Lecturer on Surgical Appliances.

THE PROPERTY OF
Trinity Medical College.

TRINITY MEDICAL SCHOOL

(ESTABLISHED 1850.)

INCORPORATED BY SPECIAL ACT OF PARLIAMENT.

IN AFFILIATION WITH

THE UNIVERSITY OF TRINITY COLLEGE, THE UNIVERSITY OF TORONTO, QUEEN'S UNIVERSITY, AND THE UNIVERSITY OF MANITOBA, AND SPECIALLY RECOGNIZED BY THE ROYAL COLLEGE OF SURGEONS, ENGLAND, THE ROYAL COLLEGE OF PHYSICIANS, LONDON, THE ROYAL COLLEGES OF PHYSICIANS AND SURGEONS OF EDINBURGH, THE FACULTY OF PHYSICIANS AND SURGEONS OF GLASGOW, AND THE KING'S AND QUEEN'S COLLEGE OF PHYSICIANS OF IRELAND,
AND BY THE CONJOINT EXAMINING BOARDS IN LONDON AND EDINBURGH.

The Winter Session of 1887-8 will begin on Monday the 3rd day of October next, and will continue for six months. The opening lecture of the course will be delivered by Professor Davison at 4 o'clock p.m., on that day, in the large Lecture Theatre of the School. The regular work of the School begins on the following day. It is hoped that, in view of their own interests, students will, as far as practicable, be present at the opening lecture, so as to lose none of the early teaching in the several branches.

It gives the faculty great pleasure to record the constantly increasing prosperity of the School, more marked during the last session, than ever before.

A good deal has lately appeared in the press, about organic changes taking place in our Medical Schools, such as the amalgamation of existing schools in Toronto to form a new one. In Medical Schools, nothing is more injurious than the making of organic changes—these injure the Medical Faculties which make them, by tending to disrupt, to weaken, and more or less to paralyze their energies, and more than anything else, they shake public confidence. From the very first, the motto and policy of Trinity Medical School has been "STABILITY AND EFFICIENCY." Our progress under this policy has been most satisfactory

and has gone on increasing year by year, from the first session, and has far exceeded the most sanguine expectations of our best friends.

Whatever changes of the kind alluded to, other institutions may find it necessary to make, TRINITY MEDICAL SCHOOL WILL MAKE NONE, SHE NEITHER REQUIRES, NOR DESIRES CHANGE, BUT WILL GO ON IN THE FUTURE AS SHE ALWAYS HAS DONE, ADVANCING AND IMPROVING every session, so as to keep fully abreast of the advance of science, and of the requirements of the medical profession, as laid down from time to time by the Ontario Medical Council.

There are certain changes indeed, which are inevitable. This year we regret to have to record one of these, the loss by death of Dr. Fulton, a respected senior member of the Faculty. The position he filled so well, has been assigned to a gentleman well known throughout Canada as a practical surgeon and teacher. It will as heretofore, be the constant aim of the Faculty to keep the school thoroughly EFFICIENT IN EVERY DEPARTMENT and thus maintain the large measure of public confidence which it has always had the good fortune to enjoy.

The lectures are delivered in the large College Building, situated in the immediate vicinity of the Toronto General Hospital, thus meeting, in the fullest manner, the desire of medical students, that the lecture rooms where they are taught the nature of disease, should be as close as possible to the Institution which affords full facilities for the acquisition of a practical knowledge of their profession. Very special attention has been paid to the fitting up of the Lecture and Dissecting Rooms, Laboratories, etc., which are of large size, and exceedingly well lighted.

Although it is only a few years since the erection of our commodious Medical College Buildings, the attendance of students has increased so greatly year by year, as from time to time to require more ample accommodation, and large additions have been built. Last summer, the building were still further enlarged, so as to meet in the fullest way, all the requirements of a thoroughly equipped Medical College.

There are, since the completion of the extensive improvements of last year, two equally spacious Lecture Theatres, and a new Laboratory, making THREE in all. One for Practical Histology, one for Practical Chemistry, and a new one for Pathology. There is a very fine room, one of the largest in the College, and lighted from the ceiling, set apart for the Museum ; also a Reading Room and a Waiting Room for Students. The Faculty have made every improvement necessary for

THE PROPERTY OF
Trinity Medical College.

the comfort and convenience of the large and constantly increasing number of students in attendance. To meet the requirements of the very large Anatomy classes, a new Dissecting Room—very spacious, also lighted from the ceiling, and which, for SANITARY REASONS, is entirely separate from the rest of the College Building, has been recently built. It is furnished with every modern requisite of a Dissecting Room.

Trinity Medical School is an independent Corporation, entirely separate and distinct from every other. Under its special act of incorporation the School Corporation is empowered to enter into affiliation with any "University or Universities" with which it may be desirable, in the interests of the students, to have it connected. The School rests on the broadest possible basis and is in affiliation with

The University of Trinity College,
The University of Toronto,
Queen's University,
The University of Manitoba.

Students attending Trinity Medical School have thus every advantage which University connections afford, under which they can, by conforming to the curriculum laid down by the several Universities named, go up for their degree, before any one, or more of these. And in addition, they can, if they desire to do so, present themselves for the School Examinations, as laid down in this announcement, which are equivalent in every way to those required for University Degrees in Medicine, and if successful, obtain the "Fellowship by Examination" diploma. This qualification is fully recognized, separately, and conjointly, by the several Examining Royal Colleges of Physicians and Surgeons in Great Britain. Under its special act, this School is represented on the College of Physicians and Surgeons of Ontario, and has therefore every privilege enjoyed by any medical teaching body in the Dominion.

The "Fellowship by Examination" Diploma entitles its holders to go up before the Royal Colleges of Surgeons and Physicians in Great Britain, with precisely the same exemptions from various parts of the examinations as are allowed to holders of University Degrees.

Full instruction is given in Trinity Medical School in all the subjects required for degrees in Medicine, by the University of Toronto, including Biology and Comparative Anatomy.

The Faculty has been greatly gratified with the high standing uniformly taken by the students of Trinity Medical School at the various examining boards before which they have presented themselves.

At the recent examinations of the University of Toronto (1887) there was awarded to candidates from Trinity Medical School an average of 3.58 per cent honors for each candidate ; while there was awarded to all candidates from all other Medical Schools an average of but 2.97 per cent. honors for each candidate. There was one scholarship to twelve candidates awarded to students from Trinity Medical School, while there was awarded one scholarship to every fifteen candidates to all students from other medical schools. The full significance of the superior standing taken by the candidates from Trinity Medical School, can only be fully appreciated when taken in connection with the fact that of the NINE gentlemen winning the SIX scholarships, etc., and the TWO GOLD, and FOUR SILVER MEDALS, in Trinity University, and in Trinity Medical School, only two were candidates at Toronto University. None of the eighty other gentlemen who won honors in Trinity, were candidates at the Toronto University.

On the other hand the competing candidates at Toronto University from Medical Schools other than Trinity, embraced the greater part, if not all, of those who took the highest standing and were awarded honours and scholarships at their own medical school examinations. The fact is noteworthy, that at the Medical Council examinations held April 1887, ALL the candidates who were AWARDED HONORS IN ALL THE SUBJECTS OF THE EXAMINATION, WERE STUDENTS OF TRINITY MEDICAL SCHOOL.

SUMMER SESSION.

The Summer Session has been very successful, and is invaluable to those who attend it. The teaching is thoroughly practical. (See the list of Subjects for 1888, page of this Announcement.)

MATRICULATION.

ALL students who intend practising in Ontario are advised, before entering upon their medical studies, to pass the Matriculation Examination of the Medical Council of Ontario.

After July 1st, 1888, this will consist of the SECOND CLASS NON-PROFESSIONAL EXAMINATION WITH THE LATIN OPTION, and is conducted annually, in the High Schools, throughout the Province of Ontario.

a certi

at the

in Tri

THE PROPERTY OF
Trinity Medical College.

In order, after that date to register with the Medical Council, ALL the following branches must be covered by the certificate presented by each candidate :

READING.	ALGEBRA.
ORTHOGRAPHY AND ORTHOEPY.	GEOMETRY.
ENGLISH GRAMMAR.	PHYSICS.
COMPOSITION.	BOTANY.
LITERATURE.	CHEMISTRY.
HISTORY.	DRAWING.
GEOGRAPHY.	LATIN.
ARITHMETIC.	

These subjects are amongst those laid down by the Education Department, respecting Teachers' Certificates, and Courses of Study in High Schools and Collegiate Institutes. A copy of these regulations, giving fuller details, can be obtained on application to the Education Department, Toronto. This examination is accepted by Trinity Medical School, Trinity College, the University of Toronto, and all Canadian Universities.

Attention is called to the fact, that the Medical Council dates the period of study, in every instance, from the time the student is registered on their official list as a matriculated medical student.

The Medical Council of Ontario requires that every one desirous of being registered as a matriculated student on its register, shall present to the Registrar of the Council the official certificate of his having passed the Examination referred to, including ALL the subjects mentioned.

Students who may previously have passed THE SECOND CLASS NON-PROFESSIONAL EXAMINATION ON ALL THE OTHER SUBJECTS, BUT WITHOUT THE LATIN OPTION, can complete the required examination by going up to a subsequent examination, for the LATIN only. But the names of such students cannot be entered on the Medical Council's Register *until the Latin has been passed*. Where a certificate, complete in every subject but LATIN is held, and where the candidate wishes to do so, he is permitted to take the LATIN alone at the examinations, which are held annually at the various High Schools. Such candidates should go up for the LATIN of the "Second Class Non-Professional," which is accepted by this Medical School, and the Universities, and also by the Medical Council. Where a candidate who requires to take LATIN ONLY (having a certificate for everything else), prefers to do so, he can take his LATIN at the Matriculation Examination, held in October and March each year, in Trinity Medical School, which is accepted by Trinity College and

Trinity Medical School. But the Medical Council will, after July 1888, accept only either the SECOND CLASS LATIN, or that required for the Arts Matriculation in the several Universities.

Graduates in Arts, or students who have matriculated in Arts in any University in Her Majesty's dominions, **are not required to pass any further matriculation examination**, but are entitled to register on payment to the Council of the usual fee, \$20.

Thus there are but the following ways of being registered *with the Medical Council*, as a matriculated student:—

I. By having passed the THIRD CLASS NON-PROFESSIONAL EXAMINATION, WITH LATIN, PRIOR TO JULY 1ST, 1888, OR AFTER THAT DATE, THE SECOND CLASS NON-PROFESSIONAL EXAMINATION WITH THE SUBJECTS GIVEN ABOVE.

II. BY BEING A GRADUATE OR A MATRICULATE IN ARTS, IN A BRITISH OR COLONIAL UNIVERSITY.

The University of Trinity College, the University of Toronto, Queen's University, and Trinity Medical School do not insist upon the matriculation examination being passed before attendance on medical lectures, but very strongly recommend that it should be passed as soon after entering as possible, where it has not been passed before—and in every case, where at all practicable, before the passing of the second year, or Primary, professional examination.

A certificate of having passed the Matriculation Examination in Arts, or in Medicine, in any British, or Colonial University, or of the Medical Council of Ontario, or that required by the various Colleges of Physicians or Surgeons in Great Britain and Ireland, or that of the College of Physicians and Surgeons of Quebec, or that of the Law Society of Ontario or Quebec, or having passed an examination whether for a TEACHER'S CERTIFICATE in any of the PROVINCES of the DOMINION, or an examination EQUIVALENT to any of the above, is also accepted by Trinity Medical School, and by the University of Trinity College. The University of Toronto, as already stated, accepts the Certificate of Matriculation of the College of Physicians and Surgeons of Ontario.

Non-matriculated students from the Maritime Provinces, Manitoba, and the North-West, the West Indies, or other British Colonies, the United States, or from any quarter, who do not take the Council's examinations, are admitted to attend lectures in the School. But if such desire to graduate at Trinity College, or to go up for the "FELLOWSHIP by EXAMINATION" DIPLOMA of the School, they must present themselves for the Trinity Medical Matriculation Examination.

THE PROPERTY OF
Trinity Medical College.

The Matriculation Examination of either of the Universities MAY BE PASSED AT ANY TIME BEFORE GRADUATION. But it is only required by those who have not matriculated previously, either for the Medical Council or elsewhere, and who do not intend to practise in Ontario. Details as to these matriculation examinations are given in this announcement, under the proper headings.

Such students as have not otherwise matriculated, who desire to take the Fellowship Diploma of Trinity Medical School, or to graduate in the University of Trinity College, will be required to pass an examination on the following subjects :

(1) Writing and Dictation, (2) English Language, including Grammar and Composition, (3) Arithmetic, (4) Algebra, including simple Equations, (5) Euclid, Bks. I., II., (6) Latin, Cæsar, Bellum Gallicum, Bks. I., II., or Bks. V., VI., or Bellum Britannicum, or Cicero, de Lege Manilia, or Cato Major; or Virgil, Æneid, Bk. II., (7) and any one of the following optional subjects, which may be selected by the Candidate (a) Scripture History; and St. Matthew's Gospel, ch. i.-ix. incl., in Greek (b) Greek, Xenophon's Anabasis, Bk. I., (c) French, Voltaire's Charles XII., Bks. VI.-VIII., (d) German, Schiller's Thirty Year's War, Bk. I., (e) Natural Philosophy, including Mechanics, Hydrostatics and Pneumatics. (Balfour Stewart's Physics is recommended.)

Where more than one TEXT-BOOK is named on any subject, as in Latin, the candidate may select the ONE upon which he may prefer to be examined.

THIS EXAMINATION WILL BE HELD IN Trinity Medical School ON THE SECOND FRIDAY AND SATURDAY IN MARCH, AND THE SECOND FRIDAY AND SATURDAY IN OCTOBER OF EACH YEAR. Applications may be made to the Dean of the Faculty of Trinity Medical School, till the evening of the day before the Examination.

All students going up for examination in Great Britain before the several Royal Colleges there, are required to present a certificate of having passed an examination in Elementary Mechanics. On this account, an examination on this subject will be held at the School in November of each year, at the same time as the Supplementary first year's Examination, when any students who intend going to Europe, whose matriculation examination may not have embraced it, may present themselves, without any additional fee being charged.

LECTURES.

CLINICAL AND DIDACTIC.

The several Professors and Lecturers will illustrate their respective courses by plates, preparations, models, and specimens—including the application of the Laryngoscope, Ophthalmoscope, Sphygmograph, Spectroscope, etc., and the various forms of Electrical apparatus used in medicine. It will, as heretofore, be the constant aim of the Faculty to make the entire teaching of the School as practical and thorough as possible. In THIS SCHOOL, throughout the entire session, there are **five** Lectures given each week, on the subjects of Anatomy, Physiology, Chemistry, Materia Medica, Medicine, Surgery and Midwifery, thus fully meeting the requirements of the Ontario Medical Council, and the several examining Boards in Great Britain and Ireland, which require that each course on the main branches shall consist of not less than **one hundred** Lectures.

CLINICAL TEACHING.

Clinical Teaching has always been carried out in this School as practically as possible, and in view of its very great importance, special and increasing attention continues to be given by the Faculty to this department of the course. It includes **CLINICAL LECTURES**, and teaching the diagnosis of medical and surgical diseases at the bedside, nothing being of more value to those engaged in the study of medicine and surgery than a close and careful observation of the numerous cases in the Hospital wards. Arrangements were made years ago, and are now very perfect, which have largely increased the amount of clinical instruction given in the Toronto General Hospital, and afford to all students who attend it, as great facilities as are enjoyed in any part of Canada in this essential part of their studies. Besides this, the number of Hospital patients is very large. The School being **BY THE SIDE OF THE HOSPITAL** enables students to avail themselves fully of the many advantages for gaining the practical knowledge which it affords.

In connection with the treatment of the out-door patients applying **DAILY** for advice and treatment at the **TORONTO GENERAL HOSPITAL**, an

Trinity Medical College.

OUT-DOOR patients' Clinic is given every day from 1 to 2.30 p.m. These patients are examined and prescribed for, in the presence of the students. An IN-DOOR patients' Clinic is also given daily, immediately after the other, from 2.30 to 3.30 p.m., the patients being brought before the students, and everything of importance pointed out by the Professors of Medicine and Surgery, as well as by the other members of the *Consulting* and *Acting Staff* of the Hospital.

All the CLINICAL Teachers on the Hospital Staff act conjointly, in giving daily instruction of the most practical kind to the students in the Hospital; and as there are no fewer than *sixteen* such teachers, it is manifest that young men studying in Toronto receive an amount of practical instruction, not excelled anywhere on the Continent.

The giving of special daily Clinics at the bedside, by all the Hospital teachers in turn, is another special feature of the greatest value, in addition to the Out-door and In-door Clinics above mentioned. Much importance is attached to this, and the greatest care is bestowed upon it to make it as profitable to the student as it can be made.

Special Clinical instruction will also be given by the Professor of Midwifery at the Burnside Hospital, and by other members of the Staff of the Hospital, on Diseases of Women and Children, and on Practical Midwifery, and special Practical instruction at the Eye and Ear Department of the Hospital is also regularly given, as well as on Dermatology. The Medical Council have added CLINICAL EXAMINATIONS in medicine and surgery which will hereafter be required of all candidates for the final examination.

PRINCIPLES AND PRACTICE OF MEDICINE.

PROFESSOR GEIKIE.

This course will consist of 100 Lectures, and will embrace the following :—

I. The General Principles of Medicine, the Nature and Causes of Disease, the Symptoms and Morbid Changes which arise in the course of disease, together with the principles governing the general treatment of disease, as well as the means to be used for its prevention.

II. The Classification of Diseases, and the Description of the affections of the different Organs and Structures throughout the body.

The Lectures will be very fully illustrated by the most recent plates, as well as by models, and morbid specimens from the Museum, as well

as by fresh specimens from the hospital post-mortem room, furnished by the Hospital Pathologists. Every care will be taken to show the students cases in the Hospital illustrative of the Lectures. The numerous Hospital Clinics delivered both in the theatre and at the bedside, afford very abundant facilities for this most useful and very practical study.

PRINCIPLES AND PRACTICE OF SURGERY.

PROFESSOR GRASETT.

The Lectures on this branch, like all the other principal branches in this School, will number One Hundred. Surgical Pathology will be fully dwelt upon, and illustrated by preparations from the Museum of the School, by specimens from recent cases at the Hospital, and by those which may be obtained in practice, as well as by the best models and plates.

The course will include the Practice of Surgery, and Surgical operations. These operations will be performed before the Class, on the fresh Cadaver. Surgical Apparatus and Instruments will also be exhibited, and their uses pointed out to the students. In the Department of Surgery the Hospital will be used as largely as possible to illustrate the didactic teaching, by cases of all kinds, in the theatre, and in the wards.

MIDWIFERY, GYNÆCOLOGY AND THE DISEASES OF CHILDREN.

PROFESSOR TEMPLE.

This Course will embrace the Principles and Practice of Obstetrics, and will be illustrated by Diagrams, by fresh and preserved Specimens, the Artificial Pelvis, etc. The Principal Diseases of Women and Children will form an important portion of the work taken up.

In teaching the Diseases of Women, the Anatomy and Physiology of the Female Organs will be demonstrated, and the various methods of Examination will be fully described; the necessary instruments exhibited, and their uses explained. The diseases peculiar to the sex will be considered as fully as time will permit, as follows:—Disorders of Menstruation; Leucorrhœa; Pelvic Cellulitis and Peritonitis; Lacerations of the Cervix Uteri and Perineum; Urinary and Fœcal Fistulæ; Inflammations of the Uterus; Displacements of the Uterus; Tumours of the Uterus; Diseases of the Ovaries, etc.

THE PROPERTY OF
Trinity Medical College.

The Lectures will be fully illustrated by plates, models and morbid specimens.

ANATOMY, DESCRIPTIVE AND SURGICAL.

PROFESSOR ROBERTSON.

The Course on Anatomy, Descriptive and Surgical, is made very complete, as this subject is unquestionably the very foundation on which all professional knowledge is based. It will be taught in the most practical manner possible. The relations of Anatomy to Pathology, Medicine, Surgery, etc., will be fully dwelt on. The Lectures will be illustrated by the fresh subject, moist and dry preparations, sections, models, plates and original drawings.

The School has always on hand a large supply of Disarticulated Skeletons, as well as various preparations, and a large collection of the best models of various parts of the body, to aid in the study and teaching of this all-important branch. This collection has this year been largely increased by models imported from Paris.

To facilitate their study of Osteology, students can procure a supply of finely prepared imported bones from the Professor.

PRACTICAL ANATOMY.

DR. TESKEY AND DR. G. A. BINGHAM.

To the department of Practical Anatomy, so closely connected with surgery, the greatest attention is paid, and both the Demonstrators, with their two assistants, give daily attendance in the Dissecting Room. This room is large, perfectly lighted and ventilated; and under the New Anatomy Act passed by the Ontario Legislature in 1885, an abundant supply of Anatomical material is secured. It is the desire of the Faculty that every student should acquire a thoroughly practical knowledge of Anatomy in the Dissecting Room, where alone it can be properly studied.

PHYSIOLOGY, INCLUDING HISTOLOGY.

PROFESSOR SHEARD.

This Course will embrace a description of the Elementary Tissues of the Body; the Structure of the various Organs and Glands; also the

functions of Respiration, Circulation, Digestion, and Nutrition, Secretion and Excretion. Special attention will be given to the nervous System, and to Embryology, and Development. The last will be fully illustrated in all its stages by specimens.

The Physiological Laboratory is furnished with all the best modern appliances necessary for the practical study of this subject. Amongst the apparatus imported for this Laboratory are a DuBois Raymond's Coils, DuBois Raymond's Keys, Foster's Moist Muscle Chamber, Revolving Drum Cylinders, Galvanometers and Scale, Electrodes, Exciters, Mercurial Keys, Stricker's Warming Stages, Hot Air Baths, etc., and further additions are being made from year to year.

Microscopic Anatomy will receive ample attention from the several Lecturers, upon the branches in which the microscope is employed; and in addition to this, very complete Courses of Instruction will be given upon Microscopy, and the use of the Microscope in connection with Normal and Pathological Histology, BOTH OF WHICH SUBJECTS ARE NOW REQUIRED BY THE MEDICAL COUNCIL. A large number of the best Microscopes from Europe is provided. The various methods of injecting, staining, mounting, etc., will receive special attention.

GENERAL CHEMISTRY AND CHEMICAL PHYSICS.

PROFESSORS KIRKLAND AND STUART.

In this course of 100 Lectures, the general principles of Chemistry will be fully discussed, and the laws and theories deduced from suitable experiments. Great pains will be taken to point out its relations and applications to Physiology and other departments of medical science. Physics, including Heat, Light and Electricity, will be discussed both theoretically and experimentally, as far as they bear upon, or are connected with Chemistry.

The lectures on both Inorganic and Organic Chemistry will deal more particularly with those substances and compounds of special interest to students in Medicine and Pharmacy. Towards the end of the course a number of lectures will be devoted to Medical Chemistry. The whole subject will be illustrated by numerous experiments, charts and drawings, every facility being offered students of acquiring a thorough knowledge of these branches.

Trinity Medical College.

PRACTICAL CHEMISTRY.

PROFESSOR STUART.

Practical Chemistry is taught very thoroughly, under the personal supervision of the Professor. In view of its growing importance, great care has been bestowed on the fitting up of this Laboratory, and the Course will include experiments of various kinds, qualitative and quantitative analysis, etc., etc. In view of the many cases of poisoning coming before the courts of law, Toxicology will have much attention paid to it—no pains being spared to prepare students for the grave responsibilities which such cases impose upon them as practitioners. Each student will be supplied with the requisite re-agents and apparatus, and the course will be adapted to meet the demands of the physician in his daily practice. Special attention will be devoted to *Urinary Analysis*, also to the normal and abnormal constituents of the animal fluids—to Tests for blood, for Bile, for albumen, &c.—as well as to the other departments of Medical Chemistry.

MATERIA MEDICA AND THERAPEUTICS, WITH THE
THEORY AND ART OF PRESCRIBING.

PROFESSOR DAVISON.

All important drugs used in Medical, Surgical or Obstetrical Practice, will be described, and their properties, preparations and doses given. Special attention will be devoted to the therapeutic action of remedies in disease, and the course will be illustrated by specimens of the drugs described. The course of *Materia Medica* proper is very complete, and one of its special features will be the description and *modus operandi* of all valuable new remedies, as well as the THEORY and ART of prescribing.

MEDICAL JURISPRUDENCE.

PROFESSOR COVERNTON.

The Course includes : I. *Medical Evidence generally* : including Documentary and Oral Evidence, Identification, real and apparent death, exhumation, autopsies.

II. *Medical Evidence specially* including—

(a) *Wounds* and other external injuries, blood stains, death by apnoea, as hanging, strangulation, suffocation, and death by drowning.

(b) *Offences against Chastity.* Rape and concealment of pregnancy, criminal abortion, infanticide.

(c) *Insanity*, feigned diseases, impotence and sterility, legitimacy, survivorship, life assurance, malpractice.

SURGICAL APPLIANCES.

DR. N. A. POWELL.

The course on this subject will include a great deal of practical instruction in Minor Surgery of the utmost value, as bandaging, application of splints, plaster of Paris apparatus as used in fractures and in spinal curvatures, the exhibition and uses of instruments, etc. The course is an optional one, but every final student should take it ONCE at least.

SANITARY SCIENCE AND PUBLIC HEALTH.

DR. THEODORE S. COVERNTON

A course of Lectures will be delivered on this subject, attendance upon which is now compulsory. The course comprises lectures on Public Water supplies; conditions of Soil and Water as affecting health, including Drainage and the various methods for the removal of excreta; the Atmosphere; Heating and Ventilation; Individual Hygiene, comprising the subjects of Food, Drink, Exercise, healthful and excessive, Habitations, Hospitals, Ventilation, Hygiene of cities, Climatology, Etiology and Prophylaxis of preventible diseases, Heredity, Boards of Health, Statistics, Age, Sex, Temperaments, Idiosyncrasies, Habits, etc.

PATHOLOGY.

PROFESSOR TESKEY.

The teaching upon this subject will include Pathology, and Pathological Histology, and Bacteriology, with methods of cultivation, and inoculations on the lower animals, and will be abundantly illustrated.

- In addition to this, ample opportunities for the study of Pathology are afforded to the students of Post Mortem Examinations made in the Hospital by the member of the Faculty who is one of the Pathologists of that Institution, and also by other members of the Hospital Staff.

OPHTHALMOLOGY AND OTOLGY.

DR. RYERSON.

Special Lectures will be given at the General Hospital on Diseases of the Eye, Ear and Throat, with instruction in the use of the Ophthalmoscope, and other modern instruments employed in ophthalmic and aural practice. An entire wing of the Hospital recently built, is appropriated specially to Ophthalmic, Ear, and Throat cases.

PRACTICAL PHARMACY.

E. B. SHUTLEWORTH.

This Lectureship has been established to meet the requirements of the Medical Council's Examination on Pharmacy, and it will be of much value in preparing the candidates for the Examination of the Council. The students will have every possible advantage in studying this subject. Lectures in this branch will have reference to the preparation and tests of all the officinal compounds of a purely pharmaceutical character, and will embrace instruction in all the practical operations of pharmacy.

MEDICAL PSYCHOLOGY.

BY DR. DANIEL CLARKE, MEDICAL SUPERINTENDENT AT THE PROVINCIAL LUNATIC ASYLUM.

A course of Lectures, open to all who desire to take it, will also be delivered on Medical Psychology, at the ASYLUM, for the special benefit of gentlemen who desire to graduate in the University of Toronto, or wherever else this course is demanded.

ZOOLOGY, ETC.

T. M. HARDY, M.A., TORONTO UNIVERSITY.

A course of Zoology is delivered IN THE SCHOOL, for the special benefit of gentlemen who desire to graduate in the University of Toronto, or wherever else this course may be required. The lectures embrace the morphology and classification of the various sub-kingdoms, classes, etc., of the Animal Kingdom, also the special practical study of several type-forms.

BOTANY.

PROFESSOR KIRKLAND.

In the course on Botany, the general principles of the science will be fully developed, and its relation to medicine constantly kept in view. The lectures will be illustrated by fresh specimens, diagrams and models. The aim will not only be to make it useful, in its application to medicine, but also to train the mind to that kind of research, which is essential to successful medical study.

 TRINITY MEDICAL SCHOOL.

PROFESSIONAL EXAMINATIONS.

Professional Examinations will be conducted at the close of the 1st, the 2nd, and the last session, to be known as the *first year's*, the *primary*, and the *final* Examinations, respectively.

I. **The First Year.**—**Anatomy** of the Bones, Ligaments, Muscles, also the Viscera of the Abdomen and Thorax. All candidates for this Examination must present a certificate of having dissected carefully an Upper and a Lower extremity, and MUST PASS A PRACTICAL EXAMINATION on the parts dissected.

The Physiology of the elementary tissues, *e. g.*, Connective tissue, Protoplasm, and Cells; also of Respiration, Circulation, and Digestion.

Elementary Materia Medica.

Chemistry, Inorganic, including Chemical Theory.

Physics.—Heat, Light and Electricity.

Botany.

A certificate of having passed this examination is required by Trinity University, Trinity Medical School, and the Medical Council.

A Supplementary First Year's Examination will be held on the **first Saturday** in November.

II. **The Primary.**—Descriptive Anatomy, Physiology and Microscopical Anatomy, Chemistry Theoretical and Practical, Toxicology, Botany (when not passed at the end of the first year), and Materia Medica.

The Primary Examination may be passed at the close of the second Winter Session. A certificate of having passed it in Trinity College, or in any recognized British or Canadian Medical School or University, or

THE PROPERTY OF
Trinity Medical College,

at the College of Physicians and Surgeons of Ontario, will be accepted by this School.

III. The Final.—Theory and Practice of Medicine, and Medical Pathology, Principles and Practice of Surgery, including Surgical Anatomy, Midwifery, and diseases of Women and Children, Medical Jurisprudence and Sanitary Science.

Should a candidate desire it, he may undergo his entire Examination in all the branches, at the end of the last session.

CERTIFICATES OF HONOUR.*

Certificates of Honour are awarded annually in all the Professional Examinations, to Candidates who obtain **not less than 75 per cent.** of the total number of marks.

SCHOLARSHIPS.*

There are **Five Scholarships** offered for competition in this School as follows :

First Year.—**Three First Year's Scholarships**, known respectively as **FIRST, SECOND and THIRD** will be competed for at the close of the **First Session**. The value of these Scholarships is \$50, \$30 and \$20 respectively.

Second Year.—**Two Second Year's Scholarships** are open to competition, at the close of their **second Winter Session**, to all students who have taken out their entire Primary Course at this School. The value of these Scholarships is \$50 and \$30 respectively.

Scholarships will be awarded only to the candidates who stand highest in the Honour lists of the First and Second years respectively.

MEDALS.*

A **GOLD and TWO SILVER MEDALS**, known as the "**TRINITY MEDICAL SCHOOL MEDALS**," are open to competition annually at the close of their last session, by students undergoing examination in the School in the **FINAL BRANCHES**. They will be awarded to the gentlemen who stand **FIRST, SECOND and THIRD** respectively, on the Honour list. All students competing for them must have attended at least two full courses of lectures, in this Medical School, and must have paid all fees for the same.

* Breach of the regulations, page 26, will disqualify any candidate from receiving a medal, scholarship, or other honors in this school.

FELLOWSHIP DIPLOMAS.

Under the authority of the Special Act of the Legislature, incorporating the School, Diplomas will be awarded at the close of the Final Examination, to candidates whose standing has been sufficiently high to merit them. These Diplomas constitute students who obtain them "FELLOWS BY EXAMINATION" of Trinity Medical School, and such "FELLOWS" are allowed in Great Britain the same privileges as are there accorded to holders of Degrees in Medicine, from Colonial Universities, by the Royal College of Surgeons of England, the Royal College of Physicians of London, the Royal College of Surgeons, and the Royal College of Physicians of Edinburgh, and the King's and Queen's College of Physicians of Ireland; and also by the Conjoint Examining Boards in London and in Edinburgh.

No candidate is allowed to present himself for examination for the SCHOOL FELLOWSHIP DIPLOMA, who has not passed a recognized Matriculation Examination, and spent FOUR entire years in pursuit of Medical Studies, and attended during that time TWO FULL COURSES OF PRIMARY, and TWO FULL COURSES OF FINAL LECTURES, during FOUR, or at the least, THREE, Winter Sessions. Attendance on not fewer than FOUR Sessions is very strongly recommended to every Candidate, as this is in all cases insisted on by the Medical Council.

A certificate of good moral character is required from each candidate.

The obtaining of this Diploma--*which is the Faculty's certificate of Qualification*,—or any of the other Honours granted by the school, is a guarantee of high professional attainments, on the part of those who hold them. **In every case successful Candidates for the Fellowship Diploma must be present in person, to have it presented, and to enrol their names in the official list of Fellows.**

THE FELLOWSHIP DECLARATION.

The following is the declaration made by all who receive the Diploma and are admitted, after examination, to the "FELLOWSHIP OF TRINITY MEDICAL SCHOOL":

"We, the undersigned, who now publicly receive the Diploma of Trinity Medical School, and are admitted '*Fellows by Examination*' of that Incorporated Medical Body, do solemnly and sincerely declare, that we will exercise the several duties of our profession in its various branches to the best of our knowledge and ability, for the good, safety, and welfare of all persons committing themselves, or who are committed to our

care and direction ; and that we will not, knowingly, or intentionally, do anything, or administer anything, to their hurt, or prejudice, for any consideration or from any motive whatever.

“We further declare that we will not divulge anything we may have seen, or heard, while visiting the sick, which it would be improper to divulge. We shall, moreover, do everything in our power to uphold the honour, and to promote the welfare of the Medical Institution whose Diploma we now receive, and to the FELLOWSHIP of which, we are hereby admitted.”

THE PROPERTY OF
 Trinity Medical College.
 HOSPITALS.

THE TORONTO GENERAL HOSPITAL.

This Institution which is, in every respect, under the best and most efficient management, is now so greatly enlarged, as to be capable of accommodating 300 patients in the various buildings on the grounds, and is visited daily by the medical officers in attendance. The patients—extern and intern—are examined and prescribed for, in presence of the students. The operating theatre is well lighted, having been recently greatly improved, and the seats are arranged so as to enable the students to see the successive steps of the numerous operations performed. The theatre is, also, through the courtesy of the Trustees, used daily as a lecture room, for the delivery of Clinical Lectures. It has been recently greatly enlarged and remodelled, and is the largest and finest hospital theatre in the Dominion, and is not surpassed anywhere for accommodation, light, and convenience. It is capable of seating 500 medical students. Under existing arrangements, the Clinical Course, both in Medicine and Surgery, is very full ; and all the numerous Lectures delivered in the Hospital, by the various members of the Hospital Staff, are open to every student who has taken out his Hospital and Clinical Lecture tickets. Toronto being the great railway and manufacturing centre of Ontario, accidents requiring operation, are of frequent occurrence. The attendance of outdoor patients daily is also very large and increasing, and abundant opportunities are enjoyed by students for acquiring a familiar knowledge of Practical Medicine and Surgery, including not merely major operations, but minor Surgery of every kind—

ordinary Medical Practice, the treatment of Venereal Diseases, Skin Diseases, and the Diseases of Women and Children.

Fever Hospital.—A large building has been erected in the Hospital grounds where the treatment of fevers can be practically and profitably seen and studied.

The Eye and Ear Hospital is now on the same grounds, giving unprecedented advantages to students desirous of making a special study of the diseases of these important organs. This institution is fully equipped with every modern appliance.

Burnside Lying-in-Hospital.—This Hospital is also on the Hospital grounds, making it very convenient for students attending its practice, and affording special and valuable facilities for the study of practical midwifery. One of the medical officers will be in daily attendance, for the purpose of giving instruction to students. Students who have attended one course of Lectures upon Midwifery, and who have taken out the ticket for this Hospital, are furnished with cases in rotation.

Toronto Dispensary.—From 5,000 to 6,000 patients are yearly treated at this institution. The cases are of great variety, comprising a large number of pulmonary affections and children's diseases. Minor operations are of daily occurrence, and excellent practice is afforded in the application of splints and bandages. The hours of attendance are from 12 to 1 daily. This institution, with all its advantages, is open to students, and the attending Physicians furnish them with all possible facilities.

APPOINTMENTS OPEN TO STUDENTS.

Hospital Assistantships.—The Board of Trustees of the Toronto General Hospital annually appoint two students of this School as Hospital Assistants. These positions are of great practical value, and the recommendation for them from the Faculty will be given to those students whose attainments and standing at the various examinations, and whose moral character is such as will render them capable of discharging satisfactorily the duties belonging to the appointment.

Clinical Clerks and Dressers.—The members of the Faculty who belong to the Acting Hospital Staff, will each appoint two or more students to act as Clinical Clerks and Dressers, whose duties are to take notes of the cases under treatment, and to carry out such directions as they may receive from the Professors. These positions are tenable for

three months, and are of very great practical utility. Under the above arrangements each of the Medical Officers who belong to the School, is able to appoint at least four students during each session. No student can act as Clinical Clerk for longer than ONE period of THREE months during the same session.

Prosectors and Assistant Demonstrators of Anatomy and Physiology.—There will be appointed annually two students who have distinguished themselves as Anatomists, as Prosectors, who will have the great advantage of preparing the material required for the Lectures on Anatomy. Also two students, Assistants, to aid the Demonstrators in such ways as may be required, and two Assistants to assist in Physiological Demonstrations.

THE PROPERTY OF
Trinity Medical College.
LECTURE FEES.

Anatomy, Surgery, Practice of Medicine, Obstetrics, Materia Medica, Physiology, General Chemistry, Clinical Medicine, and Clinical Surgery, \$12 each; Practical Anatomy, Practical Chemistry, Normal Histology and Pathological Histology, \$8 each; Medical Jurisprudence, \$6; Botany and Sanitary Science, \$5 each; Registration, payable once only, \$5.

Optional Branches—Surgical Appliances, Pharmacy, Zoology, and Medical Psychology, \$5 each.

All students after having attended and paid the fees for two full courses of lectures in any branch, shall be entitled, without further charge, to a perpetual ticket for that branch, except the following:—Practical Anatomy, Practical Histology, (Normal, or Pathological), and Practical Chemistry, every course of which, if attended, must be paid for. Botany and Sanitary Science are charged for once only.

All fees to be paid strictly in advance.

Special arrangements have been made for gentlemen desiring to enter this School who may have attended one or more courses of Lectures in other recognized Schools or Universities. Dental and other casual students, matriculated or non-matriculated, can attend any course or courses of Lectures they may desire in this institution, on paying the usual fees for the same.

SCHOOL EXAMINATION FEES.

For the First Year's Examination,.....	\$5 00
For the Primary ".....	5 00
For the Final, including Diploma	5 00
For the Final Examination (including Diploma in all cases where the previous Examinations have been passed in some Institution recognized by the School.....)	15 00

Hospital Fees.—The Toronto General Hospital, \$20 for a perpetual ticket ; Lying-in-Hospital, \$5 for six months.

LIBRARY.

The Library is large and is being added to every session. Last session many new and valuable works by the best authors were procured, and the intention is to have a copy of every standard work on Medicine, Surgery, Midwifery, etc.

MUSEUM.

Special care has been taken in regard to the Museum in order to make it useful, not only to the members of the Faculty in the teaching of their respective departments, but also as far as is possible, useful also to the Student himself, in getting up his work. Great expense has been gone to by the School, in procuring Skeletons, Preparations, Models, Apparatus, etc., and the collection is not surpassed by that of any Medical Institution in the Dominion. In fact, while irrespective of cost, nothing PRACTICALLY USEFUL has been omitted, the mere multiplying of specimens of no PRACTICAL value has been studiously avoided.

A large number of specimens gathered from hospital and private practice has been collected during past years, which are used in illustrating the several lectures of the Course. A considerable number of the very finest models and preparations, from Paris, have been during the current year added to the Museum, and the collection is being constantly increased.

During the past session, the Museum has been further enriched by the addition of a very large number of specimens of the drugs most commonly used in medicine, including the Alkaloids. The greatest care has been taken in the selection of these, and they are arranged in their **orders**, as required by the Examining boards in Great Britain and Ireland, in order to their being readily studied by the students.

THE PROPERTY OF
Trinity Medical College.

Students and friends of the School may greatly advance the interests of medical science, by contributing to the Museum, as many have already done, any interesting specimens they may meet with, in practice.

The Curator will be in attendance at stated times, to give all required information to students, regarding specimens and preparations.

GENERAL MATTERS.

The Faculty, in order to give intending students every information, have appended to this announcement the requirements of the College of Physicians and Surgeons of Ontario, before the Board of which all who desire a license to practise in Ontario, whether graduates or not, must present themselves.

Gentlemen who hold Certificates of Registration as qualified practitioners in Great Britain, are entitled to registration by the Medical Council in Ontario, on payment of the same fees, and passing the same examinations before the Medical Council, as are required of all Canadian graduates.

All Ontario students who intend practising in their own Province, are required to take the Examinations of the Council, whether they intend going into practice immediately after graduating, or going to Europe for a time, to pursue their studies still further.

The requirements for graduation in each of the various Universities, with which this school is affiliated, will be found at the end of this Announcement. IT IS THE PRIVILEGE OF THE STUDENTS OF THIS SCHOOL THAT THEY MAY PRESENT THEMSELVES FOR EXAMINATION IN DEGREES IN MEDICINE, AT ANY ONE OR MORE OF THESE UNIVERSITIES. Those who desire to proceed to Great Britain, after finishing their studies here, will find Trinity Medical School fully recognized by all the Medical Institutions, Hospitals and Examining Boards of the mother-country.

The Treasurer or some other member of the Faculty will be in attendance at the School on Monday, September 26th, 1887, and the following days, up to the day of the opening of the session, from 10 a.m. till 12 noon, and from 2 till 4 p.m., to register the names of intending students, and to give such information regarding Lectures, etc., as may be required.

For further information, or for copies of this Announcement, apply to W. B. GEIKIE, M.D., *Dean*, 52 Maitland St., Toronto.

Board may be obtained in the vicinity of the School at rates varying from \$3 to \$4 or \$5 per week, according to the accommodation required.

REGULATIONS FOR STUDENTS

(To which special attention is requested.)

I. Students are expected to conduct themselves in an orderly manner in the Lecture rooms, AT ALL TIMES, not only DURING LECTURES, but also when neither Lectures nor Demonstrations are going on.

II. In the case of noisy, or other disorderly conduct, or of doing wilful injury to College property, any student may, at the discretion of the Professor or Lecturer, be required to leave the Class-room. Persistence in this, or in any other offence against discipline, after admonition by the Professor or Lecturer, shall be reported to the Dean of Faculty. The Dean, may at his discretion, reprimand the Student, or refer the matter to the Faculty at its next meeting, and may in the interval suspend such student, or students, from attending the Classes. Such conduct disqualifies a student from competing for medals, scholarships, or for any honours.

III. While in any part of the College building, students are expected to conduct themselves in the same orderly manner as in the Class-rooms.

IV. When students are brought before the Faculty under these regulations, they may be (a) reprimanded, or (b) suspended from classes, or (c) summarily expelled, according to the circumstances of the case.

V. Regular and punctual attendance on all lectures taken, is expected from every student. Non-attendance to any considerable extent, unless from illness, or some other unavoidable cause, will prevent the tickets being certified at the end of the session.

VI. Damage done to College property must in every case be made good by the party who does the damage.

TRINITY MEDICAL SCHOOL

MEDICAL, LITERARY AND SCIENTIFIC SOCIETY.

PATRONS AND HONORARY MEMBERS—PROFESSORS AND LECTURERS OF TRINITY MEDICAL SCHOOL.

The 1st Year's-men elect their representatives at the first meeting, to be held in October, 1887.

This Society meets throughout the session, at regular intervals, for reading and discussing papers on Medical, Literary and Scientific subjects, and gives several public entertainments of a literary and musical character during the session. The meetings have been exceedingly successful, and it is expected that they will be even more so during the coming session.

UNIVERSITY OF TRINITY COLLEGE.

Trinity ³⁵ Medical College.

(b) By having passed the Matriculation Examination accepted by the College of Physicians and Surgeons of Ontario, or Quebec, or that of the Law Society of Upper Canada.

(c) By having passed an Examination recognized as equivalent to any of the above.

The subjects of the Medical Matriculation Examination are :

- (1) Writing and Dictation.
- (2) English Language, including Grammar and Composition.
- (3) Arithmetic.
- (4) Algebra including Simple Equations.
- (5) Euclid, Bks. I., II.
- (6) Latin, Cæsar, Bellum Gallicum, Bks. I., II., or Bks. V., VI. ; or Bellum Britannicum ; or Cicero, de Lege Manilia ; or Virgil, Æneid, Bk. II.
- (7) And any ONE of the following subjects, to be selected by the Candidate :
 - (a) Scripture History ; and St. Matthew's Gospel, chap. i.-ix. incl. in Greek.
 - (b) Greek, Xenophon's Anabasis, Bk. I.
 - (c) French, Voltaire's Charles XII., Bks. VI., VIII.
 - (d) German, Schiller's Thirty Year's War, Bk. I.
 - (e) Natural Philosophy, including Mechanics, Hydrostatics and Pneumatics. (Balfour Stewart's Physics is recommended.)

The Candidate for Degrees in Medicine or Surgery must be of the full age of twenty-one years, and present a certificate of good moral character.

He must also produce certificates of having pursued his medical studies for a period of *four* years, and, during that time, of having either attended Medical Lectures during *four winter sessions*, or of having studied for *one* year with a medical practitioner, and of having subsequently attended Lectures during at least *three full winter sessions*. Graduates in Arts or in Science will be only required to attend *three winter sessions*.

During the four years, he must have attended two courses of Lectures of six months each, on Descriptive Anatomy, Practical Anatomy, General Chemistry, Materia Medica and Therapeutics, Physiology, including Histology, and ONE course of three months on each of the following subjects :—Botany, Practical Chemistry, including Toxicology.

The above Lectures must have been attended, and the First year's Examination must have been passed in a recognized Medical School, before the Candidate can be admitted to the Primary Examination in Medicine.

He must further have attended two courses of Lectures of six months each, on Theory and Practice of Medicine, including Pathology ; Principles and Practice of Surgery ; Midwifery and Diseases of Women and Children ; and two courses of three months each on Medical Jurisprudence, and one course on Sanitary Science.

He must have attended for at least *eighteen* months the practice of some General Hospital, and during two Sessions, Clinical Lectures on Medicine and Surgery.

He must have attended for at least six months the practice of a Lying-in Hospital or give satisfactory evidence of having otherwise enjoyed equivalent advantages of gaining obstetrical knowledge, with a certificate of attendance upon at least six cases of labour.

He must have passed two University Examinations, called the Primary, and the Final Examinations in Medicine.

EXAMINATIONS.

The Primary Examination may be passed at the end of the Second Year. The subjects are : Anatomy, Physiology, including Histology, Chemical Physics and General Chemistry, Practical Chemistry, Botany, Materia Medica and Therapeutics, and Toxicology.

The Primary Examinations of other recognized Universities, and that of the College of Physicians and Surgeons for Ontario, Quebec, or Manitoba, will be accepted in lieu of the University Primary Examination, provided that the Candidate shall in all cases pay the full fee for the degree, but if any of the subjects of the Primary Examination do not form part of the Examination allowed, the Candidate shall be required to take such subjects together with his Final Examination.

The Final Examination takes place at the end of the Fourth Year. The subjects are :—Theory and Practice of Medicine, including Medical Pathology, Principles and Practice of Surgery, Midwifery and Diseases of Women and Children, Medical Jurisprudence, Sanitary Science.

The Primary and Final Examinations may be taken together at the end of the Fourth year.

equivalent to the Primary, shall be exempted from this Examination, and required to pass only the Final. They must pay the full fee for the degree.

The Examinations are held annually in the spring, and the time of holding them is so arranged as not to interfere with those of the Medical Council of Ontario, which are held annually in Toronto.

The Curriculum of this University being formally recognized by the several Royal Colleges of Physicians and Surgeons of Great Britain, all graduates of Trinity College are entitled to every privilege enjoyed by the holders of Degrees from any Colonial University.

Conferring of Medical Degrees.—These are conferred at a Special Convocation held annually, at the close of the Winter Session.

MEDALS.

Two Medals, one gold and one silver, known as the "University Medals," are given by this University, annually, in Medicine to the two students who stand first and second respectively, in ALL the subjects, Primary and final, at the close of the Examinations.

THE "NELLES" SCHOLARSHIP.

From money devised by the late Ven. Archdeacon Nelles of Brantford, Ont., a scholarship of the value of \$100 will annually be given to a student, who has taken his full course of Four Sessions at Trinity Medical School on his graduating at Trinity College. The student receiving this "Scholarship" shall be recommended for it by the Faculty of the said Medical School. The recommendation will be based upon the character and class standing of the student receiving it, as exhibited throughout his entire course.

CERTIFICATES OF HONOUR.

Certificates of Honour require 75 per cent of the marks and are given in this University annually, to those students who reach this standing. Medals are only awarded to students whose standing is highest in the list of those reaching, or going above 75 per cent. of the maximum number of marks.

FEES.

For Matriculation examination, including Registration.	\$ 5 00
For Registration of a Candidate not Examined by Trinity College.	1 00
For Degree of M.D., C.M.	24 00

The fee for the Degree is distributed as follows :—\$10 before the Candidate presents himself for the Primary Examination and \$14 before he presents himself for the Final Examination.

Candidates rejected in either the Primary or Final Examinations will have the fees for that examination returned to them, less \$5. Candidates required by the Examiners to take any of the subjects of the examination a second time, will not be required to pay any other fee for such examination.

UNIVERSITY OF TORONTO.

AFFILIATION.

This University has by statute the power as heretofore, with the approval of the Governor of Ontario and Council, to affiliate with itself independent incorporated Medical Schools.

Trinity Medical School is, and always has been, fully affiliated with the Provincial University and is represented on the Senate. All the Degrees and other Honours of this University, are as open to the Students of this School, who fulfil the requirements as laid down in the curriculum, and given in this announcement, as to those of any Medical School in the Province.

Rules and requisites for Graduation—Degree of M.B.—The following are the requisites for admission to the degree of Bachelor of Medicine, to which there are two ordinary modes of proceeding, viz., (1) by taking a Pass Course; or, (2) by taking an Honour Course.

Matriculation.—Candidates must pass the Matriculation Examination, unless (1) they possess a Degree in Arts, not being an Honorary Degree, from any Dominion or British University, or (2) have already matriculated in the Faculty of Arts, or in the Faculty of Law in this University, or (3) present a Certificate of Registration as Students in the College of Physicians and Surgeons of Ontario. They must also produce satisfactory certificates of good conduct, and of having completed the sixteenth year of their age.

commence in the latter part of June. Supplemental examinations for Matriculation will be held in the latter part of September, at which those who were rejected at the June examination, as well as new candidates, may offer themselves. The Fee for Matriculation is \$5.

Candidates may delay presenting themselves for the Matriculation Examination until any time before the Final Examination for the Degree of M.B.; but no candidate will be allowed to compete for relative standing prizes or scholarships until he has passed the Matriculation Examination. Candidates are requested to signify whether they purpose taking the Pass or Honour Examination, scholarships are only awarded in connection with the latter. The following groups of subjects must be passed by every Matriculant: Two, out of the four languages, Latin, Greek, French, and German, one of which must be Latin.

1887-8.—CICERO, in *Catilinam*; *Bellum Britannicum*. Translation from English into Latin prose, involving a knowledge of the first forty exercises in Bradley's Arnold's composition.

Greek.—1887-8—XENOPHON, *Anabasis*, Book I.

French.—A Paper on Grammar. Translation from English into French Prose. SOUVESTRE, *Un Philosophe sous les Toits*.

German.—A Paper on Grammar. GRIMM'S, *Kinder in Vund Hans-Marchen*. Schiller *Der Taucher*.

Translation of easy passages from English into German.

(2) Mathematics, including Arithmetic, Algebra to the end of Quadratics, and the first three books of Euclid. (3) English Grammar, Composition and Dictation, with the outlines of English History and the Geography of America and Europe. The following text-books indicate the scope of the examination in Grammar and History: Mason's English Grammar, Edith Thompson's History of England.

Candidates who proceed to the Degree of M.B., by taking the Honour Course, will be grouped in two classes according to their success in the Honour examinations. Only those Candidates will receive their Degree with First Class Honours who have obtained First Class Honours in the Second, third and Fourth Professional Examinations. Those Candidates will receive their Degree with Second Class Honours, who have been placed in the Honour List in the Second, Third and Fourth Professional Examinations.

Candidates who are taking the Honour Course will be entitled to First Class Honours in any of the Professional Examinations if they obtain seventy-five per cent. of the aggregate marks allowed to such examina-

tion. Those who obtain sixty-six per cent. of the aggregate marks will be entitled to First Class Honours.

Extra papers on all the Pass subjects will be set for Honour Candidates, as well as papers on certain Extra Honour Subjects. The Extra Honour Subjects are : Comparative Anatomy of the Vertebrata (Huxley) and Practical Examination in Natural Philosophy for the First Year, and Physiology of Muscle, Nerve, Circulation, etc. (Brunton, Foster, etc., pp. 165-419.)

Degree of M.D., Fees, etc.—The following are the requisites for admission to the Degree of M.D., viz.: Having been admitted to the Degree of M.B., being of one year's standing from admission to the Degree of M.B., and having composed an approved Thesis on some Medical subject. The fee for the Degree of M.B. is \$20 ; for the Degree of M.D., \$20 ; and for admission ad eundem graduum, \$20.

Scholarships.—The following Scholarships are annually offered for competition :—At Matriculation, one of \$100 and one of \$50 ; at First Professional Examination, one of \$120 and one of \$80 ; at Second Professional Examination, one of \$120 and one of \$80 ; and at Third Professional Examination, one of \$120 and one of \$80. The First Year's Scholarships are not open to Graduates in Arts with Honours in the Department of Natural Sciences. No Professional Scholarship will be awarded to any Candidate who has not obtained First Class Honours in the Examination for which it was conferred. Each Scholarship is tenable for one year only, but the Scholar of one year is eligible for the Scholarship of a succeeding year.*

Medals, Prizes and Certificates of Honour.—A gold medal and three silver medals are offered annually for competition among the Undergraduates who have succeeded in obtaining the degree of M.B. with First Class Honours, and will be awarded according to the percentage of marks in the aggregate results of the Second, Third and Fourth Professional Examinations ; but the gold medal will only be awarded on the special recommendation of the Examiners. Prizes, each of the value of Ten Dollars in books, may be awarded annually among Undergraduates in Law, Medicine and Arts, for the best Composition in Greek Verse, Greek Prose, Latin Verse, Latin Prose, English Verse, English Prose, French Prose or German Prose.

Certificates of Honour will be given to those students, who, at any of

Trinity Medical College,

the Examinations, have been placed in the First Class in Honours in any Department.

Starr Medals.—The late Richard Noble Starr, M.D., devised certain property for the encouragement of the study of the subjects of Anatomy, Physiology, and Pathology. In fulfilment of this object the Senate has established one Gold and two Silver Medals, called the "Starr Medals." These medals are conferred upon the three Bachelors of Medicine who have attained, in the course of their Annual Professional Examinations, the highest marks in the following subjects:—Anatomy for the first and second years, and in Surgical Anatomy of the third year; Physiology for the first and second years, and Histology, Physiological Chemistry and Practical Physiology of the second year; General Pathology and Morbid Anatomy and Histology of the third year. Every recipient of the Medal must have attained the standing of First Class in each of the above-mentioned subjects, and must have been classed in Honours in the Fourth Professional Examination.

Regulations for Undergraduates.—Undergraduates are required to attend Lectures and receive practical instruction during each of four years, at ONE OR OTHER of the Schools of Medicine recognized for this purpose by the University. Each undergraduate, at the end of each of the four years of his Course, may present himself at the Annual Examination of that particular year, or if he prefer to do so, he may elect to take the Primary Examination, held at the end of the second, and the Final Examination held at the end of the Fourth year. The Annual Examinations are styled the First, Second, Third and Fourth Professional Examinations, and are to be passed in separate years in the order named, by all Candidates for the degree. Graduates in Arts of this University with Honours in the Department of Natural Sciences, will be exempted from the First Professional Examination, and from the fee for the same. They must, however, take the Anatomy of that examination along with the Second Professional Examination. The fee for each Professional Examination is Five Dollars, payable when the candidate notifies the Registrar of his intention to present himself. The following certificates are required for the different examinations:

First Professional.—(1) Of having attended Lectures on the following subjects: Anatomy, 100; Physiology, Inorganic Chemistry, each 60; Natural Philosophy, 20; Botany, Zoology, each 30. (2) Of practical instruction in Anatomy during six months.

Second Professional.—(1) Of having attended Lectures on the following subjects: Anatomy, Physiology, Materia Medica, and Thera-

peutics, each 100. Organic Chemistry. (2) Of practical instruction in Anatomy, six months; Histology, Physiological Chemistry, each three months. (3) Of having dissected the parts of the Human Body once. (4) Of being skilled in compounding and dispensing drugs.

Third Professional.—(1) Of having attended Lectures on the following subjects: Practice of Medicine, Surgery, Obstetrics, each 100. Clinical Surgery and Medicine, General Pathology, each 50. (2) Of having dissected the parts of the Human Body a second time. (3) Of Practical instruction in Pathological Histology, three months.

Fourth Professional.—(1) Of having attended Lectures on Clinical Medicine and Surgery, Forensic Medicine, each 50; Hygiene, 25; Medical Psychology, 12. (2) Of practical instruction in Chemistry in its application to Hygiene and Forensic Medicine. (3) Of having attended at least six clinics in a public Lunatic Asylum. (4) Of having conducted at least six labours. (5) Of proficiency in Vaccination. (6) Of attendance in the Wards of a public Hospital, accommodating not less than 100 beds, during eighteen months. (7) Of attendance for six months on the Out-practice of a Hospital Dispensary or registered Practitioner. (8) Of having attended twelve Autopsies.

QUEEN'S UNIVERSITY

Candidates for the Degree of this University, with which TRINITY MEDICAL SCHOOL is now affiliated, must be of the full age of twenty-one years, and must have completed a period of *four years' study*, and have passed the Matriculation Examination of Queen's College, which is as follows:

English Language, Grammar and Composition.
 Arithmetic, with Vulgar and Decimal Fractions.
 Algebra, including Simple Equations.
 Geometry, first two books of Euclid.
 Latin, Grammar, and translation (Cicero, Cato Major, Virgil,
 Æneid, Bk. I., 1-304. Ovid, Fasti, Bk. I., 1-300.
 Natural Philosophy, as in Stewart's *Physics*.

Graduates in Arts and Matriculants in Arts or in Medicine, in a recognized British or Colonial University, and those who have passed the *Matriculation Examination of the Medical Council of Ontario*, or any

Matriculation Examination recognized by that body as equivalent to its own, are not required to pass the above Matriculation Examination.

This examination must be passed before a student is admitted to any of the professional examinations, although lectures may be attended previous to passing this Matriculation Examination.

In the case of Graduates in Arts or in Science, a period of three years only will be required, but not fewer than THREE WINTER sessions attendance at lectures.

Every Candidate must have given regular attendance on Full Courses of Instruction in the following Departments for the periods stated, during four, or at least three, sessions. In the latter case a year's study with a registered practitioner must have been passed before attending Lectures.

Two full courses of Six Months each, on Principles and Practice of Medicine, Principles and Practice of Surgery, Clinical Medicine, Clinical Surgery, Midwifery and Diseases of Women and Children, Physiology, including Histology, Anatomy Descriptive, Anatomy Practical, General Chemistry, Materia Medica and Therapeutics.

Also two courses on Medical Jurisprudence and Toxicology; and one each on Practical Chemistry and Botany, and not less than 18 months' hospital attendance, and six midwifery cases, etc., and every candidate must present a certificate of having compounded medicines in an office of a medical man or in a hospital or dispensary for a period of not less than six months.

The above course of study may have been pursued either wholly at Trinity Medical School, or partly here, and partly at some other Medical School recognized by Queen's University.

The Examinations are (a) held at the end of the 1st year; (b) the PRIMARY, at the end of the 2nd; (c) the Final held at the end of the 4th year.

Candidates may undergo the examination on Sanitary Science and Medical Jurisprudence at the end of the 3rd year if they desire to do so, or they may be taken with the final examination at the end of the 4th year.

The Primary and Final Examinations will be held simultaneously in Toronto and Kingston, on the same Examination papers. Oral Examinations on all the subjects are also required as well as the written.

Matriculation Examinations will also be held in Toronto twice in each year, at which intending candidates may present themselves.

Every candidate must present a certificate of good moral character.
Fee for the degree of Doctor of Medicine, \$25.

College of Physicians and Surgeons OF ONTARIO.*

Every one desirous of being registered as a Matriculated Medical Student in the Register of this College, except as hereinafter provided, must present to the Registrar, the official certificate of having passed the Third Class non-Professional Examination, with the Latin option included, and after July 1st, 1888, the SECOND CLASS NON-PROFESSIONAL, with all the subjects specified in page 7 of this announcement, where upon, he shall be entitled to be so registered upon the payment of twenty dollars, and giving proof of his identity.

The Third Class non-Professional, with the Latin option, which will not be accepted after July 1, 1888, includes the following subjects:—English Grammar, English Literature, Composition, Dictation, Arithmetic, Algebra and Euclid, History, Geography and Latin.

Graduates in Arts, or Students having Matriculated in Arts in any University in Her Majesty's dominions, are not required to pass this Examination, but may register their names with the Registrar of the College, upon giving satisfactory evidence of their qualifications, and upon paying the fee of twenty dollars.

Every Medical Student after Matriculating shall be registered in the manner prescribed by the Council, and this shall be held to be the beginning of his medical studies, which shall date from that registration.

MEDICAL CURRICULUM.

Every student, after his Matriculation has been registered, must spend a period of FOUR years in actual professional study except as hereinafter provided.

Graduates in Arts of any College or University recognized by the Council will only be required to pass three years after graduating, in

attendance upon Medical Lectures, before being admitted to the final examination.

Every STUDENT WHO HAS NOT ATTENDED ANY RECOGNIZED MEDICAL SCHOOL PRIOR TO JUNE, 1880, SHALL BE REQUIRED TO ATTEND MEDICAL LECTURES FOR AT LEAST FOUR SESSIONS OF SIX MONTHS EACH. THIS REGULATION IS HEREAFTER TO BE STRICTLY ENFORCED IN ALL CASES.

Each "Six Months' Course" shall consist of not less than one hundred Lectures.

Every Student must attend the undermentioned Course of Lectures, in a University, College, or School of Medicine, approved of by the Council, viz. :

Two Courses of Six Months each upon Anatomy, Practical Anatomy, Physiology, Theoretical Chemistry, Materia Medica and Therapeutics, Principles and Practice of Medicine, Principles and Practice of Surgery, Midwifery, and Diseases of Women and Children, Clinical Medicine and Clinical Surgery.

Two Courses of Three Months each upon Medical Jurisprudence, and *One Course of Three Months* upon Practical Chemistry, including Toxicology, and one on Botany.

One course of Twenty five Demonstrations, upon Normal Histology, and *One course of Twenty five Demonstrations* upon Pathological Histology, and one course of twenty lectures on Sanitary Science.

Every candidate must prove his having carefully dissected the whole adult human family.

Every Student before being admitted to the Final Examination hereinafter mentioned, must have spent a period of six months in compounding medicines.

He must have attended the practice of a General Hospital for 24 months.

He must have attended six cases of Midwifery.

He must, before being registered as a member of the College of Physicians and Surgeons of Ontario, have passed all examinations hereinafter prescribed, and must have attained the full age of twenty-one years.

All persons from recognized Colleges outside the Provinces of Ontario and Quebec, who desire to qualify themselves for Registration in this Province, must pass the Matriculation Examination recognized by the Council, and must attend thereafter one or more full "Winter Courses"

of Lectures, in one of the Ontario Medical Schools, so as to complete fully the Curriculum required by the Council, and shall pass, before the Board of Examiners appointed by the Council, all the examinations hereinafter prescribed.

EXAMINATIONS.

1. The Professional Examinations are divided into *Primary* and *Final*.

2. The *Primary* Examination shall be undergone after the SECOND, and the *Final* after the FOURTH winter session.

3. The following branches are embraced in the Primary Examination, viz.:

Descriptive Anatomy, Physiology and Histology, Theoretical Chemistry, Practical Chemistry, and Toxicology, *Materia Medica* and Pharmacy.

4. Each candidate for the Primary Examination will be requested to present with his Lecture tickets a certificate of having undergone an Examination at the School he has attended, at the close of his First Winter Session, on Anatomy, Physiology, Chemistry, *Materia Medica*, and Botany. Such Examinations shall not, however, in any way affect the Primary Examination of the Council. Also a Certificate of ability to make and mount Microscopic specimens. Each candidate for Final Examination must present a Certificate of attendance at Six Post-Mortem Examinations, and a Certificate of ability to draw up a Report of a Post-Mortem Examination; also, a Certificate of having reported satisfactorily on six Cases of Clinical Medicine, and six Cases of Clinical Surgery.

5. The following branches are embraced in the Final Examination :

Medical and Surgical Anatomy, Theory and Practice of Medicine and Therapeutics, Clinical Medicine, Sanitary Science. Surgery, other than Operative. Surgery Operative. Clinical Surgery. Medical and Surgical Pathology. Midwifery (other than Operative), and Diseases of Women and Children. Midwifery, Operative. Medical Jurisprudence.

6. Any Candidate who passes creditably in three or more Branches, but fails in the others, shall receive credit for the subjects so passed and be compelled to pass in the other branches *only*, at a subsequent Examination.

FEES.

The following scale of fees has been established by the Council of the College of Physicians and Surgeons of Ontario :

Registration of Matriculation	\$20 00
Primary Examination.....	20 00
Final Examination.....	30 00

Candidates who are unsuccessful are entitled, at a subsequent time, to a second Examination, free of charge.

All fees to be paid to the Treasurer of the Medical Council prior to the several Examinations.

THE PROPERTY OF
Trinity Medical College.

TEXT BOOKS.

Class books suitable for the examinations of the different Universities, the Medical Council and Trinity Medical School :

Dunlison's Medical Dictionary. Gray's Anatomy. Fulton's or Kirke's Physiology. Roscoe's or Wilson's Chemistry, and Croft's Practical Chemistry. Garrod's Materia Medica. Farquharson's Therapeutics. J. Mitchell Bruce's Materia Medica. Bessy's Essentials of Botany. Husband's Forensic Medicine. Tanner on Poisons. Wilson's Sanitary Science. Playfair's or Leishman's Midwifery. Erichsen's or Holme's Surgery. Flint or Bristowe's Practice of Medicine. McAllister's Annual Morphology. Packard's Zoology. Huxley and Martin Elementary Biology.

THE FOLLOWING FORMER STUDENTS OF TRINITY MEDICAL
SCHOOL HAVE GRADUATED AT TRINITY COLLEGE.

Attention is directed to the very large number who, subsequent to
graduation, have taken one or more diplomas in Great Britain.
