GROWTH OF CITY SHOWN IN FIGURES

Toronto's Population is 443,751 and Total Assessment Amounts to \$390,599,148, With More Than 9000 New Buildings Erected Last Year, Valued at \$24,000,000.

Population of Toronto	443,751
Bank clearings	\$1,552,297,405
Postoffice earnings	\$1,943,045.28
P. O. earnings, Montreal	1,152,127.27
Toronto real estate transfers	16,997
Building permits	7,296
Value of buildings erected	\$24,000,000
New buildings erected	9,989
Total assessment of city	\$390,599,148

These figures have been compiled by Night Directories, Limited, whose thirty-seventh annual edition of the Toronto City Directory is just off the press. In every one of the lines above indicated the city shows a gain over the preceding year. In not one single instance has the city fallen behind, but on the contrary the accurate and comprehensive statistics compiled for the past six years show that the record during this period has been one of steady and consistent gain.

Especially satisfactory is a comparison of the postoffice earnings of Montreal and Toronto, which shows that the latter continues ahead of the eastern metropolis. Montreal's postoffice earnings for 1911 were \$1,152,127.27, while those of Toronto were \$1,943,045.28, which shows that the Queen City has a lead on the former of \$810,890.61.

In regard to the population figures above, which are in excess of the federal census, the company says "it should be remembered that our method of enumeration is more thorough than theirs and should, therefore, be more accurate."

Following is a table showing the gains Toronto has made in 1911 over 1910:

Bank clearings, 1910	\$1,556,954,254.00
Bank clearings, 1911	1,552,297,405.00
P. O. earnings, 1910	1,152,127.27
P. O. earnings, 1911	1,943,045.28
Real estate transfers, 1910	14,646
Real estate transfers, 1911	16,997
Toronto's assessment, 1910	\$340,206,510.00
1911	\$390,599,148.00

The new buildings erected during 1910 were 899, against 899 in 1911, while the number of permits granted for these two years were 6704 and 7299 respectively. Their value was \$21,157,785 for 1910, and \$24,374,539 for 1911.

The following figures show the vital statistics:

Year	Births	Marriages	Deaths
1910	9,011	4,298	5,495
1911	10,060	5,312	6,228

LONDON, Feb. 2.—(C. A. P.)—The polling yesterday in East Edinburgh by-election, caused by the death of Sir James Gibson, resulted as follows: J. M. Hoage (Liberal), 5064; Gordon Jamieson (Unionist), 4129.

LARGEST CONCERT ORGAN ON AMERICAN CONTINENT

Splendid Instrument to Be Installed in University Convocation Hall in a Few Weeks Has 73 Stops and Has Been Modeled Upon the Best Examples of English Instruments.

The largest concert organ on the American continent is being shipped from Quebec to Toronto, to be installed in Convocation Hall at the university. Within a few weeks the splendid instrument will be fitted up complete in its new home. Last year rain should leak thru the roof of the building and cause damage to the organ, a special metallic roof has been built at a slant over the niche behind the platform where the instrument is to be located.

While there are two bigger organs in Toronto at present—one in the Metropolitan Church, and the other in new St. Paul's, it must be remembered that these are church organs as distinguished from the convocation hall instrument, which is a concert organ. A similar one, but on a much smaller scale is to be seen at present in the Conservatory of Music.

It is interesting to compare this organ as to size with some cathedral organs in Great Britain, where the standard of organ building is very high and organs are of less than 70 speaking stops. Peterboro has 68, Chester (built in 1910) 65, Lichfield 65, Nor-

CANADA TO LOSE TEN MILLIONS THRU 'JOKER'

Late Government's Agreement With Grand Trunk Pacific to Be Responsible for Difference Between Par Value of Bonds and Selling Price Has Already Cost \$4,900,000.

OTTAWA, Feb. 2.—(Special.)—Hon. W. T. White this afternoon gave parliament a glimpse into the startling amount for which the "joker" inserted by Sir Wilfrid Laurier into the original contract with the Grand Trunk Pacific for the construction of the National Transcontinental, makes the government responsible under the recent decision of the privy council, in which the contention of the company that the government was liable under its guarantee to make good the difference between the par value of its bond issues and the sums brought by them in the London market was upheld. This he estimated will amount to \$10,000,000.

In 1905, he said the G. T. P. had \$3,200,000 of 5 per cent. bonds at 92½, realizing \$4,598,754. In 1909, \$2,000,000 bought at 80, \$7,778,465, and in 1910, a further issue of \$2,000,000 at 80 brought \$7,856,418. Taking the difference between the par value and the amounts realized, gave approximately \$4,900,000 for which the government was responsible, under the privy council judgment, and to provide for which he introduced a supply bill.

But this was not all. The company had \$5,500,000 of 3 per cent. bonds, which they were still able to issue under their charter. Supposing these to be sold at the same rate as those already issued, they would leave a liability to be assumed by the government of \$5,183,617.

Syndicate Booked Orders For Fires

Patrons Just Handed Over \$250 and Results Were Strictly Guaranteed.

NEW YORK, Feb. 2.—(Can. Press.)—A syndicate which will guarantee the destruction of property by fire at the rate of \$250 a fire, for the benefit of those desirous of collecting insurance, was declared to exist in New York City to-day by Judge Swann of the court of general sessions. In remanding for sentence Antonio Bertalino, a grocer convicted of setting fire to his own store, Judge Swann said that it was his opinion that the majority of the 17,000 fires in New York last year were of incendiary origin.

"We know, altho we cannot put it in evidence," he continued, "that any man who wants a fire in the City of New York, for a small consideration, can have his house fired or his place fired in the most approved style known to these particular members of the syndicate."

Fire bladders filled with kerosene and ether were found in Bertalino's place, where it was alleged that goods valued at \$500 were insured for \$500.

The Sunday World.

Hockey enthusiasts and theatre patrons should be on the lookout for the Special 10.30 Hockey Edition of The Sunday World, which will be on sale on the principal theatres and outside of all the theatres to-night. In this edition will be found the results as well as general descriptions of all O. H. A. and other important hockey matches.

This week's Illustrated Section of The Sunday World is just as interesting as ever. The front page is given up to some original pictures of winter sports and pastimes, a group photo of the Scotch curlers and an excellent picture of a government House horsewoman.

Hamilton readers will be interested in the snapshots of the public men of Hamilton, which also appear this week, and make the second instalment of a new series which will appear from time to time.

The picture of the recent Railway Conductors' Ball at the Temple Building is a wonderful example of photographic art, every person in the large auditorium being really identified.

BETTER STREET CAR SERVICE ASSURED FOR NEAR FUTURE

Number of Passengers Will be Limited to Seating Capacity With Half as Many Allowed to Stand.

Manufacturers Complain of Employees Being Late for Work Owing to Poor Service in All Parts of the City.

TIED IN A KNOT

Hundreds of people who live in the Rosedale district were kept late for the theatres and downtown engagements last night by reason of the excruciating street car service between 7:30 and 8 o'clock. On Rosedale-avenue people were waiting at every corner for a Queen car, and it was at least 15 minutes before the first ran down from Dundas-street, while seven or eight went north. Sooner than wait for the cars, hundreds walked from Howard Park-avenue to King-street, and then had to wait. When the first Queen car arrived at the corner of Queen and Rosedale, it was so full of passengers that it was almost impossible to get aboard, let alone find a seat. All the way down Queen-street, crowds were waiting, and many complaints were made that the people had been standing on the corners from ten to twenty-five minutes.

The suggestion of limiting the number of passengers Mr. Osler seemed to want a minute or two to think over the matter, and said that it would just lengthen the busy time.

"You have taken me up wrong, Mr. Osler," said Commissioner Ingram. "All I mean is to limit the number during the rush hours."

TORONTO GETS POWER TO LAY NEW CAR LINES

Order in Council Is Issued Bringing Into Force the Act Passed Last Session Giving the City Permission to Build Lines on Streets Where Railway Refuses to Place Rails.

Commencing to-day, Toronto has the authority to build tracks and operate municipally-owned street cars on any street in the city where the Toronto Railway Company refuses to put down tracks. The sanction of the Ontario Railway Board is now all that the city requires to commence the construction of a municipal railway.

This, of course, refers to the old city limits, within which the Toronto Railway Company's charter is applicable.

On March 15, 1910, an amendment to the Ontario Railway Act of 1908 was passed by the legislature, giving a municipal corporation the authority to construct or operate its own railway on any street in the city, by reason of the failure of the railway company possessing the franchise to construct and operate a railway on the streets in question.

The amendment, which is officially known as "The Ontario Railway Amendment Act, 1910," comes into force on a day proclaimed by the lieutenant-governor.

This proclamation is announced in The Ontario Gazette to take effect to-day.

BOUNTIES ON PIG IRON NOW TARIFF PROTECTION LATER

OTTAWA, Feb. 2.—(Special.)—The government has decided in favor of granting substantial bounties for the encouragement of iron making in Canada, it can be stated tonight authoritatively. The great smelting industries at Sydney and the Soo were established largely by means of bonus aids. The last of these expired in June. These were the bounties on steel rods. There had previously

been bounties on billets and other forms of iron and steel, which had expired, and which finances minister Fielding failed to renew.

From \$1 to \$1.50 a Ton. The government has decided that the state of the industries and the prosperity of the country warrant a resumption of the bounty aid. Therefore, it has been practically decided to give a bounty of a dollar a ton on pig produced from foreign ore, and a dollar and a half a ton on pig produced from domestic ore.

Tariff Protection Later. These bounties will likely run until the tariff commissioner is appointed and has looked into the question of aid for steel works. It is likely that then the bounties will be dropped and the steel industries aided by means of tariff protection for which they have always expressed a preference.

WANT \$200,000 TO CELEBRATE PEACE.

OTTAWA, Feb. 2.—(Special.)—A request to the government by the 1812-1814 Association, with headquarters in Toronto, for a federal grant towards the fund now being raised to erect a centennial memorial to the Canadian victories of the war of 1812-1814, will be made on Monday. The request will be supported by a strong deputation from Toronto.

Big Toronto Concern

A new firm to be known as Differential Axles, Limited, capitalized at \$2,000,000, is announced in this week's Ontario Gazette. The head office of the firm is to be in Toronto, and it is likely that a large factory will be built here. The firm will manufacture general traffic and conveyance equipments of all kinds for steam and electric railways.

ANOTHER CIVIL SERVICE COMMISSIONER.

OTTAWA, Feb. 2.—(Special.)—An interesting announcement will be made shortly with regard to the civil service commission, for it is the intention of the government to appoint a third commissioner. At present there are two, Professor Adam Shortt and Dr. La Roche, but it is found that there is too much work, and it is unevenly divided. It is thought the difficulty will be best solved by the appointment of a new commissioner.

NE TEMERE TO BE OPPOSED ALL THRU CANADA

Campaign of Evangelical Alliance Will Be Opened by a Mass Meeting in Toronto About the First of March and a Deputation Will Interview Sir James Whitney.

Meetings to protest against the ne temere decree are to be held by the Evangelical Alliance through the country and a mass meeting will be held in Massey Hall about the first of March, preceded by a conference in the afternoon of the same day, at which delegates from all parts of the country will be present and speak on the subject.

This campaign was decided upon at a special meeting of the alliance held yesterday afternoon to consider the matter from all sides.

A deputation will wait on Sir James Whitney within a few days to seek his advice in the matter and ask for his co-operation.

The following letter from the secretary, Rev. E. D. Silcox, gives an outline of the campaign:

The Evangelical Alliance, of which I have the honor of being secretary, has for some months been quoted (and sometimes misquoted) in regard to the ne temere decree. I, therefore, wish to make a few statements of general interest in order that our position may be clearly understood.

Being a purely interdenominational organization, it was felt we were better fitted to take action regarding the marriage question than any of the churches. In England, the Evangelical Alliance is one of the strongest possible forces and deals with all such subjects in a way which has commended it to the Christian churches. Meetings have been held in Albert Hall and Queen's Hall, London, thousands attended, and the question discussed by some of the ablest speakers for the no temere cause.

H. A. Macdonnell Is New Director of Colonization

H. A. Macdonnell of Collingwood is the new director of colonization for the Ontario Government.

He succeeds Donald Sutherland, who resigned to contest the constituency of South Oxford in the recent federal election, and was successful.

Mr. Macdonnell has for the past year been assistant to Mr. Colocock, the Ontario Government's agent in London, England.

For many years the new director resided in Collingwood, and was both a merchant and a farmer. His knowledge of the needs of the province as regards colonization has been accumulated by his sojourn in England, where he was intimately acquainted with the booking agents and immigration requirements.

Being conversant with the whole situation, Mr. Macdonnell is expected to carry on a vigorous colonization policy for the province.

Connected with the appointment is a salary of \$2500 a year.

HAMILTON HAPPENING DO HAMILTON WOMEN WANT RIGHT TO VOTE? Civic Legislation Committee in Hazy Uncertainty—May Be Civic Employment Bureau.

HAMILTON, Feb. 2.—(Special).—If the women's suffrage movement is to receive any encouragement from the city council of Hamilton, the women of this fair city will have to make a noise like they want to vote. At least this was practically the decision of the legislative committee of the city council which tonight discussed at some length a letter from the Toronto Woman's Suffrage Association, asking the Hamilton city fathers to join their Toronto brethren in petitioning the Ontario Legislature to remove the disability which now prevents a married woman who owns property from voting.

By a vote of four to three, the committee declined to take any action, principally on the ground that the women of Hamilton have made no demand for suffrage, and apparently are not interested in the matter. Mayor Lees championed women's rights in this discussion, and declared that even the women here had not demanded the right of suffrage, and that more than right that they should have it, as the denial of such a right was an application of the principle of taxation without representation. He was supported by Controller E. J. D. Davy and Ald. Lalonde.

Mr. Hopkins said he believed that if a petition was taken among the women of the Dominion on the question, not five per cent of them would be found to be in favor of women's suffrage.

Municipal Employment Bureau. A municipal employment bureau was suggested by Chairman Davy, who called the committee's attention to the great number of complaints which have recently been made against local employment agencies, which have failed to secure work for their clients, after taking their money. A sub-committee was appointed to look into the matter. The committee decided to support the City of Hamilton in its move to get legislation from the government for the establishment of public bureaus. A sub-committee was appointed to look into the matter at Toronto with the Council deputation.

Will Accept Painting. The members of the committee were unanimously in favor of the city accepting one of the offers of Mr. Bruce to donate a number of paintings by the late W. Blair Bruce, his wife, and the children. A stipulation was recommended to assure Mr. Bruce that no time will be lost in accepting the terms of his proposed gift. Mayor Lees and Chairman Davy will go to Ottawa next Thursday to appear with a deputation in favor of a scheme for federal aid for good roads.

ALLEGED HIGHWAYMEN TAKEN Young and Schmidt Said to Have Robbed Galt Man.

BERLIN, Feb. 2.—(Special).—Detective Huber and O'Neill made an arrest to-day when they met a custody Ben Young and Barney Schmidt, wanted on a charge of highway robbery. Young and Schmidt attended the races at Bridgeport on Monday afternoon and, while there, formed an acquaintance with a man, named Walter Baker of Galt and the two indulged in John Barker's until night when they induced Baker to drive to Berlin with them. During the drive it is alleged they robbed Baker of \$100 watch and \$18 and then dumped him in the snow bank and drove on. Alex. Cochrane, a nineteen-year-old Waterloo young man, was this morning sentenced to six months in the Central Prison on a charge of theft of money and other valuables from the West Side Park Hotel, Waterloo.

BRANTFORD POWER TROUBLES Complaint That Cataract Company Isn't Cutting Rates as Promised.

BRANTFORD, Feb. 2.—(Special).—It has been freely asserted here that hydro-electric municipalities west of Brantford are securing power and light cheaper than this city, despite the contract here with the Cataract Company guaranteeing rates ten per cent less than and charged in hydro-electric places, provided such are not below cost. As a result of the discussion the city council has decided to appoint an expert engineer who will, with A. K. Bunnell, conduct an inquiry as to the prices. Brantford intends at this time to insist on an enforcement of the ten per cent, less rate in the contract if that is possible.

E TEMERE TO BE OPPOSED THROUGHOUT LAND

Continued From Page 1.

At these meetings the strongest resolutions were passed, denouncing in no uncertain terms the action of the Church of Rome in promulgating the said decree, thus seeking to add a piece of ecclesiastical legislation upon the British nation.

Our alliance contends that there should be one uniform marriage law for the whole Dominion, and not as it appears to-day, one law for Quebec and another for Ontario. It matters not by whom a couple is married, whether a Roman Catholic priest or a Protestant minister, so long as these are the authorized persons to perform such ceremony. Neither does it matter, or ought not to matter, whether one or both of the contracting parties are Protestant or Catholic.

If a priest of the Roman Church is asked to marry two Protestants, or a Protestant minister is asked to marry two Catholics—these men should be in a position to marry such parties legally and the marriage should be regarded as perfectly valid.

The greatest possible interest is being taken throughout Canada in regard to this question. I am daily in receipt of correspondence which evinces this interest. Many of the writers express the strongest desire that something definite will be done which will settle once for all this vexed question.

At our committee meeting, it was decided to arrange as far as possible for public meetings to be held in all the centres of population and that in these gatherings delegates be appointed to attend a conference to be held in Toronto about the first week in March. This conference to be held in the afternoon preceding the evening when a mass meeting is to be held in Massey Hall, of which more definite notice will be given.

It was also decided to wait upon the provincial government as soon as convenient to Sir James Whitney, presenting the petitions thus far sent in and to impress upon him the importance of the question, seeking his advice in the matter which we feel confident he will cheerfully give.

We cherish the hope that all those through the province having signed blank petitions will get them signed and returned as soon as possible, and, if any party or congregation has not received these, will they write to me at once? I shall be only too glad to forward as many as may be required. Thanking you, Mr. Editor, for this space.

E. D. Silcox, Sec.-Treas. Evangelical Alliance, 4 Sussex-ave., Toronto.

The Straight Viaduct Nothing Else Will Do

Editor World: We are pleased to see that City Engineer Rust still holds his original opinion that nothing will answer the purpose but a straight viaduct connecting the north and Broadview-aves. with standing all the factoids who are favoring any kind of a viaduct except the one which must ultimately be built. Anyone with foresight must acknowledge that Toronto's great east to west thoroughfare will be Bloor-st., from East to West Toronto.

It must be conceded that both King and Queen-sts. have long ago experienced their best day as the retail shopping district. The great influx and the forward element in this district is gradually causing the disappearance of the better class of stores. Take, for instance, the Queen-st. district, which westerly to the Queen-st. subway, all improvement of store property is practically at a standstill, and at least 40 per cent of the stores are in the hands of foreigners, and it is a well known fact that they lack progressiveness as far as improvement of store property is concerned.

Where then must the great retail district of the future locate itself? We predict that in the near future the vicinity of Bloor and York-sts. will be the hub-centre of Toronto, and Bloor-st., from East to West Toronto, with its dense population, both north and south, will eventually become the leading cross-town shopping district, and therefore no other than the straight viaduct advocated by City Engineer Rust will answer the purpose intended.

City Engineer Rust is recognized throughout the continent as being one of the most capable men in his profession, and when he gives his opinion, the citizens of Toronto ought to back him up regardless of the opinion of certain groups who are more interested in their selfish motives than in the good of Greater Toronto.

Woman Suffrage Takes Back Seat

Good Things, Says Roosevelt, But Other Movements Count More.

NEW YORK, Feb. 2.—The exercise of the suffrage can never be the most important of the woman's rights or women's duties," says Col. Theodore Roosevelt, in an editorial in a current issue of The Outlook.

"The vital need of women," he continues, "is to get against vice and evil, and to get against the forces of corruption and immorality, and to get against the forces of the past—the wife and mother who performs the most important of all social duties. I believe in the movement for women's rights, but I believe that it will ultimately succeed and will, in itself, be a great benefit to the world. But I regard it as far less important than the movement for the betterment of present day conditions as affecting both men and women."

THE HOUSING PROBLEM Dr. Helen MacMurphy Will Give an Address Tomorrow Afternoon.

A two-day campaign starts tomorrow afternoon in the Metropolitan Church on the housing problem in Toronto. Dr. Helen MacMurphy will be the speaker at 8 o'clock to-morrow, and she will be followed by Dr. J. W. McCarty, who will speak briefly on the subject and will explain the object of the two Sunday afternoon meetings. The advantages of Toronto as a residential city will be emphasized; the housing and the evil effects of overcrowding and insanitary dwelling will be thoroughly discussed by Dr. MacMurphy, who also will suggest some remedies to cope with the situation.

B.P. COMING TO OTTAWA.

OTTAWA, Feb. 2.—Gen. Baden-Powell, leader of the boy scouts, who is at present touring the U.S., will visit Ottawa in the fall. After his present tour of one month in the United States, he will return to England before coming to Canada.

Entertained by Carnegie. NEW YORK, Feb. 2.—Sir Robert Baden-Powell returned here from Boston late to-day and was the guest of Andrew Carnegie for tea. General Baden-Powell hurried thence to Montreal, N.J., where he lectured to-night on the boy scout movement. He will return to New York next Friday for his trip to the west, and will be the guest of honor that evening at the annual dinner of the Boy Scouts of America, which Clifford Pinchot will be the toastmaster.

Invitations are out for the first annual at home of the Lambton Old Boys' Association of Toronto, on the evening of Friday, 9th, in the Foresters' Hall.

The honorary presidents of the association are Hon. Mr. Hanna, J. L. Schuchart, W. D. McPherson, M.L.A., and Mayor Geary. Mr. Rutten and Alexander Laird, all of whom are expected to be present and give brief addresses.

At the conclusion of the concert program at 10 o'clock, dancing will commence.

THE DAILY HINT FROM PARIS

Strenuous efforts have been made to link the speaker's apartments in the parliament buildings, and there will be a reception after the opening of parliament on the 7th inst.

IT PAYS TO ASK YOUR DRUGGIST ABOUT NYAL'S.

If you ask your druggist about Nyal's Family Remedies he will tell you at once that there are no other packaged medicines equal to them. He does this because he knows the formula of each and every Nyal preparation, and knows it is honest standard value for the purpose intended—knows that Nyal's Family Remedies are without an atom of mystery or "cure-all" claim, but are preparations that you can rely upon to do what they are claimed to do. Try one of the Nyal's Remedies when next you need medicine. Ask your druggist what is in it, and why it will benefit you, and you will learn why he recommends Nyal's so enthusiastically.

There is an increasing variety in garments made exclusively for indoor wear. Hand embroidery and ribbon flowers are among the favorite ornaments. Here is a simple empire gown of lavender silk which has a fine linen collar in Quaker style. The edge of the collar are bound with the material and embroidered with linen thread. The closing is made with champagne pins, and a pink ribbon rose with long ends ornaments the lower collar.

Two of the Biggest Values in Fur Coats Offered This Season

Men's Fur-Lined Coats, \$29.00--Some of Them Half Price and Less.

We have decided that Monday shall clear this lot and clear it early if vigorous reductions will do it. They are fine quality beaver-cloth shells, lined with NATURAL CANADIAN MUSKRAT skins that are beautifully soft, fully furred, and evenly matched. The collars are in genuine otter or Persian lamb; and in notch and shawl styles. These coats are made in the loose easy double-breasted style with vent in back and barrel buttons and loops. Sizes 40, 42 and 44 only. Early buyers have first choice, so come at 8 a.m. Monday. Extra special price \$29.00. Cannot promise to fill phone or mail orders--Come early as you can.

Another Extra Special, Men's Raccoon Coats at \$35.00. This affords one of the greatest opportunities to get a good racoon coat at a great saving. Raccoon fur is soaring out of sight, but our motto, "Sell all furs in season purchased" is imperative, so here they go Monday. The coats are made from heavily fur-lined, dark, natural racoon skins, strongly sewn together and speedily matched. They have large roll storm collar and are lined with heavy quilted and satin lining, finished with barrel buttons and loops. Nearly half price for Monday \$35.00.

Fifth Day of Our Special Selling of Men's Hats, \$1.00. To hurriedly make room for our new spring stock of hats, we must clear our old lines of men's stiff and soft hats at once, so we have added to one lot a number of new hats for Monday. Some soft hats in the scratch and smooth finish, in different shades and a few more stiff hats in the medium shapes. Extra quality at your choice Monday \$1.00. Main Floor--Queen St.

HORSE BREEDING NOT ADVANCING

Requirements of the Market Are Not Supplied and Heavier Horses Are Now Needed.

The breeding of horses in Ontario is not going ahead, the requirements of the market are not supplied; what we want is heavier horses, said Herbert Smith of Toronto, adding, "we need a great deal more quality in all larger numbers at all the leading exhibitions, and this brings the breed into more prominence. As the association is now extra strong financially, it was decided to grant larger sums to the prize lists of the different exhibitions. Cases were cited where good shire geldings have sold as high as \$1200. The society has received in membership fees \$18, in registration fees \$30. Total receipts for year \$110; cash on hand, \$46. The importations for 1921 numbered 84 mares and 30 stallions. Ontario received 25 males. Alberta received 17 stallions. Officers appointed: President, Mr. D. Messenger, Guelph; vice-president, Mr. Andrew Miller, Middlemarch, Ont.

Directors: W. Aicon, Priceville; Mr. Brechin, Appleby; John Gardhouse, Highfield; A. Ager, Nashville; G. E. Porter, Appleby; J. M. Gardhouse, Weston, Ont.; James Henderson, Belton, Ont.

Vice-presidents--For Ontario, Mr. William Laking, Haliburton; Maritime Provinces, Hon. F. L. Hazard; Manitoba, F. J. Stark; Alberta, T. Rawlinson; Windbourne; British Columbia, Mr. Davy.

J. M. Gardhouse was appointed delegate to the Canadian National Exhibition; A. A. Miller and Mr. Henderson for London Exhibition; Mr. Laking and Mr. Hodgins for Ottawa Exhibition. The Clydesdale Horse Association of Canada held their annual meeting yesterday at the King Edward Hotel, it being one of the largest attended meetings in the history of the association. President John Bright in his opening remarks spoke in glowing terms of the association. It is the largest and strongest association in the Dominion, said Mr. Bright, and one of the strongest in the world. After making several suggestions as to the work of the association he closed his address by paying a high tribute to Mr. Geo. Gormerley of Unionville, who exhibited a class of Clydesdale fillies at Toronto Exhibition, of which many in the world might be proud. Mr. Bright was made a life member of the association.

A resolution was passed setting the fee at \$1 extra for members wishing to obtain a tabulated pedigree of any horse. A resolution was introduced by R. E. Gibb and seconded by Wm. Smith, urging the association to try and obtain legislation for the licensing of stallions.

Members were present from all over the Dominion, and the election of officers took up a great deal of time. Representatives to exhibitions as follows: Toronto, Robt. Graham, Bedford Park; London, Mr. Charlton and

Col. McEwen; Winnipeg, Mr. Washington; Brandon, Mr. Graham and Mr. Scarr; Calgary, Mr. Hawthorne; British Columbia, A. B. Patterson and Mr. Davie. The financial statement shows the association to have a balance on hand of \$28,800. Grants to the exhibition during 1921 were \$500.

VANCOUVER'S BOLD BANBIT Hold Up People in Cafe and Get Away With Cash. VANCOUVER, B. C., Feb. 2--(Can. Press.)--The most spectacular and boldest hold-up in the city's recent history occurred shortly after 9 o'clock last night when a lone bandit, armed, but unmasked, entered McIntyre's cafe, in Seymour-street, one of the biggest in the city, and flourished his revolver at the heads of 30 guests who were seated at the tables. The bandit apparently awaited his opportunity, which came, when the cashier was called to the telephone. He dashed thru the front door, made his haul in a few moments and disappeared.

Handsome Canadian-made Piano. There is an exhibition in the windows of "The Old Firm" of Heintzman & Co., Ltd., 122-124-126 Yonge-street, these beautifully constructed pianos, that have been made specially for the new two million dollar hotel, built by the Grand Trunk Pacific in Ottawa, and that will be known as the "Chateau Laurier." These pianos are in Italian walnut, satin art finish, which is a marked contrast to the brightly polished piano. One is a magnificent grand piano and the other an upright, both in the style of the Louis XVII, intended to conform with the decorations and furnishings of the rooms where they will be placed. Like a picture of a great artist, the more one studies these two instruments the more their beauty is appreciated. The finest workmanship has entered into the making of both instruments. One is especially attracted by the way in which the pattern of the walnut stands out, almost like a picture. As a work of art these two pianos will be sure to attract large attention by all who have an opportunity of seeing them, but after all the real beauty of these instruments, as is the case with all pianos bearing the name of this long established Canadian firm, is in the tone and touch and singing quality of the piano--a piano that has won the praises of the world's greatest artists. These instruments will remain on exhibition in the windows of Heintzman & Co. all of next week.

Varsity Seniors Win From Queens, Varsity Juniors Beat Simcoes

Note and Comment

The O.H.A. have been very fortunate in their games during the month of January, not one having to be postponed for lack of ice.

There seems nothing locally worth mentioning in the intermediate series and Frison on their side shows in an exhibition game here, look able to again win one.

The juniors will commence to thin out this week. Varsity and Toronto Game Club are showing to good advantage and will take a lot of beating.

The financial statement of the Crescent Athletic Club of Brooklyn makes interesting reading. The assets are well over the three-quarter million mark, with a yearly turn over of one-third that amount.

The report of Treasurer H. C. Martin shows that the club's property is worth \$750,000, divided, city house and land, \$300,000; Bay Ridge property, \$250,000; and boat house, \$150,000.

Varsity Juniors Group Winners

Hand Simcoes a Good Beating and Are Now Ready for Second Round—Sinclair Was the Star.

Varsity Juniors had little trouble again in defeating Simcoes and thereby winning their group by a score of 5 to 4.

Simcoes had only six men and Varsity dropped a man, the teams playing as men a side.

The play was even for the first few minutes and then Varsity drew away.

Similar to the long odds the best man on the ice and was responsible for a great many of the Varsity scores.

Varsity (5): Goal, Armstrong; point, Clarkson; cover, Boulter; centre, Sinclair; right, Sinclair; left, Gowlock.

Simcoes (6): Goal, Brown; point, Bennett; cover, Lavery; centre, Ellis; right, Tuck; left, Warwick.

DESTRUCTIVE LEGISLATION. Millions of Dollars' Worth of Property Destroyed in New York State.

NEW YORK, Jan. 27.—Because of an anti-racing law has made racing only a memory in New York State, millions of dollars' worth of choice real estate is today worse than useless—worse than useless because it carries with it a heavy tax.

It is further worse because it is standing idle because the fact that it is standing idle means a quarter-million-dollar loss in the annual revenue of the state.

An official high in the Jockey Club gave \$12,000,000 as his estimate of race-track property in the Empire State.

The approximate values of the tracks he estimates as follows: Belmont Park, \$2,000,000; Gravesend, \$2,700,000; The cases of the property are as follows: \$2,000,000; Jamaica, \$800,000; Saratoga, \$1,000,000; Kean's, \$150,000; Empire City, \$1,500,000. Total, \$11,500,000.

The cases of the property are as follows: \$2,000,000; Jamaica, \$800,000; Saratoga, \$1,000,000; Kean's, \$150,000; Empire City, \$1,500,000. Total, \$11,500,000.

When racing flourished the state also got another \$250,000, representing 5 per cent of the earnings of the tracks.

Big as is this common loss to the racing interests and the public treasury, the loss of the property is really the loss of the horse, the trainer, the jockey and the owner that once made this country one of the greatest racing nations on earth.

They feel this loss not merely because the racing has thus their departure practically disappeared, while more because they see in it the rapid decline of the American thoroughbred.

Recently Gen. Wood declared that the matter of reconstructing the racing industry is becoming serious because of the disappearance of racing, and August Belmont, chairman of the Jockey Club, has confirmed this statement.

Old Time Horses Hard to Beat

Uhlen is the Only Trotter That Would Have a Look In, So Says Budd Doble, and He Should Know.

Budd Doble, who for two generations was accounted the world's foremost trainer, in a recent interview was asked this question:

Would Dexter, Lady Thorn or Goldsmith Maid have a chance with the greatest trotters of to-day if you could bring them back in their best form and give them the same advantages as to training, tracks and the like?

The veteran in his reply paid the following high tribute to the stars of olden times: "I think they would, but I would rather put it another way. If the trotters of to-day had to go back to the conditions existing when Dexter, Lady Thorn and Goldsmith Maid were on the turf, I don't believe any of them could beat the records of the oldtime horses very much."

"Uhlen might," they tell me he is simply a wonder. But give Lou Dillon the task that Dexter tried to perform and I for one would expect to see her fall."

"Was Dexter a greater trotter than Lady Thorn or Goldsmith Maid?" "There was a much better mare than the public thought she was. She was just coming on when the trot Dexter was beaten by him. Her winning races with the Maid were trotted when she was at her best and the other mare was still improving, so that it is hard to say which was best, but I think Dexter might have been just on an edge beat both Dexter and the Maid."

"She was not so reliable as the Maid, however, and in a series of races I should expect the Maid to win. She was the greatest campaigner of her day. Just think of it! When she was nineteen years old she equaled her record, the greatest; all-round trotter we have ever seen."

"Dexter had one great quality that no other trotter ever had. He could go any race at one, two or three-mile heats, and he could go any way, right, under saddle, to sulky or to wagon, and beat the best horses of his day. He was the greatest; all-round trotter we have ever seen."

QUAKER OATS MAKE DEBUT IN BUSINESS LEAGUE

Drop Two Games to Owl Shoes—Scores From All the Bowling Leagues.

At the Toronto Bowling Club last night, Bobby Bain's Quaker Oats team made their initial bow in the Business Men's League, and incidentally lost two out of three games to Owl Shoes. Bobby, who wore his team of shanter, also brought along a real live rabbit for good luck, but before the second game was over Bobby had to be banished, as well as the rabbit, and Mara going in from the bench, the little Scot saw his team win the last game by three pins. Yates for Owl Shoes, put in his best night of the season and finished with the big total of 62. Alfie Boyd was next in the order of the bulk of the pins for Quaker Oats, while Dedman, for Owl Shoes, was the last big purr-fetter, with 58. The scores:

ONTARIO BASKETBALL LEAGUE

St. James, Behind Six at Half Time, Win by 42 to 36.

St. James' gymnasium last night was the scene of one of the best and fiercest games of basketball for many a day when the fast St. James team defeated the West End Y. B. team, 42 to 36, in the Ontario League series. The Y. B. team, West Enders, and Smith, top scorer, proved the best scorers, the former making 28 points and the latter making 19 points.

The game was marked by spectacular play from start to finish. The Y. B. team led at half-time, 19 to 14, but in spite of this, the St. James team carried the game by 42 to 36.

The speed of the St. James' in the second half was remarkable, and at one stage took six consecutive baskets. The St. James' as a whole showed wonderful team work, every man proving a scorer, and are very hard to stop. Rankin and Russell proved a stone wall of defence for the Y. B. team, while Stanley, centre and Armour at forward worked wonderful combination. The line-up: St. James—Rankin, Stanley, Russell, Rankin, Stanley, Russell, Rankin. (By)—Ham, Munroe, Bickie, Vogan, Cook.

Sellers-Gough Tournament.

At the Athenaeum Club last night the Sellers-Gough Cup bowlers held their second handicap tournament of the season. The affair was very successful, and the last, twenty-eight players taking part. G. Sparks with a 136 pin handicap, secured the prize, and went to with W. Anslund, who was on the 40 mark, secured with 88. Fifty went to the limit time in B. Beteridge, who totaled 67, which included 30 pins handicap. The other players received handsome rewards for their efforts. K. Caldwell, one of the big winners last time, failed to get in the money, no doubt due to his time being taken up looking after the scores of the other players more than to his own bowling. The scores of the ceremonies last night and certainly knew how to handle the job. The scores:

REMARKABLE BILLIARDS.

When Joseph Capron Performed a Feat Not Since Equalled.

Altho the feat of running fifty points at three cushion caroms in thirty-one minutes, recently performed by Joseph Capron of San Francisco, undoubtedly is the best mark ever made for half a hundred points at consecutive caroms there is another equally wonderful performance which in the lapse of fourteen years has been forgotten by many. This was the making of fifty-six points in twenty-seven innings by Joe Capron, who, hailing from Canada, for many years has made Chicago his home, and now plays in the Minneapolis. When the veteran Charley Parker, for years one of the most prominent figures in the billiard world, was running the billiard room at St. Louis, the leading players of the country were engaged there.

On May 3, 1888, Capron opened with Ben Saylor, the game being for eight points. Joe won the first game, 3 to 0, then took the second game, 3 to 1, and the third, 3 to 2. He then made the twenty-four points in nine innings, and was playing in such wonderful form that Saylor was relegated to the bench and later Schaefer substituted. The wizard did not fare any better than his predecessor, as Capron took the first, 3 to 0, the second, 3 to 1, the third, 3 to 2, and the fourth, 3 to 0.

EATON'S

Lozier Cars High Priced, But Worth It

At the EATON Exhibit at the Toronto Automobile Show, Feb. 21, a prominent feature will be the Lozier car—the same make of machine that won the Vanderbilt Cup in November last.

Ask for the details of the magnificent mechanism that was equal to the long, grinding strain of such a high-speed test.

As cars go, the Lozier is high priced—but the high price is justified. And here are the reasons—

The materials of which it is constructed are the finest that money can buy.

It is made by a firm that has to sustain the reputation won by the Lozier Marine Motors and the world-famous Cleveland Bicycle.

Practically every part of the car is built in the Lozier factories, right from the raw material—a policy ensuring a uniform quality of excellence otherwise next to impossible.

As regards the dependability of the Lozier product, it is interesting to note that the Lozier foundry holds the unique record of having, for seven years past, produced automobile cylinder castings for its cars without a single record of a cylinder cracked in service.

Here are some particulars of the Lozier 6-cylinder 51 h.p. car:—

- Motor—Horse-power, A.L.A.M. rating, 51. Cylinders, 4 1/2 x 6 inches. Valves on opposite sides.
- Ignition—Double system Bosch high-tension magneto and storage battery.
- Lubrication—Splash, with automatic oiler and mechanical hand pump.
- Clutch—Multiple disc type—all steel discs in oil-tight case.
- Transmission—Four-speed selective type, direct on third. Speed on high, 60 miles per hour and upwards.
- Brakes—All on rear wheels, equalizing and adjustable.
- Gasoline Tank—30-gallon capacity—pressure feed.
- Wheels—36 x 5 inch front, 36 x 5 inch rear. Continental demountable rims. Wheel base, 131 inches. Tread, 56 inches.

Call and see the Lozier any day at Garage, Albert Street.

Murphy and Hogan Draw.

SAN FRANCISCO, Cal., Feb. 4.—The decision of a draw in last night's twenty-round fight between Harlem Tommy Murphy of New York and One-Round Hogan of San Francisco was well received by the crowd. From the start Murphy showed a desire for fighting, and the referee was kept busy forcing the men apart. Murphy hit well in the clinches, but refused to take any chances at distant fighting. Hogan's favorite blow was a stiff left, which he landed nearly every time that Murphy came into a clinch.

THE GYPSY'S WARNING.

Do not trust him, gentle lady. His words are low and sweet; Heed not for him who flatters you. Gently pleading at his feet. Now thy life is in its morning. Cloud not this thy happy lot; Listen to the gipsy's warning. Gentle lady, trust him not.

Do not turn so coldly from me. I would only guard thy youth. From his stern and withering power; I would only tell thee true. I would shield thee from all danger. Save thee from the tempter's snare; Lady, shun that dark-eyed stranger. I have warned thee, now beware.

Lady, once there lived a maiden. Pure and bright, and like thee, fair. But he wooed and wooed and won her. Filled her gentle heart with care. Then he heeded not her weeping. Nor cared he her life to save; Soon she perished, now she's sleeping In the cold and silent grave.

Keep thy gold, I do not wish it! Lady, I have prayed for this. The hour is when I might foil him. Rob him of expected bliss. Gentle lady, do not wonder. At my words so cold and wild; Lady, in that green grave ponder Lies the gipsy's only child.

About Salt.

Salt production is about the oldest industry in the world. In Italy, the cradle of the salt industry, it has been manufactured commercially for 2,600 years. Salt is so necessary to the existence that in some parts of the world tribes will sell the members of their families in exchange for salt. Salt has been the cause of wars, and so important has it always been considered that in some places the passing of salt is established as a token of friendship, and women throw salt on a visitor as a friendly greeting. In some countries salt is so scarce that it is obtained thru the ashes of grasses and species of palm and other plants. While salt is produced in almost every country of the world, it is stated that nowhere can salt of such purity be obtained as anything like the cost for mining as in Louisiana.

SATURDAY MORNING, FEB. 3, 1912

THE REAL ESTATE SITUATION AND THE TELEGRAM.

The Toronto Telegram and the assessment commissioner, Mr. Forman, expected to see a great land slump in Toronto. They are not going to see it. On the contrary there is every prospect of more land sales, of more settlement, more house building and more opening up of new property this spring than ever before.

An interesting thing to the Telegram and Mr. Forman will be that inasmuch as the Bloor-street viaduct is now in sight, and that the annexation of North Toronto must come in spite of the Telegram and the Globe, that most of this new activity will be found EAST OF THE DON, and especially along Danforth-avenue, and EAST OF NORTH TORONTO.

Here is an illuminating item in last night's Telegram: "We will need five school sites in Ward one within five years," declared Trustee Hiltz at the meeting of the board of education last night, and his colleagues were vocally appreciative.

In spite of the fact that land buyers (as the Telegram calls them) are opening up this land, the World makes bold to tell the public of Toronto and those outside Toronto who are anxious to invest in Toronto real estate that land will never be so cheap in this district as it is today, and who ever buys now will never repent of his bargain.

The Telegram, of course, is laying down a new doctrine, that a man who opens up real estate and takes advantage of the real estate market and who risks his money on what he sees coming is a public enemy who ought to be hounded out of business.

But somehow the Telegram thinks that the man who goes into real estate goes into it to find the poor man a home. Primarily he goes into the business to make money for himself; but there is no reason why the land butcher, ravenous he may be, may not be doing some kind of a service in opening up land that the farmers refused to open up.

Mr. Armstrong's Great Win. Mr. Joseph Armstrong, the hard working M.P. for one of the Lambtons, and a native son of South York, has done excellent work in favor of public ownership of public utilities.

The World is willing to give all the credit to Mr. Armstrong, and cheerfully does so, but what concerns The World more than anything else is to have the parcel post system, which is favored both by Mr. Armstrong and Mr. Maclean, put in operation at the earliest moment.

the world have we heard of land so being sold, except in England where civic government is at an advanced stage, and where there are many wealthy and philanthropic men.

The World is no apologist for the land butcher or the land company, and yet The World says today that the only person who is giving the public an opportunity to get a home in the suburbs is the land butcher who goes out and buys a farm which the farmer refuses to cut up, and who makes as much money out of it as he can.

What do you citizens think about it? And is it to be the policy for Toronto to have 100,000 living in her suburbs before she starts to incorporate them. If so, what will the problem be then?

CONSERVATION OF VISION.

Many of the most prominent men and women of the United States have identified themselves with the work that is being carried on by the American Association for the Conservation of Vision. It consists largely of public education and the encouragement of legislation for the protection of eyesight.

MOORE PARK ANNEXATION.

Application will be made on Tuesday next to the board of control for the annexation of a portion of what is known as Moore Park to the city.

One of the principal objects of the bill is to eliminate the possibility of babies being born blind. There are ten thousand persons in the United States blind from this cause alone, yet the danger of such blindness can be entirely prevented by the simple operation of putting certain drops in the eyes of the baby at birth.

MR. ARMSTRONG'S GREAT WIN.

Mr. Joseph Armstrong, the hard working M.P. for one of the Lambtons, and a native son of South York, has done excellent work in favor of public ownership of public utilities. He is to be commended therefor. Mr. Maclean of South York has also been working on the same lines.

ly in the direction of expanding his parcel post system, and expanding it on such lines that the effect will be to cut express rates in two, and especially to start the work in the Northwest, where the people-to-day are paying all sorts of express charges, and have other railway grievances of a harassing kind.

which would be a credit for the city to operate. These two arguments in favor of the city's annexation of Moore Park are sufficient to warrant favorable consideration by the board of control, but there are several other reasons warranting the step that can be urged if necessary.

C. P. R. ANNUAL BANQUET.

The employees of the Canadian Pacific Railway (Ontario Division) held their second annual dinner on Monday evening last, at the Arlington Hotel; 120 guests representing all branches of the railway were present.

Mr. Osborne's Reply. Mr. James Osborne, in a very touching reply, thanked all officials and performers for the manner in which they performed their duties during the period of his management, and for their handsome address. Illustratively he gave an outline of his life, how he had to hustle for his own living, from the age of seven, and from then until he got a position in the mechanical department of the office of the Grand Trunk Railway, and then forward in rapid succession from Junior Engineer, then Chief Engineer, and finally general superintendent.

Girl of 11 Makes Great Progress Learning Piano By Mail in Her Own Home

Tells in Simple Fashion Why She Applied for a Second Course of Free Lessons and Gave Up Her Teacher

ALL INSTRUMENTS TAUGHT ANYONE CAN LEARN.

Every year about 30,000 people, all over the country, learn to play their favorite instrument with the aid of the Free Music Lessons given by the famous U. S. School of Music.

Each day brings letters which tell of the pleasure given the writers through knowing how to play and describing the difficulty or ease with which they learned.

One printed below says how an 11-year-old child took a course of these free lessons, after which she went to a teacher, but now wants another course of lessons from the U. S. School of Music.

This is what she says: U. S. School of Music, Pleasant Lake, Dec. 13, 1911.

In 1906 I took a course of music from you and was very much pleased with the lessons. After I had finished your first term I took one from a teacher, but I progressed just as fast from you.

I will gladly recommend your music and method of teaching to anybody. If you will kindly answer by return mail I will make an order for your second term of music at once.

Hoping to hear from you soon, I remain, as ever, (Signed) VERNIE SHIPLEY.

Just Fill In and Send the Coupon (Request by postal or letter will do).

U. S. SCHOOL OF MUSIC, 325 FIFTH AVE., BOX 214, NEW YORK CITY.

Please send me particulars how I can learn the instrument after which I have marked X with the aid of your FREE COURSE OF LESSONS. It is understood that this places me under no obligation, and which amounts to about two cents a week.

WHEN NOSTRILS ARE PLUGGED YOUR CATARRH IS BAD

BY ACTING TO-DAY YOU CAN QUICKLY CURE CATARRH AND AVOID BRONCHITIS, PERHAPS CONSUMPTION.

Most Agreeable and Surest Cure is Catarrhose, Which Cures Every Curable Case.

Catarrhose proves especially good in those chronic cases where mucus drops down the throat, swells the stomach, and pollutes the breath.

When the nostrils are stuffed, only a few breaths thru the inhaler are needed to clear the passages, and where there is coughing and sore bronchial tubes the soothing, healing properties of Catarrhose act almost as magic.

Once you stop taking medicine into the stomach and get the healing oils and pure balsams of Catarrhose at a settlement has been made.

There have been attempts by the Liberals to stir up a school question but it is believed the old Laurier bill which was passed by the house and which was adopted by Manitoba will be used as the basis. This bill made no mention of schools, which would leave the matter up to Manitoba.

AT THE THEATRES

The concert of the Mendelssohn Choir in association with the Theodore Thomas Orchestra, which are the great musical event of the season, begin next Monday evening at Massey Hall. As usual large audiences will be the result. There are still some excellent locations to be had, except for the Tuesday evening concert at the Massey Hall box office. The programs are arranged by Dr. Vogt and Mr. Stock as follows:

Al. H. Wilson At the Grand. One of the most picturesque characters that Al. H. Wilson, the German dialect comedian, has ever portrayed is that of Metz Von Kitz in his new comedy, "It Happened in Potsdam," which will be presented by Mr. Wilson and company at the Grand Opera House next week. The character is that of an eccentric German who finds great difficulty in securing a wife with the certain qualifications that he thinks she should possess. During the action of the play Mr. Wilson will sing "When You Part From the Girl You Love," "Song of Old Fatherland," "Her Smile," and "Loves of Bygone Days." During the week the regular Wednesday and Saturday matinees will be given.

Tom Terriss at Shea's. Manager Shea, with his usual determination to give his patrons at Shea's Theatre the best obtainable in the entertainment line, has secured for next week the first American production of Scrooge, the adaptation of Charles Dickens' Christmas Carol, made by Tom Terriss, the distinguished English actor. Mr. Terriss will appear in the title role, surrounded by his own stable company of English actors. In Charles Dickens, lovers of the English story writer and the literature departments in the schools of this country have done much to rouse in this Dickens' spirit. No actor could be better qualified to prepare an adaptation of the Dickens' stories than Mr. Terriss, as his own home is Kent near to Bleak House, the home of Dickens. The grandeur of the actor

on Wednesday next but the mail orders pouring in seem to indicate that the theatre will be largely sold out before hand.

Fritzi Scheff in "Night Birds." This engagement of that popular prima-donna, Fritzi Scheff in "Night Birds" at the Royal Alexandra next week is welcomed by music lovers as evidenced by one of the largest advance seat sales of the present season. In every city of the present tour this masterpiece of Strauss has been welcomed as the best vehicle Madame Scheff has had in years.

"Night Birds" has been produced by Joe Messrs. Schubert on the same notable scale that distinguished both "The Mikado" and "Financiere." The cast numbers many Broadway favorites, including George Anderson, Frank Rushworth, John F. Hassard and Edith Bradford, and a large chorus, while a special orchestra is a feature. Madame Scheff never plays more than one matinee weekly, and the one for this engagement will be on Saturday.

"Alma, Where Do You Live?" The attraction at the Princess Theatre all next week, with matinees Wednesday and Saturday, will be Joseph M. Weber's production of Geo. V. Hobart's English version of the sensational musical comedy success, "Alma, Where Do You Live?" direct from a year's run at Weber's Theatre, New York, with the well known prima donna, Vera Michelson and the original New York company and production. Mr. Weber's presentation of the Americanized German version of the famous French vaudeville is one of the best farce comedies seen in many a day.

Vera Michelson in the title role is a great success, not only on account of her capable acting and exceptional singing, but because of her statuesque beauty. Miss Michelson to-day is foremost among the stage beauties and more than probably occupies the position enjoyed by Lillian Russell twenty years ago. Mr. Weber's entire company is well balanced and practically the same as seen during the long run at Weber's Broadway Theatre, New York, including William H. Powers, Edouard Durand, Shirli Byves and E. P. Nagel, Robert Doro, Madeline Savel, all members of the original company.

There are fourteen musical numbers, all gems. The "Alma" song runs through the entire play. Other hits are "Kiss Me, My Love," "Chimes of Childhood Days" and "Show Me Around and Around."

Al. H. Wilson At the Grand. One of the most picturesque characters that Al. H. Wilson, the German dialect comedian, has ever portrayed is that of Metz Von Kitz in his new comedy, "It Happened in Potsdam," which will be presented by Mr. Wilson and company at the Grand Opera House next week. The character is that of an eccentric German who finds great difficulty in securing a wife with the certain qualifications that he thinks she should possess. During the action of the play Mr. Wilson will sing "When You Part From the Girl You Love," "Song of Old Fatherland," "Her Smile," and "Loves of Bygone Days." was a close friend of the great writer. Much interest in the coming of Mr. Terriss will be felt by teachers and English students in the schools. As a special attraction on the week's bill, Manager Shea has secured George H. Primrose, dean of American dancers.

Mrs. Gene Hughes is a feature, with her delightful one-act comedy, "Youth," Stepp, Mehlinger & King are clever, and the boy with the banjo have a new budget of songs and are better than ever.

The Four Onnati Sisters with their aerial stunts, rival the strongest men in feats of strength, and H. T. MacConnell, the president of the Thirteen Club, is a scream. Much interest is felt about the appearance of Colonel Sam Holdsworth, the world's oldest professional tenor, and the children have a special act this week in McEwan's dogs. The kinetograph closes the show with new pictures.

"The Merry Maidens." A smartly written musical burletta, entitled "The Dashing Widow," comprises one portion of the entertainment provided by "The Merry Maidens" Company, at the Star next week. A series of "living pictures" is staged on a resplendent scale at an opportune moment, and several other unique and original ideas are worked out in a satisfactory manner. "Living Gear" is sustaining the principal comedy role in a manner that is said to enhance his already established reputation as a mouth provoker. Mike J. Kelly plays opposite Simons. Among others in the company are Vera Michelson, the prima-donna; Lilla Brennan, Wm. Hart, Joe Phillips, Chooceta, "The Dancer de Luxe," is heralded as an "attraction extraordinary."

"Girls From Happyland." That funny little Dutchman with that funny slither, Billy W. Watson will again lead the "Girls From Happyland" to a new triumph, when they will be presented at the Gayety Theatre next week. No better organization has ever been put together to create com-

tinuous merriment, than this particular one. There are many new scenes, most prominent among them being the one laid in the foyer of the Grand Opera in Paris.

Beautiful ensembles, clever and original, and numerous novelties and other attractive features will be much in evidence. Billy W. Watson is supported by Ida Barry, Nellie Watson, Margie Ellen, June Adams, Geo. E. Garden, Ernest Yerxa and Adelle, Mabel Blake, Hal Pearson, Charles Simpson, the Four Harmonists, Thos. A. Brooks and the famous Happyland Beauty Chorus.

Dr. Cook's Lecture. Sensational charges, supported by evidence, are made against Mr. Peary and his friends by Dr. Frederick A. Cook, who will lecture in Massey Hall, on Feb. 12.

Disputed with the rival campaign against me, and being so physically strung at the time that I would have been unable to cope with the competitor, says Dr. Cook, "I decided to go away and let my enemies exhaust their abuse, and determined to retire and rest, and to resolve my quietude and secrecy. I left America, and my enemies gleefully interpreted this as an admission of imposture. But meanwhile," Dr. Cook explains, "I took advantage of the opportunity to rest and acquire an accurate perspective of the situation."

"Messiah" and "Elijah." Mr. Frederick Martin of New York has been engaged to sing the bass solos at Dr. Torrington's farewell performances of the "Messiah" and "Elijah." Of his singing at a recent performance of the "Messiah" in Milwaukee, The Sentinel said: "Of the soloists, Mr. Frederick Martin, who sang the bass solos, secured the triumph which he scored in the same work last season, and again delighted the audience by his splendid artistry and noble voice. Anyone who has heard him sing the 'Nations,' as Mr. Martin does, and can so easily overcome the tremendous difficulties with which this aria abounds, is better qualified to sing it than any other." Subscription lists for the performances March 12 and 13 are now open.

London Orchestra Coming. MONTREAL, Feb. 2.—Arrangements have been completed for a brief Canadian series when the famous London Symphony Orchestra comes to America for twenty concerts in as many days. Under the baton of Dr. Arthur Nikisch the orchestra of a hundred players will reach New York on April 8.

ORANGEVILLE, Feb. 2.—George H. Harshaw has been duly sworn in and is now postmaster of Orangeville. He yesterday engaged Miss Park, daughter of the late postmaster, and Gordon Hayes, for one year at a substantial increase in salary. By this action Mr. Harshaw has made an important contribution to public opinion in this town and indicated his desire to maintain the efficiency of the office at its high standard.

DO ONTARIO SCHOOLS NEGLECT AGRICULTURE?

Prof. Chamberlain and Prof. McCready Disagree on Merits of Curriculum.

TILBURY, Feb. 2.—(Special)—The fourth day of the corn show was attended by larger crowds than the three previous days, the exhibit room and the lecture halls being filled at every session.

Prof. Chamberlain addressed an audience of one thousand pupils, parents and teachers, on agriculture in public schools, and incidentally remarked that Ontario schools were behind those of the United States in imparting information useful to the ordinary pupil.

At the afternoon session Prof. McCready, maintaining that the province was now nearer the solution of many problems that had been confronting educationists for years than any other state or province in America.

General Trowbridge Dead. DETROIT, Feb. 2.—Gen. Luther S. Trowbridge, veteran aviator of many ports of Detroit, comrade of Gen. Custer and veteran of the civil war, died to-day. He was 73 years of age and two years ago suffered a stroke of paralysis.

Tried to Liberate Rojas. MEXICO CITY, Feb. 2.—(San. Press)—An attack was made to-day on the penitentiary at Chihuahua for the purpose of liberating Antonio Rojas, who surrendered with his followers at Moris in the southern part of the State, where he and his followers had revolted while stationed at the Dolores Mines.

After two hours' fighting the assailants were repulsed. Three guards were killed.

Gives Men This Vitality of Youth

Vitality is the thing which makes success; it gives men that compelling power which sends them forth eager and equipped to meet and overcome all obstacles; it is the thing which gives the young soldier the courage to face death; it is the thing which inspires and holds his sweetheart's love and faith. No matter what your age, I can give you this same vital power. I can restore to you the vigor you lost, no matter what early or later indiscretion may have sapped your strength, I can make you "young" and keep you "young." From an intimate and studious observation of possibly 100,000 weakened men, I say it to you that VITALITY or the lack of it means all the difference between a manly man and a half-man. The man who bubbles with

vital power will exert a pleasing influence upon all with whom he comes in contact; women are naturally attracted to him, as are men. Lack of vitality is a negative condition, and it even repels. You wear my HEALTH BELT all night; it sends a great, glowing, health-giving current of electro-vitality into your nerves, blood and organs; it takes all the "kink" out of your back and all the coward out of your make-up; it puts you right up in the "feeling-fine" class and keeps you there. No stimulation, no false results; just a sure return to manhood and courage. Recommended also for rheumatism, pain in the back, kidney, liver, stomach and bladder disorders. It makes you feel young and keeps you feeling young forever.

Let Me Send You This Book FREE. It fully describes my Health Belt, and contains much valuable information. One part deals with various ailments common to both men and women, such as rheumatism, kidney, liver, stomach, bladder disorders, etc. The other part is a private treatise for men only, both sent upon application, free, sealed, by mail.

EFFECTS WERE MARVELLOUS

When I Tried "Fruit-a-tives"

Hardwicke, N.B., Jan. 17, 1910. "I feel it my duty to give you a statement in respect to the wonderful cure I received by taking 'Fruit-a-tives.' Chronic Constipation was the complaint I suffered from for years. My general health was miserable as a result of this disease, and I became depressed and alarmed. I was treated by physicians without the slightest permanent benefit, and I tried all kinds of pills and tablets.

"I saw the strong testimonial in favor of 'Fruit-a-tives' by New Brunswick's 'Grand Old Man' Senator Costigan, and I knew that anything he stated was honest and true and given only to help his fellow-men. I tried 'Fruit-a-tives' and the effects were most marvelous, and now I am entirely well from all my Chronic Constipation that I suffered with for years."

The Nervous Invalid

Far Greater Sufferer Than Man With Broken Leg

Both Mind and Body Are Restored by the Use of Dr. Chase's Nerve Food

There is no suffering so keen as that which arises from diseases of the brain and nerves. Physical pain is intermittent and can be relieved, but when the nerve cells become feeble and wasted, mind as well as body is affected, and all is blackness and discouragement to the sufferer.

The brain is starved for lack of rich blood, and there are headaches, neuralgic pains, sleeplessness, irritability, indigestion and loss of energy and vigor are among the symptoms.

The man with a broken leg has the sympathy of all who know him, but the man who is broken in mind as well as body by nervous exhaustion is told that he only thinks he is sick.

Since the cause is in the condition of the nervous system, it can be removed by the use of Dr. Chase's Nerve Food, which goes directly to the formation of rich blood and the restoration of the feeble, wasted nerve cells.

Rest, seek cheerful companions, live in the sunshine, and using Dr. Chase's Nerve Food will find a wondrous relief for any suffering from an exhausted condition of the nerves.

An Early Breakfast

An early breakfast without getting up early! That's Winter joy without Winter worry or work. Such a thing is possible in the home where

SHREDDED WHEAT

forms the daily breakfast. Being ready-cooked and ready-to-serve one does not need to wait for kitchen fires or slow servants for a warm, nourishing, strengthening breakfast.

Simply heat the biscuit a few moments to restore crispness, then pour hot milk over it and salt or sweeten to suit the taste. Deliciously wholesome with stewed prunes, baked apples, sliced bananas, canned peaches or other canned fruits. At your grocer's.

RECOMMENDED FOR DEPARTMENT OF WORKS

Board of Control Passed Motion Asking Council to At Once Proceed With Reorganization and to Appoint a Strong Administration - Statements Denied.

At their meeting yesterday morning the board of control finally passed Controller Church's much debated motion to the effect that the board recommend that the city council authorize it to at once proceed with the reorganization of the works department by the appointment of a strong administrator with a knowledge of engineering, who will have a free hand to organize the whole department as he sees fit. The motion was passed with almost no discussion. At previous meetings Controller Church and Foster were at variance as to whether the proposed new executive head should be an engineer, but this point was avoided by inserting the words "with a knowledge of engineering."

Denied the Statements. Dr. Hastings, M.H.O., created some excitement at the meeting by sending to the controllers the report of Dr. Packard, chief dairy inspector, to the charges of J. A. Macdonald, K.C., that he had changed his attitude regarding the granting of a license to W. H. Taylor at 75 Bleecker-street, and that in connection with this he had asked Mr. Macdonald to use his influence with the controllers to secure for him an increase in salary. Mr. Packard denied these allegations. He said that "fix" the board of control so that Mr. Packard would be given an increase in salary. The inspector would prevent the granting of this dairy license. If he declined to do this, Mr. Macdonald, he said, had threatened to have him discharged. Mr. Macdonald appeared a little later before the board and vehemently denied the statements of the inspector. The controllers took no action in the matter.

For Intake Repairs. City Engineer Rust appeared before the board and asked for the appropriation of \$50,000 for the intake repairs and extension. The previous appropriation of \$100,000 had been exhausted, and debts had been contracted to the extent of \$15,000. The board granted the \$100,000 to cover the debts, but declined to make any further grant until a report showing the previous and indicating the prospective expenditures was submitted.

Contagious Diseases. The report of the medical health department shows that during last month diphtheria, scarlet fever, measles, and typhoid fever, with the exception of diphtheria, these figures show a decided improvement over those of January, 1911. The greatest contrast is seen in the case of scarlet fever, which in January, 1911, as compared with 149 in January, 1912.

The assessment commissioner yesterday announced the appointment of the new assessors as follows: F. B. Morrow, S. B. Burrows, H. M. Graham, J. C. Gray, J. W. Stinson, J. W. Stinson, W. M. Miller, J. M. Simola, and J. Law, H. P. Kerr, H. R. Adams and H. J. Pritchard.

TORONTO CITY MISSION DOES EFFECTIVE WORK

The monthly meeting of the Toronto Mission Board was held in the rooms of the Upper Canada Tract Society, the president, Rev. John Neil, D. D., presided. The reports of the missionaries were read by Rev. Robert Haig, and showed a large amount of effective work done during January. Three missionaries found a great deal of suffering in the poor districts and \$25 was expended in providing relief for those suffering on the streets. 1000 garments were provided to clothe the needy ones during the very cold weather. On Tuesday the missionaries sent out 13 large loads of lumber to poor families from a well-known builder's yard, so that much suffering has been prevented thru the judicious handling of these cases. The missionaries have had a busy month and are not able to overtake all the needy districts of the city as funds are urgently needed.

The treasurer presented his report and referred to the splendid support, and also the need of increased support. The missionaries must have more help, and Mr. Aaron Wilson has been engaged to resume his work again in the summer during the university vacation.

Over 500 visits were made by the missionaries. Reference was also made to the overcrowding at the jail, the actual presentation of ancient Greek and Latin plays at Harvard.

Many will remember Dr. Harris' lecture on "The Permanent Influence of Greek Literature," which was given at the University of Toronto two years ago.

CANADIAN RAILWAYS ARE SURELY EXPANDING

Over 1,200,000 More Passengers Carried Than in 1910—Track Mileage 25,400.

OTTAWA, Feb. 2.—(Can. Press).—Growth and development of Canadian railways and, generally speaking, their prosperity was indicated in a report by John Lambert Payne, comptroller of railway statistics.

The total track mileage is 25,400, an increase of 689 miles. At the end of June last, the period covered by the report, 3000 miles of road was under construction; of this 788 miles were in actual operation at that date the not formally declared to be so by the railway commission. In the year 1911, 514 was added to capital liability of the railways, of which \$61,650,300 was in stocks, and \$54,741,214 in funded debt. The capital liability is \$1,528,683,201, or \$44.821 per mile.

The dividends paid in the last five years published this year for the first time are as follows: 1907, \$12,760,485, or 217 per cent. on share capital; 1908, \$12,925,243, or 311 per cent.; 1909, \$19,231,118, or 352 per cent.; 1910, \$21,747,914, or 315 per cent.; 1911, \$20,577,740, or 408 per cent. Cash paid to the railways in the year amounted to \$1,428,102.

Passengers carried totaled 37,097,718, an increase of 1,202,743, while freight tonnage was 78,884,282 tons, an increase of 401,116. From all sources gross earnings were \$18,723,084, an increase of \$14,777,487 over 1910. Operating expenses aggregated \$12,034,785, making the net earnings \$6,688,299, an increase of \$5,857,778 in 1910. A total of 549 locomotives, 4812 passenger cars were in service during the year. Total accidents number 493, while 3229 persons were injured, a decrease of 120 in fatal and 1190 in other accidents. Of the total of those killed, 302 were employees, while of the total injured 1314 were so engaged. One passenger in every 1,243,912 there was killed and one in every 121,489 injured. Level crossings caused 28 persons to be killed and 108 injured. Employees in 1911 aggregated 141,224, an increase of 17,456. In wages \$74,613,318 was paid out, an increase of \$7,493,945.

On electric railways mileage totaled 1224, earnings \$20,376,952, and operating expenses \$12,096,134. Passengers numbered 456,924,792 as against 369,564,876 in 1910. Electric railways killed 102 and injured 2670 persons. The increase in fatalities therefore is 7 and in injuries 122.

GOMEZ NOT A FIGHTER

He Would Be President of Mexico if No Personal Danger.

SAN ANTONIO, Feb. 2.—(Can. Press).—Emilio Vasquez Gomez, candidate for vice-president and former confidential agent for Madero at Washington, is prepared to assume the presidency, if there is a successful revolution in Northern Mexico. Discussing the matter here yesterday, he said: "I understand the revolutionists endorse the plan of Tacubaya, which declared for me as president of Mexico. I will not leave my home here, for I am a man of ideals and not a man of arms," continued Gomez, "but I will accept the presidency if it is offered to me."

Senator Gomez denied that he had incited any rebellion in Mexico or would participate in an uprising.

BABY'S HEALTH IN WINTER.

During the winter months the mother finds it very difficult to keep her little ones well. Colds come on quickly and the discomfort to the baby affects the whole household. To keep baby well during the winter he should be warmly clothed, have a daily bath, lots of fresh air, and Baby's Own Tablets should be given him occasionally to keep his little bowels working regularly, as nothing will bring on colds so quickly as a clogged condition of the bowels. Baby's Own Tablets are the best medicine a mother can give her little ones. They break up colds, cure constipation and indigestion, help worms and make baby bright and happy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brookville, Ont.

HUGH AITKEN HERE.

Among the visitors now in Toronto is Mr. Hugh Aitken of Los Angeles, Cal., who, before his removal there, had been for twenty years in the brokerage and newspaper business on Vancouver Island. He reports business conditions in California to be excellent, the conditions are unsettled, as is usual in a presidential election year. Agriculture and industry are prospering and all classes looking forward to an immense commercial expansion following upon the opening of the Panama Canal. As will be seen in the advertisement appearing elsewhere, Mr. Aitken has got down to business in conjunction with Mr. Owen J. B. Yearley in the Confederation Life Building, where he will be glad to see any person interested either in British Columbia or Southern California.

GRAIN HANDLED AT WINNIPEG.

WINNIPEG, Feb. 2.—The Canadian grain inspection department has issued figures of grain handled at this point for the first six months of the grain year, from Sept. 1, to Jan. 31, showing a big increase as compared with the same period a year previous. Grain shipments for the five months just closed, totaled 48,483 cars as against 39,177 cars the previous year, an increase of 23,306 cars, or 54 per cent. Distribution of this increase is as follows: Canadian Pacific 19,771, against 16,814 cars; Canadian National 24,768, against 18,111 cars; Grand Trunk Pacific 374 against 400 cars; Great Northern 228, against 813 cars.

IN PARTNERSHIP WITH RAILWAYS.

WASHINGTON, Feb. 2.—(Can. Press).—What virtually amounts to a partnership between the railroads and the express companies was suggested today by Commissioner Lane at the investigation by the interstate commerce commission into express rates and regulations. To develop this relationship further, the railroads were directed to appear to be the crux of the present enquiry.

Distinguished Greek Scholar Will Lecture in Toronto.

A lecture of more than ordinary interest has been presented thru the University of Toronto, especially those who appreciate the gift of ancient Greece to modern culture. W. F. Harris, Ph. D., until recently professor of Greek in Harvard University, will lecture on "The Greek Theatre and the Greek Drama" at the physics building, University of Toronto, Feb. 8, at 8 1/2 p. m. Professor Harris, a Nova Scotian by birth, a student for many years at Harvard, Oxford, Berlin, and Paris, has devoted himself largely to the Greek drama, of which he is engaged in writing a history. He has visited all the more important ancient Greek theatres, and has had a prominent part in the actual presentation of ancient Greek and Latin plays at Harvard.

NORTHUMBERLAND CLUB CHOOSES NEW OFFICERS.

COBOURG, Feb. 2.—(Special).—The annual meeting of the Northumberland Club was held here. The reports presented to the meeting have shown evidence of a successful year, both socially and financially, that the board of directors decided to make the clubrooms even more attractive for the coming year. At the close of the meeting the members were invited to receive an informal visit from the Hon. Jas. Duff, minister of agriculture, and Capt. Stauffer of Ontario. The following officers were chosen for 1912: Honorary presidents, George Gaultie, George H. Gooderham, George Mitchell, Dr. H. C. Elliott, A. J. Hewson, W. J. Crossen, Jas. Leonard, President, Geo. Greer; 1st vice-pres., Wm. Noble; 2nd vice-pres., Geo. Cullough; secretary, Jas. McKinnon; treasurer, A. R. Dundas; house committee: J. H. Davidson, Dr. Elliott, F. McArthur; board of directors: Col. Vigorous Strength Restored!

A SURE CURE—NOT A TEMPORARY RELIEF

Doctors all over the world are now talking Electricity, and are using it in one form or another. This is the direct outcome of the recent announcements of the world's greatest scientists, and is a practical admission on the part of physicians of the power of electricity over drugs as a curative agent.

I have known for twenty years that drugs could not restore strength. My knowledge was obtained from actual contact with thousands of people who have tried drugs in every form, and they were worse off than before they started drugging.

Are you a weak man? Are your nerves frazzled and gloomy? Is your sleep broken? Have you pains and aches in different parts of your body? Is your back weak and painful? Have you varicose veins? Are you rheumatic and gouty? Have you vertigo, dizziness, or the results of the waste of vital force. The gentle stream of electricity from Dr. McLaughlin's Electric Belt going into the weak nerves for hours every night soon replaces all the lost energy, and makes every nerve and muscle perfect. It cures permanently in every case.

Give me a man (or woman, for that matter) who has been sick and suffering for years, and taken medicine until the system is all run down and debilitated, the stomach unable to digest the food, and the nerves shattered. My Electric Belt will give new life to every organ, drive out disease, and restore health.

Now, take a letter like this one that Mr. James J. Gannon, Whitney, Ont., writes me. This man, I venture to say, would rather part with \$1,000 than forfeit the good he has received from the use of my Belt. These are his words: "Dear Sir—I would have written sooner, but was waiting to see what the Belt would do. I have got good results from it for my general weakness, as I feel stronger and can rest better at night. I have not been bothered with my back since I commenced the use of the Belt. I have never regretted getting the Belt, I assure you, and I will recommend your treatment to my friends and other sufferers."

I have the greatest invention of the age for weak men; the surest and easiest cure for all nervous and chronic diseases. Its wonderful power is directed to the seat of the nervous system, through which the vitalized strength penetrates into all parts of the body, carrying new life to every function which has been weakened by excesses or dissipation, restoring energy to the brain and power to the vital organs. No weak man, no sickly or delicate woman, will ever regret a fair trial of my

Dr. McLaughlin's Electric Belt

If you are suffering pains or aches, or any evidence of weakness, no matter from what cause, write to me. I will tell you at once if I can cure you or not. I am willing to take all the chances. I know what my Belt will do. My confidence in my method enables me to offer any man or woman who will give me reasonable security the use of my Belt at my risk, and they can

USE IT ON TRIAL
I have a nicely illustrated book which every man should read. I will send it, closely sealed, free. CAUTION—Thousands write me that they have used Electric Belts and got no benefit. Why? Simply because they are purchased from people who have no practical knowledge of electricity.

SPECIAL NOTICE—I have the only Electrical Appliance in which your case receives special attention of a practical physician, who has made a life study of electricity. The success of my electrical appliance depends upon intelligent application. Agents or drug stores not allowed to handle my Belt.

FREE—Send No Money
Just put your name and address on this coupon and mail it to me. I'll send you full particulars regarding my Electric Belt, together with my big free book, which explains many things you ought to know about the diseases of men and women.

Don't delay another minute. Cut out the coupon right now and send it in.

Put your name on this coupon and send it in. 12-20-11. DR. H. S. McLAUGHLIN, 237 Yonge St., Toronto, Ont., Dear Sir,—Please forward me one of your books as advertised.

THIS IS HIS 131st DAY OUT

A Reminiscence of the Period When a Defeated Provincial Cabinet Minister Held on to His Portfolio for a Long Spell, Looking for a Seat.

This is Mr. Graham's 131st day out of a parliamentary job and there is nothing yet cheerily in sight. It has never been made quite clear what public necessity exists for the presence of this politician, Geo. P. Graham is looking for a seat, and this is his 131st day out, as already remarked. Will it be long before he is away back to those intensely warm days in Ontario party politics, the later seventies, when giants stalked about in the arena and real dangers were on the card from morning till night, and at night, too, right straight along, there was a defeated cabinet minister looking about for an extended period, looking for a seat and finding none. His plight differed from that of George P. Graham, in that the government which he had been a member had not been sustained.

Hon. Adam Crooks, minister of education, was always a good figure in politics, but he never manifested his peculiar characteristics more conspicuously, not to say ridiculously and reprehensibly, than when for some six months he posed as Oliver Mowat's Standing Colleague.

How the opposition press did scoldify this minister, who stuck to the profession with his certificate run out! Editorial comment in those days before the Renaissance was apt to be spread to the limit. The newspapers didn't content themselves with merely calling a spade a spade. They employed crisp, adjectival curbs, and the language used was not only to the point, but it was also to the point.

As many a reader will recall, The Toronto Sun, Ed. Barrett's bright, but short-lived venture, was the only evening paper in the city.

It was a supreme moment—but it was equal to it.

He hurried into the composing-room, he hustled from the cabinet of cuts and electro representing an old-time sailing vessel, with every inch of canvas out, grabbed a "stick," and printed the thing he was, set up under the cut of the bounding barque the familiar legend:

"THIS IS HIS 131st DAY OUT." There was a space found for the hurry call squib, the paper went to press sharp on time, and everybody who read this squib the next day to date.

Finally South Oxford opened its arms to the minister of education. There was great rejoicing in Toronto. A monstrous torchlight procession marked the occasion, the election of the standing minister. And a huge figure of it was the effigy of the Sun skit man and his legend—proving that a little non-sense now and then, even when great issues are up, is relished by the party men—and further establishing the eternal truth that one day or other a good joke gets all that is coming to it.

"THIS IS HIS 131st DAY OUT!" With South Rentrow come to the rescue?

recorded how a farmer in an adjacent township caught a trap on the threshold of his henry, whose explanation was that, since nobody was supplying Mr. Crooks with a seat, he had undertaken to find him one. A theatre entrance was reported to have borne the sign: "Not one left—out for Crooks." The cabinet minister without a constituency was lollied as to his domestic life, his club visits, his church attendance, in the droildest possible way. An old lady was said to have risen in the street car and tendered her seat to a man strapholder—who proved to be Hon. Adam Crooks.

And so it went, day in and day out, till the whole city, not to say the entire province, had no other idea of the spirit of the Crooks' skit than that it became a universal source of amusement—the joke of the day.

There was never a break in the continuity of the funny paragraphs. But one day the skit man came perilously close to dropping a stitch.

He was entertaining an editor friend from Barrie, and, in the process, tempus fugit till it came within five minutes of the hour to "send down the form."

The foreman of the newsroom appeared at the sanctum door. "All in, Larry?" said Alex. briskly. "Let 'er go!"

"Without a Crooks skit?" queried the foreman, coldly.

"What! Heavenly hoo, have I missed to-day? I have, say, Larry, for Heaven's sake give me time to dash off."

"You just got three minutes—not a second more!" growled the man whose job was to get to press on time, and who never was known to stand for delay even if the proprietor himself begged and prayed for it. "Get busy!"

It was a supreme moment—but it was equal to it.

He hurried into the composing-room, he hustled from the cabinet of cuts and electro representing an old-time sailing vessel, with every inch of canvas out, grabbed a "stick," and printed the thing he was, set up under the cut of the bounding barque the familiar legend:

"THIS IS HIS 131st DAY OUT." There was a space found for the hurry call squib, the paper went to press sharp on time, and everybody who read this squib the next day to date.

Bells and Bell-ringing

From Penny Pictorial.

Every county in England has its Amalgamated Society of Bell-Ringers. There are the London County Association, the Middlesex County and Yorkshire Associations, etc.

Before an amateur can become a member of one of these associations, he must be an efficient ringer, and know how to handle his bell and ring changes without the aid of an instructor.

There are only seven full peals of bells in London—those of St. Paul's Cathedral; St. Saviour's, Southwark; St. Michael's, Cornhill; St. Giles's, Cripplegate; St. Mary-le-Bow, Cheapside; St. Leonard's, Shore-ditch; and St. Bride's, Fleet-street. Other London churches possess ten, eight, and six bells. Westminster Abbey contains only six.

Let me explain the parts of a bell. The edge at its largest diameter is called the "lip," the part that the clapper strikes upon, the "sound bow," the part above this, the "waist"; and the upper part, the "crown."

In the crown are cast projecting knobs, known as "cannons," and bolted firmly and strongly to these is a large piece of wood, known as the "stock." To this stock is attached the wheel made of oak, with a deep groove running round its whole circumference.

Attached to the side of the stock is a rope, which is pulled by the ringer, and runs round the groove and thru a pulley in the floor to the ringing-chamber.

Let us now descend to the ringing-chamber. The rope is pulled, the bell swings in one direction, and then from its own weight swings backwards the opposite way. If we repeat these pulls, gradually pulling harder, the bell will swing higher and higher—or "rise," as it is called—until it swings so far that it completes a whole circle.

It is now ready to ring, and it is by this method that bells are rung in peal, every pull, a no mean feat for the ringer to accomplish, especially with a heavy bell. On an extra large bell, such as the one of St. Paul's Cathedral, two men ring by means of a winch rope in the ringing-chamber.

To ring bells continually in rounds—i. e., starting from the smallest or "treble" bell, and finishing at the largest, or "tenor"—would soon become monotonous to the hearers. Thus changes are introduced, and now begin the learner's troubles for he has no figures on blackboards, neither has he any books to go from. But he must learn a "method." The method is usually practiced as the following:

Combination. If we toll four bells, the greatest number of changes that can be produced by a plain course is twenty-four. We start in rounds—viz., 1, 2, 3, 4; then change all four bells, thus getting 2, 1, 4, 3. Now, changing only the middle one, we get 2, 4, 1, 3, and so on, until we come back to 1, 2, 3, 4.

The following diagram will show the

greatest possible number of changes that can be produced on any given number of bells.

4, called "Singles," 24, taking 1 minute to ring; 5, called "Doubles," 120, taking 5 minutes to ring; 6, called "Minor," 720, taking 30 minutes to ring; 7, called "Triples," 5040, taking 2 1/4 hours to ring; 8, "Major," 40,320, taking 1 day 4 hours to ring; 9, called "Caters," 362,880, taking 10 1/2 days to ring; 10, called "Royals," 3,628,800, taking 105 days to ring; 11, "Cinquies," 39,916,800, taking 3 years 60 days to ring; 12, "Maximus," 479,001,600, taking 35 years to ring.

To teach a man to ring properly may take some years. He must first attach himself to some local church that possesses a peal of bells. He will then be shown how to handle the bell, or "raise, set, and lower," as it is called. This must be done perfectly before he is allowed to ring changes.

After this it will greatly depend upon himself how long he will take to become efficient. Some learn very quickly, whilst others may take years.

When the learner is practising, the clapper of the bell is tied, so as to obviate the annoyance of discordant sounds, to the election of the standing minister. And a huge figure of it was the effigy of the Sun skit man and his legend—proving that a little non-sense now and then, even when great issues are up, is relished by the party men—and further establishing the eternal truth that one day or other a good joke gets all that is coming to it.

The payment of ringers largely depends upon the financial position of the church they ring for. Many ringers give their services voluntarily, while others only collect round the parish at Christmas time.

When the bells are rung for a wedding, however, the usual pay is five shillings; but this, again, greatly depends upon the generosity of the bridegroom, or, more often than not, the best man.

Bells are made from a mixture of bronze and other metals. There are only three firms of bell-founders in London, and about half a dozen in the provinces.

Not Fashionable Here. Bells are not yet fashionable in the colonies, and the first peal was rung in Canada only a few weeks ago.

The art of bell-ringing is sometimes called "bell-ringing," as named from its supposed origin in Campania, in Spain, by the way, bell-ringing in Spain is rather dangerous, as the following article taken from a London paper will show:

A gentleman who has spent many years in Spain, and who has some interesting particulars regarding the bell-ringers of Seville, the bells of Seville, he says, are rung by men at the part of their lives. Instead of pulling at ropes, the ringers actually stand astride the huge bells, and swing them to and fro with their own hands going.

This is work such as could only be performed by men whose nerves, muscles, etc., are thoroughly sound. Sometimes a bell will be swinging right outside a bell-tower, with its clapper ringer perched on top.

A Foolhardy Trick. "Not only the professional bell-ringers, however, practice the trick. Occasionally young gentlemen of Spain ascend the tower, in order to ring the bell after the style of the professional ring-

This is a feat of which it is permissible to boast afterwards. Accidents will sometimes happen to bell-ringers. The rope will catch under the arm, or round the neck, sometimes with disastrous results. The ringer may be drawn up to the ceiling, and then thrown down heavily. A curate in Kent recently broke his collar-bone in this manner.

New Occupation for Women. There are as yet very few lady ringers, but the fair sex are taking up the art, and generally they are welcomed by ringers.

The cost of a peal of bells varies according to the size of the bells. A ring of eight bells, with the tenor, (largest bell), weighing 125 cwt., would cost £800, or thereabouts.

Steeple and towers sway very much when the bells are in motion, and the danger is, that when the vibrations have stood on a tower, when the vibration resembled the movement of a boat. Electricity is now made to ring bells.

The apparatus is so arranged that the ringer simply presses a button, and off go the bells in peal. It is to be hoped, however, that the time is far distant when this method will be adopted universally for it will rob us of an art loved by hundreds.

PROBING CHICAGO FIRE. CHICAGO, Feb. 2.—Special agents of the department of justice are investigating the fire which destroyed the Open Board of Trade building here on Dec. 19 last.

The investigators refuse to discuss the cause of their work, but it is said valuable records, which would have thrown light on the McNamara bomb-traces were destroyed in the fire. Twenty-one unions had offices in the building.

SANDY MACDONALD SPECIAL LIQUEUR SCOTCH WHISKY 10 YEARS OLD

That only the finest Highland and Glenlivet malt grain enter the Alexander & Macdonald Distilleries, at Leith, Scotland.

That these cereals are distilled with the utmost care by Messrs. Alexander & Macdonald themselves—that ensures "Sandy Macdonald's" extraordinary quality.

That there are thousands of casks of whisky developing and maturing in Alexander & Macdonald Bonds.

That consequently, Messrs. Alexander & Macdonald never have to bottle "Sandy Macdonald" until it has attained the proper degree of perfection.

That to beat Sandy Macdonald for purity, delicacy of flavor and excellence is a frank impossibility.

YANKEE NINE TO PLAY JAPS. American Soldier Team Will Meet Tokio University.

WASHINGTON, Feb. 3.—A mild invasion of Japan has been authorized by Gen. Leonard Wood, chief of staff of the army, in permitting an officer and three enlisted men to proceed from the Philippines to Japan to conquer the country, not with muskets, but with baseball bats.

The Tokyo University team in the Philippines. This is the first of the American soldiers to be made on condition that the Japanese Government will permit their landing in Japan.

INDOO Baseball.

Last Saturday's winners in the Indo League, Hightstown and Queen's Own, will come together at the arena on Monday, when a duel will be fought between Foy and Matusz, the two best pitchers, will be the item of interest. The crowd for the second game at 3:30.

Nations Who Can't Laugh.

There are whole peoples who can't laugh. The North American Indians, for example, are usually devoid of humorous perception, and when some of the Veddas of Ceylon were asked why they never laugh, they replied that they never saw anything to laugh at. On the other hand, some savages appear to have a more robust sense of humor than their civilized brethren. Dr. Livingstone tells of an African tribe, who, when dressed in clothes for the first time, "rolled about on the ground in uncontrollable fits of laughter."

Slamens. Elephants.

Roughly estimated, the number of domesticated elephants in Siam is about 3,000. The supply has been decreasing yearly and prices have advanced until now full-grown male timber elephants is worth about \$2,300 and a female \$1,500.

MAHER'S Horse Exchange

18 to 28 HAYDEN STREET. "Canada's Leading Horse Market"

AUCTION SALES Monday and Thursday. PRIVATE SALES Every Day.

500 HORSES

Monday, Feb. 5th 300 HORSES. Thursday, Feb. 8th 200 HORSES.

Sale Commencing Each Day at 11 a.m. HORSES OF ALL CLASSES: Heavy Draughts, General Purpose, Express and Delivery Horses, Carriage Cobs, Saddle and Road Horses (Trotters and Pacers).

Advices to hand indicate large and numerous consignments for next week's sales. We are assured of their good quality and our shippers state they have a large number of good mares.

The supply of horses being greater than the demand, prices are consequently easier. Many wise persons have taken advantage of this state of affairs to purchase their requirements—why not you? Never were there better horses coming into our stables or the shipments so numerous. A word to the wise is sufficient.

WE SHALL SELL ON MONDAY AND THURSDAY a number of serviceably sound workers and drivers, also some Cutters, Hackneys, etc., all consigned by city people for sale without reserve. This affords an excellent opportunity to purchase a city-broken horse or a cutter at your own price.

We have for private sale several imported Clydesdale Stallions, they may be seen by appointment. Write, call or phone North 3920.

Also for private sale several second-hand Breughes, Victoria, etc. Further particulars, phone North 3920.

ALL HORSES sold under warranty are returnable by noon the day following sale if not as represented by guarantee.

P. MAHER, Proprietor. GEO. JACKSON, Auctioneer.

MAY BE THIRTY INDICTMENTS

Charges Drawn Up in Dynamite Cases Cover Big Field.

INDIANAPOLIS, Ind., Feb. 2.—(Can. Press.)—Thirty indictments or more, growing out of the investigation into the dynamite conspiracy, have been drawn up, and may be voted on by the federal grand jury next Tuesday. Who are involved will be kept secret until arrests are effected in the different districts in which they reside. The grand jury has completed the examination of witnesses and adjourned until Tuesday afternoon.

It is said the charges upon which the government based its search for evidence were: (1) Violation of the federal laws regulating interstate transportation of explosives; (2) Conspiracy to violate the laws regulating transportation of explosives; (3) Concealment of knowledge of the guilt of those who committed any of the other two crimes.

McManigal, the informer, is believed to be on his way back to Los Angeles.

Jubilee Singers at Massey Hall Sunday The song service at the meeting of the Canadian Temperance League in Massey Hall to-morrow (Sunday) afternoon, is to be conducted by the famous Jubilee Singers, who have been singing in leading churches throughout the province.

Ald. J. A. Austin, Rev. T. J. Glover and others will speak. The service will commence at 3 o'clock, and doors open at 2.15.

Forty Want Positions. The ten new medical inspectorship created by the board of education Thursday resulted yesterday in forty young doctors entering the field for the positions, and all of them are endeavoring to become acquainted with all the trustees. Dr. Struthers, chief medical inspector, is the man who will make the selections, however, and he will do so in the course of a week.

May Yet Out Groux. MONTREAL, Feb. 2.—A recount has been demanded in St. James division, in which Ald. Groux, leader of the notorious "23", was yesterday elected in the civic elections by nine votes.

The reasons given are that more votes were cast for the aldermen than for the mayor in this division.

Even if the recount fails to change the present position of the candidates, the election will be protested on the above grounds.

Fuel Flaming in Alaska. NOME, Alaska, Feb. 2.—(Can. Press.)—Negotiations are under way by the city to bring an ice-breaking steamer here with a cargo of coal to relieve the fuel famine.

The city has almost exhausted its fuel stores and in the ordinary course of events the supply would not be replenished until the opening of navigation in June.

Market Adopts Moderate Pace And Undergoes Little Change

Trading in Wall Street Falls Away Abruptly—Quotations Move in Uncertain Manner.

NEW YORK, Feb. 2.—After two days of rampant speculation, the stock market moved at a more moderate pace to-day. The amount of business traded off abruptly. Quotations continued to move in an uncertain manner, with alternate periods of strength and weakness. Net changes were small with a majority of slight losses.

The occurrence of the day which attracted most attention was the engagement of \$2,000,000 gold bars for export to Paris. The steady accumulation of idle funds here, the demand from abroad and the rise in exchange rates to the highest point in nearly two years had suggested the likelihood of a gold export movement. The announcement came sooner than was generally expected, however. Exchange rates are still below what is regarded as the shipping point. Whether or not further shipments of gold will be made is a question on which bankers are not agreed.

Strain on European Banks. The week's reports of the European banks show some strain upon them. The Bank of England's statement revealed a falling off in the proportion of reserves to liabilities, and it is regarded as probable that the reduction in the discount rate which usually takes place at this time of the year will be postponed. Both the Bank of France and the Bank of Germany reported decreases of gold in hand.

According to the estimate of one banking authority, the total outstanding advances made to foreign markets by American banking institutions exceeded \$160,000,000.

Reading Showed Strength. In the stock market, Reading was the most active issue. In the early trading it rose two points. The continued strength of this stock was still unexplained and perplexed traders as much of the recent pressure on Union Pacific has done. Market Adopts Moderate Pace And Undergoes Little Change

Trading in Wall Street Falls Away Abruptly—Quotations Move in Uncertain Manner.

NEW YORK, Feb. 2.—After two days of rampant speculation, the stock market moved at a more moderate pace to-day. The amount of business traded off abruptly. Quotations continued to move in an uncertain manner, with alternate periods of strength and weakness. Net changes were small with a majority of slight losses.

The occurrence of the day which attracted most attention was the engagement of \$2,000,000 gold bars for export to Paris. The steady accumulation of idle funds here, the demand from abroad and the rise in exchange rates to the highest point in nearly two years had suggested the likelihood of a gold export movement. The announcement came sooner than was generally expected, however. Exchange rates are still below what is regarded as the shipping point. Whether or not further shipments of gold will be made is a question on which bankers are not agreed.

Strain on European Banks. The week's reports of the European banks show some strain upon them. The Bank of England's statement revealed a falling off in the proportion of reserves to liabilities, and it is regarded as probable that the reduction in the discount rate which usually takes place at this time of the year will be postponed. Both the Bank of France and the Bank of Germany reported decreases of gold in hand.

According to the estimate of one banking authority, the total outstanding advances made to foreign markets by American banking institutions exceeded \$160,000,000.

Reading Showed Strength. In the stock market, Reading was the most active issue. In the early trading it rose two points. The continued strength of this stock was still unexplained and perplexed traders as much of the recent pressure on Union Pacific has done. The short interest in the stock apparently was unexplained and perplexed traders as much of the recent pressure on Union Pacific has done.
