## 

## Gentlemen

I have the honor of presenting for your consideration, the eighth annual report of our Institution for the twelve months ending December 31st, 1890.

Its history during this brief period has been one of quiet prosperity. It has been my privilege from time to time to record progress despite serious drawbacks which occurred in the earlier years of the Institution. The year which has just closed has been marked by no event of a retrograde character, nothing having occurred to retard the advancement which the Instiuution has been steadily making since its commencement in 1882.

Its prospects were never brighter. Its circle of friends is increasing day by day. A new and handsome building has risen from the ashes of the old one. The opposition to its erection has long since died out and now nothing is heard but kindly wishes for its welfare and a rod speed to the career of usefuiness which lies before it.

## Attendance.

The following has been the attendance. BOYS.

## NAME. AGE. ADDRESS.

## ADDRESS

St. John, St. John Co. St. Stephen, Charlotte Co. St. John, St. John Co. Bocabec, Charlotte Co. Kent Junction, Kent Co. Indiantown, St. John Co. Springfield, Kings Co. Port Elgin, Westmorland Co. Port Elgin, Westmorland Co. Apohaqui, Kings Co pupils, Hattie May Northrup, of A pohaqui and Howard Breen, of Kingston, have been admitted. We have several applications for the admission of new children, whose parents have been notified that we cannot receive them until our removal to the new building.

## Enstruction.

The work of instruction has been carried on in the usual branches. The officers and teachers have manifested a praiseworthy faithfulness in the discharge of their varied and onerous duties, and the pupils have displayed an appreciation of the efforts put forth to improve their condition and have rendered guidance.

The commotious schoolroom of the new building will be a great relief to our present cramped quarters. The increased facilities which it will afford for grading pupils into their proper classes, will prove an incentive for striving for higher and I
trust lasting results.

As we shall probably have a larger number of pupils when we get setlled in our new premises it will be advisable to secure the services of an experienced lady teacher who would be able to take charge of the lip reading rad articulation department. Should funds permit, it would be wise to make prosystem of teaching.

The ge good. No and colds o They are fo time is give snow shoein no doubt te health.

In 1817 twelve pupil

In 1850 schoois with

Twenty 3,784 pupils

In auot seven Institı boys and 37 deaf mutes

In addit the oldest of educating at structors.

The nun the United S 9323.

The total number who have received an education and been discharged from the Institutions in the States is 20,910 and in Canada 2,564, making a grand total of 32,046 who have or are still receiving benefit from these Institutions established for their welfare.

Previous to 1817 the needs of this class of our fellow creatures were entirely ignored. Imagine their condition in those days of darkness and neglect with what it is to-day What became of them? Shut out from intercourse with their fellowmen, debarred by their calamity from taking part in the affairs and duties of life, all avenues of labor and industry closed to them, pity and contempt clinging to them wherever they went, books, newspapers and periodicals sealed to them, religious services and an intelligent appreciation of the future denied to them! What was left for them to live for? Who can recall the misery of their condition in those days, without rejoicing that this has all passed away and given place to a better state of things. Light has been thrown where darkness reigned. Science has broken their bonds insunder Literature is unsealed. Labor is free and some of the highest positions in ing. The " ears them. Eternity is not without its meana revelation fraught with deaf shall be unstop ped " has become us say the heavy clouds of ignoran possibilities. Thankfully let knowledge has revealed the corance have been dispelled and mortal shall put on immortality."

## Occupations of the Braf.

I am often asked, what becomes of your pupils after they leave school? What trades do they learn? Can they make their own way in the world, or are they dependent on their relatives for their livehood? Are employers generally willing to take deaf mutes into their employ? Is it not very difficult to find suitable work for them? Are they not very troublesome to teach a trade? Have they not very bad tempers? Don't they get mad at times? Are they not very suspicious and think you are talking about them every time they see you look towards them? And a thousand others of simular inport.

Some of these questions imply a settled belief that the deaf
and dumb after they leave school are troublesome customers to deal with, that they cannot learn a trade as easily as others, that they are not worth the trouble of teaching, that time is ton valuable to be spent upon them, that their violent tempers militate against their employment, and that their suspicious looks imply treachery of some kind which it would be well to steer clear of.

I am anxious to correct some of these impressions, and while freely acknowledging that they have faults and grave faults like other people. I would state it as my opinion after an experience of thirty years amongst them in England, Ireland and Scotland as well as in Canada, seeing them as children in Institutions and visiting them as heads of households in their own homes that their faults proceed more from a want of refinement naturally resulting from their limited intercourse with the world around them, than from any innate badness or perversity, that if better understood these impressions of them would be . found to be far from the truth and a liking for their socirty would spring up in which their originality of thought would often be found a great charm.

I am now speaking of them as a class, but when a deaf mute becomes bad, which I am bound to say is very exceptional, he is not amenable to reason, he throws aride all restraint and his actions display a littleness, a meanness, a dogged pertinacity to do evil which comes upon us like a shock and brings discredit upon the class of wbich he is a member.

We are too apt to judge of a class or society by the actions of one of its members, but it is manifestly unjust to condemn a whole village because one of its inhabitants becomes an incendiary, or a regiment of soldiers because one of its officers or men has committed a crime.

Deaf mutes are very observant. They use th ir eyes where we use our ears and I believe learn trades or any work that they nan see performed quite as readily as others. This habit of observation should not condemn them as being suspicious as they have to depend upon it for information. They use it to gain our opinion of the subject of conversation whatever it be and the suspicion, if a.ay, is often with ourselves.

Most of our old pupils are doing well in various walks of life. One is an assistant postmaster. One is a teacher. One is a saddler and shoemaker. Many of them are farmers, following the occupation of their fathers. One evinced such a liking for this work that his father presented him with a hundred acre farm a short time ago that he might start for himself. The girls are all doing well as far as my information goes, assisting their parents at home.

Out of 200 former pupils of one of the State Institutions seventy two became farmers, thirty one shopmakers, thirty laborers. five artists, two stockraisers, two bakers, three housemaids, three clerks, two teachers, one a draughtsman, one a milliner, one a dress maker, one a barber, one a stone mason, one a dairyman, one an editor of a newspaper, one a tailor, one a coalminer and one a millers' assistant. Prof. Draper gives the following table of the occupations of 85 young men who have been graduated from the National Deaf Mute College at
Washington:
Fereman of a daily newspaper,
First assistant postmaster of a leading city and editorial...... 1
writer, ..................

This table shows conclusively that deaf mutes with proper training and corresponding advantages, have capacity and abilities which enable them to fill some of the worthiest positions in life with honor to themselves, advantage to their employers and credit to their teachers.

I am indebted to the American Annals of the Deaf, for the following instances of successful individual effort in three distinct walks of life.

The Taubstummen Courier of March 1, 1890, contains a portrait and brief sketch of John Pacher, a deaf mute of Uhlenhorst, near Hanbury, Germany, who, by his ability and industry, has risen from a humble apprentice to be head of a large lithographing establishment, founded by himself and has received the distinction of being appointed Imperial Commissionswrath. The twenty-fifth anniversary of his entering into business, was celebrated with great festivities on the 10th and 11th of January last, many persons prominent in commercial and political life being present, and others sending messages of congratulation.

The Courier says that in all his prosperity, Mr. Pacher has never withdrawn himself from sympathy with his deaf brethren, but is always ready to lend a helping hand to any $o_{\text {a }}$ them who are in ueed.

## 12

Mr. Alexander Brown, of Union Hill, Nelson County, Va., has recently published a valuable contribution to historical knowiedge, entitled "The Genesis of the United Sitates, (Houghton Mifflin \& Co.,). It is in two large octavo volumes and contains a series of historical manuscripts, now first united together with a reissue of rare contemporaneous tracts accompanied by bibliographical memoranda, notes and brief biographies. The work was begun in 1876 , and as the author says in his preface, has been a long, laborious and expensive task, obliging him to practise every self denial and overcome difficulties which would have baffled many men. The special in. terest of the work to us lies in the fact that Mr. Brown is, and has been for several years. totally deaf.

The higher branches in the field of Art have also been successfully invaded, as the following incident will show. Mr. H. Humphrey Moore, the American deaf mute artist living in Paris has just had a very gratifying proof of the esteem in which he is held by his brother artists. A new salon has lately been established, including most of the leading artists in Paris, the President of which is Meissonier, who is considered the greatest living painter. This society invited Mr. Moore to send pictures to their exhibition, and be, not having any on hand that he felt were up to the level of his best work, sent eleven hoping that one or two of them might pass the rigid examination. To his surprise he received a letter from Meissonier informing him that eleven of his pictures had been accepted for exhibition. This alone stamps him as an artist of the first rank-at least in the opinions of the best artists themselves.

These examples illustrate the results of steady application and show that success can be achieved in a wide range of endeavour, even though the terrible barrier of deafness stands continually in the way, like some grim fortress with the words "no thoroughfare" stamped upon its face, and frowning upon the slightest advance.

## Wibrary and Ellustratibe Apparatus.

A good library will be one of our needs in the immediate future, and a room will be set apart in the new building for this purpose. I trust that friends of the Institution will help us in
this matter periodicals o to good boo pupils, espe recreation is couraged as

The inter workmanlike which a hand walnut, and st right of this cipal's dining sitting room,
this matter by forwarding donations of books, magazines and periodicals of which they may have duplicate copies. Access to good books, will no doubt foster a taste for reading in our pupils, especially in the long winter evenings, when intellectual recreation is largely sought after, and this desire should be encouraged as far as possible.

The deaf learn a great deal from objects, and receive impressions principally through the eye. Illustrative apparatus becomes an important factor in conveying instruction to their minds. A first-class stereopticon, to aid in lectures and illustrate travel, history, botany, etc., would appeal plainly to the eye and be an invaluable means of instruction.

A powerful miscroscope would also be very useful. Specimens of natural history, especially birds, insects, sheils, vegetable products, geological specimens, etc.. to form the nuclens of a small collection, would also be a powerful aid in illustrat. ing daily lessons.

## Ont flew BuilDing.

I gave a short description in last year's Report of the New Building then in course of erection, and also briefly described the site and grounds, indicating the repairs, alterations and improvements which it would be necessary to make in the near future.

The buildlng is now nearly completed, and when it has been taken from the contractor's hands, preparations will at once be made to furnish it and prepare it for occcupation. Its general appearance is pleasing and attractive, and fully equals our expectations. Visitors exclaim, "What a fine building, and how convenient it is in every respect! Its size and commanding position make it one of the most prominent objects on the river.

The interior has been finished throughout in a good and workmanlike manner. The main hall is 36 ft . by 12 ft . from which a handsome staircase, with nowel pillars and rail stained walnut, and stained ash banisters, leads to the third story. On the right of this hall are the reception room, office, libary and principal's dining room. On the left are the parlor, lady teacher's sitting room, and girls' sitting room.

## The $\mathbb{C o c a t i o n ~ o f ~ O u r ~}$ £nstitution.

I do not think we shall ever have cause to regret locating the Institution on the beautiful site at Hawthorn Hill. .

Dr. G B Barron in a paper entitled "Town Life, as a cause of Degeneracy" read before the British Association at Bath, England, compared the results of examinations of Cambridge University Students with those of South Kensingtun.and showed how inferior is the vital force of the town dweller, to that of the dweller in the country. He says "Educate the children in the pure air of the country and plenty of it,and away fly the pale faces, cachexia' lowered vitality, stunted development, muscular attenuation, and imperfect elimination of functional product"

Dr. Peet of the New York Institution for the Deaf and Dumb, says, A plentiful supply of oxygen is the best source of stimulation for both body and mind, causing pure blood to course through the veins, and giving to the deaf mute just what he most requires for counteracting the effects of a scrofulous diathesis which is, to such an extent, the cause of his misfortune"

Principal Crouter, of the Pennsylvania Institution, says : "The site chosen for an Institution for deaf children, should be neither so remote as to make unavailable certain advantages afforded by contiguity to a metropolis or town of an unobjectionable character, nor so near as to allow exposure to the evil influences which appear inevitable to all cities, and agrinst which, notwithstanding the utmost vigilance, it is impossible entirely to protect our youth. It should be perfectly healthy in itself, with contiguous surroundings, free from probahility of lonal causes of imalaria-the insidious parent of a numerous progeny of diseases and where property is not too high priced to allow possession of ample ground for industrial and recreative purposes, with instinted supply of good water for domestic and other purposes. It should also afford good views of the sur-
rounding country, for as the doof of nature's music is closed to deaf children, by the eye alone must they learn of her melodies which, with a prodigal hand should be spread before them."

If these arguments in favor of a suburban site for an Institution for the deaf are correct, as I have no doubt they are, we can but rejoice that the site of our Institution meets all these, requirements ; pure air in abundance, good w ter and plenty of it, ample grounds for recreation, beautiful scenery on all sides, free from malaria and all contaminating influences, then, if no disease is brought to our doors, rosy health should be the bright possession of all our pupils, but, while under the best sanitary arrangements and most perfect conditions, insidious disease will sometimes creep in and carry off our loved ones, it is our duty to take every precaution and let us hope that we shall be able to report a clean bill of health for many years to

## Acknowledgements.

Our grateful acknowledgements are hereby tendered to our local Legislature for the liberal aid rendered to the Institution for the general support of the work since its opening in 1882, building.

We trust that an increased grant will be made at the next session of the House, to wipe off the indebtedness on the building, incurred by some alterations and improvements in the plans and also to prepare for additional pupils who are now applying for admission.

Our thanks are also due to our numerons subscribers in Prince Edward Island, Quebec, Maine and our own Province, who have contributed so cheerfully in aid of its funds during the past year. Their kind wishes for its success are very cheering and we take pleasure in recording thencess are very cheer-

render

We again return sincere thanks to Dr. Brown, for his sind and gratuitous services. The healthfulness of the Institution is causo for sincere rejoicing, and while every possible care is taken to keep sickness from our doors, the doctor's advice and services being always available, it becomes us to aeknowledge a power above all human skill and provision, a propitious Providence who has not withheld from us this priceless and inestimable blessing.

Our best thanks are also due to Mr. Geo. H. Davis, for supplies of free medicines when preseribed, and to Dr. Torrens for gratuitous professional services.

We have received numerous illustrated and other papers: the Maritime Farmer, Reporter, Magazines and Pamphlets for children, Bible Nociety Monthly Reporter and Bible Society Gleanings for the young, from Mr. H. C. Creed, Illustrated books, Chit Chat and Cheerful Hours, from Miss Moffat, Kansas Star and Annual Reports from other Institutions for the deaf in the Old Country, United States, Canada, and valuable Pamphlets relating to our work, from Prof. Alex. Graham Bell, President of the deaf mute college, Washington, all of which have been heartily welcome.

Through the kindness of Mr. Heath, of the New Brunswick Railway, who forwarded a free pass for the purpose, the pupils and teachers had a very pleasant fishing trip to Fredericton Junction on Dominion Day, and the Oromocto, if not quite cleared out, was relieved to some extent, of its superabundance.

The Christmas and New Year's holidays were again spent very enjoyably at the lnstitution. Preparations were made to give the children a good time.

It has always been our endeavour to make them as happy as possible and to give them the enjoyments and privileges of a good home. Their Christmas Tree, and it was a large one, as the boys claim the privilege of selection, as their prerogative, was well loaded with all sorts of useful and ornamental articles and presented an attractive appearance in the centre of the schoolroom, which they had previously decorated with festoons of spruce and paper flowers.

The distribution took place in the midst of animation and uproarious enjoyment and their cheers, as they became the happy possessors of these treasures, were neither silent nor inaudible.

In this connection our thanks are due to Messrs. W. H. Thorne, W. L. Prince and Wm. Kennedy, of St. John, and Mrs. W. H. Clarke, of St. Stephen.

Our thanks are also due to Mrs. S. J. King, of St John, for a parcel of clothing.

On New Year's Day, Mr. and Mrs. G. T. Whelpley accompanied by Miss Whelpley, paid the Institution a short and welcome visit. Food wishes were exchanged on all sides, but the tangible expression of good will lay on Mr. Whelpley's side in the number of parcels of oranges, grapes and confectionery, with which his sleigh was loaded Sir John Allen also sent a nümber of presents by Mr. Whelpley. These kind attentions were thoroughly appreciated and made the day pass pleasantly.

In the evening Charades in the sign language, and parlor games, suitable to our pupils, were indulged in, the teachers entering with zest into these amusements and adding considerably to the enjoyment of all.

In concluding this short report, I congratulate you as the Managing Committee on the increasing prosperity of this Institution, and thankfully record its honorable position among the humave enterprises of the Province.

We can look back upon the past with pleasure and without regret. Our course lay straight before us and to it we have steadily adhered. While much has been accomplished, new possibilities are opening out before us for the future. To educate all the deaf children of our Province who are not yet educated, to surround them with refining and elevating influences, to provide them with the best intellectual training, to animate them with high resolves and noble impulses, is indeed a difflcult task. A handsome building, splendid grounds, healthful location, and thorough equipment, will do much to make an Institntion successful, but so to fit and prepare our pupils, that

## 19

they shall carry themselves with honor in all that appertains to this life, and to clothe them with the "armour of righteousness" that they may realize their responsibilities in the great hereafter, is above and beyond all extraneous things.

May the Author of all righteousness, without whose knowledge not even a sparrow falls to the ground, take the institu tion under His fatherly care and protection, his spirit guiding its destinies and blessing the objects it aims to accomplish.

A LBERT F. WOODBRIDGE.<br>Superintendent.

## To the Directors of the Deaf and Dumb School at Fredericton,

 N. B.
## Gentlemen :

I have the honor to again forward you my annual medical report.

In February, A. D. 1890, one of the pupils had a rather serious case of abscess of the leg, which was attended with much pain and a loss of about five weeks school time to the patient.

In December last a case of Diphtheria developed, but owing to the facilities at our command for the suppression of dangerous and infectious diseases, the contagion did uot spread. This was the cause of this pupil being out of the schoolroom for about four or five weeks.

The above are the only cases of sickness of much importance. The usual colds, coughs and minor accidents have been about what would be expected in such an Institution, inhabited by persons of the age of such pupils, and we are ha $1,1 y$ to be able to state that at this, the close of another year, we are found with our ranks unhroken by death loss.

## I have the honor to be, gentenen.

Your obedient servant
T. LLOWES RROWN.

## 2iterums of (Allutissian.

The Fredericton Institution for the education of the deaf and dumb, is situated at Hawthorne Hill, about a mile below the city.
I. Applicants for admission must be deaf mutes of sound intellect, good moral character and free from any infectious disease.
II. The annual charge is $\$ 880$ a year, payable semi-annually in advance, for which sum is provided, boarding, lodging, washing tuition, medical and dental attendance.
III. Pupils will be received from between the ages of seven and eighteen.
IV. Exceptions to the above will be taken into consideration by the Managing Committee.
V. The session commences on the first of September, and terminates on the first of July. The proper time for admission is at the commencement of the session No pupil to be removed from school during the term, without consent of the Committee.
VI. All the pupils are expected to go home for the midsummer holidays, on the first of July, and to return punctually on the first of September. The Christmas holidays are spent at the Institution.
VII. Parents and guardians are required to furnish their children with a good and sufficient supply of clothing, and to renew the same when needed. Every article must be marked with the childs' name in full to ensure against loss. Parents shoulc deposit a small sum of money with the Principal for the purchase of necessary articles when required. An account of which will be kept and rendered at the end of the session.
VIII. No sleeping accommodation is provided at the Institution for relatives and friends visiting pupils.

## 54

IX. When applying for admission, the following questions should be answered in writing :

1. What is the full name of the child?
2. When and where was the child born?
3. Was he born deaf? If not, at what age did he lose his hearing, and by what disease or accident?
4. Has he had the Measles, Scarlet Fever or Whooping Cough? Has he been vaccinated?
5. Are there any cases of deafness in the same family, or among their relatives?
6. How many brothers and sisters has he?
7. What are the names, occupation, and post office address of the parents? \& 8. Was there any relationship between the parents before marriage?
X. All applications, letters of inquiry, etc., should be addressed to the Secretary, Rev. G. Goodridge Roberts, the Rectory, Fredericton, or to Albert F. Woodbridge, Superintendent at the Institudion.
