CHARLOTTETOWN, P. E. I., Nov. 11, 1878. Mr. James H. Robinson, St. John, N. B. Dear Sir,—By, I may say, almost an accident Dear Sir,—By, I may say, almost an accident, carly this spring, being "confined to my room for mearly three months," and during this time I was under the combined care of "three" of the "most eminent" physicians of "Charlottetown," and by them and my friends given up as "beyond all power" to help me. Dr. Baxter, of Moncton, having occasion to call upon me on business, very naturally observed my state of health, and after fully describing my trouble, which by the doctors attending me was pronounced Dyspepsia or Indigestion, in fact I was so had I could only eat brown bread, and that after being made at least three days, while tea, coffee or milk I dare not touch, and a slice of dry toast would invariably give me the utmost distress. Dr. Baxter recommended "Robinson's Phosphorized Emulsion," and I feel that I owe the public a debt which can only be paid by saying to all similarly afflicted, "Go thou and do likewise;" try "Robinson's Phosphorized Emulsion." To-day I am hearts and strong, and can, without fear, induge in all the luxuriee of a first-class hotel.

### Deferred Matter.

Snoqualmie River, U. T., \

DEAR ADVOCATE :-

I now take advantage of a few leisure moments to drop you a few lines hoping it would interest some of your readers to hear from this western quarter of the globe termed Puget Sound or the Mediterranian of the Pacific. It is common enough to hear the assertion made that Puget Sound is the finest body of water in the world and the assertion is true beyond a doubt. By actual measurement

erable portions of them that are worth cultivation yet remain unoccupied. The climate of the Islands and the mainland is equable and healthy. The soil of the Islands is unusually good but heavy timber often makes it unavailable for farmber of the minto kindling-wood. Heavy timbers were carried several hundred yards through the air and fell end downward, and stuck several feet into the ground. The storm lasted less than two minutes, but twenty business houses and dwellings were levelled. Islands is unusually good but heavy timber often makes it unavailable for farming operations. A few words will recapitulate some of the leading products of the Sound country. Lumber and coal go forth by shipload every day, iron is manufactured near Port Townsend and this work is only in its infancy. Oats, potatoes and hay form the great staple of farm products but hops are becoming an important product. The fisheries of the Whole New England States. Fish and fish oil, products of the hog, the fruit of the dairy and orchard, all this swell the commerce of this region, in addition to many other articles I cannot name. Sheep and wool and stock and their increase constitutes a growing increase of wealth and prosperity.

Wherever I went on Puget Sound, I asked the question how a man could do who came here with a little money, and always received the same answer, that a man with money and always received the same answer, that a man with money and good judgment.

always received the same answer, that a are on the frontier men who have not the judgment and perseverance that win success, but spend their lives paving the way for others. They do what they can, become involved and prefer a sum of cash in hand with which to make a new start to working on under a pressure of debt. The wilds are all-alike to them and they pack their traps and move off to a new prospect with as much indifference as they would remain at their old home. Times are good here now for men that can work in a logging camp, from \$55 to \$85 a month are the wages for laborers and from \$100 to \$110 for ox-teamsters. I must conclude by statox-teamsters. I must conclude by stating that I am well satisfied with this country and hoping you will publish this in your valuable paper, I remain,

A Foolish Attempt.

agricultural interests. Some 256 answers have been returned and the Globe hails them as an expression of public opinion against the tariff.

The circulation claimed for the Weekly Globe is 51,750; out of this number 256 reply barely a third even of the odd hundreds, not one in two hundred of the whole circulation. And yet with the coolest eff ontery the percentages of this mere handful are gravely tabulated and we are asked to consider the result as an index of public opinion. It is of course apparent that the readers of the Globe, even if all of them answered, would not be a fair criterion of our general agricultural population.

An overwhelming majority of them
must sympathize with the politics of
the organ they select for their information—a vast number of them read nothing but the Globe with its falla. cious arguments against the tariff. and too often its wilful misstatements of facts in regard to it. Yet a considerable percentage of these preju-diced men are not deluded by the sophistries of their organ and disagree

of their party. They are well content ed with the present state of affairs and they cannot be cajoled into stating otherwise. The facts have more weight with them than the sophistries of even their chosen journal .- Peteroro Review.

Arctic Exploration-Burning of the " Rodgers."

A correspondent at Irkutsk teleraphs to Washington as follows: lave received startling news from fackson, special commissioner sent in earch of the "Jeannette" survivors. le apparently forwarded the despatch as follows:-From Banks of Alder River, April 6th. Have just met a onrier bearing despatches from Mr. W. H. Gilder, Herald correspondent with the "Rodgers," whom the courier companied from Kolmyst on Kolina River to Verkboyansk, four hun red miles north of Yakutsk. Gilder as made a journey of two thousand ersts among the Chuckches; he was ent forward with the news that the Rodgers" had been burned and sunk. nat Lieut. Berry with the officers and ew of thirty-six in number, are at iapka, near Cape Serdze, and that a essel should be sent for them as soon

It has been decided to send the U.S. teamer "Irequois," now at Mare Is-and, California, to the relief of the fficers and crew of the "Rodgers" at near Cape Serdze, a house was built by the crew of the "Rodgers," and a party of six left for the winter. They were well supplied with provisions, clothing, dogs, sledges, &c. When the "Rodgers" was burned at St. Lawrence Bay, the officers and crew naturally went across country to Cape Serdze to camp with their comrades There are a number of settlements near Tiapks, but no way of communicating with this country other than by I now take advantage of a few leisure the route taken by the courier across

It is seldom that a more dishonest and at the same time ludicrons attempt to misrepresent public opinion, has even been made than that recently adopted by the Globe.

The readers of the Weekly Globe were called upon to send to the editor specific replies to the questions in the circular sent out by Dr. Orton's committee on the effect of the tariff on the agricultural interests. Some 256 an-A Public Meeting should be called of

diced men are not deluded by the sophistries of their organ and disagree with it in this matter. But what of those who do not take the trouble to avail themselves of this favorable opportunity of stating their grievances and complaining of the heavy oppression to which we are told they are subjected? It is very evident that if there is any pressure at all, it is not very severe or very keenly felt.

The truth is that this new aftempt of the Globe is a complete failure. The result shows that the farmers of the Reform party are in many cases openly favorable to the present tariff, and that the great majority of them have no complaints to make, even when implored to do so for the benefit there implemented to the present tariff, and that the great majority of them have no complaints to make, even when Alley's Lung Balsam will prevent it is not care them with their own medicine, we would recommend to give Alley's Link Balsam at true.

in the world and the assertion is true beyond a doubt. By actual measurement the meandering of the shore line extends for 2000 miles. All along the waters of Hoods Camal and the South side of the straits of Fuca the sheres are abrupt and mountainous, offering little if any room for settlement, with the single exception that the Skokomich River comes in at the head of Hoods Canal, affording a valley of limited extent that is made use of already as a settlement. The great extent of arable land lies on the south and east and especially on the east shore where the numerous rivers and their fertile deltas offer extraordinary rewards to where the numerous rivers and then to thing within the radius of several this deltas offer extraordinary rewards to thing within the radius of several hundred yards up into the mouth of the San Juan County consists of the Islands funnel. It laid everything to waste in its path. Two-storey brick business mas, and other smaller ones which have many blooms were picked up like straws and catalogues.

These are carefully selected. VERY CHOICE, comprising every variety indigenous to the climate. For particulars see our bounces were picked up like straws and mas, and other smaller ones which have some cultivation on them and raise many sheep and cattle. The products of the Islands are eats, fruit, potatoes, vegetables of all kinds, and hay, and considually some distance and dropped, smashing them into kindling wood. Heavy time
