**SHERRING OF THE MARATHON**  
 WORLD'S BEST LONG DISTANCE RUNNER

**Victor in the Most Prized Event of Olympic Games at Athens—An Easy Winner in Field of 26 Picked Athletes of All Nations.**  
 Athens, May 1.—Before 150,000 people today, Sherring of Hamilton, Ont., won the Marathon race, the big event of the Olympian sports. There was great excitement at the finish. Prince George ran with him up the cinder path. Sherring smilingly waved a flag. The crown prince congratulated him as he bowed to king George, by whom he was presented with a bouquet.  
 The race was over a 26-mile course, and 53 competed, including 26 Greeks, 7 Britons, 5 Americans, 2 French, 3 Germans, 2 Italians, 2 Swedes, 2 Belgians, a Bohemian, Belgian and Dane. There were ambulance stations every kilometre along the route, also men with peated oranges and lemons for runners.  
 Sherring's time was 2 hours 51 minutes 23 seconds, being seven minutes ahead of the Swede who was second nine minutes ahead of the American, third.  
 All shops were closed and business was completely suspended. The whole population of Athens and its suburbs and the villages in the vicinity, altogether some 150,000 persons, filled and overflowed the stadium and spread along the Marathon road, and surrounded hills, forming a tumultuous, swaying human barrier on each side the entire length of the course, behind the military cordon lining the route. The competitors spent the night as the guests of Foreign Minister Skouzes at Marathon.  
 The favorites were Petrli, Italy; Bonheure, French; and Coulouso, Greek; the British and Americans also having numerous supporters.  
 The contestants started in three lines, one metre apart, exactly at 3 o'clock. The weather was splendid, the thermometer showing 80.2 degrees in the shade. A mounted officer riding from front with a chronometer acted as time-keeper. Hundreds of vehicles of all kinds followed the fortunes of the contestants, outside the cordon holding the course.  
 A Hot Pace.  
 The race started at a hot pace. At the tenth kilometre, W. G. Frank (American) was leading, followed by Bohemian Rechenksky. At the 15th kilometre Frank was ahead, but Daly (Ireland) had taken second place, with Blake slowly creeping up. At 20 kilometres, which was reached at 4:10 p.m., Blake was leading, gradually running a magnificent race, followed by Frank and Sherring. The latter was now being urged to show himself in his true colors, was slowly gaining on his opponent.  
 At the 25th kilometre uphill work was being done. Beginning the last ten kilometres of the race Frank was still leading, but obviously pumped and distressed. Sherring was ahead at this point, Blake third, and time at this point was 4:40 o'clock. Sherring was running magnificently, but Daly had stopped to rest. Petrli had dropped out on account of stomach trouble.  
 Ahead!  
 Sherring now speedily took the lead, followed by Svamborg, Sweden, and Frank. When the fourth kilometre was given himself great reserve for the final spurt. Whenever he resumed running and in this manner tried them all out except Svamborg and Frank, who always were a good distance behind. Sherring looked as if he were a Greek attendant and returned the salutes of the cheering crowds.  
 A cannon shot announced the arrival of the first runner within four kilometres of the stadium.  
 The presence of cheers along the road grew into roars at 5:30 p.m., and the runner was being approached. At the gates of the stadium, Sherring, smiling, and looking fresh and not at all distressed, was greeted by Crown Prince Constantine, who accompanied him to the line.

**CARNegie ON CONSCIENCE**  
 ONLY JUDGE MAN NEED FEAR

**In Hope of Hereafter, Catholics and Protestants Are Alike to Him, He Says.**  
 Montreal, May 1.—(Special.)—Andrew Carnegie came out as a humorist today in addressing the Canadian Club luncheon, and gave the lie to his former assertions that millionaires rarely smile.  
 He advised the close of his address, which was a variation of his plea for international tolerance, with a local application so as to take in French-Canadian Americans in an ideal vantage, he lapsed into a serious mood and even ventured to give advice regarding religious views.  
 He advised his hearers to think less of heaven as a home and more of making home a heaven. Catholics and Protestants were alike to him as regards a hope for the hereafter, but he advised first to seek honor and decency and the hereafter would be all right. The inner conscience was the only judge that a man need fear either here or hereafter.  
 Mr. Carnegie received an ovation, the St. Lawrence Hall Cafe being crowded with an enthusiastic audience.  
 In the afternoon the Laird of Skibo had the degree of L.D. conferred on him at a special convocation at McGill University.

**HOW WARDONE IS GROWING**  
 BIG RISE IN ASSESSMENT

**Increase Approaches \$2,000,000 Over 1906—Indicates Very Substantial Rise Thruout City.**  
 The figures of the 1907 assessment of Wardone indicate a great growth of the city and forecast an enormous increase in the total assessment. The ward one rolls were handed over to the city clerk by Assessment Commissioner Foran yesterday afternoon. They show a total gross assessment of \$11,863,041, which, after deducting \$1,285,005 exemptions, leaves a net total assessment of \$10,578,036, against \$7,968,470 for 1906, an increase of \$2,609,566. The population is given at 27,597, against 24,200 in the previous assessment, an increase of 3,397.  
 The 1907 assessment is made up as follows: Real property, \$10,123,374; business tax, \$745,638; income tax, \$17,029. The 1906 assessment was: Real property, \$7,248,733; business tax, \$587,599; income tax, \$149,144.  
 It is figured that the 1907 assessment will be in the neighborhood of twenty million dollars more than that for this year.

**VEEDIE IN DEATH OF LITTLE GIRL**  
 ELLIOTT AT BROOK AVE. CROSSING.

"Gertrude Elliott came to her death at the Brook-avenue crossing by being struck by a C.P.R. train. The north gate was not lowered in time to avert the fatality. The need of a subway at this crossing is obvious."  
 This is the verdict of the coroner's jury held in a session held in No. 6 Police Station.  
 WAS THIS INFANT KILLED?  
 The badly decomposed body of an infant about seven months old was found in a ravine near High Park yesterday afternoon by two boys. The body was in a wooden box, which had been used previously for a coroner's coffin.  
 CORNER GRAMIAN WILL INVESTIGATE.  
 CHEAP CARBIDE COMING.  
 A Cut of Two-Sevenths Assured—Drop From \$70 to \$50 per Ton.  
 The sale of three-fifths of the offerings of the Canadian Ethnoline Company, Limited, in less than two weeks, has assured for Canada a supply of cheap carbide of the highest grade to be on the market by September next. Ethnoline owes its name to the fact that it produces in reaction with water Ethine, the purest form of bicarbonate of hydrogen known commercially as Siche Gas. Incidentally the prompt floating of this large new company proves that money is still easy for a sound undertaking backed by responsible men.

**MR. BROUGH IMPROVES.**

London, May 1.—(C.A.P.)—The doctors of the Canadian Club are in a better condition of Mr. T. G. Brough. They are now more hopeful.  
 Yes—it's popular. "Club Coffee."  
 FISHERMAN'S LUCK.  
 Halifax, N.S., May 1.—(Special.)—Prince Arthur left Port Medway to night, en route to St. John, N.B.  
 He is expected to reach the river for salmon Monday and Tuesday, but owing to the water being high failed to land any fish.  
 Moving to 5 King St. West.  
 Great bargains for smokers. Everything in pipes, fancy goods and walking sticks reduced in price. A. Clubb & Sons, 49 King West.  
 Insist, the grocer can get it. "Club Coffee."

**THE RACE AND THE RUNNER**  
 Origin in Name Dates Back Centuries to an Historic Episode.

The Marathon race is so named for the memorable run from the scene of the battle of Marathon to Athens by a Greek, who died after having been able to warn the Athenians. The distance he ran was approximately 25 miles, and all 25 mile races held since 1884 have been called Marathon races. The course used in the Greek race does not extend from Marathon to Athens. After a turn about the stadium track, the runners strike out across the hills, and run to a turning point about twenty-one kilometres distant. The race finishes after a run of a lap about the stadium.  
 The distance of the race is 42 kilometres (about 26 miles) and the best previous time for the course, which is very hilly, was 2:55. In a trial made nearly a month ago Sherring beat that time by more than fourteen minutes. The conditions of the race are much more severe than the conditions of the majority of the big races run in Canada and the United States. The contestants are not allowed pack-making or attendants and no one is allowed to accompany them on the long journey.  
 At every mile of the course a squad

**LOST ON DIVISION 61-115**  
 PREMIER VERY HOLY

**DEFENDS CONTRACT**  
 Before House Divides on Foster Resolution, Sir Wilfrid Laurier Delivers Himself of Some Personalities and Denials.  
 Ottawa, May 2.—(Special.)—Upon division early this morning, Mr. Foster's resolution was lost yeas 61, nays 115. Bourassa and Verreille voted with the Conservatives.  
 Ottawa, May 1.—(Special.)—Mr. Miller (Liberal, South Grey) resumed the debate upon the North Atlantic Trading Company, in the house today. He characterized the speech by the member from North Toronto "rather a gaunt misbegotten and ill-nourished child of a foster-father." He protested that the company's contract was entirely proper and denied that there was any graft. There was no evidence to show that Sifton, Preston and Smart, or any of them, were interested in the company. He assented with vindictive attack upon the member from North Toronto, quoting from speeches by Senator Miller and Sir Mackenzie Bowell.  
 Mr. Lake (Conservative, Qu'Appelle) made an excellent speech. Prosperity had come to the west, he said, through the beneficence of Providence and the efforts of the people, not thru the trading company.  
 Mr. Oliver defended the contract, but cancelled it on the ground that the company was not carrying out its conditions. "Then, why," demanded Lake, "do you propose paying this bonus of \$5 per head until Nov. 30?"  
 Hon. George E. Foster was detained at his home by illness. The premier expressed regret at his indisposition, and after quoting some personal references from the speech of the member from North Toronto, said he still more regretted his absence, because he had a few things to say that should not be said in his absence. "They will say for another time," he said abruptly, and took his seat.  
 Sir Wilfrid Laurier denounced the charges made by Mr. Foster as "infringing on the sacred rights of the people, he had not scrupled to make statements that the house would fully understand, but without truth and foundation. Mr. Sifton, as minister of the interior, had not materially changed the methods employed by Canada to acquire the railway. He had merely brought to methods in vogue his personal qualities of push, energy and enthusiasm. The government had maintained all its obligations and fulfilled its contracts in Great Britain, the United States and certain countries of continental Europe. In certain other countries no agencies had been established, because of the opposition on the part of their governments towards such a propaganda."  
 It had long been the custom for the Dominion Government to pay bonuses to bookkeeping agents in Germany and elsewhere. That was done for many years while the Conservative party was in power, and while Mr. Sifton was in the cabinet. Mr. Sifton had dealt with these agents assembled into one organization, that was all there was to it. "Absolutely untrue."  
 Mr. Foster had openly charged that these dealings had been concealed from parliament, and that they had leaked out and caused a scandal during the summer of 1906. "Mark my word, Mr. Speaker," the premier exclaimed dramatically, "that statement is absolutely untrue, there is not one word of truth in it." He then read from the report of James A. Smart, deputy minister of the interior, published in 1902, which referred to and substantially recited the contract with the company. He ridiculed the charge of secrecy. The contract was signed by the company, its president and its secretary. What necessity was there for knowing the names of all the stockholders? Who does anyone ask that question in dealing with that corporation? This company is merely a combination of bookkeeping agents; it was immaterial what they receive money only upon immigrants who arrive in Canada. Our only concern was that immigrants did not arrive by means of the newspapers, the impression was given that members or friends of the government were behind this contract, that there was a raffle-off for somebody.  
 "Make your charges," exclaimed Sir Wilfrid, "and I will see that the guilty man is punished to the utmost."  
 "Name the members of the company."  
 Continued on Page 12.

**DAY OF DISORDER IN PARIS**  
 BUT LABOR DEMONSTRATION A FAILURE

**CAVALRY CLEAR STREETS**  
 Over 1000 Arrests Made—In a Leaderless Tumult the May Day Agitators Were Swallowed Up in Rougher Mob—Workingmen Still Ugly and Threatening—The Day Elsewhere.  
 Paris, May 1.—The long-dreaded labor day failed to bring the revolution which inflammatory journals predicted, and while it brought scenes of extreme violence, the labor districts, which thousands of troops controlled with difficulty, and even central portions of Paris, have taken on the appearance of a siege, with regiments of infantry and cavalry camped about the Arc de Triomphe, the boulevards, the Bank of France and the great railway station, while military sentinels were placed before banks and private establishments.  
 The military choruses in the residential portion of Paris remain tranquil. In the west end, for removed from riotous scenes, people were disposed to refer to the day as a harmless demonstration. It was, however, much more than that. Thruout the afternoon, dragoons, republican guards and cuirassiers charged disorganised masses, sweeping the Place de la Republique and the broad Boulevard de Magenta. Toward midnight cavalry charged with drawn swords and bayonets, which the soldiers showed with a harmless fervor. It was, however, much more than that. Thruout the afternoon, dragoons, republican guards and cuirassiers charged disorganised masses, sweeping the Place de la Republique and the broad Boulevard de Magenta. Toward midnight cavalry charged with drawn swords and bayonets, which the soldiers showed with a harmless fervor. It was, however, much more than that. Thruout the afternoon, dragoons, republican guards and cuirassiers charged disorganised masses, sweeping the Place de la Republique and the broad Boulevard de Magenta. Toward midnight cavalry charged with drawn swords and bayonets, which the soldiers showed with a harmless fervor. It was, however, much more than that. Thruout the afternoon, dragoons, republican guards and cuirassiers charged disorganised masses, sweeping the Place de la Republique and the broad Boulevard de Magenta. Toward midnight cavalry charged with drawn swords and bayonets, which the soldiers showed with a harmless fervor. It was, however, much more than that. Thruout the afternoon, dragoons, republican guards and cuirassiers charged disorganised masses, sweeping the Place de la Republique and the broad Boulevard de Magenta. Toward midnight cavalry charged with drawn swords and bayonets, which the soldiers showed with a harmless fervor. It was, however, much more than that. Thruout the afternoon, dragoons, republican guards and cuirassiers charged disorganised masses, sweeping the Place de la Republique and the broad Boulevard de Magenta. My \$5.00-a-Quarter Valet Service.

SPERMIZONE

FOUNTAIN, "My Valet."

Blod Poison

Ricord's Specific

To Be Well Dressed

The New York Tailors, Limited

GUARANTEED TAILORING.

Toronto Home, 167 Yonge Street

Suits \$15-\$17-\$20 To Order.

The injustice a man does to himself by wearing ready-made clothes is unnecessary and even foolish.

Ready-made clothes are full of deception. Their appearance before worn is artificial.

Such garments give men a most untidy appearance. They shrink, wrinkle and blister until they bear no resemblance to a decent garment.

Because we sell from the mills to you direct, saving the cost of intermediate transactions and make in our own workrooms, by our "Manufacture" system of dividing and specializing the work, our prices are even less than ready-made. We make every garment to measure, to fit, and guarantee in a way you never saw tailoring guaranteed before. Have your clothes cut, tailored and fitted to your own measure.

OUT-OF-TOWN MEN—We can take your measure by mail and fit you as well as if you were here in person. Write for free samples and style book.

BEHOLD! A DOCTRINE.

The candid Mr. Junkin ingeniously enunciated a doctrine before the insurance commission yesterday, which in view of recent confessions, the 30,000 policyholders in the Manufacturers' Life should ponder carefully.

Mr. Junkin was being examined as to the Manufacturers' purchases of bonds with which bonus stock was given, when he incidentally said that in his opinion the investments of insurance companies should be left to the directors' judgment.

Mr. Junkin did not appear to realize it, but he was either fooling, or was exhibiting such an inability to appreciate what is the kernel of insurance business as proves once and for all that such experience has given him a disqualification for being managing director of a company to which 30,000 of his fellow-citizens have handed over portions of their savings to secure their families from want in the event of the maximum disaster overtaking them.

Mr. Junkin has admitted that repeatedly the company of which he is the chief executive officer—for President Ross, ex-premier of the Province of Ontario, who draws only \$1500 a year, seems to be a mere cipher in "the game" of his purchased securities in direct violation of the law.

This doctrine, which causes amazement to everybody except to a business man of Mr. Junkin's peculiar temperament, he promulgated while making disclosures that directors of his company have made fine profits by selling to the company securities which could not produce dividends for three or four years, some of which they had underwritten.

There are two ways of safeguarding the policyholder. One is to circumscribe the investments so as to eliminate the speculative element from the insurance business. The other is to limit directors' powers so that they do not deal in securities for speculative purposes.

It may be paid to his suggestion when he can show that insurance directors are their companies' stockholders, too. At every turn of the insurance commission wheel the pernicious fallacy on which too many directors seem to have shaped their conduct, raises its ugly head—the fallacy that everything is right as long as it is all right, and that breaking the law does not matter as long as it costs nothing.

It would be grotesque, if it were not so serious, that a managing director who has told the scandalous story of this handling of policyholders' money, should be the first person solemnly and publicly to suggest that one of the ways to cure the abuses of insurance investment is to make a virtue of them by removing every restriction which the present law imposes.

Really, first-class men of business should exhibit a little common sense, a little dignity, a little appreciation of the fitness of things.

THE SENATE, INDEED. The house of commons does not seem to have traveled far with senate reform by its rather academic discussion of the subject on Monday night.

The senate has joined that multitude of political institutions which have ceased to take themselves seriously. A body which thinks little of itself can never enjoy the respectful admiration of those who do not belong to it.

The selecting of senators by the premier is not democratic. The senate has not the redeeming virtue which the house or lords possess—it does not include within itself eminent men who have had nothing to do with party politics.

As Mr. Borden pointed out, a change in the senate's make-up would involve the repeal of the Imperial Parliament Act and an amendment to the British North America Act.

WHERE IS THE BIG STICK? The supreme court has given the Toronto Street Railway Company a victory over the city, which, while

It's a well-known fact that there's nothing better for the system than the stimulating, health-giving properties of fine malt and hops. To get these at their best, order a case of

This famous beer is pronounced by those who know to be superior to all other bottled lagers, domestic or foreign. Brewed and bottled exclusively by Hamilton Brewing Association, Limited, HAMILTON, CANADA.

It might be reversed by the privy council, it is primarily a renewal of the teaching of experience—that litigation is a poor way of inducing a public utility corporation to give the best possible service to the community from which it derives its wealth.

It is now clear that the English education bill—the leading measure of the parliamentary session—will lead to controversy of the most violent and embittered character.

Meantime, another storm is expected to centre around Winston Churchill, who in his brief term of office as under secretary for the colonies, seems to have roused a feeling of personal antagonism unusual in British politics.

OSGOODE HALL. Judgments handed out yesterday, May 1: Master's chambers—Barry v. Toronto and Niagara Power Co.—Cartwright, master.

Every untiring joy has its reminder that happiness is scarcely ever unalloyed. Hamilton, qua Hamilton, did not finance her youths who wanted to become twentieth century Olympians.

WHEN ILLNESS COMES? Are you prepared? Have you near at hand a remedy that will alleviate pain and help till the doctor comes?

Clean, dry crystals—that are absolutely pure—that will not cake—that is WINDSOR TABLE SALT. The best for table use.

YORK COUNTY AND SUBURBS

Toronto Junction, May 1.—F. Aikman, organizer of the Elks Society, is in town for the purpose of organizing a branch. About 30 prominent citizens have signed the application to become members.

North Toronto. Mr. Quinton, a familiar figure on Yonge-street, has sold his wholesale milk business and entered into the retail trade.

John Muirhead of the 2nd concession, East York, complaining about the ill-behavior of Toronto people at their rambles out in the country. Last Saturday afternoon, he said, five men set to him and kept him and a posse of men busy the best part of the night.

The election of officers of the Presbyterian Young People's Society resulted as follows: Hon. president, Rev. Dr. McLean; president, Allen Dunne; vice-president, George Rennie; secretary, Miss Winnie Gartschore; corresponding secretary, Miss L. Dunnet; treasurer, Miss M. C. Tibb; executive committee, Misses Masurie, Isabel H. Gartschore, M. Blong, Misses L. Gartschore, J. Kyle, T. A. Gibson and Wm. White.

Markham. Real estate the west half of a lot in Markham Township and worth \$4000 formed the estate of Alexander Dunn, who died April 15. Beneficiaries of his will are: Arnold Dunn, \$400; Mount, Albert \$1000; Mattilda Dunn, sister, Unionville, \$1000; Elizabeth Hayes, niece, Mount Albert, \$400; Rebecca Keas, niece, Winnipeg, \$300; Mary Ann Martin, niece, Rainy River, \$100; Elizabeth McQuay, sister, Unionville, \$400; Thos. McQuay, nephew, Unionville, \$400; Jas. McQuay, Unionville, \$400. The property is to be sold and legacies paid in cash.

FATAL LEVEL CROSSING. One Man Killed, Companion Saved Himself by Jumping. Renfrew, May 1.—James McMahon, a citizen, was instantly killed by a K. & P. freight this afternoon in the act of crossing the railway street level with a wagon and team. A young man companion saved himself by jumping.

Gov.-Gen. Body Guard Parade. The first voluntary parade of the season for part of the G. G. B. G. took place last night. Some 120 turned out. The band was particularly strong, there being 42 all told, and they looked smart in their new uniforms.

The James Bay Railway. J. Leonard Boyd, chief engineer of the northern division of the James Bay Railway, is authoritatively for the statement that the road will enter the city in the very near future.

ROSS RILES MR. WHITNEY WITH HUMOROUS REMARK

Premier Retorts That He Has Proof That Opposition Leader Did Improper Action.

Quite a commotion was caused in the house yesterday afternoon during the discussion on the education bill. Ex-Premier Ross was speaking when he interjected a humorous remark concerning the stand taken by the government that two drainage engineers were necessary owing to different conditions in the east and west. This "riled" Mr. Whitney. The premier said the late premier had induced a drainage referee to go down to the Township of Osnabruck, and so, spoke up Mr. Ross.

GERSE WAGGING FOR MONEY

COLONIES SHOULDNT DAY REAY, M.P., Urges That Preferential Share in Growing Prosperity is Quite Sufficient.

(Canadian Associated Press Cable) London, May 1.-Questions for the colonial conference are discussed in two notable articles in the May magazine. Russell Reay, a prominent Radical M.P., in The Nineteenth Century, says that imperial defence and commercial relations will overshadow all other questions to be discussed, owing to changed conditions. In a lengthy discussion he upholds the attitude of the colonies in declining to make proportional cash contribution to the army and navy. Likewise, he contends that the mother country cannot give a return in kind for tariff preferences.

Woman's Auxiliary Reception.

The crypt of St. Alban's Cathedral, tastefully adorned with flags, flowers, palms and bright cosy corners, was the scene of a cordial reception to the officers, life members, delegates and hostesses of the Toronto Diocesan Women's Auxiliary, by the cathedral branch of the visitors, last evening. Upwards of 300 were present. The guests were received by His Lordship the Bishop and Mrs. Sweetman, and Miss Tilly (President). Mrs. Alex. MacNab addressed the assembly. The response was made by Mrs. Murphy of Allandale.

Only a Few of 'Em Left.

The regular monthly meeting of the West Toronto Liberal Club, held in Mallon's Hall last night, was attended by less than a dozen of the faithful. The chair was occupied by John Tomes, who presided. Present were: John Maloney, S. J. Price, John Thompson, W. Waghorn and Mr. Scrymgeour. The principal topics discussed were how best to increase the interest in the club, in which all the members took part. It was decided to disband during the summer months.

# SPECIAL FARMING STOCK EDITION

### CONTROLLING SOIL MOISTURE.

Every farmer knows that he must have a certain amount of moisture to raise a good crop, but it is evident from the method of tillage carried on on many farms that there are some who do not fully realize the importance of the moisture in the soil.

Water exists in the soil in three forms—namely, free water, capillary water and hygroscopic water. The free water is that which can be drawn off in drains and furrows, wells, springs, etc.; the capillary water is the water which makes the soil moist but will not drain out, and the hygroscopic water is that which surrounds the soil grains and is invisible. When soil seems perfectly dry this water is always present in varying amounts, even in dust. It is with the free water and the capillary water that farmers have to deal mostly. When there is too much free water it is detrimental to crop growth and it must be carried away by drainage. This is the direct source of benefit to plant growth and is supplied by rains. It primarily furnishes the source of capillary water.

It is from capillary water that the plant gets its food supply. All plant food, whether it exists in the soil or is applied through commercial fertilizer, must be dissolved and held in solution before it can be absorbed by the roots of the plants, and this capillary water holds these foods in solution. It is for the control of this form of moisture in the soil that much of the cultivation is done.

This moisture spreads thru the soil in all directions by using the small interstices between the soil grains as tubes. It is the work of the farmer to keep this moisture around the roots of the plants and not allow it to escape by evaporation. To do this he must control the size of the tubes. When the soil is first plowed up it is left more or less open with spaces between the furrow slices. If left this way for a few days the soil down to the compact subsoil will dry out. Now, if the soil is harrowed and rolled and gotten into good condition it will become moist again without there having been any rain. This is because by pressing the soil particles together the tubes between the grains are made smaller and the water is drawn up from the subsoil, where it has been stored by previous rains. With the soil left in a compact condition and the moisture coming up from below it evaporates as soon as it comes to the surface, and unless stopped becomes a source of waste. To stop this the surface is broken up very finely and loosely with a harrow. This stops the evaporation and acts like a blanket holding the moisture. This blanket should be kept over the field of growing crops all season. Farmers do not realize the importance of good surface tillage as much as they should. If the land is plowed in the fall the moisture that falls in the way of snow or rain during the winter runs into the ground, and then if surface cultivation is practiced early in the spring this moisture is held in and let out only thru the growing crops.

### CONTINUE THE EMBARGO.

Elsewhere in this issue will be found an opinion of J. T. Gordon, who is largely interested in the northwest cattle trade, on the cattle embargo. The Montreal Trade Bulletin in quoting Mr. Gordon claims sole ownership of opposition to the removal of the British restriction on Canadian cattle. The World has repeatedly supported the embargo on the very grounds touched upon by Mr. Gordon, and is still strongly of the opinion that the refusal of entry of Canadian live cattle into Britain is advantageous to the Canadian farmer. If there is any money in finishing cattle for the block why should it not be retained among the farmers who originally breed the animals? Canada has every requisite for producing the finished animal at a much lower figure than it can be done by the British farmer, and at the same time retain the manure in which so many farms are now lacking. What might be reasonably asked of the British consumer is that the time for slaughtering after landing be further extended. This would allow the animals a better chance to recover the condition lost by the ocean passage, and give Canadian cattle a preferred position in the importing markets.

### PLANT A LAWN.

It has been said that the green sward is the canvas upon which all architectural and landscape effects are produced. It is sure that no home seems complete without an expanse of green grass near it. Grass is nature's balm and healing for all erosive scars. Nature abhors a vacuum and makes an attempt to fill every bare place with some vegetable growth, and if it is not grass it will be weeds, but grass will grow if given an opportunity. Green grass has not only an economic value, but an aesthetic value. Where is the man who does not love to stretch himself on the cool green grass in the shade of a tree when he is hot and tired? Who is not inspired by the beauty of a beautiful, well-kept lawn and does not feel that the old earth is a pretty good place after all?

When all is said as to the beauty of a lawn, it might be well to state that any one can have a lawn if he will give a little time and attention to it. If the soil is not in condition to grow a heavy coating of grass it can be made so by manuring and mixing with other soil if necessary. If the surface of the ground where the lawn is to be located is not of the desired grade and is not level it will not take a great deal of labor in most cases to get it right.

Prepare the soil by cultivation and get a good seedbed, and then after the seed is sown the surface should be carefully raked. Bluegrass is used mostly in lawns, but there are some other grasses which can be used. In many cases where a good bluegrass sod is handy it might be best to cut the sod and put down on the lawn, as it will then become established quicker. Sodded lawns must be kept well watered during the summer months. Plant some shrubs and flowers and perhaps a few trees if the lawn is small, or more if larger, and a fine effect can be produced. No farm home should be without a well-kept lawn, as it adds much to the value of the farm and to the beauty of the surroundings.

### TORONTO HORSE MARKET

#### ALITTLE QUIETER, BUT GOOD

Prices Remain Above Last Year's Quotations, But Rather Below the Best Realized This Year.

While the horse market in Toronto during the past week has been almost featureless, as it usually is round horse show time, there has been quite a lot doing at the principal markets, and prices have been fairly well sustained, although possibly a little below the average of the previous two or three weeks. In short there has been less business yet for the right stuff respectable prices have been forthcoming. An instance in point is the sale at the Repository yesterday among the 150 horses displayed at the show, tipping the scales at somewhere around 3500 lbs. Mr. Joseph Russell for \$295. This was really a grand animal, worth rather more than he brought. Other sales were made that were indicative of the times, and abundantly proved that such lull as there was was temporary. Under such circumstances the prices were, for workers, from \$10 to \$15 above the corresponding time last year.

### GROWS POTATOES IN SAWDUST

#### Surface Vegetation Found to Be an Unnecessary Adjunct.

A half-bushel of sawdust, a dash of chemical solution and fifteen potatoes carefully enveloped with the sawdust will enable the average householder to grow a bushel of tubers on his house-top or in his cellar within 60 days. This process has been discovered and elaborated by W. D. Darst of Great Falls, Mont.

The product of Mr. Darst's process is termed the "wisdom potato" from the fact that growing under these apparently unnatural conditions, there is no surface vegetation. Because of this each potato buried in the sawdust is enabled to produce at least twelve normal-sized tubers.

At the Oakland Plaza, in the rear of the Oakland Hotel, Mr. Darst displayed the method of growing potatoes by his system. Operating on the theory that the presence of surface vegetation was only a method of securing nourishment and in reality sapped the vitality of the tuber, Mr. Darst experimented more than six years and found he could overcome this seeming obstacle by covering the growing plant by supplying it artificially with its needs.

By employing sawdust, peat, straw or any other earth product that would retard the circulation of air, moisture and heat, and the application of solutions of various salts he discovered that a single potato could be multiplied by attaching to itself from twenty to sixteen other potatoes of approximately the same dimensions without throwing off any of its energy above ground. Packed in loosely arranged bins permitting the free access of air and arranged in rows six inches above each other, with an allowance of one bushel of sawdust to each bushel, Mr. Darst has demonstrated the rapidity of growth and the proportions that the potatoes may attain by showing that in 60 days 15 potatoes will produce a bushel. In the character of his experiments and the success that has attended them Mr. Darst has the indorsement of Luther Burbank, the eminent horticulturist and botanist.

### Sugar Beet Industry in East York.

Editor World: The first sugar beets for retining purposes in East York were grown in 1903, three years ago. This year the cultivation so increased that 60 acres will be grown along the line of the Midland Railway from Scarborough Junction to Steelesville. This is a section of country particularly adapted for the growing of sugar beets, the soil being sufficiently rich in plant food to produce a good tonnage of the crop. In richness of sugar the beets are above the average, and the farmers, being mostly skilled root growers, readily take to the cultivation of sugar beets, especially when the profit from the crop is somewhat better than from any other crop grown. With proper attention the growers make from \$50 to \$80 an acre for their work after paying the freight and seed. After this year the time will have arrived that another sugar factory should be built east of Toronto, Canada consumes 400,000,000 lbs. of sugar annually, and only produces about 25,000,000, and this balance is imported.

East York is not the only place east of Toronto where sugar beets can be grown successfully. Suitable soil is found near Whitby, Bowmanville and Peterboro, and two attempts have been made to establish a sugar factory in this vicinity, first at Peterboro, then at Whitby, but so far neither has materialized. The long haul from these places east of Toronto to either Wallaceburg or Berlin tends to lessen the profits to the growers. If a factory was built at any of the above places the freight would be 50c, but as it is they have to pay from 75c to \$1. Would it not be well for some of the enterprising capitalists of our country to invest in a sugar factory east of Toronto and give those growers, who stuck to it so manfully these past years the advantage of at least a 50c freight rate.

Simpson Rennie.

### In the Poultry Yard.

Little chicks need grit as well as the single chickens need it.

The lack of gravel, grit, etc., is the cause of thin shelled eggs.

An Arab saying is that if eggs are put under a sitting hen before she has laid down some of her own they will be blind. Never feed chicks sooner than 24 hours after hatching and let the first feed be dry bread crumbs and grit.

The statement is made on road authority that the tenth egg a hen lays will be the largest she will lay during the year.

Feed the chicks hatched in dry, warm weather sooner than those hatched in damp cool weather, as the first will grow much faster.

It is said that more chickens are killed or omitted from feedline too soon than are hurt by too long a fast. This statement is borne out by the case of the hen that steals out her nest and is not found until the chicks are several days old. They are always healthy and few die from disease.

This is a section of country particularly adapted for the growing of sugar beets, the soil being sufficiently rich in plant food to produce a good tonnage of the crop. In richness of sugar the beets are above the average, and the farmers, being mostly skilled root growers, readily take to the cultivation of sugar beets, especially when the profit from the crop is somewhat better than from any other crop grown. With proper attention the growers make from \$50 to \$80 an acre for their work after paying the freight and seed. After this year the time will have arrived that another sugar factory should be built east of Toronto, Canada consumes 400,000,000 lbs. of sugar annually, and only produces about 25,000,000, and this balance is imported.

East York is not the only place east of Toronto where sugar beets can be grown successfully. Suitable soil is found near Whitby, Bowmanville and Peterboro, and two attempts have been made to establish a sugar factory in this vicinity, first at Peterboro, then at Whitby, but so far neither has materialized. The long haul from these places east of Toronto to either Wallaceburg or Berlin tends to lessen the profits to the growers. If a factory was built at any of the above places the freight would be 50c, but as it is they have to pay from 75c to \$1. Would it not be well for some of the enterprising capitalists of our country to invest in a sugar factory east of Toronto and give those growers, who stuck to it so manfully these past years the advantage of at least a 50c freight rate.

Simpson Rennie.

### In the Poultry Yard.

Little chicks need grit as well as the single chickens need it.

The lack of gravel, grit, etc., is the cause of thin shelled eggs.

An Arab saying is that if eggs are put under a sitting hen before she has laid down some of her own they will be blind. Never feed chicks sooner than 24 hours after hatching and let the first feed be dry bread crumbs and grit.

The statement is made on road authority that the tenth egg a hen lays will be the largest she will lay during the year.

Feed the chicks hatched in dry, warm weather sooner than those hatched in damp cool weather, as the first will grow much faster.

It is said that more chickens are killed or omitted from feedline too soon than are hurt by too long a fast. This statement is borne out by the case of the hen that steals out her nest and is not found until the chicks are several days old. They are always healthy and few die from disease.

### TORONTO HORSE MARKET

#### ALITTLE QUIETER, BUT GOOD

Prices Remain Above Last Year's Quotations, But Rather Below the Best Realized This Year.

While the horse market in Toronto during the past week has been almost featureless, as it usually is round horse show time, there has been quite a lot doing at the principal markets, and prices have been fairly well sustained, although possibly a little below the average of the previous two or three weeks. In short there has been less business yet for the right stuff respectable prices have been forthcoming. An instance in point is the sale at the Repository yesterday among the 150 horses displayed at the show, tipping the scales at somewhere around 3500 lbs. Mr. Joseph Russell for \$295. This was really a grand animal, worth rather more than he brought. Other sales were made that were indicative of the times, and abundantly proved that such lull as there was was temporary. Under such circumstances the prices were, for workers, from \$10 to \$15 above the corresponding time last year.

### GROWS POTATOES IN SAWDUST

#### Surface Vegetation Found to Be an Unnecessary Adjunct.

A half-bushel of sawdust, a dash of chemical solution and fifteen potatoes carefully enveloped with the sawdust will enable the average householder to grow a bushel of tubers on his house-top or in his cellar within 60 days. This process has been discovered and elaborated by W. D. Darst of Great Falls, Mont.

The product of Mr. Darst's process is termed the "wisdom potato" from the fact that growing under these apparently unnatural conditions, there is no surface vegetation. Because of this each potato buried in the sawdust is enabled to produce at least twelve normal-sized tubers.

At the Oakland Plaza, in the rear of the Oakland Hotel, Mr. Darst displayed the method of growing potatoes by his system. Operating on the theory that the presence of surface vegetation was only a method of securing nourishment and in reality sapped the vitality of the tuber, Mr. Darst experimented more than six years and found he could overcome this seeming obstacle by covering the growing plant by supplying it artificially with its needs.

By employing sawdust, peat, straw or any other earth product that would retard the circulation of air, moisture and heat, and the application of solutions of various salts he discovered that a single potato could be multiplied by attaching to itself from twenty to sixteen other potatoes of approximately the same dimensions without throwing off any of its energy above ground. Packed in loosely arranged bins permitting the free access of air and arranged in rows six inches above each other, with an allowance of one bushel of sawdust to each bushel, Mr. Darst has demonstrated the rapidity of growth and the proportions that the potatoes may attain by showing that in 60 days 15 potatoes will produce a bushel. In the character of his experiments and the success that has attended them Mr. Darst has the indorsement of Luther Burbank, the eminent horticulturist and botanist.

### Sugar Beet Industry in East York.

Editor World: The first sugar beets for retining purposes in East York were grown in 1903, three years ago. This year the cultivation so increased that 60 acres will be grown along the line of the Midland Railway from Scarborough Junction to Steelesville. This is a section of country particularly adapted for the growing of sugar beets, the soil being sufficiently rich in plant food to produce a good tonnage of the crop. In richness of sugar the beets are above the average, and the farmers, being mostly skilled root growers, readily take to the cultivation of sugar beets, especially when the profit from the crop is somewhat better than from any other crop grown. With proper attention the growers make from \$50 to \$80 an acre for their work after paying the freight and seed. After this year the time will have arrived that another sugar factory should be built east of Toronto, Canada consumes 400,000,000 lbs. of sugar annually, and only produces about 25,000,000, and this balance is imported.

East York is not the only place east of Toronto where sugar beets can be grown successfully. ### NO SOIL-BOUND ORCHARDS.

#### Plowing Should Be Done About Every Two Years.

The modern orchard no longer believes that soil-bound trees are profitable. He may see down an apple or pear orchard to grass for a year or so occasionally—to check too rapid growth when such check seems necessary—but as a general thing he plows and cultivates his fruit trees every season so near the surface it cannot be helped.

You do not want to rip out roots that can be avoided. Plow the soil which needs stirring up, but not the roots. Set your plow to run about four inches deep, and if you strike a few roots so near the surface it cannot be helped.

For this work you will want a steady horse, a steady hand, a short wheelbarrow and a good plow. Plow two or three rounds along each tree row. Lap the first furrows along the centre of the row if you are plowing "up." Or if you plow away from the trees draw the plow in between the trees, so that every inch of soil is turned except a foot or so on close to the trees on the first round, each side of the tree. A little practice will enable you to thus skim, leaving but very little hoeing to be done.

It is a good plan to pad the ends of the wheelbarrow. Then it accidentally hits the trunk of a tree you will have no regrets. After plowing a few rounds along each row in the orchard get out the large plow and the team and finish the work in the easiest, quickest way.

The amount of riding up that an orchard needs depends largely upon the drainage. If the soil is not thoroughly underdrained it is quite often essential to keep the ground raised up along the tree rows so as to facilitate surface drainage. On the other hand, if tile or natural drainage facilities are good, it may be best to keep the ground as nearly level as possible at all times.

Ordinarily an orchard should be plowed "up" two years and "away" every third year. But it pays to put in the extra round occasionally, especially the plowing so as to have the ground surface always level—Orchard and Farm.

### When the Hogs Die.

The time of greatest fatality among hogs is when they are compelled to subsist for any considerable time on the dry and most concentrated foods. In all experience that is the condition of the greatest ailment in human life—dysentery, cholera, etc.—and in the autumn stubble fields and left to glean on the dry, concentrated food there obtained, if ever hog cholera or any other disease occurs that is the time when the greatest loss is sustained. It is not so much because the seeds of the disease are more prevalent then, but because the hog is forced into a condition in which he is most susceptible to the seeds of disease, more or less always prevalent. No animal, not even a man, was ever intended to live on concentrated foods, and the human animal knows too much to risk his health on such conditions. What the hog needs along with the concentrated foods is an occasional succulent ration. With the abundant opportunity to provide for him clover and rape and beets, articles of food of an entirely different character, there is no reason why he should be abandoned to the conditions which invite disease and death. There is not a month of the year when the concentrated succulent ration could not be provided for the hog. This, with pure water, would enable him to resist and throw off the germs of any disease prevalent, and frequently frequent to kill when subjected to conditions inviting death—Jersey Hustler.

### CHURCHES TO MORTGAGE.

#### Three Congregations Which Want to Erect New Edifices.

The Presbytery yesterday discussed the matter of the sale of Knox Church property, to which both they and the trustees of the church were agreed, and which the private bills committee of the Ontario legislature threw out two weeks ago.

The congregation will be asked to indicate its attitude to the agreement and report May 11.

The overtures dealing with the settlement of ministers in vacant churches, and suggesting the appointment thereof of ministers for a limited time will not come before the general assembly until June, but will be dealt with at the September meeting of the Presbytery.

Permission was granted Avenue-road Church to mortgage their property for \$35,000 to facilitate erecting a new church to cost \$40,000. Kew Beach congregation are building a new church, and will be allowed to mortgage for \$7000. Royce-avenue Church property will be mortgaged for \$4000 to apply on a new \$5000 church.

The resignation of Rev. D. B. MacDonald, of St. Andrew's, Scarborough, will take effect May 20. Rev. J. A. Brown of Agincourt was appointed moderator of session during the vacancy.

### NOBODY WORKS BUT PARENT

#### But Government Hasn't Considered Revision of Pay List.

Ottawa, May 1.—(Special.)—In the senate to-day, Hon. Mr. Landry, referring to a statement in La France, that Messrs. Young, McIsaac and Reid of the railway commission have leisure, while Chairman Parent is at his post from morning to night, asked if the government proposed to dispense with the services of Messrs. Young, Reid and McIsaac, and pay their salaries to Mr. Parent.

Hon. Mr. Scott replied that no such matter had been considered by the government.

Commissioner of Industries.

The question of appointing a commissioner of industries and publicity will likely come before the board of control during the present week.

Among the applicants spoken of for the position is J. P. Patterson.

The Millstone.

Winnipeg, May 1.—(Special.)—This city starts its financial year \$10,000,000 in debt.

### GIRL ASLEEP FOUR WEEKS.

#### Affection of Nerves Sends Her Into a Half-Trance.

Belleville, May 1.—Edith Latta, a 15-year-old girl of Caniffon, near this city, has for four weeks been almost continually asleep.

She is lying in bed with great difficulty awakened to partake of her meals, and soon after goes off to sleep again. Doctors think she has an affection of the nerves, from which she may gradually recover.

Had to Let Fire Burn.

Watertown, N.Y., May 1.—The business portion of Depaureville a small village fifteen miles north of here, was destroyed by fire early to-day. The loss is about \$100,000. The village is without fire protection and is not on a railroad, and all that could be done was to allow the fire to burn itself out.

## HUMBER FORT PLAN OFF? BORDEN NOT AWARE OF IT

Controller Jones says So and Mayor is Mysterious — Stores Buildings on Old Fort Property.

Controller Jones yesterday caused a scare by stating that he believed the military authorities had determined to stay at Stanley Barracks instead of moving to the banks of the Humber.

In answer to a query from The World as to whether the militia department had abandoned the plan of new barracks at the Humber, Sir Frederick Borden answered: "Certainly not."

"Not to my knowledge. I have heard nothing about it if such is the case," said Brig-Gen. Otter's reply last evening.

Controller Jones said in the board of control yesterday: "From what I heard the other day I am of the opinion that the proposal to remove the Stanley Barracks to the banks of the Humber has been abandoned."

"If we were talking privately I might be inclined to agree with you, but I have no authority to make such a statement," stated the mayor.

"Well, I don't see any reason why the matter should be kept quiet," said Controller Jones. "I was talking with a number of military officers, and they make no secret of their opinion that the matter has been dropped, and that they will be in the present barracks for many years."

Gen. Otter stated that he had interviewed the mayor earlier in the day, but it was regarding proposed military stores buildings.

The board received a letter from Gen. Otter, enclosing a plan of the property wanted by the government for their stores. It includes 17 acres and takes in all the Old Fort property from Bathurst-street west to Strachan-avenue, and from the lake to the north limit of the property, excepting the old cemetery ground. It would take all the

STOCK FARMING & LIVE STOCK EDITION

32 LOADS AT CITY MARKET PRICE FOR BEST CATTLE FIRM

Medium Cattle Slow of Sale—Hogs Unchanged and Sheep and Lambs Firmer.

Receipts of live stock at the city market since Friday, as reported by the railways, were 32 carloads, composed of 128 cattle, 488 hogs, 136 sheep and 506 calves.

The quality of fat cattle was fair to medium. There was a fair trade, considering the large number of cattle offered, but prices were not quite as good as on Monday at the Junction, especially for butchers' stock.

Some seven or eight loads of shipping cattle sold at prices ranging from \$4.30 to \$5.25 per cwt. One lot of exporters was reported as having been sold at \$5.25, but the prevailing price was \$5 per cwt. Export bulls sold at \$3.50 to \$4.12 1/2 per cwt.

Butchers' cattle were more plentiful and prices were inclined to be easy at quotations. Picked lots sold at \$4.75 to \$4.90; kinds of fair to good sold at \$4.25 to \$4.50; medium at \$4.30 to \$4.50; fair to good cows at \$3.65 to \$4.25; common cows at \$3.25 to \$3.80 per cwt.

Feeders and Stockers. If Murly reports a fairly good inquiry for short-keep feeders of the right kind. This class, if anything, sold higher. There is also a good inquiry for good right thigh steers, weighing from 750 to 900 lbs., which kind are more plentiful; all other kinds are slow of sale.

Mr. Murly bought about 150 at the following quotations: best short-keepers, 1250 lbs., at \$4.70 to \$4.90; best feeders, 900 to 1100 lbs., at \$4.40 to \$4.70; best cows, 900 to 1000 lbs., at \$4.10 to \$4.40; best hogs, 800 to 900 lbs., at \$3.50 to \$4.10; best stockers, 500 to 700 lbs., at \$3.50 to \$3.85; common stockers, 2c per lb.

Milk Cows. About 20 milk cows and springers sold from \$30 to \$55 each. Trade in calves was brisk and most of this class would have sold readily.

Over 500 calves were delivered on the market, many of them being "bobs." Prices ranged from \$3 to \$6 per cwt.

Sheep and Lambs. The run of sheep and lambs was light and prices were firmer; export ewes sold at \$4.75 to \$5.25 per cwt.; hogs, \$3.25 to \$3.75; yearling lambs at \$6.75 to \$7.25 per cwt.; spring lambs sold at \$3 to \$5 each.

Hogs. Mr. Harris reported hog prices unchanged at \$7.40 for select and \$6.90 for lights and fat.

Representative Sales. Maybee, Wilson & Hall sold: 10 exporters, 1250 lbs. each, at \$5.25; 4 exporters, 1250 lbs., at \$5.15; 4 exporters, 1250 lbs., at \$5.10; 20 exporters, 1250 lbs., at \$5.10; 5 short-keep feeders, 1350 lbs., at \$4.75; 6 feeders, 1150 lbs., at \$4.75; 6 butchers, 1150 lbs., at \$4.85; 3 butchers, 1150 lbs., at \$4.85; 2 butchers, 1050 lbs., at \$4.80; 15 butchers, 1100 lbs., at \$4.75; 21 butchers, 1210 lbs., at \$4.75; 3 butchers, 1130 lbs., at \$4.75; 15 butchers, 1050 lbs., at \$4.70; 30 butchers, 1000 lbs., at \$4.67 1/2; 5 butchers, 1250 lbs., at \$4.65; 7 butchers, 1130 lbs., at \$4.65; 15 butchers, 1050 lbs., at \$4.65; 21 butchers, 950 lbs., at \$4.35; 22 butchers, 1200 lbs., at \$4.35; 15 butchers, 1100 lbs., at \$4.35; 22 butchers, 1200 lbs., at \$4.35; 18 butchers, 1080 lbs., at \$4.15; 23 feeders, 1150 lbs., at \$4.15; 24 feeders, 1180 lbs., at \$4.15; 2 export bulls, 1250 lbs., at \$5.50; 1 export bull, 1750 lbs., at \$4.40; 1 export bull, 1650 lbs., at \$5.50; 12 butcher cows, 1100 lbs., at \$4.55; 5 butcher cows, 1200 lbs., at \$4.15; 5 butcher cows, 1130 lbs., at \$3.80; 1 milk cow, \$40; 10 sheep, 110 lbs., at \$5.25; 15 sheep, 140 lbs., at \$5.25.

Corbett & Henderson sold: 8 exporters, 1250 lbs., at \$5.20; 18 exporters, 1250 lbs., at \$5.10; 14 feeders, 1150 lbs., at \$4.80; 5 feeders, 1200 lbs., at \$4.90; 9 butchers, 1050 lbs., at \$4.80; 1 butcher, 1210 lbs., at \$4.90; 22 butchers, 1200 lbs., at \$4.75; 7 butchers, 1050 lbs., at \$4.50; 7 butchers, 970 lbs., at \$4.50; 10 butcher cows, 1140 lbs., at \$3.80; 7 stockers, 600 lbs., at \$3.10; 9 butchers, 950 lbs., at \$4.00; 14 butchers, 1020 lbs., at \$4.70; 2 bulls, 1550 lbs., at \$5.00.

George Rountree bought for the Harris Abattoir Co. 7 loads fat cattle; fair to good butchers at \$4.30 to \$4.75; medium to fair cows at \$3.25 to \$3.60, and a few bulls at \$4 to \$4.25 per cwt.

Wesley Dunn bought 15 sheep at \$5 per cwt.; 95 yearling lambs at \$7.25 per cwt.; 120 calves at \$6.50; 10 spring lambs at \$5.25 each.

James Armstrong bought 9 milk cows and springers at \$51 to \$49 each.

Jesse Dunn bought one load exporters, mixed steers and bulls; steers at \$5 to \$5.25; and bulls at \$4 to \$4.25 per cwt.

Fred Rountree bought 5 milk cows at \$41 to \$34 each.

Alex. Lenzack bought 30 butchers and exporters at \$4.90 to \$5.10 per cwt.

Crawford & Hunslett sold: short-keep feeders at \$4.00 to \$4.50; butchers at \$4.00 to \$4.75; exporters at \$5 per cwt.

T. Halligan bought several lots of export cattle at about \$5 per cwt.

Fred Dunn bought one load butchers, 1000 lbs., each, at \$4.25 to \$4.50 per cwt.

T. P. Tracey sold: 20 butchers, 900 lbs., at \$4.75; butchers, 1050 lbs., at \$4.75; 14 mixed butchers, 1250 lbs., at \$4.75; 14 cows, 1250 lbs., at \$4.20; cows, 1000 lbs., at \$3.20; 10 butchers, 1050 lbs., at \$4.75; 14 exporters, 1275 lbs., at \$5.25 per cwt.

Junction Live Stock. H. P. Kennedy bought several loads of butchers at \$7.15 per cwt. for select and \$6.90 for light fat.

Mr. Loring of the Loring Packing Co., Montreal, visited the Toronto Stock Exchange and stated that he was well pleased with them.

WEEKLY MARKET REVIEW.

Demand is Better for Prime Cattle at Firmer Prices. Receipts of live stock at the Toronto markets during the past week have been moderate, but quite equal to the demand, with the exception of hogs.

Export Cattle. Prime cattle, weighing from 1350 to 1450 lbs. are in good demand at \$5.15 to \$5.25, but this class of cattle are scarce and likely to be while the half-finished, medium, rough kinds are plentiful, and sell from \$4.75 to \$5.00 per cwt.

Butchers. Butchers' cattle of prime quality are also scarce, in fact, all classes of butchers' are not nearly as plentiful as are the shippers. Prime butchers' cattle, 1050 to 1150, are nearly as high in price as the exporters. One lot of 16, amongst which were some cows, went as high as \$5.15 at the Junction on Monday. Common to medium cattle range from \$4.25 to \$4.75 per cwt. Fat cows at \$3.00 to \$4.40.

Feeders. There is a good demand for feeders for grass purposes, and not a few cattle brought in as shippers have been taken back to the country as short-keep feeders at prices ranging from \$4.60 to \$4.85, and we heard of one lot of select for which \$5 per cwt. was paid, but this is getting dangerously high, in fact, present prices on the British market do not warrant more than \$4.50 for the choicest short-keep feeders.

Milk Cows. Milk cows and springers of choice quality are not plentiful. Deliveries of all kinds have been remarkably light this week. More good to prime cows would sell readily. The prices paid for the class being offered ranged from \$30 to \$55 each, and one lone cow brought \$60.

Calves. The run of veal calves, or rather the run of "bob" calves, has been

FALL WHEAT PROSPECTS.

Are Good With the Exception of York County. While locally in York County the fall wheat situation is said to have suffered a serious reverse within the past two weeks, owing largely to the continued drought and the presence of cold winds elsewhere in the province, the outlook generally is said to be excellent. "In Bruce County," said Col. Hugh Clarke, "prospects are good. The average sown was fully up to the average, while the amount winter-killed appears to be very small."

"The situation in West Wellington," said James Tucker, M.L.A., "is good. West Wellington is not a large wheat-growing county comparatively speaking, but wherever there is any it looks splendid. Clover, too, is all that could be desired."

"In North Perth," said James Torrance, M.L.A., "there is hardly a bare spot to be seen in the wheat fields, while clover also looks well. "indications all point to a good average crop in East Lambton," said James Montgomery, M.L.A. "and wheat was little sown in that county."

"In South Ontario," said Charlie Calder, "while the acreage is not a large one, the crop generally appears to be in excellent condition and looks green and thrifty. Clover also has apparently come thru the winter uninjured from the frosts and shows little if any bad results from heaving."

William O'Neill, Waterloo County, was far from sanguine regarding the outcome of the wheat crop. "Within the past fortnight the wheat in Waterloo County," said Mr. O'Neill, "has depreciated very materially. The cold winds and dry weather have certainly wrought great damage, and considerable of the crop will have to be plowed up."

Locally in York County the past two weeks has in my opinion damaged the fall wheat crop to the extent of from 15 to 20 per cent., said H. B. Schmidt, farmer and miller of Newtonbrook. "It has lost the fresh, thrifty appearance which it for a time had, but the cold winds and lack of moisture have browned it up and undoubtedly greatly retarded its growth."

In conversation with the deputy minister of education yesterday Mr. James informed the World that the acreage in fall wheat would extend to 1,000,000 acres in 1906. The loss in some seasons was of course much larger again than that. In 1905 the number of acres of fall wheat actually harvested in Ontario was 796,000 acres; in 1902, 748,592, and in 1905, ten years ago, 745,000 acres. For the three years preceding 1902, that is, 1890, 1900, and 1901, the average harvested each year was considerably over one million acres.

EASTER BEEF.

The above picture represents a load of 18 choice lots on the city market the week before Easter. They were brought in by Wellington Hodgins of Lidian, and sold by Maybee, Wilson & Hall, to George Rountree for the Harris' Abattoir Co. These cattle were only 18 months old and weighed 1650 pounds each, costing \$5.50 per cwt.

change as would permit the admission of Canadian store cattle to be fattened on British pastures would be distinctly injurious to Manitoba and the Northwest. The cattle exported from Great Britain has decreased remarkably since the present embargo was passed in 1896. Last year we sent down east for export from the Northwest 60,000 head of cattle, and I would say that altogether there were 140,000 cattle marketed for home consumption and for export purposes in the Northwest. There are now between 700,000 and 1,000,000 cattle on the farms and ranches of Manitoba and the northwest provinces, and any sudden change in the market conditions means a serious thing for the country.

Mr. Gordon also made the emphatic declaration that he "believed it to be in the best interest of Canada that the embargo should not be removed."

Caners Have Their Way. St. Catharines, May 1.—Tomato growers of the district who had undergone a strenuous fight with the Amalgamated Canners, Limited, which owns most of the canning factories in the province, confess themselves defeated and notwithstanding the starting up of several independent canning factories in the district, the general price for tomatoes this fall will be twenty-five cents a bushel. This was the price last year, and the growers' fight was for thirty cents.

Hog Notes. The pigs from a mature sow are always better than from a young one. The hog can turn more articles of diet into meat than any other farm animal. A good foundation for profitable growth can be laid before the pigs are born. Always select the largest, most growthy and best sows for breeders. A good, clean, bony leg is better than a fleshy one on a hog as well as on any other animal. Sunshine, fresh air and access to the ground are all necessary to the health, growth and development of pigs. Dry dirt is not only an absorbent, but a disinfectant, and therein lies the advantage of a good earth floor. An abundance of milk for the first eight or ten weeks of the young pig's life is the best preparation they can have to fit them for profitable growth in after life. One of the best feeds for young pigs after they have first learned to eat is whole-oats soaked until soft in sweet sking milk. The brood sow after her pigs attain a few days age requires a good deal of rich food to keep up both her condition and her flow of milk. Continuous growth is necessary to make swine profitable, and this cannot be obtained without plenty of feed. A little grain each day with plenty of pasture will secure this. No matter how well fed the sows and pigs, they will not thrive as they should unless in addition they have dry comfortable quarters, and this is essential, even in summer.

STEELE, BRIGGS' Field Root Seeds. The Best Sorts for the Dairyman and Stock Feeder. Sold in Sealed Packages Only. MANGEL. Steele-Briggs' Prize Mammoth, or Giant Long Red. Produces immense crops of large, handsome, even-shaped roots. Price (postpaid) per lb. 30c.; in 4-lb. lots or more, 25c. per lb. Steele-Briggs' Giant Yellow Oval, or Intermediate Mangel. The STEELE, BRIGGS SEED CO., Limited. TORONTO, HAMILTON, AND WINNIPEG.

HALF THE LOAN PAID.

Col. Matheson Extends Guarantee for Second Million. Half the loan of \$2,000,000 by the Soo company has been paid off and the province relieved of the guarantee to that extent. It is the information received by Premier Whitney from Col. Matheson from New York yesterday afternoon. The telegram read: "One million paid off entirely and the guarantee for six months of the other million extended."

INDIANS MAKE GOOD.

English Customs in India Depleted by Dr. Warren. At the nineteenth annual banquet of the Methodist Social Union of the city, held at St. Paul's Church, last night, Bishop H. W. Warren of Denver, Colo., the guest of the union, gave an interesting address on "England in India" to an audience that packed the schoolroom. Dr. Warren spoke for an hour on the tendencies of the heathen countries, the impressions of the Christian civilization on the Hindoo and the intellectual side of the native Indian when brought under the light of Christianity. Solos were given by Mrs. Kennedy and O. B. Dorland.

DIVIDED INTO FOUR.

Hotelmen Get Concession in Payment of Higher Fee. Also the hotelmen have until the 15th inst., to make their first payment on their license fee, which is \$600 on their license fee. Chief Inspector Purvis yesterday received about \$4500. This is considered an excellent showing for the first day. Chairman Wilson of the board of license commissioners has arranged with the Hon. Mr. Hanna that the total payment of \$1200 can be divided in four parts, payable every three months, the last payment to be made Nov. 30, last payment to be made Nov. 30, last payment to be made Nov. 30.

PRICE ARTHUR'S TOUR.

Ottawa, May 1.—(Special).—The official program given out to-night at Government House announces that Prince Arthur will arrive in the City of Quebec on Thursday, May 3. He will spend Tuesday and Wednesday, May 3 and 4, at Montreal. The Virginian sails at daylight, May 1st. Talker Pitt Street. William Morrow, 26 St. Paul-street, fell in a fit yesterday afternoon at Church and Adelaide-streets. He was taken to the Emergency and afterwards went home.

Census of the West.

Ottawa, May 1.—It has been arranged to have the census of population and agriculture in Manitoba, Saskatchewan and Alberta taken as they stand on the night of Sunday, June 24. Care is the main requisite in the management of sheep, but it must, as one of its prime elements, supply them abundantly with good feed. DR. A. W. CHASE'S 25c. CATARRH CURE. Is sent direct to the diseased parts by the Improved Blower. Heals the ulcer, cures the inflammation, stops droppings in the nose and permanently cures Catarrh and Hay Fever. Blower free. All dealers, or Dr. A. W. Chase Medicine Co., Toronto and Buffalo.

THE SLIDE IS STILL ON THE WALL ST. MARKET

OUR EXECUTOR

Ephemeral Rally Followed by Lower Prices—Canadians Have Another Weak Spell.

The Executor of your estate should be competent, experienced and thoroughly reliable.

NATIONAL TRUST COMPANY LIMITED

World Office. Tuesday Evening, May 1. The rally in Canadian securities yesterday and this morning was thoroughly ephemeral, and strongly tinged with speculative liquidation.

22 KING STREET EAST, TORONTO.

Ennis & Stoppani report the close on Cons. Lead, 18 1/4 to 19 1/4; do, bonds, 82 to 83.

president and the other vice-presidents of the B. & O. have resigned from the directors of the Consolidated Company.

May 1 holiday in London.

Ballie, Wood & Croft, 42 West King-street, furnished the following current prices for unlisted stocks to-day:

Coal strike tying up movement.

Rio Underwriting 40; do, stock, 80; do, bonds, 79 1/2; Consolidated Mines, 135; do, pref., 86; 83 1/2; Metropolitan Bank, 20; do, pref., 20; Crown Bank, 20; do, pref., 20.

Stocks plentiful in the loan crowd, but fairly large quantity loaning.

There are too many problems involved, and the aggregate of possibilities seem to be against full confidence for the time being.

Time expired for conversion of Union Pacific convertible bonds, after which bonds may be called at 107 1/2 and interest.

Continued gold imports expected, with \$32,870,000 arrived or on the way.

Banks have lost \$4,887,000 to sub-treasury since Friday.

There is a general feeling of conservatism, and the market formerly enjoyed strength as the result of operations of large volume, but this is not to be foregone.

National Bank has engaged \$5,000,000 in gold for import.

One thing seems assured—that such strength as the market formerly enjoyed as the result of operations of large volume, but this is not to be foregone.

People's Gas declared regular quarterly dividend of 1 1/4 per cent., payable May 25.

The opening market, while not particularly active, was fairly strong under the impetus of the increase in bond prices, and the prospects of a continuation of gold imports, although commission houses recommended purchases only on the declines.

While there has been some profit-taking this morning, and further short selling, we believe the market will have a substantial advance in the next three or four days, and advise purchases of good stocks on all recessions.—Town Topics.

The market, while not particularly active, was fairly strong under the impetus of the increase in bond prices, and the prospects of a continuation of gold imports, although commission houses recommended purchases only on the declines.

New York, May 1.—One block of 1,500,000 shares of spot copper was sold to-day at 19 cents. This is the highest price received for a large block by the party who negotiated the sale.

The market, while not particularly active, was fairly strong under the impetus of the increase in bond prices, and the prospects of a continuation of gold imports, although commission houses recommended purchases only on the declines.

Joseph says: Market will be somewhat irregular, but further rally is expected. Sell on sports but for moderate turns, taking quick limited profits. Pennsylvania is certain to go higher, Erie is being well absorbed. Ice continues to act well. Hold A.C.P. and B.R.T.

The market, while not particularly active, was fairly strong under the impetus of the increase in bond prices, and the prospects of a continuation of gold imports, although commission houses recommended purchases only on the declines.

Boston, May 1.—After a strong opening this morning, with prices well supported, there was a lead sold in price this afternoon, and stocks closed with losses all around. Birmingham sold down to 32; Boston Consolidated, Range 75; Osceola, 80 1/2; North Butte, 85 1/2, closing at 86; Granite sold at 12 1/2 and 12 3/4; Greens at 27 1/2; Franklin 15 1/2; Utah Consolidated, 5 1/2; U. S. Mining broke to 5 1/2, and the preferred sold down to 4 1/2. Telephone lost to 12 1/2; Dominion Steel sold at 29 1/2 and 29 3/4, closing offered at 29 1/2; no sales of Dominion Coal to-day.

The market, while not particularly active, was fairly strong under the impetus of the increase in bond prices, and the prospects of a continuation of gold imports, although commission houses recommended purchases only on the declines.

New York, May 1.—The plan by which Colorado Fuel & Iron proposed to raise \$4,000,000 for the purchase of additional equipment for the company's plants has proved a failure. Yesterday was the last day for subscription by the stockholders, and no subscriptions were received. A director of the company admitted that the plan had not succeeded, and that none of the stockholders had responded to the offer made by the company.

The market, while not particularly active, was fairly strong under the impetus of the increase in bond prices, and the prospects of a continuation of gold imports, although commission houses recommended purchases only on the declines.

New York, May 1.—These stocks seem to be in a position to rally a little further before meeting much check.—Union Pacific, Reading, A. C. P. Steels, St. Paul and New York Central. Con. Gas and Fuel have met offerings around the high levels of yesterday, and the failure of Fuel financing is not a bull card. Professionals will sell R. E. T., R. S. S., and M. C. These last, however, strength, according to information obtained up town last night. These last, however, strength, according to information obtained up town last night. These last, however, strength, according to information obtained up town last night.

The market, while not particularly active, was fairly strong under the impetus of the increase in bond prices, and the prospects of a continuation of gold imports, although commission houses recommended purchases only on the declines.

Baltimore, Md., May 1.—Following the recent investigation by the Interstate Commerce Commission into the relations existing between coal-carrying railroads and mining companies on their lines, it is announced that the Baltimore & Ohio Railroad has disposed of its holdings of stock in the Consolidated Coal Company, and that Oscar G. Murray, George F. Randolph and Hugh L. Bond, Jr., the first being the

able of judging whether any stock had any liability after I had looked at the charter.

Mr. Junkin went on to speak of bonus stock, appertaining to the Toronto Hotel Company, and purchased by the Manufacturers' Company.

Mr. Junkin also spoke of \$30,000 worth of bonds purchased June 5 of the Mexican Light and Power Company.

These shares of Mexican stock, said Mr. Tilley, "so far as your books indicate have been possessed at any time by any person."

Mr. Junkin said that the minutes authorizing the purchase of the bonds and there was no record in the correspondence docket in the vault.

He would not only look up the minute to see what had been authorized, but I understand that he would see the amortization schedule if the company did a larger business in this respect they would introduce a better system.

Mr. Junkin recounted the efforts made to become the underwriter of the Electrical Development bonds on behalf of the Manufacturers' Company.

He said that the application had been unsuccessful because of the fact that the company did not have the necessary amount of money.

He said that the company had been unsuccessful in its efforts to become the underwriter of the Electrical Development bonds.

JUST OUT

O'KEEFE'S PILSENER LAGER

A new brew and the pride of the brewery. It's the best Lager that Canada's model brewery ever sent out.

All the leading hotels, cafes and bars now have O'Keefe's Pilsener. Order up.

"THE LIGHT BEER IN THE LIGHT BOTTLE"

REGISTERED.

WAR DEPT. ONLY TO SPEND NATION'S GIFT TO 'FRISCO

Amount Appropriated Included Cost of First Relief Sent—Still \$700,000 Remains.

San Francisco, May 1.—Replying to Chairman Phelan of the relief committee in San Francisco, Secretary of War Taft thus explains his position in the disbursement of the congressional grant.

"Instantly upon receipt of Gen. Funston's telegram of the extent of the danger and the pressing need of food and shelter for more than one hundred thousand people, also I was without lawful authority to do so, I ordered sent to San Francisco, costing \$200,000, tents, blankets, coats and bedding costing more than a million dollars, and medical stores costing \$150,000 to be used and distributed for the relief of the sufferers.

"The transportation of these supplies cost more than one hundred and fifty thousand dollars. I made this order anticipating that congress would ratify my action. Congress has already been incurred for these purposes aggregating one million dollars and a half dollars and recommended the appropriation of a million more, or two millions and a half in all. Congress thereupon increased the appropriation to two millions and a half in all.

"On the recommendation of Gen. Greely and Major Rial, I ordered 2500 more troops to San Francisco, which, with previous transportation for the same purpose, involves an expense of \$250,000. There is left available of the appropriation hereof not to exceed seven hundred thousand dollars, which under the law can only be expended for rations, quartermasters and medical supplies and transportation of troops, and which can only be expended thru the agents of the war department.

"I have no power nor legal authority to turn over the money appropriated by congress to your committee to be expended by you or to expend it for any but the specific purposes stated in the congressional resolutions."

San Francisco is to build a new city hall at once, a temporary structure, but one which will do away with the necessity of paying the high rent rates which the owners of property available for municipal use are inclined to charge.

The fact that many of the churches in San Francisco and many other places on the Pacific coast were demolished by the earthquake alone, which precludes their receiving any insurance, has led the Presbyterian board in New York to send out an appeal to all the ministers of their denomination, asking for funds to help rebuild the churches.

Will the City's Faith Be Kept? At the meeting of the York Pioneers yesterday afternoon a committee was appointed to take up the question of the threatened invasion of the old fort, and a resolution will be sent to the mayor and board of aldermen, asking for control of the fort, and asking that the condition on which this property was to be transferred to the city, namely its preservation as an historic relic, be faithfully carried out.

Firm Provides for Family. Walkerville, May 1.—The firm of Hiram Walker & Sons have made general provision for the widow and family of Charles Foran, who was smothered in one of their malt bins two weeks ago. Foran's widow will receive his salary until her youngest child is 21 years of age, and she will have her own rent free for twenty years, and all of the eleven children will be given employment as soon as each one is fitted for it.

MY FREE ELECTRIC BELT FOR MEN ALL AGES

Never before has another product made a free offer such as this. I do not distribute cheap samples, but am daily sending out dozens of my full power Dr. Sanden Electric Belts absolutely free of charge, and they are the same in every respect as though full cash prices were paid.

The proposition is simple. If you are ailing, call at my office and take a Belt home with you. Or, if at a distance—no matter where—send your name and address, and I will at once arrange to deliver to you one of my Belts, with suspensory or other attachment needed. Use same according to my advice until cured, then pay me—many cases as low as \$5. Or, if not cured, simply return the Belt, which will close the transaction. That's all there is to it. If you prefer to buy for cash, I give full wholesale discount.

Not One Penny in Advance Nor on Deposit

Not a cent unless you are made well. I make this offer to show men what faith I have in my own remedy, and I can afford to take the risk because not one in a thousand when cured, will cheat me out of the small amount asked. It pays me and my patient. My business more than doubled last year. Each Belt embodies all of my exclusive inventions (latest patent March 7th, 1906), and all patients receive the benefit of my 40 years' experience, a knowledge of infinite value and which is mine alone to give. I am the originator of the Electric Belt treatment, and all followers are imitators. This I will prove by any guarantee you ask. You wear my Belt all night. It sends a soothing current (which you feel) through the weakened parts, curing while you rest. Used for lost manhood, nervous debility, impotency, varicose veins, lame back, rheumatism, lumbago, dull pain over kidneys, pains in all parts of the body, kidney, liver, bladder disorders, constipation and stomach troubles. Send for the belt to-day; or if you wish more information, write me fully of your case and receive my personal reply. I will also send my descriptive book, sealed, free of charge. I have thousands of recent testimonials from grateful patients. Would you care to read some of them?

Let me take charge of your case at once. I will put new life into you in two weeks' time. Don't you do the worrying. Put that on me. I will take all the risk. I have something to work for. Unless you are cured I get no pay. Address

DR. A. B. SANDEN, 140 YONGE STREET, TORONTO, ONTARIO.

Office Hours: 9 to 6; Saturdays until 5 p.m. Double lock fast doors to witness the greatest Shakespearean attraction on the American stage.
