

OMAR PACHA.

In a work so difficult as the regeneration of an entire nation he had many fellow-labourers. Amongst them the first undoubtedly was an eminent man whose talents as a diplomatist London and Paris have but too often recognized...

Such was the civil capacity Omar had displayed in the midst of so many labors, he ran through all the degrees of the army. Kol Agassi, (Aide-de-camp), Bim Basal, (Commandant), Miralay, (Colonel), Eya, (General of Brigades), and so on...

At this hour he is the first general of the Ottoman army on the Danube, and more than two hundred thousand men, according to the latest accounts, are subject to his command.

His military capabilities, indeed, have had no decisive opportunity of showing themselves in the teeth of disciplined troops.

the improvement of society in all its developments. But of these ill-omened redoubts Turkish subjects were the arms, while the head was inevitable, and kept itself in security from his blows, beyond the frontiers.

Often, even far from the noise of arms, he baffled the plots of the invidious enemies of Turkey. The most enviable of his bloodless victories was the cause of the Hungarian refugees, whom he met at Shumla, whether he had purposely repaired.

The internal contest has now disappeared before the external. Omar Pacha holds united under his banner both old and young Turkey. He found himself one day, belonging in an equal degree, to the one and to the other; it was on that day when both assembled under his orders on the Banks of the Danube.

And can the victory, not only external but internal, be any matter of doubt? When Russia shall have paid to Turkey the ransom of her hypocrisy and ambition, the civilizing influence of the French and English armies, and of the men of all nations who are hastening to defend her, will have crossed the empire, from the Ararat to the Adriatic, and from the Danube to the Euphrates; the natural resources with which she has been blessed to such a degree by Heaven will be developed; and all nations will hail with one accord her regeneration.

DRUNKENNESS AND EDUCATION.

At a meeting of the Church of England Education Society, recently held in the city of Manchester, the Rev. Hugh Stowell spoke of the antagonism of the drinking customs of his country with its mental culture and moral advancement, in a manner that might well startle some of the conservative influences of "the establishment."

"However we may extend our educational machinery, I am satisfied we can never keep pace with the drinking machinery that is disgracing and degrading this country. It is all nonsense to talk about intellectual culture, and places of amusement, and exhibitions, and tea-gardens, and places of that kind contracting the drunken usages of this country."

THE PILOT.—The master of the ship something to be idle, to sit still and to do nothing. He stirs not the pump, he drives not the oars, he soundeth not the deep, he rideth not the ropes, he scatcheth not the shrouds, he runneth not hither and thither, forward or backward, under the hatches or above.

Engaged in all the struggles of the two parties during the most important period of their existence, the political instrument of their country, he always regarded the necessity of drawing the sword against his fellow-subjects. It was farthest from his wish to tie it with blood, even to impress what was, in the common sense, the common advantage namely,

GENERAL INTELLIGENCE.

THE ARMED EXPEDITION AGAINST MEXICO.

A few days ago we stated that rumours were in circulation that several vessels were arming in this port, under the auspices of General Alvarez and the revolutionary party in Mexico.

Among the vessels bought with this or other money, we are told, were the screw steamer Benjamin Franklin, formerly trading from New York to New Orleans, and the bark, Catarina Augustus. The propeller was altered and fitted up recently by Mr. William Esling, at Greenpoint, Long Island, as a war steamer.

The bark Catarina Augustus took on board powder, gun-carriages and other articles of war, at the foot of North Moore st., and was to be transferred to the Franklin at sea. The Benjamin Franklin is loaded with coal and stores, and a limited quantity of small arms. Her guns and ammunition, said an extra supply of small arms, are on board the Catarina Augustus, and will be transferred to the Franklin at sea.

Several gentlemen of high standing in the United States and elsewhere are reported to be in the city, and are probably engaged in the various schemes which the "cup that cheers, but not inebriates." It was well for them that the symposium was held under their own roof tree, for the bursts of genuine laughter, and the rounds of Scotch fire that were repeatedly given, would have induced a suspicion that something more invigorating than tea, coffee, or cold water, must have called forth such hilarious noises.

COLONIAL.

CANADIAN AFFAIRS.—After years of party squabbles in the British North American Ministry, formed of the most liberal and distinguished of the respective political parties. This event is not to be wondered at; the people are heartily tired of the strife and turmoil which agitators had engendered among them; they see how futile all their professions of devotion to the cause of the people have proved, and they therefore wisely looked to sustain one of the two parties, and they are all three advancing under them more rapidly than at any previous period in their history.

NEW BRUNSWICK.

THE COURT OF CHANCERY AND THE CUSTOM HOUSE ABOLISHED IN NEW BRUNSWICK.—We have the satisfaction of announcing to-day that the last mail from England brought despatches which give the finishing blow to the Court of Chancery, and the Custom House in this Province. Both these "time-worn," but not "time-honored" institutions, are forever abolished.

At the last session of the General Assembly of this Province, an Act was passed for abolishing the Court of Chancery, and transferring its equity jurisdiction to the Supreme Court, as also the Master of the Rolls to the bench of that Court, in an additional Judge. The Royal assent had been given to this Act; and the Hon. Neville Parker, late Master of the Rolls, has been gazetted a Justice of the Court of Chancery in no more who will mourn it? None but those who profited by its interminable prolixity, endless delays, and monstrous expenses.

The Lords of the Treasury have for some time past had under its consideration the propriety of abolishing and reducing the Imperial Customs in this Province. Finally, they

have arrived at the sensible conclusion that it was best to abolish the establishment altogether; and by last mail, an order was received for closing it immediately. The Imperial Government takes care of the officers of Customs that will be dismissed, and the whole duties hitherto performed by them will hereafter be executed at the Provincial Treasury. This will be a great relief to the trade of this country, and effect a material saving to all who are extensively engaged in business, as hereafter the duties and other documents required by the Imperial Customs will be dispensed with entirely.—New Brunswick.

WILKINSON ACADEMY, Mount Allison.—The new Branch of the Academy designed for Females was opened on the 17th ult., with five scholars, and other exercises suited to the occasion. The total number of students in the two branches of the Institution amounted on the eighth day of the term to one hundred and ninety. Of these there were in the Male branch, 79 boarders and 13 day scholars; in the Female Branch, 70 boarders and 29 day scholars.

The best evidence that can be adduced in favor of the efficaciousness of Hoodland's German Bitters, prepared by Dr. C. M. Jackson, is the unprecedented demand for them from all parts of the Union; and although there may be many compounds prepared and represented as being worthy of a liberal patronage, yet we feel constrained to remark, that the vast number of testimonials which the worthy doctor has been honored, by persons of the highest character and respectability, who found it necessary to have recourse to his preparation, is testimony sufficiently conclusive, that a more efficacious remedy for the almost insupportable relief of those afflicted with that distressing malady, dyspepsia, has never been discovered.

HASZARD'S GAZETTE.

Wednesday, September 27, 1854.

We have always been of opinion, and we are anxious to confess — to lead others to the same way of thinking, that the surest plan of converting men from the folly of intemperance is, to show that a total abstinence from all stimulating drinks, so far from making men dull and stupid, is the best and most salutary means of promoting the health and happiness of the human race.

The opening of the General Assembly took place yesterday according to Proclamation. We missed, we confess, the Guard of Honor. We give the Lieut. Governor's Speech, by which it will appear that little else is contemplated than the passing an Act recognizing the Reciprocity Treaty, the providing a Poll or some other force in lieu of the Military, lost by the refusal of the Legislative Council to a similar bill last Session, and the establishment of a Normal School for teachers. We shall take the Speech into consideration in our next issue. E. Thornton was elected Speaker. An entire change of officers for the House of Assembly, with the exception of the Clerk, took place, from the Sergeant-at-Arms down to the lamp-lighter.

I am happy to meet you in your Legislative capacity, although the season at which I have been obliged to call you together must, I fear, occasion inconvenience to many of you. Two events have recently occurred, either of which, I feel assured, you will consider of sufficient importance to justify this early meeting of the Legislature. The one is the result of the negotiations between Her Majesty's Government and the Government of the United States, in the mutual ratification of a Treaty which offers very considerable advantages to this Island, in a Commercial and Agricultural point of view, in order to secure which, with the least possible delay, a measure will be submitted for your consideration.

The determination of Her Majesty's Government in this respect, has been more than once communicated to you by my predecessor, and you have had reason to expect that it would have been carried into effect at an earlier period. Should any difference of opinion exist, with regard to the mode in which it is to be met, I trust it will not be such as to impede the immediate adoption of a measure, by which the Government of this Island will be placed in a position to maintain the supremacy of the Law, and to preserve internal tranquility under all circumstances.

The public accounts shall, in due course, be submitted to you. I have much satisfaction in informing you that the state of the Revenue, so far as it can be ascertained at this period, indicates the progressive prosperity of the Colony. I rely with confidence upon your willingness to make the necessary appropriations for the maintenance of the public service.

In my recent excursion through this beautiful Island I have been much gratified by the evidence of enterprise, industry and contentment, which every where presented themselves, and still more by the spirit of loyalty and attachment to Her Majesty's Person and Throne which pervades all classes of the people.

have the satisfaction of announcing that the traffic in intoxicating liquors has been suppressed by law, and this fertile Island released from its curse for ever. We thank you for the information that the National Division has contemplated calling out some Missionary Lecturers, and hope that in the execution of their labours, our beloved Island will not be forgotten.

Charlotteville, 26th Sept. 1854. Brother: Be pleased to convey to the members of the order residing in the Island my grateful acknowledgments for the kind expressions contained in the address just presented. My feelings have been one of pleasure, and I will require no urgent solicitations to renew it. Should my services on the present occasion produce but a tithe of the beneficial results anticipated, I will be more than compensated.

The National Division will be gratified to learn that in selecting a British Colonel as its W. Patriarch, their action has met with your approval. That the products of your beautiful and fertile Island, designed by a kind Providence for the sustenance of man, shall no longer be converted into a "baneful poison," and that the traffic in all intoxicating liquors may speedily be suppressed, in an extent and manner desired, in any arrangements that may be made by the National Division for the employment of Lecturers, your interests will not be lost sight of. Thanking you most sincerely for your kind wishes for the success of Mrs. Tilley and myself to our family.

Mr. Speaker and Gentlemen of the House of Assembly: I have the honor to acknowledge the receipt of your letter of the 21st inst. in relation to the proposed measure for the abolition of the Court of Chancery and the Custom House. I am happy to meet you in your Legislative capacity, although the season at which I have been obliged to call you together must, I fear, occasion inconvenience to many of you.
