London, Saturday, Sept. 20.

THE CITY SEWAGE AND THE RIVER.

The Attorney-General, in carrying out
the law for the suppression of nuisances in
public streams, has been blamed in some
quarters, and an endeavor has been made
to make political capital against the Gov-
ernment because it refuses to suspend the
law and permit London to be foul of the
River Thames, to the detriment of residents
of neighboring municipalities.

We admit that there may be difficulties
in the way of entirely combating the
nuisance, but that is no reason for suggest-
ing that something effective could not be
provided for abating such a condi-
tion of the river as was recently
graphically set forth in the Free
Press. Our contemporary gave about as
revolting a picture of the filthy condition
of the stream as could well be imagined; to
read it was enough to make one sick. We
are given to believe that the picture—no
doubt true—then drawn by our contem-
porary came under the attention of Dr. Bryce,
secretary of the Provincial Board of Health,
and the details then supplied had not a
little influence on him when drawing up his
report on the subject to the Attorney-
General.

It is in the interest of London and
of adjoining municipalities that something
should be done to bring about a reform
of this condition of affairs. An intelligent
man does not need the fear of an action
at law to aid in reaching that conclusion.
There are many opinions as to what is best
to be done. Some assert that it is better
the river should remain filthy. The
Advertiser cannot agree with that
proposition. So pretty a resort should not
be kept in a filthy condition, and it is high
time that the authorities were in earnest
about keeping it clean. Mr. John Bonser,
while holding that the river water will
never be used for domestic purposes, writes
to say that the Board of Aldermen have
been remiss in not having sluice gates put
in the waterworks dam. That with
occasional dredging of the river and the
flushing of the sewers, would, in Mr. Bon-
ser's opinion, "get over the trouble with
London West, and make our city, which is
now the healthiest in the Dominion, still
healthier." It is probable that if the Coun-
cil were to enter on even such partial
remedies as these, the residents of London
West who have taken the matter into
court might agree to a withdrawal of the
legal proceedings which now hang over the
city.

Judge Elliott's suggestion that the Pro-
vincial authorities, before any compre-
hensive scheme of river purification here or
elsewhere is resolved on, should appoint a
special commission to consider and report
on the best possible means of disposing of
sewage, is a good one. We have much to
learn on both the sanitary and engineering
aspects of this question, the proper solution
of which is of vital importance to the pub-
lic welfare, and precipitate action is not ad-
visable. We commend the matter to the
early consideration of the Government.

MR. DRYDEN'S SPEECH.

Most people will say that the new Min-
ister of Agriculture made a very good and
sensible speech at the Industrial Fair the
other day. But the Toronto Empire was
not pleased. That journal affects to be-
lieve that in speaking of educational insti-
tutions Mr. Dryden exhibited his prejudices
by referring to the Agricultural College
and the farmers' institutes and making no
mention of the Dominion experimental
farms. There are other things which Mr.
Dryden might have said also had he chosen
to speak for an hour, but in a brief
speech of ten minutes he could not be ex-
pected to cover the earth. He was speak-
ing to Ontario farmers, and as Minister of
Agriculture for the Province of Ontario he
very properly dealt with Ontario subjects.
Besides, it is almost an abuse of terms to
speak of the Dominion experimental stations
as "educational institutions."

The Empire is possibly not old enough
to remember how a gentleman prominently
connected with one of those stations spoke
for an hour before an Ontario farmers' in-
stitute without so much as mentioning the
work of the Agricultural College. This
was an instance of bad taste which Mr.
Dryden is never likely to display.

TO THE TESTIMONY.

Sir John Macdonald has the boldness to
say that his party are now and always have
been in favor of reciprocity with the United
States. This is said because, as he finds it,
the United States Congress has declined to
put a clause favoring reciprocity with Can-
ada in the McKinley tariff bill. But he
cannot hope to make Canadians believe
such nonsense. The vote of his party on
the reciprocity resolutions moved in the
House of Commons shows where they stand.
They declared themselves hostile, and one

member of the Government went so far as
to declare himself opposed to any measure
of reciprocity with the United States. It
was that vote and the Foster Tariff Act
that influenced the United States Senate
against the Sherman resolution.

We shall not get reciprocity until the
Tories are turned out; that much is very
clear.

PERSONAL AND GENERAL.

—The Earl of Aberdeen is a cosmopolitan
in his efforts to do good. His assiduity in
the services in St. John's Presbyterian Church,
Hamilton, to-morrow night.

—The revelations regarding Christian
Scientists and the faith healing question
become interesting. Rev. Mr. Fyfe's
testimony in to-day's ADVERTISER is, to say
the least, striking.

—It is probable that the newly-appointed
Ontario Minister will visit the Western
Fair. The directors have sent invitations
to Hon. Mr. Dryden, Minister of Agri-
culture, Hon. Mr. Harcourt, Provincial
Treasurer, and Hon. Mr. Brounson.

—The Toronto Empire pretends that Mr.
Mowat does not possess the confidence of
the people of Ontario. A majority in the
total vote polled of nearly 20,000 ought to
convince even the Empire that the people
are very decidedly on the side of Mr.
Mowat.

—With Elaine, Sherman, Hitt, Repub-
lican leaders, in favor of a full and free
reciprocity with Canada, and the mass of
the Democrats favorable to the project, it
is only a question of time and a new Gov-
ernment, or the conversion of Sir John
Macdonald (which is hardly possible) when
reciprocity of a most profitable character to
both countries will be established. Let it
never be forgotten that all trade is profit-
able or it will not take place.

—Camp meetings are decidedly on the
wane. Gone are the interest and enthusiasm
that used to attend them in the days when
hundreds of families abandoned their habi-
tations and took to the tents in camp meet-
ing grounds, and thousands of day visitors
from the country round flocked in as earnest
participants or interested spectators of the
great revival. Nowadays extraordinary at-
tractions are advertised in order to win the
indifferent public, and as even these en-
couragements fail to draw respectable audiences,
disheartened managers talk of selling their
grounds for secular uses.

—The Canadian Pacific Railway authori-
ties are at last showing some eagerness to
settle the Northwest. One of their best
officers, Mr. Callaway, of Toronto, has the
work in hand, and he is carrying it on with
great vigor. He has recently prepared a
large map of the Northwest Territories and
the Western States, in which the advan-
tages of the country north of the 40th
parallel are exhibited in telling style. He
shows by official figures that while in the
States and Territories south of that parallel
the average price of farm land ranges from
\$5.89 to \$22.90 per acre, there are in the
Territories north of it 200,000,000 acres
where each settler may obtain 160 acres as
a free grant.

—One of the most amusing developments
in the newspaper world these days is the
twisting and turning of the Canadian high tax
journals. But a few days ago, those journals
were asserting that the McKinley high
tariff bill would do Canadians no harm,
and that anyway our farmers and lumber-
men could easily find new markets else-
where. Now it is dawning upon these
journals that the war of tariffs between the
countries, in which the present Ottawa Gov-
ernment has taken such a strong hand, will
be hurtful to Canadian interests, and they
have the audacity to blame the Liberals,
the true and tried friends of full and fair
reciprocity, for the state of affairs. As if
in Parliament in favor of action looking to-
wards reciprocity, only to find a solid
phalanx of restrictionists ready, at the bid-
ding of the friend and special beneficiary of
the combines, to vote down every propo-
sition in favor of reciprocity.

—A question of some importance has been
brought to the notice of the Dominion Gov-
ernment by Mr. Cockburn, M.P. for Center
Toronto. It has reference to fishing in the
Muskoka lakes, and Mr. Cockburn repre-
sents that those lakes are being almost de-
pleted of fish by the reckless practices which
prevail of allowing fishermen to catch
without restriction. The Dominion Gov-
ernment, however, does not like to take
any steps in the matter, as it is doubtful
where the jurisdiction lies. The question
ought to be settled speedily, otherwise the
waters may be robbed before either the
Federal or the Local Government can take
steps to protect them. There are many
waters, though, where the jurisdiction of
the Province is unquestioned, and we think
that Mr. Mowat should see to it that fish-
ing regulations are applied to them. They
might, in fact, be made an important source
of revenue if their management were placed
in the hands of a competent man.

OTHER NEWSPAPERS.

THE LOCAL NEWSPAPER.

Hamilton Times.
The average newspaper is of much greater
benefit to a town than any other concern of
the same proportions. Its circulation ex-
tends beyond the limits of the town, ad-
vertising its advantages to all and sundry,
and many a man who never spends a cent for
advertising in its columns reaps the benefit
of its influence in attracting strangers and
purchasers to the place. No good work is
carried on without its help, public spirit is
fostered among the people and public im-
provements ever meet with heavy support
and encouragement. Public charities and
helped by its timely assistance or words of
approval. Rascality and crookedness in
high places are exposed and condemned,
and in short the average newspaper is "a
terror to evil-doers and a praise to them
that do well." The daily papers give the
locality in which they are published an im-
mense amount of advertising for nothing.
Newspapers that stand by and fight for
their own town should not be scurvily
treated by the municipal or any other
authorities and the people should make it
their business to see that they are not.

FAITH-HEALING.

A Methodist Clergyman's Dealings
with Christian Scientists.

Can Diseases Be Cured by
Providential Dispensation?

Rev. W. H. Fyfe, of London West, Says
Yes, and Gives Scripture for It.

"I don't indorse all that the Christian
Scientists teach," said Rev. W. H. Fyfe of
London West, a respected supernumerary
minister of the Methodist Church of
Canada, to an ADVERTISER representative
yesterday. "I have not studied up their
doctrines fully, and some things that I have
read which they believe I do not compre-
hend. They may be plain to them, but
they are not so to me. But inasmuch as
my name has been introduced by persons
interviewed on the subject, I have no
hesitation in saying that I have got good
through intercourse with Mr. Robb, the
leader of the Christian Scientists in this
city."

"In what way, Mr. Fyfe?"
"I am under obligation to him for lead-
ing me out on lines of thought in reference
to my privileges through the atonement of
Christ in healing the body as well as for
the salvation of the soul."
"Can you say that doctrines held by the
Christian Scientists you do not believe?"
"One is their belief that there is no such
thing as bodily matter. They teach that
we are perfect in the image of God. God is
a being of spirit only, and I cannot believe
that we can ever reach that point of
perfection in this world. Then there
must be matter in man's constitution,
for he is being with natural wants
to provide against, and he must have
certain sustenance to keep his body in con-
tinued existence."

"How came you to associate with these
people?"
"Well, I have been suffering from severe
lung trouble, and I had been taking
remedies. Ultimately, finding myself
getting worse, I read in the Christian Sci-
entist that tubercular disease was a good deal
like the leprosy of old—if the Lord did not
heal it, it could not be healed. Hearing of
the cures alleged to be effected by the
agency of the Christian Scientists, I sought
out Mr. Robb, and he engaged in prayer
and ever since I have felt greatly benefited
by the intercourse."

"What are your own views as to these
faith cures?"
"I will tell you frankly," remarked Mr.
Fyfe, "that I believe the Lord will not do
for us, in this or any other trouble, what
we can do for ourselves; but I want to say
that because of the strong faith which these
men possess, because of their belief in
securing perfect harmony with God and the
living a perfect Christian life, I close
communion with the Divine Spirit, they are
blessed of God in their labors among their
fellows. They may be so blessed even
while holding views which I cannot
indorse, for one reason, because I cannot
comprehend their meaning. I may say that
the report that I desired to become a
Christian Scientist is not correct, though
there are no doubt features in their
lives which I cannot but admire."

"Of course you believe in healing by
faith, Mr. Fyfe?"
"I do," he replied. "I have faith that,
under certain conditions, God heals dis-
eases. The Apostle James distinctly teaches
this in the following verses of the fifth
chapter of his epistle:
"Is he sick among you? Let him call for
the elders of the church; and let them pray
over him, anointing him with oil in the name
of the Lord."
"Confess your sins one to another, and pray
one for another, that ye may be healed. The
effectual prayer of a righteous man
availeth much."
"Surely this apostle teaches that when
it so pleases him the Lord will cure a dis-
ease without medicine."

The Christian Scientist's Cure.

To the Editor of the ADVERTISER:
The interview of your reporter with the
Christian Scientist, when, shimmered down,
develops the following bare facts: He has
been doing business in the city for the past
eight months and can refer to three patients
only who have been benefited, a Mrs. Rose,
a Mrs. Kellam and a Miss Hodgins, all
residing in the city. Comments are unnecessary. Ac-
cording to his statement, the first two
were treated in Toronto, which reduces him
to the Hodgins patient, and even in this
case the mother states it is not a complete
cure; she uses her words, "It was a cure, but
it was not a complete cure, it was a partial
cure." In plain English it was too com-
plicated for the Almighty. So much for
the solitary witness. Not being a theo-
logian nor qualified to pass an opinion on
the correctness of his interpretation re-
garding spiritual death, I would merely
ask those Scientists who propose
doing "with their old people." Are
they aware of the fact that by correct
computation, based on scientific researches,
the world dies in 25 years, and the
human birth rate is such that if not counter-
balanced by a death rate, in a very few
hundred years there would not be standing
room on the earth for man's progeny, not
to speak of how he was to be fed. Perhaps
the Scientist would feed him on wind.
Would it not be more in keeping with his
exposition of "Christianity" to leave out the
dollar? Did we ever hear of the Divine
Healer charging a fee? Oh, the Scientist
says "we have got to live." Certainly!
have faith; you are going to live anyway.
Visit the hospital and relieve the sufferers,
and a paying contract can be made with our
city fathers. Barnum understood human
nature when he said, "People will pay to
be humbugged."
London, Sept. 19. SKEPTIC.

A peculiarity of Hood's Sarsaparilla is that
while it purifies the blood it imparts new vigor
to every function of the body.
Miss Bradton, it is said, has got above
writing her novels. She supplies the plot,
and employs apprentices to do most of the
work in filling in.
Mr. J. R. Allen, upholsterer, Toronto,
sends in the following: "For six or seven
years my wife suffered with Dyspepsia,
Constipation, Inward Piles and Kidney Com-
plaint. We tried two physicians and any
number of medicines without getting any
relief, until we got a bottle of Northrop's
Lymman's Vegetable Discovery. This was
the first relief she got, and before one bottle
she used to be healthy and derived from it
was beyond our expectation."

Through Pullmans and Dining Car At-
tached to New York via Erie
Railway.

The Erie is the only line running through
Canada that gives the people of London the
most service, and it is to be hoped they
will take advantage of it by purchasing
their tickets via the favorite Erie and save
themselves the annoyance of changing cars
and jumping off the trains for miles.

THE WEATHER PROPHECY.
Toronto, Sept. 19-11 p.m.—The disturbance which was over Lake Superior last night now covers the Ottawa Valley. Another depression enters in the Northwest. Showers have occurred in the lake region, attended by wind and rain. Elsewhere in Canada the weather has been fine. Minimum and maximum temperatures: Edmonton, 47-58; Prince Albert, 28-32; Minneapolis, 47-57; Winnipeg, 39-50; Toronto, 54-71; Montreal, 52-72; Quebec, 45-55; Halifax, 65-72.
TODAY'S PROBABILITIES.
Toronto, Sept. 20-1 a.m.—The indications for the next 24 hours for the lower lakes region covering the peninsula and as far east as Belleville are: Northwesterly to westerly winds, gradually decreasing in force; generally fair and cool.

LONDON AND ENVIRONS.
—Mr. T. W. Rothwell, this city, is visiting in Strathroy.
—The Bishop of Huron will preach in Trinity Church, Toronto, Sunday morning.
—Mr. and Mrs. J. C. Black, of San Jose, Cal., are visiting their sister, Mrs. Grace Leake, Blackfriars street, London West.
—Chief Williams, of the London police force, was in Mitchell last week, the guest of Mr. John S. Coppin. [Mitchell Advertiser.]
—A young man from London, while riding through Delaware on his bicycle, was tossed a few rods by an angry cow that was on the roadside. [Exchange.]
—Rev. Geo. Boyd will address the young men's rally in Victoria Hall to-morrow afternoon. Just three-quarters of an hour—the whole meeting—4:15 to 5 o'clock. Singing as is singing by the young men.
—Among those attending the Trinity term convocation held in Osgoode Hall, Toronto, yesterday, was T. H. Purdom, Q.C., of this city. It was decided to appoint Messrs. M. G. Cameron, Frank Joseph and A. W. Ayrton-Finlay examiners for the ensuing year.
—Temperance sermons will be preached on Sunday, Oct. 5, by the ministers of the Ministerial Association from their respective pulpits, instead of the anniversary sermons of the Y. M. C. A., which were to have been preached that day, but have been postponed. The temperance campaign will commence in earnest about the middle of next month, when outside orators will be in the field.
—The Board of Education, at Chairman Jeffrey's suggestion, have decided to grant

the city schools holidays on Thursday and Friday. The Board are of the idea that by allowing them the last two days to visit the Fair the pupils will be more inclined to attend to business during the early part of the week with that prospect ahead of them, and thus prevent any interruption in their studies.

—As a result of the recent visit of the Car Superintendent and General Manager to the city, the staff of the Grand Trunk car shops will be at once increased by 20 to 25 men. Several hundred cars, which have been standing here awaiting repairs, will be got ready for immediate service, as the demand for cars during the present exhibition season is greater than ever, and the business of the road is constantly increasing.

—The Police Court room could not host of a single culprit this morning, even the time-honored drunk failing to tenant the cage. One of the court officials loosely explained to the reporter that as Fair time had come around the hotel-keepers out of regard to the visitors and for the sake of peace and order had modified their liquor with a goodly preparation of aqua pura, thus rendering it a difficult matter for the court to come to a decision on less than twenty glasses.

—Mr. John Forsythe, of this city, has been appointed inspector of scheduled rates for the Associated Fire Underwriters of Ontario, in the place of Mr. E. S. Bell, who resigned to become inspector for the London Assurance Corporation. This is the second time the Canadian Fire Underwriters' association has appointed a young man to such a degree of perfection that they are eagerly sought by companies for the very important work of inspecting fire insurance risks.

—The opening of the Talbot street school will take place on Monday. The pupils will march over from the Union school, which they have occupied pending the completion of the alterations, and will celebrate the event by a matinee, in which songs, recitations, etc., will make up an interesting programme. Several members of the Board will be present and deliver five-minute speeches no longer. The Wellington north school also proposes to have an auspicious opening on the same day, when the services of "D" School band will probably be secured, and with the assistance of the scholars the occasion will doubtless be one of great eclat.

—Mr. Fred Saunders, the well-known comique of London, arrived in town yesterday, and at once set to work to organize an amateur minstrel company in Leamington. Mr. Saunders is a perfect adept at everything pertaining to minstrelsy. To his efforts is largely due the success which has crowned the Young and Little's Minstrels of London. There is any amount of talent among Leamington young men, and people in the district may look for a big treat on the evenings of Wednesday and Thursday, Oct. 8 and 9, the days of our fall fair. [Leamington Post.]

A NIGHT WITH STRAUSS.
A very large number of the people of London and Western Ontario went there last night to the Princess Rink, to spend an evening with Edward Strauss and his band—Strauss, the famous Vienna conductor and composer, and his world-known orchestra.

The first experience of the concourse of people was disagreeable. It was within five minutes of eight when the writer arrived, the doors were open, and the respectable mob seethed and squeezed, and tried to make room for itself with its elbows. More than one delicate woman came very nearly to the fainting point. It was altogether a piece of gross mismanagement and an outrage on common sense.

However, inch by inch, those behind jammed those in front into the Rink, and the pleasures of the programme soon caused all present to forget the tribulations of the entry.

Edward Strauss has a dark, handsome face and graceful figure. He wears a violin in hand—occasionally joining in the tide of orchestration, but mostly using the bow as a conductor's wand. And a magic wand it is! Apart from the Strauss music—his brother Johann's compositions getting the place of honor equally with his own—particularly noticeable were Wagner's opening to "Lohengrin," a Gounod Meditation, and a serenade arranged from Moszkowski. But there was nothing more delicious than Edward Strauss' own adaptation of the old English song, "Once I Loved a Maiden True." The touching air sang itself all through the flying, rattling work of soft accompanying harmonies.

Strauss has come, and Strauss has gone, the "horns of effluvia" following his departure in echoes of sweetest music. The following (besides several encores) constituted the programme:
Overture to the Opera—"If I were a King"
Charming Myrtles—Waltz.....Edward Strauss
Entr'acte to the Opera—Lohengrin.....R. Wagner
Pierrot polka.....Edward Strauss
Song.....Edward Strauss
—Arranged by Edward Strauss—
Vienna Blues.....Johann Strauss
Portpourri, from Carmen.....Bizet
André Polka.....Edward Strauss
Meditation over Johann Seb. Bach.....T. Prandium.....Edward Strauss
By Us at Home—Waltz.....Johann Strauss
Serenade.....Moszkowski
Arranged by Edward Strauss
In the Whirl—Polka.....Edward Strauss

A Business School Which Does Credit to the Name.
The place which the Canada Business College of Chatham has secured in the confidence of the business community and public in general is most convincing evidence of the superior work which it is doing, and fully justifies its claim to the position of "the best" in Canada.

It pays to attend the best, and nothing less should satisfy the student who intends to take a course in commercial work, shorthand or typewriting. Its advantages summarized: A successful record of eighteen years; no graduates who are failures as accountants; no slipshod work on the final examination nor diplomas granted to incompetents. It is in the strictest sense of the word a live business school. Every member of its staff of several regular teachers and two lecturers is thoroughly qualified for his work.

Its catalogue which is one of the hand-somest issued in America, and is splendidly illustrated with views of the interior of rooms and specimens of pen work by former students, will be sent free to all who are interested by addressing, D. McLachlan, principal, 224 St. 91 a
Boys, for the cheapest livery in London try W. Lindsay, Dundas street, London West.

Money is saved by buying parlor suites, mattresses, easy chairs, lounges, leather pillows, and all kinds of furniture; get your furniture repaired at W. J. BRYANTON'S, 123 King street. Telephone 478.

Sing Their Own Praises.
There are few, if any, in the great army of smokers who have not been, by experience, placed in a position to judge as to the merits of the "Norma" 10-cent cigar manufactured by H. McKay & Co., of London. In almost every cigar store and hotel in Canada this set of all lovers of 10-cent goods has found its way, and is finding rapid and constantly increased sale. Unlike other similar goods, its fame is not of a transient nature. The "Norma" contains all the merits of the imported cigar, and has in many cases supplanted its more expensive rivals, and each successive season but adds to its host of admiring consumers. The large establishment of H. McKay & Co. is kept continually engaged in supplying the demands made upon them for the "Norma."

Horsemens, call and get a pair of Hargrave's patent interfering boots, and one of Jewett & Leonard's patent curry combs, at TACKA-BERRY & LOUGHEE'S Saddlery and Harness Store, 356 Richmond street. Sign of the big whip. fwt

Photo for the Week:

Eve's Tomb.

The Arabs claim that Eve's tomb is in Sidsan, the seaport of Mecca. The Temple, with a palm growing out of the solid stone roof (a curiosity which is the wonder of the Orient), is supposed to mark the last resting place of the first woman. According to Arab tradition, Eve measured over 200 feet in height, which strangely coincides with an account of our first parents written by a member of the French Academy of Sciences a few years ago, which also claimed a height of over 200 feet for both the tenants of the Garden of Eden. Eve's tomb, which is in a graveyard surrounded with high white walls, and which has not been opened for a single internment for over 1,000 years, is the shrine of thousands of devoted worshippers, who make a pilgrimage to the spot every seven years. It is hemmed in on all sides by the tombs of departed sheiks and other worthies who have lived out their days in that region of scorching sun and burning sands. Once a year, on June 3, which is, according to Arabian legends, the anniversary of the death of Abel, the doors of the temple, which form a canopy over the supposed tomb of our first mother, remain open all night in spite of the keeper's effort to close them. Terrible cries of anguish are said to emit from them, as though the memory of the first known tragedy still haunted the remains which blind superstition still believes to be deposited there.

Liberty That Is Bondage.

The utter selfishness in some families raises the question of the wisdom of personal liberty being the cornerstone of our national life.

Where people live so closely together as they do in all places where land is high in value, there should be an effort to conduct each household in such a way as to interfere the least with the comfort, the rights, of one's neighbors. A dog who barks and invades the neighbors' premises should not be tolerated by public sentiment. A whole block of people were made miserable by a poll-parrot last winter. The weather was mild, and the windows in the room in which the parrot was kept open most of the time, and the endless, senseless repetition of the few sentences the bird had been taught annoyed all within the sound of its voice.

A small boy can create more friction, more anger, than can be aroused by a political discussion. When a tired individual has been wakened all the fore part of the night, it is very irritating to be awakened at 5 o'clock by the shrill voice of a small boy singing "Annie Rooney," when he knows only a word or a line beyond the chorus, and repeats over and over again the line he knows, the temptation to throw a boot-jack at him. The weather is quiet in the early morning, but the tumult of ice, milk, grocery, and butcher wagon, the same small boy starts down the block with a wagon made of a soap box on four wooden wheels that squeak and scream as the wood scrapes the rails that do duty as nuts. And when he varies this by screams of "Mamma, mamma!" until the one thought is how to escape from the feeling is that law should control the family life—law administered under National, or at least, correct. Now, that's called law, and not long ago I saved a man's life by telling him to stop it, and not one of the doctors could do anything for him.

How To Treat an Architect.

Mr. Schuyler was a Renaissance in North America. He was a great architect, and his work was of great value to the world.

WHY TOIL SO?

Why toil and drudge at the washtub?

Why rub your clothes to pieces in your efforts to get them clean?

Why bend over a steaming washtub and fill the house with steam and smell?

Why endanger health and life by inhaling hot steam and then going out in the cold air?

Why have rough and sore hands after washing?

Why all this, when by using "Sunlight" Soap you can do the wash so easily, without hard rubbing, without steam and smell, without risk to health, and without injury to your skin or clothes?

Follow directions and you will see how "Sunlight" Soap takes away the terrors of washing.

Quite Different.

It is so easy to detect the fallacies in the beliefs of other people, and so very difficult to see that we ourselves can be any thing but wise!

A Word About Mean Wills.

Husbands who profess to love their wives intensely sometimes play them a very mean trick when about to depart for that better land where there is "no more marrying nor giving in marriage."

Advantages of the Present Evening Dress.

It is true that, as we all dress alike, a gentleman is sometimes mistaken for a waiter, but that is a calamity not always avoidable.
