STOCKS OR BEARER SECURITIES.

(Continued from Page 912).

In Favor of Registered Stock.

The experience of another financial house in the world's metropolis is that investors in England infinitely prefer. registered stock to bearer securities, in such flotations as that of city of Vancouver. "The class of investors who buy these securities are those who are, as a rule, making a per-manent investment, in which case, both from a point of security and from the point of dividend payments, registered stock is preferable to bearer securities."

The Giroux Lake Cobalt Silver Mining and Milling Company, Limited, has been granted permission to keep its books without the Province of Ontario.

Current loans in Canada have increased by almost \$100,000,000 since July, 1907, while call loans out of Canada have almost doubled.

The July bank statement shows that the interests of Can-are being well attended to by the Canadian banks. The ada are being well attended to by the Canadian banks. The call loans abroad have been reduced by \$27,000,000 in order to finance the harvest, while at the same time the accommo-dation of the banks for business purposes was increased dur-ing the month by nearly \$4,000,000. There is no sign of re-striction of commercial activity. The maximum note circula-tion during July increased satisfactorily. The statement is altogether encouraging and should prove an effective really altogether encouraging, and should prove an effective reply

to the ever busy pessimist. The following table shows the deposits account for the past thirteen months :---

$\begin{array}{cccccccccccccccccccccccccccccccccccc$		On Demand.	After Notice.

		263,417,539	
Deposite on demond h	July	251,638,522	538, 384, 371

Deposits on demand have been decreased five times in the thirteen months' period, while those after notice declined only once. Interest bearing deposits made a gain of \$3,862, ood, practically the same amount' of the increase in com-mercial accommodation during July. The following figures show the rapid growth in deposits during the past five years:

July.	, the par	On demand.	After notice.	Total.
1906		\$165,077,790	\$379,030,511	8344,108,301
1907		166,352,146	423,121,386	\$89,473.532
1908		164,791,308	402,964,565	\$67.755.963
1000		222,555,740	466,337,816	\$88,893,565
1910		251,638,522	538,384,374	200.022.801

Total deposits now amount to \$790,000,000; having in-creased from \$544,000,000 in 1906. Once in the five years' period the total deposits declined, but an addition of \$102,-000,000 has been made to that account since July, 1909.

s	July, 1908. \$525,271,185	July, 1909. \$	July, 1910. \$653,008,336
	23,153,095	32,753,385	40,267,390

Three years ago, Mr. I.-C. Robertson & cantalist, of Dundse, Scotland, passed through western Canada en route from the Pacific coast. He returned recently as the emissary of a company which has recently been formed in Dundee for the purpose of loaning money in western Canada. The com-pany is capitalized at \$1.000,000, and is known as the Brit-ish Canadian Trust, Limited. Mr. A. O. P. Francis, of Vancouver, brother of Mr. E. Francis, onsular representative for France of that city, has returned from the East and reports that he has been instru-mental in organizing a syndicate of French capitalists who up to the present have invested a million and a half dollars in British Columbia, Alberta and Saskatchewan. He is of the opinion-that each year will see an increasing amount of French capital coming to the West. People in the old countries are realizing the opportunities for investment in countries are realizing the opportunities for investment in Canada.

COPPER MINING IN QUEBEC

Up to the Present Has Not Produced the Best Results Some Advice from a Government Report.

Copper mining in Quebec has had a varied history. With the exception of two mines, lat Eustis and at Capelton, it cannot be said to have ever been very successful. In a number of localities, notably at Harvey Hill and at Actonvale, pockets of very rich ores were found in the early days—but none of these deposits has ever produced a large tonnage, and most of them were soon exhausted. While it might be stated that lack of ore has been the chief cause for this lack of success, it has never been demonstrated that this is the cause. The one surprising feature in connection even with those mines that have been successfully operated is the extraordinary small amount of scientific exploration that has been carried on. There has been almost no lateral exploration and no boring of consequences Ore-bodies were found, the ore was mined out as it occurred, but there was almost no development work ahead of the mining. Periods of reduced output followed periods of large output.

Ore Has Not Been Sampled,

1

The above are some of the salient features contained in report of the Department of Mines, which further states, that at the, present time, in the Eustis mine development in the shaft is about 200 feet ahead of the lowest level from which ore is being mined, and four new drifts have been which ore is being maned, and four new drifts have been started from two new levels. Again at the Suffield mine, a comparatively large tonnage of low grade ore has been blocked out on four sides. This ore reserve has not been systematically sampled, and has not been surveyed, but it is undoubtedly the largest amount of developed ore available in the district. It will be difficult to recover the values in this ore partly because difficult to recover the values in this ore, partly because of its siliceous nature, and partly be-cause of the finely disseminated character of the sulphides, which will make at difficult to concentrate. So far as can be learned these are the only occasions in which development work to any extent has preceded mining. In the Eustis mine, the ore showings are probably the best in its history. In the Suffield, the value of the ore and a method of extracting these values at a profit have yet to be determined. Apart from the natural depression which results from

the low price of copper, the present backward condition of the industry in Queber is due to several other factors. One of the most important is the attitude assumed by the ma-jority of the owners of undeveloped and unexplored prospects. jorify of the owners of undeveloped and unexplored prospects. Until these prospects are properly investigated nothing can be known as to their value. In a number of cases the owners are not financially able, to undertake the work themselves, nor have they the requisite knowledge. This lack of know-ledge, coupled with the absurd popular notions as to the value of a mineral prospect, which the owner usually assumes is already a mine causes them to place an extraordinary valuation on undeveloped properties. Most of the owners will not assume any of the risks attendant on initial explor-ation, but will ask such prices for their properties—in some cases not being willing even to have them adequately tested first—that capitalists experienced in copper mining have no choice but to leave the district.

Owners Do Not Understand What Constitutes a Mine.

Could owners he made to understand that a copper mine does not consist of a few small showings of copper ores in the bottom of a small pit, that a mine has to be developed from a prospect by hard and continuous labor like any other industry, that in the majority of cases the assays which they have received from some commercial chemist, of specimens not independently collected, are no indication whatever of the actual content of their property then and then only, when owner will meet capitalist on the common ground of mutual interest, will it be possible for the interests of both to be so adjusted that the prospects themselves may be properly investigated.

Lack of a convenient market has also retarded the in-dustry. The erection of a custom smelter at some central point in the district has been advocated as a solution of this difficulty. A custom smelter would enable small owners to obtain immediate retarns from their ores.

From An Owner's Point of View,

But from the standpoint of the smelter owner it is diffi-cult to understand how he could expect to operate his individual mines. Undoubtedly some of them were operated at a profit, but many were not, and in all cases the smelling costs were high, and the plants could only be operated while the market price of copper was high. The high costs were in part due to these factors, while usually the ore was all of the same type, being derived from one mine or group of mines, and when smelted alone it proved refractory.

provision been made to obtain different types of ores from several localities so that a proper smelting mixture could have been obtained, costs would undoubtedly have been lower. Now while a custom smelter centrally located could undoubtedly obtain some suitable ores from the district, at the present time no assurance whatever can be given that the supply will be constant, even for a limited period of time, nor can any accurate estimate be made of the quantity available.

The Methods of a Company.

A company proposing to erect a custom smelter should first assure itself of an adequate supply of suitable ores, and it, would seem reasonable to this end that they should con-trol several properties which would produce different classes of ore. The properties themselves should actually be opened up that the character of the ore may be known and a reasonable quantity be actually in sight, that is, developed on four To a well-trained engineer or business man it may sides. appear strange that it should even be necessary to make this statement, but the past history of mining and smelting ven-tures in the district repeatedly shows that the search for a commercial quantity of ore was the last step taken in the organization of such enterprises.

As To Present Conditions.

At the present time, in the absence of a suitable market, only the richer ores can be shipped to distant purchasers at a profit, and transportation charges consume a large portion of the values in the ore. The small owner, with limited capital, cannot afford to do much development in advance of sales, and the results are usually so small that it is hardly worth while investigating his property at all. On the other hand, the lack of an assured supply of ore renders the erect-ion of a smelter a hazardous venture. These difficulties could be overcome by co-operation between the owners and capitalists, and the interests of both would be served.

There are a number of prospects known where there is a possibility of getting ore of value. These should be thor-oughly investigated. When an adequate supply of ore is assured, then, and then only, will it be desirable to equip the mines with plants of suitable capacity. When the nature of the ores is known and an output of reasonable quantity is assured, it will be possible to devise a method of treatment and to design and erect a suitable plant at some convenient central point.

CERMAN TRADE WITH CANADA.

Since the removal of the German surtax the statistics of German trade have been closely watched by those inter-ested in Canada's import trade. Mr. W. G. Fischer, Canadian trade commissioner at Berlin, reports that Canadian imports into Germany have increased enormously during the past seven or eight years. This is due, he thinks, to the large increase in the population, which, during the past ten years, has increased at the rate of about 1,000,000 per annum, and, as the agricultural products of Germany are limited, it is necessary to import more and more each year. The products as the agricultural products of Germany are minicipated necessary to import more and more each year. The products and commodities are such which should be of great interest to Canada, particularly in wheat, flour, cattle food, linseed, apples and fruit, also cheese, and much better prices should be secured in this market than have been received in Great Britain during the past four or five years. It is to be hoped that shipments in apples and some of the other commodities will come in to Hamburg, Berlin and Bremen this coming autumn.

The following table shows the total imports into Ger-

many :---

CREDIT AND CONFIDENCE.

Responsible Position of Credit Men in Commercial Houses-Should Encourage Good Book-keeping.

"The basic principle of credit is confidence, but this con-fidence should be the result of intelligent scrutiny of the numerous elements that enter into this very complex ques-tion. Many things beside a man's financial responsibility have an important bearing on the subject and must be taken into account. What our insurance friends know as the "moral hazard" must figure largely in the verdict. A man's training, of lack of it, his natural ability, his care and atten-tion to business, his personal habits, and the hundred and one things that go to make up his daily life must pass under the watchful eye of the credit man. From these varied sources he forms his impressions, and, while he could not, perhaps, pat his finger on any one thing and say that de-cided him, he has sifted the evidence and come to a well-defined conclusion on which he feels safe in acting." Thus Mr. W. C. Matthews, general manager for Canada of R. G. Tun & Company, who addressed the Canadian Credit Men's Association in Winnipeg :--

Unable to Obtain Credit.

Unable to Obtain Credit. "Credit men occupy the most important positions in commercial houses to-day, for on your decision the fate of many men gractically depends. It is for you to say whether a man's ac ount shall be accepted, and he shall enjoy the advantages that flow from being in credit, whether it shall be rejected and the applicant consigned to the condition of dark despair that follows the knowledge of a man known to be unable to optain credit. You also play an important part in in fixing the status of character or commercial repute for your customers. If your standard is high your customers must measure up to it, and you are thus elevating the stand-ard of commercial morality throughout the country. If it is known you will not tolerate anything that is shady or ques-tionable, your customers will soon become aware of the fact that they must present a clean bill of health if they wish to to evil practices, and can do much to discourage dishonesty and fraud.

Proper Book-keeping System.

"The lack of a proper system among retailers of keeping "The lack of a proper system among retailers of keeping books is a matter that may profitably engage your attention. The question of regular stock-taking and striking a balance once a year is frequently neglected and followed by serious results. This should be insisted upon, not only in the in-terest of the wholesalers, but of the retailers as well, as no man can tell definitely where he stands without it. A large majority of those entering the ranks of retailers to-day are men with but slight, if any, previous experience in business, and many of them in rural communities, without even the rudiments of a business education. Some of them succeed, but while they are working at their commercial salvation their rudiments of a business education. Some of them succeed, but while they are working at their commercial salvation their account is a risky one and their competition a menace to other good customers. The granting of credit to men of this stamp should be done with the utmost caution, and only where there is good reason to believe there are some excep-tionally favorable dircumstances.

Regarding Mercantile Agencies.

Regarding Mercantile Agencies. "Having touched on some of the leading points that come up for primary consideration in the granting of credit, I now refer to the relation borne by the mercantile agencies to the credit system as it exists to-day. They are the foundation of it, and through their methods and efforts this vast and intricate system has become a possibility. Without informa-tion such as they furnish it would be impossible to conduct business with any degree of safety. No private firm could afford to spend the money necessary to gather the facts relating to an army of customers scattered over a widely extended area, and it is only by their complete system, the growth of years of practical experience, and the expenditure of vast sums of money that this information is gathered, verified and placed in the hands of their subscribers at a price easily within the reach of all. Quantity and Quality of Information.

Quantity and Quality of Information.

ness man more than once in a lifetime, and a very small sum to increase your protection against bad debts, which occur with painful frequency. You may conduct your business with the greatest care and strictest economy, observe all the rules that make for a successful bisiness, but if you sell your goods to a man who doesn't pay for them your efforts are all neutralized and your loss greater than if you had lost by fire with no insurance, for you would have saved the cost of selling and trying to collect."

CANADA HOLDING ITS OWN

In a Depressed English Market-Explanation Regarding Hudson's Bay Stock Decline-Canadian Pacific Dividend Was Opportune.

Monetary Times Office,

London, August 17th.

August is a proverbially dull month, but this year, more noticeably so, on account of the unusual activity of the earl-ier months of the year. During the past week, the only occurrence of interest was the increased dividend of the Canadian Pacific: The directors did the proper thing by making this increase, which had a steadying effect, and in a measure counteracted the ill effect of strikes and unsat-isfactory crop reports. It is pleasing to note that all along the line Canadian securities have done well, holding their own, and advancing in many lines, not only rails but findustrials.

As to why Hudson Bay is still down. Two explanations are offered, first, that it was top heavy, and many holders were forced to unload, causing depression. In well informed circles, however, it is claimed that the aggressive pro-gramme of the new management has been for the moment set aside, the sound common sense and conservative in-fluence of Lord Strathcona and Mr. Skinner bringing about fluence of Lord Strathcona and Mr. Skinner bringing about a more moderate forward movement, so that many of the suggested changes will for the present be held in abeyance. It is further said, that when the management, enter into the field of departmental stores, they will find the opposition much more vigorous in Canadian cities than in England, and that it is easier to satisfactorily operate an establishment in Brompton Road than in Winnipeg or Toronto, where the keenest minds of the Dominion are operating.

Canadian Timber Flotations,

During the past few weeks the British press has com-mented extensively upon Canadian flotations, and more re-cently upon the timber and oil flotations, while The Financial Times devotes two columns to Canadian timber companies. Recent statements of The Monetary Times are quoted, while they give the result of their investigation, which is naturally indefinite and incomplete not because of any disposition to deal unfairly with the Dominion, but because the desired information is difficult to obtain, no one being capable of giving such facts and figures as will be reliable on the one hand, and fair to Canada on the other. It is claimed that the demand for timber is largely local,

and that the inrush of emigrants has for the moment caused an unnatural demand in the West, which when it has been permanently supplied will remove British Columbia's most remunerative market.

It is pointed out that Canada, while proud of its timber reserves, is forgetful that Mexico and other parts of South America, as well as Russia, and districts of Asia, have vast tracts of timber, which year by year are becoming more ac-cessible, and must necessarily be a strong competitor with Canada, where much of the forest is almost inaccessible, and labor high. Reviewing these facts, they conclude that there is no sound basis for speculation in Ganadian timber propositions.

Drop in Price of Silver.

Following the example of the Bank of Montreal, the Bank of New South Wales has secured a valuable site on Threadneedle Street, almost opposite the Bank of Montreal, and it is proposed to erect an attractive and substantial building. At the present this important banking house is situated on Old Broad Street. Again there is a slight domain the

Quantity and Quality of Information. "Heretofore too little attention has been given to the quantity and quality of information on which credit is based, too much weight attached at times to the opinion of the ardent salesman, or to the fact that another reputable house is selling, and the benefit of the doubt is given the customer instead of retained by the house, resulting in a percentage of bad debts at balancing time that might have been reduced. "I wonder how many of you ever figured out in your annual expenses the money spent for fire insurance as against that of getting information on which your credits were based. The object is the same, the protection of your business, yet in one case you are spending thousands of dollars to guard against a calamity that does not happen to the average busi-

a large number of small stative traders. It is likely, there-fore, that the group will have to hold for some little time to come if they hope to succeed.

Agricultural Credit Banks.

At the next session of Parliament, Lord Carrington, who is an undisputed authority on matters agricultural, and the needs of the farming classes, will introduce a bill to facilitate the establishment of co-operative credit banks, for the benefit more especially of agriculture. Owing to the fact that the majority of farmers in England are upon leasehold, it is doubtful as to the ultimate success of the scheme. Such

it is doubtful as to the ultimate success of the scheme. Such banks have been successfully operated in other countries, but none of these are just parallel to England, and one must wait until the terms of the bill have been made public. The bond holders' meeting of the Quebec and Lake St. John Railway has been held, and a resolution passed ac-cepting the terms as offered by the Canadian Northern. It is gratifying that these negotiations have been brought to an amicable settlement, and it is felt that the bond holders have acted wisely since any other step would probably have involved an entire loss, and while the Canadian Northern have doubtlessly made a good bargain for themselves, at the same time they are helping the bond holders to obtain a half a loaf which is decidedly better than a crumb.

Last Years' Colnage.

Last Years' Coinage. The report of the Deputy Master of the Royal Mint has been issued, showing that during 1900, upwards of 4,000,000 ounces of bullion having a value of £16,000,000 were imported for mint coinage, while £3,000,000 of old gold coins were returned for recasting. Of this £11,800,000 was in sover-eigns, and £2,000,000 in half sovereigns. £1,380,500 in silver. and £124,811 in bronze were cast, making a total of £15,-311,410 against £15,571,331 last year. The total number of pieces cut was over 113,000,000, some 75,000,000 being Im-perial coins, and 37,000,000 Colonial.—T. R. Sea.

HARVESTING IN THE WEST

Is Now General-Prices Will be Good-Railroads Ready for Crops In the Wheat Markets.

Monetary Times Office,

Winnipeg, August 23rd. Harvesting has begun in the wheat fields of the West. Demands made for harvest hands and reports based upon personal inspections show that there is to be a fair crop. The quality will be good, and the opening price of the season was fixed last week when the first wheat of 1010 was sold at Fort William for \$101 a bushel. The West will need many harvest hands. Already several thousand have passed through Winnipeg, and the call is not near filled. One Manitoba farmer took forty-five men to gather his crop. Representatives of the Saskatchewan Corr

gather his crop. Representatives of the Saskatchewan Gov-ernment' were sent to Winnipeg to meet the trains and en-gage men for the middle Province. These agents went east of Winnipeg and met the harvesters' trains and succeeded in getting the lion's share of 2,500 hands to go through to Sas-katchewan. Nearly all the harvesters came from Ontario.

katchewan. Nearly all the harvesters came from Ontario. It is encouraging to note that, despite the talk-in regard to the poor crops in some sections of the West, collec-tions in almost every line are coming in well for this time of year, and, according to the opinion of representatives of loan companies, conditions are not so bad as was anticipated. Last year these companies collected eighty-five to ninety-five per cent. of their interest, and they estimate that they will this year collect from seventy-five to eighty per cent.

Railroads Are Ready for the Crop.

Railroads Are Ready for the Crop. The three great lines of railway in Western Canada are in good shape to handle the year's production of wheat and other grains, and it is unlikely that any serious blockades will occur. Both the C.P.R. and C.N.R. have plenty of cars in readiness, and already these are well distributed over their systems. It is a welcome announcement to Western Canada that the Grand Trunk Pacific will be able to handle grain from all points east of Elimonton for Fort William on Sep-tember 1st. The line from Winnipeg to Edmonton is now in full operation, and west of Edmonton a partial service is being given. It is further announced that the Grand Trunk Pacific will enter this fall upon the regular operation of the 250-mile section of the National Transcontinental line be-tween Weymontacheme and the St. Lawrence River. Con-struction upon all the other sections of the International Transcontinental between Moncton and Winnipeg is being pushed forward expeditionally, as is also the westward con-struction of the Grand Trunk Pacific line on towards Prince Rupert. Rupert.

pressed trade and verbuying have resulted in the failure of lower temperatures over the Canadian North-West, but there was not sufficient to cause a scare, and markets quickly reacted. Splendid harvest and threshing weather, showing favorable results, combined with lower cables and the in-difference of foreigners for Canadian and American wheat, caused a sharp decline on our markets and those of the United States. Added to these depressing influences and the unexpected weakness of the foreign markets were predictions of large world's shipments for this week, and, as foreign news has been the main sustaining influence for some time past, the weakness in spot markets and continued large movement from other exporting nations caused heavy liqui-dation. The close of the week, therefore, left markets with sentiment bearish and prices on the decline.

Statistical Position Strong.

The statistical situation continues to work against higher prices for the present. World's shipments for the week showed a considerable increase over last year, Russia and the showed a considerable increase over last year, tussia and the Danube making a large contribution. Breadstuffs on ocean passage increased 3¹/₄ million bushels compared with a de-crease of 1¹/₄ million a year ago, the total amount afloat being art₄ million as against 20³/₄ million last year. The visible crease of 1¼ million a year ago, the total amount afloat being 35¼ million as against 29¾ million last year. The visible supply of the United States increased by 3¼ million bushels, now standing at 18,582,000 as compared with a total of 8,282,000 for corresponding period 1900, and, although Cana-dian visible decreased 383,000 bushels, it still stands at 3,721,000 as against 1,368,000 a year ago. The foreign crop outlook is for the most part favorable. Estimates of the importations required by France range from 48 to 96 million bushels. Australia and India are doubling their shipments of a year ago while the Argentine also shows a substantial bushels. Australia and India are doubling their shipments of a year ago while the Argentine also shows a substantial increase. The new crop in Argentina is making a good start, with the exception of important districts in the north, where the plant is suffering from continued drouth. The situation at the moment from a supply and demand standpoint, is un-doubtedly bearish, and there is little hope of any permanent recovery until there is a decided let up in the North American wheat movement or material increase in both export and wheat movement or material increase in both export and domestic demand.

Cash Demand Good.

While there is no great activity in the commercial mar-ket, there is a strong demand. On our local market trade in options has been brisk and the demand for cash wheat good, the business being divided between local millers and Eastern houses. Export bids are still out of line, and British buyers are holding off in the expectation of being able to buy cheaper later on. Receipts in the Winnipeg market continue in excess of last year's arrivals. With crop damage excitement out of the way, markets will be on a normal basis again, and the rise and fall in prices will depend largely on supply and demand.

QUEBEC AND LAKE ST. JOHN BONDS.

As noted in The Monetary Times last week, the bondholders of the Quebec and Lake St. John Railway Company have accepted an offer made for the conversion of the bonds. At a recent meeting held in London, Mr. J. L. Smith, C.B., stated that those familiar with the circumstances of the case and with the general character of the steps which had been taken by the protection committee knew that the original offer of the Canadian Northern Railway was to pay to the first mortgage bondholders, in bonds guaranteed by the Canadian Northern Railway, an amount equal to 60 per cent, of their present holding, and to pay 10 per cent. to the income bondholders in respect of every £100 of their hold-In discussing that offer at a meeting on January 3, he ing. pointed out that they were not then in a position to form an opinion upon the question whether there was any real justification for the reduction, and that in any case they could not accept a reduction which would leave intact the ordinary capital of the company without a full and independent investigation and report upon the position and accounts of the company. In fairness to the Canadian Northern Railway, he must say that they had never refused such an investigation. Some differences of opinion existed between them as to the manner in which that should be carried out, but he did not feel called upon to discuss that point now. As a matter of fact, the Canadian Northern Company had As afforded every facility for the conduct of an investigation, and the committee were now in the position of having three reports from independent points of view. The first two were by eminent firms of chartered accountants, and showed the position as disclosed in the books and accounts. The third was by an experienced practical railway expert and en-gineer, and gave much information with regard to the past of the railway and the prospects of the future. All these reports were of great value. He need not say that the re-ports had engaged the very serious consideration of the All these Markets showed a tendency to advance in the early part ports had engaged the very serious consideration of the of the week, induced by reports of slight frost damage and committee, and he was not going to discuss the matter now.

THE MONETARY TIMES

CITY OF BRANDON

Straight Term Debentures TO YIELD 4.70 PER CENT.

BRANDON is the largest and most important city in Manitoba outside of Winnipeg, and has a population of 11,746. The city has excellent railway facilities which make it a distributing centre of considerable importance. There are also located in Brandon a number of manufacturing concerns.

Wood, Gundy & Company

The effect of them was that they did not in any way modify the opinions entertained by the members of the committee with regard to the future possibilities and prospects of the Quebec line if adequate capital and efficient organization the Quebec line if adequate capital and efficient organization were provided. Under these circumstances the committee had to face the question whether they should accept the offer made by the Canadian Northern Railway, with such modifications as might be agreed upon, or whether they-should proceed with a scheme of reconstruction and reor-ganization of the capital of the company. They therefore decided not to refuse to entertain any offer of compromise that might be made. They were also given to understand that the Canadian Northern Railway Company were prepared to approach the subject in a friendly spirit, and accordingly they opened negotiations through Mr. Hanson, which re-sulted in a great deal of correspondence, telegrams, etc., which finally resulted in the terms now submitted for con-sideration. He would not pretend that these terms were entirely up to the standard which they would have desired, or even up to the standard which they had hoped for. The Canadian Northern Railway, not unnaturally, took a view of the position different from that which the committee took, and still considered that the committee took. of the position different from that which the committee took, and still considered that the original offer they made was a fair one, but, with a view to obtaining an amicable settle-ment, they finally agreed to the terms which were now offered. He therefore moved the acceptance of the offer.

46 Threadneedle St.

LONDON, England

CANADA'S INCREASING TRADE.

During the first four months of the fiscal year ended July 31 Canada's total trade amounted to \$232,630,260, which houses for the weeks ended August 26th, 1000 August 18th, and August 25th, 1010, with percentage increase: July 31 Canada's total trade amounted to \$232,630,260, which is \$40,710,956 over the trade during the same period a year ago. The total amount of domestic imports and exports alone during the same time was \$224,274,621, an increase of \$30,084,194. The value of merchandise imported for con-sumption during the four months totalled \$143,322,043, a betterment of \$31,530,201, and domestic produce was ex-ported to the value of \$80,952,578, this being an increase of \$7,553,883 \$7,553,883.

During the four months exports of products, of the fisheries increased by \$800.000, lumber by almost \$1,000,000, agricultural products by \$5,500,000, and manufactures by over \$1,000,000. Animals and their produce show a decrease of over \$600,000, and products of the mine by \$200,000

During July the total trade was \$61,456,576, an increase of \$5,000,000. Imports showed an increase of \$5,826,205, and exports declined by \$750,000. There was a decline in the value of minerals sent out of \$652,415, of \$227,455 in lumber, and \$271,195 in agricultural produce. There were increase of \$227,455 in \$227,45 increases of \$309.370 in fish. \$28,803 in animals and their produce, and \$55,235 in manufactured articles.

Receive Charters-Total Capitalization this Week Over Twelve Millions-Fifty-six New Companies.

Fifty-six is the number of new Canadian companies incorporated this week, and the total capitalization of same, \$12,207,000. Only five companies of any magnitude received \$12,207,000. Only five companies of any magnitude received charters during the week, the largest of these being the Cobalt Reduction and Refining Company, capital-ized at \$3,000,000, and with head office in Ottawa: The other four large incorporations were million dollar concerns. A great falling off is noticeable in the number of new British Columbia concerns, while many com-panies are being formed in Saskatchewan towns. The number of charters issued in the Eastern cities remains about the same, while mining companies are keeping up to the average, this being about seven per week. The following is a list of charters granted during the past week. The head office of each company is situate in

the town, city or province mentioned at the beginning of each paragraph, the persons named are provisional directors: British Columbia. The Europe Hotel Company, Limited,

"WE DO NOT BONUS INDUSTRIES."

The industrial bonus evil must cease. Past experience has proved that it has been of little assistance to the growth of the country, and that it will operate against the best future.

The town of Grimsby, Ontario, proposes to loan a company twenty thousand dollars with which to erect a new foundry. For the granting of the loan two hundred and twelve persons voted, and against it, sixty-two. The latter knew that Grimsby could not afford to secure new industries in the manner proposed.

Woodstock, Ontario, proposes to vote on several Many companies by-laws respecting new industries. are negotiating with the municipality in order to obtain the best possible bargain. In the meantime, a city hall by-law will be shelved "as it is felt that the burden will probably be too great to bring on the people at one time."

The bonus system creates unhealthy competi-tion between towns. More than once it has shifted an industry and removed many employees from one town to another, this with disastrous effects to the loser. Port Arthur has magnetized a wagon in-dustry from Markham. Markham will probably lose forty-five families when the company packs up trek to the head of the lakes. The towns of Har-riston and Hanover are offering inducements to a biscuit company in Walkerton to start a factory in

biscuit company in Walkerton to start a factory in their own towns, the proposal being for the com-pany to abandon its Walkerton plant Welland has recently secured an American in-dustry. A member of the company is reported to have said that St. Catharines, which was making a bid for the enterprise, "was unconscious or asleep." Whereas it may have been that St. Catharines was wide awake and refused to be drawn into the which wide awake and refused to be drawn into the whirl-pool of the industrial bonus.

Walkerton has suffered with other Ontario towns. Says The Bruce Times :---"The falling in of the old Says the Bruce times.— the failing in of the old felt factory roof last week was the spectacular way an old bonus-fed institution passed off the map. The factory was erected about thirty-five years ago, and was assisted to the extent of \$5,000, which the swindled ratepayers gladly put up in the mistaken swhiled fatepayers grady put up in the mistaken belief that they were getting something for their money. The institution promised to employ a large number of hands, and for a time a number of faces appeared at the factory windows. But the condition of the market, or something else that was wrong, with the country at the time, determined the direc-tors to were out their staff until the new roll facily tors to weed out their staff, until the pay-roll finally degenerated into a half dozen boys and an office manager. The institution eventually succumbed and Yale locks were hung on the outside to show the people that the doors were closed. It remained in a comatose state until a wily speculator came along and bought the machinery for old iron. He along and bought the machinery for old iron. He afterwards got rich selling the patent which some fool mechanic had ingeniously placed on one of the machines. Thus dismantled, the building remained as an eyesore to the people, until it finally fell into the hands of J. P. Johnstone, who used it for a barn. It began, however, to get shaky on its legs, and about a month ago J. P. put it up for auction. But the people had burned their fingers before on it and they could not be persuaded to touch it with a fork. they could not be persuaded to touch it with a fork. No bids forthcoming, J. P. was scratching his head in mental calculation when the building itself solved the problem by falling down."

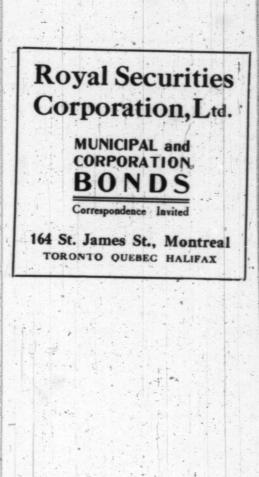

The following cities and towns are opposed to the industrial bonus system :

Calgary, Alta., Edmonton, Alta. Peterborough, Ont.

They deserve hearty support for their principle. Calgary does not favor the bonus system. "The bonus proposition," says The Calgary News, "has been submitted to Calgary quite frequently since this city began to assume prominence in the in-dustrial life of the Dominion, but it has not been met with favor. It is to be hoped that it never will be regarded with approval. The question has again assumed significance with the second s assumed significance with the request of a soap com-pany for information regarding the concessions Calgary will make to it if it decides to locate here. The city is willing to make certain concessions in the way of water, light, and power supply, but these concessions should not be of so generous a nature that companies who have located here without being given concessions, should have reasonable grounds

for complaint on the score of discrimination Calgary is an attractive distributing centre for big business houses, and it will be even more attractive when it is tapped by the railways that are now sunning their lines in this direction. Factories will be located here whether concessions are given or not and these new industries will be permanent they will not be the fly-by-night bonus affairs that have stung so many Ontario towns. It is a fact that there is scarcely a town in that province but what has been the victim of the bonus microbe at one has been the victim of the bonus microbe at one time or another, and still they keep on succumbing to the alluring prospectuses placed before their eyes by the concerns looking for easy money in the shape of bonuses. Peterborough, Port Hope, Norwood, Kin-cardine, Chesley-these are only a few of the munici-palities which have been marks for bonus hunters.

painties which have been marks for bonus numers. "Calgary has profited in other directions by the experience of older cities and towns of the East, and it should not fall for the bonus lure. Our develop-ment will be sufficiently rapid to induce well estab-lished concerns to locate branches here and we may that the partner that we should be partner by set of the mark of the bonus lure. rest assured that we shall be perfectly satisfied with our legitimate growth."

on another page). Prince Edwird County, Ont.-Until September 15, for \$35,000, 4½ per cent., 29 instalment, road construction de-bentures. D. L. Bongard, treasurer, Picton, Ont. (Official bentures.

advertisement on another page.) Victoria. B.C.—On August 20th the following by-laws will be voted on's \$15,000, school additions: \$50,000, sewer construction: \$20,000, public convenience: \$15,000, isolation hospital; \$75,000, foreshore: \$100,000, underground telephones; total, \$305,000.

VICTORIA, S.C., MAY REJECT TENDERS.

The best price offered for the recent \$200,232 Victoria, B.C., issue, was 07, which was not considered satisfactory by the city council. As Victoria has a large sum of money lying at the credit of the general sinking fund account which cannot be used for the purpose of paying off the debentures during the lifetime of the local improvement debentures the mayor suggests that himself and the treasurer be authorized to purchase out of this general sinking fund the \$200,232,28 debentures for the local improvement works at the rate of \$97.10 for each \$100 of debencures. The works for which \$97.10 for each \$100 of debendures. The works for which the debentures have been sold were the Causeway Local Im-provement Works, \$52,564; Permanent Sidewalk Construc-tion Assessment By-law No. 31, \$11,612.26; Cormorant Street Paving Local Improvement By-law, \$8,401.82; Permanent Assessment Bv-law No. 32, \$31,534.80; Wharf Street Local Improvement-By-law, \$30,159.67; Permanent Sidewalk Local Improvement Assessment By-law, No. 20, \$14,322.30; Belle-ville Street Paving Local Improvement By-law, \$30,465.78.

NOTES OF BIDDING

For the \$40,000 Raymond, Alta., 4 per cents., no tenders were received. It is understood that a Toronto bond house holds an option on this block until August 29th.

For the Wainwright, Alta., \$18,000, 5 per cent. issue, six tenders were received, four being from Toronto bond houses. As previously noted, the tender of 'Messrs. Brent, Noxon & Company, Toronto, was accepted. Five Toronto, one Winnipeg, and one Regina bond house

tendered for the Pipestone, Man., \$10,000, 4 per cent., 20-year debentures. The offer of the Dominion Securities Cor-

poration, Toronto, was accepted. Seven bids were received for the \$33,500, 5 per cent. Camrose, Alta., issue. Six of these were from Toronto bond houses. As previously noted, Messrs. H. O'Hara & Company were the successful tenderers.

BOND NOTES.

Mr. T. M. Kirkwood, vice-president, of Manitoba Rolling Mills Company, asked the Hamilton Board of Control lately to join with a number of cities along Lake Ontario in guaranteeing the bonds of a steamship line that it is pro-posed to inaugurate between Hamilton and Montreal. He wished them to guarantee the interest on \$500,000 bonds, but the controllers retused to consider it.

A resolution was passed at the recent convention of the Maritime Board of Trade to the effect that all future issues of municipal bonds shall be guaranteed by the several pro-vincial governments, both as to principal and interest, and a guarantee fixed and provided by each province from the pro-ceeds of the sale of such bonds to meet the calls upon them arising from extraordinary emergencies, similar to the Campbellton fire.

Discussing the desirability of municipal bonds as investments for insurance companies, Mr. C. A. Kennedy, of Mont-real, says that they should be able to equal loan rates on central real estate, with less expense and care in the handling, and at the same time a most reasonable expectation of enhanced value with changed money and other conditions which time will eventually bring about, as it has in the past, judg-ing by recent experience, or as far back as it may be wished to recall. There are, of course, the larger rates on loans on Western properties,—farm lands, etc., in the outlying dis-tricts, but these require the necessary system, the care, the constant attention, even after the loans are made, not to mention the requisite experience and judgment of the land, but also of the borrowers, etc., together with the disposition to be lenient in lean years in the shape of a total carry-over for a full twelve months, including the interest, that it becomes a great question of the advisability of such loans to the average company, even as to the actual net return, all things considered, and without this system, etc., there is sure to be a too large percentage of defaulters."

DEBENTURES AWARDED.

Unity, Sask.—\$2,000, 5½ per cent., 15-instalment de-bentures, to Messrs. Nay & James, Regina. Saskatchewan, S.D.—\$10,000, 6 per cent., 10-instalment

debentures, to Messrs. Nay & James, Regina.

Swift Current, S.D., Sask. -\$10,000, 6 per cent., 20-instal-

ment debentures, to Messrs. Nay & James, Regina. London Township, Ont.—\$7,500, 5 per cent., 15-year school debentures, to Messrs. Brouse, Mitchell & Company; Toronto.

The Ontario Securities Company, Limited, Toronto, have purchased \$4,200 Saskatchewan, and \$2,300 Alberta school debentures

Hastings County, Ont.-\$20,000, 5 per cent., 20-instal-ment debentures, to the Ontario Securities Company, Limited, Toronto.

Stettler, Alta.-\$20,500, 51/2 per cent., 7 and 20 instalment, loan and right of way purchase debentures, to Messrs. # Brent, Noxon & Company, Toronto.

The Le Roi, Mining Company has gone into voluntary liquidation, Mr. A. J McMillan being appointed liquidator.

MARITIME BOARD OF TRADE

Holds its Annual Meeting-Many Important Resolutions Passed-Will Meet at Moncton Next Year.

"We have a grand portion of the Dominion. One that "We have a grand portion of the Dominion. One that has rendered in many cases too many easy returns from her forest, fisheries, mines and farms. The surface has been used for prompt, render return, and the waste that has been permitted because of and return, and the waste that has been difference to the future has been phenomenal. But still these provinces hold good things for us that may be used for our benefit and handed on to generations yet unborn, if handled with prudence, forchought and consideration."

This statement was made by Mr. W. B. Snowball, presi-dent of the Maritime Board of Trade in his address to the members at the annual meeting held last week. Some Sound Advice To The Provinces.

922

Mr. Snowball said that the Maritime Provinces must have the closest possible manufacture of our natural product of wood done within our country whether it touches the saw of wood done within our country whether it touches the saw mills, rossing mills, or pulp mills. The people of these provinces should have, and should insist on having, the greatest benefit from this resource whether from the govern-ment owned or from granted lands. Waste of bye products at mills should be stopped and turned into a source of rev-enue and employment, whether it be slab edgings and saw-dust, or uncooked pulp chips or acid. Farm Waste Should Be Stopped.

Farm Waste Should Be Stopped.

Farm Waste Should Be Stopped. On the farm, waste has been going on to such an ex-tent that everywhere we see deserted farms and dilapidated farm buildings. The stability and prosperity of our country is dependent on the farming industry. We are glad to see what is being done to educate this important portion of our population to the dignity of their calling, as well as in im-proved methods to coax from mother earth her most bount-iful yield. We, in the town centres, will prosper as we are soil soil

As To The Natural Resources.

"Then we have our fisheries—so important to these provinces. Are we getting all we should from this heritage of river and lake and sea? Can we improve our methods and enforce our laws and enact new laws that will preserve to us our salmon, lobster, codfish, mackerel, smelt and other fish in steady supply, rather than a diminishing quality and quantity?

Our coal; iron and other mines should be conserved to our people, and the export of ore from our provinces should be stopped, so that industries making iron and steel and be stopped, so that industries making iron and seef and using these products may grow up in our midst. This should be possible where coal, iron and lime, are all available. Large preparations are now being made on this river to ship ore from the Drummond Mines in Gloucester county to the United States, Germany and England.

What Shipment of Ore Means.

"This will not give much employment to our people, and only a small revenue to our province. They may require to do this for a year or two to test the ore fully and to get some return for the heavy investment made, but this should not be permitted to continue many years.

"The Transcontinental coming down through our provinces and reaching out through new country to Winnipeg and the farther west, will open up new territory for manu-tactured articles that should be as readily manufactured and supplied by our people as by those of the provinces of On-tario and Quebec, and we should prepare to capture a fair portion of that trade.

Money Should Be Spent Where Earned.

"Too much money is being sent out of our provinces to the large departmental stores of the western cities. Our people should have it impressed on them that where money is earned, it should be spent as far as possible, if they wish to advance the prosperity of the towns in which they live. We need the merchants and they need the customers, and only as they help each other can both prosper. The meronly as they help each other can both prosper. The mer-chant must cater to the wants of the community by keeping what goods are required at reasonable prices, and the com-munity should patronize home merchants if they want good shops. Money kept in circulation in a town does good in that place, but send it away and it helps the other place. We also have too many idle dollars in banks and stockings. Idle dollars and idle men are both useless to the State."

Some Resolutions And New Officers.

Several important resolutions were passed by the board, it being decided to ask the Dominion Government to reduce

the establishment of provincial roads. The Government will also be asked to improve the mail service from England to the Maritime Provinces, and that greater attention be paid these provinces by the department of immigration. It was also decided that all future issues of municipal bonds shall be guaranteed by the several provincial governments.

was decided to hold the next meeting at Moncton. It was decided to hold the next meeting at Moncton. The following officers were recommended by the nominating committee: president, F. W. Sumner, Moncton; first vice-president, Capt. Augustus Cann, Yarmouth; second vice-president, Mr. James Paton, Charlottetown; corresponding secretary, Mr. L. B. Read, Moncton; secretary, Mr. Thomas Williams, Moncton.

FORTY THOUSAND DOLLAR MUNICIPAL ISSUE Remains Unsold-Market Continues Dull, but Outlook is Brighter.

The municipal bond market has become exceedingly dull. The Monetary Times learns of two cases in which no bids were received. The \$40,000 issue of 5 per cent. debentures for the installation of waterworks at Raymond, Alberta, remain unsold, although one bond house has an option on them until Monday. "We have not been able to dispose of our debentures," writes the secretary-treasurer of that enterour debentures," writes the secretary treasurer of the Bowden, Sas-prising town. No bids were received for the Bowden, Sasprising town. No bids were received for the Bowden, Sas-katchewan, \$600 5 per cent. 10-years street improvement issue

The fact that bond houses are not purchasing is probably due to the fact that investors are not putchasing is plo-bably due to the fact that investors are not buying. The stock exchanges are suffering from a lack of investment demand. The bond market is having the same experience, only perhaps to a more marked degree. Those who have studied the situation closely are inclined to think that with the coming of fall the position will improve. The banks have by no means acted unfavorably to investment spheres and the immediate outlook is for fairly good money conditions.

End of Decline in Prices.

Behavior of the bond market thus far in the current year, says the Wall Street Journal, suggests in several ways that we may be nearing the end of the long decline in bond prices which began more than a decade ago. Ever since 1807, commodity prices and interest rates have maintained an upward trend, while the average prices of mortgage bonds an upward trend, while the average prices of moltgage contained have consequently maintained a downward trend. However, commodity prices in the recent "boom," for the during this entire period, failed to go materially above the high record of the previous "boom"—the highest point attained by Bradstreet's index number this year being only

9.2310, against 9.1293 in 1907. Commodity prices, it now appears, show some signs of starting upon a downward trend; and, simultaneously, in-terest rates have shown similar signs; for this is the first time since 1897 when interest rates remained low during a period of liquidation in the stock market and reaction in general business. Not only do these suggestions of the be-ginning of a downward movement of commodity prices and interest rates seem to indicate that the tide is turning in favor of the bond market; but the action of the bond market itself affords similar indications in the contrast of prices and

interest fates given be		Prices.	Interest	Rates.
	1907.	1910.	_ 1907	.1910.
Ianuary	94.29	92.84	6.242%	4.372%
February	93.45	. 92.975	5.289%	3.532%
March	90.30	91.885	6.132%	3.655%
April	92.30	91.105	4.515%	3.910%
May	90.05	90.983	4.164%	3.969%
June	90.54	90.65	4.719%	3.434%
July	90.13	89.87	5.523%	3.849%

The interest rates here given are averages, including call and time money, and commercial paper, which represent as nearly as possible the average rate for the New York money market.

Accompanied by Heavy Liquidation.

The similarity of the movements of bond prices during the current year to those of 1907 is somewhat striking; but it is more significant that for at least a decade and a half It is more significant that for at least a decade and a half there has never before been so large a decline in bond prices without being accompanied by heavy liquidation. In 1907 this heavy liquidation began in the latter part of February, and in 1903 around the first of July. But in the current year, while the selling of bonds by investors has, of course, been more extensive than in years of trade expansion, there has been no general and heavy liquidation such as took place been no general and heavy liquidation, such as took place

in 1899, 1903, and 1907. This conspicuous absence of general liquidation in the bond market, together with the indications of a turn in the the exising freight and passenger rates, also that the pre-vincial governments of the Maritime Provinces provide for within a reasonable time.

INSURANCE CHRONICLE THE

TORONIO'S FIRE CHIEF

Presents an Interesting Report-Number of Fires is Increasing While Total Damage is Less.

t huildinge	\$ 283,585
Loss on buildings	1,240,155
Insurance on buildings Loss on contents	457,346
Loss on contents	1,291,586
Insurance on contents Total loss on buildings and contents	740,931
Total insurance on buildings and contents.	2,531,741
Insurance paid on buildings	234,191
Insurance paid on contents	329,335
Total insurance paid on buildings and	
antanta il il i concerce conce	30313-
contents Loss over insurance paid on huildings and	
Loss over mourance part on	154,064

Loss on buildings with no insurance Loss on contents with no insurance..... 5,860 17,481

The above table shows in brief to what extent Toronto suffered from the fire field during 1900, while the good work of the fire department is also seen, the insurance paid during the year for damage being only about 20 per cent. of what was carried. The total fire loss during the year was \$740,-931, and on this was carried insurance to the extent of \$2,-931, while the insurance paid was \$762,526. That Tor-531,741, while the insurance paid was \$563,526. That Tor-onto's buildings are well insured is seen from the fact that \$5,860 covers the damage done to buildings on which no in-surance was carried, while as regards contents, \$17,481 is the amount on which there was no insurance.

Damage on the Decline.

924

Chief Thompson and his men are deserving of great praise for the remarkably good showing made during the year. Although the number of alarms was the highest during the past twenty-four years, the damage caused by fires showed an appreciable decline when compared with the figures for 1907 and 1908, while the average compares very favorably with the total for any year since the year of the big conflagration—1904. The following table shows the actual losses and insurance carried for each year since 1886, and represents carefully kept records:—

presents carerung act		
wenty-four Years' Ret Year.	Losses.	Insurance.
	\$280,902	\$1,164,163
1886	74,685	638,149
1887	7215,194	967,979
1888	134,760	1,016,138
1889	487,186	1,184,473
1890	210,115	1,150,206
. 1891	220,509	1,111,106
1892	195,403	1,021,081
1893	152,281	1,153,992
1894	1,817,374	+ 3,553,711
*1895	292,256	1.133,823
1896	666,621	2,500,187
1897	458,331	1,776,657
1898	351,307	1,271,545
1899	182,334	
, 1900	122,120	1,079,626
1901	423,544	2,111,362
1902	273,696	. 2,111,724
1903	10,956,546	10,899,716
1904	448,664	2,246,486
1905	6667,247	3,679,744
1906	allow and the	. 5,315,145
	1,073,989	4,218,783
. 1900	740,931	2,531,741
1000	11-120	Te.

September was the most unfortunate month as regards amount of damage caused by fire. Buildings were damaged to the extent of \$80,220, and contents \$133,126 in that month, while there was insurance paid amounting to almost \$120,000

As to the Cause of Fires. An interesting table has been compiled showing the causes of fires and alarms during the year. This shows that causes of hres and alarms during the year. This shows that bonfires were accountable for 5; boys and matches, 28; burning chimneys, 64; burning rubbish, etc., 70; carboy of acid burst, 1; carelessness with matches, candles, etc., 18; careless workmen, 2; children and matches, 35; clothing, etc., hanging near stove, 9; defective automatic sprinkler systems, 14; defective chimneys, 18; defective electric wiringy.22; defective furnaces; 9; defective furnace pipes, 3;

defective gas fixtures, 5; defective grates, 13; defective insulation, 16; defective stoves and ranges, 3; defective stovesulation, 10; delective sloves and langes, 5; delective slove-pipes, 5; disinfecting room, 3; dry grass, leaves, etc., 19; drying plaster, 18; electric wires, 3; escaping steam or smoke-taken for fire, 21; explosion of chemicals, 4; explosion of coal oil lamps, 12; explosion of coal oil stoves, 2; explosion of gas, 4; explosion of gas stoves, 2; explosion of gasoline in stoves, tanks, etc., 27.

Many False Alarms Civen.

False alarms given by persons unknown, 74; false alarms through Courtland System, 5; false alarms through Holmes through Courtland System, 5; false alarms through floimes Electric System, 5; false alarms through Great North-West-ern System, 9; fireworks, 10; gas jet, candle, or lamp in con-tact with curtains, etc., 41; hot ashes, 17; ignition of boiling fat or oil, 14; ignition of boiling sugar, 4; ignition of boil-ing wax, 1; ignition of benzine, 1; ignition of dust in hot air ing wax, 1; ignition of leak in trac pipes. It is ignition of oily pipes, 1; ignition of leak in gas pipes, 11; ignition of oily rags, waste, etc., 3; cigarette or cigar stub, 10; lightning, rags, waste, etc., 3; cigarette or cigar stub, 10; lightning, 2; thawing out water pipes, 5; unknown, 176; upsetting of coal oil lamp, 15; coal oil stoves, 3; water tap left open, 1; re-kindling of previous fire, 7; short circuit in motor, 17; spark from brick kiln, 1; spark from burning rubbish, 2; spark from burning chimney, 33; spark from cupola, 5; spark from forge, 2; spark from furnace, 6; spark from grate, 1; spark from locomotive, 9; spark from man's pipe, 5; spark from motor, 3; spark from picker, 7; spark from plasterer's heater, 4; spontaneous combustion, 13.

Incendiaries Were Busy. Ignition of film in moving picture machine, 2; ignition of boiling tar, 11; ignition of varnish, paint, etc., 6; ignition of wood in stove oven, 2; incendiary, supposed, 22; lighting stove with coal oil, 2; mice and matches, 9; overheated baker's oven, 1; overheated drying kiln, 1; overheated furnaces, 13; overheated furnace pipes, 6; overheated gas stoves, 9; overheated incubator, 1; overheated journals, pulleys, etc., 1; overheated steam pipes, 3; overheated ranges, stoves, 2; overheated stove pipes, 13; outside city limits, 18; reflection from electric or other light, 3.

BRITISH COLUMBIA FIRE INSURANCE COMMISSION.

The British Columbia Fire Insurance Commission has submitted its report to the Provincial Government. Briefly, it recommends

That no unlicensed company or association of under-writers or their representatives should be permitted to solicit

writers or their representatives should be permitted to fire insurance in the Province. That all insurers should be permitted to place their in-surance freely with such unlicensed companies or associa-tions of underwriters, including mutuals and Lloyd, and should have the right to obtain inspection of their risks and adjustment of their losses upon obtaining a license for that purpose, only on the department naming the inspector or ad-juster, and that the Lieutenant-Governor in Council shculd have the right from time to time to make and enforce re-gulations to prevent the solicitation of business by such in-spectors and adjusters. spectors and adjusters.

That any company or association of underwriters should That any company or association of underwriters should be required to obtain a license entitling it to do business throughout the Province without a further license from the municipality, and, as a condition of obtaining such ficense, it should satisfy such department of its financial standing and make a deposit in cash or securities or a satisfactory bond of a guarantee company in lieu thereof for reinsur-ance of its risks to be administered by the department, the amount of such cash or bond to be determined by the in-spector after considering the evidence submitted. That such department should have full power to investi-gate all fire losses and give out the information as obtained

gate all fire losses and give out the information as obtained upon request.

That the department should have full power to investigate all fire losses and cancel licenses, subject to an appeal to the Lieutenant-Governor in Council.

That for the purpose of obtaining such a department a tax be imposed on premiums paid by all insurers doing busi-ness with licensed or unlicensed companies.

That there should be no discrimination in the amount such tax.

That there should be no provision for licensed brokers. That in consideration of the benefit derived from such departments and for the purpose of creating uniformity in licenses, if payable, the present municipal license fees should be abolished.

August 27, 1910.

THE MONETARY TIMES

Toronto. Ont.

It happens frequently that a broker will bring into the agent's office a list of plate glass measurements, stating that the sizes listed are to be set that day, with a request that a policy be issued to cover, dated the next day, as he is sure the work will be completed by that time, says the United States Fidelity and Guaranty Bulletin. In such cases the policy should not be executed until some one from the office has inspected the risk and ascer-tained if the glazing has actually been finished and the states

tained if the glazing has actually been finished and the glass

spection.

the old policy are reported under the new policy as having just occurred. Inspections disclose such conditions and en-able the agent to render his patron the most efficient service possible, and at the same time gain the reputation of being one who completely protects his client by properly describing the coverage contemplated by the policy.

SOME INTERESTING STATISTICS.

The number of certified insane on January 1 last was, in relation to the whole population, as 36.1 to 10,000. On this basis it is interesting to ascertain, from the statistics given, in which occupation the proportion of insanity is greatest and least.

The following are the highest recorded :--

a set manage to	corner.	
Occupation.	a san Pril	Per 10,000.
Civil and mining engineers		52.5
warenousemen		47.1
Ironworkers	and the second second	16.0
General laborers		30.1
Pensioners		36.4
Costers and street sellers		28.5
Artists (painters, sculptors, etc.)		27.2
Domestic servants (female)		25.2
Livery stable keepers		20.0
Architects		19.5
Shopkeepers and dealers		10.1
Bomestic servants (male).		F7.2
Merchant service		16.0
musicians	14 13 1-	16 5
Commercial travellers		15.5
Lawyers	2	13.3
	* * * * * * * * * * * *	15.2

higher proportions of mania and dementia, especially senile cases. There are more women than men among the insane, and more single persons than married or widowed. The death rate among the mentally afflicted is more than six times as high as the general death rate. Twenty-five cases of spicide among has the general death rate. of suicide among patients occurred last year.

LIFE UNDERWRITERS CONVENTION.

With twenty eight branch organizations now on the books of the Canadian Life Underwriters' Association, this body may be congratulated on the progress made during the past year. Realizing the possibilities in the Western field several branches were organized throughout the prairie provinces, the association now reaching from coast to coast. Sydney, Cape Breton, is the most easterly branch while Van-couver, B.C., boasts of an enterprising and flourishing body. It is expected that the convention this year will be a greater success than in former years, and in keeping with this, The Monetary Times has arranged for the publication of a special issue on Séptember, 10th, which will breathe life insurance from cover to cover from cover to cover

INSURANCE ON BRUSSELS FIRE.

A cable message from London states that the total loss by the fire at the Brussels exhibition is now estimated at \$10,000,000. The burned sections include the whole of the "Kermesse of Brussels" and "Luna Park." The "Galerie Francaise," the Belgian section, the British section, and the Francaise," the Belgian section, the British section, and the "Ville de Paris" are all total losses, while the French section was damaged about 25 per cent. The loss in the Belgian section was greatly reduced by the recovery from the ruins of the magnificent collection of precious stones valued at \$3,, 000,000, and practically unharmed. The loss in the French section was increased by pillaging, there being very thefts from the French jewel exhibit. Most of the milliners' exhibits, which were insured for many francs, were, however, saved. The heaviest losses occur in the Belgian and English sections and are patricularly severe in the latter because of

sections, and are particularly severe in the latter because of the destruction of many art treasures and tapestries, one private exhibit alone being insured for \$500,000. Lloyds, London, underwriters are heavily interested through policies covering fire, marine, burglary and all risks

to an amount exceeding two million dollars.

The English fire offices have net losses of between fifteen and fifty thousand dollars, while the Belgian and French companies have large lines. As stated in The Monetary Times las, week, while two leading Canadian companies had accepted risks at the ex-

hibition, their property was not in the burned area, and, there-fore, they have not lost.

GROWTH OF WESTERN CANADA.

CROWTH OF WESTERN CANADA. A page of statistics issued by the Winnipeg Development and Industrial Buréau, gives an excellent outline in figures of the growth of Western Canada during the past seven or eight years. The story is full of significance for the people of Eastern Canada, with special ignificance to the manu-facturers and business men whose trade is largely made up of orders from the Mest. Stated facts and figures also show that Western Canada has grown and developed, and is convincing by being a statement of business facts. The feature in this case is the clear, graphic and con-cise way in which an important story of progress and of opportunity is told. It is a convincing portrayal, because it deals with definite facts. There are no delusions. Just plain figures, proving what has actually been accomplished and forecasting what can and will be achieved. In this instance the statistician has worked out the prac-tical results of one of the most wonderful records of growth in population, business and industry on this continent. It leaves upon the mind the indelible impression that Winni-peg, the most important commercial centre in Canada be-tween Toronto and Vancouver, surrounded by a territory teening with material wealth, has started upon a career of substantial progress that seems likely to develop one of the great cities of Ametica. great cities of America.

substantial progress that seems likely to develop one of the great cities of America. The chief question suggested by the statement of money earned, and money spent in the West, is : What portion of this large sum came to Eastern Canada? In the manufac-uners of the Uniter States, we have keen and aggressive competitors for the grade of our West. They are liberal and dapable advertisers, they dater to trade as they find it, and their case is helped in the West by the fact that thousands of people from the States—kast year well up to a hundred thousand—go to Western Canada each year. These people have money; they make money; they spend it freely for farm implements and manufactured goods of all sorts. Their disposition is quite naturally to buy goods made in the States where they cornerly lived. As an almost invariable, rule, however, the people who come from the States to Western Canada make good citizens and are open to con-viction on the point of purchasing home-made goods—Cana-dian-made goods. It is an important part of the business that our manufacturers and wholesale houses do with the West what they consider closely the best means of getting the lion's share of a estern trade.

WHAT WILL THE HARVEST BE?

Free Press' Estimate, After Careful Investigation, Says One Hundred and One Million Bushels-Monetary

Times' Figures are Ten Millions Less.

This year's crop estimates have varied from less than ninety to more than one hundred million bushels. The sixth annual estimate of the crop in three Western provinces pub-The sixth lished by the Manitoba Free Press this week places the wheat yield in Manitoba, Saskatchewan and Alberta at 101,236,413 bushels, divided by provinces as follows : Manitoba, 28,660,616 bushels; Saskatchewan, 65,250,000; Alberta, spring, 5,370,-

The oat crop for the three provinces is placed at 108,-301,000 bushels; barley, 7,130,770 bushels, and flax, 7,729,150 bushels.

Summing up the conditions in the West, the report says Summing up the conditions in the West, the report says that the old province of Manitoba has had to bear the brunt of the exceptional season of 1910. The light snowfall during the winter months, the warm and dry March, the cold April and May, followed by a dry, hot June, made a combination that would have been entirely too much for almost any country, yet, in spite of these abnormal conditions, Manitoba as a whole had had a paying crop.

Conditions in Manitoba.

Manitoba this year is sharply divided into north and south. The largest wheatfields are in what is known as the south-western and south central districts. In these, 2,440,488 south-western and south central districts. In these, 2,440,488 acres are sown to wheat, and all indications point to one-third of this being a total loss. The average crop of the balance will be about ten bushels. The north-western, north central, and eastern districts, with 1,073,644 acres to wheat, will average fourteen bushels. Oats in the south-western and south central districts cuffered more than wheat, and the cuerce is not here then

suffered more than wheat, and the average is not more than ten bushels. In the other three districts the average is twenty-five bushels.

Saskatchewan, suffered less from drouth in proportion to the area under cultivation than the other provinces. The acreage in wheat was 4,642,000, of which about 150,000 acres will not yield a marketable crop. The average yield for the province will be about fifteen and a half bushels, making allowance for hail and late frosts.

South Alberta Has Suffered.

Oats in Saskatchewan have suffered more than wheat. Placing the splendid yields in the north against the very poor crops in the south, the average over the whole province will not be more than thirty bushels.

will not be more than thirty bushels. In Alberta conditions are sharply divided into north and south of the main line of the C.P.R. The south has suffered severely from drouth, and here are located the largest areas of both spring and winter wheat. One-fifth of the winter wheat acreage will not be cut. A safe average for winter wheat is nineteen bushels. The sample is exceptionally fine. Spring wheat is extremely patchy, with a very large propor-tion of the southern districts useless, while the northern dis-tricts average sixteen to seventeen bushels. tricts average sixteen to seventeen bushels.

Eleven Bushels to the Acre.

A total of eleven bushels on the acreage originally sown is the nearest possible estimate. The average rainfall in the southern districts has been but five inches in thirteen months, and it is marvellous that there is any crop at all.

Oats in southern Alberta are almost a total failure, but fortunately two-thirds of the oat acreage is in the north, where the crop is generally good. The average will be about thirty bushels.

Ninety Million Bushels.

The estimate of one hundred and one million bushels seems to be a generous one. From reports made to The Monetary Times by its correspondents, several of whom have just completed a trip through the Western provinces, it is thought that a wheat crop of ninety million bushels whom will be a good one, in view of the drouth in Manitoba and the poor results in certain parts of Alberta.

The first carload of 1910 wheat to arrive at the head of the Canadian lake navigation was inspected at Fort William last Saturday by the Dominion grain inspectors. Canadian Pacific officials say that the big grain rush will not com-mence until early next month, and that, although it will be heavy while it lasts, its duration will be shorter than in some former years.

The gross earnings of the Ontario Power Company at Niagara Falls, for year ended June 30th, was \$719.898, from which was deducted \$181,217 for operating expenses, leaving the net earnings at \$538,580.

Stock Exchanges and Investments

STOCK MARKETS REMAIN DULL.

Montreal Street Railway Excites Interest-New York Market-South African Script.

Toronto, August 25th.

Toronto, August 25th. It is difficult to make any deductions from the trading on the Toronto Stock Exchange this week. The volume of transactions has been so small that the only inference to be drawn is that the investor is not turning his attention to stocks during the hot weather. On weanesday afternoon, only one hundred and eight shares were sold on the local board, these representing sales of Kogers, Kio, Black Lake, Duluth, Superior, Twin City, and Maple Leaf. In a dull Market, Twin City has perhaps been most prominent, on one occasion this week contributing one-third of the total transac-tions. Rio acted favorably on Thursday upon the announce ment of excellent earnings during July. In anticipation of the first dividend payment, Maple Lear, both common and preferred, exhibited an upward tendency.

preferred, exhibited an upward tendency. The London Stock Exchange has listed £530,000 British Columbia Electric 4% per cent. bonds.

* Montreal, August 25th.

930

Montreal, August 25th. Perhaps Seeking Control. The stock markets have been higher during the past week, but at the moment they are again lower.» Dominion Steel Corporation crossed 64, but subsequently it came back again, and is now in the vicinity, of 61 to 62. Canadian Pacific was up above 102 and then sold off again. It is said here that the forest fires of the West are affecting it, inasmuch, as to-day it experienced a break, declining to 188. Soo Railway was also weaker, having that four points during the week, and was also weaker, having lost four points during the week, and

as to-day it experiences in the promised using the week, and being now 127. Quebec Railway has taken a number of spurts which made many holders anticipate the promised rise to nearly 50, but selling orders sent the price back again and trading is still going on at about 41 to 42. The rest of the market showed little change, and there was nothing of great interest, save for one issue, this being Montreal Street Railway. That there is something "going on" in Street is no longer open to discussion. Canadian Light and Power in-terests are credited with seeking control. They have in their possession a large portion of the stock of the company, although it is doubted if they have actual control, as yet. Whether the purchasing which developed in volume on Tues-day forenoon was on their account or not is hard to say. Some 1,600 shares changed hands, and in the process the market jumped from 242 to 250. Meantime, Canadian Light and Power stock was fairly active on the Unlisted Department, advancing from about 58 to 62. Street Railway has subse-quently declined again to 247, and the turnover is not great. The attention of the market is centred upon these two stocks, and no doubt there will be interesting developments before and no doubt there will be interesting developments before long. Montreal Power is steady.

long. Montreal Power is steady. New York Situation. Speaking of the New York Situation, Mr. Henry Clews Speaking of the New York Situation, Mr. Henry Clews says that the technical situation of the stock market has been visibly strengthened. The conviction spreads that the low prices at the end of July will not be seen again for some time to come. Although the recovery from the break has been sharp, perhaps too sharp, a good many stocks are still good purchases from the investment point of view. For the good purchases from the investment point of view. For the time being the investment demand has been checked, but confidence is steadily growing and our prominent bankers and financial leaders are daily becoming more and more con-fident regarding the future. This is shown by improvement in the bond market. There are still several uncertainties such as the crops, the political outlook, the Standard Oil and Tobacco cases the area of released on the several sev Tobacco cases, the question of railroad rates, etc., which are to be settled, but the worst respecting these it would seem has been fully discounted. Very soon two of the pivotal crops, corn and cotton, will be out of danger. The prospects for these are still improving. Corn promises to reach about for these are still improving. Corn promises to reach about a 3,000,000,000 yield, and current estimates are for 12,000,-000 bales of cotton, which is showing less deterioration in August than usual. There is still the danger of early frost, but each week reduces the area liable to such damage. Spring wheat crop is already turning out better than expected. After the Labor Day holidays business should begin to resume more normal activity. The vacations will be over, and the

stock market should feel a corresponding inspiration. Alto-gether the outlook is reasonably cheerful. The process of readjustment has been thorough in the stock market, and is now being worked out in industrial and commercial quarters. There is no reason for undue apprehension; on the contrary there is sound reason for believing that after a further period of rest the whole country will be entitled to a fresh forward movement upon a lower and more normal plane.

South African Script.

South African script, which has been quoted on the Western stock exchanges, will soon have passed from specu-lative realms. Of 6,991 issued by the Department of the In-terior, only 1961 are still on the market. The lowest monthly rate of absorption was in February, when the actual number of instruments registered was 190. If the present rate of ab-sorption continues there will be no script left in ten months. It can be assumed that a certain proportion will never be presented to the Department, but on the other hand there may be still some veterans who may establish their claim to a warrant.

A table of the Warrants issued as at January 1st, as com-pared with the position at August 15th, prepared by Messrs. W. Sanford Evans & Company, is as follows:-

A STATE AND A STATE AND	Jan. 1st.	Aug. 15th.

The city of Lethbridge is located in a rich agricultural and mining district, and is the metropolis of Sunny Southern Alberta

As a location for manufacturers or wholesale houses it offers, not an opportunity, but a certainty.

The city owns its own electric light and power plant and waterworks, and will supply power and water to manufacturers at very low rates.

Suitable sites for watchouses or manufacturers are controlled by the city, and can be obtained with trackage, at reasonable rates

The city has a population of 11,000, which is an increase over last year of 66 per cent. Building permits for 1909, \$1,268,215; increase over 1908, 246 per cent., and proportionate growth in other lines.

There are five large coal mines within five miles of the city, and the district is the richest agricultural district in the West, being the home of the celebrated Alberta Red Winter wheat, from which an average of twenty-eight bushels per acre is obtained.

There are five lines of railroad radiating from the city, the C.P.R., the A.R. and I. and the Great Northern, which gives freight competition and right freight rates.

One of the lines runs through the Crow's Nest Pass, for which district, with its large lumber mills and coal mines, this city is the natural distributing point.

Distributed along this line within 250 miles of Lethbridge, there is a pay roll of over \$1,000,000 per month. This in connection with the rich agricultural and mining district, of which the city is the centre, makes one of the best markets in America.

There is nothing that can be worn, nothing for use or ornament in the house, nothing for service in town or country, that this market does not demand.

Lethbridge to-day is not supplying one-third of the demands of its natural market.

Come to Lethbridge and help supply the other twothirds.

J.W. McNICOL

Secretary Board of Trade,

Lethbridge, Alberta

Remember, this market is not a prospect, but is an actual existing fact-a certainty to-day.

THE MONETARY TIMES

951

In deciding the case of the Dominion Pulp Company, which protested against the assessment made by the Collec-tor at Bangor, Me., on wood pulp imported from New Brunswick, Canada, Judge Somerville, president of the Board of United States General Appraisers, has reversed the Collec-tor's ruling and ordered that the entries be reliquidated with out the assessment of the countervailing duty of 25 cents per cord.

The wood pulp imported by the Dominion Company was assessed for duty under paragraph 393 of the Dingley tariff, at the rate there provided for, with the additional duty of 25 cents per cord as an export or countervailing duty. In sustaining the protest, Judge Somerville said: "In the case of Dominion Wood Pulp Company, G. A. 5583 (T. B. 24908), the Board held that the Province of New Brunswick imposes D0 export duty or sub wood or round timber exported to any no export duty on pulp wood or round timber exported to any part of the world. The importers claim that the countervailing duty was improperly assessed. Following said de-cision the protests are sustained, and the Collector's decision

to reliquidate the entries without the assessment of the additional or countervailing duty of 25 cents per cord. Note also the case of in re Meyer, G. A. 5592 (T. D. 25035), affirmed by the Circuit Court and acquiesced in by the Department in T. D. 26711."

The protests of Robert B. Ways, of Baltimore, and O. G. Hempstead & Son, Felix Salomon & Company, and J. W. Hampton, Jr., & Company, of Philadelphia, against the countervailing duty as provided for in the Payne-Aldrich tariff, were overruled and the Collector's decision affirmed in /In an opinion, written for the board, Judge each case. Somerville, said :-

"The importations consist of wood pulp from Sweden, "The importations consist of wood pulp from Sweden, which was assessed for duty under paragraph 406 of the Tariff Act of 1000, with an additional or countervailing duty under the proviso to said paragraph. The importers protest against the imposition of the additional or countervailing duty. The protests are overruled on the authority of in ite Bertuch & Company, G. A. 5062 (T. D. 30267), and the Collector's decision is affirmed."
