## DR. A. C. DANIELS' MEDICINES

*Dr. A. C. Daniels*

### CAUTION

For more than a quarter of a century Dr. A. C. Daniels' Warranted Veterinary Medicines have been the favorite handy Home Remedies for doctoring Horses, Dogs, Cattle, Sheep, Swine, Cats, etc., etc.

These Guaranteed remedies are prepared from the choicest drugs to be obtained, in our own laboratories, and under our personal supervision with the greatest care, regardless of the expense, and they are as near perfection as can be made. These medicines are not "Patent Medicines;" each and every one is founded upon well established Veterinary formulas. As a consequence, we are enabled to warrant any package of Dr. A. C. Daniels' Remedies to be all that is claimed

for it or *refund the money.* *Just follow directions.* These satisfactory conditions, existing so long, have built for Dr. A. C. Daniels' Remedies, a world-wide, popular reputation. For the protection of the public against inferior substitutes and imitations, we herewith present a small portrait of Dr. A. C. Daniels, which, with his signature, appears on every package.

For the convenience of the trade we have established Distributing Agencies in the following cities and countries, where our goods and books can be obtained in any quantity desired.

**DR. A. C. DANIELS' MEDICINES**

## Farmers, Breeders, Horse Owners and Stablemen

### THESE MEDICINES WILL BE FOUND INVALUABLE TO YOU

They are safe, reliable and always ready for use. They will keep in perfect order for years. In case of sudden sickness or accident they are invaluable. You can doctor your own horse, saving money, time, suffering and even the life of your animal. Every stableman and stock owner should have a good assortment of Dr. Daniels' Warranted Veterinary Medicines. If you have these remedies on hand, you will get the habit of promptly and properly caring for your stock when they need assistance.

**Dr. Daniels' Cow Invigorator** is the dairyman's best friend; given to the cows properly obviates aborting, retained afterbirth, blue and scant milk, garget, caked udder, scours and run-down condition, aids digestion and tends to increase quantity of milk. **Price, 60c.**

**Dr. Daniels' Colic Drops**, if given in time, will prevent the loss of your horse from the well-nigh fatal disease of colic. You won't have to send miles away for a veterinary surgeon, for the remedy is at your side and you can administer it yourself, saving worry, suffering and loss. One package is good for from 5 to 10 cases. Always keep it on hand. Can be mailed. 10 cents extra for mailing. **Price, \$1.00**

**Dr. Daniels' Horse Renovator Powders** are the thing to use if your horse is out of condition, has Rough Coat, Pimples, or Skin Disease, Old Cough, Asthma, Heaves, or drives dull and logy. One package will make him show great improvement; they act immediately on the Kidneys and Urinary Organs, put the coat in fine condition, and many times add twenty-five to fifty pounds of flesh to his weight in a month and make him feel as fine as silk. A real Heave remedy. Excellent for Garget in cows and Hog Cholera in hogs. Can be mailed. 8 cents extra for mailing. **Price, 10c.**

**Dr. Daniels' Great Distemper Remedy or Cough, Cold and Fever Drops** will overcome chills in your horse or any other stock in from 30 to 60 minutes when properly and timely given, at a cost of less than 10 cents, thus preventing Fever, Pneumonia, Lung Troubles, etc. The Great Distemper Remedy is excellent for treating Milk Fever in cows. This remedy is the shipper's friend for acclimating and preventing chills, colds and coughs. Can be mailed. 10 cents extra for mailing. **Price, 60c - \$1.25**

**Dr. Daniels' Wonder Worker Lotion.** If a horse or cow is cut on barbed wire or wounded in any way, this lotion will quickly stop the bleeding, prevent swelling and inflammation and aid the sore to heal quickly. For burns scalds, galls and sores of any kind this is a most effective remedy. For piles in man or animal it is highly recommended and warranted to give satisfaction. Can be mailed. 10 cents extra for mailing. **Price, 60c - \$1.25**

**Dr. Daniels' Hoof Grower.** If your horse goes sore forward, or rests his feet when standing, give him your immediate attention. Daniels' Hoof Grower will help him. Its general use would prevent at least one-half of the lameness in horses. It stimulates the growth of a new hoof, relieves Dry, Shelly and Brittle Hoofs and is a great remedy for contraction. Can be mailed. 10 cents extra for mailing. **Price, 60c**

## Dr. A. C. Daniels' Medicines.

Dr. A. C. Daniels' Worm Killer for removing all kinds of Worms from Horses, Mules, Hogs, etc. Can be mailed. 8 cents extra for mailing. Price 65c

Daniels' Absorbent Spavin Remedy for removing Spavin Curb and other inflammatory bunches. Easy to apply. Leaves no scar or white hair. Can be sent by mail. No extra charge. Price, 60c and \$1.25

Dr. Daniels' Liniment (Oster-Cocus Oil), for Bone, Nerve and Muscle lameness. A great all round remedy. Should be in every household and stable. For Sprains, Strains, Rheumatism and Neuralgia, Inflammatory Bunches and Lameness. Smaller size can be sent by mail by sending 10 cents extra for mailing. Price, 35c, 60c and \$1.25

Carbo-Negus. A disinfectant for cleansing all Sores, Cuts, Wounds, Galls, etc. Prevents the spread of contagious diseases, purifies, kill odors, destroy germs and microbes. For fleas and lice on dogs, cats or horses it is excellent. A great remedy for the mange on horse, dog, cat or other animals. Smaller sizes mailed 10 cents extra. Price, 35c, 60c and \$1.25

Gall-Cura. You can overcome that Harness or Saddle Gall in a few days, and keep the horse at work all of the time. Contains no poison. Is safe and warranted to please or money refunded. Can be mailed. No extra charge. Price, 35c and 60c

Dr. Daniels' Liniment Powder for removing soreness, lameness and stiffness from joints and muscles. Especially valuable in Laminitis and Founder. An excellent wash after fast track work. Can be mailed. 8 cents extra for mailing. Price, 60c.

Dr. Daniels' Perfection Hoof Dressing is one of the few harmless things of the kind on the market for its purpose. Prevents and remedies hoof troubles and keeps the hoofs polished. Price, 60c and 85c

Dr. Daniels' Physic Balls always ready for use. Keeps in any climate. For use in all diseases of the blood, Worms, Constipation, Indigestion, etc.; always effective safe and satisfactory. Sent by mail. No extra charge for mailing. Price, 35c

Dr. Daniels' Animal Eye Wash is the thing the horseman has been waiting for, something to treat the weak and inflamed eyes of any animal. Will give satisfaction. Can be mailed. 10 cents extra. Price, 60c

Dr. Daniels' Canker Remedy and Antiseptic Healing Powder, for Sores, Canker Thrush and Galls. A safe and reliable remedy, warranted to please. Can be mailed. 8 cents extra for mailing. Price, 35c and 60c

Dr. Daniels' Cloudy Extract of Witch Hazel, for stable and family use. Contains strength and medicinal qualities. Is a great remedy for all sorts of inflammation, external or internal, on man or animal. Price, 35c and 60c

Mules can be treated the same as horses either for lameness or ills with Daniels' Remedies.

We manufacture a complete line of Dog and Cat Medicines, most of which can be mailed.

Dr. Daniels' Medicines are sold throughout the world by up-to-date dealers in Medicines.

Books on all Domestic Animals free.

# DR. A. C. DANIELS'

WORLD FAMOUS

## COLIC CURE

You can cure any case of Colic if you use  
this celebrated remedy in time

*It is a fact that twenty-seven horses die of colic where one is burned to death.*

You insure against fire. Do you insure against colic? Dr. Daniels' Colic Drops are the one safe policy to hold against Horse Colic. It is always quick to act, safe and convenient to administer, sure to save the horse when given

promptly; a woman or a child can save a horse, so simple is its use.

**Symptoms of Spasmodic Colic.**—Distended Bowels, relieved by pressure; pulse natural; lies down and rolls, and seems easier at intervals; legs and ears generally warm; comes on suddenly; is never preceded, and rarely accompanied by fever; looks back at flanks; paws and kicks; will not drink.

A Symptom of Colic

**Symptoms of Flatulent Colic.**—Similar to those of spasmodic, except the PAIN IS CONTINUOUS, not so violent; abdomen distended VERY HARD with drum-like sound when struck, followed by difficult breathing; perspiration; trembling of limbs; sighing respiration; pulse rapid; staggers from side to side; bowels constipated; lies down with caution.

### Horse Colic is Caused

By a great variety of conditions. The most common are indigestion, change of feed or water, drinking cold water on an empty stomach, when tired or exhausted, constipation, feeding new hay, oats or corn, any grain that has soured, ulcers, worms, etc. Many cases are brought on by the horse taking a sudden chill by standing in a draft when heated; also by over-feeding, which causes an unusual amount of gas to accumulate; neglect of the usual evacuations, such as going a long time without urinating. All of the above, as well as many other causes, or a combination of them, will bring on colic.

### Treatment

Our treatment will seem so easy and simple, as compared with former practice, as to raise some doubts of its results in the minds of people who have had sad experience with other medicines; but follow directions faithfully and the result will please you. Get the horse into a nice spot of soft turf or into a deeply bedded box stall, so that if he throws himself down violently he will not bruise his flesh or rupture himself. Give as soon as possible a dose out of No. 1 bottle, 30 drops (the syringe full), as far back on the tongue as possible. In ten minutes give the same sized dose out of No. 2 bottle, and then continue giving these doses as above, first one and then the other, about ten minutes apart. If a horse is very sick before you

**DR. A. C. DANIELS' MEDICINES**

can obtain Daniels' Colic Cure you may give *two doses of each* (60 drops) instead of one to start with, then proceed as above, or giving once in five to ten minutes apart. Usually four to eight doses will cure a bad case, and two to four a mild case. Keep everything as quiet as possible. If the horse finds any position in which he seems easier, let him keep it. If convenient give him an injection of blood-warm soapsuds, or introduce the hand, well greased, into his rectum and remove all excrement possible. Many times he will be found so constipated that the gas cannot work off naturally. Keep cool. Don't get nervous or give other medicines. This remedy will do the work, and never fails if given in any reasonable season. It has cured thousands of cases after they had been given up as lost by good veterinarians. "While there's life there's hope," even if the eyes are filmed, his upper lip turned up, his pulse cannot be felt, and you can prick him with a pin without his moving. Don't despair. He may recover even when as near death as that. When the horse is cured of colic, give a few doses of Dr. Daniels' Fever Drops, two hours apart, to guard against inflammation of the bowels which is almost sure to follow a long-continued case of colic.

#### Paralysis of Hind Quarters

This trouble has become very common among fine horses, and is greatly dreaded by horsemen. It usually attacks horses that are in fine condition, that have not had their customary amount of exercise for a few days. The horse comes from the stable in fine spirits, but in an hour or two grows stiff in one or both hind legs; soon falls flat, and is unable to rise, or sits upon his haunches like a dog, and is perfectly helpless. The No. 1 Colic Drops have been used in many cases with good success; and if you have no good veterinarian, proceed as follows:

#### Treatment

Give thirty drops of No. 1 every fifteen minutes for two or three hours; later once in thirty minutes. After he shows signs of improvement, gradually reduce the dose. Wring woolen blankets out of as hot water as can be borne, and folding them, cover the back and hips, changing them often. Cover with a rubber blanket to keep in the steam. Rub hind legs with strong mustard water. Sling him up if you can; if not, keep deep, soft bedding under him, and turn him over and change his position twice in twenty-four hours anyhow; four times is better.

Feed warm bran mashes. Mix into it two of Dr. Daniels' Renovator Powders each day. Avoid all noise. Keep him as easy and comfortable as you can in every way. If attended to in first stages, this treatment is generally successful.

#### Stoppage of Water and Blackwater

Treat as for colic in first stages, also give a few doses of my Renovator. If these do not relieve in two hours, the water must be drawn with a catheter.

#### Colic, Hoven or Bloat in Cattle

Give full-grown cattle 30 drops Colic Drops on the tongue every ten minutes; 3 to 5 doses are usually required. Calves and yearlings, 5 to 10 drops is a dose. Feed my Renovator occasionally and prevent this trouble.

Scours. — Give No. 1 Colic Drops once in half hour. A few doses will generally check it.

# DR. A. C. DANIELS' CELEBRATED DISTEMPER CURE AND COUGH, COLD AND FEVER DROPS.

Insure your Horse against loss from distemper and all lung troubles

Dr. A. C. Daniels' Cough, Cold, Fever Drops and Distemper Cure. — This medicine is far superior to anything heretofore known as a specific for colds, coughs, chills, epi-

Last Stages of Lung Fever, zootic, distemper, pink-eye, sunstroke, pneumonia, lung fever, throat troubles, meningitis, etc.

For shippers it is worth its weight in gold.

For acclimating horses it has no equal.

It is a perfect cure for Milk Fever in Cows and Hog

Cholera in Swine.

*It works quicker and better than any so-called cure in the world. Cures and leaves no aftermath, no weakness, no swollen limbs, no blindness or other weakness.*

Is in constant use by hundreds of the most successful practitioners of the two continents. Introduced into the United States in 1877, has superseded all other remedies, and is today used in more than 100,000 of the principal stables from Maine to California. It is used by all the great mining and lumber companies, all the show people, like Barnum & Bailey, Ringling Bros., Buffalo Bill, Pawnee Bill, Four-Paw, Sawtelle, by Ketcham, Reed and the big drivers, by stock farms and stock owners all over the world.

Coughs, Colds and Chills should have prompt treatment. Give as soon as the horse indicates any signs of such, 30-drop doses of Cough, Cold and Fever Drops every half hour for two to four hours. Mix into a warm Bran Mash one Horse Renovator Powder and give for feed; allow plenty of fresh water; blanket warm and keep from draughts, but allow fresh air for breathing; *a horse requires it.* To prevent colds and the train of ills following, let us impress on the reader's mind a simple truth, the old saying, "one ounce of prevention is worth a pound of cure." If every caretaker of a horse would, when his horse had been exposed to inclement and severe weather, or overworked and in weak condition, if every such man would, as soon as the horse was under cover give a few doses (two to four) of Cough, Cold and Fever Drops; would give warm bran mash, with one Renovator Powder, wipe and rub dry the coat, body and legs, blanket well, and later give plenty cold water for drink; if these precautions were observed, colds, etc., would not exist.

Cold in the Head — Leading to Catarrh, etc., is an inflammation of the lining of the nostrils and other parts of the head and throat; often affects the eyes, causing them to swell and the tears to flow. The membranes at

## DR. A. C. DANIELS' MEDICINES

first are dry and congested, pinkish-red, or red in color; watery discharge from the nostrils; some fever, which shall at once be apparent if we use a clinical thermometer. Animal will appear dull, sneezing short and often. "Blows" the air through his nose; if not checked at once, worse will soon follow.

**Treatment.** — If taken at once, give three to five doses each day of Dr. Daniels' Cough Drops. Feed bran mashes. Give each day two doses of Renovator Powders. Keep the horse in a well-ventilated stall without draught, and keep him well blanketed. Hang a blanket over his head, and put a pail of hot Liniment Powder underneath. Stir it gently to cause steam to rise. Put into it a piece of hot iron or stone occasionally to give thorough steaming and repeat every two hours. If constipated, give warm water injections. Do not work for two or three days.

**Distemper, Epizootic, Pinkeye, Influenza.** — Don't wait; prompt action is required. When you see your horse shivering, legs and ears cold, coat rough, appetite poor, throat sore, eyes dull and tears-flowing, lips swollen, the nostrils deep red and dry, thin, watery discharge, followed shortly by thick, acrid matter, thermometer will show temperature 101-104, or even 106, pulse up to 50 or 60; when you notice any of these symptoms (don't wait for them all), act. Blanket well and keep out of draughts, but have pure air to breathe; fresh, cold, pure water, little and often; feed anything they will eat. Mix one Renovator Powder with molasses, spreading on the tongue for tonic (twice a day). Give at once 30-drop doses of Cough, Cold and Fever Drops and Distemper Cure once in ten to twenty minutes for three or four hours, or until signs of relief are manifest; put them well back in the mouth on the roots of the tongue; then give the doses once in two hours, day and night, for two or three days, or as long as fever is on. Steam the nostrils with Liniment Powder; it relieves and heals the membranous linings; if throat is sore or lumps form rub on Oster-Cocus Liniment. Give a tonic treatment when convalescing. Many unreliable Distemper cures are on the market and in use, and we often see the sad result of using them — horses ruined, puts it in a mild way. Dr. Daniels' Cough, Cold and Fever Drops and Distemper Cure have a quarter century's experience. Have cured thousands of horses. Are used by all great lumbering and mining camps, Buffalo Bill, Pawnee Bill Shows, Four-paws, Barnum & Bailey, Sig. Sawtelle, Wallace Bros.' Circuses, Ketcham, Reed and the big drivers. They ought to be good enough for you.

In Distemper

**Lung Fever.** — Simply a neglected cold. Cough Drops would have prevented, and they will also cure, but more time, patience and loss must result. You can tell when your horse has lung fever easily. Notice the pulse has risen to 70, 80, 90, perhaps 100. Thermometer shows temperature over 100°, perhaps 103° or above; weary, but won't lie down; breathing accelerated; stands braced and rigid; hangs head; a general dull appearance; tap the lungs on the side, they sound dull; put the ear to his side, listen — the air is passing through the lungs in a

## DR. A. C. DANIELS' MEDICINES

peculiar rattling sound; if another horse is handy try this last on him, you can readily detect the *noise*. Treat similar to distemper, and a cure to be accomplished must be taken in first stage; blanket well, bandage and rub the legs; give 30-drop doses of Daniels' Fever Drops (well back in the mouth) once in thirty minutes for a few hours, until the pulse is down to 40 or 50, and the horse sweats profusely; then do not give as often, but once in an hour or two. If very weak, give a little whiskey three times a day. Apply Oster-Cocus to chest; tonic with Horse Renovator.

**Bronchitis.** — Treat as for lung trouble, rubbing the throat with Oster-Cocus Liniment at night, and bandaging with hot Liniment Powder during the day. Keep the bandages covered to steam the throat well.

**Laryngitis.** — Treat same as bronchitis.

**Meningitis.** — Symptoms: Inflammation of the brain, spinal cord and nerve centers, paralysis, dizziness, falling to the ground; neck and back muscles contract so suddenly as to sometimes *draw the head back*; eyes wild, head tossed about, high fever, delirium; unless relieved, death ensues in four to twenty-four hours. Act promptly. Apply ice to head; blanket warm; urine must pass or use catheter. Support in sling; apply freely to legs Oster-Cocus Liniment; reduce the fever by giving 30-drop doses of Daniels' Fever Drops every half hour until temperature is near 98°; allow plenty of fresh water to drink; when convalescing give a gill of whiskey or brandy with as much water three or four times a day; one Renovator Powder morning and night in the feed is an excellent tonic.

**Temperature.** — A good thing to know. Temperature should be 98° to 100° Fahrenheit; 102 is moderate; 104 high; 106 excessive and danger point.

A **Clinical Thermometer** should be owned by every owner of a horse. We can send you a registered thermometer for \$1.50 by mail.

**Thumps.**—Shown by violent beating of the heart, a jerky motion to the entire body, when persistent there is serious heart trouble.

**Treatment.**—Avoid over-exertion; rest and quiet, give 30 drops of Daniels' Fever Drops every half hour for three hours, repeating daily for a few days; 3 or 4 doses of Colic Drops may also be given daily with good results, say in the morning, and ten drops at night. Diet is important.

**Milk Fever, Puerperal Fever, or Inflammation of the Womb** is caused by injury to the womb in calving, exposure to cold and chills, or retained after-birth. It is also attributed at times to contagion, as it is found more liable to occur in herds where one or more cows have had it.

**Symptoms** usually appear within three days from calving. The cow carries her head low; does not chew her cud; poor appetite, and steps from side to side with her hind feet, indicating pain in hind parts. Breathing is rapid, eyes bloodshot and staring, with a flow of tears. She soon grows weak and falls or lies down, seems to think she cannot rise, and appears to have a general collapse. Head and horns hot to the hand. In first stages the bowels are sometimes loose, but usually constipated, and the evacuations are darker than usual. The urine is light colored.

**Treatment.** — If the cow is down, get her body and head into the position in which cattle usually lie; pack bedding around her, to hold her in easy position, with head well raised. Give her at once about a quart of raw linseed oil; put a bag of broken ice on back of her head, and change it once in two or three hours. Feed carrots, bran mashes, or any easily digested food; Dan-

## DR. A. C. DANIELS' MEDICINES

tels' Cow Invigorator twice a day. Give injections into the rectum of blood-warm soapsuds every hour. Give in ordinary cases Dr. Daniels' Fever Drops, in thirty-drop doses, well back on the tongue or gullet, once in half an hour, till a marked improvement is noticed. Later on once an hour. Usually two days will effect a cure. In severe cases, when the cow will make no effort to rise and the eyes look dead and glassy, administer the Fever Drops once in ten or fifteen minutes for two to four hours, or until the cow appears quiet and as if pain was relieved. Then give once in half an hour, till she eats and appears all right. This treatment will effect a cure in ninety-five cases in a hundred, and will never fail if the case is taken in time. It is always well to give the Fever Drops to every cow, five or six thirty-drop doses each day for three days after calving.

### Something About the Pulse of a Horse

It is frequently of great importance to note the pulsations of the heart in treating disease. When at rest the pulse beats at an average of about 40 per minute, but varies in different horses from 34 to 42. In colts and old horses it runs much higher — sometimes to 60 and over — and still the health be good. It will also be increased by hot stables, excitement and pregnancy. The most convenient place to feel the horse's pulse is on the under side of the lower jaw. Press the fingers along the edge of the jaw, when a cord or ridge will be felt. Press on this with the fingers, when you will feel it throb. A very little practice in "taking the pulse" will soon make it plain to you, and is liable to be of great service. Any great variation in the pulse is a sign of disease. If it is rapid and hard it indicates high fever and inflammation; if weak and rapid, there is low fever and general weakness and lung trouble.

Taking the Pulse

In cattle the pulse is faster than in the horse; young, 55 to 65; adults, 40 to 50; aged, 40 to 45. Sheep still faster, — 60 to 70. Dogs, 80 to 90 beats per minute.

**Respiration in Healthy Animals.** — A horse breathes in a minute 10 to 12 times; a cow, 15 to 18 times; a sheep, 14 to 18 times; a dog, 15 to 20 times.

### GLANDERS AND FARCY

**Glanders.**—A dangerous, contagious disease. Slaughter at once. Disinfect all surroundings, stall, stable, etc. Carbo-Negus is the greatest germ killer of the age. Four to six spoonfuls to quart of water.

We publish a large book on horses, one on cows, one on sheep and swine, one on dogs and cats; these books contain much valuable information on the care, feeding and treating animals, sick or well, how to tell the age, gestation periods, to take the pulse and temperature, how to diagnose disease and locate lameness. They are free and can be furnished by your dealer. Dr. A. C. Daniels' full Veterinary Book, over 200 pages and a hundred illustrations, \$1.50 postpaid

## RENOVATOR POWDERS

For Horses, Cattle, Sheep and  
Swine

A MEDICINE NOT A FOOD  
A TRUE CONDITION POWDER

Packed in the Blue Box with White Corners

The Great Blood Purifier and Cleanser.

For Treatment of Coughs, Colds, Indigestion, Loss of Appetite, Heaves, Stocked Legs, Greased Heel, etc. Prevents Colic. Especially Designed for Fitting Horses and Will Put Them in the best of Condition for Market or for Fine Stable Use. Will Cure Hog Cholera in Swine. Prevents Garget and Milk Fever in Cows. Acclimates Green Horses and Prevents "Shipper's Fever." Add these Powders to the Grain and Make the Best and Cheapest Stock Food on Earth. Puts on Flesh. Puts into Condition. Acts on Kidneys and Urinary organs. Make Your Own Stock Food and Save Money.

This wonderful remedy has put hundreds of thousands of worn-out and run-down horses in fine condition. No matter who has been treating your horse without success, or how long continued has been his trouble, we ask you to try this medicine.

If given occasionally, it will ward off Fits, Colic, Fever, Indigestion, Heaves, Worms, Bots, Pinkeye, etc., and keep your horse looking and feeling "as fine as silk." If your horse coughs, does not shed his coat, is hide-bound or pinched bellied, scours, does not eat or digest his food well, legs stock, or he drives dull and logy, try this medicine. It will show its effects on the kidneys in one day, on his spirits in two days, greatly improve his general condition within two weeks, and many times add twenty-five or even fifty pounds to his weight in a month. It makes good blood.

We warrant it to cleanse the system of all impurities arising from bad blood, disordered stomach or kidneys.

Don't think all the "Powders" you may see in dose packages are like Dr. Daniels' Renovator; imitators are now using his methods—use only Dr. A. C. Daniels' for best results.

We have never given our formulae for these powders to anyone; hence no one can make any just like Daniels'.

**For Fitting Horses.** — When run down in condition — when they drive lazy and dopey. First note the condition of the teeth and mouth; have these right. Feed good oats, clean hay, and add one dose of Renovator Powder morning and night to the feed for ten days. Omit the Powders for four days, then repeat; give a warm bran mash two or three times a week, always adding one Renovator Powder; repeat for a month or two, and you will have a new horse both in action and appearance. Then you can get your price.

**Apoplexy.** — Apply chopped ice to the head in bags, secure by proper fastenings. Give Physic Ball to purge. Bathe and rub the legs in hot Liment Powder. If much excitement exists, give three or four doses of Fever

## DR. A. C. DANIELS' MEDICINES

Drops, or if depression shows prominence, give four doses daily for a week of Colic Drops No. 1. Give in the feed twice a day one Renovator Powder a week or ten days out of each month.

**Loss of Appetite.** — First look out for teeth and mouth. Have them in proper condition. Feed warm bran mashes three or four times a week, and add a Renovator Powder night and morning to mash or feed. Feed Renovator daily morning and night for two weeks. Good stable, clean, sanitary conditions.

**Congestion of Liver.** — Give one of Dr. Daniels' Physic Balls; good digestible food with one Renovator Powder morning and night; bran mash two or three times a week. Little or no relief can be given when caused by fatty degeneration.

**Hidebound, Run-down Condition.** — Give laxative diet: bran mashes, and add Horse Renovator once or twice a day; Sometimes a little linseed oil or a good physic ball will be of service.

**Heaves.** — Have a clean stable and fresh air; feed in small quantities and often; moisten oats or hay — use crushed oats if possible; *do not feed corn or clover hay.* A small quantity of the best hay cut once or twice a day is enough. Give two or three doses of Daniels' Cough, Cold and Fever Drops morning and night, or a dose whenever the horse coughs, half an hour apart, well back on the roots of the tongue. If constipated, give one Physic Ball; give often warm bran mashes, always adding one Renovator Powder. Always water before feeding, and never after, and not much at a time. Moistening the oats and hay prevents the dust from flying. Give Renovator Powders twice daily for one week and omit a week, repeating every other week for two or three months, or until the horse is improved. Carrots, turnips and potatoes chopped and mixed with the oats make a good feed. Don't work the horse immediately after feeding. Mix with a pint of water, 1 ounce Fowler's solution of Arsenic, 1 drachm of extract belladonna,  $\frac{1}{2}$  drachm tincture of ginger, and give a tablespoonful three times a day for two weeks, then twice a day for ten days, then once daily for a week. This is highly beneficial — remember there is no absolute cure.

**Anaemia (Impoverished Blood).** — Give good feed and water, a clean stable and fresh air. Give bran mash frequently. Build up the blood and condition by free use of Renovator Powders; giving twice daily in the feed one of these Powders two weeks out of each month will soon do it.

**Slobbering.** — Don't check high. Wash the mouth, lips and gums frequently with Daniels' Wonder Worker Liniment; give 20 drops of Daniels' Fever Drops three times daily, place a bucket of clean water near, that he may have it to cool his mouth; feed bran mash often with Renovator Powders; look out for growth in the mouth, and have the teeth properly filed. Add one Renovator Powder to the feed twice a day for one week at a time every month. Some horses can only be cured by using a Porter humane bit.

**Urinary Organs.** — *Inflammation of Kidneys.* — Caused by strains, overwork, slipping, musty hay or feed, exposure, too powerful diuretics, etc.

**Symptoms.** — Feverish, disinclined to move about, sensitive to pressure on the spine, stands awkward, with hind legs wide apart, urinates in small quantities, generally of high color and sometimes bloody, pulse is quick and hard at first, becoming later small. As a test, introduce the hand into the rectum, and if the bladder is empty, without tenderness or heat, inflammation of the kidneys is present.

## DR. A. C. DANIELS' MEDICINES

**Treatment.** — Give 30-drop doses of Cough, Cold and Fever Drops every thirty minutes for three hours, or until fever is reduced; give Physic Ball or Linseed Oil and Enemas of warm soapy water; foment the loins with hot water (add 2 tablespoonfuls of Liniment Powder for best results) or apply Oster-Cocus freely to the loins. Soft foods, keeping bowels open by giving a dose of Renovator Powders twice daily; if in summer, a month at pasture will do wonders.

**Inflammation of Bladder** may be acute or chronic, slight or severe; caused by irritating medicines, stone, septic poison, retained urine, etc.

Many condition powders on the market contain saltpeter, resin, nitre and other dangerous ingredients, which often cause inflammation to the urinary organs. Beware of such. Dr. Daniels' are free from poisons.

**Symptoms.** — Pains much like colic, kicks at abdomen, looks at flank, efforts to urinate, with little or no results, with indications of pain, groaning, etc.

**Treatment.** — First overcome and remove the cause, completely evacuate the bladder with catheter (be sure to disinfect the instrument before using), wash out the bladder with solution of Carbo-Negus (one-fourth teaspoon in two quarts of warm water), twice daily, give 30-drop doses of Fever Drops at intervals of half an hour for three or four hours; drench with slippery elm tea; a warm injection of this same sort of tea may be given by rectum. Colic Drops in regular doses every thirty minutes at the beginning of treatment will allay pain; foment the loins with hot applications, after which rub on a little Oster-Cocus Liniment. Feed for condition, add Renovator Powders daily, and after each feed give a dose of No. 1 Colic Cure for a week or two.

**Inflammation of the Yard** should be treated heroically. Cleanse first with a solution of Carbo-Negus, then apply 2 drachms of chlorate of zinc, mixed with a pint of water, wrapping the parts in a cloth wet with this mixture, repeating daily to destroy the granulations which may have formed.

**Swollen Sheath.** — Cleanse sheath by washing with solution of Carbo-Negus (one-fourth teaspoonful to two quarts of water); feed bran mashes once a day for six days, adding one Renovator Powder, and for two weeks give one Renovator Powder night and morning in the feed. Sometimes a Physic Ball is required. The system wants cleaning in case of this sort. Be sure to clean the sheath thoroughly its entire length.

**Sheath, Contraction.** — Either in front or behind the yard preventing the drawing of it back into the sheath.

**Treatment.** — Administer cold water solution of Carbo-Negus freely to the inflamed sheath, after which apply sweet or olive oil liberally to the parts, being careful in manipulating, and you will generally overcome the trouble.

If this occurs in old horses from paralysis, there seems to be no cure. Amputation by surgeon is the resort.

**IN WATCHING** symptoms of ills, note in particular the Eyes, Tongue, Throat, Pulse, Chest, Heart, Breath and Breathing, Discharge from Mouth or Nose, Skin, Hair, Attitude and General Appearance. A close attention to details of this nature will aid in quick repair of the damage or threatened attack.

**IN LOCATING** lameness note every particular of each "four corners" of the animal, position of each foot or leg when standing and in motion, turning and backing.

# DR. A. C. DANIELS

## WONDER WORKER

### LOTION

### Or Healing Liniment

The Wonder for Healing Cuts from Barbed Wire  
or any Cause, Burns, Wounds and Sores

### A CURE FOR PILES IN MAN OR ANIMAL

A. C. Daniele's Wonder Worker Lotion is the greatest healing preparation ever known for all kinds of wounds, cuts from barbed wire or other causes, Shoe Calks, Chafing, Scratches, Thrush, Harness Galls, Bruised Knees, Nail in the Foot, Sprains and Strains and for family, use it has no equal. Its continued use will remove any soreness of flesh or muscles. It will stop the flow of blood almost instantly. It contains no poisonous ingredients of any nature. It is not recommended for deep-seated lameness, where a brisk counter-irritant liniment is required, but for all sprains, bruises, soreness of flesh, cuts, etc., it will do wonderful work.

**For Flesh Wounds.** — Apply the Wonder Worker freely and as quickly as possible after the injury. Saturate a sponge with it and bind over the injury; if a fistulae, quittor, or deep-cut wound, syringe into the opening.

**Scratches.** — Clean off the dirt; wipe dry and keep moistened with Wonder Worker Lotion, saturating three or four times a day. Gall Cure is a good help, especially in wet weather. Rub the Gall Cure in well when exposed to the weather.

**Bruised Knee or Ankle** — From stumbling or interfering are rapidly cooled down and healed by free applications of Wonder Worker Lotion.

**Sprains and Strains.** — Apply and bandage with Wonder Worker and give good hand rubbing.

**Harness and Saddle Galls and Chaps.** — Wet the sore frequently with Wonder Worker; bind on a sponge and keep moist when possible.

**Toughen Shoulder and Back** to avoid saddie and harness sores. Saturate and rub into the skin Wonder Worker two or three times a day for a week. This will harden the skin so it will not easily blister.

**Calked Hoof or Quarters.** — Apply as soon as possible after the accident, Wonder Worker, wetting thoroughly; a timely use of this liniment will prevent serious lameness. Every driver or caretaker of a track horse should have a bottle of this liniment handy for use in emergency cases.

**Nail in the Foot** — (Prick). — Draw the nail out as soon as discovered. Cut out around the puncture the hole in a tunnel shape; cut large enough. Be sure to go to the bottom of the puncture, then hold up the foot, fill the

## DR. A. C. DANIELS' MEDICINES

hole with Wonder Worker. Let it soak in. Do this several times a day for three days. It is a good plan to soak a small piece of sponge in Wonder Worker, press it into and over the opening, keeping it in place by springing a piece of zinc or thin iron over it, and under the edges of the shoe; you need not fear lockjaw if you follow these directions.

**Proud Flesh** cannot co-exist with Daniels' Wonder Worker. Saturate freely and heal.

**Poll Evil.** — As soon as the swelling becomes a little soft, have it opened; make the opening large enough to admit of swabbing out the pus, which must be done twice a day until no more pus forms; wash out daily with a solution of Carbo-Negus (one-half teaspoon to a quart of water); do not use the swab roughly; pour in Wonder Worker and keep there with bandage or cloth; give good strengthening food and Daniels' Renovator Powders twice a day, mashes often; give Daniels' Physic Ball.

**Quitter.** — A deep-seated lesion of the foot, seated in the cartilages or perhaps even the coffin-bone itself. Cause neglected injury, fracture, etc. Treatment must be immediate and energetic to be effective. Soak in solution of hot Liniment Powder, make a free opening from the bottom of the foot for pus to discharge; syringe out with a solution of Carbo-Negus (one part Carbo-Negus to ten parts water); sometimes it is well to poultice the bottom of the foot; keep bowels open by feeding bran mashes with Renovator Powder; if constipated, give one of Daniels' Physic Balls; use bar shoe; fill the opening with Wonder Worker, and press into the bottom of the foot a sponge wet in Wonder Worker, holding it in place with a thin piece of tin or iron pressed between the foot and shoe. If no opening is made from below, syringe cut with solution of Carbo-Negus from above, and pack with Wonder Worker.

**Abscess (Common).**—When the bunch is soft and evidently contains fluid or pus, open at lowest dependent point and wash out with Veterinary Carbo-Negus (spoonful to a quart of water), and apply Wonder Worker Lotion to heal. Poultice when necessary. Feed Renovator Powders morning and night; give bran mashes often.

**Greased Heel.** — Give Daniels' Physic Ball to clear the system. Soak the heel in hot Liniment Powder for thirty minutes, hot; wash off with solution of Carbo-Negus, and saturate with Wonder Worker Lotion. Repeat this last twice daily (don't use any soap). Feed Renovator Powders, bran mashes and soft foods during treatment, with good clean hay. In neglected cases poultice and then follow above treatment.

**Speedy Cut.** — Hot fomentations with my Liniment Powder to reduce inflammation. Open if abscess forms, and cleanse with Carbo-Negus; protect with boot. Freely use Wonder Worker to heal. Raise condition by feed and Renovator Powders.

**Brushing or Interfering.** — A three-quarter shoe, or shoe thin on inside web. Soak the joint with hot Liniment Powder and apply Wonder Worker. Put on boot to protect. Feed Renovator Powders to put into condition. Frequently weakness and debility are the cause of interfering.

**Thrush.**—A common ailment, due largely to neglect and surroundings. No time should be lost as no case however slight ought to be neglected. Wonder Worker will cure it. Write for free advice.

## DR. A. C. DANIELS' MEDICINES

**As a Family Liniment.**—Wonder Worker heals Flesh Wounds and Sores; Scalds, Burns, Bruises, Strains and Cuts; greatest cure for Piles on earth, Ingrowing Nails, Hangnails, Neuralgia, Rheumatism, etc.; destroys Proud Flesh.

**Directions.**—**Cuts:** Applied at once, the Wonder Worker will stop bleeding and close the wound, and prevent all soreness and inflammation. Keeps out germs and poison.

**Sores.**—Wash with solution of Carbo-Negus to kill germs; then apply Wonder Worker Liniment freely and often.

**Bruises and Sprains.**—Rub on freely and often Wonder Worker Lotion.

**Hangnails.**—Pull out the hard tissue, then apply Wonder Worker. In the morning it will be well.

**Ingrowing Nails.**—Soak in warm water (my Liniment Powder, if convenient). Apply the Wonder Worker with soft sponge or cloth; bind it on over night.

**Rheumatism.**—In many cases of this painful disease nothing has ever been discovered for an outward application to compare with the Wonder Worker. Rub it in gently with the hand, and then by any convenient means heat the afflicted part. This should be repeated every hour or two until relieved.

**Neuralgia.**—This very "king of pain" yields to a thorough treatment with the Wonder Worker, as directed for rheumatism. It has afforded relief for the tortured nerves in a few hours, and sometimes minutes, in cases that had baffled the ablest physicians and defied all treatment for weeks, months, and sometimes years. Do not delay its use a moment. On first symptoms of it, begin at once, and save yourself from the clutches of this indescribable devil of torture. Treat as for Rheumatism.

**Burns and Scalds.**—Undoubtedly many thousands of human lives might have been saved by a timely use of this wonderful healer, as, if applied at once, its action is marvelous. It will instantly form a coating over the flesh, keeping out the air, relieving all pain at once, and beginning to heal from the moment of its application. Ladies and children who are around the cook stove very often get a small burn, which will cause great pain. A few drops of this liniment will save hours of pain and torture. Apply freely and bandage.

**Piles in Man or Beast.**—Many thousands of bottles of Wonder Worker have been used for this disgusting and distressing trouble and I have never heard of a single instance where it did not afford immediate relief, and in a great majority of cases an ultimate cure. It has entirely and permanently cured many cases that were of many years' standing, on which, in some instances, hundreds of dollars had been thrown away in vainly searching for relief even. To any troubled to a greater or less degree with this annoying complaint, one bottle of Wonder Worker will relieve and probably permanently cure you. Try it, and tell your suffering friends the result. Obtain a small, soft sponge, fill it with the Liniment, and carefully touch the parts, say, two or three times a day. If all parts cannot be reached in this way, use a small syringe to inject a small quantity, or small brush.

This Liniment will stain clothing, but will always heal and relieve.

# DR. A. C. DANIELS' WORM KILLER.

Drives out and Destroys Worms in Horses or Cattle as nothing else will

Many horses are so overrun with worms, they cannot keep or get flesh, no matter how much or how well you feed them; and horses so troubled are subject to many unexplainable diseases. These worms infecting the horse in such immense numbers actually worry the horse nigh unto death. They cause colic when nothing

else will. Fits, scours, and many other ills result from an excessive quantity of worms. There are two or three kinds of worms in particular from the thirty odd kinds which infest the horse, causing nearly the whole annoyance; the stomach worm and the pin and tapeworm. Dr. A. C. Daniels' Worm Killer is compounded especially to cope with these dangerous and obnoxious worms.

If your horse has rough, staring coat, low spirits, poor appetite, though sometimes eats ravenously, half-digested food, often scours, becomes hide-bound, skin covered with blotches, looks back at sides with uneasy, nervous appearance, gnaws and bites at anything, rubs the tail against any possible convenience, then look out for worms.

**For Round or Tape Worms.** — Allow the horse to rest from work while treating, but a little exercise is of benefit. Cut down the feed to starvation rations; in fact, no hay or grain. Just a small bran mash. In it mix one Worm Killer Powder (two powders if a large horse) and give at night; allow plenty of fresh water; next, feed mash with one or two powders, according to size; next feed two quarts oats with one Renovator Powder; about next feed, regular rations of oats, but no corn or hay until next day. Twelve hours after beginning treatment, give one Physic Ball.

Repeat this treatment in about ten days and your horse won't have worms of this kind.

**The Needle or Pin Worm.** — A small white worm; breeds in the colon and rectum, often appearing in tens of thousands. They are very irritating to the horse when in the rectum, causing great uneasiness and rubbing of the tail. But in these cases it is necessary to give the Worm Killer in form of an injection. It is best just after the horse has evacuated his rectum. Dissolve two doses of the Killer in two quarts of boiling water; after ten minutes add cold water enough to reduce it to blood heat, and inject it into his rectum. Repeat this treatment in eight or ten days, to kill the brood that will hatch out in the meantime. The dose as put up is right amount for a full-grown horse or mule. Colts should have one-half a dose, more or less, according to size and age. The Worm Killer can be fed to Brood Mares with perfect safety.

Symptoms of Worms

# DR. A. C. DANIELS

## ABSORBENT BLISTER AND BUNCH REMOVER

Spavin Remedy and Bunch Remover is not a caustic, and will not disfigure and can be used without injury or blemish. All sorts of enlargements like Spavins, Curbs, Splints, Callouses, Thickened Ankles, Shoe Boils, Sweeny, Goitre, etc., can be removed, cured or greatly improved by a sensible use of this simple salve. This remedy is designed to create first an irritation and then to absorb the thickened cartilages. The severity of the treatment is wholly regulated by the amount applied, and how thoroughly rubbed in. Thus if you desire a slight irritation, use a little; don't rub in long; should you have occasion requiring heavy blistering put on a good lot and rub long and well into the skin; in either case you can get just what you are after.

Remember you can blister with this ointment any number of times, repeating until the desired result is secured, and leave no scars or white hairs.

*Notice.* — Never blister when highly inflamed or when showing signs of erysipelas. Should you unexpectedly raise too severe a blister, wash it in a warm solution of Carbo-Negus (teaspoon to a quart of water) and smear over with vaseline. Always let one blister thoroughly heal and the scabs fall off before using the second time. Be sure to tie the horse so he cannot bring his lips in contact with the blistered part; it will spoil the blister and injure the lips. Never put on but one blister at a time. Always rub a little vaseline below the blistered spot.

Try it on quarter, toe and sand cracks, quittor, side bone, thoroughpin, spavin, sweeny, goitre, etc., and all enlargements or bunches of any kind.

Dr. Daniels' large Veterinary Book gives full instructions and many pages of other valuable information, with illustrations. Any druggist or dealer can give you one, we furnish them free.

### Directions For Applying Absorbent Spavin Remedy

Cut away the hair and wash the swollen or enlarged place intended to treat clean. With the fingers rub in well for fifteen minutes some of the Absorbent, wiping off with a cloth any adhering to hair. Apply vaseline around and below, to prevent unnecessary burning. Let alone for two weeks, unless the skin shows extreme tenderness and cracks, in which case apply liberally Wonder Worker Lotion. You can repeat the application several times if necessary without injury. Always give the animal rest when treating spavin, sprains and similar troubles.

When you first notice any form of lameness any slight favoring of the foot or leg, any swelling or heat, is the time to begin treatment; a little care, a little money, a little rest allowed them will do much to prevent Spavin, Curb and similar troubles, and whenever you want advice or suggestions write to us; costs nothing.

# DR. A. C. DANIELS' OSTER-COCUS LINIMENT

The Bone, Nerve and Muscle Liniment  
Penetrates and gets there

Blots Out Pain. A Liniment and Oil. Lubricates  
the Joints Makes Muscles Flexible. Makes  
Cords Limber.

**"THE GOLDEN LINIMENT"**

Dr. A. C. Daniels' Oster-Cocus Liniment is made to do all that is claimed for it. It has no equal when used for reducing swellings, bunches or enlargements; for relieving pains and aches. It is to be used for Sprains, Strains,

Stiff or Sore Joints, Sore Throat, Sore Cords, Sore Muscles, Aching Bones, Rheumatism, Neuralgia, etc.; for Shoe Boils, Wind Puffs, Splints, Spavins, Curb, Ringbone, Side-bone, Thoroughpin, Sweeny of Shoulder, Navicular Disease of the Foot, Atrophy, Goitre, etc.

As a Stable Liniment it has no equal. Remember, if you want a Colic Cure or Cough Drops or medicines for internal use, Daniels makes them; but Daniels knows, as you know, that external and internal medicines should not be the same to be the most effective. Many things can be used on the outside which are injurious when taken inside — same for horse or man. Don't give the horse medicines you would be afraid might hurt you

Spavin (Bog or Blood), Splints, etc. — Sweat with Liniment Powder, hot, and apply with Oster-Cocus two or three times. Repeat daily the Oster-Cocus for ten days or two weeks. If not relieved use Absorbent Blister; in two weeks repeat. Good feed, with Renovator Powders for tonic.

Capped Hock. — Bathe in solution of Liniment Powder, and bandage during the day with cold water; at night take off bandages and rub on a little Oster-Cocus. Renovator Powders in feed for blood and tonic.

Oster-Cocus Liniment for Sprains and Strains. — Apply twice daily Oster-Cocus Liniment to the affected part, without hard rubbing, repeating until relieved. If the skin is tender, first put on Daniels' Wonder Worker.

Rheumatism, Neuralgia. — Apply Oster-Cocus frequently. Generous diet with bran mash twice a week. Liberal use of Renovator Powders. Sometimes a Physic Ball will do good.

Sore Throat, Colds, etc. — In all cases rub the throat well with Oster-Cocus Liniment: it will give quick relief. Lumps or swelling in throat can be reduced by applying Liniment Powder as a hot bath, and then rubbing with Oster-Cocus Liniment. Renovator Powders in feed for tonic; repeat until relieved.

## DR. A. C. DANIELS' MEDICINES

**Sweeney of Shoulder.** — Steam with hot water freely. Rub on Oster-Cocus Liniment two or three times daily. (Often requires Blister — Oster-Cocus freely used will produce just the right kind of blister required. Grease the leg well below the shoulder to prevent the Liniment working where it is not required.) Exercise and good feed with one Renovator Powder morning and night for a few weeks.

**Sore Cords, Stiff Joints and Wind Puffs.** — Steam with hot water, then wash or swathe in cold, alternating first hot and then cold, after which apply Oster-Cocus Liniment; don't rub hard; it penetrates and does the work. Repeat daily.

**Shoe Boils.** — Capped elbow. If of recent origin, hot applications of Liniment Powder, after which rub on Oster-Cocus twice or more daily. If pus is formed it must be opened, and washed out with a solution of Carbo-Negus. Apply Wonder Worker for healing. If swelling remains, apply the Oster-Cocus Feed Renovator Powders twice daily with bran mashes.

### DANIELS' OSTER-COCUS LINIMENT FOR FAMILY USE

**For Family Use** Oster-Cocus is unequalled for all Strains, Sprains, Lame Back, Pain in Chest or Abdomen, Inflammation, Chilblains, Stiff Joints, Rheumatism, Neuralgia, Ivy Poison, Sore Throat, Stings, Mosquito or Insect Bites, etc.

Dr. Daniels' Liniment is made expressly for a *Liniment*, and is a *Liniment*. It is not made for colic, fever, colds, or any other internal use. It is not a *cure-all*,—just a *Liniment*. It ought to seem reasonable to any one that a *Liniment*, made expressly for a *Liniment*, and nothing else, ought to be better for all external uses and to use as a *Liniment* than the *kinds made to drink or take as a medicines, or even the kind to use as perfumery*. We do not claim OSTER-COCUS to be of value except as a *Liniment* and for external use.

Remember whenever you want a liniment to use Dr. Daniels' Oster-Cocus Liniment is the best and safest. It will do the work while asleep or awake.

**For Strains and Sprains.**—First bathe in hot water when convenient, then apply Oster-Cocus freely, but do not bandage while inflammation lasts. When you are able to walk about, after having a sprained ankle, use the Oster-Cocus morning and night for a few days. It will strengthen the ankle and obviate all tendency to weak joints. If you wish most remarkable results just use my Liniment Powder in the hot water (tablespoonful to quart of water), soak and keep the water hot; the inflammation will be removed, then use the Oster-Cocus, and tell your friends the result.

**Rheumatism and Neuralgia.**—Apply freely Oster-Cocus. Rub briskly and bandage with flannel wet with Oster-Cocus; a dry cloth over that; keep the bandage on as long as possible. Repeat at intervals until relieved.

**Stiff Joints, Lame Back, Pains in Side, Chest and Abdomen.**—Steam or sweat generously with hot water, as hot as can be borne, and bandage with a cloth wet with Oster-Cocus; put a dry one over that, remove the bandage if it becomes too hot to bear.

# DR. A. C. DANIELS'

## LINIMENT POWDER

AND ORIGINAL

## Equine Bath and Track Liniment

**Dr. A. C. Daniels' Liniment Powder and Original Equine Bath and Track Liniment.** — Unequaled for track horses and stable uses; a wash which will aid and not impair. Never stiffens the cords or muscles. A bath for track use which every owner should insist on using. Daniels' Liniment Powder with hot water makes the liniment as strong as needed and as much as required for aches, strains, sprains of loins, back, shoulders and legs, bruises, sore cords, muscles, etc.; it softens and limbers them up.

For use in treating Spavin, Strains, Sprains, Stiff Joints, Wind Puffs, Sore Cords, Splints, Shoe Boils, Sweeny shoulder, Capped Hock and Elbow, Thoroughpin, Side-Bones, Navicular Disease, Ringbone, etc.; it is invaluable;

**For Body Wash.** — After hard work. One tablespoonful of powder to quart of hot water; bathe with sponge, follow with dry cloth; blanket.

**For Leg Wash.** — Two tablespoonfuls of powder to quart of hot water; bathe the legs with sponge; when possible allow the foot to stand in the bucket; to cover the ankles a few minutes will relieve all the strain and soreness; wipe dry, and put on a few drops of Oster-Cocus Liniment (don't rub it in, it will do its own work).

**For Sponging the Mouth and Nostrils.** — One tablespoonful of powder to quart of hot water. Sponge out freely the mouth and nostrils; it cools, revives and invigorates.

**For Steaming for Colds and Head Troubles** — One teaspoonful of powder to quart of hot water (keep hot by placing hot irons or stones in the pail). Cover the head with blanket or hood. Result will surprise you.

**Catarrh (Nasal).** — Steam the head with Liniment Powder; put on hood to prevent cold; blanket warm. Give dose of Fever Drops once an hour for four hours, then once in two hours, for four hours. Soft food; bran mash, morning and night, first day, with Renovator Powders mixed; then dampen the feed and give Renovator Powders twice daily for two weeks. Sometimes discharge from the nose is caused by diseased teeth. Look out for them. A horse with discharge from the nose should be fed from a temporary manger or bucket placed near the floor, as the position of the head while feeding facilitates the discharge and the nostrils kept clean.

**Sprains and Strains,** so common and liable to spoil a horse if neglected or not treated properly, consist in the main from overstretching of the muscles, tendons or ligaments. At this time some remedy is required for relief; Daniels' Liniment Powder will surpass your expectations; it will pre-

## DR. A. C. DANIELS' MEDICINES

vent and reduce swellings, extract pain, soreness and aches; strengthens spine, back, ligaments, muscles, tendons, and removes all stiffness from the joints and bones. INCREASES brawn, muscle and ambition.

**Laminitis, Fever in the Foot, Founder.**—Causes: Cold, concussion, over-heating, neglect after hard drive or overwork. A tendency of the feet, owing to their delicate construction which few understand or consider, to take on inflammation, particularly the fore feet.

**Treatment.**—Have perfect rest; plenty of sawdust or soft covering for floor. Give thirty drops of Cough, Cold and Fever Drops every two hours for twenty-four hours. Remove the shoe, rasp the wall well; level with the sole, but do not pare the sole; give plenty of water. If in passive congestion, place the foot in bath of hot Liniment Powder, two large spoonfuls to quart of water), keeping it hot for half an hour; repeat every hour for five or six hours, keeping the foot in cloths between the baths, after which put foot in poultice for one night. If the foot is in active congestion, use the same bath only have it cold. Roomy stall, good air, but safe from draughts; apply Hoof Grower and Softener around the coronet, at heel and around the frog to grow new hoof. Feed well, and often give bran mash; add one of Daniels' Renovator Powders to feed morning and night for two or three weeks, feed no corn; when convalescing, simple toe plates; exercise by easy walking. Good care will often save your horse.

**Knuckling of the Fetlock Joint,** resulting from disease or from ring-bone, side-bone, and diseases of the foot, being put to hard work too young, more likely in hind than in the fore legs, leads to various degrees of lameness. There is little hope of effecting a cure.

**Treatment.**—First rest from work, turn loose, give particular care to the feet and shoeing with a high heel, thin at the toe; of course the lameness may be somewhat modified by soaking, sweating and the use of Oster-Cocus Liniment. In many cases apply a blister or the surgeon may perform an operation with good results.

**Poll Evil.**—As soon as the swelling becomes a little soft, have it opened; make the opening large enough to admit of swabbing out the pus, which must be done twice a day until no more pus forms; wash out daily with solution of Carbo-Negus (one-half teaspoon to quart of water); do not use the swab roughly; pour in Wonder Worker Liniment and keep there with bandage or cloth; give good strengthening food and Daniels' Renovator Powders twice a day, mashes often.

This disease is a trying and difficult disease to handle and oftentimes delay in proper treatment makes it incurable, hence prompt and proper attention should be given at once.

**Fistula of the Withers.**—If pus has not formed reduce swelling and inflammation by fomentations of hot Liniment Powder. Give one of Daniels' Physic Balls, feeding bran mashes often and good oats and hay. Brace the blood up with Daniels' Renovator Powders twice a day in feed. Do not puncture, but rub on Oster-Cocus a few times. If pus is formed or shows strong indications of forming, bring to a head with poultice and open; allow for draining. Syringe out with solution of Daniels' Veterinary Carbo-Negus; then inject into the seat of the wound Daniels' Wonder Worker Liniment; dress once a day, saturating and keeping the opening wet with Wonder Worker. Sometimes a poultice is of service.

## HOOF GROWER AND SOFTENER.

Warranted to grow an entire new Hoof in  
three to four months

Dr. Daniels' Hoof Grower and Softener is of great value and interest to any one who owns or cares for horses. No part of the horse is less understood or more neglected than the foot, and every one knows, "No hoof, no horse." Still men go on

unmindful of the great benefit they could do their suffering friend for the small sum of fifty cents and a few minutes' time.

This Hoof Grower is a positive cure for all foot ills caused by hard and constant driving on hard or asphalt roads, standing on dry floors in stables, etc. It will remove all brittle, shelly and dry tendencies, quarter cracks and split hoofs. In short, it makes the hoof grow new, toughens and makes elastic the shell, draws out the soreness, and is worthy your consideration.

Don't let the horse get dead lame before you care for him. When you notice a flinching when at work on the road or pavements, or when standing still, rests or puts out his fore foot, use Hoof Grower at once. When the frog is hard, put on Hoof Grower; it will quickly soften them. When the upper edge of the hoof grows hard and turns over like an ingrowing nail, it causes great pain and quickly throws up an inflammation which may result in permanent lameness. Rub the Hoof Grower into the edge of the hoof, where it joins on with the hair, thoroughly and well twice a day, and note results. It softens and takes out soreness.

**Quarter Crack.** — Soak in solution of hot water and Liniment Powder thirty minutes; with a file cut down through the horn at the top, close up to the coronet, to the quick. Clean out all dirt, fill the opening with Hoof Grower and rub it in around the coronet and apply to the frog and bottom of foot. Keep the crack stuffed with oakum or lint saturated with Hoof Grower. Repeat this treatment daily. Use bar shoe, properly adjusted.

**Horny Tumor of Foot.** — Cause, hammering toe-clip too tightly; striking the toe, etc. Try properly adjusted shoe. Cut with a file through the hoof, quite to the quick, and grow down the hoof with free use of Hoof Grower.

Dry and Shelly

traction, will grow corns, bruised sole, and foot troubles.

**False Quarters.** — First remove the pressure from the quarter by putting on bar shoe, so weight will come on the frog. Don't work the horse; rest is necessary. Stimulate the coronet by applying Absorbent Blister. Repeat two or three times, but not violent. Apply after this Hoof Grower around coronet, and to hoof and frogs. Good food and Renovator Powders build up the system.

For treating all foot ills this Hoof Grower is warranted to give satisfaction or money refunded. It will prevent and remove all brittleness, shelliness and contraction, will grow new hoof and thus cure and relieve quarter cracks, false quarter, toe or sand cracks, seedy toe, laminitis and foot troubles. The Walpole Rubber Heel is a help to these feet.

# DR. A. C. DANIELS'

## GALL-CURA

### LARGEST BOX BEST CURE

Contains No Poison. You Can Therefore Work the Horse or Not as Convenience Dictates.

The original, the kind they imitate, and the kind that always cures; the kind that cures whether you work the horse or not. Any harness or saddle gall can be cured with my Gall-Cura. Remember this statement. Money is refunded if it fails,

so you take no risk with Daniels'. Good for all sores. Stops itching on swine. Sheep ointment for sore heads. Cures scratches on horses. Handy to have, inexpensive, will retain its goodness for years. Contains no poison.

### DIRECTIONS FOR USE

**Harness or Saddle Galls.** — For fresh sores carefully cover each sore spot that comes under the harness with this salve every time before putting on the harness. Heals such places quickly. Work the horse or not.

**Notice.** — If you have a malignant case or have tried imitations or other so-called cures without success, follow this treatment and cure it every time. Wash with a solution of Daniels' Carbo-Negus to destroy germs or poison. Wet the sore with Daniels' Wonder Worker Lotion when unharnessed and cover the sore well with Daniels' Gall-Cura while harnessed, and working. Repeat for a few days and you can cure any gall ever made.

Sometimes sores do not yield to external treatment, or quickly break out again; this is because of poor blood and run-down condition. Whenever you have trouble in healing any sore, give a few doses of Renovator Powder for the blood. Good blood and condition are great helps.

### Never Give Up; Daniels' Will Cure If Others Fail

**Sores not covered by the harness,** apply once or twice each day, rubbing the salve in well with the fingers.

**Scratches.** — Use no soap; clean out mud and dirt with a soft brush, and rub in this salve well with the hands twice a day.

**Chaps, Speedy Cuts and Abrasion (Skin off).** — Rub on Gall-Cura; it heals quickly and gives universal satisfaction.

**Baldness.** — May be caused by parasites or disturbed nutrition. It usually occurs suddenly, without apparent irritation or itching.

**Treatment.** — Wash with strong solution of Carbo-Negus and apply Daniels' Mange Remedy or Gall-Cura, rubbing it thoroughly into the skin, repeating it daily. When injury like burns and blisters are not the cause new hair will grow.

Write for advice when desired — it's free.

# DR. A. C. DANIELS'

## PERFECTION HOOF DRESSING AND FOOD

Prevents and remedies corns, quarter-cracks, cracked hoofs, brittle, tender, dry or contracted feet, and is a perfect hoof food. It is non-mineral, purely vegetable; contains no wood alcohol, turpentine, coal tar, ammonia, lampblack, sugar of lead, acids or other injurious ingredients. For growing, dressing, polishing and preserving the Hoof and Foot it has no equal.

**Directions:** Apply the Dressing to all parts of the hoof and frog with a rag, sponge or brush once a day. Dr. Daniels' Perfection Hoof Dressing and Food should be used daily to keep the feet and hoofs healthy and in good condition. (Apply at night when possible.) When bad feet have developed more care is required as to shoeing, packing, etc. Use oakum saturated with Perfection Hoof Dressing, and cover with a piece of leather. A few uses of the Dressing will draw out the fever. Have the shoe set to take the bearing off from the diseased parts.

**Preserving and Dressing the Hoof.** After cleaning the foot and hoof apply the Hoof Food, as directed above. To polish, rub with dry cloth.

**Corns.** — Remove the cause, i. e., change the shoe. Soak in hot water for half hour. Keep it hot. Apply freely to frog and foot the Dressing. Repeat for three or four days. Use bar shoe; have it put on to relieve the bearing. If suppuration exists, treat as above, but make an opening for pus to escape, and poultice. Then cleanse with Carbo-Negus.

Contracted Hoof

**Contracted Feet.**— Anything which produces lameness for a great length of time causes a wasting of the tissues and contraction. Soak the foot in hot water, after which freely apply Perfection Hoof Dressing and Food to all parts. Shoe with bar shoe properly; pare out place for the bar. Lower the quarters a little at heel. Use the Dressing freely.

**Never poultice unless you use Dr. A. C. Daniels' Hoof Dressing as soon as the hoof is dry.**

**Quarter-Cracks.**— Soak the foot for half an hour in hot water. Pare out the bottom; open up the quarters and shoe with bar shoe, same as for contraction; with a file, just cut across the top of the crack (close up to the coronet), deep enough to start blood; pack with oakum saturated with dressing. As the new hoof grows down, pare away the hoof until the new hoof is fully grown. Use Hoof Dressing and Food freely.

**Brittle Feet.** — Use bar shoe with rubber pad. Apply freely Perfection Hoof Dressing. It is a great help to soak often in hot water, but always use the dressing after soaking, and packing as for corns is advisable.

**Tender Feet.** — Soak in hot water, and use freely Perfection Dressing all over the hoof and around the frogs daily.

**Cracked Hoof.** — Treat same as for quarter-crack.

Use this hoof dressing once or twice a week on the horse's foot and prevent hoof troubles.

# DR. A. C. DANIELS' VETERINARY PHYSIC BALL

ALWAYS READY

**Dr. A. C. Daniels' Veterinary Physic Ball.** — The only safe and reliable Physic Ball on the market. Physic at times is as necessary for your horse as food or stable. This is a well-known fact, but it is a treatment sadly neglected, not because you were ignorant of the benefits to be derived, but the trouble required and the uncertain results to follow, hardly seem to warrant the effort. It has always been a difficult medicine to administer. Either a copious drench, distributed almost anywhere except to the desired spot, or a hard, dangerous mass in the form of a so-called "Ball," liable to choke the horse, and not liable to give satisfactory results even if successfully given; these have deterred you from giving physic often when you knew it would be of benefit to the horse.

Dr. Daniels' Physic Ball does away with all this uncertainty, danger and trouble. It is easy for any one to give this truly desirable remedy to the horse, without danger to the animal or discomfiture to the person. It is the kind to use because it keeps good in any climate, any length of time; is sure, safe, reliable, easy to administer, always works, and always pleases you in results. DR. DANIELS' PHYSIC BALL is always to be given when symptoms indicate Colic, Staggers, Congestion of the Brain, Worms, Indigestion, Hidebound, Dropsy, Founder, Lymphangitis, Spinal Meningitis, etc.

## Rules To Observe When Treating With Physic

Never give physic second time within ten days. Never give cold water during or immediately after administering a Physic Ball; take off the chill. Do not work the horse or expose to draughts, wet weather or cold, during the operation of a physic or even the day after. In some cases, like Meningitis, etc., where quick action is required, a Physic Ball has to be given at first symptoms discovered; but generally it is best to prepare a horse for a physic. You then secure the best results in the quickest and safest manner. For twenty-four hours before giving physic, feed warm bran mashes, always adding one of Daniels' Renovator Powders to each mash. After giving Physic Ball the feed should be light, such as mashes with Renovator Powders until operation, is best. After operation, feed long hay for first day, no grain. Then resume with regular feed, but add one of Daniels' Horse Renovator Powders morning and night for a week. This treatment, carefully administered, will cleanse the system and insure a speedy return to strength and spirits. Should the purging be too profuse, give a little flour with arrow-root. An injection of warm water and soap is useful in dissolving any obstructions, and a gentle exercise of twenty minutes, twelve to twenty-four hours after giving physic, often assists moving of the bowels.

**WRITE FOR ADVICE WHEN YOU WANT ASSISTANCE. WE WILL MAKE NO CHARGE**

# DR. A. C. DANIELS'

# HEALING POWDER

...FOR...

## Horses, Cattle, Dogs and Cats

For Canker in the Ear or Canker in the Mouth. Scratches, Grease Heel, Mud Fever, Thrush, Poll Evil, Fistula, Quittor, Sore Back, Sore Tongue, Lampas, Galls, Fresh Cuts, Sore Teats on Cows, Hoof Rot, Foul in Cattle's Feet, etc.

### Directions

**For Canker in the Ear.** — Syringe and clean out the ear with warm solution of Carbo-Negus, dust the Powder into the ear thoroughly, repeating a few times. Get to the bottom of the sore.

**For Canker in the Mouth.** — Put into and onto the sores pinches of the Powder frequently.

**Scratches, Grease or Mud Fever.** — Clip the hair close, cleanse the parts with an old towel, bathe with a strong solution of Healing Powder, then rub in the dry Powder, all that will stick, and apply Vaseline or Lard to the surface to prevent a hard crust. Repeating this treatment from day to day will soon overcome the trouble. Give Renovator Powders once or twice daily in the feed, for the blood.

**For Sore Throat.** — Two tablespoonfuls of the Healing Powder in half a pint of water, syringe the throat three or four times a day and, after this operation, put a teaspoonful of the Powder on the horse's tongue. It will cure the worst case in one or two days; if there is a gathering under the jolls, open it and syringe with a strong solution of the Powder.

**Thrush.** — Clear away all the ragged portions of horn, cleanse the foot with warm solution of the Canker Remedy, and apply the Powder daily, pressing it well into the cleft of the frog and corresponding part of the heel; get the Powder to the bottom of the sore.

**Sore Tongue or Mouth.** — Put two teaspoonfuls of the Healing Powder into half a pint of salt water and swab the mouth two or three times a day.

**Lampas.** — Rub the swollen ridges or bars with the dry Healing Powder two or three times a day.

**Galls, Sore Back, Mange and all Diseases of the Skin.** — Thoroughly cleanse the affected parts, then bathe freely with a solution and press or pat in the Powder. After a coating of the Powder becomes dry, soften with Lard or Vaseline; repeat treatment until relieved.

**Hoof Rot, Foul in Cattle's Feet.** — Use same as for Thrush on Horses.

For any deep Sore or Ulcer, Poll Evil, Fistula, Quittor, make a strong solution of the Healing Powder with warm water and inject to the bottom of the sore, repeating several times.

**For Cuts and Sores,** dust on the Powder at once, repeating frequently. If poisoned it will take a little longer to heal, but keep at it.

# DR. A. C. DANIELS'

VETERINARY

TRIPLE EXTRACT

## WITCH HAZEL

HAMAMELIS

**For Veterinary Use**

Dr. Daniels' Veterinary Cloudy Witch Hazel is the well known Hamamelis in concentrated form and triple strength. It is prepared to obtain the best results, and not to sell at the cheapest price. It can be recommended for all kinds of Inflammation, Wounds, Abrasions, Cuts, Swellings, Sprains, Soreness of Muscles or Tendons, and for a Track Wash is unexcelled. Nearly all horsemen use Witch Hazel in some form in solution with other preparation. Daniels' Witch Hazel will be found more effective because of its strength and medicinal qualities than the ordinary mixtures sold in

harness and drug stores for Witch Hazel.

Dr. Daniels' Veterinary Witch Hazel has the endorsement of Veterinaries, Surgeons, Track Men and Stock Breeders and thousands of users all over the world and certainly excels in quality.

**Directions for Inflammation, Bruises, Swelling, Sprains, Soreness, etc.:** Rub briskly and freely with Dr. Daniels' Cloudy Witch Hazel the swollen limbs; after rubbing, bandage and saturate well the cloth with the Extract.

**For Wounds, Cuts, etc.,** bind a cloth saturated with the Extract of Witch Hazel about the affected parts, and keep wet.

**Between Heats for Track Work,** turfmen will find Cloudy Extract of Witch Hazel of great value; used alone or in conjunction with any other article used for that purpose.

**Owner of High-Class and Track Horses,** which they value above the ordinary, should use for a wash after work Daniels' Celebrated Liniment Powder, two tablespoonfuls to a quart of hot water, into which pour  $\frac{1}{4}$  pint of Cloudy Witch Hazel; keep the water hot and soak the feet a few minutes, from 5 to 10, then immediately plunge the foot into cold water for a second or two; repeat this two or three times when showing signs of tenderness, after which, rub the cords and muscles with Witch Hazel; it will remove the soreness, stiffness and lameness of the muscles, keeping them flexible, retaining the proper circulation and preventing the horse from becoming sore; as a consequence he will work the entire heats for which he is entered, free from lameness, and be ready for work the next day.

**For Body Wash.**—One-quarter pint Witch Hazel to a quart of warm water, add 1 teaspoonful of Liniment Powder; keep the water hot; bathe with a sponge; follow with a dry cloth and blanket.

**For Sponging the Mouth and Nostrils.**—One-quarter pint of Witch Hazel to a quart of warm water, sponging the mouth and nose thoroughly.

*Any horse owner or driver who uses the Witch Hazel with Daniels' Liniment Powder and is not entirely satisfied with the results of the working of them, can have his money back for the asking.*

*You take no risk with Daniels'; every package is warranted.*

# DR. A. C. DANIELS'

CLOUDY EXTRACT

## WITCH HAZEL

HAMAMELIS

FOR FAMILY USE

Cloudy Extract of Witch Hazel. The Household Remedy for External and Internal Use. Approved by Physicians and Surgeons. Used by Thousands all over the World. Not a New, but a Good Remedy for All Kinds of Inflammation, Hemorrhages, Sores, Burns, Cuts, etc., and a Thousand Other Ills and Accidents.

Dr. Daniels' Cloudy Extract of Witch Hazel or Hamamelis is a white, cloudy, but colorless, aromatic liquid. Medicinally it is a healing astringent and styptic, and is recognized by the profession as a valuable therapeutic agent. Daniels' Cloudy Extract of Witch Hazel is manufactured with the greatest care, by a secret process, which retains all the virgin strength and medicinal qualities of the Hazel, and enables us to offer to the public an Extract of Witch Hazel absolutely incomparable and positively two to three times as strong and effective in its medicinal qualities as many similar products before the public; one trial bottle will prove its value and worth.

Dr. Daniels' Cloudy Extract of Witch Hazel can be used by men, women or children freely and as safely as though it was water. It is absolutely free from any poisonous drug or chemical and is a safe and effective remedy for internal or external use.

Dr. Daniels' Cloudy Extract of Witch Hazel is useful in treating Abscess, Boils, Pustules, Pimples, Bruises, Burns, Scalds, Sore Gums, Mouth, Throat and Feet, Cracked hands and Skin, Chilblains, Sunburn and March wind, Stings and Bites of Insects, Catarrh of the head or bladder and Vagina, Inflammation of the Mucous Membrane linings of the human system, injections for discharges of men or women, Ear Ache, Headache, Toothache, Dandruff, and falling hair, and many other uses the intelligence is seen to direct.

Inflammation of the Tonsils, Sore Throat, Bleeding Nose, Ear Ache, Head Ache, Piles, Prickly Heat, Scratches, and as a Rub Down for Athletes it is excellent. Never be without Daniels' Witch Hazel in the house, it has so many uses for the family. It may well be called a family medicine.

*Dr. A.C. Daniels.*

# DR. A. C. DANIELS'

## ANIMAL EYE WASH

### DISEASES OF THE EYE

An Injured Eye

Can hardly be over-estimated as related to the comfort and value of the horse. A blind horse is dangerous, impaired vision is quite as bad, while from a point of beauty a sound eye adds much to the animal's value.

We can scarcely overestimate the value of sound eyes in the horse. Spasm of the eyelid may be from the introduction of foreign substances, insects, sand wounds, blows; or disease of the brain may be congenital.

How to apply bandage

**Eyelashes** sometimes turn so as to irritate the eye. If one or two hairs offend, cut them off with scissors close to the lid or pull out by roots, drop into the eye a few drops of the Eye Wash two or three times a day. If the lashes offending are numerous a surgeon should operate on the lid.

**Warts and Tumors** on the eyelids; if small, snip off with scissors or tie a stout thread around them close up to the skin and they will soon drop off. Sometimes it is well to touch them with sulphate of copper daily after cutting them off.

Some forms of tumors require the knife for removal and this should be done by a competent surgeon.

**Inflammation of Eyelid.** — Caused by exposure to draughts, cold, rain, snowstorms, bites of insects, preek, blows of whip or stick, accidental bruises against the stall, by infection, or by sand, chaff, etc.

**Treatment.** — Soothing lotion, Daniels' Eye Wash applied with soft cloth kept wet and hung over the eye by tying it to the headstall of the bridle. With a feather drop 3 or 4 drops of the Eye Wash into the eye two or three times daily; feed from a high manger. Keep from work; avoid a tight collar. Give bran mashes and soft foods, not corn or meal; add one Renovator Powder twice daily to the feed. Cold weather, blanket warm. Keep the legs warm with bandages, but not put on tight.

**Congenital disorders** of the lids, such as division of the eyelids in two, similar to harelip, abnormally small openings between the lids, closing of the lids by adhesion. A surgeon is desirable when possible to obtain in such cases.

**Drooping Eyelids** is sometimes only a symptom of paralysis of one-half of the face. If so, the nostrils, lips and ears, perhaps one-half of the tongue may be affected; the food will be taken entirely by the teeth, as the lips have lost their use. This form of paralysis is often the result of injury, a poke to the nerve which passes over the back of the lower jaw. In some cases the paralysis is confined to the lid, caused by an injury to the muscles which raise it. Sometimes this condition is caused by spasms to the muscles which close the lid, or to inflammation of the upper lid.

## DR. A. C. DANIELS' MEDICINES

**Watering Eyes** are a symptom of external inflammation of the eye. It may, however be caused by disease of the lachrymal apparatus interfering with the progress of the tears to the nose. In all cases examine the orifice of the lachrymal duct on the floor of the nasal chamber close to the anterior outlet; this will sometimes be found blocked by a portion of matter, which, when removed, allows the tears to escape. Sponge out the nose with warm water and make application of warm water to the face. Feed warm bran mashes in a *nose bag*, adding one of my Renovator Powders; the vapor will produce relaxing effect to the muscles and act well upon the system. Keep the eye moistened with my Eye Wash, one teaspoonful in cup of water, and a few drops several times daily in the eye.

**Thickening of the Lid** may be treated by painting the same with tincture of iodine, repeating several times.

**Inflammation of the Eyelids** is often caused by exposure to draughts of cold air, rain or snowstorms, bites of insects, flies or snakes, pricks of thorns, *blows from whip or club*, accidental bruises by bits of dust, chaff, sand, grass seeds, etc., or by the fumes of chemicals, *ammonia from manure* (keep the stable clean), smoke, etc., or by infection. *Inflammation* from whatever cause should have prompt attention; remove the cause; wet a soft cloth with a solution of Daniels' Eye Wash (one tablespoonful to a cup of water, distilled or boiled; rain water when possible), and place over the eye, binding it on when in the stable, and tying it to the headstall of the bridle from the two sides, and drop four drops of the Eye Wash into the eye, with a feather or dropper, three times daily. Give laxative foods (bran mashes, carrots, beets, potatoes, etc., cut up small), steam the hay, add one of my Renovator Powders to the feed once or twice a day, they tend to regulate the bowels.

**Stye** forms a round swelling near the edges of the lid; poultice with Chamomile Flowers, adding a few drops of Carbo-Negus when applying, put in a thin muslin bag and bind on the eye.

**Treatment.** — If due to the pike, remove the inflammation by a sponge wet in Daniels' Witch Hazel, kept in place beneath the ear and held in place with a bandage.

When all inflammation has been removed apply a blister to the same place beneath the ear, or application of Oster-Cocus Liniment rubbed in.

**Ophthalmia.** — Watery Eyes, Swollen Lids, etc.

**Treatment.** — Remove the cause, purify the stable, avoid excessive light from sunny window in front of the stall; instill into the eye 4 or more drops of Daniels' Eye Wash several times daily; keep wet with a sponge wet with the Eye Wash; put a small blister (Daniels') about 3 inches below the eye on the side of the face; wash off next morning and apply Wonder Worker until healed.

**The haw** is of great assistance in removing foreign objects from the eye of the horse. Just because you think the haw is swollen and projected over a part or even the whole eye ball it is no sign of disease; it may be evidence of pain and trouble to some part of the eye, but do not cut it off.

Further treatment in Doctor Daniels' big Book, which any druggist can get for you or mailed. Send 2 cents for postage.

## DR. A. C. DANIELS' MEDICINES

### INJURIES AND DISEASES OF THE HEAD AND MOUTH

or which Specific Medicines are recommended. First, remember the loss of any portion of lip, cheeks or tongue makes the horse worthless; therefore, try all before using the knife.

**When Cuts** take place, the parts should be washed clean with solution Daniels' Carbo-Negus. The parts drawn together and secured by bands, and efforts made to secure perfect rest, and apply Wonder Worker Lotion to heal. Feed Renovator Powders twice daily for tonic and strength.

**Lacerated Wounds** are not so easily closed, but do so when possible. Dress and clean with solution of Carbo-Negus, and apply Wonder Worker Lotion freely to heal. Feed Renovator Powders twice daily for blood.

**Lampas.** — A swelling or projection of the palate behind the front teeth, often extending below the teeth and the horse is unable to eat, the food dropping out when the animal attempts to chew it.

**Treatment.** — Add a tablespoonful of saltpeter to each pailful of water given the horse to drink. If the swellings are particularly troublesome open with the point of a knife, or touch with a stick of nitrate of silver. Feed corn on the cob.

**Big Head.** — Is incurable.

**Staggers.** — In horses, caused by defective teeth, worms, debility, irregular or improper feeding, ravenous feeding, etc. In colts, from teething, removal from dam too early, cold milk, suckling when dam is overheated, etc.

**Symptoms.** — When not engorged, loss of appetite or a capricious one tendency to eat filth, sore mouth, much thirst, hidebound, dry or scurfy skin, bowels irregular, windy, frequently a dry, short cough and sometimes diarrhoea, feces dark color with fetid odor; urine is dark in color, and leaves a red sediment, look for worms; this condition leads to giddiness and fits.

**Treatment.** — Give a Physic Ball, follow with a pint of linseed oil; look to the mouth and teeth, see they are in proper condition; give attention to the feed, make a change, give roots, good oats, no corn or meal, clean, bright hay, sprinkled with a little salt water; have a salt brick convenient for use, feed regularly moderate quantity; bran mashes are of great help; add to the feed for a week one Renovator Powder twice a day, then one daily; fresh air, pure drinking water, sanitary surroundings. If colicky pains, give one to three doses of my Colic Cure after feeding.

**Staggers.** — If from engorgement, which is shown by a pawing of the forefeet, the *near one* in particular, belching, quick pulse, hard breathing, saliva dribbling from the mouth, give the same treatment as before mentioned, but give two to four doses of Colic Cure first, and for **purge**, give one pint or more of linseed oil, and give a warm injection of soapy water.

**Abscess or Tumors on the Side of the Face.** — If caused by foreign objects, like thorns, nails, etc., such articles should be removed. Bring to a head with poultice; open. Wash or cleanse with Carbo-Negus, and apply Wonder Worker Lotion to heal. Feed Renovator Powders morning and night for condition and blood.

**Paralysis of the Lip.** — In recent cases. Incessant applications of Liniment Powder, hot; alternate with Daniels' Oster-Cocus Liniment externally. Good food; box stall; perfect rest. Renovator Powder twice daily. Sometimes Absorbent Blister will give good results.

# DR. A. C. DANIELS'

## CARBO-NEGUS

For Veterinary Use

Is a Germicide, a Styptic, a Detergent, a Disinfectant, a Purifier, Deodorizer, an Antiseptic and Insecticide

The germ danger is so widely recognized by authorities in the present age, it seems hardly necessary to remind the reader of the great importance of destroying all foul matter on discovery, the urgent need of disinfecting the premises, and above all, the im-

portance of cleansing and disinfecting sores and wounds of any kind, and keeping them clean either on man or animal.

**Carbo-Negus** is the greatest cleanser for sores, etc., on earth. It should be used always for cleansing and disinfecting any Abscess, Sore, Harness Gall, Quittor, Fistula, or wound of any kind, *before trying to heal or cure with any remedy of whatever nature.* No remedy, however good, can do its work while such sore or wound is poisoned by dirt, grease and proud flesh. Remove these and you can heal almost by nature. Nothing ever invented or discovered can approach Veterinary Carbo-Negus for this work and no *stable should be without it.* It prevents the spread of Tuberculosis, Pleuro-Pneumonia, etc.; destroys Sheep Ticks; excels as a remedy for Mange. Not only prevents, but of great aid in treatment of Hog Cholera and Foot rot in cattle or sheep. Cholera, Roup, Gapes in poultry. For Lice, Itch, Mange, Abortion in cattle. For Fleas, Lice, Mange, Canker in dogs. For Scab, Ticks, Lice, Maggots, Foot Rot, Worms in sheep. Maggots or lice are destroyed at once. Humors and Skin Diseases are easily overcome by its use. Acari or germ in horses' manes and tails (causing them to rub) are destroyed at once. Destroys the eggs (larvæ) of flies.

Wash your horses and cattle with a weak solution of my Carbo-Negus, and they will not take the larvæ into the system and have bots. The horses and cattle washed in a solution of Carbo-Negus will not suffer from annoyance of flies. Before milking wash your cow with a solution of Carbo-Negus; flies will wait until after milking. Soap and soap powders as a cleansing wash are not a disinfectant or proud flesh and germ destroyer. Carbo-Negus is a cleanser and purifier, a germ and proud flesh destroyer, and a healer. Less expensive, safer and better than carbolic acid, iodoform, peroxide of hydrogen, or other advertised disinfectants.

Cleanse and disinfect Sores, Wounds and Cuts of any kind with solution of Carbo-Negus; use Carbo-Negus for Leucorrhoea, Thrush, Gall Sores, Scratches, Nail in the Foot, Grease Heal, Aborting and Contagious diseases. Write for booklet on Carbo-Negus, it's free.

Carbo-Negus has so many valuable uses it would take a big book to tell of them: try it, keep it in the barn, and you will think much of Carbo-Negus

# DR. A. C. DANIELS'

## CARBO-NEGUS

As a Medicine for family use

### DIRECTIONS:

**Mix with Fresh Water. Keep from Freezing**

**Catarrh.** — Draw up into the nostrils gently three times a day a few drops of a solution composed of five drops of Carbo-Negus in a pint of warm water.

**Whooping Cough.** — Keep Carbo-Negus about the room in open vessels, renewing daily. Internally: two drops of Carbo-Negus in a glass of water. Dose, one teaspoonful every hour. No better remedy for whooping-cough and sore throat.

**Ringworm.** — The Ringworm is a vegetable parasite, which may quickly be destroyed by a few applications of Carbo-Negus. Paint the worm with

Carbo-Negus night and morning by means of the finger tips dipped into the fluid full strength.

**Pimples and Face Eruptions.** — Bathe the face three times a day in a mixture composed of a teaspoonful of Carbo-Negus to each quart of water used. Don't pick the pimples with finger nails.

**Warts and Corns.** — Can be quickly softened and will disappear entirely after a few applications of Carbo-Negus, applying the strong fluid to the corn or wart by means of a splint of wood or brush as often as convenient, but not less than twice daily. Use Carbo in the foot bath.

**Chilblains.** — If the skin is not broken anoint the feet or hands with Carbo-Negus night and morning; allow it to remain ten minutes, then wash off with clean, warm water.

**Chapped Hands.** — Wash in a solution of Carbo-Negus (one teaspoonful to each quart of water). Nothing heals and softens the hands more quickly.

**Burns and Scalds.** — Foment when necessary with a mixture of ten drops of Carbo-Negus to each pint of water used.

**In Treating Skin Diseases,** pimples, face eruptions, scrofula, sores, chapped hands, burns or scalds, ivy poison, chilblains, frost-bites, nettle-rash, or any disease on the surface of the body, you will obtain instant relief and effect a speedy cure by its use. Use a teaspoonful of the remedy to a quart or more of water, and bathe the parts affected several times a day. Wash in clear water one hour after using.

**For Diseases of the Mucous Membrane,** like catarrh and sore throat, gleet and similar inflammation, use ten drops of Carbo-Negus to a pint of water three times a day. It will do wonders.

**Flies.**—Every family is afflicted more or less by flies, moths, bedbugs, buffalo bugs, ants, and other insects. To destroy these pests, use one gill of Carbo-Negus to each gallon of water, and wet thoroughly the floors, baseboards, bedsteads, carpets, and sprinkle the clothes and furniture. For flies, sprinkle the floors of the kitchen, wash-room, or other places infested by them, and they will disappear as if by magic.

**Women.** — For women Carbo-Negus used as a vaginal douche in a solution of half a teaspoonful to two quarts of warm water will positively prevent and cure all discharges, inflammation and pain; if too strong use less Carbo-Negus.

## DR. A. C. DANIELS' MEDICINES

**Men.** — Carbo-Negus used as a douche, in a solution of half a teaspoonful to two quarts of warm water, will prevent and cure all discharges, inflammation and pain from gleet and inflammatory conditions.

**Ivy Poisoning.** — Apply a solution of one part of Carbo-Negus to ten of water once an hour, and wash off in five minutes. A few applications will cure in every instance.

**Itching.** — Use as a wash Carbo-Negus, one teaspoonful to each pint of water, repeating frequently; use it in the bath.

**Dandruff.** — As a scalp wash, nothing equals a teaspoonful of Carbo-Negus mixed with a quart of warm water.

**Lice.** — Wash with a solution of Carbo-Negus, one gill to every quart of water, repeating daily for a few days.

**Insect Bites and Mosquitos.** — Paint the parts stung, etc., with Carbo-Negus every hour and allow to dry on until the pain ceases.

**Fetid Feet.** — Wash and soak the feet in a solution of Carbo-Negus, one tablespoonful to each quart of water. Use it always in the bath.

**For the Sick-Room.** — To prevent the spread of infectious diseases, such as cholera, scarlet fever, measles, grippe, diphtheria, smallpox, etc., with a solution wash floors and walls and sprinkle freely everywhere. Hang cloths dipped in this solution about the room. Spittoons and chamber vessels should always contain this mixture. Wet all cloths and dishes before removing from the room. Use two tablespoonfuls to a pail of water.

No family can get along without Carbo-Negus. Once used you will always use it and for many things it is unequalled.

**For the Foot-Bath.** — How many people, especially women, suffer from tired feet; walking heats them, standing causes them to swell; both are tiresome and exhaustive. Use Carbo-Negus in the foot bath.

### For Hen-Houses and Hens

**Lice.** — Sprinkle, with solution of one teaspoonful to a quart of water, the floors, roosts and nests. Sprinkle the birds when possible. When whitewashing, put a teaspoonful of Carbo-Negus to a gallon of whitewash.

**For Cholera.** — Isolate the birds. In drinking water put five drops of Carbo-Negus to a quart. Sprinkle the coop well, and have the air heavily impregnated with Carbo-Negus. Do this by having pans filled with solution on the floors, and wet blankets or cloths with the same, and hang them about the premises.

### For Swine

**Hog Cholera.** — Sprinkle several times daily the pens, troughs, etc., with solution of Carbo-Negus, say a gill to a gallon of water. This will prevent the contagion from spreading.

**Itching on Swine.** — Wash thoroughly with solution, tablespoonful to a quart of water, two or three times a day.

**Lice.** — Wash thoroughly with solution, two teaspoonfuls to a quart of water, twice daily. Sprinkle the pens often with the same solution.

**Mange on Swine.** — Thoroughly wash the hide (use a stiff brush) with solution one gill of Carbo-Negus to gallon of water, four to six times daily. Wash all pens and troughs with same solution. This is a contagious disease.

**Sore Throat and Bronchitis.** — A teaspoonful of Carbo-Negus to a quart of water and gargle the throat two or three times a day.

**Wounds and Sores.** — Wash with solution of one teaspoonful of Carbo-Negus to a half pint of water several times daily.

## HINTS WORTH REMEMBERING

Always keep in your stable Daniels' remedies. They are handy, inexpensive and useful. Even if you depend usually upon a veterinary, he can't always be handy, and the life of a horse often depends upon immediate help. You will find them of daily use.

Do not use ground and patent feeds. They are expensive and many are dangerous, often composed of sweepings, talc, marble, plaster and other weight-giving properties. Use oats, corn, good hay, Daniels' Horse Renovator. This makes the best stock food to be had.

**To Make a Syringe.**—A common tin funnel or tunnel; to the small end attach about three or four feet of small size garden or rubber hose, trim or smooth off the other end and you have a good horse syringe. To use it smear the end of the tubing with vaseline, lard or oil, insert it into the rectum with care, elevate the tunnel end and have an assistant pour the proposed injection into the tunnel from this elevated position; hold the tube in place for a few moments when it should be removed and the enema is discharged. Bear in mind this fact: If you keep your horse in condition worms will never be a source of trouble to him, and nothing you can use will give better results than Dr. Daniels' Horse Renovator added to the feed for a week at a time, when doing extra hard work or when recovering from any sort of sickness.

**Laxative Food.**—It is good for allaying inflammatory symptoms when it is desired to keep the bowels in a lax state and in promoting the excretion of waste material from the system, as well as to keep up strength. Grass, green wheat, oats and barley; carrots, parsnips, turnips, gruel, bran mash, linseed and bran mash, boiled barley, linseed tea and hay tea. Adding Daniels' Renovator Powders to the feed daily helps to keep the animal in a laxative condition.

**Linseed Tea.**—Bruised linseed, 4 to 6 ounces, 1 gallon boiling water, simmer for two hours, strain, add a little molasses.

**Linseed Mash.**—Linseed, 2 quarts, a teacupful of sugar, 6 quarts boiling water, simmer slow from 4 to 5 hours.

**How to Make a Poultice.**—Poultices are of the greatest value in some cases, in fact indispensable. A first-class poultice is made by pouring boiling water into bran. All the better if one-fourth as much linseed meal has been put into the bran. Pour the water on slowly, stirring the bran, and let it stand and cook a few minutes, and put it on as hot as can be borne. Always make enough. Use for ordinary poultice six or eight quarts of bran and two quarts of linseed. Get it just thick enough to spread nicely without any lumps. If used before it is well cooked it is liable to grow dry and become useless. Boiled turnips can be substituted for linseed if more convenient. Always use a sufficient quantity of poultice, and have it soft and moist. Flaxseed meal and powdered slippery elm in equal portions make an excellent poultice, and a few drops of Daniels' Carbo-Negus is a disinfectant and purifier which should be added.

**Barley Water.**—Barley, 1 pound, 2 gallons water, boil down to 6 quarts, strain, add teacup of molasses.

**Bran Mash.**—Half peck bran, enough boiling water to scald it thoroughly, stir well and give warm. Always give mashes from a clean pail.

 **DR. A. C. DANIELS' MEDICINES** 

## Dr. A. C. Daniels' Cow Invigorator.

Unlike horses, cattle are fed for fat, or milk; horses are fed for speed and strength. Cattle the reverse, it may be said—they are plethoric, slow, under stimulating or fat producing feeds, and they become peculiarly subject to all those ills brought on by rich and bloodmaking foods. Cattle lack the courage of other animals. They do not bear pain as well, and as a consequence their ills bear upon them severely and they yield and give up to despair easily. Frequently a sick cow will refuse to rise on her feet, when she is well able to do so. For this reason they demand a greater amount of Tonic to be given more freely during suffering and much longer after suffering from acute or dangerous ills. Cattle have less vitality than the horse and are subject to contagious and infectious diseases, whole herds being destroyed, while the accident of Aborting is almost sure to affect all the cows in the herd.

DR. DANIELS' COW INVIGORATOR is one of the greatest Medicines for improving and keeping your cow in prime condition in the world. A trial package will convince you of its worth. You will always insist on Daniels' Invigorator for your cows once you have tried it.

Dairymen and owners of cows will find Dr. A. C. Daniels' Veterinary Medicines of great benefit and value in treating their stock in ordinary and every-day accidents and ills.

### THINGS IT WILL DO:

Save your cow from aborting and retained afterbirth; give them strength when calving. Prevents Diarrhoea and Scouring in cow or calves. Overcomes barrenness. Increases the quantity and quality of milk. Garget and caked udder yield to the treatment with Cow Invigorator.

When suffering from Hoose or Husk or Coughs and Colds, Cow Invigorator helps wonderfully. Stomach Staggers, Constipation, Loss of Cud and in all sorts of conditions Daniels' Cow Invigorator will prove a great blessing. Don't be afraid to try it if you have a cow. If they are well it is good for them and if they are sick it is the best tonic to be given.

**SEND FOR DR. DANIELS' BOOK ON COWS.**

## A FEW BAD LEGS

Many horses have legs like these. Some men don't care, some do.

Dr. Daniels' Remedies can do all of them good. Can cure some of them; can relieve others. A little time and patience will make the horse feel better, look better, work better and sell better. Why not try? Investigate.

## SOME FEET

Has your horse any hoofs like these? The bad ones require Hoof Grower and Daniel's Treatment.
