Giants of the Mighty Deep

Giants are, always interesting, acther they are human, animal or nd while in ages past divisions of the animal boasted giants of far greatze than those of modern times. even nowadays gigantic creatures exist in numbers in the sea.

The greatest of these marine giants are the whales. And probably the largest of the whales, as well as the most gigantic of all living creatures, is the sulphur bottom. It attains a length of nearly or quite 100 feet and a weight of 150 tons. One individual measured 95 feet

in length, 39 feet in girth, with a jaw-hone 21 feet long; baleen (whale-bone), 4 feet long; weight of baleen, 800 poun's: weight of entire whale 147 tons, and it yielded 110 barrels of oil.

The sulphur bottom seldom bolts, as the whalers term the action of leaping diagonally from the sea, or breaches, as perpendicular springs are called, but when he does perform in this manner he presents a truly won derful sight. While whales are the largest of

is the basking shark, known also as elephant shark and bone shark. This species derives its name from its of collecting in schools and habit basking in the sun at the surface of the sea. It reaches a length of 40 to 50 feet and while large is perfectly harmless. Its teeth are small and numerous

Its teeth are small and numerous and its food consists of small fishes, shrimp, crusizceans, etc. It is or-dinarily of a gentle and quiet dis-position, but if wounded or injured can readily smash an ordinary boat to pieces with its powerful tail. It was formerly widely hunted for its will but has become too scores to oil but has become too scarce to hunt with much success. The man eating sharks, which are

so greatly dreaded by many people and are very common in tropical seas, grow to immense size, and with their ferocious character and powerful jays and teeth, are probably the most midable of ocean giants.

'THE BOY AND THE MAN."

Every boy wishes to be a man, but the measure of a man is not that of age, nor strength, nor 'stature, nor possessions, nor position. That which possessions, nor position. That which makes a man is a quality of point; it is courage, honor, integrity of character, and the resolute purpose to a corrage, notor, integrity of character, and the resolute purpose to know what is true, and to do what is right. The central quality of man-liness around which all others much liness around which all others mi built up is that of a sense of honor. --President John Grier Hibben, in January St. Nicholas.

TWO ESSENTIALS.

The essential things which distinguish one individual from another, which give one man a higher place among his fellows and another a lower, are just two: First of all, perseverance the ability to keep everlastingly at it; and, see ondly, imagination or vision—the ability to see beyond the present moment, and to understand that the work at hand reaches beyond the present moment, and so is worth while. Gifford Pinghot in January St. Nicholas.

Minard's Liniment Cures Diptherla.

LEAD PENCIL WOOD.

Getting Scarcer and More Valuable Daily.

said that American cedars It is furnish the only wood known of which. good lead pencils can be made, and in connection with this information we learn that American cedars are becoming scarce. The pencil industry is a big and, currously enough perhaps, it is said to be bigger to-day than it was before the day of typewriters. A fac-tory in Germany turns out annually 300.000.000 lead pencils made out of wood of the cedar tree of America. The forest service of the U States, which is a bureau of the There are in Toronto 50 Canadian, 59 English, 32 Greek and 21 Chinese restaur-ants, besides others of a nondescript character, Some of these are bright and clean, but some are reported by health inspectors to be quite dirty. There is no good reason why as much control should not be exercised over the sanitary anadartis, in the restaurants as over the States, which is a bureau or one ex-ricultural department, makes a study of means to preserve the tree supply, and it is not to be supposed that has overlooked the cedar, fragre fragrant, useful and beautiful. The hickory is a subject of anxiety to the fotest of-ficials, and so is the chestnut. These should not be exercised over the sanitary standards in the restaurants as over the condition of the milk they handle. If we have regulations to ensure the clean-liness of bread in handling, of milk in transmission, of fruit exposed on stands, why should there not be more effective supervision of kitchen cleanliness in the eventuality. ficials, and so is the chestnut. These two species are named because just at present the fear of their extine-tion is greater than that which con-cerns itself with two other growths. The blokory and the chestnut have been attacked by new encuise, and in the spectrum definition is hence one case nothing definite is known about the ravager, nor his any ade-quate means been found to put an end to its ravages. The demand for the wood of the tree is so great that the growth cannot keep pace with the market. It is known, however, that finally the lumknown, however, that finally the lum-bermen have come to realize they can secure their trade product in such a way as to help the cause of reproduc-tion. Most of the States of the Union have passed laws to protect their forests. Law can enter a private do indin A farmer, for instance, is not ellowed to shoat crime hinds out of prosests. Law can enter a private do main A farmer, for instance, is not allowed to shoot game birds out of in our of the short paner on solution of the season, even though they are found in his own fields. The State of Maine, to take a notable example, has faws which tend to make the owner of for-ests have a case for the future. Cedar is worth something besides the giving of its wood to the penelf-makers. Its berries furnish forth the breakfast tables of thousands of useful wild birds. When a robin can find a suitable cedar awamp, with plenty of cover and plenty of berries. it will stay in the north all winter, end care nothing for the cold. There is something more than sentiment, however, attaching to the tree-saving cause. Hard husiness sense suggests consuming our trees and baving them." The lumbermum to day ever-cise care, in "taking out" a tree that was known to the industry in the past. Sense and sentiment are good part-

Once and Entirely Cured.

Giants are, always interesting, whether they are human, animal or ad while in ages past divisions of the animal boasted giants of far greate than those of modern times, even nowadays gigantic creatures exist in numbers in the sea.

The greatest of these marine glants are the whales. And probably the largest of the whales, as well as the most gigantic of all living creatures, is the sulptur bottom. It attains a length of nearly or quite 100 feet and a weight of 150 tons. One individual measured 95 feet

in length, 39 feet in girth, with a jaw bone 21 feet long; baleen (whale bone), 4 feet long; weight of baleen poun's; weight of entire whale tons, and it yielded 110 barrels 800 147 of oil.

The sulphur bottom seldom bolts, as the whalers term the action of leaping diagonally from the sea, or breaches, as perpendicular springs are called, but when he does perform in this manner he presents a truly won-derful sight.

While whales are the largest of the animals, yet certain fish grow to almost as gigantic size. The larg-est of true fishes are found among the sharks, says the American Boy; and the largest of these formidable fishes, are the waale sharks. The huge fish occur in the waters Thes of Japan, South America, Pana India. mg California and the West Indies The nose is very broad and blund and the mouth, although very wide, is armed only with very minute teeth. It is a dark colored creature marked small, whitish spots and is per fectly wharmless to man, feeding exclusively on small fish. Its huge bulk makes it dangerous when wound ed. This great fish reaches a maxi mum length of 70 feet Probably the second largest shark

is the basking shark, known also as elephant shark and bone shark. This species derives its name from its habit of collecting in schools and basking in the sun at the surface of the sea. It reaches a length of 40 to 50 feet and while large is perfectly harmless. teeth are small and numerou

and its food consists of small fishes, and its four constants, of small fishes, shrimp, crustaceans, etc. It is or-dinarily of a gentle and quiet dis-position, but if wounded or injured oan readily smash an ordinary boat to pieces with its powerful tail. It formerly widely hunted for its was has become too scarce to with much success.

The man eating sharks, which are so greatly dreaded by many people and are-very common in tropical seas, grow to immense size, and with their ferocious character and powerful jaws and teeth, are probably the most rmidable of ocean giants. The great sleeper shark is a mos

stupid gluttonous species-as in fac are most of the sharks-and spends

are most of the sharks—and spends uost of its time dozing on the sur-be of the sea. When aroused or hudgry it attacks whales, porpoises or in fact anything it can find, and bites great pieces from its victims with its knife like teeth. At such times it seems perfectly abilitoris to pain or fright and can be hacked with knives and pierced with spears without paying the least attention or seeming to take any notice. This savage creature reach-es a length of thirty-six to forty feet and is fully as large and even more and is fully as large and even more formidable than are the true man eating sharks. . the odd saw

LEAD PENCIL WOOD.

Getting Scarcer and More Valuable Daily.

It 'is said that American cedars furnish the only wood known of which . good lead pencils can be made, and in connection with this information we learn that American cedars are becoming scarce. The pencil industry is a big one, and, currously enough, perhaps, it is said to be bigger to-day than it was before the day of typewriters. A fac-tory in Germany turns out annually :00,000,000 lead pencils made out of wood of the cedar tree of America. The forest service of the Useted States, which is a bureau of the agricultural department. makes a study of means to preserve the tree supply. and it is not to be supposed that it has overlooked the cedar, useful and beautiful. The fragrant The hickory is a subject of anxiety to the foliest of-ficials, and so is the chestnut. These two species are named because just at present the fear of their extine-tion is greater than that which con-cerns itself with two other growths. The hickory and the chistnut have been attacked by new encuies, and in one case nothing definite is known about the ravager, nor his any ade-quate means been found to put an end to its ravages. The demand for the wood of the tree is so great that the growth cannot keep pace with the market. It is known, however, that finally the lum-Bermen have come to trealize they can secure their trade product in such a way as to help the cause of reproduc-tion. Most of the States of the Union have passed laws to protect their iorests. Low can enter a private do main A farmer, for instance, is not allowed to shoot game birds out of allowed to shoot game birds out of season, even though they are found in his own fields. The State of Maine, to take a notable example, has laws which tend to make the cowner of for-ests have a four for the future. Ceder is worth something besides the giving of its wood to the field makers. Its bergies' furnish forth the breakfast tables of thousands of mebreakfast tables of thousands ful wild birds. When a robin can find a suitable cedar awamp, with plenty of cover and plenty of berries. it will stay in the north all winter, end care nothing for the cold. There is something more than sentiment; however, attaching to the tree-axing cause. Hard husiness sense suggests "consuming our trees and baving them." The hundermon to-day ever-eise care in "taking out" a tree that was known to the industry in the past. Sense and sentiment are good part uers .- Chicago Post.

The subject of canal tolls will not down. The President was reluctant to sign the bal tast summer by which coastvise vessets were free from tolls, and yet he was able to persuade binself on the whole that the argument in favor of such tolls is sound, but every day brings the most tails as sumd, but every day brings fresh protest figations it. Even newspapers that fend to be sen-sational in other respects in the how to look at the exemption in a cooler way and to argue that on the whole the ben-effit of the exemption is reaped by one or two comporations that do not need that practical subsidy. No one need run away from the pro-position because, it is called a subsidy. Words do not burt so much as things in some cases, but it begins to be felt, as the News predicted at the time of the passage of the bill, that the law which breaks a solemn treaty obligation is one that is of doubtful wisdom. The longer the Panama Canab Bill is considered, the more doubt is raised about that clause of it which accords free passage to the coastwise trade. It is impossible to put the law beside the troaty and not see that the later document contravenes the formet. It cought not to be a difficult thing to de-cide what to do in such a case. Pockets Inside Out, and He Had Been Beaten.

Beaverton despatch: Under circum stances that point to murder, the dead body of Ernest Reilly was found near the water tank at the Grand Trunk station here this morning. Reilly was a well-known character around town, and as Beaverton is under local option, with a number of companions he spent the day in Lindsay. The party returned home in the evening, arriving on the Grand Trunk train about 8.45. Reilly, it is alleged, was in an advanced state of intoxication. Instead of getting off at the platform, keilly and his friends disembarked on the opposite side of the train and proceeded up the track. It is supposed that some fraces ensued, and Relly was struck. There is a deep gash over the left eye and several bruises about the head, and one arm and a wrist were broken. When found Reilly was minus his coat and hat. His shirt was torn to ribbons, and the whirt was torn to ribbons, and the pockets of his clothes were turned inside out, as if rifled. It is not supposed that he had any money with him, nor has it been disclosed that any of the party brought whiskey back with them. The body was taken to the Grand Trunk station, where it remained until noon, and was then removed to the pre-misses of Undertaker Black Dr. Grant nuises of Undertaker Black. Dr. Gran nuises an examination, and Crown Attor ney Farewell at Whitby was notified. An inquest was ordered to be opened by Dr. McLean, cf Orillia, on Friday. Col. Farewell will go to Beaverton to-day. Reilly's parents are both living, and he has also two brothers.

Reilly must have met his death early in the night, as the body, when found, was cold and stiff. There were evidepicts a swimming duck. Directly af-ter the murder, Mrs. Logue, the whow, dences of a scuffle, and the opinion is that the party engaged in a drunken said the pin belonged to her husband. Last night she said that she had never brawl, as all appeared to have been brawl, as all appeared to have been drinking heavily in Lindsay. Superintendent Rogers, of the provin-cial police, was notified during the day, and at once detailed an officer to make

an investigation.

HIS PLOT FAILED And Crazed Detroiter Com-

mitted Suicide.

Detroit despatch-Braving a threat of death, Mrs. Abdallah, the 18-year-old wife of one of the acrobats playing at a local theatre, pressed a call bell in a noom at the Morgan House here to-night and turned in time to see E. B. Oberley, crazed, send a bullet he had intended for her, crashing through his own brain. Oberley died in St. Mary's Hospital an hour later. Mrs. Abdallah was taken to police headquarters, where he told her story and was released. According to the girl's story, Oberley ent word to her that he wished to see her in his room, saying that he had known her previously. She, supposing him to be an actor, obeyed the sumnons. When she entered his room, not liking the man's appearance, tried to escape, but Oberley locked the door. "You

try to stir out of this room and I'll kill you," he told her. he told her. ped to the porter. When the man's steps were heard outside, Oberley walked over to Rare Specimen Found In . Canadian Waters. dicates Great Growth. Ottawa, Dec. 30 .- The Commissioner

of Fisheries have just received interesting specimens of a remarkable little fish ing specimens of a remarkable little fish never before found in Canada, although rare specimens have been caught in the United States and Europe. It is a small silvery fish not unlike a small herring, but has two rows of pearl organs along the side of the body. The fish were caught by fishermen on Grand Manan, and they are scientifical-ly. valuable and interesting. The most wonderful feature is the fact that each of the pearl organs gives out a brilliant

A LUMINOUS FISH

of the pearl organs gives out a brilliant light, similar to a small electric lamp. The fight are called the "pearl sides," and belong to a group of very rare fish that are luminous. Very little is known about the life history of these small fish. ntirely new.

but scientific authorities are of the opinion that they inhabit the deepest waters of the ocean and that the light they give out enables them to pro-cure their food, and may also protect cure their food, and may also prove them by frightening away their ene

Gruesome Find In Woods Above North Bay.

Body, Badly Beaten, Was Frozen Stiff.

North Bay, Ont., despatch: On Christmas Eve, in the great north woods, a grim tragedy was uncovered which has all the appearances of murder, terrible and sordid. Teamsters engaged in drawing supplies to construction camps of the Canadian Northern Railway from the main line of the C .P. R. at Chapleau, found the body of a man in the snow, frozen stiff. All around were marks of a struggle in the snow, indicating that the man had fought for his life against odds, until at last, beaten

down by force of superior numbers, he had fallen and been left to die in the bitter cold of the northern winter. The body was brought to Chapleau, where it was taken possession of by Dr. Sheehan, who found that the man had been bat

tered and bruised to death, with every evidence of premeditated and brutal nurder. Investigation thus far has revealed the identity of the man as Chas contractors on the Canadian Northern transcontinental line. Elson left camp some days ago, with three other men, to walk 25 miles to Demegos Station, on the C. P. R., where he interded to take a train for a visit to his old home in a train for a visit to ins on home over Stockholm, Sweden. Elson had över \$300 on his person when he left camp headquarters, and this, money is miss-sing. Three men, who left camp with him, have disappeared, and are being sought for by the police, thus far without success. The tragedy has caused great excitement in Chapleau, where no doubt is felt but that Elson was brotal-

ly murdered. A GORDON RELIC

Census of Manufactures In-

Enormous Production of

OUR INDUSTRIES

Some Big Plants.

Ottawa, Dec. 30 .- The information ob tained from the census of the manufactures of Canada taken in June, 1911, has just made its appearance in a bulletin from the census branch. Some of the information was given the public by Mr. Archibald Blue in a speech at the annual meeting of the Manufacturere' Association in September, but much is mitical ways and the second second

entirely new. The returns show that at the time of the census Canada had 19,218 manu-facturing establishments, with a capital of \$1,247,578,600; with 215,193 employ-ees; with a pay roll of \$645,286,733; using raw material to the value of \$601,-500 018 and turning out products to the 200 bits and turning out products to the solution of \$601,-500 018 and \$600 0

using vaw material to the value of \$601, 509,018, and turning out products to the value of \$1,165,975,639. In ten years the number of establish-ments increased by 4,508; capital by \$800,000,000; employees by 176,000; wages by \$128,000,000; raw materiaf handled by \$335,000,000, and finished products by \$685,000,000. The extensive development of Can-ada's industries is indicated by the im-mense production of some of the estab-lishments. One in Nova Scotia in 1910 turned out more than eight million dol-

turned out more than eight million dol-lars' worth of products, one in Ontario more than nine million dollars' worth. and two in Quebec more than ten mi-lion dollars' worth. There were fourteen establishments which had a production just under seven million dollars each

for the year. Ontario continues the banner Pro vince for manufacturing, having 6,543 establishments, Quebec being next, with 4,845; Nova Scotia following with 1,-188: New Brunswick, 919: British Co umbia. 392; Prince Edward Island, 334; Manitoba, 324, and Alberta and Sas-

katchewan together 105. The figures indicate that amalgama-tion was practised in Ontario to a very large extent. as during the last five years the number of manufacturing es-tablishments increased by only five. while the total capitalization of the While the total curving companies increased by 200.000,000, the number of employees by fifty thousand, the arrivation of wages paid by \$55,000,000.
Among the cities. Montreal continues in the first place as a manufacturing centre, with Toronto gaining. Hamilton takes third place as a Canadian manufacturing centre, with a production of \$65,125,000.
STEEL TRUST RIVAL Ontario manufacturing companies in-creased by 200,000,000, the number of

Big Australian Plant to Fight Combine.

Washington, Dec. 30.- A formidable rival to the so-called steel trust is to he created in New South Wales, where a steel-making plant is to be built at a cost of \$5,000,000. The information is conveyed in a report just received by this Government from American Consul-General John P. Bray at Sydney, who says that \$50,000 already has been

spent in preliminary work. The mills are to be erected near New-castle, and they will be extended as the needs of Australia grow. "Th amount of money to be expended will be un-limited." Mr. Bray declares in his report. "because the company will be spending money all the time." The Broken Hill Proprietary Com-pany is said to be behind the project.

which eventually is expected to control absolutely the Australian market.

THE OPIUM TRAFFIC

Pekin, Dec. 30 .- In view of the unsatsfactory position of the opium question the Chinese Government has issued a manifesto reiterating its desire to suppress the evil and save the people from

The manifesto expresses the fear that although the Government is in earnest the people are evasive. Referring to the agreement with Great Britain, it points out that the cessation of the importation of Indian opium depends on entire prohibition of the cultivation of the native article and that only thus may a confliet over the Anglo-Chinese agreement be avoided. Therefore, all the authorities are en-

joined strictly to execute all previous proclamations siming at suppression.

Politics In New Republic Growing Strong.

Riots Greet Return of Conservative Leader.

Lisbon, via the frontier, Dec. 30 .-The political situation arising in the deadlock of the Conservatives and Demorats is rapidly developing. The Conservative element preponderates in the Cabinet, while nearly half of the members of the Portuguese Parliament "are Democrats. Both parties are endeavoring to organize a coup d'etat.

The Conservative chief. Dr. Abneida. was hastily summoned back from Switzerland, and has arrival here was made the occasion of a monster demonstra-tion on the part of the Conservatives. The Democrats replied with an equally imposing counter demonstration. The Government, alarmed at the pos-

sibilities of trouble; turned out all avail able police and troops. As soon as the steamer aboard which Almeida was a

The President of the Republic has asked the Premier to pardon the Arch-bishop of Braga and the Bishops of Port Alagra and Lamego, who were con-demned last February to three years' banishment from their discess, and to grant annesty to political prisoners, or at least to relax the severity of their imprisonment, but the Premier has re-plied that the moment is not favorable for the granting of varions. Improve-The President of the Republic has for the granting of parlons. Improve-ments in the prisons, he added, have already been decided upon, and will be shortly carried into effect.

PRESENTATION AT ELOIDA

A very enjoyable afternoou was spent by parents and pupils at the closing of the school house here on

Friday last year. The teacher, Miss

B. G. Leverette, and pupils tried to

make everything pleasant for their visitors. The school room was nicely

decorated for the occasion and with

readings, recitation and choruses, by

the pupils, everything passed off nicely. Mr Colon Kilborn occupied the chair.

The teacher had provided tokens of

the festive season for each of her

pupils, and they in turn presented

their teacher with a beautiful music case, accompanied by the follow-

# MAGIC WATER TOYS.

Wenderful Play Toys That Amuse the Children of the Orient. Europe and America turn out for the edification of their children many in-The Marvelous Work They Co Perform in the Blood. bers of the cell community and are en-ceedingly numerous, there being over 75,000,000,000 of the red blood cells genious toys, but the occidental young sters have nothing to compare with the strange expanding water toys with which the children of the far east alone. These red blood cells move in the blood currents, carrying through the arteries each its little load of oxhave for centuries amused themselves. These are placed in small wooden ygen, which it transports to the dis-tant tissues that they may be invigboxes similar to the little paint boxes so often seen in our own country. They have the appearance of soiled shavings orated and vitalized anew, and, re-turning, carrying through the veins the broken matches and dilapidated toothpicks, but when thrown into the water the ingenious toys at once exhibit prop erties that show them to be considera

bly more than mere bits of stick. The wood of these toys has been kim dried, and immediately it touches the Like the sings that sait the wea, can a cell carries its outgoing cargo and re-turns with another one. Some of these cells perform the office of special re-pairers, forcing their way through the walls of the blood vessels and pene-trating the tissues in order to perform water it begins to absorb the water and to expand almost indefinitely. As it increases in size it separates and suddenly opens, becoming a very pret ty toy. One stick will change into a flowerpot containing, it may be, a rose bush in full bloom. Another become an obese mandarin carrying an un-brella. Still another will take the form of a sea serpent, very feroclous in its tiny dimensio

Then, too, there are toys which show as whales, tigers, crocodiles, etc. The figures are colored and present a be-wildering variety in design and treat-ment. Their manufacture is a trade secret, kept inviolate by the guild that turns them out by the thousan

For older children there are provid ed larger and even more artistic fig-ures, consisting of historical characters-rulers, poets and soldiers-and dwarfed trees and tiny houses, whose doors and windows are full of inmates, are also among this class. The more 

# FAR DISTANT URANUS.

Oddities a Visit to This Giganti Planet Would Disclose.

Uranus, which is a star of about magnitude, were a planet

little ones called asteroids, being discovered by the year, it could not have much dialm mon, popular attention, but Uranus is cally a gigantic world, more than sixty times at large as ours. Its vast distance, about 1,700,000,000 miles from the earth, is what causes it to look so small. Uranus has four moons, which volve backward in their orbits-that is voive backward in their orbits—that is to say, they revolve from east to west around Uranus, while Uranus goes, like all the other planets, from west to east around the sun. It is believed that Uranus rotates backward on its axis also. Moreover, the acts of the axis also. Moreover, the axis of that great, strange globe lies in such a direction that in the course of its year, which is equal to eighty-four of our years, the sun shines almost perpendicularly first upon one pole and then upon the other.

Measured by our time standard, there are forty years of constant day-light, followed by forty years of unbroken night, around the poles of Uranus, and the sun rises in the west and sets in the east there, but the sun looks very small when viewed from Uranus-only one four-hundredth as large as it appears to us. Still it sheds upon that planet 1,500 times as much light as the full moon sends to the earth, so that daylight upon Uranus, while faint compared with the blaze of a terrestrial noonday, is nevertheless a very respectable kind of illumination.

The Game of Life. The game we are all playing is a losing game at best. Yet we must

27, 31. Commentary.—I. The beginning of creation (1:1, 2). 1. In the beginning— The foundation is laid for a clear state-ment of the origin of the universe. God —No effort is made to prove the exist-ence of God. That fact is assumed. The Hebrew word here used is plural in form, and denotes fullness of power and excel-lence. Early Christian scholars saw in this plural form a reference to the Trin ity, a plurality of persons in the God-head. The inspired writer does not here "In the beginning matter," or "In beginning force," but "In the be-ing God." Back of matter and back of energy is God. Farther back than our thought can be any more thought can ought can by any possibility reach d. The first sentence of divine to God. to God. The first sentence of davane revelation makes known to us his eters mity of existence. Created—The word here used means to cause that to exist which before had no existence. In this sense it can properly be used only with respect to Ged as the Creator. The heaven and the earth—These words include all inanimate matter. The first years of Genesis presents to us God as verse of Genesis presents to us God as the Creator of all things. The word for the vertex of an things. The word for heaven is plura' and means all the ex-panse above and about the earth. 2. Without form—"Waste."—R. V. Matter was created, but it was not yet arranged into its destinat form. into its destined form. Void-Empty. The earth was void of form, of light, of life and of the conditions essential to the existence of life. The Spirit of God moved upon the face of the waters-The Divine Spirit hovered down upon the deep, as the mighty agent by whose power the darkness will be made to vanish, and beauty and order arise out

of desolution and emptiness.-Whedon. II, The earth fitted for man's abode (ve. 3-25). 3. God said-The narrative passes from the general statement of the fact of creation to a description of the steps involved in the preparation of the earth for man's abode. It was only the earth for man's abode. It was only necessary for God to will, or to decree, and the work was done. Let there be light=The works were simple, but when uttered by the Omupotent One they produced marvellous results. The sources of light had not yet been brought forth, but God is infinite in his resources, therefore he was able to diffuse light at Ill. 4. Saw-Regarded, or observed. -God was pleased with the light his will. which he had created, for it met the desired end. Divided the light from the darkness-A period of light Bucceeded a weried of darkness, as now day follows highf. 5 The evening and the morning were the first day-A natural day, as the mention of the two parts clearly determines; and Moses reckons accord ing to Oriental usage, from singet to inset, saying not day and night as we but evening and morning.-J., F. & The opinion is largely prevalent that the days the days of creation were periods of great and indefinite length, corresponding to the periods of modern geology. This may be true, and yet there is noth-ing to prove that they were not days of venty-four hours each. It is reason-ity believed that the heavenly bodies

ere created in the beginning, but their ays did not reach the earth because the atmosphere was laden with fog, or vapor. And when God said, "Let there

TOP GRAFTING APPLE ORCHARDS For eight or ten years I have been earnest in advising the planting of or-chards and renovating old ones, by pro-per trimming and top grafting. This Lake Huron district is destined to be What was man's character at creation? What attributes of God are shown in-

Lake Huron district is destined to be equal, if not superior, to any other tract of land in Canada, for well fla-vored and good looking fruit. What is wanted is suitable kinds and proper at-tention, comprising cultivation, spraying and fertilizing, or perhaps I might bet-ter say manuring, for trees require mod-trately rich ground to bring fruit to per-fection II. Proclaims God and Creator of all things. I. Proclaim's the eternity of God. The devout recognition of God as a living, personal, eternal Being, apart from and

fection In a letter by A. McNeill, regarding personal, eternal Being, apart from and prior to all human thought is found in the opening verse of the Bible. He, the one Divine Being, is represented as the sole cause of the universe. Creation had in a letter by A. McNeill, regarding top grafting on Tolman Sweet, the writ-er casts a littli doubt upon the benefit derived. Probably in a sense he is cor-'rect, but there is one point in grafting on Tolman stock that I have never seen mentioned, and that is the matter of having the stock comprising from six to count of creation reveals His power and per-sonality and the beginning of the revela-tion of God to man. He is first. All having the stock comprising from six to having the stock comprising non-matching having the stock comprising non-matching and be-neath that stem we know not what the root may be. It may be a hardy and thrifty root, sending a vigorous growth to the grafts on top, or it may be the things begin with Him. The direct state-men that God created all things, car-ries with it its own conviction, for does He not stand at the beginning of all thought and argument? The first verse

A thrifty Tolman will develop a better tree than the average root, but how

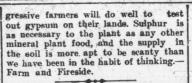

of the Bible gives us a most satisfactory knowledge of the origin of the universe. can it be obtained? In general, grafting for nursery stock the roots are grown from seed, and the As regards the time of creation we are told nothing. There is no account of date or time until after the creation of encourage other merchants to do the same. Keep in mind the perishable nature of the product and do not hold eggs on a rising market without proper facilities for storing them. Realize that fresh eggs at any season of the year are much more valuable than state eggs, when prices are higher. When shipping, pack carefully in strong. clean cases and fillers. small apple plants are taken up, and a scion whip grafted below the line of the man. Six successive periods of creation surface, which may be easily known by are spoken of without any indication as are spoken or without any indication as to the length of each. Just how the wri-ter of this ancient document received these primeval truths we are not told; but the far past may have been disclos-ed to his in in the spoken disclos-

the grafter. The scion, if of proper quality and cut, is quite likely to form roots, if placed deep enough in the nursery row, and if the soil is of that nature that it will encourage the formation of roots from mote future was disclosed to the later prophets. That the Creator was to be the scion. Thus in time we might have worshiped rather than the material things which he had created, was the lesson which God's chosen people needed a Tolman root on a Tolman stock. If this is so, we have the grandest top in time that can be got, unless it may be time that can be got, unless it may

to have impressed upon them when Moses, their leader, brought them out of the Tetofsky. After the head is formed the time to Moses, their leader, brought them out of the land where men worshipped the phy-sical universe. This chapter was not meant to tell us all the varied processes through which God carried on his great creative work. We are given only a rapid and suggestive sketch of the great out-lines of Ched's creation a glimnes into After the head is formed the time to put on the graft is during some of the wam days of spring, before the bark is, too loose, and there will be a strong head at the trunk, where there is little danger of limbs breaking and destroying the tree. For trees whose limbs are liable to

God's order and method, that we may recognize Him as the God of wisdom, split off at the crotch, maling at bolting is usually recommended. It is not al-ways wise to tire wire around, although love and power, and be led to worship ways wise to tire wire around, although I have seen some doing fairly well, but there is danger of injury to the trees by wiring. It is said that the Portuguesc of the Pacific slope in California have adopted a practice of using the living tree for stays and braces, not by ent-ting prays to hold up the overladen branches, but by grafting the branches amongst themselves in such a way that these grafts act as braces or guys. Te illustrate: Before the tree is overall things. For proof of the doctrine of cre-ation we may rely wholly upon scrip-ture, and besides this the heaven and ly quality counts far more than quality. Adopt without delay a basis of "qual-ity payment." The system of "average payment." on a case count basis permits of a great deal of the carelessness and dishonesty that exists in the egg trade. If the packers were to adopt the meth-od of "quality payment" in its fullest sense the storekeepers and collectors could not afford to take eggs from pro-ducers regardelss of quality. ture, and besides this the nearth and earth reflect their Maker. The existence of the things around us is a most em-phatic assertion of the existence of (bod, All theology is wrapped up in the majestic word "created." The revela-

To illustrate: Before the tree is overtion of God and the revelation of nature are seen in this brief narrative of grown this system is begun by a care-ful study or an understanding of the rethe creation. Here we find answers to all our questions direct, positive, com-plete, and withal, simple, sublime and quirements some years hence. Having decided where these strengthening grafts are required, two thrifty sprouts are Having and sufficient. Here we find the first article taken, at opposite points from whence this living cable is to start. These two mighty is the maker of heaven and earth. He spoke and it was done. He commanded and it stood fast. The work of the creation advanced from the less to the creation advanced from the less of our creed that God the Father Al-mighty is the maker of heaven and necessary. In many cases these two branches will grow together without to the greater. There were first inorganto the greater. There were first inorgan-ic elemente, then life. First, the life of the plant, then of the animal, and then of man. There is a special grandeur in the account which is here given of the sprouts may be helped by artificially sprouts may be delegated by artificially sprouts may be delegated by artificially ays did not reach the earth because the atmosphere was laden with for, or vapor. And when God said, "Let there be fight," he caused the light from the sun to be diffused to the extent that the darkness was dispelled. In such case the rotation of the earth on its axis would not subgring the creation we are studying a succession of mixeles and we are studying succession of mixeles and we are studying the creation are being the creation we are studying the maximum and the substance of the such as the word occasion these creation we are studying the succession of mixeles and we are studying the succession of mixeles are the succession of mixeles and we are studying the succession of mixeles and we are studying the succession of mixeles are the succession of mixeles and we are studying the succession of mixeles the succession of mixeles and we are succession of mixeles are the succession of mixeles and we are succession of mixeles are the succession of mixeles and we are succession of mixeles and we are succession of mixeles are succession of mixeles and we are succesion of mixeles are succesion of m

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                 |                                                                                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

ause which he aunt itely ignored and decision to rid herself companion. Madam any account have alredennick to discover i the slightest appre-egard to poor Winnie rous attractiveness. f course, discovered this, hers of her astute aunt's

es and desires, as a bold, earted nature will often

cover the craftiest policy of a world-hampered brain at a single effort- she hampered brain at a single effort— she had a score on her own account 'ike-wise to pay off, and dutifully delighted in the thought of Madam's disconfi-fure. "Very likely," she repeated, laugh-ing, "but I have heard of fatal gits before now, Captain Tredentick." De-janira's poisoned garment may have been pretty enought—doubtless as pret-ber as that heartiful scalakin inches I ty as that beautiful sealskin jacket have heard so much of-but you know what Dejanira's gift did for poor Her-

Between the terrible allusion to "poisoned garnents," the sarcastic blame implied in his cousin's manner, and the attack upon his mythological mem-ory, Stephen Tredennick felt quife overand

whelmed. "Why, Mildred, what harm was it? DId i -was it, wrong?" he stammered. "I thought I might give a young hadya girl of herage a present a little gift for a keepake. It is not unusual, 1 think? Was it wrong? What harm was it, Millie? I did not think there could be any harn indeed!"

In his expectness he stood clasping his cousin's fair jewelled hands, while Mildren's handsome face grew radiant with girlsh fun, both on account of "poor\_off Stephen's useasiness," and st the sudden belief that there was a deeper feeling than mere annoyance prompting his earnestness and excite-unt which her clever teasing had mut which her cl brought to light. her clever teasing

The red glow of the firelight revealed them standing so together —Mild-red's bright, upturned face gleaming with smiles, Stephen's full of carnest with smiles, stephen's full of carnest questioning — revealed them so plain-ly that a watcher outside in the chill wintry gloaming of the dark, frozen shrubbery could notice even the pat-tern of the fragile white lace collar and sleeves which adorned Mildred Tre-dennicity rich dark silk duese the bail dennick's rich dark silk dress, the bril-liant cluster of golden toys swaying at her watchchain, the restless flash of the starry rings on her long, thin white

fingers. The firelit room, with those soft, ample curtains of maroon damask ly-ing on the warm dark carpet- the subdued glitter of dark polished woods, and lines and spots of bright gilding glim-mering from floor to ceiling-that dark cased wall, with its close-packed rows of books-the light, warmin, comfort, happiness, and the beauty of beautiful Mildred Trendennick-these were the accessories of the picture whose central figure she had alone come to look lyon --that little dark-robed watcher in the cold and snow outside-to look

her last upon. She crept nearer and nearer for that long last farewell look so near that had Captain Trendennick not been lookng into his cousin's eves, he must have met the gaze of those deep, dark, yearn-ing ones outside in the evening gloom. "Heaven bless her—Stephen Treden-

nick's wife!" whispered the pale, quiv-ering lips; and then the dark ever-

y," Mildred replied. She I only hope," he went on, more earnest-berself excessively—recit-be very person most con-possess the love of that true heart who shall not be in all respects worthy of

"He is worthy," Mildred cried, passionately, her eyes and cheeks aflame in an instant in proud assurance-"you know he is. Stephen!"

know he is, Stephen!" "Bertie Gerdiner?" her cousin half queried, with a rather pitying smile, haughty Mildred fancied. "He is a brave, handsome, high-spirited lad, I know; but, oh, Millie, my dear, he is very young, he is very far away, and com-stancy is not one of the virtues of youth under temperation." nder temptation." The imperious forbidding gesture of

her quick upraised hand stopped him suddenly. "Temptation," she said, the proud

tears flooding her brilliant eyes-temp-tation to be false to me, Stephen? Why do you speak so," she demanded in haughty rebuke, "when you know that we love each other-that we mean to live for each other-that no one could tempt us to formate and other" more tempt us to forsake each other," poor Mildred cried, in her proud devotion to her young lover-"when you know that nothing could separate us-Bertie and me-nothing but death?" "Nothing but death," her cousin re-peated, mechanically, and he softly

peated, mechanically, and he softly stroked the fair white hand lying in his own, with a certain sense of sadness thrilling him from the proud defiance of the declaration of her fond, impetuous, wayward love-"nothing but death-I elieve it, Millie!"

### CHAPTER XIV:

"I must not be too late," he said to himself, as he hastened his steps down the winding descent of the road at the farther side of Tregarthen Head-"I wish I could have gone to deliver Mildred's message yesterday evening-I must not be too late now." He quickened his steps again-the Coastguard station on the rising cliff be-yond was very near now-he would not lose a minute more than he could help

"Heaven bless Mildred! What a kind, generous nature she has!" he went ou thinking, pleasantly. "What a brave, true, high-spirited beautiful wife she will be in the years to come-a proud, nobleminded, generous, loving mother , whom her children will naturally turn  $\frac{1}{2}$  in ner calidren will naturally turn '5' in reverence and admiration! How kindly she spoke of noor little Winnie Caer-lyon! She will be a real friend to her, I am sure, quick-tempered and haughty as she is-as haughty as my old grandfather, 'Proud Tredennick,' as people used to call him. She is warm hearted and true to the core--somewhat similar in character, yet full of dissimilarity, to my poor little Winnie herself." It had a pleasant sound, this last

phrase, to Stephen Tredennick's ear, and he repeated it again ere he angrily ruminated on another topic.

"How dare they gossip about her! "How dare they gossip about her!" How dare they couple my name with hers—poor, innocent child! Because I ventured to bestow on her a few friend-ly words and a friendly gift! If I heard ly words and a friendly gift! If I heard them, they should stow their words fas-ter down their throats than they could uter them!" he said, wrathfully. "And Aunt Vivian is most blamable of all! with some disfavor a a large brevelow.

nie!" "You'll mess the room and break my He had almost reached the Coastghard "green jur that I've had these thirty station now, and his feelings had quite reached an altitude of indignation and frown. "Where did you get those flowchivairie resolve which would have dis-mayed Madam Vivan's very soul within have dis- | ers." her, as the result of her own injudicious ness, could she but have known it; buthappily for her peace of mind-she knew nothing further that the fact that her much-indulged. imperious nicee had made the abrupt and capricious request that she might be allowed to invite Mis Caerlyon to spend the evening at Rose-worthy, to which request Madam, jn much surprise and outward-seeming graciousness, gave her assent. Outside the whitewashed porch, Capt.

would be no harm to pluck a few-I love white flowers so much." "What took you into that old ceme tery at all?" queried Miss Whiteny. "You're for ever going there. It is be-cause there happened to be English bones laid there fifty years ago that you have such a fancy for sitting among graves and head-stones." "Perhaps that is one reason, aunt Sarah," answered Winnie, truthfully; "but the chief reason is that there is one corner in it so like Travellian **Changed** to Vigor

Symptoms of Disease.

Weary Tiredness

"My life for years has been of se-dentary character," writes T. B. Titch-field, head of a well known firm in Buckingham. "Nine hours every day 1 Buckingham. "Nine hours every day I spent at office work and took exercise only on Sunday. I desregarded the symp toms of ill-health, which were all too ap parent to my family. I grew thin, then pale, and before long I was jaundiced-eyes and skin were yellow, my strength and nerve energy were lowered, and I was quite unfitted for business. In the norning a lightness in the head, particularly when I bent over, made me very worried about my health. Most of the cularly laxative medicines I found weakening, and knowing that I had to be at bus iness every day I neglected myself ra-ther than risk further weakness. Of course I grew worse, but by a happy chance I began to use Dr. Hamilton's Pills. I was forcibly struck by the fact that they neither caused griping non nausea, and it seemed incredible . that pills could tone, cleanse and regulate the system withut causing any unpleas ant after effects. Dr. Hamilton's Pills acted with me just as gentle as nature -they gave new lift to my liver, strang -they gave new lift to my liver, strang-thened my stonach, and won me back to perfect good health. My skin is clear, diziness has disappeared, and my ap-petite, strength, spirits are perfect." Hefuse anything officient you instead of Dr. Hamilton's Pills, which are sure to cure. Sold in 25e boxes; five for \$1, at all druggists and atorekeepers, or postpaid from the Cutarrhozone Co., Buffalo, N. Y., and Kingston, Canada

While he spoke, he glanced anxiously for a sign of the little anciously for a sign of the little shabby black straw hat, the thin gray plaid shawl, or haply that fatal sealskin jacket. Anxiously he longed for the sound of the light footfall, the soft patient voice. More anxiously than he could have believed possible—with a strange keen longing—he looked for the pale little face, the dark sad gray eyes, and the crowning tresses of silken brown pale little lace, the dark sad gray eyes, and the crowning tresses of silken brown hair. He had even begun to think how he would tease her for not having kept her promise, and would claim the keep sake he had requested during that cold walk in the wild March morning on their way from Roseworthy-if she would "You can't see her," Mrs. (aerlyon said, shortly, "she's not here." "Not here!" repeated Stephen Tredennick, feeling as if a cold wave of disappointment had chilled him to the heart.

"No." returned Mrs. Caerlyon, with "No. returned ans, Caeryon, with a spiteful air of triumph in her gloomy face, "you'll never see her again, Cap-pun Tredennick. She's gone!" "Gone!" "Yes, sir," said Mrs. Caerlyon, short

ly, taking up her darning again, "Win nifred Caerlyon is gone to America!" CHAPTER XV.

CHAPTER XV. Six months sped quietly away, and it was summer in the town of Winston, state of Massachusettes, United States of America, summer in Miss Sarah Whitney's front parlor, in Miss Sarah Whit Aunt Vivian is most blamable of all! She gave the gossiping runnors stability by her unkindly treatment. 'As if the child had done any wrong- thought any wrong! All are unjust, unkind, tyran-nical towards her -my poor little Win-nie! vase. "You'll mess the room and break my

> "Out of the English cemetery, Aunt, Sarah," replied the gentle voice of the young relative, "there's such a quantity of honey scented geranium growing there, and a great bush of white roses in the corner by the old wall." "Hum-squeer notion to go gatherin' illowers out of a churchyard to bring in-to a body's sitting room!" returned Miss Whitney, in a dissatisfied tone, sitting down to her mending basket. "Is that an English notion, Winired If it is" che added toutting within a disit is," she added, putting on her spec-tacles, "you'd ha better left it behind "No, I never saw any one do it," Winifred replied, gently as ever. The low, sweet, patient voice sounded lower, softer, perhaps. sadder than of yore, "like the twittering of a lonely bird," Miss Whitney averred shortly. "But the big

ping away fast and angrily— "I re-member seeing you come in with your white face and swollan eyes and hoarse voice, much more like some white face and swollan eyes and hoarse voice, much more like some poor creature out of an infirmary, or a nume that had been attending pa-tients for a year running, than a girl of twenty-my niece Winifred's child-and so I told your step-mothert" (Te be Constinued.)

BREEDS WILD GEESE

one corner in it so like Trewellian Churchyard at home, with the ivy crooping over the stones, and tufts of pink dalaise, and one tall elm tree, that I could almost declare it was my mo-ther's grave that lay in the sunny an-gle; and I feel as if I were actually back in Cornwall again when I sit there and hear the sea down at Saund-tree Doint " ers' Point.

trs' Point." Miss Whitney felt a little softened at the allusion to the fair young nicce she was fond of eight and-twenty years before; but she would not show it "for the world." ""You'ne homesick for Tolgooth Bay,

and your stepmother, and her pack of children, I suppose, miss," she remark ed, snipping away at the patching of a kitchen towel-Muss Whitney never let "rubbishing fancy-work" enter her house-"on would think that a decent quiet home would content you after that!"

ing a pained white face, "you know that I am contented and very grate-ful for it!"

"Then you oughtn't to mope!" re-torted Miss Whitney, sharply. "I sup-pose the house is to quiet for you, or you want girls to chatter with. You may go into other houses, then, for you won't have any chattering in here, Winifred Caerlyon! I'll have no fussing and dressing and talking about beaux and parties and fal-lals under my roof! Six months before Winifred have shrunk, pained, mortified, and dis-pleased, at her old maiden grand-aunt's peevish accusations. She had learned better now. The patient meek girl had grown wiser through the teaching of grown wiser throu her hidden sorrow.

"Give me those stockings to darn, auntie," she said, with a slight smile:

"Give me those stockings to darn, auntie," she said, with a slight smile; "they are a great deal more in my way than finery and parties." "On pris'll be girls to the end of time," rejoined Miss Whitney; "and of course your notions about fine clothes and sweethearts and getting married, like all the rest." Whitfred laughed. "Well, if I have, what is the use of my troubling my head about them, aunt Sarah?" she asked gaily. "You know you wouldn't permit it, if I want-ed ever so much to have fine clothes and sweethearts, and get married." "Oh," Miss Whitney returned, grim-

"Oh," Miss Whitey returned, grim-ly, "old as I am, I am neither so old nor so silly as to think that I could prevent you if you took the notion, any more than I could stop the grass from growing. "Well, but I shall never take the no-

tion; so you will be spared all trouble about me in that respect ,at least, aunt

Sarah. "Why, pray?" demanded aunt Sarah ooking over her spectacles. "You'll get married when your time comes, though I dare say you've an idea in your head now that you won't have any one but some fine, tall, handsome fellow with curly hair and a straight nose- girls are always going on with that rubbish!' Winnfred smiled slightly, but made no reply; and Miss Whitney impati-

ently regarded the quiet attitude and the busy fingers for a few moments in crochety and eccentric as she was there was one thing which provoked her into incessant suspicion and impatient

into incessant susperior and impartent curiosity—her young grand-nicee's un-girlish quietness, docility, and reserved old fashioned womanliness: though, had she been otherwise. Miss Whitney have would

and childing. "That's what he is, I suppose, Wini-fred?" she resumed, with a sour smile on her wrinkled face. "Who?" she asked, with a start.

THE WEARY SMILE THAT COVERS PAIN

> Women Are Themselves to Blan For Much of Their Suffering.

Women the weak, yet, under a snile they will the to hide pain and suffering that manne could not bear patiently. If would only remember that their frequent failures of health arise from feeble or impure blood their lives would be smoother and they would long-would be smoother and they mould long-

would be smoother natural cherry would long-er retain their natural charm, When the blood fails then begin those dragging backaches and headaches; un-refreshing sleep that causes dark lines under the eyes; dizziness; fits of depres-From the time that the earliest settler first reached the shores of Louisiana this state has been famed as a feeding sion, palpitation or rapid fluttering of the heart; hot flashes and indigestion. Then the checks grow pale the eyes dulk and the complexion blemished. Women should know that much of this

suffering is needless and can be promptly remedied. Purify and enrich the blood through the use of Dr. Williams' Pink Pills and your suffering will yan-ish. Thousands of women know that Dr. Williams' Pink Pills have brightened bit. Williams Fink Fils have brightened their lives by making the new, good blood of health, and so toning up all the vital organs into healthy, vigorous action. Here is an instance from among many. Miss Cora A. Cornell, St. Cathmany. Miss Cora A. Cornell, St. Cath-arines, Ont., says: "Ever since the age of fourteen I have suffered terribly with pains in my back, and severe headaches. I was also much troubled with indiges-tion, and had to be extremely careful as to my diet, and sometimes did not feel like eating at all. Some two years ago the headaches became so bad that I had to give up my position, which was clerk-ing in a store, where, of course, I was constanting on the source of in an office where I could be seated most of the time, but even then I suffered ter-I had been taking did not help are, F finally decided to try Dr. Williams' Pink

Pills. I got a supply, and soon felt they were helping me and I continued takin the pills for several months until a felt perfectly well. Although my doctor advised me not to go back to my old post-tion. I decided to do so and have not felt any ill effect. I never have backache any in effect. I never have backache now, seldom a headache, and albtraces of the indirection have disappeared. Scan-not speak too highly of Dr. Williams' Pink Pills, and I hope this letter will help someone who suffers as I used to." Sold by all medicine dealers, of by mail to cents a hox or six house for 25 50 at 50 cents a box or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

AN ELEGY SMALL Boy. TAIR OF Salas DANGER . ICE. entre . PEARLY GATES nn

# ground for innumeratic thousands of ducks and geese, to say nothing of the waders and long bills, come out of the north and spend the winter in the marsh-es and on the prairies of the Delta State. But of all these thousands of birds scarcely any remain within the borders of the state to nest and rear their young. A few varieties of ducks, such as the wood duck or brancheur, the Florida duck or canard des isles, an oc-casional pair of teal-that is about all.

As for geese, at the earliest sign of spring these big fellows start for the far north and select the wildest and most "Ob, aunt Sarah," cried Winifred, liftinaccessible portions for their summer Not until the past season, it is believ

ed, have a pair of Canada geese ever been known to young in Louisiana. Abont two years ago a sportsman liv-ing in West Feliciana, while hunting in the marshes near the Mississippi River shot and slightly wounded a pair, male and female, of wild Canada geese. See-ing that the wounds were very slight and would not permanently injure the birds, except to prevent them from fly-

birds, except to prevent them from fly-ing, he took them home and placed them-in his barnyard. As time passed, the birds completely recovered from their injuries, became quite tame and associated with the other domestic fowl. They were novel pets, and were kept and fed for this reason. Winter passed, and with the coming

Winter passed, and with the coming of spring the instinct to go north, mate and rear a brood of downy goslings took possession of the birds and they would have carried out their desire it not been for the fact that neither

could fly. This being the case, they did the bes they could, and mated and produced their brood where they were, probably a thousand miles further south than they would under ordoinary circum stances have remained.

The young birds grew and thrived and the flock, now numbering five, was the pride of their owner. Then came tragedy in the shape of a hungry dog, which hap-pened to catch the mother goose on land one day, ran her down and killed her, and the dog was in turn killed b its owner for its murderous propensi ties.

The damage it seemed was irreparable for no other wild goose could be secured as a mate for the old gander. With the advent of spring, however, the old fel-low solved the problem for all by mating with one of the tame geese on the farm and from this mating was produced

a hybrid, a pale edition of the stock. The old gander, with three young

birds and the hybrid are now alive and well, according to the owner, who intends trying a number of experiments in mating with the rare stock that he possesses as a result of two lucky shots.

**A MODERN MIRACLE** He Had Eczema 25 Years and Doc

tors Said "No Cure."

Yet Zam-Bul Has Worked Complete Cure.

This is the experience of a man of high reput tion, highly known in Montreal, and (whose case can readily be tigated. Mr. 1. Maisi, the

eens and frozen shrubs rustled softly parted and closed, and the lone little watcher was gone.

"I am very sorry, Stephen; I should not have annoyed you by repeating this spiteful gossip," Mildred said, penitently, at the close of their prolonged tete-a-tete in the study-Mildred and Stephen were rather fond of tete-a-tete interviews and tete-a-tete rambles, Madam Vivian noticed, with much stately sat-isfaction—"and I promise you that, as far as I am concerned, there shall be further ground for people's unkind remarks about your poor little Winaie Caerlyon.'

'My poor little Winnie Caerlyon?' Stephen Tredennick said, raising his brows in a frown; whilst in the eyes beneath a curious smile was shining. "Well, my poor little Winnie Caerl-yon, then," returned Mildred, coddy.

"She shall be my friend, and I shall request, Madam Vivian, our worthy and "She shan by Wisher our worthy and and windows-listened for that creat grievously-mistaken relative, to per-mit Miss Caerlyon's visits here as my friend, But I believe I must make you friend, But I believe I must make you "I wish Mikhred had come with me."

in this carryon's visits here as my gentle one he remembered so well; but friend, But I believe I must make you in y ambasador in the first instance, Captain Tredennick; it would be less tormal and more friendly; besides, to countering that terrible step-mother, and should not wish to do so unless you ingly, before he knocked, and paused

object to the office. In case it should be too disagreeable and troublesome an undertaking for you, I will defer my invitation until I can pay a visit in person.

Her sparkling eves shot glances of barbed satire and malice at her cousin, who, after a struggle to look coolly indifferent or indiguant, failed utterly, and got up a violent fit of coughing in-stead, which perhaps accounted for the

A teacher in a lower grade was in-structing her pupils in the use of a vphen. Among the examples given the children was the word "bird-the children was the word "bird-e." "That's right," encouragingly larked the teacher. "Now, Paul, me why we put a hyphen in d-cage." "It's for the bird to sit "e." was the startling rejoinder.

# Women's Institute

regular meeting of Women's te was held on Saturday, Dec n Athens High School hall. hall was attistically decorated ergreens, bells and flowers. ram consisted of a recitation Hazel Smith, piano solo by wendolyne Wiltse, talk on teeth" by Mr Wallace John-iental student at the R.C D S. aumont Cornell, medical student aumont Cornell, medical student onto University, gave a very in-ng and impressive talk on ce of Eugenics." Both adwere listened to with pleasure ofit. W. G. Swayne was to address

titute, but being unexpectedly o perform clerical duties, he was to be present. Grace Wing favored the Instih a reading;
