POBRY.

TO A GIRL OF THIRTEEN.

(From the Poetical Remains of Wm. Sidney Walker.)

They steps are dancing towards the bond Between the child and woman;

And youth shall pass, with all the brood Of fancy-fleeting passion;

And grief shall come with womanhood, And waken cold reflection;

And then shall come the time, when all is o'er, And pleasures unreturning;

Like one who wakes from pleasant sleep Unto the cares of morning.

Nay, say not so! no cloud the sun Of joyous expectation;

Ordained to bless the little one, The freshening of creation!

No doubt, that He, who thus doth feed Them into the world with gladness,

Will be present help in need, Her comforter in sadness.

Smile on, thy little winsome thing! All rich in nature's gifts;

That hast within thy heart a spring Of self-renewing pleasures—

Smile on, fair child, and take thy fill Of mirth till time shall end it!

The nature's love and gentleness, And who shall reprehend it!

Smile on, thy little winsome thing! All rich in nature's gifts;

That hast within thy heart a spring Of self-renewing pleasures—

Smile on, fair child, and take thy fill Of mirth till time shall end it!

The nature's love and gentleness, And who shall reprehend it!

Smile on, thy little winsome thing! All rich in nature's gifts;

a new voyage altogether. The difficulty, as indicated and measured by the wages demanded by the sailors, is much greater in the case of ships bound to the ports of the Pacific, than in the case of those bound to the United States, or the British Isles, or even to India.

It is quite the reverse now. There can be no doubt, as to the immense number of months we are sending out, but we do not hear of a corresponding export of food.

(From the London Working-Man's Friend.)

THE CAP OF LIBERTY.

There are some peculiar ceremonies which, notwithstanding the lapse of ages, survive the passage of time, and are found, even in modern days, as freshly engraved on the memory, and earnestly guarded by the people.

In England the cap of liberty is inscribed on it in letters of gold, it is used as a symbol of the constitutional liberty of the nation, and Britannia sometimes bears it on the point of her spear.

In France, in the beginning of the revolution of 1793, the cap of liberty was hoisted as the symbol of freedom; but, when the blood of regicide and the stench of guillotines were in the air, the red cap of liberty was discarded.

A MAN OF WAR AND A MAN OF PEACE.

It will probably be remembered, that a few years ago, a great excitement was caused by the discovery of vast deposits of guano upon the Island of Ichaboe, situated on the west coast of Africa.

sent of the authorities, and the order for the sailing of the man-of-war was suspended. He proceeded to Ichaboe, and being rowed ashore, began to ascend one of the lofty ledges.

THE MORMONS.

A correspondent of the St. Louis Republican thus writes from Salt Lake City:—This is a beautiful valley. The mountains which surround it are bold and rugged, whose summits are always covered with snow.

THE LIMITS OF TEMPERANCE.

In time past Temperance was confined much to Societies, and its extent and power were measured by those Societies; hence it was very much the habit of those who were without, to estimate the rise and fall of the cause by the rise and fall of those associations.

SUNDERED TIES.

As the branches of the ivy that wound round the same oak cluster as a single wreath in their upward course, so, around the heart-strings of those who love and are loved again, are woven tender fibres, that combine the elasticity of the sapling with the strength of the full-grown "march of the wood."

THE FORTRESSES AND CASTLES OF GREAT BRITAIN.

as we bend over the couch, and minister to the wants of the dear one who is laid low—when he has almost ceased to animate our spirits, and a fearful picture, that we dare not gaze upon, is forced to our view, oh! to what a fearful tedium, think those ties are drawn.

THE FORTRESSES AND CASTLES OF GREAT BRITAIN.

The fortresses and castles of Great Britain afford of themselves an interesting and distinct object for study. There are numerous examples left scattered over the country; the construction of various periods from the times of the Romans to the present day, such as the Herefordshire Beacon on the Malvern Hills in Worcestershire, and the remains of Roman constructions, as Richborough Castle, in Kent, and Forchester Castle in Cambridgeshire.

AGRICULTURAL EDUCATION.

WHAT CAN BE DONE WITH PRESENT MEANS.—While much has been said, both privately and publicly, concerning the establishment of great Agricultural Schools...

OUR COMMON SCHOOLS are the starting point. Here let the efforts of the rational husbandry commence. Are there not enough readers in one-half the school districts of this country to discuss the subject of agricultural education...

Let our Country Agricultural Societies secure the services of some competent person to attend Teachers' Institutes, and communicate instructions and enthusiasm to teachers, so as to fit them more perfectly to teach farmers' sons.

Let them also offer premiums to teachers and classes, who shall teach and learn the most and the best of this subject. I cannot forbear to mention the substitution of useful books, or farm and horticultural implements, for money premiums, would accomplish vast good...

immediately, and they were each submerged into the presence of their Maker to answer for the murder of the other. After the second third shot, the Californian crawled on his hands and knees toward his antagonist and fired, in order to make sure of his victim. This shot took effect in the abdomen of the Mexican.

The steamer Star of the West, arrived at New York with passengers and mail intelligence from the Pacific. She had 200 passengers and \$200,000 in gold dust.

The steamer Concord City arrived at New Orleans, with the important announcement, that the difficulty with the Cuban government was not by any means settled. On the last trip, the authorities permitted her to land her passengers and mail, but such courtesy would not again be granted.

Another frightful railroad accident took place on the New Haven road, on Friday last. While the train was crossing the bridge at Windsor Locks, Conn., one of the rail-beds, when the three kind steam cars were thrown off the track, and the last one was precipitated into the canal in twelve feet of water.

On the 7th Mr. Patterson, R. N., died on board the *Bohemia*, of consumption. The news brought by this Mail of the same character, which has come hitherto. The war still drags it slow length along, and the latest intelligence from the frontier states, that our regiments are still committed on the frontiers, even in the very proximity of the sea.

The principal event of the war during the past month has been the advance of Lieutenant-General Canby, at the head of a strong force of 12,000 of the enemy's cattle. MARTYR OF OTHER NATIONS.—A Dutch author, Myshker J. L. Leyden, in a very interesting volume, recently published by him in London, entitled "Blasphemy in the East," has entered into some curious speculations relative to the introduction and probable effects of the extension of vaccination in that country.

This gentleman, having noticed for some time past, the chief of the Dutch factory on the little island of Decina, visited himself of the opportunity thus presented to introduce, conjointly with Dr. Mohan, the practice of vaccination. At first, the operation was regarded with much distrust, notwithstanding that on more than one occasion, the ravages of small-pox had decimated the empire.

However, the inhabitants have at length recoiled to vaccination, which is rapidly extending, and Mr. Leyden, accepting parallel European data as the basis of his calculation, infers that the natural operation of this pestiferous influence will be to increase to such an extent the population of Japan, that emigration will be inevitable. Indeed, he states "the natives of Japan to have been already for some time past alive, and inquisitive about the transactions of other nations."

He states "the natives of Japan to have been already for some time past alive, and inquisitive about the transactions of other nations." He states "the natives of Japan to have been already for some time past alive, and inquisitive about the transactions of other nations."

churches, mills, post offices, &c., correctly laid down. The adoption of the soundings from Capt. BAYNE'S Charts is, we think, judicious, as giving information of the best and most authentic kind, to intending emigrants, and particularly to those whose views are of a commercial nature, or who may contemplate the prosecution of the fishery trade, for which it affords the greatest facilities.

We abstain from drawing any comparison between the Map in question, and that of Mr. HENRY CRESSALL; because they are both well-executed, creditable to the Island, and so their respective merits, and we do not, in the course of a short time, fairly remember each.

TO THE EDITOR OF HAZARD'S GAZETTE. Sir: I observed in your last paper, a letter from Mr. Alex. McNeill, Cavendish, complaining that he did not receive a prize for cloth, at the recent Industrial Exhibition; and alleging, as a reason for this, that one of the Judges (Mr. Lydiard) had been a competitor. As a friend of Mr. Lydiard's, in his absence from the Island, I beg leave, through the medium of your paper, to make a few remarks upon this singular epistle.

If (as the writer evidently wishes the public to suppose) Mr. Lydiard had endeavored to sway the Judges, and had succeeded, and thereby gained the prize, it would have said very little for their integrity; and, in my opinion, it says no little for the honesty of the man who says, "that had he been aware at the time he saw Mr. Lydiard's cloth, and was informed that it was to be exhibited, that he (Mr. L.) was to be one of the Judges, he should not have entered his own cloth for competition, though so much superior to the other;" but the facts which I particularly wish to state, are as follow:—

I happened to be in Mr. Lydiard's store, and he showed me a piece of cloth which he had purchased previous to the Exhibition, which was paid over to the woman, the original owner and manufacturer of the cloth. I confess, I cannot see anything wrong in this; nor can I think there would be any impropriety in the Judge competing and receiving prizes on any other account. Mr. McNeill, however, thinks differently; and, from the tenor of his letter, we must conclude that it would not be quite safe for him to trust himself under such very trying circumstances.

I am, Sir, Yours respectfully, A. D. Charlottetown, Nov. 20, 1852.

THE MAINE LIQUOR LAW. At a Public Meeting, held in the Temperance Hall, on the evening of Wednesday, the 19th inst., for the purpose of advancing the introduction into this Island, of the Maine Liquor Law, the following Resolutions were adopted:—

Resolved, That in view of the rapid increase of intemperance, and the evils which it entails upon the community, it is the duty of every citizen to exert his influence to bring about a reformation in this respect; and that it is the imperative duty of Christian Patriots, of every denomination and party, to unite in active and persevering efforts to arrest its alarming progress.

Resolved, That whatever other causes may have combined to produce this alarming increase of intemperance, such of them as are the opinion of this meeting, be attributed to the utter inefficiency of the present laws regulating the importation, manufacture and sale of intoxicating liquors;—the inconvenience of their application;—the deficiency of the means of proof in cases of violation;—the uncertainty of their penalties;—and the inequality of their operation, all combining to render them, in a great measure, inoperative, and that in their general result exceedingly unsatisfactory to the public at large.

Resolved, That this meeting is further of opinion, that existing Laws on this subject appear to be founded on a radically false principle, namely, that the traffic in intoxicating beverages is a public evil, needing only to be properly regulated, and not (as every temperance man generally regard it) a public evil, to be suppressed, that intoxicating beverages are in their nature, evil, dangerous and deadly, and that their total exclusion would not only be no loss, but a immense gain to all the interests of society, and that, in the view of the case, we know of no liquor Law, based upon the true principle, except those recently enacted by the Legislatures of the State of Maine, Massachusetts and Rhode Island.

Resolved, That in view of these facts, we earnestly recommend all true friends of Temperance throughout this Island, as the only thing now desirable, to commence an agitation in their respective localities on the subject of the adoption by our Legislature of a measure, as nearly as possible, similar to the Maine Law; and that Petitions praying for such a measure be, in the meantime, circulated and signed as numerously as circumstances will permit, with the view of being presented to both Houses of the Legislature, at the approaching Session thereof.

Resolved, That in view of these facts, we earnestly recommend all true friends of Temperance throughout this Island, as the only thing now desirable, to commence an agitation in their respective localities on the subject of the adoption by our Legislature of a measure, as nearly as possible, similar to the Maine Law; and that Petitions praying for such a measure be, in the meantime, circulated and signed as numerously as circumstances will permit, with the view of being presented to both Houses of the Legislature, at the approaching Session thereof.

HASZARD'S GAZETTE. TUESDAY, NOVEMBER 23, 1852.

THE MAINE LIQUOR LAW. THAT Drunkenness is an evil, and, as affects both society and individuals, one of the most serious, no man pretends to deny; and could there be found any certain antidote, or effectual corrective, the inventor would be justly entitled to rank with the greatest benefactors of his race.

The present discovery of the means of curing this evil, is a great boon to the human race, and one which will be remembered with gratitude by all who are acquainted with the progress of the enemy of virtue, civilization and order; and to their high credit be recorded, the "Sons of Temperance" have, on this side of the Atlantic, achieved a mighty triumph, in making the opinions of the people, on this subject, prevail over the opposition of the enemies of the good and virtuous of all ranks and both sexes, in the spread of the principles of temperance. Fifty years ago, intemperance was not only tolerated, but gloried in; and the drunkard was considered as a man of honor and respectability.

Resolved, That in view of these facts, we earnestly recommend all true friends of Temperance throughout this Island, as the only thing now desirable, to commence an agitation in their respective localities on the subject of the adoption by our Legislature of a measure, as nearly as possible, similar to the Maine Law; and that Petitions praying for such a measure be, in the meantime, circulated and signed as numerously as circumstances will permit, with the view of being presented to both Houses of the Legislature, at the approaching Session thereof.
