Summer Sale

The goods and not the talk about them, makes this sale. It isn't because of large type and big space in the newspapers, it isn't because of persuasive argument, it isn't because of any special public preference for this store. It isn't for any of these reasons that this sale is in records of sale far beyond anything in our history. It is because of the high quality of the goods and the extreme low prices that the chief July activity centres here.

Commentary.—I. The spies sent out (vs. 1-20). The people were afraid to go forward and had asked Moses to send spies to search out the land (Deut. 1, 22). Although it would have been better for them to have and faith in God and to have at once entered upon their promised possessions, yet in order to satisfy the people the Lord ordered Moses to send the spies. Moses selected twelve leading men "every one a prince" (R. V.), in order that the best possible results leading men every one a prince (R. v.), in order that the best possible results might be realized. It is well to remember that in numbering the tribes the tribe of Joseph had become two tribes, according to the prediction of the dying Jacob (Gen. 48, 5, 6), and the tribe of Levi is not counted. "The object of the expedition was (1) to learn what were the attractions of the country, (2) to discover the difficulties in the way of taking possession, (3) to find out the best way of reaching the country, (4) to learn what preparations it was necessary to make." In verses 4-15 we have the names of the spies. In verses 17-20 Moseon names of the spies. In verses 17-20 Moses gave them special directions. They were to travel the whole length of the land to the Lebanon mountain region, and find out all about the land and the people, and to bring back some of the fruit of the land. On their return they would be expected to make a detailed report.

II. The spies return (vs. 23-25). 23. Brook of Eshcol—A stream near Hebron. Eshcol means "a cluster," and was so named by the spies because of the fine cluster of grapes they found there (v. 24). Bare it between two—This was not necessary because of the great weight, but to protect the grapes from being bruised. There are clusters of grapes produced in Palestine which weigh twelve pounds, and by care-ful cultivation bunches have been produced weighing over twenty pounds.

Pomegranates—A fruit of the apple kind.

25. After forty days—"Forty days were sufficient for a journey of 250 miles—into the vicinity of Hamath and the return. The spies could rest six Sabbaths and travel 500 miles, going at the rate of less than fifteen miles a day. It is not probable that they went in a body, but singly or by twos."

LESSON JX.—AUGUST 17, 1907.

The Two Reports of the Spies.—Num. 13: 17-20, 23-33.

Commentary—I. The spies sent out.

people became despondent and wept all night. They wished they had not left Egypt and actually appointed a captain (Neh. 9; 17) to lead them back to the taskmaster's lash. Moses and Aaron fell on their faces. Joshua and Caleb rent their clothes as a sign of their great grief, and made a strong appeal to the congregation in favor of taking the land at once. But the people like a frenzied mob tried to stone them, and were prevented from so doing only by the glory of the Lord shining forth from the tabernacle. God threatened the na-tion with destruction, and they would have perished but for the prayer of Moses. The ten spies were smitten with the plague and died. Every person over twenty years of age, except the two faithful spies, was to die before the nation entered Canaan. As a reward for their faithfulness Caleb and Joshua were permitted to enter the promised land. Caleb received Hebron as his pos from Oshea to Joshua, which signifies savior, and was also honored by being chosen as Moses' successor to lead the

I. Their commission. "Go" (v. 17. "See" (v. 18.) The proposal to search the land came from the people, and betrayed distrust of the Lord's promise and leadership. God had commanded, "Go in and possess the land" (Deut. 1; 8, 21.) But they said, "We will send men before us, and they shall search us out the land" (Deut. 1; 22.) So when God saw they would send spies, he let them have their way (vs. 133.) So it was in Israel's choice of a king (I. Sam. 8; 19-22.) They demanded it, and God permitted it, and they learned how sad it is to forsake God and lean on the arm of flesh. He lets us have our way, to let us see the folly of not walking in his way. "He is not afraid to have his promises investigated. He proved them by their own heart's desire. At every stage of advancement we show ourselve qualified or unqualified to go forward. Where God's command and promise are clearly given, the greatest boldness is the truest wisdom." After Paul had "assuredly" gathered that he was called of God to Macedonia, his was "a straight course" in the way of obedience (Acts 16; 10, 11.) He did not send Silas or Luke or Timothy over ahead to see whe they they were equal to the work.

Israelites into Canaan.

II. Their charge. "Be ye of good courage" (v. 20; Psa. 27, 14; 31, 24.) One who is of good courage is resolute, undaunted, bold as "adamant" (Ezek. 3; 9); like the rock that blushes not, shrinks not, moves not, meets danger and difficulty with firmness and without

II. "Evil report" of the ten. 1. Confirmatory. They said, "Surely it floweth with milk and honey, and this is the fruit of it. Nevertheless the people be strong" (vs. 27, 28). They confirmed the truth of God's word, but ignored His the truth of God's word, but ignored his power to fulfil it. 2. Contradictory. The land "floweth with milk and honey" (v. 27). 'The people be strong" (v. 28. The "land.....eateth up the inhabitants thereof" (v. 32). Well fed and strong, "a Confusing They saw val.—Steele. strong—Large and trained to war. cities are walled—Well fortified. The Israelites had no means of warfare by which they could be taken children of Anak—"Long-necked, famous giants, descendants from Arba, founder of the city of Hebron. The spies were terrified at sight of them."

20. the Amalekites, etc.—These people had already attacked the Israelites once (Exod. 17:8-16). The Hittites were a strong, warlike people. The Jebusites held the region round about Jerusalem. The Amorites were mountaineers, Reference is math the reference is mathered to their own classing. The mathered the mathered to therefor (v. 32). Well fed and strong, yet "eaten up." 3. Confusing. They saw the people as "giants" and themselves at the things "that are seen" (2. Cor. 4 18). Instead of measuring giants with God, they measured themselves with giants. They magnified the difficulties and minified God's strength. 4. Costly. The unfair report of the ten misled 600, omen. It turned all Israel from the path of faith (Deut. 1. 28). It prevented them from claiming God's promises. It kept them out of Canaan (14, 29). It led to their own chastisement. They "died by the plague before the Lord" (14. 37).

IV. Good report of the two. Caleb means "whole hearted," and he "wholly followed the Lord" (Deut. 1, 36). And his name is third in the first three of the twelve (v. c). Joshua's name is second in the second three (v. 8). It was changed from Hoshua, salvation, to Joshua, Jehoah, Savicur, for he was to be the temporal saviour of his people to lead them into rest (v. 16). He who ed Israel to Canaan bore the same name as the angel commanded to be given to the Son of God because he should save his people from their sins (Matt. 1, 21).
"Oh! thanks, and thanks a thousand times repeated!

We know your names, ye gallant, faithful two;
Your lowest words are like a song from

heaven. Ye searched the land out better than ye knew! When through the camp there rings a

ery for 'Egypt!'

ies, that he was so bold."—Taylor. To overcome it—Forty years later, Caleb, then an old man of eighty, proved his brave words by conquering the very region that had terrified the ten spical driving cut the gigantic Anakim, and making Hebron his own (Josh. 14, 6-14). V. Discouragement (vs. 31-33.) 31. We discouragements to holy living, Joy, peace, W. Discouragement (vs. 31-33.) 31. We be not able—This had not been asserted before. The 10 spies are increasing in their stantly set before us in the word. In the crisis of the nation's stantly set before us in the word. In march is reached. Standing on the very borders of Canaan the people evince an unfitness for the promised inheritance and exclude themselves from its possession. Had the Israelites been animated by faith in God they might have marched straight into the land and immediately subdued its inhabitants, but the nation was not equal to this and accordingly drew back to the wilderness and to death. 32. Evil report...eateth up—How unbelief grows. At first it was only as never discouraged. 2. Resolute. "Go mforter, the Guide, the Teacher. Christ was never discouraged. 2. Resolute. "Go mforter, the Guide, the Teacher. Christ was never discouraged. 2. Resolute. "Go mforter, the Guide, the Teacher. Christ was never discouraged. 2. Resolute. "Go mforter, the Guide, the Teacher. Resolute. "Go mforter, the Guide, the Teacher. Christ was never discouraged. 2. Resolute. "Go mforter, the Guide, the Teacher. Christ was also badly broken. A bad cut across the head and a number of finjuriary and always adds to the difficulty. We are to "redeem the time' (Eph. 5, 16;

Col. 4, 5), buy up the opportunity. When God opens a door and we refuse to go in, the door closes and we are shut out altogether or enter after long delay and heavy trials. Afterward when Israel would, they could not enter in (14, 40-45). This was not an arbitrary decree; they had proved their unfitness. Such a disobedient, unbelieving people could disobedient, unbelieving people could never have taken impregnable Jericho never have taken impregnable Jericho. 3. Rewarded. Long years afterward the two who brought a good report were abundantly recompensed (Josh. 14, 6-15; Deut. 31, 7; Josh. 19, 49). God never Deut. 31, 7; Josh. 10, 49). God never fails to reward the fidelity of His servants. "A man may lose for Christ, but in the long run shall not lose by Christ."

Thousand Dollars' Security Asked by

New York, Aug. 12.-After spending a estless night in a cell at Mercer street police station Eva Fox-Strangways was photographed and measured at police neadquarters to-day and afterward ar raigned in Jefferson Market Police Court. She was held by Magistrate Haris in \$1,000 bail on the charge of passing worthless checks on a modifier for \$199. The erstwhile "niece" of the Earl of Ilchester looked anything but a woman of distinction to-day. She wore a shabby grey skirt, palin white waist, cheap appearing black hat, and tried to hide her face with a small palm leaf fan that she carried in her right hand.

Mrs. Susan B. Clark, modiste of 20

plainant, appeared in court to prosecute the case. When the accused woman was she gave her age as thirty-four years and said she was born in England. half crying and trembling and answered the Magistrate in broken syllables.

"I know I gave a wrong cheque, but I wrote to complainant and asked her not to present it." said defendant. "I am sorry and will try to make matters right

very shortly."
Somewhat of a sensation was sprung when the woman, straightening up and wiping tears away from her eyes, looked at the Magistrate innocently and said, 'While I gave a wrong check I consulted a very prominent lawyer in New York about it, and he advised me to go to Canada until I could get money enough to satisfy the cheque."
• Magistrate Harris listened attentively

o the woman's story. When he told her e would have to remand her in \$1,000 bail she wept again. "I haven't got a friend in New York."

Defendant will probably have to re main in the Tombs until her trial is call ed. No lawyer appeared to defend her

A Toronto despatch: Great excitement revailed last night among the residents of Simcoe Park, the strip of land running east from the foot of Cherry street along the lake front and better known as Fisherman's Island, owing to reports of shooting and rumors that a drunken man was running amuck with a rifle. The excitement was only allayed when Wm. Rodwick, a painter, aged 39, wro lives at the park, vas placed under ar-rest for shooting with intent, and his rifle impounded by the police.

Before being taken into custody it is said that Rodwell and fired at and hit Mr. W. H. Apted's gas bline launch, chesed Special Constable Eateman with the gun, and fired several shots into Con-stable Bateman's house. Rodwell had four Mark II. military cartridges in his pockets when searched at No. 4 police station, and a Lee-Enfield rifle was riso

in his possession.

He told the police that he had fixed several times: that he was drunk at the time and did not know what he doing, and that he was sorry. Fortu nately no one was hit by the ballets. The man is a member of H Company, Royal

Finding the Body.

The trunk in question attracted the attention of the baggagemaster at Marseilles station on August 6, and he caused it to be opened. Inside was found the body of a woman cut to pieces. The man and woman—a middle-aged manic harge of the trunk were arrested. They gave their names as Mr. and Mrs. Gould, residents of Monte Carlo, but denied that they had committed any crime. When questioned by the examining Magistrate they stated that they may have the victim but slightly. While she knew the victim but slightly. While she had been staying at their home, Villa

the murdered woman was seized from behind and held while she was stabbed to death.

At Monte Carlo the body was identi-

fied as that of Therese Williams, a well known frequenter of the gaming rooms.

It is believed she was murdered for her Winnipeg. jewels.

Who is Sir Vere Goold?

London, Aug. 12.—Vere and Violet Goold are the names given, according to Goold are the names given, according to the despatches received in London, by the couple arrested at Marseilles in con-nection with the trunk murder. They were married at a Roman Catholic church in London in 1891, and in the marriage certificate the groom's full name is given as "Vere St. Leger Goold, son of Geo. Ignatius Goold," and the bride is described as "Violet Wilkinson, a widow, daughter of Hippolite Girodin." The couple seem to have assumed the title of Sir Vere and Lady Goold while living at Monte Carlo, but no Sir Vere Goold appears on the books of reference. There is an Irish baronet, Sir James Stephen Goold, living in Australia, who has a brother, Vere Thomas St. Leger, who married Violet, daughter of Hippolite Girodin, of Chateau la Sone, Department of The Naver Exercises. of The Isere, France, and whose address Drummond street, Montreal, Canada. Vere Thomas St. Leger Goold was for-merly secretary to the Municipal Boun-daries Commission in Dublic s given in Debrett's Peerage as 56 Drummond street, Montreal, Canada.

She Was in Montreal.

Since then there has been no clue to her whereabouts. While here Madame Gould would speak occasionally to some of her customers about her high connections in the old land, and would ometimes refer to the exalted position

of her husband's family in Ireland.

At the time of the late Queen Victorio's jubilee in 1897 the Goulds, husband and wife, paid a flying visit to England. Mr. Gould was to be knightd, madame said, but then it is quite likely that no one took this serio Very little is known here about Mr. Gould.

If the act purported to give power to the court to annul a marriage it would be ultra vires, as the Dominion Parliament alone has jurisdiction in such cases. But the Provincial Legislature has exclusive jurisdiction under the B. N. A. Act as to the solemnization of marriages. The Provincial act does not deal with divorce or an-

nulment of a marriage, but only treats of the case where a form of marriage is gone through between two persons under the lawful age, without consent required by law, and where no valid marriage was effected or entered into. The act does not purport to give the court power to annul a marriage but

BRADSTREET'S TRADE REVIEW.

BRADSTREET'S TRADE REVIEW.

Montreal:—General trace conditions here are reported as keeping a very steady tone. The movement of wholessie and retail stocks continues good, notwithstanding the fact that this is more or less a quiet scasso. The feature of conditions at the present moment is to be found in the money market. Money is scarce upon every hand, and seidom, if ever, has it been more urgently needed than in the case at the present moment. This stringency in the money market has existed, to some extent, for the best part of a year, although it is only in the past three or four months that the strengency has been so pronounced as to give rise to some misgivings as to the result. The expenditures attendant upon the great development of the country during the past four or five years, and the general business expansion, have been segment that the country's monetary resurces were bound to be drained. In view of the fact that much money will soon be needed for the crop movement, it is not reasonable to expect much change in conditions in this respect for some time. Anere is no doubt but that in some quarters this money stringency is, to some extent, interfering with trade expansion that would otherwise take place. General trade has, otherwise, a decidedly healthy tone. There is great activity in all lines of industry, manufacturers is almost every branch finning more or loss difficulty in taking care of the outpress. Toronto:—Trade generally holds a very sat-

in all lines of industry, manufacturers is almost every branch finning more or less difficulty in taking care of the outsiness offering.

Toronto:—Trade generally holds a very satisfactory tone here. The volume of fall business compares favorably with that of previous years. Heavy snipments of fall and winter drygoods are going forward and shipments are being made as fast as manufacturers' deliveries will permit. There is an excellent business in blankets and woollens. Shipments of ready-made clothing lave been exceedingly heavy and the trade promises to keep up well to the end of the season. Reports from all parts of the country indicate that an excellent retail trade may be expected for the coming season.

Winnipeg:—The steady movement in the outlook for the crops is having its full effect upon business here. Fall business is in good shape and good orders are still coming in. Money is tight to such an extent that complaint is general.

Vancouver and Victoria:—The wholesale trade holds a good brisk yone. For this season so far the volume or business has bean it is estimated, about a third greater than was done last year. There is every evidence of a great expansion of trade all along the coast. The retail trade too, is active and collections are generally good.

Quebec:—Unsuttled weather, accompanied by heavy rans, has somewhat interfered with the hay cut, which is general throughout the province, rawing 'crops showing good results.

Hamilton:—Business hold an active tone. The demand for fall lines is heavy and the outlook for the season is bright. Country trade is fair. Collections are generally good.

London:—Business generally is moving well there. The sorting trade is active for the time of the year and fall wholesale trade is brisk.

Ottawa:—There is little change in the trade situation there. Wholesale stocks are moring well although retail trade has a slightly quiet tone. Prospects for next season, however, are good.

"I have met him," a slight frown contracting his brow.

"Yes; he is a very clever fellow," said Mrs. Bayley, picking up a stitch with muca dexterity and continuing the conversation in an imperative kind of whisper, as Miss Onslow began to play a dreamy nocturne. "No doubt he thinks I ought, Nor do I see why you should decline."
"No, no; I will never accept a salary. Freedom and independence is my motto, and equality is the soul of friendship. Why should you pay me for what is a easure to me to give?"

Though Mrs. Fane soon dismissed her

She sat long in an ex-tremely easy chair, musing vaguely, first, with a slight smile, on Mrs. Bayley's in-dependence, and remembering not in any niggard spirit, but with a certain sense humor, that during the years which she had given a salary of a hun-dred pounds to a lady for whom she had a sincer regard, her general expenses were considerably less than during the Bayley regime. This was merely a passing thought. The young grass widow was truly liberal; but whether from indolence, or some reluctance of the heart to avail itself of its comrade intellect's shrewdness shows of the source of the strength of the companion of the source of th rewdness, she was often taken in with shrewdness, she was often taken in with her eyes open. Thus, in a way, she saw through the lively, impulsive Mrs. Bayley, and recognized that her independence was a sham. Nevertheless, she imagined her sincere in her shamming, that she herself believed in her own assumptions. Her depreciation of Colonel Carrington did that gentleman no injury in Mrs. Fane's estimation; in fact, it did not recur to her mind. Yet she thought a good deal of him. He puzzled her. She

The great incentive to these early walks is that I can be free and alone; at other times I hardly belong to myself. Here I am at my own disposal."

True; I must be of some use," said, gravely, resuming his place beside her. "Suppose you let Master Midge run; he seems anxious to get down." For a few minutes Mrs. Fane was occupied in observing that the little dog limped slightly and seemed stiff; but gradually these symptoms disappeared. and he ran about as inquisitively as

Then his guardians fell into pleasant discursive talk on many subjects, Carrington's somewhat sombre views calling forth much bright and playful contradiction from his companion, whose keen, picturesque observations roused him to think before he replied. She was frank and thoroughly at ease, holding Mrs. Fane's maid found her mistress her own with infinite good breeding, nearly dressed when she came to call her. She was immediately dispatched to graceful tact, yet through all her brightness sounded the echo of a minor chord, a subtle breath of resignation that sug-gested some loss, some bruised place in

her full harmonious being.

Carrington listened and looked with all his soul, and thought that never had an hour passed so swiftly.
"I shall report your gallant rescue," said Mrs. Fane, as she parted with him

when they reached the road. "Pray come in to luncheon and let Mrs. Bayley thank you in person.' "I shall be most happy," returned Car-

"I have got a footing," he muttered to himself as he turned back to the beach, "and it will go hard if I do not make it a foothold."

As the luncheon party included Sir Frederic, Miss Onslow and Dr. Methvin, besides Colonel Carrington, Mrs. Fane took the opportunity of organizing an expedition to visit an old castle, which, with the adjoining fishing village and some caves, were one of the few excursion points available for visitors at St. Cuthberts.

The preliminaries were soon settled,

"And leave Dr. Methvin and me without a lady to escort!" exclaimed Carrington. "That is a most unfair division of good things." In this country we have no means of ascertaining precisely what is the amount of mischief done by lightning. In
France and Germany statistics on the
subject are systematically tabulated by
the Government every year. If complete
statistics were accessible there can be
little doubt they would show that the
annual loss of life and property is far
greater than is commonly supposed. In
one respect the damage is often greater
than it need be, even apart from any consideration of lightning conductors.

During five or six days in the summer
of 1884 it was estimated by a competent
authority that besides other mischief
not less than six hundred animals of one
sort and another in England were killed
by lightning, most of them being sheep
and cattle in the field. In all such casualties it is usual to regard the carcasses ascertaining precisely what is the am-Mrs. Bayley. "I cannot counternance such an injustice. "Well, you will see about the ponies, and we can arrange details afterwards," said Mrs. Fane, and the party rose from the table, dispersing soon afterwards. It is of course, very well known that a good lightning conductor properly fixed is an absolutely roliable safeguard against all injury; but a fact which is not so well known is that an efficient lightning conductor might often be set up at the cost of a few shillings by taking advantage of the conducting rower of trees. He threw himself on a sofa as he spoke, his good-looking face completely changed by an angry scowl, and the sleepy blue eyes, which many a maid and matron considered irresistible, lit up with the conducting power of trees.

time that trees are a source of peril in times of thunderstorm, though from acci-dents which every now and again occur it would seem that there is still a great it would seem that there is still a great amount of ignorance on the subject. Only a few days ago a lightning flash struck a poplar tree near Winchester and killed a man who had taken shelter at the foot of it, no doubt in ignorance of his danger. Such fatalities are exceedingly common, and it has not infrequently occurred that cottages and other buildings have been struck by lightning in consequence of the vicinity of some I trust and hope to have some positive proof to give him of an understanding with Mrs. Fane. I rather think he would prefer getting his money without a row and an expose. I have told Jephson to let me know the moment the rascal is in town. Meantime, I must make all in consequence of the vicinity of some tall tree.

The casualties to animals are often due to the fact that with the commence ment of a thunder shower they are ap to gather for shelter beneath the branch es of some isolated tree. The explanation of the mischief is very well known. A tree is a conductor of lightning, but not mother's got it, too, And I don't know if I can stan' this know if 1 winter through; winter through; a very good one. The hostess would not tell the reence appointed a few years ago by the Meteorological Society of London to inporter about it, saying she preferred to have her friend Miss So-and-So write the piece. This was on Tuesday. The Signal went to press Wednesday night and Miss So-and-So brought the story in Thursday morning, after the papers were all in the post-office. Later in the day the host-ess called at the Signal office and abusquire into the subject and report on the best form of the thing there is nothing much better than a solid iron rod. On the newest of our public buildings, such as the new Law Courts, where it may be assumed they would act on the best prothe post-office. Later in the day the hostess called at the Signal office and abused the editor like a pickpocket for not

These are made in sizes varying from a sixteenth to an eighth of an inch thick and from three-quarters of an inch to two or three inches wide. The copper is a somewhat better conductor than iron, and the flat bands adapt peerly, for the reporter is on to her job, while Miss So-and-So can't write for sour apples. We strive to please, but trying to please everybody is war, and you know Sherman's definition of war.—The Holton Signal. themselves more easily to the walls of a building than a thick rod. But the ron makes a very satisfactory lightning rod, and provided it is quite continuous and embedded well into the earth, going down, if possible, into a moist stratum of soil, it affords perfect security.

The cost of such a rod up a house

the main trunk of a tree to a height a little beyond that of surrounding objects

is really very trifling.

Many persons who are well aware of the protective power of a good lightning rod are not perhaps equally well aware that it may serve not only to direct harmlessly to earth an actual discharge of lightning, but may also prevent the occurrence of the flash by conducting the lectricity in a silent attraction and the conduction of the co electricity in a silent stream so to speak. For this purpose electricians now recognize the fact that it is important that the conductor shall terminate in a sharp point, indeed the most approved form of lightning rod now has a corona of points, to do so, they should be periodically examined, and should be repointed when they are found to have rusted away.

The notion prevalent at one time that Herald.

a conductor should terminate in a ball a conductor should terminate in a ball is quite abandon; d, and so also is the idea that a tube is better than a solid rod. It used to be thought that electricity passed only by the surface of the conductor, and as a tube presented more surface than a solid rod the tube was for a while the favorite form. This is now known to have been a mistake.

It is true electricity at rest distributes itself over the surfaces of a conductor.

It is true electricity at rest distributes itself over the surfaces of a conductor, but when in motion it passes through the whole mass, and the efficiency of a metal rod of any given kind is to be gauged by its sectional area, only, as has been said, that sectional area must terminate in a point, the finer the better.

Without the point it will carry the most violent discharge to earth—or as, of course, it sometimes happens, from the earth to the clouda—if the rod or band be sufficiently thick, but with the point it may act as a sort of spout or pipe

may act as a sort of spout or pipe through which the electricity may rush without any violent explosion at all. The Meteorological Journal for 1875 relates a very curious illustration of this action of conductors. A party of tourists in the Engadine had attained a height of

in the Engadine had attained a height of about 11,000 feet above the level of the sea when they found themselves enveloped in mist and falling snow, and in silence broken only by a curious intermittent noise which they presently traced to a flagstaff on the mountain peak. The noise resembled the rattling of hall-stones on a window, and close scrutiny convinced them that it was due to the neasure of selectricity of electricity. passage of a current of electricity through the pointed flagstaff. At one moment the rattling was at the top of the staff, at another at the bottom and at other times it quivered seemingly all through it, but never for a moment through it, but never for a moment ceased. The party ventured to hold up ther iron-pointed alpenstocks, and they all instantly experienced the familiar tingling of an electric current through their bodies.

It was evident to them that the clouds It was evident to them that the clouds over and above them were in what electricians nowadays call a condition of high potentiality and that there was a sort of an electrical downpour through the flagstaff, which constitued an outlet for a force which but for some such passage would probably have flashed out in lightning.

Vaccination for Blackleg and Anthrax in Cattle.

The disease known as blackleg in cattle, although entirely unknown in many extensive agricultural sections of Can-ada and not at all widespread in any district or province, annually causes quite extensive losses to cattle raisers. Anthrax, which is quite a different disease, although frequently confused with blackleg in the minds of many cattle raisers, is also the cause of serious loss of stock. The former disease is almost entirely confined to cattle under three years, and is generally fatal. The latter attacks other classes of farm cattle, and the human subject is not exempt from its infection, which generally results seri-

By the aid of science cattle raisers are now enabled to protect their stock against these maladies. As the human family is vaccinated against smallpex, in the same manner cattle are rendered immune from blackleg and anthrax. The Department of Agriculture at Ottawa through the health of animals branch is now in a position to supply preventive vaccine for each of these diseases at the nominal cost of five cents per dose. Until recently, by special arrangement with extensive manufactures in the United States, these products were secured at a reduced cost, and were placed in the hands of Canadian cattle raisers at ten cents per dose for blackleg vaccine and fourteen cents per dose for anthrax vaccine. It is due to the fact that these preparations are now being made at the biological laboratory in connection with the health of animals branch that they can be supplied at five cents per dose.

The vaccine for blackles may be ad-

PACKERS' PROFITS

Aug. 8.—Mr. Wilbert Ripley left Mr. E C. Bulford has the following

'Hog, Bacon and beef Prices" omething wrong with our packers only a part of this applies. gain, as the London cables quote Canadian bacon at an average of

\$14.40, which is much higher than it us been for a long time. While our thens drovers are paying \$6.85, the drottreal market stands at \$7.35. Western drovers are paying \$6.65 at country points, while the Toronto markets stand \$7.20.

Packers claim they base the price of their hogs on the London cable. If that statement was true we would receive eight cents in Athens to-day. While packers claim it will be six weeks from now before the bacon would be on the market out of the the bacon they have on the market now at those big figures, and which they made out of the hogs they bought about six weeks ago at 6½c? Perhaps you can give some light on the matter where the wrong is. During the past week, based, no doubt, by the miller on the London bacon cables of \$14.40, hog feed at our distributing points has

gone up \$2 per ton. This is the way the matter stands to day in thens: Bacon, \$14.40; live hogs \$3.85. It appears to me that the packers are squeezing the man who carries the swill pail, and are fishing for another large supply of brood sows, which they will certainly get if they do not mend their ways.

It was only yesterday I saw the wire expendi instruction from the Montreal Davis named: House, to one of our drovers to pa \$6.85 for straight hogs, but with a cu of \$2 on brood sows. This makes th farmer hold sows back, which, no doubt, many will do, and raise mor pigs for the packers' profit. that's where the dodge comes in.

MATRICULATION RESULTS

Monday's Toronto dailies contained the record by counties of the results of the matriculation exam's throughout the province. A glance is sufficient to show that there has been a great slaugh ter of the innocents, and the low percentage of passes raises grave doubts in the minds of those who wrote on the Junior Leaving exams. Dear Sir,—Being laid up with lame back, I thought I would drop you a line to tell you that your St. Legis Lumbage cure will do all you calm for it, as I have only used part of the bottle and I feel no returning symptoms of the

lisease.

I may say I have been troubled with lamp sack for the last ten years, and tried severa their patent medicines but without results. I can heartily recommend it to any troubled with lame back, and I feel safe in saying that it's the cheapest medicine on the market.

FARM GATE SIGNS

Mr. A. A. Wright, M.P. favors farmers putting their names, the names of their farms (if any) and their addresses on signs to be displayed at the farm gates. To encourage this idea he offers four signs as prizes for breaw at Renfred Fair.
The Amprior Chronicle says: If

reasons exist for sign boards in towns and cities-and who can say nay ?there is amp'e justification for use in the rural districts, where the might fitingly be implemented with mile posts and concession numbers. Not only would they prove of service to the farmers themselves, for every in Merricksville a few days ago, and on country roads with which he is not the Mirror in speaking of his visit altogether familiar, but they would be very helpful to the stranger from town and city, who is hampered by frequent stops to ask directions and oftentimes way systems parallel one another ex stops to ask directions and oftentimes cept at a distance apart and should the Northern secure an entrance into ones interrogated, particularly when ones interrogated, particularly when the questioning is done after nightfall. Millions for Cars

Montreal, July 24 .- With the daily delivery of engines, passenger coaches and freight cars, the Grand Trunk Railway is rapidly approaching the day when the last of nearly \$7,000,000 worth of rolling stock will have been received by them during the present year. There were in all sixty passenger coaches ordered, costing about \$12,000 each, laid down in Montreal. which makes a total of \$720,000. Thirty of these have already been delivered.

There were 100 engines ordered, and of these sixty have been received. The average cost is \$15,000 each, or an aggregate of \$1,500,000.

The tremendous increase in freight traffic may be imagined by the delivery of 4,500 up to date cars. The order was for 5,200, and the average cost is \$850 each, so that the great sum of \$4,420,000 is being spent for freight cars alone. With the daily delivery of many of these the G.T.R. people are hoping to get well on the way to lift the present congestion.—

"A duel between two Confederate Genrals almost in the midst of an important

These men were Starling Price, Marmaduke,
Walker, Holmes and Fagan. Price was the

"It was a blow to the Richmond Government early in the cause. The failure lay met with the soldiers but with the leader. Helmes had planned the fight. Events showed that he had no conception of the strength of the fortifications of the enemy at of the enemy's numbers.

"After the failure dissensions among the Seaders increased. This was noticeably the ease between Welker and Marmaduke.

"If I remember correctly Walker ranked Marmaduke. In one at the movements Walker had ordered the troops under his command to retreat. To Marmaduke was given the post of danger — covering the retreat. He was assured that at a certain point he would be reinforked by Walker.

"It was important that he should have this sid. When he arrived at the point not a man, save his own division, was to be seen. Not only that, but Walker had failed to communicate with him. Marmaduke extricated himself from the situation by a miracle.

"After the troops had been rescued from the situation, for that is what it amounted to, Marmaduke, amarting under the conduct of Walker, informed Walker's superior existing conditions and demanded that his troops be withdrawn from Walker's summad. Failing in this Marmaduke said his resignation was ready.

"This was an interesting condition at such a time. I don't think it had its counterpart fairing the remainder of the war.

"Marmaduke's attitude widened the brengh. Walker remained obdurate. These came the cilmax.

areage. Walker remained obdurate. Thea came the climax.

"Marmaduke challenged Walker. The latter accepted. The affair was known only to a few. The meeting took place almost within sight of the soldlers.

"Marmaduke was an expert marksman. He killed his adversary the first abot. Think of such a thing at such a time!

"Marmaduke and his seconds were promptly arrested. Only for Walker's unpopularity Marmaduke would have been court-martiglied. Through the influence of officials high in authority the affair was dropped, but it took time to restore the army to discipline. And when the time came the enemy had secured advantages which were insintaled throughout. Secured advantages warmed in throughout.

Deprived of His Flogging.

The Lord Mayor's barge is being brok en up for firewood at Deptford. The first Lord Mayor to deviate from the customary procession by water from Westminster Hall was Alderman Wood, in 1816, and superstitious people thought this wicked innovation was the caus of a curious disaster that befell him During his term of office Wood committee a journeyman sugar baker to jail for leaving his employment in a dispute about wages. But he forgot to specify that the prisoner should be also flogged as the statute provided. On his release the sugar baker, with grim humor brought an action against the Lord May or, and recovered "moral and intelled or, and recovered "moral and intellectual damages," for being deprived of hi flogging! Pray for Peace; Exalt War. Pray for Peace; Exalt War.

That war, though sometimes inevitable, is always an evil, few will dony. If anyone doubts it he will probably be converted by the sight of the field after battle, of a hospital full of wounded, or of a country ravaged by an invader. That the war passion expels the meaner passions is a failacy abundantly confuted by the annals of the commissariat and the stock exchange. All the churches pray for peace, though some of them, the State churches especially, do not patronize the object of their prayers. That the citizens of a free country should be trained to arms and capable of taking part in its defence in case of need is very well. But the, cultivation of the war passion in the midds of children, thus filling the veins of the nation with it and increasing the national proclivity to war, which seems now to be coming into vogue, is surely not so well.

"Whiskers" was a word formenly used to designate the hair on the upper up. Scott more than once speaks of "whiskers on the upper lip," and so does Defoe in "Robinson Crusoe." Johnson defined a "whisker" as "the hair growing on the upper lip or cheek unshaven; a mustachio." It seems to have taken its name from a fancied resemblance to a small brush, to "whisk" properly meaning to sweep, and a "whisker" having been a particular kind of feather brush—also, in the slang, of a former time, a switch or rod. Should Give Aid to the Weak.

Slowly and painfully but surely humanity is supplanting greed and bar-barism in dealing with the rising genera-tion. Poverty is no longer regarded a sufficient excuse for robbing childhood of its rights; even the poorest boys and girls must have their chance to play and grow and learn unhampered by arduous toil. In this way we shall have better men and women in the near future and less of sin and shame, disease and drunkenness. Righteousness makes it manda-tory for the strong to fight the battles of the weak.—Troy, N. Y., Press.

The London Economist says that in the quarter ended March 31 the United States was for once Great Britain's best-customer, the value of British exports thither amounting to \$42,257,736, against \$41,459,869 sent to Germany, which is usually first. The increases were \$8,764,000 and \$4,063,500 respectively. America's increased takings were chiefly in pig iron, while Germany took much larger quantities of cotton, woolen and linen yarn.

Russia, France, Italy and other European countries each bought more. Substantial increases occurred with Turkey, Egypt, China and Japan. A good export trade also took place with the principal South American Republics, the order being Argentine, Brazil, Chili and Uruguay.

The correspondent tells the following incident: An elderly American, Captain Cobb, who had been for many years a resident of the town, was invited by the British Consul early in the morning prior to the French landing, to come to the Consulate for safety. Captain Cobb declined, saying that only a few Arabs would be shot, and it would serve them right. The Bombardment.

London, Aug. 12.-A long and vivid description of the bombardment of Casa Blanca and associated incidents is print-ed by the Daily Anai, whose correspondent was apparently the only English newspaper man there. He makes it clear what is not surprising, that it was the elpless residents of the town, and not the tribesmen who committed the massa-cre of July 31, who were the main sufferers from the Franco-Spanish retribu-tive measures. With the firing of the first shot, the correspondent says, Governor Mulai Anius' authority van-Governor Mulai Anius authority varished. His soldiers bolted with their rifles, leaving the town exposed to rapine and pillage, in which the soldiers themselves joined. They and the fierce tribesmen rushed hither and thither der their burdens of plunder.

From the British Consulate, where

the correspondent stayed, were heard afar the shricking and wailing of Jews who were being beaten and murby Arabs. The increasing number of the latter showed that, attracted by the sounds of the firing, the tribesmen were galloping into the town, to fulfil the dream of an Arab's life, to loot a town. The fierce bar-barians, maddened with the lust of loot, were let lose upon the timid, helpiess and unarmed townspeople.

WOMAN SEIZES MAN SHE SEES ACCOST A CHILD.

Sister Accuses Brother Charges With Attacking Her Daughter, and Leads the Throng Which Threaten

New York, Aug. 12.-More attacks on omen and little girls were reported to the police yesterday and in several in-stances they again had to combat crowds who offered violence to the accused men without waiting to learn whether they were guilty or innocent.

In one case in Brooklyn a man wa charged with attacking his seven-year old niece, and after fighting the police he had to reiv upon them to sav him from an angry mob. In another instance a young woman who saw an at-tempted attack on a child captured the man and in spite of his blows and strug-gles, held him until the police arrived. May Kehoe, a comely young woman of slight build, proved herself a heroine of

no mean quality by arresting John Rucel at avenue A and Sixty-seventh street. She lives with her sister, Mrs. Sack. man, at No. 428 East Seventieth street man, at No. 428 East Seventieth street, and on Tuesday night heard the latter's seven-year-old daughter Louise tell of having been approached by a man when-ever she left home. Miss Kehoe told her to walk toward avenue A last night and said she would follow. The child did so, and near a vacant lot was accosted by Rucek, who took her by the hand.

Rucek, who took her by the hand.
After waiting a few moments, Miss
Kehoe sprang upon him and, catching
him by the collar, screamed for help.
Rucek struck at her, knocking her down,
but she regained her feet and again
caught him in a tight hold, clinging to
him until her cries and those of children
in the street brought Policeman Lehane.
Meantime a crowd had zathered and Meantime a crowd had gathered and Lehane had to convey the impression that there had been only a quarrel be-tween a man and his wife in order to revent violence.
Police Captain Devaney and half

dozen policemen from the Amity street station, Brooklyn, had to fight their way with drawn clubs in Hicks street, Brook lyn as they dragged along William Brown twenty-nine years old, charged with at-tacking his seven-year-old niece, Helen Carden. Cries of the mother as she followed with a baby in her arms and her two small daughters clinging to her skirt added to the excitement.

while a large squad of policemen were trying to disperse the crowd which ga-thered around the police station, Cap-tain Devaney and several men inside had hard work keeping Mrs. Caden from attacking her brother. With a hatpin she lunged at him, but all the blows were warded off by the police, except one, which inflicted a cut about two inches long in Captain Devaney's right thumb. Brown, who is employed on a tug, vis ited his sister's home on the fourth floor of No. 131 Baltic street. While the mo-ther was absent at a storp the alleged attack was committed and learning of it as she returned to her apartments
Mrs. Carden said nothing, but hurried to
the Amity street station. As the police
men entered the room Brown boughed
through a rear Window and started to descend the fire-escape, but he hesitat-ed when he saw Policemen Murphy and Bowles climbing toward him. Before his head had disappeared below the window-sill Captain Devaney seized him and held him while Sergeant Ahearn and Police-

man Bowes scrambled out on the fire Struggling on the narrow iron perch Brown fought his captors for several minutes, but he weakened when blows landed on his heavy frame and he permitted the police to drag him back into the room. Still showing resistance Brown was dragged to the street and the crowd began to gather. Suffering from shock and exhaustion. Isabel Ensier, seventeen years old, of No. 420 East Seventy-eighth street, where she lives with her father and mother, walked into the German Hospital, at Seventy-seventh street and Lexington avenue, yesterday afternoon, and said that on Tuesday morning she was at the Manhattan end of the Brooklyn Bridge. There she met two Italians, who induced her to walk with them to the lower end of Mulberry street, exactly where she could not remember. She said they forced her into a building and kept her there until two o'clock yesterday after-noon, when she managed to escape. LIFE OR DEATH.

Efforts Made for New Trial for Italian Murderer.

Ottawa, Ont., special despatch says: Mr. Frank Keefer, of Port Arthus, counsel for Capellie, the Italian sentenced to be hanged for the murder of a man near Parry Sound last Christmas day and reprieved until Aug. 15, left Ottawa to-day for Prince Edward Island, where he will interview Mr. Justice Teetzel, the trial Judge; in an effort to secure an order for a new trial. Mr. Keefer came to Ottawa yesterday to see the Minister of Justice and ask for the intervention of the Department in granting a reserve case or a further reprieve. Hon Mr. Avlesworth said that the matter was one for the trial Judge to deal with, and Mr. Keefer has now sought Justice Teetzel, who is holidaying on the Atlantic

MURDERED AND BODY BURNED; HORRIBLE FATE OF A MUSICIAN.

Men Discover the Charred Bones on a Pile of Railroad Ties.

Buffale, Aug. 9.-Chief of Police Bolton, of Lyndonville, Orleans County, last night notified police headquarters that a man had been murdered near that village. Chief Bolton said that the man apparently had been murdered by tramps, and that to hide their crime the nurderers had placed the body on a pile of railroad ties and set them ablaze. The emains are unrecognizable. Robbery is elieved to have been the motive of the

Beside the railroad track on which the charred remains were found were picked up a clasp purse, a pair of spectacles and a card bearing the name "F. A. Goodway," and the address "284 Caroling street, Buffalo, N.Y." It was thought by the Lyndonville authorities that the murdered man might be F. A. Goodway,

of this city.

The local police last night ascertained that the murdered man, apparently, is J. W. Scofield. He was an uncle of Mrs. F. A. Goodway, who resides at 284 Caro-lina street, this city, and it was her calling card which was found at Lyndon-ville. Scofield, Mrs. Goodway stated last night, was a musician and travelled ored her here two weeks ago. He then had little money, and said he was going had little money, and said he was going to make his way down the State as best to make his way down the State as best he could. James and Marvin Buckland, who made the ghastly discovery, were walking along the R., W. & Railroad tracks about \$30 o'clock yesterday morning, when their attention was attracted by the tile of bursel time and what seemed the pile of burned ties and what seemed to be bones among the debris. Upon closer examination it was found that the bones were those of a human being. The entire spinal column, breast bone and jaw bone were plainly visible, but the other bones were burned to ashes.

After making the horrifying discovery the men ran to Lyndonville, and notified Chief Bolton. Accompanied by Health Inspector Fraser and several members of seens. Upon close inspection blood stains were found within several rods of the ties, indicating that a struggle had taken

In overhauling the ruins a part of a vest of brown cloth and of good material was found, also a small piece of the trousers. They were under one of the ties and were not burned. THEY DROWN TOGETHER. Three Bathers Suddenly Sink at Newton,

New Jersey.

Newton, N. J., Aug. 12.-James Johnson, aged 27, of Jersey City; Harriet Blinkard, aged 16, of Brooklyn, and Helen Bloomer, aged 18, also of Brook-lyn, guests at the Hunt Home, were drowned while bathing in the lake here. With a girl on either arm, Johnson was clinging to a raft moored near in shore, and in what was supposed to be water reaching only to their waists. Suddenly one of the girls screamed, and the three bathers sank together. Other summer residents on shore were unable to afford aid. The bodies were recovred.

A BURIED TREASURE.

Said to be Located in Gulf of St. Lawrence.

Montreal, Aug. 12.-A man naed Dillon, of Salem, Mass ,.who has just returned to this city from a trip down the north shore of the St. Lawrence, tells of a buried treasure which takes one back to the days of Monte Cristo. According to the man's story, a certain officer of the British navy, in command of a frigate, which accompan Wolfe on his successful campaign against Quebec, married, and later on settled down in Maine, to later return to a seafaring life. Only this time, in place of fighting under the British ensign, he raised the black flag Just previous to the pirate's last voyage the man addressed a missive to his family, indicating a certain island in the Gulf of St. Lawrence where was hid no less than £3,000,000 in treasure. This document, according to Dillon, was destroyed but the man claims to have discover a duplicate, which he stumbled on by accident. This, he states, gives the exact location of the treasure.

He is returning to Salem, where he will outfit, and with the proper vessels and tools, will proceed to excavate the old pirate's millions.

WATER TANK COLLAPSES. Hermann Wolff & Co's. Building Damaged at Montreal.

Montreal, Aug. 12.-A big thirty-thousand gallon tank of the roof of the establishment of Hermann H. Wolff & Co., McGill street, collapsed this morning with a roar that could be heard for hair was a spirit of tolerance and promethood. He approved of the teaching of German in the schools and college at Berlin, and commended the "good, thrifty, honest German people" for perpetuating the noble traditions of their forefathers.

A hanguet of the alumni and visitors, into the alley at the back of the building, and now all that is left to show where it stood is a gaping hole in th side of the top storey, where the wall and roof were torn away as though the were matchwood.

It was fortunate that the debris fell outward, as had it gone straight down through the building the structure must have been wrecked, and it is probable that loss of life would have accompanied the catastrophe.

A PECULIAR FIND.

Refrigerator Stocked With Provisions in Lake Near Kingston.

Kingston, Aug. 8.—James G. Minnes made a curious find in the lake fronting his summer residence at the front road He saw an object floating down from Salmon Island, and thinking it was an upturned skiff, went out in his boat to investigate. On coming up with the object he was greatly surprised to find that it was an American refrigerator of latest design. The finder towed his prize to the shore, and pulled it out on the beach. His surprise was still greater to find the case well filled with provisions, canned meats, bacon and bottles of milk, all in first-class order. Where the refrigerator came from is a mystery.

BOY HANGS ON TREE.

Eleven-Year-Old Earl Spalding Killed Performing Tricks.

A Brockville despatch: In some unac-countable manner, Earl, the 11-year-old son of Charles Spaulding, residing near Rice, in the Field Settlement, accidentally hanged himself.

It is thought he was endeavoring to perform tricks on a swing which he had in an apple tree near the house, where he was found hanging by his mo-ther. Just how long he had been in that position is not known. All efforts to resuscitate him were unsuccessful.

Rheumatism

is one of the constitutional diseases. It manifests itself in local aches and pains, inflamed joints and stiff muscles,—but it cannot be cured by local applications. It requires constitutional treatment acting through the blood, and the best is a course of the great medicine Hood's Sarsaparilla which has permanently cured thousands of cases.
