GOD'S BLESSING ON THEM ! BY CHARLES WILTON.

God's blessing on them !- those old saints Who battled hard and long; Who cleft in twain a stubborn chain; And conquered might and wrong! O, Time! revere their sanctity, Nor let their glory cease; For by a mortal victory, sealed immortal peace.

God's blessing on them !-- those stout hearts. In these advancing days, Who seek to guide the progress stride From error's countless ways! O, be their track a track of light, The onward march of man:

The wise to shape our steps aright-The good to lead the van!

God's blessing on them !--one and all, Of every rank and clime, Who strive to aid the stern crusade Against the growth of crime! O be their names a rallying cry For ages yet to come: A word whose echo shall not die

'Till Nature's self be dumb!

THE OPEN SECRET.

BY FRANK E. MILLSON. The all-teaching Spirit For ever is near; He speaks, could we hear him, In voice strong and clear. But not to the worldling His secret is known; The open soul only Can call it his own.

At the altar of Beauty The worshippers fall, But the child playing round it Sees more than them all;

For pure beauty, pure being, Can never be theirs

Who want eyes for true seeing, And hearts for true prayers.

This was a fresh provocation in the country, and was quickly resented. It soon reached the Priest's ears that the poison of heresy was spreading. He resolved to take decisive measures, and administer at once the sharpest antidote. He came to Mick's house, and alighting off his horse, entered with a whip in his hand. Biddy, one of the culprits, was sitting in the corner, and Mick, happily, was at home. The Priest, in a rough, imperious voice, looking at Biddy, and taking no notice of Mick, said, " I hear that the devil is in this house." "Please your Reverence," said Mick, "the devil, I hope is not in this house; but the Lord, I trust, is here." The Priest, as if scorning seek her intercession?" " She did, your Reverence ; and, with the blessing of God, she will go again," said Mick. "I have nothing to say to you," said the Priest. " But I have something to say to you, please your Reverence," said Mick. "You are not a Catholic," said the Priest. "I beg your Reverence's pardon, I am a Catholic,' said Mick. How so?" said the Priest : did you I am a Protestant Catholic now." "You are entirely in the dark," said the Priest .---"I was in the dark before, please your Reverence," said Mick ; "but, blessed be God, I am in the light now." When he had done, Mick, suspecting this wild storm of empty words, without any kind of proof, was intended to frighten his poor weak and timid wife, very coolly said, " Please your Reverence, as you are a man of learning, will you show me all that you say in the Book ?" "What book ?" said the Priest, thinking perhaps that he had made some impression on Mick. "O, the Book," said Mick : " I will bring it out to you." He went to the big trunk and brought his octavo Bible, and, opening it, offered it to the Priest, saying, " Will your Reverence show me what you say in this, and I will believe it ?"

placed it, appropriately, in that storehouse of treasure, the depository of the Bible Society. There it now lies.

At length, in the commencement of 1835, Mick Healey's health began to fail, and completely broke down before the middle of it. He exhibited the same Christian spirit and maintained the same Christian consistency, to the very last.

At a visit which Mr. Gregg paid to him, he found that his son, who, perhaps was urged to it by others, was trying to work upon his father, in the hour of his weakness, to bring him back to the Church of Rome. He asked the dying man, " Would he not like to have the Priest with him, and to have mass said for him, or to hear the Litany of the Blessed Virgin ? and would he not wish to have a mass said when he was dead, to get his soul out of purgatory ?"

The dying peasant, gathering up all his strength, said, in answer to his son, " Priest ! Micky, trash; mass, trash; litany of the saints, trash ; purgatory, trash ; praying for the dead, trash; help of the Virgin, trash." Then he spoke of Christ and the Spirit .--He said, " Christ was all and everything the sinner could want." "I am," said he, "a sinner, a great sinner ; and Christ is all and everything to me." "Roman Catholics will be trying," said he, " to get to heaven their way, but they won't be able : there will be a Mick. How so?" said the Priest : did you not turn Protestant?" The night before his death, his wife, who continued in darkness, urged much that he would allow her to send for the Priest, stating that he should have the rights, of the Church before he died ; to which he answered, " No, no ! trash, trash ! it is all trash !" The night being stormy, she said, " It was a dark, dreary night for a poor soul to leave this world, and appear before God!" He raised himself in the bed, and said, "It is dark and dreary to you ; but it is all light to me. It is dark to you, because you don't know the way; and, when you are going by your own way, you will find the gaps stopped.

Sir Richard Arkwright.

THERE lived, some hundred-and-twenty years ago, in the town of Preston, in Lancashire, a poor, hard-working couple, of the name of Arkwright, with a large family of just a dozen children, which was increased in the year 1732 by another son. To this son they gave the name of Richard, and little thought how far at last that name would spread, and with what gratitude it should be pronounced, for many ages, by thousands of our rising youth.

Born thus in poverty, our hero had but small advantages of early education. It is probable that he never went to school; and it is certain that his childhood passed amid privations, griefs, and toils, known only to the very poorest in our manufacturing towns. So soon as he was able, he was called upon to aid in the support of the entire household, and was sent to learn to be a barber. This acquired, he earned a bare subsistence by shaving the beards and clipping the wigs of the working people resorting to his shop, and pursued these labours till he reached his thirtieth year. He now gave up the shaving part of his profession, and betook himself to the purchase and sale of hair for wig making. In following out this calling he journeyed far and wide; and saw more of the world than he had ever thought of.

It so happened that in these journeys he became acquainted with a man called Kay, who, in conversation, gave him information about the modes then common for spinning cotton, and interested Arkwright so much in the matter, that his ingenuity was set to work to contrive a machine to do the matter better. Arkwright was naturally of an ingenious turn, and now his mind became absorbed with the interesting object Kay had presented to it. Plan after plan was laid; model after model was set up; and advances made towards the production of the far-famed spinning machine, by which he made his fortune, and has helped others to do the same since then. One great trial, however, pursued him all along, and often hindered his work. His wife had no sympathy for this new hobby of her husband's; looked at it all as just a waste of time, and often broke and destroyed his models as soon as his back was turned. Arkwright, however, was not the man to give up for such petty hindrances, and on he worked till his ingenuity produced, and he appeared at Preston to set up, in conjunction with his friend Kay, the model of a spinning-machine. At that time he was miserably poor, and fearing some violence from the Lancashire people, who were ignorantly opposed to machinery, they removed to Nottingham, where a stocking-weaver inspected the moto partnership with Arkwright, and enabled him to take out a patent for the machine. Five years, however, had to elapse, and £12,000 to be expended, before it equalled the expectations of Arkwright and his friend. Great prejudice, much envy, and no little opposition, had to be overcome, in bringing out the invention. But Arkwright worked only outlive the ordeal all new things have to pass through, he would confer a large met, and he patiently waited for the storm to blow away. At last the machine answered all he wished; but now others claimed him of it. Law suits were the consequence, vexation was occasioned to him. And now his diligence met its right reward. His invention became well known and largely used. The cotton manufacture increased beyond all expectation, and speedily became one of the staple articles of British commerce. Arkwright became the possessor of large mills, and worked them was a benevolent man, and he felt his re- hear the sound of her Redcemer's name, and government: and though of Methodist pa- matter as there is reason to believe that all

Obituary Notices.

For the Weslevan

With a sorrowful heart I read in The Wesleyan f the 26th ult., the notice of the death of Mr. John Burns. I had the happiness of being intimately acquainted with that dear brother from the days of our early boyhood. Though widely separated we had kept up a regular corresponless in the all-devouring grave. And, now, the many excellent qualities of mind and heart with which he was richly gifted come rushing on my He had been in communion with the Methodist Church about six or seven years. During the three years previous to the commencement of his studies at Sackville, he had performed the duties of Class-Leader: and I was a witness to the intable and beneficial. Nor was he less admirable as a Prayer Leader and Sabbath School Teacher -heing ever at his post in the spirit of his duty. Believing himself to be called of God to the Sacred office of the Christian Ministry, he was most anxious to obtain every divine and human qualification for the great work. For a year prior to his admission at Sackville, he had regularly officiated as a Local Preacher. What he might ultimately have become as a Preacher, had his life been spared, it is idle to conjecture : but if a heart full to overflowing with true affection, piety of a most decided and comprehensive nature, vigorous reasoning powers, sound judgment, lively

rentage, yet had he carefully examined the grounds of his religious faith, and the Methodist Church was peculiarly the Church of his own

JUDGE MARSHALL'S LETTERS.

All the pensions included in the several ists, which have as yet been mentioned, or referred to, were granted under former Governments; and through rather long periods of time ; and therefore, the various strictures and remarks which have been made concerning them, cannot, and must not be considered, as conveying any reflection or imputation upon the high " Powers that be,"-the present Government of the Kingdom. Most of those exceptionable pensions were granted in times when the Kingdom was less embarrassed than now, as to pecuniary concerns; and less oppressed by taxation ; and, also, when the nobility and other aristocracy had more unrestricted power and rule ; and when less watchfulness and scrutiny were exercised on behalf of the interests of the people, generally ; and less intelligent and energetic opposition urged, with regard to all improper appropriation or employment of the national revenues. Such shameful and extravagant pensions, as many of those which have been stated, and commented on, no Minister of the Crown, at the present day, we may presume, would even venture to propose ; nor, if proposed, is it probable that even a House of Commons, so very generally compliant to the Government for the time being, would venture to incur the popular censure and reproach, by allowing them. Probably, many of those pensions could not now be entirely withdrawn, without incurring a breach of national faith and honor; but, doubtless, some among them, might be so withdrawn; and others reduced to suitable or adequate amounts ; without any such violation; or any real injustice or injury being done to the parties concerned. Hereditary pensions, to say the least, are, under all circumstances, extremely exceptionable. The public service, or merit of one person, can never, merely, or of itself, form a sufficient or equitable ground, for bestowing a reward for such service upon others; though of the same family or kindred, with the original deserving grantee; more especially, where such others are not under any such circumstances of embarrassment or distress as to require it.

It has been estimated, and sufficiently appears, that since the close of the war in 1815, not less than Five Hundred and Eighty Seven Millions of money, have been spent in keeping up our fighting establishments. The yearly pay of 150 Colonels, alone, amounts as is shown to £200,-575 :- 29 of them being Colonels of Life and Horse and Foot Guards, and Dragoons, receiving annually, in pay and emoluments, sums of from £1,500 to £2,500 each; the latter sum, it is stated, and even more in some instances, being received by some of the Colonels of the Foot Guards.

SUMMARY OF THE SALARIES &C. OF THE PUBLIC OFFICERS, WHO RECEIVE ABOVE £1000 ЕАСП.

From the returns moved for by Mr. Williams, and printed by order of Parliament, in 1844, it appeared, that there were 56 Generals, 29 Major Generals; 79 Lieutenant Generals; 28 Admirals, of different grades, and 31 other Military and Naval officers, of different grades, receiving Salaries of upwards of £1000, per annum-dividing amongst them, a total of £397,297 Sterling. The following may be given, as a Summary statement, of the 841 Placemen and Pensioners receiving upwards of £1000 annually; taken from the Parliamentary return referred to above :---

No. of Officers.	Description.	Total E:no!:::ments.	
252	Civil Officers	1 469,950	
164	Judicial Officers	419,837	
74	Diplomatic and Consular	178.540	
35	Naval Officers	44.168	
158	Military Officers	3.22,961	
30	Ordnance Officers	30,170	
118	Colonial Officers	201,340	
10	Officers of House of Commo	ns 21.407	-
841	Total	1,688,371 per s	nnum

But this amount does not comprehend more than, probably, one fifth of the amount paid in Salaries and pensions, out of the public purse. There are all the officers and pensioners under £1000, These, are, also, paid from so many different funds, that it is really difficult to get at a correct estimate of their amount. Many are paid out of the Excise, Customs, and Post office revenues; a large number of heavy salaries are paid by the East India Company; a vast amount is paid in the same way out of fees, levied on the public, in the Courts of Justice ; in public offices; and from the estates of bankrupts; others are paid out of the crown lands; and, it is not too much to say, that the public officers and pensioners of the Country, cost the people not less than Ten Millions, sterling, annually.

The total number of government employes in 1848, was about 24,000; of which. the S + 1 officers referred to above, divide among them, above a million and a half, yearly. This does not include, either, the public officials in the law Courts, the Royal household; the Colonies; or under most of the Commissions, which would enormously swell the number.

The Chancellor of the Exchequer, in bis speech referred to, at the commencement of this letter, delivered during the present session of Parliament, expressly stated, "since 1830, we have borrowed 35 millions; of which we have paid off'8 millions; so that in 20 years of pears, we have added 27 mil-lions to our debt," and, yet, he adds, that he "did not think it necessary to make a great effort to reduce this debt." On a view of the whole of the many enormous and extravagant national expenditures which have now been exhibited, it is not at all surprising and prevention can only be effected by the that such an addition has ensued But sure-expression of indignant public opinion or by ly, its existence is most disheartening, and historial or other caduring memorials to the ominous of evil, with regard to the future, same effect. After the usual preliminary services the Rev. Mr. POPE, as the unior minister, was called upon to occupy the chair, who after a brief remark or two requested Mr. Alex. DESBRISAY, as Secretary, to read the Report. This request secured the attention of the audience to a somewhat lengthy paper upon the subject of missions, it being known, that Mr. Desbrisay had been but lately appointed to the office of Secretary, and that the Report which he was about to read was his first production of that nature ; but after the reading of the first few sentences, some of those present began to breathe freely again, and as he passed on to the end of the Report, all appeared to approve the appointment of our friend to this important position. For one I felt thankful, that so many of the children of our ministers not only connect themselves with the church of their fathers, but seek to be useful in their several spheres. In this instance the Chairman was the son of a preacher, the retiring Secretary, who, on removing from the Circuit, resigned his office, together with his successor could boast the same descent; while we were favoured on the platform with the presence of another of the same class, and I also saw one or two more in the congregation, who, we hope, will soon give themselves to God, and, like many others of our ministers' sons, become useful in their generation. The Christian Church. No. III.

THE DUTY OF ITS MEMBERS.

The word Church is a translation of the Greek word "Ekklesia," which literally signifies, " An took care, however, that the land tax was taxation; and, thus, they are continually assembly of the people met together according to not increased. But this is not all; The acting upon each other, so as to increase the law, to consult about the good of the commonwealth." Potter's Antiquities of Greece, Book i. chap. 17. But the word as used in the New Testament and in Christian Theology, signifies ; "The congregation, or assembly of Christian believers called out of the world by the preaching of the Gospel;" or as the Apostle Paul explains it; 'Them that are sanctified in Christ Jesus, called to be saints." 1 Cor. i. 2.

The Church thus defined consists of two classes of persons-ministers and members; both equally important; each class having duties to perform towards God and towards each other; which duties are designed to be reciprocally advantageous. Many persons will talk much about the duties of ministers, but seem almost to forget that the people have duties to perform as well as their ministers. The obligations are not all on one side. Having in our last considered the du-ties of "Christian Ministers," we shall now con-sider The duties of the members of the Christian Church.

1. They should receive their ministers with rerespect and christian affection. When the Redeemer commissioned his twelve Apostles,-he said, And into whatsoever city or town ye enter, enquirewho i n it is worthy; and there abide, till ye go thence. And whosoever shall not receive you, nor hear your words, when you depart out of that house or city, shake off the dust of your feet. Verily I say unto you it shall be more tolerable for the land of Sodom and Gomorrha in the day of judgment than for that city." Matt. x. 11, 14, 15. The Apostle says, 1 Cor. iv. 1, " Let a man so account of us as the Ministers of Christ, and as stewards of the mysteries of God."

Some persons speak of, and treat Christian ministers as mere hirelings, who have to preach so many sermons, and perform certain other duties; for which they are to receive a definite reward. But surely an engagement like this, can never be based upon the New Testament or sanctioned by reference to Apostolic usage. 'Tis true, the Scriptures represent Christian minis-ters not as loilerers, but as " lubourers ;" and add, The labourer is worthy of his reward." In the text above quoted the Apostle speaks of himself and his fellow-labourers as "ministers of Christ"on which Mr. Wesley observes : "The original word properly signifies, such servants as laboured at the oar in rowing vessels, and accordingly intimates the pains which every faithful minister "ministers" or labourers, they are also "Stew-ards of the mysteries of God": that is Preachers or expounders of God's word, and Pastors of the Christian Church ; who are to "feed the flock of God - taking the oversight thereof." A mere hireling Preacher is a disgrace to Christianity.

It is then the bounden duty of the members of was my acceptable du- spiritual instruction from them; not to hinder, "throne of grace" in faith and prayer; not indeed to suppress their own judgment, stifle their It may be as well to state before I close this science, and blindly follow the dictum of any man; nevertheless they should treat with deferverily, I say unto you, he that receiveth whomsoever I send receiveth me ; and he that receiveth And St. Paul says, Heb. xiii. 17;--" Obey them that have the rule over you, and submit yourselves; for they watch for your souls, as they must give account, that they may do it with joy, and not with grief : for that is unprofit-

VARIOUS ADDITIONAL PARTICULARS RE-SPECTING TAXATION IN THE UNITED KINGDOM.

It has been seen, already, from the speech of the Chancellor of the Exchequer, on presenting the Budget for the present year, that the land tax of the United Kingdom, amounts to only $\pounds1,183,000,$ while the other taxes amount to upwards of 50 Millions. And it has also been shown in a previous part of this letter, how very greatly the proportion of the land tax, in several other of the larger States of Europe, as compared with other taxes, exceeds the proportion of the land tax in the United Kingdom, compared in like manner.

purposes, however, to be answered by such xposures, are the warning and admonition they convey; and the restraint they impose, with regard to the measures of rulers and governments, and official characters, in general, both for the present and the future. It is now universally known, that in the present closely investigating, and comparatively literary age, an honest, independent, and watchful press, is the most powerful and preventing, as well as exposing public corruption, oppression, and fraud. Moreover, with reference to the particular exposures which have here been made, it was indispensibly requisite to make them, in carrying out and fulfilling the design proposed and undertaken, of exhibiting all the brought upon the Kingdom its present oppressive weight of taxation.

ed to a series of heirs, unattachable by the

claims of Creditors. They have specially

exempted lands from the heavy probate, and

legacy duty, imposed on all other kinds of

property, decending by inheritance or will.

By this means, they are exempted from the

payment of taxes, which the rest of the com-

munity pay, to no less an amount than $\pounds 2,$ -

585,000, annually. Say that a poor labour-

ing man, by dint of hard industry, has saved

two hundred pounds, which be leaves to

his relatives, at his death; the amount is

taxed at the rate of from one to ten per cent;

according to the nearness of kin of the rela-

tions to whom he bequeaths it. But say, that

a lord dies, and leaves an estate to his suc-

cessor of $\pounds 100,000$ a year; not one penny

is, in this case, paid in the shape of tax.

The lord's cottar, who has saved £20, and

leaves it to a friend, is charged $\pounds 2$ in tax;

the lord himself, who has never saved, but

only spent, leaves landed estates, though they

should embrace an entire county, altogether

Should any person object to the exposures

which have here been made as to the pen-

sions, and the other public expenses which

have been stated, and enquire what useful

purpose can it serve? It may, justifiably be

answered, that it is quite as just and pro-

per, to detect and expose public corruption,

fraud, or misbehaviour, and to obtain resti-

tution or recompense, if at all practicable,

untaxed.

The same work, from which so many statements and remarks have, in substance, been extracted and given, on this subject of taxes, contains several similar statements and strictures regarding clerical revenues drawn from the people, and the financial affairs, generally, of the Established Church ; some of which will more appropriately than some of which will more appropriately than here, be given in a subsequent letter show-us from inserting the Resolutions themselves.

2. They should attend the worship of God, and preaching of his word, with due reverence and

" Take heed therefore how ye hear." Luke viii. 18

1. This injunction implies that men should hear the Gospel, and therefore should go where it is preached.

Occasionally we meet with individuals who absent themselves from the House of God, and

if asked the reason, will say, "I can read my Bible at home" : others will say, " Our Preacher is not a man of first rate talent; he cannot teach me anything; besides I am well acquainted with all the facts and doctrines of the Bible, I need not go therefore to be instructed on these subjects.'

356

To the above it may be replied :-- " Persons who purposely absent themselves from the House of God seldom read their Bible much;" and much less do they read it in a spirit of proper devotion. If your minister is not a man of " first" rate talent ;" yet if God has called him into the ministry, (and that is taken into the account in these remarks) he certainly has talent, and at least in some points can instruct even you in the things of God. But if you really understood "all mysteries and all knowledge;" even this would be no reason why you should absent your-self from the House of the Lord, or neglect to join in the public worship of that Being who has created and who preserves you ; and of that Sa-viour who has bought you with his blood. "To the Jews it was commanded ; but unto the place which the Lord your God shall choose out of all your tribes to put his name there, even unto his habitation shall ye seek, and thither thou shalt come." Deut. xii. 5. In the New Testament, St. Paul cautions the Hebrews; that they " forsake not the assembling of themselves together." It is worthy of remark, that this injunction of the Apostle was to the very people who received the above command, to shew that Jehovah having commanded public worship under the law, de-signed that that command should be perpetual; and that under the law, men should attend public worship : that in the latter, as well as in former days, unto the house or "habitation" of the Lord they "should seek," and "thither" they should "come."

2. " Take heed thkrefore how ye hear," teaches that you hear in a proper devotional spirit, and therefore implies an early attendance upon public worship. Many persons make practice of coming to the House of God and are seldom seen in their seats until after the service has begun, and thus by the noise they make in getting to their seats, and the gaze they excite in the congregation,-are constant interrupters of public devotion. If asked the reason they will sometimes reply, " O I was there just after they began to Some will say, as though it were right : sing. "I arrived just after the first prayer;" while some go so far as to say: "All I care about is to get in time for sermon." Such persons should know, that the worship of God consists not principally in hearing a sermon; but chiefly in singing his praises, in reading his word and prayer. Those therefore who come late to the House of God, do not come so much to engage in direct acts of di-yine worship, as to listen to the expositions which fallible man may give of the infallible and divinely inspired word of truth. How inconsistent is such conduct on the part of professedly Christian people! A line of conduct followed by some, and not less reprehensible than the above, is practised in many country places; it is to meet in groups before the House of God on the Sabbath-day; and then converse about their farms, or their vessels; their business or the news of the week : and when the minister arrives (sometimes after,) rush in and take their seats in a manner more like entering a theatre, than as shewing that deep solemnity and conscious un-worthiness, which should ever characterize guilty fallen man, when he enters more immediately into the presence of his Maker, ordares to take the Sacred Name in his polluted lips.

900

In attending public worship every one should be present before the service begins ; he should enter the sacred edifice in the spirit of devotion ; arriving at his place he should fall down upon his knees; invoke the Divine blessing; and then in solemn meditation wait until the moment arrives, when, with the whole congrega-tion, he is invited to engage in offering praise to the Lord God of Hosts. The Psalmist says,— "O come, let us worship and bow down : let us kneel before the Lord our Maker." Again, " Enter into his gates with thanksgiving, and into his courts with praise : be thankful unto him, and bless his name. The Rev. Charles Buck in his "Theological Dictionary," Article — "Worship of God,"—says, "We cannot conclude this article without taking notice of the shameful and exceedingly improper practice of coming late to public worship. It evidently manifests a state of lukewarmness ; it is a breach of order and decency; it is a disturbance to both ministers and people; it is slighting the ordinances which God has appointed for our good; and an affront to God himself! How such can be in a devotional frame themselves, when they so often spoil the devotions of others, I know not. 3. Not only should the congregation be in time but they should engage in public worship. Singing has always formed a part of Divine worship from the time that Moses and the children of Israel sung their anthem of praise on the other side of the Red Sea. See Exodus xv. The Redeemer and his disciples sung an hymn, which consisted of six Psalms: from the one hundredth and thirteenth to the one hundredth and eighteenth Psalm, the evening before he was crucified; and St. Paul says, Eph. v, 19.,and spiritual songs, singing and making melody in preaching are alike. They will now sit under the first to set to the world an example so full of the junior branches; among these are our dear

your hearts to the Lord " and in his epistle to the the most evangelical and heart searching sermon; Colossians, iii, 16, - " Let the word of Christ dwell in you richly in all wisdom; teaching and admonishing one another in Psalms and Hymns and spiritual songs, singing with grace in your hearts to the Lord." The phrase "speaking to yourselves," in the former passage, is by the Rev. J. Wesley, rendered "speaking to each other,"which is the exact design of congregational singing where the people really "speak to each other in words of comfort and exhortation.

Some people seem to think that they have nothing to do with singing in the House of God but to listen to it : and some choirs of singers have got the strange idea, that the singing is under their control; and it is their sole prerogative to sing : and sometimes will go so far, as purposely to pitch tunes which the congregation do not know, that their voices may be heard alone, and that the congregations may eulogize their musical talents. But the House of God should not thus be turned into a Concert Hall; for people do not come there merely to hear singing: they come there to worship God; and it is not only the privilege, but it is the duty of every one in the congregation to unite in singing the praises of God, or to "speak to each other," in "Psalms and Hymns and spiritual songs." "The venerable Dr. Adam Clarke in his note

on Col. iii, 16,-says : " The singing which is here recommended, is widely different from what is commonly used in most Christian congregations; a congeries of unmeaning sounds, associated to bundles of nonsensical, and often ridiculous repetitions, which at once both deprave and disgrace the Church of Christ. Melody, which is allowed to be most proper for devotional music, is now sacrificed to an exuberant harmony, which requires not only many different kinds of voices, but different musical instruments to support it; and by these preposterous means, the simplicity of christian worship is destroyed : and all *edification* prevented. And this kind of singing is amply proved to be very injurious to the personal piety of those employed in it : even of those who enter with considerable share of humility and christian meekness, how few continue to " Sing with grace in their hearts unto the Lord."

The views of Mr. Wesley on this subject are embodied in the following Minute of Conference for 1768. "Beware of *formality* in singing, or it will creep in unawares. Is it not creeping in already, by those complex tunes which it is scarcely possible to sing with devotion ? The repeating the same words so often, (but especially while another is repeating different words, the horrid abuse which runs through the modern church music), as it shocks all common sense, so it necessarily brings in formality, and has no more of re-ligion in it than a Lancashire hornpipe. Beside that, it is a flat contradiction to our Lord's command, "Use not vain repetitions."

In the Minutes of 1805, the question is asked-Are any regulations necessary with regard to singing ?

Ans. 1. "Let no instruments of music be introduced into the singers' seats except a bass viol, should the principal singer require it."

2. "Let no books of hymns be henceforth used in our Chapels except the hymn-books printed for our Book-Room. Let no pieces as they are called, Recitatives, by single men, Solos, by single women, Fuguing, (or different words sung by different voices at the same time,) are introduced be sung in our Chapels."

4. "Let the original, simple, grave, and devo-tional style be preserved, which instead of drawing attention to singing and singers, is so admirably calculated to draw off the attention from both, and raise the soul to God. Let no Preacher therefore, suffer his right to conduct every part of the Worship of Almighty God, be infringed on by singers or others, but let him sacredly preserve and calmly maintain his authority, as he who sacrifices this, sacrifices not only Methodism, but the spirit and design of Christianity." 4. "Take head how ye hear,' teaches that his word should be heard with a spirit of prayer. If people wish to profit by their attendance on the house of God, they should join heartily in its devotions. Some people complain the sermon they sheard was "dry and uninteresting;" whereas they never asked God's blessing upon what they heard. If this were the case, no wonder the sermon was dry. Preachers can preach when the people pray: but it is hard work to preach to a prayerless and careless people. The Psalmist prayed-" Open thou mine eyes that I may behold wondrous things out of thy law." " But the Bedeemer says, Mark iv, 24,—" Take heed what ye hear." This is a very important injunction, and shews that the members of the Church, and hearers of the Gospel should be orthodox, as well as its Preachers; and that they should not consent to hear any thing from the Pulpit as Gospel doctrine, but what is in accordance with the Scriptures, or as the Apostle says, Rom. xii, 6: "According to the proportion of faith." The word here translated "proportion," is "analogy," and "the analogy of faith," has been explained, as, that grand scheme of doctrine which is found in the Scriptures, and which is connected and consistent throughout; as the doctrines of Original Sin, Redemption, Justification by Faith, with present and everlasting salvation. It is very deeply to be regretted that with some persons almost all doctrines and all

then they will go elsewhere, and calmly sit to hear the insidious and soul-deceiving doetrines of Pelagianism, which teaches that man is not a sinner by nature, but only by practice, and that salvation is by works; or they will listen to the God-dishonouring blasphemies of Socinianism which denies the divinity of Christ; or the semi-Infidel dogmas ot Universalism which denies future punishment : and all with perfect indifference; and if asked about the matter, they will reply,—"they could not find fault with what they heard;" "they believe the preacher is a good man ; we must have charity ;" or by some such unwarrantable reasons, they will seek to justify themselves in their breach of the command of Christ-" Take heed what ye hear." St. Paul wrote to the Ephesians, iv. 12 "That we hencefurth be no more children, tossed to and fro, and carried about with every wind of doctrine, by the sleight of men, and cunning craftiness, whereby they lie in wait to deceive. Heb. xiii, 9.-" Be not carried about with divers strange doctrines. For it is a good thing that the heart be established with grace." St. John says, 1 Epistle iv, 1,-Beloved, believe not every spirit, but try the spirits whether they be of God: be-cause many false prophets are gone out into the world." Again, 2 Epistle 10, 11,--" If there come any unto you, and bring not this doctrine, receive him not into your house, neither bid him God speed: For he that biddeth him God speed is

Besides public worship and attendance on the ministry of word it is the duty of the members of the Church.

partaker of his evil deeds."

1. To pray for their ministers and for the prosperity of the cause of religion : " Finally, brethren, pray for us, that the Word of the Lord may have free course, and be glorified, even as it is with you: And that we may be delivered from unreasonable and wicked men : for all men have not faith." 2 Thess. iii. 1, 2. 2. To be exemplary in their deportment.

Whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things." Phil. iv. 8.

3. To adhere firmly to evangelical truth, and be constant in their religious fellowship. Of the primitive Church, it is said they continued steadfastly in the Apostles' doctrine and fellowship. in breaking of bread, and in prayers.'

4. To be united in heart and affection. It is elated of ARISTOTLE, that being asked upon one occasion,-" What is a FRIEND?" replied, ONE soul dwelling in two bodies." Of the first Christians it is said, " And the multitude of them that believed were of one heart and of one soul." Acts iv. 32,

" With grace abundantly endued,

A pure believing multitude! They all were of one heart and soul, And only love inspired the whole.'

Finally it is the duty of both ministers and cople to resist temptation and be faithful unto the end. Christ addressed the suffering Church in Smyrna, with which the famous Polycarp was connected, in the following encouraging manner. I know thy works, and tribulation and poverty, (but thou art rich) and I know the blasphemy of hem which say they are Jews and are not, but are the synagogue of Satan. Fear none of those things which thou shalt suffer : behold the devil shall cast some of you into prison, that ye may be tried: and ye shall have tribulation ten days: be thou faithful unto death, and I will give thee a crown of life." Rev. ii. 9, 10.

peace and concord, so expressive of earnest desire to cultivate universal friendship. This example will be followed by other nations, and while we would not say that future wars are impossible, we may say, that they are less likely to occur. After the Great Exhibition has closed, and the multitudes have quietly dispersed, its influence for good will long continue; the event will remain among the cherished recollections of the past, and, we trust, will prove a guarantee for the world's peace for the future. In this point of view, we regard this social and amicable gathering as vastly important, as destined to exert a friendly influence on the interests of humanity throughout all coming time. Whilst it may have been prompted and promoted by the free volitions and un-coerced actions of human agents, we may consistently believe, that an over-ruling Providence has fostered it with an especial reference to the accomplishment of its own ulterior designs.

MAY 17.

This opinion loses none of its force from the consideration, that suitable means have been used, to provide the strangers with opportunities of becoming acquainted with the principles and teachings of evangelical truth. Inside the Chrystal Palace, the Word of God in about One hundred and fifty dialects will necessarily draw attention and excite no common interest ; outside. the Churches of sound Protestantism will doubtless attract the wandering feet of many, who, in their own Countries, had been accustomed only to a religion of error and superstition in some one or another of its varied and pernicious forms .----We may hope that God will over-rule the vast assemblage of human beings in London during the Exhibition, and subsequently, to the promotion of the best interests of their souls. Prejudice. against the Truth may receive such a shock from its contact with pure Christianity, as will sooner or later lead to its entire destruction. The seed of the Kingdom may fall into the ground of many hearts, who will transport it to distant localities, where, under the fostering grace of God, it may germinate, ripen, and bring forth fruit to the divine glory. God, only wise, has at his disposal thousands of resources to accomplish his purposes of grace towards men; and we may cherish the hope that spiritual good, as well as temporal, both as it regards individuals and nations, will result from the Great Exhibition of 1851.

CHARLOTTETOWN CIRCUIT.

An interesting communication from the pen of the Rev. F. SMALLWOOD appears on our third page. The intelligence from the Charlottetown Circuit for some time past has been of the most pleasing and encouraging character. Not less so is the present information respecting the operations of the "Youth's Missionary Society."-Delightful is it to witness the young devoting time, talents, and pecuniary means, for the advancement of Christ's Kingdom on earth; especially when their efforts and sacrifices are prompted by christian principle and love to perishing souls. We, ourselves, are more than gratified by the references made to the piety and zeal manifested by the children of Wesleyan Ministers. This is a delightful consideration in itself, and must afford to their honoured parents, and to all those who love the cause of God as embodied in Methodism, more real pleasure, than if the names of the youth in question were inscribed high on the pinnacle of worldly fame, or their path in life were illumined with the unclouded sun-shine of earthly prosperity. We hope the true succession of piety will ever be found, through the grace of God, in all Wesleyan families, not as an accompaniment of natural descent, but as a divine gift, bestowed in answer to the praver of faith, and as a blessing on sanctified and approved effort. From our heart we add the expression of an earnest desire, that the children of others may share a similar possession.

WESLEYAN. THE Halifax, Saturday Morning, May 17, 1851.

THE GREAT EXHIBITION.

THE GREAT EXHIBITION, now being held in London, is calculated to lead to some very important results, affecting the temporal interests of England and other countries. Not only will it pleasingly bring together, in a comparatively small compass, specimens of the natural productions of almost all the nations of the world and the artistic skill of their respective inhabitants, and thereby give a mighty and onward impulse to individual and national genius in the cultivation of the practical arts and sciences; but it will also induce an immediate and proximate association of men with one another, who may be considered as representatives of the numerous nations into which the vast family of mankind is divided, and, by this means, accelerate the period when the principles of universal peace and brotherhood shall not only be theoretically recognized, but shall have practical manifestation, and exercise benign influence on the future destinies of our entire race. We can but truly rejoice at the deilghtful fact, that England, world-famed for prowess and victories on the battle-field, has been

The Rev. A. DESBRISAY, under date of May 4th, writes :---

"God'is greatly blessing us here as a Church -blessed be His name. His word is dropping as the rain, and his speech is distilling as the dew.' Brother HENNIGAR commenced a Protracted Meeting on Good Friday, and yet it is continued. The congregations have been very large. evincing deep solemnity and concern for salvation. Many have been forward for prayers, and to-day Brother H. informed us that from fifty to sixty had obtained a sense of pardon. Many families are visited from on high, especially

children, also brother Hennigar's. Much prayer is offered to God for a continuance of His mercy, and for the extension of this glorious work. Brother CHESLEY has rendered valuable service on this occasion-the rest of the work has been done among ourselves."

We sincerely rejoice at this intelligence, en couraging as it must be to the faithful labourers in the Lord's Vineyard, and cheering to all the lovers of Zion. The year now closing has been truly fruitful in revivals of true religion, which fact we gratefully acknowledge to the glory of the God of all grace. May the ecclesiastical year approaching be as the past, and much more abundant in the salvation of precious souls !

Aylesford Circuit.

Brother SHEPHERD writes :- "We have had some extra religious meetings at Aylesford East and West Chapels, and one happy result among others is an improved state of religious feeling. We hear good news through The Wesleyan-the work of the Lord prospering in many places-and we are led to hope and pray that a heavenly and refreshing shower of grace may descend on this part of the moral field. The Wesleyan is doing good service here, and I expect some addi-tion to our number of subscribers."

The Treasurers of The Wesleyan Supernume raries' and Ministers' Widows' Fund gratefully acknowledge the receipt of the following sums: Horton & Cornwallis Circuit, Halifax County Circuit, 1 0 0 1 2 6 Wallace Circuit,

Several articles have been necessarily crowded out, among which is a Notice respecting the contemplated New Wesleyan Church.

A Union Prayer Meeting in connection with, and in behalf of, the Micmac Mission, will be held on Friday the 23d instant at 7¹/₂ o'clock P. M., in the Baptist Chapel, Granville Street.

NEW-BRUNSWICK DISTRICT.-The Annual Meeting of the Wesleyan Ministers of the N. B. District will be held on Thursday the 29th inst., in the City of St. John.

Editors, authors, and artists need more sleep than those of most other professions

To discover how many idle men there are in a place, all that's necessary is to set two dogs a fighting.

Wisdom and virtue are the greatest beauty; but it is an advantage to a diamond to be well set.

There are three companions with whom a man should be on good terms-his wife, his stomach, and his conscience.

To Adam, Paradise was home; to the good among his descendants, home is Paradise.

A promise and its performance, should, like the scales of a true balance, always present a mutual

adjustment. He who is not elated when he is praised, or dejected when treated with disrespect, is a wise

pan. Every man ought to aim at eminence, not by pulling others down, but by raising himself.

Though a good life may not silence calumny, it

will disarm it. Bad books are the public fountains of vice.

grammar. These three were all hewers of coal. Subsequently another northern paper gave the following anecdote :-- " Some years since, a genman, on his passage from Newcastle to Shields in a steam-boat, went into the engine-room, and found one of the books mentioned, namely, 'Emerson's Fluxions,' lying on the table, rather black and smutty, evidently much read. He asked the young engineman, who read the book ? He answered that he did when he had time. Rather surprised at the fact, and pre-supposing that he was a young man of superior talent, he questioned him upon the subject, stating that himself had studied these matters at the University; had passed, he believed, a fair examination, and obtained a creditable degree. With this prelude they entered freely into conversation; and from that time the stranger used all his influence to bring the studious engineman into notice. The engineman is now a distinguished mathematician, and the author of many of the very works alluded to. He had, a short time previous to this interview, 'risen from a bank-trapper to a breaksman' in a Newcastle coal-pit, as stated in evidence before the Lords' Committee last session; and is now-Professor Hann, of King's College !"

Improvement in Chronometers.

Among the various difficulties which have stood in the way of chronometrical improvement, perhaps no defect has occupied so much time as the imperfect compensation for change of temperature, which has claimed the attention of some of the first mathematicians of the day, as well as those practically engaged in chronometer-making. The defect we allude to is this,-that if chronometers are adjusted for extremes of heat and cold, they will gain in the intermediate temperatures. This is caused by the balance-spring losing elasticity by an increase of temperature at an accumulating rate over the effect produced by the ordinary compensation.

Mr. Loseby has introduced mercury to overcome this defect, which, by its fluidity, admits of being adjusted, so that its effect may vary exactly in the same proportion as the change of temperature alters the elasticity of the spring; or, in other words, which makes the law of the successive alterations of the momentum of inertia adapt itself to the law of alteration of the elasticity of the spring, whatever that law may be. Since the invention was submitted to the Government in 1843, it has undergone several trials, by order of the Board of Admiralty, with a view to test its principle. The chief points which required to be proved were, first, whether the principle admitted of being adjusted to the irregular loss of elasticity in the spring; and, secondly, if the ef-fect produced by the mercury would be sufficient. The fluidity of the agent used at once answered the first point ; and it was therefore to the second that the trials have been chiefly directed. The result shows that not only can the ordinary defect be obviated, but in most of the trials it has even been reversed, so that all doubt

has been removed on the remaining point.

The Railways of the World.

According to a work recently published in London, there were in operation at the commencement of 1849, in different parts of the globe, a total length of 18,656 miles of railway, on which a capital of £368,567,000 had been actually expended. Besides this, it is estimated that there were at the same epoch, in progress of construction, a further extent of 7,829 miles, the cost of which, when completed, would be £146,-750,000. Thus, when these latter lines shall have been brought into operation, the population of Europe and the United States (for it is there only that railways have made any progress) will have completed, within the period of less than a quarter of a century, 26,485 miles of railway that is to say, a greater length than would completely surround the globe, at a cost of above £500,000,000 sterling. To accomplish this stu-pendous work, human industry must have appropriated, out of its annual savings, £20,000,000 for twenty-four successive years !

Sculpture in Coal.

West Wemyss has been long famed as the principal coal-field of the coast of Fife. The articles of household furniture, such as lookingglass-frames, writing-desks, chairs, and tables .-Mr. Thomas Williamson is at present making a sofa, wholly composed of coal. It is nine feet The front standards are beautifully carved, displaying three mongrel animals, which forcibly remind the spectators of those richly carved figures that appear so frequently in Dr. Layard's "Remains of Ancient Babylon." This rare geological curiosity was ordered by General Wemyss and it is highly probable that it will appear at the Great Exhibition, as it is ordered to be finished previous to that time ; and, as the general holds an appointment in the queen's household, it may yet be transferred from the crystal palace to the palace of her Majesty.

Statistics of the Jews.

An official publication informs us, that there are hardly more than from 4,000,000 to 5,000,000 Jews in the whole world ; whereas Buddhism numbers 400,000,000 adepts;Brahminism,200,000,000; Christianity, 230,000,000 to 250,000,000; Mahometanism, from 130,000,000 to 150,000,000; and Fetishism (or pure idolatry.) from 80,000,000 to 100,000,000. The 5,000,000 Jews are thus distributed :--- There are some 500,000 in Syria and Asiatic Turkey ; 250,000 in European Turkey 600.000 in Morocco and North Africa ; 50,000 to 80,000 in Eastern Asia; 100,000 in America; about 200,000 in Europe, viz: 13,000 in England; 1,594 in Belgium; 850 in Sweden and Norway; 6,000 in Denmark ; 70,000 in France : 52,000 in the Low Countries; 1,120,000 in Russia, (more than the one-fifth of the entire race) ; 631,000 in Austria and its dependencies; 214,431 in Prus-sia; 175,000 in the German States; and 4,000 in Italy .- Critic.

Summary of News.

BY THE R. M. STEAMER.

The R. M. steamer Cambria arrived at this port on Tuesday evening list about half-past 6 o'clock. We give the following items of news:---

Great Britain and Ireland.

THE GREAT EXWIBITION, - Punctually at twelve o'clock the Queen arrived, her entres being marked by long and animated cheering. She seated herself on a chair raised on a platform, surrounded by a spacious elegant blue canopy adorned with feathers, with Prince Albert on her left. They were accompanied by the Prince of Wales and the Princess Royal. The court circle was now completely formed, making a tubleau never to be forgotten. The Queen looked remarkably well. She wore the order of the gar ter, a pink brocade dress, shot with gold, and the Prince looked calmly and proudly happy. The Duke of Wellington, who this day completed his eighty-second year, had been there nearly two hours before, and the commissioners and all the officials and ladies of the household surrounded the throne presented a scene of extraordinary The National Anthem was performsplendour. ed. The Archbishop of Canterbury then delivered the prayer of inanguration, which was followed by the Hallelujah Chorus of Handel, under the direction of Sir Henry R. Bishop. A procession was then formed of a most interesting character. Then came the officials engaged in con-

Lord John Russell intimated that it was not the intention of Government to adopt the amendment of the Ecclesiastical Titles Bill of which notice had been given by Mr. Walpole.

Mr. Childer called the attention of the House a letter published a few days ago by the Bishop of Exeter, announcing his intention to hold a Diogesan Synod in June next, Lord J. Russell said he had taken the opinion

of the law officers of the crown with regard to the holding of diocesan synods, but he did not think the assembly proposed to be called by the bishop had the character or was called in manner of a provincial synod.

Neither the Attorney General nor the Solicitor General were of opinion that the proposed meeting would be unlawful. He considered the bishop's object was to im-

pugn the judgment of the Privy Council in the Gorham case, and it remained to be seen what course the bishop took in relation to that decision before any steps could be decided on as to the proposed assembly. After a short discussion the subject dropped,

IRELAND -STATE OF THE COUSTRY .- There is not yet the slightest indication of a decline in the emigration which has been in progress upon so emigration which has been in progress upon co-formidable a scale since the opening of the spring. The farms vacated by those who go away are, in general, at once taken by other tenants, and in mady cases a consolidation of small holdings oc-curs. For this reason, notwithstanding the immense extent of the emigration, there are now much fewer complaints about tracts of land out of cultivation than were made a year or two ago.

The Limerick Chronicle says " There is more ground sowed with potatoes, in the south and west of Ireland, than has been known since the incurable failure of 1846. Should the present crop attain healthy growth, there will be an aw-ful loss to foreign breadstuff importers."

Foreign.

FRANCE. PARIS .- Socialist proclamations still excite much attention. There seems no probabi-lity of any disturbances on the 4th of May, and the population was never in appearance more tranquil or more regardless of political questions, but general uneasiness prevails respecting politi-cal affairs. The chiefs of the majority begin to be really alarmed at the confident tone of the Ul-tra Republicans and Socialists.

Ponysoat.-The news from Portugal is im-portant. Accounts had been received via Spain, stating that the garrison of Oporto rose on the 24th ult. in consequence of the arrest of a num-ber of officers and suddiers, and declared for Marshall Saldanha—after a combat of two hours. The general who, after having remained incogito in the city, had taken the route to Vigo, to embark in an English ship, was recalled by the insur-gents. The inhabitants of Oporto have declared gents. for r the insurrection.

SPAIN .- The Spanish Government will not interfere in Portugal, unless the safety of the throne e menaced.

INPENDING DIFFICULTIES BRTWEEN AUSTRIA AND TURKEY -- THE HUNGARIAN REFUGRES.-The correspondent of the Duily News, writing from Constantinople on the 5th of April, says,--" I know that in spise of the efforts of absolutist powers, the intense interest the English people took in the fate of Kossuth has not yet subsided. structing the building; afterwards the foreign 1, therefore, endeavoured, immediately after my

A pedlar overtook another of his class on the road, and thus accosted him : - " Halloa, friend what do you carry ?" "Rum and whiskey," was the prompt reply. "Good !" said the other, "you may go a-head; I carry grave-stones."

Why is a drunkard hesitating to sign the pledge like a sceptical Hindoo? Because he is in doubt whether to give up the worship of the Jug-or-not.

"How is it that the trees can put on a new dress without opening their trunk ?" "It is because they leave out their summer clothing."

An American preacher, descanting upon the anpossibility of the drunkard retracing his steps after he had gone a certain length, made use of the following simile :--- " My brethren, it is a very easy task to row a boat over the falls of Niagara but it is an all-sufficient job to row it back again.

Diffusion of Knowledge.

A Newcastle paper, some time ago, inserted the following interesting fact, illustrative of the rapid spread of intellectual culture among a large and deserving class of the population :- A book seller in the market recently had upon his stall ten copies of Emerson's work on "Fluxions," all of which he sold at seven shillings and sixpence a copy to pitmen. He said they were by far his best customers, and that a standard mathematical work never lay long on his stall. On a subsequent day, at the same stall, there were three men ; one bought a work on algebra, another requested a Greek delectus, the third was perusing a Spanish | gains an enormous speed.-Architect.

Novel Application of Galvanic Action.

In the Madras Spectator, of September 18th it is stated that a person in that town has discovered a substance which he calls fibre (what it is remains a secret), which, under galvanic action, contracts suddenly to one-fourth of its length, "its power being equal to 100lb. on every square inch of its sectional surface." The inventor has constructed a model engine to show the application of the new motive power. - A reciprocating beam attached to an ordinary crank, with fly wheel of about four feet in diameter, is fitted at each end with a cylindrical piece of the fibre, insulated by a plate of glass Near the frame is a small galvanic battery. Operations are begun by giving a shock from this battery to one of the pieces of fibre, which immediately and violently contracts, drawing the beam down on that side, and of course communicating motion to the crank and fly-wheel. So soon as the centre has been turned, another shock given to the opposite piece of fibre continues the motion : and the shocks being alternately repeated, the fly-wheel soon

western naves, and then, recrossing the transept, passed on to the eastern extremity, the United States' end. At every step new acclamations arose; the music from the various organs saluted the procession as it passed.

The Queen then declared " the Exhibition ppened ;" and the trumpets and artillery announced the fact to the countless multitudes outside. It is said that not less than 30,000 people were gathered to witness the great event-but not an approximation to riot or disorder occurred to mar the general rejoicing.

The products of the North American, West Indian and Australian Colonies are thus handsomely noticed by the special reporter for Wilmer and Smith :

"We now come to the colonial department, comprising the industrial products of our Australian possessions, of the Canadas, and Nova Sco-tia, New Zealand, several of the West India Islands, the Cape of Good Hope, Western Africa, Malta and the Channel Islands. The contributions from this vast extent of territory are chiefly confined to the south side of the nave. They Greece was expected at Vienna

PRUSSIA .- A perty of the Berlin police is pre-paring to attend the Exhibition in London.

The lithographed Correspondence has received nformation of a terrible and wide-spread conspre racy, whose purposes are, of course, revolutions-ry. The head quarters of this body are said to be London, the chief sent of their operations the south of France, with active committees and subcommittees in Germany, Italy and Spain; the conspirators are said to be provided with pecuniary resources, and to have established a perfect system of military organization, the ultimate ann of which is the proclamation of a European social republic.

Information of the conspiracy has been rebeived by the Governments of Vienna and St. Petersburg, and appears to be credited there. It has made a profound impression here, and may perhaps be made the handle to some new mea sures of oppression.

The election of Mayor by the Common Council at St. John, N. B., took place on Tuesday, when Alderman Harding was unanimously chosen. REVOLT AND DESERTION OF SOLDIERS .-Early on Thursday morning, the Corporal's guard, coasisting of nine men, stationed at the Ordnance Stores, Lower Gove, deserted in a body, carrying off their arms with them. The affair must have been previously arranged, as at a given signal, they seized the Corporal and hound his arms and legs, and gagged him by thrusting a piece of broom-stick in his mouth, and tying it around his head, to prevent him from making the least noise. They then started, making their muskets with them, but the coarse they took has not yet been ascertained. It is most probable they went by water, in an open boat, and ere this have no doubt reached the United States, but if pursued and discovered they can be taken under the Ashburton treaty. It is seldom that we have to record so cool and daring a revolt among the Military stationed in these Colonies.-Ib. 10th.

We learn from the Miramichi Gleaner that the navigation of that river is open, and that several vessels have arrived, and a number were reported below fast in the ice. A very large quantity of ice is reported along the north shore, driven there from the St. Lawrence and Labrador, by the long continuation of easterly winds.

ST. ANDREW'S AND QUEBEC RAILWAY. The annual general meeting of the stockholders of the St. Andrew's and Quebec Railway Company was held on the 6th inst. A statement of the proceeding, from which we learn that the grading of ten miles of the line has nearly been completed. This includes a substantial pile bridge over an arm of the sea contiguous to St. Andrew's, called Kary's Cove, which spans 550 feet, and is ready for the rails. The actual ex-penditure of the Board up to this period, is £33,000. This embraces a large amount for surveying and engineering expended on the route through to Woodstock previous to the letting of any portion of the line. The Directors have estimated the engineering expenses spart from the general outlay, and feel confident that, exclusive of these expenses, the amount already laid out on the part of the Company has not exceeded £3,000 per mile. This sum will be understood to pover the cost of locomotive, tender, rail, bridges, dcc. and in fact the whole outlay of the road for the ten miles under contract. From the report of Mr. Light, the engineer of the Company, and other engineers preceding that gentleman, as to the local character of the line between St. Andrew's and Woodstock, and its adaptation to railways, the Directors feel confident that the remainder of the road will not exceed \$10,000 per mile.

BRIDGE ACROSS THE ST. JOHN. - In the House of Assembly, on the 29th ult., the following resolution was passed on motion of Mr. Partelow :-

Whereas the construction of a bridge over the River St. John, at or near the Grand Falls, would be of great public utility and advantage, and indeed it has become a measure of absolute neces-sity since the establishment of the boundary line between the State of Maine and this Province under the Treaty of Washington ; Therefore Resolved, that an humble Address be presented to His Excellency the Lieutenant Governor, praving that His Excellency will be pleased to bring the subject under the notice of Her Majesty's Government, and beg the sanction of Her Majesty such part o for the an ronriat

Even Mr. Young came in for a meed of praise and the important services of Lord Durham were not forgotten; indeed they were made honourable mention of by one fully competent to do it, the Hon. Mr. Black.

Among the Resolutions, we give the following as the most important :--

Resolved,-That the citizens of Quebec acknowledge with gratitude the liberal offer of the Imperial Government contained in the despatch of the Right Hon. the Secretary for the Colonies of the 14th March last, in regard to the contemplated Railroad from Halifax to Quebec, as affording most satisfactory evidence that the Mother Country, while not unmindful of its own political and commercial welfare, is at the same time most anxious to promote the prosperity of its North American Colonies, by assisting in the developement of their vast internal resources.

Resolved,-That in as much as a Railroad between Halifax, Quebec and Montreal, would open a direct communication from Canada to the Ocean during all seasons of the year extending the means of transport now afforded by our canals in the summer and entirely superseding them in the winter, such an undertaking, being eminently one of a national character, ought, like our great canals, to be accomplished at the expense of the public treasuries of the Provinces.

Resolved, - That this meeting expressed the hope that the other Provinces who are equally interested with Canada in the realization of this great enterprise will not render it impossible by refusing their concurrence, or by imposing condiions which cannot be accepted.

Resolved,-That a committee draft a Petition founded upon the said Resolutions, to be presented to the three Branches of the Legislature praying them to adopt without delay such measured as they may deem calculated to meet the views of the Imperial Government and to place the Provincial Government in a condition to enter with all possible diligence upon this great underdertaking, and that His Worship the Mayor be respectfully requested to sign and transmit the same to His Excellency the Governor-General and the two Houses of Parliament.

FATAL FIRE AT CLARENCEVILLE .-- On Sunday, the 20th ult., a most melancholy and fatal accident occurred at Clarenceville, Caldwell's Manor. It appears that during the time of religious worship, the house of Mr. Harrington was discovered to be on fire. The alarm soon spread, and the people in the Churches and elsewhere were soon on the spot. Every effort was made to eave the moveable property ; to save the building was impossible. A young man of the name of Hunter, son of Mr. Hunter, who resides on Missiquoi Bay, west shore, when attempting to reach ome article of property the door of the room closed, at the same instant the roof of the build ing fell in, and enveloped him in flames from which there was no escape. He was burned to death. It would be in vain to attempt any des cription of the emotions of the bystanders They could render no assistance, and a fine young man, probably about 21 years of age, was burnt to death before their eyes. He was so completely destroyed by fire that only a few charred bones and the inwards could be recovered for his sorrowing and bereaved parents to consign to the grave. -Montreal Gazette

HAVTI -The schr. C. H. Hale, at N. York. from St. Domingo, reports that quite a commotion has been occasioned at Cape Haytien, and in consequence of the desertion of Prince Bobo, who had gone into the interior to raise forces for the purpose of supplanting the Black Emperor, Fanstin the First, In about six days Bobo re-turned with 20 men. With these he approached the gates of the city of Cape Haytien, where he gained an accession of 40 others.

This force being too small to warrant success in case of attack, he then withdrew and led off into the mountains. All this was done without molestation, the people of that place having no authority from Port au Prince to act in opposition to him.

At about the time of sailing, Capt. Colkey was informed by the American Consul, Mr. Wilson, that an army had then been ten days on a march towards Cape Haytien, probably to settle the disturbance. He also stated his intention of sailing with his family in about a week or ten days for Philadelphia. So great was the panic caused by these movements, that the Custom House had been closed, and business was in some measure, suspended.

From Jamaica we have accounts to the 23d. The Cholera has again broken out in the parish of Hanover and also made its appearance in Westmoreland.

TRINIDAD .- Three smart shocks of Earthquake vere telt on the morning of the 8th. The census of the whole Island was just completed, showing the population to be 36,3-9.

TTINIDAD .- The Legislative Council had the mportant subject of Education under deliberation it having been brought before the Council by a message from the Governor. The manufacture of Sugar was progressing rapidly. The Cocoa Crop had closed, with a falling off in quantity as compared with last year's return.

Sr. VINCENT -Trade was very languid, and, altho' ground provisions were scarce, no advance in the price of breadstuffs had taken place. The weather was very favourable for sugar making. GRENADA .- The sugar crop was expected to rield this year 2000 hogsheads more than it did n the last year.

TURKS ISLAND .- The session of the Legislature was opened on the 9th by Pres. Forth who congratulated the Council on the satifactory state of the Revenue, there being a surplus of upwards of £1300. The salt crop of 1850 was £38,320 bush-els less than that of 1849.

UNITED STATES.

STEAMBOAT DISASTER !-- A despatch from Vicksburgh, dated the 3d inst., says that the steamboat Webster took fire the day previous, 100 miles above that place, and was burned to the water's edge. The number of passengers and hands on board was about one hundred, of whom only about sixty could be found; the rest are supposed to have perished with the boat. It was with difficulty that any of the females could be saved, many of them being separated from their husbands and friends. The flames spread with great rapidity, and the scene was terrible in the extreme.

A CHURCH BURNED .- A despatch from Pittsburg, dated the 6th, says, that St. Paul's Cathedral, which is the largest church edifice in that city, was then in flames, and it was feared would be totally destroyed. **OCEAN STEAMERS** - Seventeen Ocean steamers are announced to sail from the ports of New York, Boston and Philadelphia, during the month of May. Of these eight are for Liverpool, three for Chagres, one for Southampton and Bremen, one for Southampton aud Havre, one for Bermuda and St. Thomas, and one for New Orleans, Savannah and Charleston.

pated invasion and attempt to overturn the government; and these persons have been thrust into prison-among them are three priests. One wan has been executed after having been subject to severe tortures for the purpose of getting from him a conjession.

MAY 17.

A row occurred between some American seamen and the inhabitants of Havana, when the seamen were arrested and their heads put into the stocks, where they were so ill treated that two of them subsequently died.

The fourth of the Chagres murderers has been arrested at Porto Cabello and brought to Panama, where he was confined in prison. The Georgia reports that they were all to be shot in a few days.

The railroad will, it is said, be finished to Gorgona by the last of July if the weather continued good

Chagres was healthy. The inhabitants have established a regular police, and life and poperty are much more safe than they have been hereto. fore.

SAN FRANCISCO, March 31st, 1851 .- Lumber continues inactive and the additions to the stock on hand fully equals the sales. There is little probability of any advance for some months. A heavy business for the latter part of next month is confidently articipated.

Financial affairs of the city are in a most fa vourable condition

MISCELLANEOUS.

A VISIT TO A MEXICAN CATHEDRAL - A correspondent of the Washington Union, writing from the city of Mexico, says :

" One day last week I spent a whole morning (six hours) in examining the Cathedral, and its treasures. By special favour, they showed us everything, among others the custodian, in which the consecrated host is exposed on certain occasions It cost \$200,000, but is worth \$500,000 ; and yo will not wonder at this when I inform you that it is full four feet high, made of solid gud, and studded with precious stones The pedestailis a foot and a half square, inlaid with diamonds and rubies, At each corner is the golden figure of an angel, exquisitely carved. Around his waist and neck are strings of the finest pearls. His wings are inlaid or covered with diamonds, rubies, and emeralds. In his right hand he holds sheaves of wheat, made of yellow topsz; in his left bunches of grapes made of amethytis. The shaft is also studded with diamonds and rubies. The upper part, containing the host, is made to represent the sun, and is a foot and a shalf in circomference ; the rays that emanate on one side are made entirely of diamonds of the first water, beginning with some of large size, and gradually tapering off. The cross that surrounds the top is also, on this side, made of diamonds, and is superb. On the other side, both the cross and the rays are of the most beautiful emeralds-perhaps larger than the diamonds.

SCIENTIFIC AGRICULTURE .- Professor Mapes, editor of the Working Farmer, has raised 1,500 bushels of parsnips per acre, 900 bushels of car-rots per acre, and 800 bushels of turnips per acre, by proper preparation of the soil. He also instances a farmer in Freehold, N. J., who raised last season about 5,000 cabbages on half an acre, the sales of which were at the rate of \$500 per acre.

COST OF COMMERCE. --- Muscovado sugar in Cuba and pork in Illinois are usually about the same price. Yet in Illinois it usually takes about four pounds of pork to buy one of sugar, while in Cuba one pound of pork is worth about four pounds of sugar. The carriers and custom house officers get about three fourths of the produce

BUCTOVENE .- The Provincial Government have opened Buctouche as a free port for foreign trade, and Mr. Peter McPhelin, sen., has been appointed Deputy Treasurer and Controller of Customs and Navigation Laws there. The opening of these small ports on various parts of the coast of the Province is a great accommodation to the trade at the Out-Bays, and a decided im provement on the old system of having so few free ports .- 16.

By the last Mail from England a copy of a new work by Professor Johnston was received --"Notes on North America, Agricultural, Social and Economical." From a hasty glance over the contents of this work, we are inclined to think that it will prove of more service in giving New Brunswick a high place as a field for farming emigrants from Great Britain than anything that has hitherto been done. New Brunswick, its resources, its people, their manners and habits, occupy more than half the work, and as the notice taken of us is highly favourable, it must produce a good result.- 1b.

A destructive fire broke out in Cincinnati on the 3d inst, which destroyed about 20 buildings, causing a very heavy loss. The city is dreadfully infested with thieves, and it is thought the fire was the work of an incendiary.

The largest individual tax paid in New York is by William B. Astor, Last year he paid into the City Treasury the sum of twenty-three thousand eight hundred and ninety one dollars, for taxes. The assessed value of his property in the city is \$2,060,300.

BALTIMORE, May 5 .- The New Orleans mail of 2°th ult., has arrived. Gov. Quitman, Generals O'Harra, Lopez and Gonnales are announced in Savannah papers as leaders of the Cuba expedition, and they were mustering forces in that State.

SLEIGHING IN MAY .- A despatch from Hazle on, Pennsylvania, dated the 6th instant, says, that snow fell there the day previous to the depth of 18 inches, and that it was then fine sleighing. The steamship Georgia, via Havana, arrived at New York, on 6th inst., from Chagres, with the California mails. Bhe had \$1,500,000 in gold and 500 passengers. SOMNAMBULISM IN CHURCH. - During the services in the Tabernacle[®] Church on Sunday evening last a boy about twelve years of age, who was in the sleeping state, arose from his seat in the congregation, and steadily walked up the main aisle to the platform surrounding the pulpit, where he stumbled and fell. He readily regained his perpendicular, and stepped up into the pulpit, and grasped the officiating minister by the hand. Some gentlemen near him soon saw that he was in the somnambulic state, and quietly conducted him back to the seat from whence he came .- St. Louis Times.

REFINED TASTE - A wealthy Creole lady, of Royal-st., who keeps her carriage, and perhaps livery servants, but notwithstanding these enternals, must not be overburdened with brains, nor very discriminate, despatched her servant with a note to Jenny Lind, a few days since, requesting Jenny Lind to call and see her; that she desired to look on her; to examine the lady, we presume, as she would an animal she contemplated purchasing. Miss Lind, without appearing to feel annoved by the uncourteous request, placed a very diminutive lap-dog on a large salver and told the servant she might take it to her, mistress, as it was handsomer than she (Jenny) was, and better worth looking at. Extract of a Letter from Mr. Thomas Brunton, Landlord of the Waterioo Tavern. Coatham, Yorkshire, late of the Life Guards, dated September 28th, 1848. To Professor Holloway,

To Professor Holloway, Siz,—For a long time I was a martyr to Rheumatism and ilheumatic Gout, and for ten weeks previous to using your medicines, I was so had as not to be able to walk. I had tried doctoring and medicines of every kind, but all to no avail, indeed I daily gour remedies advertised in the paper I take in. I thought I would give them a trial. I did so. I rubbed the Ointment in as directed, and kept cabbage leaves to the parts thickly spread with it, and took the Pills night and morning. In three weeks I was enabled to walk about for an hour or two in the day with a stick, and in seven weeks I could go any where with-out one. I am now, by the blessing of God and your me-dicines, quite well, and have been attending to my busi-ness more than seven months, without any symptoms of the return of my old complaint. Besides my case of Rheumatic Gout, I have lately had proof that your Pills and Ointment will heal any old wound or ulcer, as a married woman, living near me, had had a bad leg for four years, which no one could cure, and I gave her some of your Pills and Ointment, which soundly healed it when nothing else would do it. For your information I had the honour to serve my contry for twenty-five years in the first regiment of Life Guards, and was eighteen years a corporal. I was two years in the Peninsular War, and was at the Battle of Waterloo. I was discharged with a penison on the 2nd September. Pasa. The Commanding Officer at that time, was Colonel Lygon, who is now a General. I beionged to the troop of Captain the Honourable Henry Earing. (Signed) THENDE TEAR's TANDING. 1848 To Professor Holloway. Six,—With pleasure and gratitude I have to inform you that after suffering for 21 years with a bad leg, which yielded to no kind of treatment, although I consulted, at different times, every medical man of coninence in this part of the country, but all to no purpose. I was fre-quently unable to work; and the ain and agony I often endured no one can tell. My leg is now as sound as ever it was in my life by means of your Pills and Ointment, which I purchased from Mr. I. Davidson, Druggist, Ber wick-unon-Tweed, who knows my case well, and will. I wick-upon-Tweed, who knows my case well, and will, 1 am sure, be happy to certify with me, if necessary, as to the truth of this wonderful cure. (Signed) ANDREW BRACK.

I employed several physicould make no use of them. I employed several physi-ciaus, but to a purpose as my suffering only increased.— I applied Mrs. BERRARX's MEDICINE for a short time and was soon cured of every vestige of the disease. The thank-fulness which I felt, on the long and painful disease being removed, was much more than tongue can express. After three years from the time when I used the Medicine, was threatened with a relapse or return of the disease. I applied the Medicine and the disease disappeared. From that time to the present, I am perfectly free from all symptoms of Erysipelas or Salt Rheum. Shubenacadie Canal.

The adjourned meeting of persons favourable to the construction of the above work was held pursuant to notice yesterday, at the Exchange Reading Room. Dr. Avery was called to the chair. The meeting, although not very numerously attended, was composed of intelligent and influential persons. An interesting report from the Committee was read, and a report of Mr. Fairbanks of the cost of constructing a canal, and the probable receipts, &c. The meeting was addressed by the Provincial Secretary, the Speaker, William Lawson, H. Hyde, and other gentlemen, and all present seemed fully impressed with the immense advantage and profit that would be derived from completing the work in question .---After which it was resolved that the reports be received and adopted. Secondly that the Committee be a Committee to negotiate with the local Government for the purchase by them of the equity of the mortgage of redemption shortly to be sold under a decree of the Court of Chancery, and in the event of the Government declining to become purchasers, to take such other steps as may be necessary for forming a company to purchase the property. Dr. Avery, Wm. Lawson, Henry Pryor, C. W. Fairbanks, H. Hyde, and Andrew Mackinlay, form the Committee. The meeting then adjourned.-Colonist.

Potato Rot Prevented.

A certain remedy is stated to have been discovered which will effectually prevent the rot covered which will effectually prevent the rot not only in potatoes, but all other vegetables, while it increases the crop. Mr. G. Important to Farmers.

We have been informed by some of the merchants of Pictou, that the article of butter, which forms a large export from this place to St. John, Newfoundland, has for some time past been very much depreciated, from being too much salted .-Whether it is a mistake in judgment on the part of the manufacturers or a desire to sell salt which they buy for 2s. 6d. per bushel, at 7d. per lb. along with the butter, we cannot tell; but it is along with the butter, we cannot tell; but it is by, Canso; barque George Guilford, Robinson, Cadiz, now an undoubted fact, that the Pictou butter 37 days, to Cochran & Co. from this cause is almost worthless in that market.

Advices have been received, stating that if an improvement is not instantly made, the Canadian butter will drive ours out of the market. • We give this hint for the benefit of our friends in the

DR. WISTAR'S BALSAM OF WILD CHERRY.

It was known many years ago that the wild cherry tree of this climate possessed valuable medicinal properties. Indeed, this fact was known to the aborigines, and a decoction of the leaves or bark of this tree has ever been regarded by their physicians as one of the most effectual remedies in many diseases. This fact, several years since, arrested the attention of Dr. Wistar, a highly respectable practitioner of Virginia. He investigated with care the healing properties of the wild cherry-tested is effects when administered alone, and when in combination with other remedial agents. He found that its natural virtues might be greatly improved, and by combining it with ingredients, whose properties were well proved and generally recognized, a medecine was produced which constitutes a remedy of great value in pulmonary affections and diseases of the chest and throat-diseases which are proverbially prevalent in our cities and large towns, and of ten prove fatal, swelling the bills of mortality to a much greater extent than is the case with most others, we had almost said all other classes of diseases.

EXAMINE CLOSE BEFORE PURCHASING,

The genuine Balsam is put up in bottles, with the words "DR. WISTAR'S BALSAM OF WILD CHERRY," Phila." blown up in the glass-each bottle bearing a label on the front with the signature of

H. WISTAR, M. D.

This will be enveloped hereafter with a wrapper copyright secured 1844, on which will always appear the written signature of "I BUTTS." Any one counterfeit-ing the label or wrapper, or forging the signature of the General Agent, will be punished with the utmost rigor of the law.
