Petersen, Tait & Co. Said to Be Having Trouble.

OPPOSITION VERY STRONG

According to a Cablegram Received in Montreal Yesterday.

Mr. W. T. Costigan Reported to Be in Financial Difficulties—A Girl Alleged to Be Possessed of a Devil Has Disturbed a Pilgrimage to Bonne Ste. Anne, and a Priest Says All the Fools Are Not Dead Yet—Changes in Street Railway Management—Montreal News.

Montreal, Aug. 20.—(Special.)—The following cable was received here to-day, dated London, Aug. 20: "It is currently reported again that Petersen, Tait & Co. have not met with the success they anticipated in securing the capital for the Canadian fast steamship service. The opposition to them has been very strong, and unexpected difficulties have been met with. It is expected that an official announcement in connection with the matter will be made shortly."

Mr. Costigan's Business Trouble.

A sensation was created in business circles today by the announcement made that Mr. W. T. Costigan was in financial difficulties. Mr. Costigan was largely interested in the matter. The matter seemed to be all the more grave by the fact that Mr. Costigan had left the city and had been located in New York. Mr. Elliott of the Montreal news to that city yesterday to have an interview with the Montreal merchant in question. The banker will return to the city to-morrow.

Some Fools Living Yet.

The old ladies of the town are very much worked up over the case of a young woman named Ouellette, who by her strange conduct troubled the peace of a recent pilgrimage to the Bonne Ste. Anne. It is claimed that the girl is possessed of a devil, and many go to see her. The girl is said to be in the possession of a devil, and many go to see her. The girl is said to be in the possession of a devil, and many go to see her.

Street Railway Changes.

Mr. Granville C. Cunningham has resigned his position here as chief engineer of the Montreal Street Railway, to accept a similar position in Birmingham, Eng. Being replaced in Montreal by Mr. F. Franklin of the Toronto Street Railway.

Strike Gaining Strength.

Wheeler, W. G. says the coal strike seems to be gaining strength on the Norfolk and Western Railroad, but it will take rapid work there to make up for the losses suffered at Fairmont and in the Kanawha and New River valleys. An announcement of the National Executive Board of the coal miners that all the railroads and federal workers are to be called upon to join the strike is looked upon by local labor leaders as a practical admission of defeat.

Time for United Action.

Columbus, O., Aug. 20.—The miners' officials have adjourned after having mapped out a statement to the effect that the time has come for united action by labor organizations.

The Marchers Discouraged.

Evansville, Ind., Aug. 20.—Most of the local miners who were induced by the marchers to quit work have returned to work, and now there is only one of the mines not in operation. The marchers are still here, but feel rather discouraged.

"Where Dentistry is Painless."

NO PAIN REQUIRED.

In a Dentist's Chair

Perhaps your nervous anxiety—your experiences led you to believe it a place of pain, agony—torment. Truly, the steps taken towards the dentist are the most unwilling and why? Nervous dread of the pain which will attend the dental operations is the main cause. It is needless to say that the dentist's chair is the cause of this dread. It is needless to say that the dentist's chair is the cause of this dread. It is needless to say that the dentist's chair is the cause of this dread.

A Full Set of Teeth, guaranteed for five years, \$5.00. NEW YORK REAL PAINLESS DENTISTS.

THE POSTAL ARRANGEMENTS

Which Has Been Made for the Klondike Region.

THERE IS A LITTLE TROUBLE

In the Minds of Some as to Whether the Scheme Will Work.

Mr. Mulock Accepts the Proposition to Carry the Mail to Circle City—The Customs Department Finds That There is Discrimination in Favor of American Over Canadian—Engineer Jennings is Going Up to Fairbanks Report.

Ottawa, Aug. 20.—In connection with the international postal agreement, the full text of the American Government, as proposed, has not yet been received. The proposition was made by the Postmaster-General here to the Postmaster-General at Washington, and the negotiations have been carried on between these two officials throughout.

TRADE IS EXPANDING.

Bank Clearings Show a Large Increase All Over the Continent.

New York, Aug. 20.—Bank clearings total at 87 cities for the week ended August 19, with comparisons, as tabulated by Bradstreet's, show total clearances of \$1,139,783,615, an increase of 40.2 per cent. as compared with the corresponding week last year. Outside of New York City the clearances were \$435,390,518; increase 20 per cent.

RESULTS AT BRIGHTON.

New York, Aug. 20.—In spite of the fact that a moderately good card was provided for the day's racing at Brighton, the day was a perfect one, the attendance being higher than usual. SCIENCE AND ART

Many Important Topics of Interest to Canadian Readers Dealt With by the Scientists Yesterday.

The several sections of the British Association for the Advancement of Science are now down to work in earnest. Yesterday the presidents of the sections of Anthropology and Botany read their addresses, which had been postponed from the previous day. All the day was spent in reading learned papers by the well-known specialists. Many of the subjects, however, are treated technically, and are beyond the comprehension of the average newspaper reader. Below will be found a synopsis of the work of the different sections:

ANTHROPOLOGY.

Mr. Wm. Turner speaks on some distinctive characters of human structure. In the Anthropology Section the feature was the presidential address. The remaining papers were contributed by Prof. Anderson, Stuart, Prof. A. Macalister, Dr. W. J. McGee, Dr. Franz Boas, Prof. Lightner Witmer and Dr. H. O. Forbes.

President's Address.

Prof. Sir William Turner, M.B., LL.D., D.C.L., D.Sc., F.R.S., L. and E., President of the section, read an excellent address on "Some Distinctive Characters of Human Structure." He said: "When the British Association for the Advancement of Science held its first Canadian meeting at Montreal in 1884, the subject of Anthropology, which had then been attained on that occasion for the first time the rank of an independent section. It was presided over by the accomplished writer and learned anthropologist, Dr. E. H. Tylor, who has since been the subject of his opening address several special references to the American aspect of the science are in evidence. Whether the aborigines are the descendants and representatives of the same stock as the European races, or whether they represent a distinct race, the question of the Asiatic origin of the American Indians, and the arguments derived from anatomical structure, language and social framework, bearing upon this subject, have been the subject of much discussion in the picture writings of the Arctic expeditions in the calendar years of 1850 and 1851, and the common use of certain names of children's stories referred to. It is not my intention, even had I possessed the requisite knowledge, to engage on the topics so ably discussed by my eminent predecessor. As my own studies have been especially directed to the physical side of anthropology, rather than to its archaeological, historical, philological, moral and social departments, I naturally prefer to call your attention to those matters of the question which have from time to time come within the range of my personal experience. I have endeavored to enlarge on the subject of my address, "Some Distinctive Characters of Human Structure."

When we look at man, and contrast his form and appearance with other vertebrate creatures, the first thing that strikes us is his capability of assuming an attitude, which we distinguish by the name of the erect attitude. In this position the head is balanced on the summit of the spine, the lower limbs are elongated into two columns of support standing side by side, and the trunk is perpendicular to the surface on which he stands or moves, and his mode of progression is bipedal. As a consequence of this, two of his limbs, the arms, are liberated from locomotive functions, and acquire great freedom and range of movement at the shoulder joint, and allow and between the two bones of the forearm; the

The influence of Kew, the principal centre of systematic botany, and of the illustrious John Hooker, and the influence of the Horticultural Society, and the army of systematists so busily shifting the frontiers of the subject, will need ample space for satisfactory treatment. Association Services at St. Michael's Cathedral.

To-morrow, Sunday, there will be two very interesting and attractive services at St. Michael's Cathedral, Bond and Shuter streets. The services are specially intended for the visiting members of the British Association. There will be a musical solemn high mass at 11 a.m., at which the very Rev. Vincent McCallan will be celebrated. The Rev. P. A. Halpin, S.J., of New York, one of the most learned and eloquent members of the United States clergy, will preach on "God and Science."

KILLED THEIR OFFICERS.

Men at Sea Claim That They Had Too Much Work and Too Little Food and They Had Desperately Hungry.

Boston, Mass., Aug. 20.—A special cable dispatch to The Herald from Buenos Ayres says: Only meagre details of the terrible murder at sea on board the three-masted schooner Olive Pecker have as yet been received here. The crew of six men are at Bahia, over 1000 miles distant, and will be sent to the United States for trial on a Friday possible date. They are: William Horburgh, engineer, who acted as second mate at sea; J. Anderson, cook; seaman Andrew F. Marsh, Manuel Barriat, John Lend and M. Barstad. The tragedy occurred about 125 miles off the South American coast on the evening of Friday night. John Lend had been the grumpler of the crew during the entire voyage, and had succeeded in procuring all provisions, subject to monopolies for the fur trade, and in the farming of the revenues which will be granted from time to time by the King of France to his viceroy in the island of Madagascar...

Lead and a companion, whose name is not being recalled, were seen to be going to the cabin while Captain Whitman and First Mate Sanderling were in the kitchen. They then kindled a fire in the afterhold. It was only when the schooner was in flames that the remainder of the crew knew anything of the tragedy, and when the alarm was given there was a rush to take to the boats. The captain and first mate being missed only as the party left the burning vessel. The schooner was scuttled by the crew, seeking a port, the four faithful members of the crew forced a confession from Lend and his companion. They found no sympathy among the other men, and without a moment's delay the crime was reported to the authorities. The British Consul Shute immediately on reaching shore. All six were ordered under arrest, and the schooner was impounded until they can be shipped to Boston.

GOOD MR. FOLGER

Gave the Nurses a Chance to Make Some Money for Their Hospital Project.

Kingston, Ont., Aug. 20.—This afternoon from 2 to 10 o'clock the fare-boxes on the electric street railway were in the hands of young ladies, Mr. D. W. Folger, with his usual goodness of heart, placed the cars at the disposal of the nurses' almshouse to raise money for the fund in aid of building a nurses' home. The young men in blue coats and brass buttons were replaced by young ladies in snow-white uniforms, trimmed with red, and red crosses on the right arm. The ladies, dressed in the most elegant attire, were seen to be going to the cars. William Smith, hanging on to the side of an electric car last night, looked out and saw some of the ladies. He leaped too far and had a collision with a tree. His head was badly smashed. He is still unconscious. Death may ensue.

MEXICAN DOLLAR MAY DO AS NEW YORK SILVER DOLLAR.

It Takes \$2.45 Mexican Money to Buy an American Silver Dollar. New York, Aug. 20.—A dispatch to The Herald from the City of Mexico says: Exchange on New York has reached 145 premium. In other words, it takes \$2.45 Mexican money to buy an American silver dollar containing less than the Mexican.

Rest Toronto.

The joint meeting of the Committee of the Presbytery and the Management Committee of Emmanuel Church will meet again next Tuesday evening. The Kingston road, over which the race for the Dunlop trophy will be run today, is in excellent condition. The business of the Kingston road has made provision for a good program of music, which will be furnished to the spectators who select their place from which to view the race. The Gas Company is rapidly laying its pipes on Main-street, Messrs. Carman, Boston and Cable have introduced the lighting into their building. The Umberto Primo picnic has been postponed until Aug. 22. It is to be held in the interests of the Italian Benevolent Society. Mr. William Hellwell, one of the oldest residents of York County, died at his residence at Highland Creek yesterday afternoon. The deceased was 87 years of age. For a number of years he was an active brewer and miller at the Don. He was always a staunch supporter of the Conservative party and a faithful member of the Church of England. He leaves a large family.

THE ROUNDED CORNER—QUEEN and YONGE STS.

CANADA HAS PLENTY.

But There is a Deficiency in European and Asiatic Wheat Crops—Fruit in Nova Scotia.

Washington, Aug. 20.—Advices to the Agricultural Department confirm the predictions of a considerable deficiency in the European wheat crop, while rye, which is the chief bread grain of eastern Europe, is also short. This fact, as well as the wheat deficiency, will tend to restrict the exportation of the latter from those European countries which usually have a surplus of wheat for export to the United States; their aggregate contribution to the European supply will be materially affected by the fact that India, decimated by the famine, will have practically no wheat to export. United States Consul O'Connor, at Yarmouth, N. S., reports that early crops in the southwestern part of that province were much injured by wet weather during the first half of June, which also prevented planting the usual proportion of wheat. The services of the country were a failure. Apples will be a short crop. Unofficial reports from Ontario show an unfavorable change in the fruit prospects, with a probable small crop of apples. In Western Ontario the fruit outlook is better, but there will be a heavy crop around Quebec, while in Manitoba the wheat area exceeds the reduced acreage of last year by 29 per cent and is 14 per cent greater than the 1895 acreage, until then the year of the largest acreage.

The "Province" Map of the Klondike. One of the best maps that have yet been published of the Klondike and gold-bearing regions of the Northwest Territories of Canada is that which has just been issued by the Provincial Publishing Company of Victoria and Vancouver. Accompanying the map is a vast amount of information of the various routes to the Klondike and as to the placer mining regions. In addition to the large map there is an outline one showing the main routes from Victoria and Vancouver, terminals of the C.P.R., Dyea and the river route to St. Michael's. The "Province" will be the favorite map for guidance and reference. It is published on paper at 20 cents; mounted on cloth \$1. Rev. THE POSITION OF PARTIES.
 Things political in this country are moving at a rapid rate these days, and we ask the attention of our readers to a few of the more salient points in the movement.

Take the Conservative Party first. Its principles are sound, but many of its leaders are wrong. Its principles never were so sound, and its leaders never so discredited. The Conservative Party in the last four years of its holding office was brought to destruction by the fatal effort made to settle the Manitoba School Question by coercing that province. The Conservatives were led into this fatal trap by the representations of certain Conservatives from Quebec; when it came to a vote of the people the people of Quebec overwhelmingly went against coercion and the coercionists. So bound up were the Conservative leaders in this question that they neglected everything else. The only thing else they attempted was a revision of the tariff in such a way that it was a momentary confession of want of confidence in the National Policy. They talked a great deal about closer trade with the Mother Country, and of a Canadian Policy, as against the hostile legislation of the States, but they did little beyond holding the Ottawa Intercolonial Conference. They hadn't the courage to make a straight offer for preferential trade, and they would barter the tariff on English goods, as against Yankee importations. They go about the country now saying they are protectionists and preferential traders. Their own principles of free trade and of commercial union have gone bad, and they are fairly open to the suspicion of masquerading in the Conservative mantle labelled Protection to Canada's industries and Preferential Trade within the Empire.

To put the political situation in a nutshell: the principles of the Conservative Party are the only principles suited to Canada; the Liberals are pretending to believe in some and to repudiate others of them; they are gaining any recognition that is coming to them by abandoning their own plans and picking up Conservative ones; and they are losing the confidence of the country by the foolish profession of Sir Wilfrid Laurier for free trade and his rejection of the preferential offer of Mr. Chamberlain.

What Canada wants is protection at home, preferential trade within the Empire, a Canadian policy, as against the United States, and these principles administered by men who are honest in their profession of them, and honest in an effort to secure economical and progressive government in other lines. The Conservative principles of old, administered by new Conservatives, would fill the bill exactly.

After all credit is given to Sir Wilfrid Laurier for his eloquence, his affability, his free trade pretensions in England and his statement that Canada wanted nothing in return for opening her markets to England. On both of these points he absolutely misrepresented the Canadian people and dumfounded Lord Salisbury, the Duke of Devonshire and Mr. Chamberlain. They were ready to declare for preferential trade, two of them did declare for it in such a way as to commit the great Conservative-Unionist Party of England, and to the amazement of themselves, and of Canadians especially, Sir Wilfrid said we did not look for any preference!

The country is now being run partially on Conservative lines, but by men who profess other principles. When these men profess their own principles they profess principles directly antagonistic to the welfare of Canada. A free trade Premier from Canada, wearing a Cobden Medal at this moment, is a political misfit, and a Canadian Premier saying we want nothing in return for concessions to England is a sentimentalist and not a practical statesman.

Canada appears to be on the eve of an era of prosperity. The crops of both Ontario and Manitoba are larger

than for many years past, and, what is better still, prices are high, which means the putting into circulation of large sums of money. The benefits resulting to trade from the latter must, therefore, be of great advantage to the business of the community, and the outlook for the fall trade promises to be the most encouraging in years.

Sales in new wheat were made yesterday at 83 and 85 cents per bushel at Ontario points, which is an advance of 22 to 23 cents over prices current a year ago. Manitoba wheat sold yesterday in Toronto at \$1.05, as compared with 70 cents a year ago. That the prices are likely to continue in this neighborhood, or even much higher, may reasonably be expected from the fact that there is a large shortage in the wheat crop of Europe this season. This shortage has been estimated by such an eminent authority as Beerholm at 354 million bushels.

Place beside this the reports from the United States, which are not very encouraging, owing to the blight, the shortage for export being placed at 103 millions at most, it will therefore be seen that the shortage in America and Europe combined is something like 220 million bushels, which will place Canada in the front rank of wheat-exporting countries.

The situation, therefore, is a strong one statistically, and it is generally conceded that the market will go much higher. The sudden stimulus here in prices was occasioned by rapid advances on the Chicago Board of Trade. Yesterday September wheat sold at 93 1/2 cents and May wheat at 95 1/2 cents, which were the highest quotations for years. The prices in New York and Duluth were \$1.

Fortunately the situation in Canada is a good one. High prices for farm products, together with the healthy development of her mines, must redound to the benefit of Canada as a whole. We confidently look forward to a general revival of business in all lines of trade, which has been gradually approaching our shores, until now it is almost upon us.

ROUTE TO THE KLONDIKE.
 A new all-Canadian route to the Klondike gold fields, via Cariboo, Cassiar and Teslin Lake, is now among the possibilities.

A movement is on foot to organize a cattle and supply company to start a cattle drive from Quesnelle to Teslin Lake, and when that point is reached to ship on rafts or scows down the lake and river outlet, the Teslin-to, or by some called the Hootalinqua, to Dawson City. In early days men drove stock or pack trains through to Cassiar, and the proposition certainly seems feasible and the best way to make the trip.

Canadian cattle, starting from Ashcroft, 220 miles to Quesnelle, from there the Fraser River to cross and the old Telegraph line is taken, 30 miles to Blackwater, across Mud River, a small stream, but rapid, across the Nechaco, crossing at Fort Fraser, on through the Babine Lake country, across the Skeena, crossing about 20 miles west of Hazelton, and on by the old Cassiar trail to Telegraph Creek.

Large bands of cattle were driven in this section over the very routes here described in early Cassiar days. A trail at present exists and is even now being improved for transportation from Telegraph Creek by rail, 150 miles to Teslin Lake, and when that point is reached Prof. Dawson, it appears that Teslin Lake, with its tributaries, is to become a noted mining camp.

A prospector can buy a pack animal or two at Ashcroft and start with his summer supplies for Teslin Lake and vicinity. He will travel through one of the richest mining countries in the world, where almost no prospecting has been done. Game and fish abound and there is excellent feed the entire way, with no fare to pay. But at the worst the prospector, leaving Ashcroft at the first of May, can take his time, pro-

Newer and younger men will soon come to the front. Now, as to the Liberals. Their principles have proved bad, and some of their leaders are bent on extravagance and corruption. Their leading organ has fallen into the hands of railway exploiters. Outside of any credit due them for defeating the Manitoba School Bill, of a praiseworthy attempt of Mr. Mulock and a couple of his colleagues to adopt business methods in departmental administration, of a somewhat vigorous endeavor to tackle the transportation question—not without suspicious commentators—the Liberals have gained any other prestige that has come to them by adopting Conservative policy. They dared not "wipe the National Policy off the face of the earth," but took refuge in protectionist reasons wherever they could. They have ceased to advocate that "our natural market is in the United States," and they actually lowered the tariff on English goods, as against Yankee importations. They go about the country now saying they are protectionists and preferential traders. Their own principles of free trade and of commercial union have gone bad, and they are fairly open to the suspicion of masquerading in the Conservative mantle labelled Protection to Canada's industries and Preferential Trade within the Empire.

To put the political situation in a nutshell: the principles of the Conservative Party are the only principles suited to Canada; the Liberals are pretending to believe in some and to repudiate others of them; they are gaining any recognition that is coming to them by abandoning their own plans and picking up Conservative ones; and they are losing the confidence of the country by the foolish profession of Sir Wilfrid Laurier for free trade and his rejection of the preferential offer of Mr. Chamberlain.

What Canada wants is protection at home, preferential trade within the Empire, a Canadian policy, as against the United States, and these principles administered by men who are honest in their profession of them, and honest in an effort to secure economical and progressive government in other lines. The Conservative principles of old, administered by new Conservatives, would fill the bill exactly.

After all credit is given to Sir Wilfrid Laurier for his eloquence, his affability, his free trade pretensions in England and his statement that Canada wanted nothing in return for opening her markets to England. On both of these points he absolutely misrepresented the Canadian people and dumfounded Lord Salisbury, the Duke of Devonshire and Mr. Chamberlain. They were ready to declare for preferential trade, two of them did declare for it in such a way as to commit the great Conservative-Unionist Party of England, and to the amazement of themselves, and of Canadians especially, Sir Wilfrid said we did not look for any preference!

The country is now being run partially on Conservative lines, but by men who profess other principles. When these men profess their own principles they profess principles directly antagonistic to the welfare of Canada. A free trade Premier from Canada, wearing a Cobden Medal at this moment, is a political misfit, and a Canadian Premier saying we want nothing in return for concessions to England is a sentimentalist and not a practical statesman.

Canada appears to be on the eve of an era of prosperity. The crops of both Ontario and Manitoba are larger

than for many years past, and, what is better still, prices are high, which means the putting into circulation of large sums of money. The benefits resulting to trade from the latter must, therefore, be of great advantage to the business of the community, and the outlook for the fall trade promises to be the most encouraging in years.

Sales in new wheat were made yesterday at 83 and 85 cents per bushel at Ontario points, which is an advance of 22 to 23 cents over prices current a year ago. Manitoba wheat sold yesterday in Toronto at \$1.05, as compared with 70 cents a year ago. That the prices are likely to continue in this neighborhood, or even much higher, may reasonably be expected from the fact that there is a large shortage in the wheat crop of Europe this season. This shortage has been estimated by such an eminent authority as Beerholm at 354 million bushels.

Place beside this the reports from the United States, which are not very encouraging, owing to the blight, the shortage for export being placed at 103 millions at most, it will therefore be seen that the shortage in America and Europe combined is something like 220 million bushels, which will place Canada in the front rank of wheat-exporting countries.

The situation, therefore, is a strong one statistically, and it is generally conceded that the market will go much higher. The sudden stimulus here in prices was occasioned by rapid advances on the Chicago Board of Trade. Yesterday September wheat sold at 93 1/2 cents and May wheat at 95 1/2 cents, which were the highest quotations for years. The prices in New York and Duluth were \$1.

Fortunately the situation in Canada is a good one. High prices for farm products, together with the healthy development of her mines, must redound to the benefit of Canada as a whole. We confidently look forward to a general revival of business in all lines of trade, which has been gradually approaching our shores, until now it is almost upon us.

ROUTE TO THE KLONDIKE.
 A new all-Canadian route to the Klondike gold fields, via Cariboo, Cassiar and Teslin Lake, is now among the possibilities.

A movement is on foot to organize a cattle and supply company to start a cattle drive from Quesnelle to Teslin Lake, and when that point is reached to ship on rafts or scows down the lake and river outlet, the Teslin-to, or by some called the Hootalinqua, to Dawson City. In early days men drove stock or pack trains through to Cassiar, and the proposition certainly seems feasible and the best way to make the trip.

Canadian cattle, starting from Ashcroft, 220 miles to Quesnelle, from there the Fraser River to cross and the old Telegraph line is taken, 30 miles to Blackwater, across Mud River, a small stream, but rapid, across the Nechaco, crossing at Fort Fraser, on through the Babine Lake country, across the Skeena, crossing about 20 miles west of Hazelton, and on by the old Cassiar trail to Telegraph Creek.

Large bands of cattle were driven in this section over the very routes here described in early Cassiar days. A trail at present exists and is even now being improved for transportation from Telegraph Creek by rail, 150 miles to Teslin Lake, and when that point is reached Prof. Dawson, it appears that Teslin Lake, with its tributaries, is to become a noted mining camp.

IN INSURANCE

When secured on the Compound Investment Plan of the

North American Life Assurance Company.

The special provisions of this advantageous plan of insurance are:

1. The return as a mortuary dividend of all premiums paid beyond the tenth year in addition to the face of the policy, should death occur within the investment period selected.
2. The loss to the insured, if desired, of all premiums beyond the tenth year, and should death occur after that and within the investment period selected, THE FULL FACE OF THE POLICY IS PAYABLE, premium loans, if any, being cancelled.

The North American has a larger ratio of assets to liabilities and net surplus to premium than any other Canadian Company.

TO GET TO THE KLONDIKE.

The Route Via Ashcroft, B.C., Said to Be the Best.

684 MILES TO TESLIN LAKE

And Then It Is Easy to Get to the Placers in Smooth Water.

John King, a Well-Known Spokane Miner, Talks About This Journey, Which Is Easy—Food Can Be Got for Animals Along the Whole Distance—Climate Is Not So Bad as Reported—Plenty of Fish and Game Along the New Route.

The B. C. Mining Journal, Ashcroft, Aug. 14, contains the following: Ashcroft to Quesnela, 220 miles; Quesnela to Fort Fraser, 140 miles; Fort Fraser to Decker Lake, 30 miles; Decker Lake to Hazelton, 75 miles; Hazelton to Kispiox, 9 miles; Kispiox to Sticksen above canyon, 90 miles; Sticksen above canyon to Teslin Lake, 120 miles; total, 684 miles, with good food from the 1st of May until fall all the way. At no point is there a stretch of more than 20 miles without good food. For hundreds of miles peavine is found in profusion, and blue joint stands along the lakes and water courses higher than a man on horseback in places. These distances are given as and reached for by men who have been over the trail, some of them more than once. Hon. James Orr, to whom we are indebted for much information concerning this section, has referred to, traveled over these trails with his pack on his back in the early Cassiar days. He was seen in 1870 on a prospecting trip by the Government, being a part of the time with Alderman Humphrey's party, and withered in the Omineca country the winters of 1872-73. Mr. Orr is a keen, shrewd observer, and one of the reliable old timers. He was the first member for Cariboo, serving with the four elected members, Black, Holbrook, Homans and Smith, the six appointed as official members of the Crown Colony Parliament under Governor James Douglas in 1862. He was then Attorney-General and Speaker, Saunders, Nunn, Riley, Harlow and Bremner. Mr. Orr laughs at the claims of any spot on earth being richer than some parts of Cariboo, and says there are dozens of rich creeks that will again attract the attention of the mining world. Cassiar and Omineca country, he asserts, only touched in early days, and from his knowledge of the country, the water courses and ocean slopes, he thinks the Teslin Lake country and Omineca are the richest. He is making an exhaustive examination of the mine, and brought back with him a large number of samples of the ore. These show a high percentage of gold, which ran from \$16 to \$140 per ton. Two other samples showed \$348 and \$280 per ton.

Mr. Taylor has made a report on the mine, in which he says there is development work done to the extent of 464 feet in tunnels, shafts and drifts, nearly all of which are in good ore. Since Mr. Taylor's report the superintendent reports further work done to the extent of about 100 feet in cross-cuts and levels. The work is being done well and economically, and the superintendent, Mr. J. S. Wallace, is a capable and careful manager. Mr. Taylor states that there is ore enough blocked out to keep a ten-stamp mill working for years, and he predicts a great future for the mine. The shaft has reached a depth of over 400 feet, and the quality of the ore has improved as depth has been attained.

U.S. SOUNDING THE POWERS Before Taking Aggressive Action Against Spain.

THE LIMIT OF NEUTRALITY Is What General Woodford is Trying to Find Out.

The Ambassadors of the United States were instructed to work with Gen. Woodford, but the results of their inquiries have not been very encouraging.

General Stewart L. Woodford, the newly appointed Minister to Spain from the United States, has received an instruction from the State Department to ascertain the limit of neutrality of the European powers.

Col. John Hay, the American Ambassador to Great Britain, has received an encouragement from Lord Salisbury, M. Hanotaux, the French Foreign Minister, has emphatically refused to discuss the matter with General Woodford.

General Woodford is in the city of Madrid, and he has been in communication with various American Ambassadors on the subject.

ST. GEORGE'S HALL. This Charming Meeting Place Will be Finely Decorated.

It will no doubt be good news to many of our leading society people to hear that St. George's Hall is to be made still more attractive for the coming season. It has always been the intention of the architect, Mr. Edwards, to have the mural decorations carried out so as to harmonize the whole. It is now in the hands of Mr. Elliott, and a staff of artists under his able direction is completing the ensemble of this charming hall in the decoration of the walls.

The Temple Building is the scene of great activity just now, where the preparations for the session of the High Court of Central Ontario and the formal opening of the building are being pushed forward with the utmost dispatch. A large number of invitations to the latter event have been issued, and an immense gathering is looked forward to by the officials. Dr. Orsuliyatka, who was out of the city early in the week, in connection with the arrangements turned on Thursday afternoon in the preparations. Organizing work continues with unabated vigor throughout the week, and a general meeting will be held on Friday, August 21st, at 10 o'clock, at the residence of Mr. C. C. Whale officiating as master of ceremonies.

Business Embarrassments. Louis Chealer, lumber jobber, Pembroke, has assigned to the receiver, Mr. George N. Elliott. During August the gymnasium has been closed, and with the bath room, is being painted and put in good repair for the coming season. The young men's meeting this evening will be addressed by Mr. Thomas French of the Y. M. C. A. club will meet at the home of one of its members next Tuesday and spend a social evening. The secretary of the branch of the "Antiquity of Man" will be held at the city and will conduct the men's Bible class to-morrow afternoon. The restaurant of the "Antiquity of Man" will be held at the city and will conduct the men's Bible class to-morrow afternoon.

Mr. Arthur Stevens, assistant secretary, has given up his position at the City of Toronto, and is now in charge of the "Antiquity of Man" branch of the "Antiquity of Man" club will meet at the home of one of its members next Tuesday and spend a social evening. WHEAT MARKETS DOOMING

The News Generally Favors the High Prices.

LIVERPOOL 4D-ADVANCE.

Local Securities Quiet Yesterday, But They Were Firmer.

Another Advance in Northwest Lead Co.

Stock-Canadian Pacific Higher in Montreal in the Afternoon-Wall Street Fairly Active and Irregular.

Friday Evening, Aug. 20.

Wheat in Ontario 3¢ higher to-day. No. 1 hard sold at \$1.01 1/2 in New York. No. 1 hard sold at \$1 in Duluth. Liverpool wheat futures 3/4d to 4/8d higher for Saturday. Wheat 40¢ corn 1 1/2¢, oats 1 1/2¢.

At New York to-day 110 loads of wheat were taken for export. Receipts of wheat at Minneapolis and Duluth 16,000 bushels, as against 17,700 bushels the corresponding day last year.

Receipts of grain at Chicago to-day 22,000, 600,000 less than expected. Officially Thursday 26,385, left over 600,000. Estimated for Saturday 34,000. Market steady. Heavy shipments \$3.25 to \$4.

Cattle receipts at Chicago to-day 9,000. Market weak to 10¢ lower. Exports at New York to-day: Flour 8,628 barrels and 58,338 sacks, wheat none.

Dun & Co. report 25 failures in the Dominion this week, as compared with 21 last week and 27 the corresponding week of last year. There were 16 in Ontario, as against 14 last week and 7 in Quebec, as against 11 last week.

The Northwestern wheat crop news is bullish. A great deal depends on the outcome of the spring wheat crop. This fact is understood by the trade, which is watching developments in the Northwest with great interest. Some authorities maintain their high crop estimates, while others have been reduced.

The reports regarding spring wheat are not so bright everywhere, while despatches from the Red River Valley are unsatisfactory. It is estimated that the crop will be sold during July. Thousands of acres, it is said, will not be cut, and the yield is expected to exceed 11 bushels per acre. In other portions of the State, however, the crop is not so good, leading to estimates of 30,000,000 bushels.

NORTHWEST LAND HIGHER. Business was fairly active in Northwest Land Company stock to-day, and another advance was established. It sold on the stock exchange at 50 and closed with no stock offering under \$1. In London 30 bid and 21 asked, and in Montreal 40 bid with 55 asked. The supply of stock seemed to be limited in the afternoon.
