PREFACE.

A very cursory inspection of our law reports must lead to the conclusion that a very large part of litigation turns, more or less, upon the Statute Law, and it must be within the experience of most practitioners that they are very frequently called on to give advice upon questions arising upon Statute Law, without much time for research, and therefore it is obviously a matter of great importance to them, both for the purpose of litigation and of advising clients, to be able to refer with as little delay as possible to cases bearing upon the Statutes ; and yet it must be confessed that the search for cases on Statute Law is often a very difficult and laborious task.

Digests afford some assistance, but if it should happen that the head note of a reported case has mentioned the wrong section, or the wrong Statute, as I have found to be the case in several instances, that mistake is carried into the Digest, and the case as an authority on the Statute it really relates to, may be practically lost. For the latest instance, see *Rex v. Lewis*, 5 O.L.R. 509, where 1 Edw. 7 c. 12 is referred to in the head note as 1 Edw. 7 c. 19.

Then, as we all know, Statutes are often amended, revised, consolidated, and re-consolidated, and considerable extra labour is involved in searching for cases bearing on Statutes which have undergone this process. Few practitioners have the time or inclination, on each amendment or consolidation of a Statute, to bring forward the cases they may have previously noted. In this Index it will be found that that labour has been, to a great extent, saved those who may see fit to use it, and cases decided under Statutes which have been subsequently amended or consolidated will be found under the enactment as it now stands in the Statute book. This alone ought to make the Index extremely useful, but the large number of English cases which will be found included, must greatly enhance its value. For, while there is difficulty in searching for

Canadian cases on the Statutes, the task of searching for English cases is further complicated by it being necessary to find out whether or not there is any corresponding Imperial Statute, which (except in the case of some well known Statutes) is often a very troublesome thing to do.

Where annotated editions of Statutes have been published which, for example, is the case with the Municipal Act, the Assessment Act, the Mechanics' Lien Act, and the Workmen's Compensation Act, I have not attempted to cite all the cases bearing on the Statute, but have contented myself with a reference to late cases, most of which will not be found in the annotated editions of those Acts.

This Index is, to a certain extent, an experiment. The bulk of it is not very large, but the labour involved in gathering together the cases included therein has been considerable, and has extended over many years, and though I am not bold enough to think that it will be found to be altogether faultless, yet I am hopeful that its imperfections, if any, will in no wise mar its usefulness.

It may here be mentioned that where a reported case is subsequently reported in the Supreme Court, it has not been thought necessary to add the name by which it has been styled in the Supreme Court, where it differs from that under which it was originally reported in the Court below. The practice of changing the styles of causes in the Supreme Court makes it sometimes difficult to identify cases, and I have therefore thought it of more practical advantage not to make two citations of apparently separate cases, but to refer to a case in all its stages by the same name.

To those professional friends who kindly replied to my circular announcing the publication of this work I tender my sincere thanks.

A word as to the mode of using the Index. In the beginning of the book will be found a Table of all the sections noted. I suggest that this Table should be first examined, because in some instances

there will be found there reference to cases in the Table of *Addenda*, which includes a number of cases reported too late for insertion in the Index itself.
