## POOR SECTIONS.

## OFFICIAL NOTICES.

**TEACHING DAYS.** The number of Teaching Days for the current term, closing April 30th, is 117; for the City of Halifax, 114.

The number of Teaching Days for the ensuing term, beginning May 1st, is 108; for the City of Halifax, 103.

**ADDITIONAL HOLIDAYS.**—To enable teachers more conveniently to aid Trustees in preparing returns for transmission to the Inspector, the Council of Public Instruction has been pleased to order that hereafter "the 30th of April and the 31st of October shall be holidays in the Public Schools, and when either of these days shall fall on Saturday or Sunday, the preceding Friday shall be a holiday." At the request of the Board of School Commissioners, the Public Schools of the City of Halifax are excepted from the operation of this Regulation.

**SATURDAY AS A TEACHING DAY.**—The Council of Public Instruction has ordered that to existing Regulations defining the limits within which school may be kept on Saturdays (see Manual, page XV), there shall be added the following: "Provided that nothing contained in these Regulations shall prevent a teacher from teaching on Saturdays in order to make up for *not more than two teaching days* necessarily lost at the beginning of the term in traveling from a distant section in which he (or she) had been previously engaged."

**COUNTY ACADEMY RETURNS.**—In addition to the special returns to Education Office, Trustees will send the usual returns to Inspectors. In no case should drafts for County Academy grants be drawn on the Superintendent of Education without previous authorization.

**ARBOR DAY.**—To encourage the proper adornment of school grounds, and thereby the cultivation of a taste for the beautiful in nature on the part of the pupils, the Council of Public Instruction has ordered the publication of the following Regulation:

"On such one of the first thirty teaching days of the Summer Term, as according to season, weather, or other circumstances may be deemed most suitable, Trustees are authorized to have substituted for the regular school exercises of pupils, the planting by the latter of trees, shrubs, and flowers on the grounds surrounding the school house. The day devoted to this purpose shall be known and entered in the Register as 'Arbor Day,' and when duly observed full credit will be given for it in the apportionment of public funds, on the basis of the actual attendance of pupils as ascertained by roll call at the beginning of the exercises, or other convenient time during their progress. Additional value and interest should be imparted by mingling with the practical duties of the occasion, short addresses from the teacher and other competent persons on the aesthetic and economic importance of arboriculture. During their summer visitation, Inspectors shall take note of all schools in connection with which 'Arbor Day' has been observed."

There will be found subjoined some practical suggestions which will be serviceable to those who wish to make the occasion a really profitable one. The 18th of May has been fixed by the Maritime Provincial Grange as an "Arbor Day" within the jurisdiction of that body, for the purpose of impressing on the public mind the importance of restoring and preserving our forestal resources. Where the season suits, there might appropriately be a co-operation of the Grangers and the school authorities.

In selecting trees, it is well to avoid those that bear flowers or edible fruits, as such in the flowering and fruiting season are apt to meet with injury from ignorant or mischievous passers-by, and to offer temptation to the pupils. Butternuts and Horse Chestnuts are not to be commended as shade trees. The Balsam Fir is objectionable from the liability of its balsam to stain the hands and clothing. Deciduous or broad-leaved trees are easily grown, their fibrous roots rendering transplanting a comparatively simple operation. If care is taken, the young saplings of the elm, maple, and ash, as found in the under growth of the forest, can be transplanted without difficulty.

No school grounds should be without a suitable number and variety of the standard deciduous trees. However, during the winter season they are bare and unattractive, and afford little or no

shelter. On the other hand, evergreens such as Spruces, Pines, Hemlocks and Cedars, retain their foliage and provide a shelter as useful in winter as it is grateful in summer. Trees should always be planted according to a definite plan, being arranged either in curves or straight lines, according to circumstances, and with an obvious relation to the building and fences. They should not be placed so near the school house as to interfere with the free play of light and air.

Our native trees grow so freely in the woods that we are apt to suppose that they are merely to be taken up by the roots and transplanted, to start at once into as vigorous growth as before. This is a mistake. Great care should be taken in digging up the trees to preserve the fibrous roots; long runners should be cut across with a sharp knife, and not torn. All trees thrive best in well-drained soil, varying from sandy loam to clay. A clay loam suits all descriptions. The holes for the trees should always be made before the trees are brought on to the grounds. They should be too large rather than too small. In filling in, the better soil from near the surface should be returned first, so as to be nearer the roots, but where the soil is at all sterile, and generally, there should be put below and around the roots, some well-rotted compost, mixed with sand and sandy loam, in order to promote the growth of the rootlets. In setting the tree it should be placed a little deeper than it stood before, and the roots should be so spread out that none are doubled. When finally planted the tree should be tied to a stout stake in such a way as to prevent chafing of the bark. Some mulch or stable litter should then be thrown around the stem to protect the roots from drought. Stirring the ground is preferred by some cultivators to mulching. In transplanting evergreens, the roots should not be exposed to air or light—especially to the heat of the sun—more than can be helped.

Several varieties of shrubs planted together in clumps produce a very pleasing effect, while the care of judiciously arranged flower beds will be to the children an important means of education.

**APPOINTMENTS BY THE COUNCIL OF PUBLIC INSTRUCTION.**—Mr. E. J. Lay has been appointed Inspector of Schools for District No. 10, (Cumberland, West Colchester and Stirling) in place of Mr. W. D. McKenzie, resigned.

Rev. Ebenezer Ross has been appointed Provincial Examiner for Teachers' licenses in place of Rev. James Ross, D. D., deceased.

## EXAMINATION FOR TEACHERS' LICENSES.

These examinations will begin at 9 a. m. on Tuesday, July 20th. They will be held at the usual Stations throughout the Province. Candidates will particularly observe that their applications for admission to examination are to be forwarded to the Inspector of the District in which the Station at which they wish to be examined is situated, and not to the Deputy Examiner of the Station if he be not the Inspector. Printed forms of examination (though not required) may be obtained from the Inspectors after May 1st. The place entered in the form of application should be that to which the candidate wishes his certificate of admission to examination to be mailed. The revised Regulations of Council (re-published in this number of the JOURNAL) should be carefully read by intending applicants.

To accommodate candidates for licenses residing in the southern part of Inverness County, and in other counties bordering on the Strait of Canso, an examination station has been established at Port Hawkesbury, C. B. Applications having reference to this station should be forwarded to John Y. Gunn, Esq., Inspector of Schools, Broad Cove, C. B.

## ANNUAL SCHOOL MEETING.

The date of the Annual School Meeting for the current year is **Monday, Sept. 27th.** Trustees should carefully observe this date, and not fail to legally announce the meeting by notices posted in three public places within the Section, at least five days previous to date of meeting.

In Sections in which schools are organized for the first time, and which consequently are without Trustees, notices should be posted by the Inspector.

The following is an outline of the order of business of annual meeting:—

- (1.) To elect a chairman of the meeting.
- (2.) To elect a new Trustee or Trustees. (A majority of votes, i. e., *more than half*, is required for this election.)
- (3.) To receive and pass upon the report of the Auditors of Accounts.
- (4.) To receive the report of the Board of Trustees concerning educational operations of the year and the requirements of the Section for the ensuing year.
- (5.) To determine by a vote of the majority of the ratepayers present what amount shall be raised by the Section during the ensuing year for any, or all, of the objects authorized by law; and if any sum is included for the purchase or improvement of grounds or for the purchase or building of school-houses to fix the period (not to exceed twelve years) within which the sum voted for these purposes shall be collected; and, if necessary, to authorize the Trustees to borrow money for the procuring of houses or lands.
- (6.) To transact any other necessary business.

**COUNTY ACADEMY ENTRANCE EXAMINATIONS.**—Pupils applying for admission to County Academies for the term beginning May 1st, 1886, will be examined by the local authorities of the school on the subjects prescribed for the recent entrance examination. The papers written (together with copies of the questions set) must be carefully preserved for official inspection.

At the next annual entrance examination (Oct., 1886) papers will be set by the Department of Education as follows: (1) Grammar, Analysis, and Composition; (2) Geography; (3) British and Canadian History; (4) Arithmetic; (5) The Elements of Useful Knowledge. The latter paper will be designed to test the acquaintance of candidates with the substance of the oral *Lessons on Nature* in the Common School Course of Study, which Course will also determine the limits of knowledge in all the above subjects.

**BOTANICAL SPECIES.**—The following *fifty* common species (occurring in almost every School Section of the Province) are named for analysis and classification in connection with the *Botany of the First Year of the High School Course*. A description of the *genera* and *orders* in which these species are included should also be required. This list should be regarded as a *minimum*. Few teachers really interested in teaching science will find much difficulty in adding another fifty, which should include a few specimens of *mosses*, *liverworts*, *lichens*, *fungi*, and *algae*, as well as some additional *phanerogams*. This list will, of course, be revised from time to time.

Where the genus alone is mentioned the teacher is supposed to select the species most available in the neighborhood. Some of these flowers are very minute, and their study will require the use of a cheap botanical lens. It is important that each student should own a lens, and be taught how to use it. Students should be exercised in drawing the small parts enlarged on the black boards and in their note books. As a specimen of the mosses is recommended "The common Hair Cap," *Polytrichum*; of the Liverworts *Marchantia*; of the Lichens, *Usnia*, *Sticta* or *Cladonia*; of the Fungi, *Agaricus campestris*, the "edible mushroom."

## INDUSTRIAL DRAWING FOR HIGH SCHOOL COURSE.

1. For first year. Nos. 5 and 6 of the American Text Book of Art Education (retail price 15 cents each.)
2. For second year. Nos. 7 and 8 of the same series, (retail price, 25 cents each.)

The above books belong to the same series as those already used in our Common Schools. Nos. 5 and 6 are accompanied by a Manual for Teachers, giving full directions in regard to the use of the books. The retail price of this Manual will not exceed 60 cents. A small Manual accompanying Nos. 7 and 8 will be supplied gratuitously to teachers whose circumstances require them to use those books. It is not supposed that for the year about to begin many schools will require anything in advance of Nos. 5 and 6. As it has been thought well to omit No. 4 entirely from the Course of Study, the following hints are supplied:—

Before beginning work in Book No. 5, pupils should be taught to draw by freehand the following plane geometric figures, and these figures should be drawn or derived from the geometric solids—thus,

- The Circle from the Sphere.
- The Oblong from the Oblong Block.
- The Right-angled Triangle from the Square Prism.
- The Isosceles Triangle from the Square Pyramid.
- The Equilateral Triangle from the Equilateral-triangular Prism.
- The Ellipse from the Ellipsoid.
- The Oval from the Ovoid Form.
- The Hexagon from the Hexagonal Prism.
- The Pentagon from the Pentagonal Prism.
- The Octagon from the Octagonal Prism.

By deriving the plane geometric figures in this way, pupils will have a more definite conception of them than if drawn from flat copies or from blackboard copies alone. As a rule, the shortest dimension of each figure should be four inches.

For definitions in regard to these plane geometric figures consult pages 35 and 36 of the Manual, Part III., accompanying Drawing Book No 5. The drawings should be made on Manilla paper and pupils should be practised on rapid work. Where no previous instruction in Drawing has been received, attention should be paid to the holding of the pencil and the character of the line produced. The pencil should be one of medium softness.

## TEXT BOOKS.

**Comment.**—In performing the duty of selecting and prescribing text-books for the Public Schools, the Council of Public Instruction has availed itself as fully as possible of the knowledge and experience of those who are engaged in the practical work of education. The sole aim of recent modifications has been to secure, at reason-

able cost, a series of texts *adapted for use in schools*. Change in authorized books is *in itself* a very undesirable thing; and it is hoped and believed that matters may remain where they are now for years to come, without substantial alteration.

The general effect of recent changes has been to largely and permanently reduce the cost of text-books, especially to pupils pursuing an extended course. The Council is engaged in inquiries and efforts with a view to still further diminish expense by securing, wherever practicable, a lowering in price and an improvement in the mechanical quality of the prescribed texts.

#### Inspectors and Teachers are reminded:

1. That the Course of Study for Common Schools encourages an economical expenditure for text-books by providing a system of oral instruction for junior classes. Too many teachers try to satisfy themselves in respect to their more youthful pupils by placing in their hands text-books not needed in any case, and worse than useless when unaccompanied by proper oral exposition. A text-book should not be required for a child until he is prepared to use it intelligently.

2. That the regulation which makes it illegal and improper for a teacher to introduce unauthorized texts, by no means hinders him from giving his pupils the benefit of other treatises to whose explanations he may attach importance. The progressive teacher will always have such aids within reach, and will so use them as to impart variety and interest to his instructions.

The whole series, with manual complete, can be obtained from A. & W. Mackinlay at \$9.50. Steps are being taken to recommend a cheaper series for the smaller class of schools.

Candidates for teachers' licenses should read carefully the Syllabus of Examination as published in this issue. The examination of First Class Candidates is limited, as it will be seen, to *Inorganic Chemistry*. The matter of English literature for Grade A Candidates was somewhat obscurely stated in the October Journal. In the Order of Examination, as published on third page, the assignment for 3rd Session of Friday should read "Xenophon and Ovid."
