### NEW EDUCATIONAL LEGISLATION

Teachers' Salaries Substantially Increased Throughout the Entire Province

[Journal of Education] The Education Act has been consolidated by the Nova Scotia Legislature this winter.

One important change is the fixing of the 50 cent rate on all Municipalities for the municipal school fund, which will henceforth pay \$50 to trustees for each teacher employed.

The legislature imposed on the C. P. I. the power of fixing minimum salaries for teachers who generally have been robbed by the rising of the cost of living beyond the advance of salary. Teachers are unable to protect themselves by unions, because the government controls the licensing of teachers. The remuneration in other provinces, and in other vocations in this province, threatens to eliminate all the able and progressive young teachers who had entered the profession, and exclude those who might otherwise enter. A strong delegation of leading citizens from Halifax and Dartmouth and representatives from other parts of the province, addressed the Government, the House of Assembly and the Legislative Council on the subject, with the result that every one expressing himself felt the best interests of the province required a more generous protection of the teaching profession.

### THE MINIMUM WAGE

The C. P. I. is seriously considering the new Regulations which cannot be passed before the issue of this Journal. The superintendent feels that in the meantime teachers and trustees should be prepared for a very substantial increase of salary.

The Municipal Fund next year will be increased. No school is likely to be recognized, which would reduce the local taxation on this account.

Some of the ablest authorities in the province were strong in supporting the increase of salaries under \$200 from the trustees by 50% in order to enable the school to be conducted according to law.

Salaries from \$300 to \$400 should be increased at least 40% on the average of the previous 5 years. Salaries from \$400 to \$500 on the average of last 5 years should be increased 30%. Those from \$500 to \$1,000 by 20%, and those \$1,000 and over, at least 10%.

Another principle maintained was that no third class teacher should receive less than \$300 from trustees (exclusive of Provincial Aid). And that the minimum for each higher class should be a regular advance of at least \$100 on the minimum of the class below.

No difference in the minimum on account of sex was considered to be necessary. If male teachers are preferred anywhere to female teachers, trustees can employ them for they will be at a premium.

Such regulations would have no force unless non-compliance resulted in the schools being considered as not conducted according to law; and the teacher making any agreement at variance with the regulation would thereby have her license suspended.

In the voting of money at the annual meetings trustees have to estimate on the probability of some such regulation; and teachers in corresponding should bear these forecasts in mind. Some such regulation there must be to carry out the general feeling of all the authorities who have given time to discovering the fairest course to teachers and people. Their affairs, if the remuneration is so small that only a few competent can be found to take up, or continue in, the profession.

It must be remembered, however, that the new regulation when finally passed, may be very different from the possibilities indicated above; but it will be useless unless it very substantially increases salaries, and closes schools in sections too weak to be then rightly set off by themselves.

NO PERMISSIVES

It is very probable that the granting of Permissive licenses will cease henceforward in connexion with the minimum salary regulation. At least no "Permissives" can be granted unless the salary conditions are maintained.

Died in Halifax

Word has reached here of the death of William Thomas, of Nictaux, who died in Halifax Monday, following an operation for appendicitis. He was 54 years of age and leaves a wife and family. He is also survived by his aged mother. Mr. E. V. Thomas, of Middleton, is a brother of the deceased.

The folly of saving a few dollars on such an essential item as a Typewriter—a saving that becomes an expense bill in a few months, was never so apparent as in these days of real economy, where the best typewriter, the Remington, is really and truly the cheapest.

A. MILNE FRASER, Halifax, N. S.

### IMPORTANT NOTICE

Surplus Stock of Flour and Sugar Must be Returned

The Nova Scotia Committee of the Canada Food Board has received official notification from Ottawa that the regulations requiring the return to dealers of surplus stocks of flour and sugar must be complied with according to the Order. Otherwise consumers and others are liable to heavy fines not exceeding \$1,000 and not less than \$100 each, or imprisonment for a period not exceeding three months, or to both fine and imprisonment.

Persons holding these excess quantities after May 15th, not returned to their dealers, will have them seized and forfeited to the Crown. Local police officers are required to enforce the law.

The regulations state, among other things, that no person shall have in his possession more sugar than is sufficient for his ordinary requirements for a period not exceeding 15 days, except that a person living more than 2 miles and less than 5 miles from the dealer may have sufficient for 30 days; or living more than 5 miles and less than 10 miles from the dealer may have a sixty days' supply; or living at a distance greater than 10 miles may have a supply for one hundred and twenty days.

Manufacturers using cane sugar in the manufacture of their products, and licensed wholesale and retail dealers, may have not more than is sufficient for their ordinary trade requirements for a period not exceeding 45 days.

According to the Order-in-Council, the dealer from whom the product was purchased must accept the same, if in good condition and pay for same at the purchase price or at the current market price, which ever be the lower.

Licensed wholesale or retail dealers may have flour, wholly or in part from wheat, sufficient for ordinary trade requirements for a period not exceeding sixty days.

The order also prohibits the feeding of milling wheat or any product thereof, excepting Bran and Shorts, to live stock or poultry, unless the wheat be grown with other grain when the mixture shall not contain more than 25 per cent of wheat.

Dealers in flour are required forthwith to report to the Millers Committee, 178 Queen Street, Ottawa, the quantities of flour held in excess of their requirements for 60 days, to state the name of the miller manufacturing the brand, the date of purchase, the person for whom purchased, the price paid and their requirements for the months of May, June and July.

The Miller is then to arrange to purchase the flour from the dealers. Further, consumers are not allowed after the 15th of May, to purchase flour in excess of the amounts prescribed for their requirements.

Increased Production in Annapolis Valley

That the people of Annapolis Royal and in fact the whole Annapolis Valley are doing their utmost to make the greater production movement successful, and thus enable the Allies to defeat the Huns, was the assurance given a Halifax Chronicle reporter by George E. Corbett, of Annapolis Royal.

He says that every inch of ground in that place is being cultivated, and that it is the same with the whole of the Annapolis Valley. The people everywhere are alive to the need of greater production and men, women, girls and boys are spending either their entire time or their spare moments in helping to cultivate the land.

Already large tracts of land have been broken up, and in some districts the ground is in condition for seeding, while other districts are rapidly drying up. Mr. Corbett said that he expected the crops this year to be as early as any other year, if not earlier.

Not only were the people of Annapolis Royal cultivating their land, but they had given their attention to hog raising and a great majority of the residents were doing their bit in this manner as well.

A Nice Piece of Work.

There has recently been erected a monument in St. Alban's Cemetery, LeQuille, to the memory of Elizabeth Hall Shaw, aged 92 years, mother of Mrs. T. C. Mellor, St. Luke's Rectory. On another side of the monument is found the name of Lieut. Frederick Courteney Mellor, killed in action, July 1st, 1916, aged 28 years. This fine piece of work was executed by C. M. Hoyt, of the Middleton Granite and Marble Works, and is highly spoken of by those who have seen it.

Field Marshal French is now in supreme control in Ireland, and will put the country for the first time on what may be described as a war footing.

### SOLDIERS' COMFORTS ASSOCIATION

Annual Meeting Recently Held at Lawrencetown—Officers Elected, Etc.

The annual meeting of the Lawrencetown Branch of Soldiers' Comforts Association, met at the home of Mrs. H. H. Whitman on Wednesday evening, May 1st, 1918.

The following officers were duly elected, viz:

President—Mrs. R. Blauveidt.  
1st Vice Pres.—Mrs. E. H. Freeman.  
2nd Vice Pres.—Mrs. F. Morris.  
Secty.—Mrs. H. H. Whitman.  
Asst. Sec.—Miss A. Phinney.

Executive Committee—Miss Laura West, Mrs. J. Shaffner, Mrs. F. E. Bishop, Mrs. O. Graves, Mrs. Jennie S. Whitman, Mrs. L. R. Morse.

The meetings have been held fortnightly at homes of members and have been both profitable and full of pleasure as well.

Much credit is due a number of ladies in Albany, specially Mrs. Ralph Veinot for their untiring efforts in assisting at knitting and sending many comforts to our brave boys, engaged in trench warfare.

Number of members ..... 30  
Number of pairs socks sent to headquarters ..... 325  
Number pounds yarn received ..... 105  
Amount of cash contribution ..... \$46.00

Beside these we have sent liberal donations of soap, towels, face cloths,

tobacco, cake and fudge to be sent directly to the front.

We trust we may be able during the ensuing year to do even more for this worthy cause, as so many of our own boys are daily being added to the Canadian Army.

MRS. H. H. WHITMAN, Secty. & Treas.

Cincinnati Authority Tells How to Dry Up any Corn or Callus so it Lays Right Off.

You corn pestered men and women need suffer no longer. Wear the shoes that nearly killed you before, says this Cincinnati authority, because a few drops of freezone applied directly on a tender, aching corn stops soreness at once and soon the corn loosens so it can be lifted out, root and all, without a bit of pain.

A quarter of an ounce of freezone costs very little at any drug store, but is sufficient to take off every hard or soft corn or callus. This should be tried, as it is inexpensive and is said not to inflame or even irritate the surrounding tissue or skin.

If your wife wears high heels she will be glad to know of this.

Killed in Action.

Word has reached here that Pte. Fred Prescott Henshaw, son of Sim Henshaw, Centrelea, was killed in action, May 13th. No further particulars have yet been received.

## GRANVILLE CENTRE

May 14th  
Mr. Rupert Troop is recovering from an attack of mumps.  
Mr. Robie C. Gilliat has enlisted in a Battery Signal Battery and leaves this week for Halifax.  
Mrs. Kenneth Allen and little son, of New York, are guests of her sister, Mrs. V. Arnold Eaton.  
Little Miss Jean Ludie, of Tupperville, has been spending a few weeks with her grandparents, C. E. Wickers, Mr. and Mrs. Arthur C. MacLean, son and daughter, of Margareville, spent Sunday with their daughter, and sister, Mrs. LeRoy Willett.  
Mrs. Chester Wade and two children are visiting her parents, Mr. and Mrs. C. E. Withers, en route to Halifax, where Mr. Wade has lately removed from Quebec.  
Mr. H. D. Bent has purchased from Mr. Harry Reid, Granville Ferry, the property formerly known as the Walter Willett home and will remove there very soon.  
Mr. and Mrs. Arthur M. Lyett came from Kempville, Yorkmouth Co., last week to attend the funeral of the latter's brother, Mr. Robert H. Troop, and returned home the following day.  
Last week, Rev. I. Brindley purchased from Mr. Avarid Beeler, Bridgeport, an Overland car. With his extensive field of pastoral work, this will greatly assist him in getting over the ground.  
Rev. L. P. Wallace and wife will commence a series of evangelistic services next Sunday evening, May 19 at Port Wade. Mr. Brindley, the pastor, will preach at Granville Centre at 7.30 same evening.  
The heartfelt sympathy of the entire community goes out to Mr. and Mrs. William W. Troop and family, in their sudden and sad loss in the passing away of their only son and brother. Robie will be greatly missed in the Methodist church, of which he was a member; also in Seymour Division, S. of T., but it is in the home where the sorrow is most keen and the loss irreplaceable.

[Occasional Correspondent]  
Mr. George M. Bent spent Saturday with friends in Bridgetown.  
The many friends of Mr. Rupert Troop are glad to see him out again after an illness of several weeks.  
Mrs. H. Calnek enjoyed a visit on Sunday from Mr. and Mrs. H. W. Longley, who came from Paradise in their auto.  
Our popular blacksmith, Mr. F. E. Roney, has just added much to the value of his property by purchasing adjoining land from Mr. C. E. Withers.  
Recent visitors in the village were Misses Mabel and Lillian Bohaker, of Granville Ferry; Prof. Gates, of Boston, and Miss Lucy Chesley, Upper Granville.  
We regret to report Mrs. J. C. Withers, who was rapidly recovering from a surgical operation in St. John, not so well, and quite unable to return home as was anticipated.  
Mr. and Mrs. Archie Chute and children, of Bridgetown, spent Sunday with Mr. and Mrs. A. L. Gilliat. Mrs. David Gilliat, of Granville Ferry, was also a visitor at the same home.  
St. John cattle buyers, who we hear, have purchased everything across the river, are expected on Saturday. No doubt their visit will be satisfactory as our farmers never price their stock too high.

## MARGARETSVILLE

May 14th  
Rev. and Mrs. Gage attended the Convention at Middleton.  
Mr. and Mrs. J. A. Balcom and Mrs. H. S. Carey visited Mrs. C. S. Balcom, of Lawrencetown, recently.  
Mrs. James Cook, who has been visiting her daughter in Boston and New York, returned home Saturday.  
Mrs. Geo. Beck, who has been visiting her sister, Mrs. H. B. Moody, has returned to her home at Nictaux.  
Mr. and Mrs. J. White, who bought Mrs. Simon Harris' farm, have taken possession. Mrs. Harris will live at Wilnot.  
Mrs. Seleda McNeily, who spent the week-end at her home in this place, returned to Wilnot on Sunday to remain a few weeks.  
Mrs. Lamond Harris and Mrs. Annold Harris, of East Margareville, have moved in the "Willow House," where they will spend the summer.  
A concert was held in Orange Hall Thursday evening, May 16th. The programme consisted of piano duets by Miss George and Mr. C. E. Balcom; readings by Miss Whitman, Miss Fair and Miss Parker; solos by Miss Reid. Proceeds for Y.M.C.A.  
A very successful "Cafeteria" tea was held in Orange Hall on Saturday evening, May 4th. An interesting feature of the evening was a guessing contest. It was proposed to guess the weight of a pie. The nearest guesser resold it, whose example was followed by several others until the sum of \$10.00 was realized from the sale of the pie. The total proceeds amounted to \$72.00 for the benefit of the Y. M. C. A. fund.

"No Needles to change"

YOUR full enjoyment of any phonograph played with steel needles is marred by your constant state of watchfulness to change needles.

Furthermore a steel needle with its sharp point digs into the record, wearing both record and needle. A genuine polished sapphire ball glides smoothly into the grooves. It is permanent and does not wear the record (a Pathe Record will play at least 1000 times without impairment).

A steel needle has one point of contact with the record—limited contact, limited sound waves.

A sapphire ball touches the record groove at 40 points—and every delicate shading of the original music is faithfully recorded.

If you are planning to buy a phonograph, hear the Pathephone. If you already have a phonograph, it can be easily equipped to play Pathe Records.

REGISTRATION BOARD

DETERMINING THE MAN AND WOMAN POWER OF CANADA

Military Data Will Be Secured—One of the Beneficial Results Will Be a More Efficient Organization of the Agriculture Forces of the Country.

The Canada Registration Board has been created under the presidency of Honorable Senator G. D. Robertson for the purpose of carrying out the registration of the man and woman power of Canada, in order that the information so obtained may be utilized to proceed intelligently with the mobilization of the entire resources of the nation towards the successful prosecution of the war.

Registration Day, the date of which will be fixed later, probably a Saturday in June, will give every Canadian effected by the law an opportunity to perform the great national duty of citizenship.

Registrars have been appointed for every federal constituency; these in turn will appoint deputy registrars and assistant deputy registrars in sufficient number to register the entire population.

VOLUNTEER ASSISTANCE ENCOURAGED

In order to facilitate this gigantic task, Councils, School Boards, Boards of Trade, Labor and Fraternal Organizations, Patriotic and Red Cross Societies, are invited to assist the registration officials in every possible manner.

REGISTRATION A NATIONAL DUTY

While non-registration entails many penalties of the most serious character, it is expected that the Canadian people will look upon registration as a great national duty, to be performed not out of compulsion, but rather in a spirit of pure patriotism.

REGISTRATION WILL STRENGTHEN MORALE OF THE ARMY

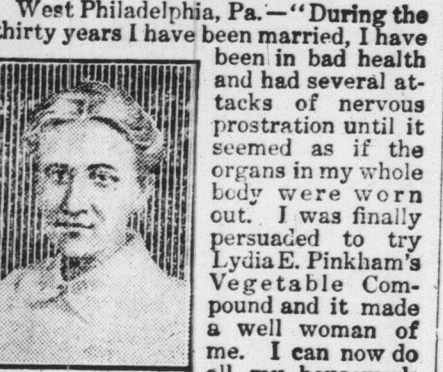

The few minutes required for registration, or the one day's salary donated by the willing workers, will be a small sacrifice indeed compared to those now being made by Canadian manhood in the forefront of the battle line.

For the purpose of registration all

Nature's Healing Herbs for Headache. A BLOOD FOOD. PRACTICALLY all headaches come from two causes—Biliousness and Nervousness. Bilious headache means upset stomach, and constipation—with severe throbbing pains all over the head. Nervous headaches mean that the nerves are exhausted and need rest and food.

NERVOUS PROSTRATION

May be Overcome by Lydia E. Pinkham's Vegetable Compound—This Letter Proves It.

West Philadelphia, Pa.—"During the thirty years I have been married, I have been in bad health and had several attacks of nervous prostration until it seemed as if the organs in my whole body were worn out. I was finally persuaded to try Lydia E. Pinkham's Vegetable Compound and it made a well woman of me. I can now do all my housework and advise all ailing women to try Lydia E. Pinkham's Vegetable Compound and I will guarantee they will derive great benefit from it."

There are thousands of women everywhere in Mrs. Fitzgerald's condition, suffering from nervousness, backache, headaches, and other symptoms of a functional derangement. It was a grateful spirit for health restored which led her to write this letter so that other women may benefit from her experience and find health as she has done.

EDUCATION NECESSARY

It is particularly desirable that clergymen of all denominations, members of Parliament, School teachers, professional agriculturalists and members of other professions, Journalists, Captains of Industry, Members of Council, in short all those who by reason of their social position wield great influence, should make known the requirements and the purposes of registration, in order that a false conception of its import may gain ground, or jeopardise its success.

THE CALL AND THE RESPONSE

The people of Nova Scotia responded nobly to the urgent demands of the war; large numbers of their best young manhood have left, and are still leaving for the front; they many be found in all the different army services; many have made the supreme sacrifice, others have been wounded or invalided by sickness; all have gained imperishable renown on the blood-stained fields of Ypres, St. Julien, Lens, Festubert, Arras, Vimy, Passchendaele and elsewhere. The record of their achievements is the immortal heritage of this Province for all time.

GEORGE E. CORBITT, Superintendent of Registration.

Sailor Son Killed As Father Goes to War

BOSTON, May 20—A navy department message, arriving ten days after her husband had gone to join their boys in the war, notified Mrs. Julia C. Woodworth, 34 Pleasant street, Hyde Park, that one of the boys is dead.

This was Horace C. Woodworth, chief radio officer of the U. S. S. munitions ship Florence H., blown up in a French port about two weeks ago. This boy was reported in the list of explosion casualties as slightly burned. The message of last night said that he died Friday and that he had been buried with military honors in a military cemetery. The message did not state where he died or designate his burial place.

The youth, only 18 years old, was a star athlete at Hyde Park High school. He came back to the school in his navy uniform to receive his diploma last June. He had enlisted in April. He was captain and pitcher of the baseball team, quarterback on the football team, and was a member of the track team.

Douglas P. Woodworth, brother of the dead radio man, is serving with the Canadian Black Watch regiment. The father, Todd C. Woodworth, a mining engineer, enlisted in the Canadian forces at the Boston recruiting office 10 days ago and went forward to join his regiment immediately. He is a son of the late Douglas Woodworth, of Kentville, N. S. There is a daughter home with the mother.

WILL IT PAY TO SPRAY IN 1918?

[By G. E. Saunders, Dominion Entomological Laboratory, Annapolis Royal, N. S.]

The above question is agitating the minds of many apple growers at the present time.

The prospects are that some of the sections that Nova Scotia supplied with apples in 1917, will themselves, have a moderate crop for their own use in 1918. It is more than probable that the major portion of this crop will be of poor quality if the season is in any way normal for the development of apple scab.

The paramount question in many minds is the question of price in 1918. Although we do not consider that the question of price for 1918 should be the dominant factor in influencing us to or not to spray in 1918, let us examine the point for what it is worth. What do we know about the 1918 price? In 1916, people expected normal prices for potatoes when they dug the crop, before the next spring many potatoes were sold for around \$8 per barrel. In 1917, people expected high prices for potatoes and many growers sold in the field for \$4 per barrel. Today, any quantity of potatoes can be bought for \$1.50 per barrel and less. In July, 1917, many farmers cut their hay, not expecting to be able to dispose of it in 1917-18 for the cost of lathering.

In November, 1917, many lots of hay sold for \$7 per ton loose. Within the past week hay has sold from the barn, in the same districts for \$19 per ton. In 1914, the general talk was "Apples will bring nothing," yet we got fair prices. In 1915, the talk was even worse and we got better prices. In 1916, the talk was that apples would scarcely be worth picking and we got better prices than ever. In 1917 many expected low prices for apples during the spring and summer, but when the crop outside became known and outside buyers came to the country, expectations were changed, everyone looked for high prices. With strange buyers bidding against each other in new territory for fruit, with which they were not familiar, prices were forced too high and apples were not consumed as they should have been early in the season. As Messrs. Carey and Vroom express it the price nailed the barrel too tightly to the warehouse floor. It prevented apples from moving and apples were consumed by the classes only and not by the masses. The result was, apples moving too late or out of season the year through, a glut at the prices, which is causing untold loss to both growers and speculators.

What does any one know as to the price of apples in 1918? We know the quantity of apples consumed by the most widely, and is influenced almost wholly by price so we can rest assured that if the price is low, say one-half that of October, 1917, apples will be used as a food and not a luxury, and will be consumed by the masses as well as the classes and the consumption will be enormous.

We expect that the quality of apples produced in many sections will be below normal. In order to keep well up to the mark, we must have our quality as high as possible. It has been amply demonstrated in the past that spraying and the growing of clean fruit pays even better in years of large crops than in those of small crops, for good quality apples have some chance of good prices in years of plenty, while poor quality apples have practically no chance in such years. Aside from the possibility, which every man must judge for himself, of every man must judge for himself, of our 1918 crop in our normal market, London; the most important consideration is the effect of spraying or not spraying on the crop of 1919. We know, and are able to state definitely, that in Nova Scotia the greatest benefit from spraying comes from increasing the crop the year following the application of the spray. If we are to get a good set of apples, we must have strong fruit spurs and buds. To get them the leaves must be retained late the previous season and in order to get the leaves to stay on late, we must keep them free from fungus diseases by spraying. This is absolutely the most important consideration in spraying in Nova Scotia, and by neglecting spraying in 1918 we are, if the season is at all normal, insuring a smaller crop or a failure for 1919.

We know the demand and need for other foods than apples and will make the greatest efforts to produce potatoes, beans, grain, etc. We know that there is a labor shortage, but the spray gun amounts to more than saving a man in spraying. We know that our apples, if not sprayed, will be run sprays as low as eight per cent on the average. Spraying costs about 20 cents per barrel. Would any one put the difference in value between unsprayed apples and free run sprays at less than 20 cents per barrel? We think not. The orchards of the Annapolis Valley, have been termed by Prof. M. Cumming, as the big permanent asset of the valley. We know that our orchards, taking the section as a whole, are probably in better shape than any others in America, on account of ours having been cared for during the past three years, while other sections neglected their orchards to a greater or less extent. We expect to be paid for this care by having, when peace is declared, orchards in good condition and producing good fruit. Can we afford to lose all this advantage by neglect in 1918?

Girls! LEMON JUICE IS SKIN WHITENER

How to Make a Creamy Beauty Lotion for a Few Cents

The juice of two fresh lemons strained into a bottle containing three ounces of orchard white makes a whole quart of the most remarkable lemon skin beautifier at about the cost one must pay for a small jar of the ordinary cold creams. Care should be taken to strain the lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach, soften, and remove such blemishes as freckles, sallowness and tan, and is the ideal skin softener, whitener, and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quart of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands.

MARTIN-SENOUR PAINT & VARNISHES. The Paint That Costs The Least. is the Paint that covers the greatest surface—that takes the shortest time to apply—that wears the longest. Martin-Senour "100% Pure" Paint does all three. Here's the proof. "100% Pure" Paint covers 900 square feet of surface per gallon. Hand-mixed-lead-and-oil, and cheap prepared paints, cover only about 500 square feet. The greatest cost of painting is for labor. It takes less time to apply Martin-Senour "100% Pure" Paint because its fine, even texture spreads much easier. Why use cheap paint—that is expensive to put on—when Martin-Senour "100% Pure" Paint wears nearly twice as long? If you are painting this year, you'll be interested in our books—"Town and Country Homes" and "Harmony in Neu-Tone". Call or write for copies—free.

### Western Canada's Live Stock Trade Increasing

(1) Calgary Stock Yards. (2) First Prize Angus Bull.

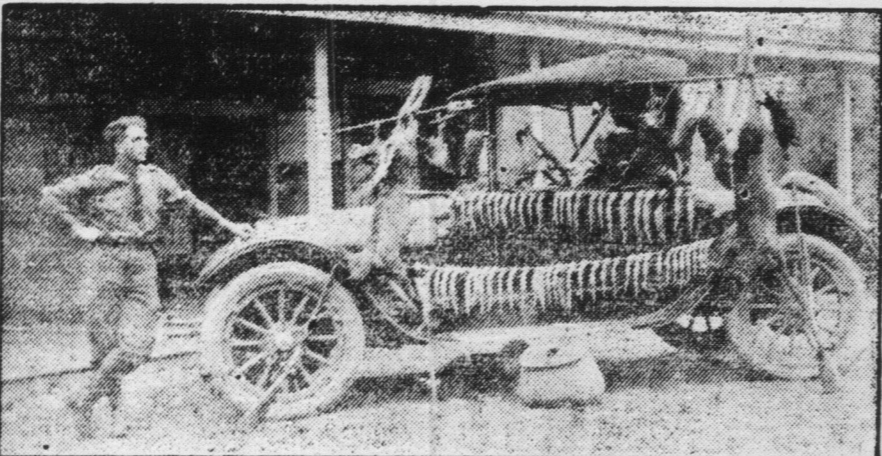

THE effects of the increased production campaign in Western Canada are already noticeable. All over the country farmers are enlarging and improving their herds, while many others, desiring to emulate their success, are entering mixed farming in earnest. Besides feeling it a patriotic duty to produce as much food as possible, more and more farmers are finding that mixed farming in Western Canada pays. Of course, this is not a new realization. The most successful farmers of the West are those who have divided their attention between grain grow-

ing and live stock raising, but the possibilities of quick returns with the former have blinded many to the advantages of the latter. Notwithstanding the high prices now being obtained for wheat, oats and other grains, prices which a few years ago were undreamed of—mixed farming is becoming increasingly popular among the farmers of Western Canada. Nothing is too good for them. They have money to invest and are investing it wisely with an eye to the future. The country is continually being scored for well bred animals. Just now word has been re-

ceived that more than a hundred pure bred Aberdeen-Angus females and bulls from the best herds of Iowa and Illinois have been loaded for shipment to Western Canada. These are choice specimens from the herds that have been producing the grand champion carloads and individuals at the International Live Stock Show; they will become seed stock for the farms and ranches of the Prairie Provinces. The movement of pure bred stock to Western Canada is going on continually—from day to day, from week to week. To-day it is Aberdeen-Angus and Shorthorns, yesterday it was Jerseys and Herefords; last week all these and other breeds as well. One day dairy cattle predominate, another day beef cattle, and another dual purpose animals. They have brought from Eastern Canada, from all parts of the States, from England and Scotland, and even from other parts of Europe. Already possessing some of the largest and most valuable herds of particular breeds of cattle, the Western Provinces of Canada bid fair to become one of the greatest cattle countries in the world. They have every advantage for the raising of cattle economically—healthy climate, low priced lands on which grow nourishing foods, an abundance of clear water, convenient markets, etc. And, what is more important, these advantages are beginning to be fully recognized by the settlers, who are making use of them to their own and the country's profit. —R. J. C. S.

### A Somewhat Forgotten Asset

IN these hard times, it is necessary to gather together and examine all our assets, and although the Dominion is the lucky possessor of so many natural ones, there are still many which people have not yet realized that they have, and amongst these is the asset of sport and game. It is quite possible for the unimaginative person to say that sport cannot possibly be an asset. There is hardly any portion of the country that does not satisfy the most enthusiastic fisherman, and further it contains several districts, especially in British Columbia, which have become noted all over the world. A glance at the register of the small lodge at Fish Lake, near Kamloops, will show that people have come from all over the world, and on taking the average it will be found that more people from outside the Province of British Columbia camp there than those who live in it. This lake, it might be mentioned, contains genuine rainbow trout, which are taken practically only on fly and their gameness is a thing to wonder at. It is not at all uncommon to see a fish jump eight or nine times after it has been hooked. Then there is the Thompson River, which contains, or has the reputation of containing, the largest trout in British Columbia. In this district duck, geese, and when there is no close season, grouse can be killed in quantities that should satisfy the most ardent sportsman. To the south is to say nothing of lynx, coyotes, and other such animals. Then there is the Nelson District, which is the centre of the Kootenay country, and from which place, one can reach the celebrated Bonnington Pool and Bonnington Falls. The fishing here is very good indeed, and the best way to describe its popularity amongst the people of that district is to merely state that the C. P. runs a special train there on Sunday mornings and evenings. There game here, too, deer are easily obtainable in the surrounding district. Sitka, too, is another large field for the sportsman. This little settlement, which is the junction for the Okanagan, is situated on the shores of Shuswap Lake, the waters of which contain many kinds and species of fish, and the shores of which are the mecca of many bear hunters, to say nothing of the wild ducks. The newly completed Kettle Valley Railway has opened an entirely new district for the lover of cut door sports, and one has only to glance at the map and they will see that there are numerous lakes, small rivers and streams, some of which have never been fished. What more could an angler wish for? Game is plentiful here also, more especially round what is known as the Coquihalla Pass and into what is termed the Skagott, and the country surrounding Skagott Lake. This is quite easy of access for the people who live in Vancouver.

A day's fishing at Campbell River, Vancouver Island, B.C.

The British Columbia coast is noted for its fishing and hunting grounds, and space does not allow of a detailed description, but within a few hours of Vancouver itself there is a field for the mountaineer which is unrivalled, even in the Rocky Mountains. True, the Coast Mountains might not be so high, but for variety and flora they are hard to beat. On Vancouver Island there is Campbell River, which apart from its fame as the great fishing ground for the Tyee salmon, is also well-known for its mixed hunting, and it is possible to get fur, feather and fin within a few hours, if not minutes from the small town itself. It was at this place, when fishing in the mouth of the river, that Sir Richard Musgrave took the largest salmon that has ever been taken on the Pacific Coast, and which weighed 72 pounds, and what is more, it was taken on a rod and line. A good specimen of what is possible is shown in the photo which accompanies this short article. —SPENT SPINNER.

### U. S. to Send Three Bushels Wheat to Belgians

WASHINGTON, May 14—Food shipments to the civilian populations of the allied countries will be suspended for ten days to move three million bushels of grain to the Belgians, who are declared to be in desperate straits. A part of the wheat will go to the populations in the German occupied territory of Northern France. The decision to concentrate on the shipment of this grain was made, following the receipt of urgent cablegrams from the Belgian Relief Commission's representative in Brussels. One of the cables said: "Provided all shipments now enroute arrive and provided an equal distribution between all parts of the country Belgium and Northern France will be without bread from exotic grains for 20 days."

S. S. Empress, Capt. McDonald, did not arrive in Digby Wednesday, being detained in St. John. She arrived in record time, Thursday morning, with a passenger list of over 145.
