HALS HAIR RENEWER.

THE celebrated article is compounded with the greatest care. The effects are so wonderful and satisfactory as to give to any person who is afflicted with thinning of the hair or faded hair to its youthful color. It restores complexion, itching and dandruff; it is by its use becomes white and clean, and to its normal vigor, restoring the capillary, and making the hair grow thicker and stronger. As a dressing nothing has been found so effectual or desirable. Dr. A. Hays, State Assayer of Massachusetts, says of it: "I consider it the best preparation for its medicinal purposes."

It restores gray or faded hair to its youthful color. By its use becomes white and clean, and to its normal vigor, restoring the capillary, and making the hair grow thicker and stronger. As a dressing nothing has been found so effectual or desirable. Dr. A. Hays, State Assayer of Massachusetts, says of it: "I consider it the best preparation for its medicinal purposes."

Buckingham's Dye, For the Whiskers.

This elegant preparation may be relied on to change the color of the beard from gray or any other undesirable shade to a rich, brilliant, and clean. It is easily applied, being in the form of a cream, and will not wash off.

HOP BITTERS NEVER FAIL.

DR. J. C. O. If you are a man of business, you will find Hop Bitters a most valuable remedy. They will give you a good appetite, and they will help you to digest your food. They will also give you a good sleep, and they will help you to get up in the morning with a clear head. They will also help you to get rid of your troubles, and they will help you to get on in the world. Hop Bitters are sold everywhere, and they are a most valuable remedy for all ailments.

Way the Rev. Mr. Mulikite Laughs.

From the Arkansas Traveller.
"Is this the Rev. Mr. Mulikite" said a kind of out-of-season man entering the library of a well-known Little Rock minister.
"Yes, sir; have a seat."
"I have called to transact a piece of business which to the world may seem ridiculous, but which, viewed from an spiritual eminence, is of importance."
"What is it?"
"I want you to love me."
"Love you?" gasped the good man, regarding the petitioner and inwardly vowing that he had never before met a more repulsive human being.
"Yes, sir, I want you to love me," and he sat down and closed his eyes as though he intended to await the announcement of the decision. "The command is to love one another. I confess that I love you, and opening his eyes he looked at the preacher.
"Well, sir, said the minister, 'your demand after all is simple. I suppose that you have been lost for many years, and have just tasted grace, and that you especially want the love of ministers. Yes, I love you.'
"Thank you. Now, when we love any one we are willing to help him. Gimme a dollar, sir, gimme a dollar. Out of the love you bear me, gimme the dollar."
The minister arose, took down a gold and handed the visitor a dollar. "Good bye. I hope you will always love me," and the lover was gone.
"How did you make it?" asked a rough-looking man, when they reached a street corner not far away.
"A fine. Never met but one preacher that got away with me, and he was an old baiter; that insisted upon ducking me into the river before he could love me. Preachers like something odd. The old story of striking 'in is repeated."
"Let me see the money."
"Here she is; a new dollar. Let's go take something."
"I guess not. The thing is counterfeited. The minister poked his head over the fence and laughed. The dollar had come to him in a contribution box.
Sabbath Observance
In the Wesleyan Conference at Hamilton on Thursday there was a lively discussion on the question of Sabbath observance. The report recommended that the committee on that subject, which deplored the increased laxity of public opinion. It was pointed out that trains and steamboats were now more frequently plying upon our routes. In parts of the country far from centres of population works of construction were carried on the Sabbath, and there were other evidences to indicate increasing laxity. The report recommended that the church courts and members should be requested to use diligence in enforcing the law of the land in the matter, that ministers should forth the observance of the Sabbath day, and preach the scriptural view of the Sabbath, and that sound literature should be disseminated as widely as possible. The President said that at the North West hotels were open and the

Miramichi Advance.

CHATHAM, OCTOBER 5, 1882.

Old England's Heart.

They say that England's losing Her prestige and her fame, That her place among the nations Is only in her name. Who say so, let us well know The Red, White and the Blue Still waves our standard Englishmen, Whose hearts beat warm and true.

The words are sharp and pointed That urge our nation's loss; And England's flower her honor prize, And England's daughter's, too, And of England's faults are many, Yet her children's hearts beat true.

With love for our great Mother, For our glorious English Land, We'll stand by her, Heaven prosper her! And all she takes in hand, Let her friends be her downfall, Their words let traitors do; Nor let, no traitorous friend be true, While England's hearts beat true.

THE ANSWER.
Who says that Britain's name is o'er, That Britain's glory is gone, Who says that Britain's name is no more, Let those who know our country still Defame her as they may, But Britain then are British still, And shall be so for aye. Then give a cheer for England, For honest, valiant England, So much she loves her legend lore, But then she loves her honor more, Hurrah! hurrah for England, And the Flag we all adore.

Who says her knee has learned to bow To every tyrant crew? Who says the world may wrong her now, Nor fear to meet his foe? Let those who would our country stain, For man and his on him, But rise up, and the British gun, Will thunder on his foe. Then give a cheer for Scotland, For brave, for bonnie Scotland,— That glorious Colia Campbell bore, Hurrah! hurrah for Scotia, And the Flag we all adore.

Who says her knee has learned to bow To every tyrant crew? Who says the world may wrong her now, Nor fear to meet his foe? Let those who would our country stain, For man and his on him, But rise up, and the British gun, Will thunder on his foe. Then give a cheer for Scotland, For brave, for bonnie Scotland,— That glorious Colia Campbell bore, Hurrah! hurrah for Scotia, And the Flag we all adore.

The blood we shed like heroes true, In many a bright campaign, At Inverkeithing, at Waterloo, And amid the vale of Spain; Such blood is yet in British hearts, As proud, as brave as then, Let honor call the Lion start, And Britain's flag again. Then give a cheer for England, For our dear, dear, dear Erin, For dear, for dainties Erin. In many a gallant scene of yore, The foremost flag that Britain bore Was carried by an Irish hand, An Irish Regiment o'er.

Who sees not in the little hand That pierces the Afric wild, And one to hand, the hand in hand, The dark marauder foiled, True British hearts like those of old, That stormed the world again, True heroes that can still uphold The glories of the old. Then give a cheer for Wolsley, And one for all the valiant crew, That British flag so bravely bore, Three British Cheers for Wolsley, And the Flag we all adore.

Disease in Deer Tard Stock.

CANNOT possibly obtain where HAYFIELD'S CONDOR POWDERS are mixed, according to the printed directions, with their feed. All animals and poultry derive benefit from this good specific, in both weak and profligate. No steamman, farmer or poultry grower, is safe without them.

For Chleas.—Take a teaspoonful of Perry Davis' Pain-Killer in hot water, sweetened with sugar. Baste the stomach and bowels freely with the Pain-Killer at the same time. If the attack be severe, and attended with cramps and diarrhoea, repeat the dose every fifteen minutes, using hot fomentations on the bowels. In extreme cases the dose may be increased to a tablespoonful.

PICARESQUE CANADA.

OUR Country—As it was and as it is— DESCRIBED BY THE BEST WRITERS AND ARTISTS:
A panorama of Canadian History and Life, from Jacques Cartier's day; the old Indian, French and American, and the Explorations of Voyagers and Missionaries in the Roughing it in the Bush by the Pioneers, down to the present epoch of increasing material prosperity and national development. Characteristic Canadian scenery from our sea pastures on the Atlantic to the deep forests of the Pacific Coast, embracing the most striking artistic features of the Maritime Province, the Eastern Townships, and Historic Quebec, the Saguenay, the Ottawa, and the St. Lawrence Valley; Muskoka and the Regions of the Great Lakes; the Prairie Provinces, the boundless North-West, and the Mountain Province beyond. Our Cities, Hamlets, Backwoods Clearings, Farms and Vineyards; Summer and Winter Sports; Social, Political, and Religious Life; Educational Institutions; our Chief Industries, Mining, Forestry, Wealth, and Underdeveloped Resources. With the utmost confidence, the publishers offer to the public this great work, the first of its class which has ever been attempted in the Dominion, a work which will be the fullest exposition of our country, and a tribute to native art and native genius worthy of Canada and her people. The Art Department is under the special supervision of Mr. L. R. O'Brien, President of the Royal Canadian Academy of Arts, which fact is a sufficient guarantee of its able and faithful execution—while the artists engaged upon its engravings the highest ornaments to the profession; the Literary Department is under the direction of Mr. G. M. Grant, D. D., Principal of Queen's University, Kingston, who is assisted by leading Canadian historical and descriptive writers, the engravings will be executed under the supervision of Mr. L. E. Smith, formerly of England and of New York, who will have the cooperation of the best engravers to be procured in England or America. The work will be published in serial form, at fifty cents per part; each part containing from twenty-four to thirty-two pages, of which about one-third will be engravings of the finest character, varying in size from full-page views to smaller plates, liberally interspersed through the text. Printed under immediate supervision of the publishers, on premium-made paper, and may be offered as a beautiful specimen of Canadian art and Canadian workmanship. The illustrations will be original, the drawings being made at great expense expressly for this work. The actual cash value of the work is over \$10,000; the payment of the subscribers being to carry out this most important project in a manner to secure the hearty response of all Canadians to an enterprise which will give to the world the best and only true delineation of our country and of the everyday life of our people. ART PUBLISHING CO., 58 & 60 York Street, Toronto, Canada.

Golden Ball, Shoe Store

AND
FURNITURE EMPORIUM.
The Golden Ball Shoe Store is the oldest established in Miramichi. It is now fifteen years since we commenced business in the above line, and we can now point with pleasure, to hosts of patrons, who have invariably purchased from us during that length of time. The reason is plain. We buy entirely from the best manufacturers, consequently our goods give satisfaction. We might purchase cheap, shoddy goods (that are only meant to sell and not to wear) but by procuring that policy, it would be impossible to retain our customers. The best goods are the cheapest in the end. We have full line of

Infant's, Children's Misses', Youth's, Boy's Women's and Men's Boots Shoes, Slippers, etc., at the lowest possible price compatible with good quality. Also a large assortment of

Trunks, Valises, and Hand Bags, Sole Leather and hose Findings.

Seven years ago we opened our **FURNITURE EMPORIUM**, and have witnessed a steadily increasing business. We keep in stock all varieties of **BEDROOM, KITCHEN, AND PARLOR FURNITURE, LOUNGES, SOFAS, HALL, STATION, WARDROBES, WARDROBES, TABLES, SHIRTS, SHERMANS, EXTENSION TABLES, SPRING BEDS, IRON BEDSTEADS, STRETCHERS, ETC.**

Matresses, Bolsters and Pillows of all kinds, Mirror Plates, Excelsior Etc.

The Military at Camp.

A Military Brigade Camp is being held at Sussex on the ground known as the Kettle farm. No better place could be chosen for the purpose, as it affords ample accommodation for the different corps, in the way of tenting and manoeuvring ground and has the stream known as Trout Brook running through it.

At latest advices the Camp was hardly completed, its full quota of men not having arrived, although they are, doubtless, en route.

Mr. Weldon said that the course taken by the opposing counsel was not unexpected in view of the evidence offered yesterday. As the matter stands the respondent must pay the costs. He had been informed that there was evidence which was sufficient to disqualify the respondent but before proceeding further he asked leave to consult the counsel associated with him.

His Honor granted half an hour for the purpose. Mr. Weldon (the counsel having returned to court) said that in justice to the petitioners he would say that the statement had not been made in the petition without some ground. However, as the object of the petition had been gained, they had decided after consultation that they would not proceed on the charge of disqualification. They therefore suggested in the motion of Dr. Tuck that the seat be declared vacant, and prayed that the respondent should pay the costs.

His Honor said that the deposits on the petition and the counter petition should be returned. He agreed with the counsel taking on behalf of the respondent that the seat should be vacated. "This, I am happy to say," said His Honor, closes the Election Court of the County of Kings."

Egypt.

Egyptian news of the past week indicate that, with the fall of Arabi, the rebellion there has completely collapsed. The Khedive is re-establishing the government of the country, evidently under the direction of General Wolsey and it is probable that the United Kingdom, instead of Turkey, will rule the Egypt of the future.

Municipal Elections.

Municipal Elections.—The Municipal Council made up on Monday, 29th inst. with the Town Clerks in the different parishes. This is rendered necessary by the amendment of the Municipalities Act passed at the last session of the Provincial Legislature.

New Jail.—A movement is being made to secure a vote of the Municipal Council at its next meeting in favor of the erection of a new jail at Newcastle.

Kings County Commencement.

The petition against the return of Prof. Geo. E. Foster, in Kings County, has been tried and the result is that it must be run over again. They do corrupt things very openly there and seem used to it. A Mr. Wm. J. Travis, of several persons money to "come and see him" on polling day. One of those was George French. It seems that as he was leaving, after his interview with George, James French came out and told the people, who had been told along the shore, possess those facilities for transportation which their situation and circumstances demand. Last year the fisheries of Gloucester yielded the sum of \$18,728. They furnished one-third of all the codfish caught in the Province, and one-third of all the lobsters which are caught and prepared in this County.

Gloucester.

It is probable that there is no County in this Province which less its known than the County of Gloucester. Railroads appear to do their best to give it the go-by; tourists seldom trouble it, or they do the badness of the roads prevents them from visiting that most interesting district, the long narrow land which stretches out towards Miramichi Island, where the sea swarms with fish of various kinds, and where many times the business which is now carried on could be done did the people, who are so neatly settled along the shore, possess those facilities for transportation which their situation and circumstances demand. Last year the fisheries of Gloucester yielded the sum of \$18,728. They furnished one-third of all the codfish caught in the Province, and one-third of all the lobsters which are caught and prepared in this County.

deavour the young of the salmon. The shell duck, especially which breeds as many as ten or fifteen young ones yearly, feeds largely upon the young of the salmon which it devours an immense quantity.

The country in the vicinity of the mouth of the Nepisiquit has been settled for a period probably more than two hundred years. It was here that early in the seventeenth century the Jesuit fathers built a church, the funds for the construction of which having been largely furnished by the reader of the choir in "La Sainte Chapelle," in Paris.

Mr. Combes, who resides some two miles from Bathurst bridge, directed my attention when in Bathurst, a few weeks since, to a pointed lead on the east side of the Tatagouche river, which is called by the French "La Pointe au Pere," the Father's Point. A French willow grew upon it near the shore, and Mr. Combes informed me that he had heard from the Father's that it was here that the first church stood.

On the opposite side of Bathurst harbor is Esnard's Point, and there is also a pointed lead on the west side of the Bay of Chaleur. A native of the Baie des Chaleurs Province of France, had an establishment for the capture of the walrus on the Miramichi River, and the Bay of Chaleur and Channel above referred to were named after him, and it is not at all improbable that he had an establishment at the same place as well as at the mouth of the Miramichi.

It is much to be regretted that the harbor of Bathurst is not deeper than it is, and that it does not afford a haven of refuge for a large class, which now either land or compel a hazardous march miles distant in the Bay of Chaleur. Gloucester must, however, look for a secure harbor further to the eastward, probably on the point of disjunction, where the Chaleur is bounded on the south by a vast tract of land which extends to the Miramichi River and crosses it.

Very rocks in this district lie horizontally or nearly so, the whole forming a strange contrast to the rugged shores of the north side of the Bay in the Province of Quebec, where "Hills on hills and Alps o'er Alps" is as well depicted as possible. Even the vast prairies of the West, and when that is done, what must be the case before long, Caraquee and Shippegan will become not only extensive fish exporting places, but will also supply large quantities of shipping boards and other lumber.

Mr. W. A. Wing, Westport, writes: "I wish to inform you of the wonderful results which followed the use of Nordberg & Lyman's Emulsion of Cod Liver Oil and Hypophosphites of Lime and Soda. A patient suffering with a cough and asthma, who had tried every remedy without effect; at last I used this Emulsion, and before three bottles were used I am glad to say I was restored to perfect health."

<

Mrs. Nishi and the North Shore, etc.

SEATING RINK Plans wanted—See advt.

THE ROYAL ACADAMY meets this evening. A full attendance is requested.

PROFESSOR PORTER, M. P. P., is what a correspondent of the Advocate calls him.

Cow Lost.—Dr. Thomson advises a cow which has strayed from his premises.

CHATHAM BATTERY is to be paid for their annual drill on Friday evening next.

BURNED.—The Riviere des Chutes School house was burned on last Friday morning.

WALK UP and witness the "go as you please" at Masonic Hall, Newcastle, next Monday.

St. JOHN'S CHURCH.—Services will be held at St. John's Church, Chatham, on Sunday next, morning and evening.

THE "TRINITY" shows evidence of the presence of the "reformed inebriate" who are killed of the "Humorist" and "Borderer."

THE MIDWINTER are often complained of, but Masonic Hall, Newcastle, will be an excellent place for pedestrians on next Monday.

GONE.—The World's Rink correspondent has been disgusted because of the conduct of the referees and left. Dear, modest, sensitive creature!

WAGONS.—Truck Wagons, double and single, Portage Wagons, second hand driving wagons, etc., to be had at Mr. Alex. Robinson's factory, St. John Street, Chatham.

SCHOOL MEETINGS.—The annual school meetings are to take place on Thursday next. Trustees' notices in blank are for sale at the ADVANCE office. They will be posted not later than tomorrow.

DR. KENDALL'S treatise on the horse and his diseases is on sale at THE ADVANCE office at 25 cents a copy. Subscribers may secure it without cost by remitting for arrears and a year's subscription in advance. See advt.

IT IS NECESSARY that a steamer should be engaged by the fabric department to look after illegally set nets in the bay. Until officers were chosen from the ranks of political creatures they were capable of doing this work in their own boats.

DON'T YOU FORGET IT—that on feeling an aching pain in the hollow of your back to go to your DRUGGIST and get Dr. VAN BUREN'S KIDNEY CURE. It will remove the trouble in a few days. Sold by J. D. B. Mackenzie.

GO AND TAKE your girl, to see the walking match in Masonic Hall, Newcastle, next Monday.

SCOTT ACT.—Messrs. John Malby and Allan McTavish, on the complaint of Matthew Russell, and John Fay on the complaint of T. W. Crocker, were each fined \$50 and costs by Justice Mason at Newcastle last week under the Canada Temperance Act.

A TEA SOCIETY, including dancing, will be held under the auspices of Calceolonia Division, Douglastown, at the Temperance Hall in that place on Thursday next. The arrangements of the Committee in charge will, no doubt, make the evening a very enjoyable one.

THE BEST pedestrians will go as they please at Masonic Hall, Newcastle, next Monday.

SHOCKING ACCIDENT.—Michael Grogan, aged sixteen, son of Joseph Grogan, of Kingston, Kent Co., got entangled in the belt of the Kingston mill on Saturday.—When rescued it was found that his feet and legs were badly broken. He lingered for a few hours when death terminated his sufferings.

MILITIA ORDERS.—Militia General Orders contain the appointment of Sergt. John Stead as Lieutenant, No. 1 Company, District, 73rd, Northumberland Battalion, vice John Foster. Left limits and Quartermaster-Sergeant Alexander Cantley to be Quartermaster, vice James Gray, deceased.

EXCELLENT ARRANGEMENTS are made for the pedestrian contest at Masonic Hall, Newcastle, next Monday and the best of order is fully assured.

CHATHAM AND NEWCASTLE, etc.—The time of the evening trips of the Str. St. Louis between Chatham and Newcastle and intermediate points has been changed. She now leaves Newcastle at 5 p. m. and returns, leaving Chatham at 6 p. m.—Some changes are also made in the Andover's time table.—See advt.

BEACON WANTED.—A beacon that will serve as a guide to tug and other steamers running up-river from Chatham to Newcastle at night is much needed and ought to be provided by the Marine Department before the next navigation season opens. The plan is to erect a beacon on the high bank of the river in the vicinity of the residence of Samuel Thomson, Esq.

LADIES AND GENTLEMEN will be attracted by the pedestrian match at Newcastle Masonic Hall, on Monday next.

MR. A. H. GILLIS, who has been for several years a resident of Chatham and for the last two years in charge of the custom tailoring department of the establishment of W. S. Logie, Esq., has left for Boston, where he was offered an advantageous engagement as cutter in one of the leading houses there. Mr. Gillis proved himself a first class workman and also made a large number of friends while here.

THE CAMPBELLTON F. O. ROBBERS are still at large, notwithstanding the public interest felt in the capture of A. "Detective," a P. O. official and two local officers went down the coast after them this week, but have returned very little wiser than when they left. Official incapacity in high places and a lax morality which leads some persons who profess to be honest citizens to harbor thieves will, no doubt, assist the robbers to evade justice.

"GO AS YOU PLEASE" at any time of day, go as you please, but be sure that you go to the pedestrians at Masonic Hall, Newcastle, on Monday next.

MR. VAN DER VLIET of Bathurst Village, was recently presented by his parishioners with a handsome horse imported from Prince Edward Island expressly for the purpose. Father Varley has labored for years in Bathurst with a seal in his Master's service, and a devotion to the spiritual and temporal interests of those committed to his charge which have entitled him to the respect and esteem which, as this year's Bathurst shows, he so fully possesses.—Freeman.

BARK "DUNSTAPPAK" launched recently from Mr. Geo. McLeod's yard at Kouchibouguac, is 864 tons register and will class 13 years in Bureau Veritas.

It is described as a very handsome vessel and will prove a valuable addition to Mr. McLeod's already large fleet. Capt. Fulmore, formerly of the "Alexander Keith" will be her commander. She will be towed to Miramichi, where she will be rigged by Mr. Finn, of St. John. She will also load there for a port in the United Kingdom.—Globe.

IT WILL BE FUN, ere the match is done, to see the walkers break and run.

SUBSCRIBERS whose subscriptions have expired would greatly oblige by remitting remittance without waiting for a reminder from this office. Our subscription list is so large that it involves much labor and expense to send out bills in the usual way, and our friends know by the yellow slip when their subscriptions are due.

THE ADVANCE acknowledges and sends by first mail after receipt and this shows the date to which payment is made. Our friends will also observe that we are this year giving away a valuable work on the horse to those who pay in advance.

MARION.—At the annual communication of Mount Lebanon Royal Arch Chapter 101, held in the Masonic Hall, Chatham, on the 25th ult., the following officers were elected:—

Thos. F. Gillespie, Z. G. L. Brithan, H. Arthur Johnson, J. O. Fotheringham, S. E. Hutchinson, S. N. John Johnston, Treas.

Isaac Harris, 1st Jap. James Nelson, 2nd Jap. James Anderson, 3rd Jap. W. C. Smythe, 4th Jap.

Installation will take place at the regular communication this month.

GO ON MONDAY and see the walking match in Masonic Hall, Newcastle.

PERSONAL.—Mr. D. M. Mcintosh, who left on Wednesday evening last week to pursue the study of medicine at the College of Physicians and Surgeons, Baltimore, was tendered a complimentary supper by the brethren of Chatham Lodge, I. O. O. F.

J. E. B. McCready, Esq., Editor of the Montreal Transcript was in town on Tuesday.

Mr. Richard Fahey who left Chatham a few days ago for New York, has secured a business engagement with Messrs. Shadbolt & Co., Lumber Merchants of New York and London. Mr. Fahey's many friends here will hear of his success with pleasure.

TAKE THE CHILDREN to see the pedestrians at Newcastle on Monday next.

A HAPPY EVENT.—No. 18 Tobin Street was yesterday afternoon the scene of a very pleasant gathering on the occasion of the marriage of Wm. Curry, Esq., President of the Windsor Cotton Factory, and Miss Jean Lithgow, daughter of the late John Lithgow, Esq., of this city, of which a notice appears elsewhere. The bride, who was escorted to the altar by her father, was the recipient of many beautiful and costly presents. Mr. George McAvity, of St. John, was groomsmen, and Miss Emily Bald and Miss Helen and Margaret Lithgow, were bridesmaids. The happy couple left in the evening train for a tour in the United States. They have our best wishes.—Halifax Recorder, 25th.

THEY MAY WALK or RUN, as it suits them at Masonic Hall, Newcastle, next Monday.

A SLENNID WORK.—We have much pleasure in fully endorsing the excellent work, "Picturascene Canada" which is now being offered to the public by Mr. Henry Parrish. The prospectus will be found on our first page and judging from the portions of the work we have seen there is nothing therein stated that they do not fully bear out. The facts that Dr. Grant edits the Historical portion of the work and that he is aided by such gentlemen as Mr. Hannay, Geo. Stewart, Jr., and Mr. Roberts, on the New Brunswick portion of it, while the most accomplished artists of both sides of the Atlantic prepare the illustrations, are guarantees of its high character. Read the prospectus on the first page and subscribe for "Picturascene Canada."

NEXT MONDAY is walking day at Masonic Hall, Newcastle.

"THE WORLD" appears to be very much out of temper with the ADVANCE. Its space is limited and its proprietors should not devote so much of it to the special object of their personal malice. The ADVANCE will be read and enjoyed by the public whether the World abuses it or not, and our neighbor will do well if he learns a little of public taste and break off his habit of declaring semi-weekly and weekly, without abatement, that the paper and its editor are everything that is bad. That kind of thing did very well for a time, but even the most depraved readers tire of monotonous abuse. The World has expended its venom on the ADVANCE for some time, but it is now well known that if it were not for the ADVANCE the World would not exist. It may as well now conclude that if its few readers do not endorse the sentiment they will not do so by having the charge laid before them so persistently. The question is asked whether the World has any other subject to lay before its readers? It ought to have, in fairness to them, and we hope, for its own sake, that it will soon endeavor to become a newspaper instead of a vehicle of private spite, envy and ill-willings.

THEY WILL WALK and run steadily for 12 hours at Masonic Hall, Newcastle, on Monday next. Go and see them.

THREE MAIL CONTRACTS are advertised in Northumberland—the work to be done from 1st January next, and tenders to be addressed "The Postmaster General Ottawa" receivable until noon on Friday 27th ult. The contracts are to be for four years each, the mails to be conveyed by one or more horses. Printed notices containing all information, together with blank forms of tender may be obtained at the several post-offices affected. There are three separate services officially described as follows:—

The mails to leave Renous Bridge on Monday morning at 9 o'clock a. m., or as soon as practicable after arrival of mail from Newcastle, reaching McLaughlin via Renous River in one hour from hour of departure. Returning to leave McLaughlin same day at 3 o'clock p. m., reaching Renous River via Renous River in one hour from hour of departure.

The mails to leave Doaktown on Saturday of each week at 7 o'clock a. m., reaching Shinikimuk in four hours and thirty minutes from hour of departure. Returning to leave Shinikimuk same day at 2 o'clock p. m., reaching Doaktown in four hours and thirty minutes from hour of departure.

The mails to leave Blackville on Friday of each week at 8 o'clock a. m., reaching Shinikimuk in three hours and forty minutes from hour of departure. Returning to leave Shinikimuk same day at 12 o'clock p. m., reaching Blackville in three hours and thirty minutes from hour of departure.

Ulers and Old Sores

These painful diseases disappear totally under a course of Dr. L. R. HARVEY'S SUGAR-COATED VEGETABLE PILLS, which restore the impoverished blood and sluggish circulation. These remedies are sold at all respectable druggists and remove all internal pains and aches. They never fail!

Salmon-Destruction.

Mr. Editor.—I read with interest "Traveller's" truthful communications regarding the willful neglect of duty by the Fishery Overseers and Wardens on the Southwest Miramichi, and I can say that those on the Northwest appear to be about equally negligent, in fact, I think in making such a charge there is no need of particularizing any district, for, at present, poachers are busy nightly from Neguac up to the head of the river, and black salmon are being daily shipped from the different railway stations in the County. It is on good authority that the number of salmon taken by poachers from Newcastle up on the two rivers during the last fortnight exceeds three thousand, besides the large number killed and sold from Neguac to the mouth of the river. The Department of Marine and Fisheries cannot be ignorant of this state of affairs, but why a searching investigation has not been made in the matter is a mystery. Yours &c.,

CITIZEN.

NEARBY ALL diseases that afflict humanity originate in the stomach, liver or bowels, and might be prevented if people would use a little common sense; but they will not. They rather take Harvey's Purgative Pills, because one is a dose.

To lessen mortality and cure the insroads of disease, use Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure. For all diseases arising from Impure Blood, such as Pimples, Blotches, Bilemness, Indigestion, &c., it has no equal. Dr. Thomas Smith, Elm, writes: "I am using this medicine for dyspepsia. I have tried many remedies but this is the only one that has done me any good."

The Skating Rink.

Skating Rink matters are progressing satisfactorily. At a general meeting of the shareholders held at Masonic Hall on Wednesday evening last week the special committee reported upon several matters, two of which were on Howard Street and the Richmond and Station roads and two others on Church Street. The two former were considered a little further from the central part of the town than was desirable, because being open to the objection that water could not be obtained there by gravitation. The choice lay between a lot in the lower portion of the Mitchell field between the properties of Messrs. Bremner and Marshall and the lots on the corner opposite St. John Church, bounded on two sides by St. John and Church streets, on the east by Frank Martin's property, and on the south by that of Mr. T. F. Kearney. The latter was chosen. It is in two divisions, one of which is 100x100 ft. bounded on the east by St. John Church, and the other 50x100, by Mr. Patrick Connor. The price asked for the Church lot was \$600 and that for the Connor lot \$300.

After deciding to purchase these properties the meeting elected the following board of Directors.—Messrs. J. B. Robertson, Dr. E. Winslow, Dan'l Ferguson, Robt. McGuire, Ernest Hutchinson, D. G. Smith, Peter Logie, Mr. John Johnson was elected Treasurer and Mr. George Watt, Secretary. The Directors were empowered to proceed with the work contemplated as expeditiously as possible.

At a meeting of the Directors held on Saturday evening, Daniel Ferguson, Esq., was chosen President. It was, after discussion, determined that plans for a Rink 100 feet long and from seventy to eighty feet wide be advertised for at once, completed by the 1st of November next, and the plans in the matter of form and style, the plans to be for the proposed structure, to be the property of the donors and \$20 to be paid to the party furnishing the plan adopted.

AN OFFER of prevention is worth a pound of cure, and a few doses of Dr. VAN BUREN'S KIDNEY CURE taken on the first sensation of pain in the region of the kidneys, will effectually cure the Bright's Disease and Stone in the Kidneys and Bladder. All Druggists keep it. Sold by J. D. B. Mackenzie.

A lady from Syracuse, writes: "For about seven years before taking Northrop & Lyman's Vegetable Discovery and Dyspeptic Cure, I suffered from constipation, very prevalent with our sex. I was unable to walk any distance or stand on my feet for more than a few minutes at a time without feeling exhausted, but now I am thankful to say I can walk two miles without feeling the least inconvenience." "For Female Complaints it has no equal."

The Gilchrist Scholarships.

In the year 1759 there was born in Scotland a child afterwards known as John Gilchrist Gilchrist. On reaching maturity he became an army doctor, and spent most of his life in British India, dying in 1841. He was a man of fervid, impetuous temperament, greatly addicted to getting himself into all manner of scrapes. On one occasion, in a speculative fever, he purchased at a very low rate a large tract of land in Australia. At his death he left this tract to be devoted by him to furthering the cause of education in whatever manner they might see fit. For a quarter of a century after his death the income was used partially or wholly in providing educational lectures in different parts of Great Britain. By the time the property had increased immensely in value the trustees felt themselves warranted in putting Dr. Gilchrist's bequest into a more definite and comprehensive shape. They accordingly founded the series of principal scholarships which will ever keep green the memory of the old doctor who builded so much "more wisely than he knew." Two were to be competed for annually in British India, one in Mauritius and the Cape of Good Hope, and a fourth, and one in Canada. These were of the annual value of one hundred pounds

sterling and were tenable for three years

and save those for India which were held for five. There were two scholarships of fifty pounds to be competed for annually by England and Scotland and a special one of the same value allotted to University College, Bristol. In addition to this, lectureship for the benefit of working-men are bound established in different parts of England and Scotland. Lastly, whatever surplus funds are left the trustees devote to miscellaneous expenditures in the cause of education, lending a helping hand to both personally and institutionally that are at once meritorious and necessitous. To Dr. Carpenter, the eminent physiologist, who is Registrar of London University and Secretary of the Trustees of the Gilchrist Fund, is very largely due the successful arrangement and working of the scheme depicted above.

Every year about the 20th of June the Matriculation papers of the London University are forwarded to deputy secretaries in the various Provinces of the Dominion. (These papers, nine in number, cover the subjects of Latin, Greek, one Modern Language, a Sanscrit, English Language, English History and Geography, Chemistry, Natural Philosophy, Geometry, Arithmetic and Algebra. The examinations last for nearly an entire week, and are very severe. To the candidates facing the slightest delay in the receipt of the scholarship and its matriculation admits him either to London University or to Edinburgh.)

The Canadian scholarship has been seven times taken in the Maritime Provinces by Mr. McGregor and Murray of Dalhousie, Schurman of Acadia, Ross of Prince of Wales, Pickard of the University of N. B., and Goodwin and Tweedie of Mt. Allison. This year the former has taken the other, possibly to a cylindrical form, but, as more generally supposed, to a compression of its material on the advance side, as it rushes through space, indicating if such be the case (the theory being supported by the backward sweep of the tail in most comets) that even in interstellar space there is a resisting medium sufficient to affect the almost impalpable material of which comets are composed. I will leave such speculations, however, to astronomers, my only object being to call your readers' attention to a sight which will amply repay them for the loss of a few hours' labour, and which, I fancy, many have so far neglected because of not having fully realized that our celestial visitor is one of no ordinary size and beauty.

On the 18th Sept., at 3 o'clock p. m., when the first observation computed was made in Cincinnati, the comet was about 60,000,000 miles from earth, and at the last observation in Cambridge, on Wednesday morning 27th ult., the distance from the sun at the first observation was 55,000,000 miles, and at the last 65,000,000. It will be nearest the earth during the present week, when it will come within a distance of 15,000,000 miles; then it will quickly disappear from the view of our hemisphere. As it approaches the earth, and escapes the light of the sun's rays, which have the effect of neutralizing its brilliancy, it will be plainly visible until its receding from the earth. Hereofore it was not plainly visible to the naked eye just before sunrise, but during the next week it may be looked for any clear day, and the suggestion is made, with the wings of the tail, will be discernible.

A. D. Noyes Newark, Michigan, writes: "I have enquired at the drug stores for Dr. Thomas' Electric Oil, but have failed to find it. We brought a bottle with us from Quebec, but it is nearly gone and we do not want to be without it as my father is troubled with a pain in his shoulder, and nothing else gives relief. Can you send us some?"

Some tobacco spurt up in the pipe while smoking, with little crackling explosion. This is caused by the addition of foreign matter to assist the combustion. When the purity of the tobacco is not tampered with, it is in fact, as it is properly called, a pure tobacco. If it is not, it is not a tobacco, and nothing else gives relief. Can you send us some?"

Referring to Captain and Mrs. Bates, who passed through Montreal the other day the *Witness* says:—"They have been long known to the public on both sides of the Atlantic, their names being associated with proportionate bards, rendering them subjects of wonder wherever they have gone. The Captain is 7 feet 10 inches in height in his slippers and weighs 475 lbs. He is a stout, well-proportioned man of the same height. She was born in New Annapolis, Nova Scotia, and is about fifty years of age, he being apparently a few years her senior. Capt. Bates is a native of the State of New York, and is a member of the United States Army, having served in the Army of the Republic of Serbia in that State. The fact of the existence of two individuals of such gigantic size was naturally not long in coming to the ears of showmen, and a number of them of the same kind, as they were called, attached themselves to the travelling museum. He was soon joined by the giants, then Miss Swan, and both continued their connection with the showmen, until they were separated by a quarter of a century, travelling repeatedly on both continents and everywhere drawing crowds. They have exhibited before all the principal courts in the world, and are now exhibiting an engagement at a London theatre that they were married. Having amassed a considerable fortune they some time ago retired, so to speak, from public life, and settled upon a farm of 180 acres near Seattle. The home of the giant couple is described as being one of the rarest of curiosities. The house, furniture, vehicles, horses, in short everything pertaining to it, being on the same scale as themselves—gigantic. The doors of the house and several apartments are all double the usual width and ten feet high. The bed-room occupied by the couple is furnished with a bed ten feet long and broad in proportion. The chairs are so large and high that ordinary visitors have to literally climb into them like children. The family carriage is drawn by eight immense Norman horses, and is about the width of an ordinary railway car. The furniture is chiefly of mahogany and very highly finished, no expense being spared. The captain's principal pastime is farming. Taken together the giant and giantess are in every sense what their name implies. A good deal of mirth was occasioned at the Montreal depot by an old and well known citizen whose perpendicular dimensions reach to only about three feet, going up to the giant and offering to shake hands. The act was accomplished, the giant and giantess, both holding the tall man being compelled to keep their bodies and the short ditto balancing himself on tip toe amid general laughter.

MARRIED.

On Wednesday, Sept. 27th, at Chatham, by Rev. Geo. Howland, William Givens, of Chatham, and Elizabeth Lewis of Miramichi.

DIED.

At her residence in Blackville, September 27th, 1882, Mary A. wife of R. N. Underhill, Esq., in the 78th year of her age, she leaves a large number of relatives and friends to mourn their loss. She was a devoted wife and mother, and her death will be felt by all who knew her. She is buried in the cemetery.

SUPPLEMENT

MIRAMICHI ADVANCE,

CHATHAM, N.B.

OUR SUPPLEMENT.

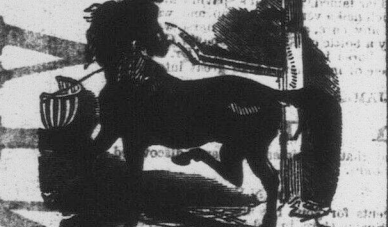

We furnish our readers this week a supplement giving much valuable information in regard to the treatment of our most valuable domestic animals in sickness and their proper management in health. As our space is limited, we cannot give you all we would like of the large amount of knowledge which has been obtained by men who have made our domestic animals a study for centuries, but we are prepared to give you the very "essence" in a few columns, treating only the most important subjects, and we think this sheet, if reserved, will be of more benefit to many of our readers than two dollars' worth of information in some books we have seen upon this subject and costing that amount. Our aim in publishing this supplement is two-fold. First, we wish to benefit our readers by giving them information through our columns which will be worth more to them than the money they pay for the paper; and we are greatly surprised that many points of practical information that we in this condensed form give you on this sheet will be such information as you will appreciate, and as of lasting good to many. Secondly, we wish to benefit ourselves by making it so valuable to you that you will not only continue to subscribe for it yourself, but get your neighbors to send for it also.

THE HORSE

The most valuable and useful of our domestic animals is the horse, and his great value should induce men to treat him with health, as well as to do all in their power to relieve him when sick; and if we cared nothing for the profit derived by taking good care of the horse, which we may be possessed, we should do so for the grand reason that the horse is our servant, and we made him, not possessing power, therefore totally unable to do anything, is to relieve himself in sickness. These facts, when carefully considered, should arouse humane feelings in the breast of every person who is entrusted with the care of one of these noble animals.

COLIC IN HORSES

There are two kinds of Colic—spasmodic and flatulent. The former is the most frequent, and the symptoms are familiar to many horse owners. The engravings below show the position assumed in different stages.

THIRD STAGE OF SPASMODIC COLIC.

Causes of Spasmodic Colic are drinking cold water when in a heated condition, costiveness, unwholesome food, undue quantity of food, etc.

Symptoms.—The horse is suddenly attacked with pain, and shows evidence of great distress, shifting his position almost constantly, and manifesting a desire to lie down. But in a few minutes these symptoms disappear, and the horse is easy for a short time, when they return, increasing in severity, until the horse cannot be kept upon his feet.

A cold sweat generally breaks out over the body. The legs and ears remain at about the natural temperature.

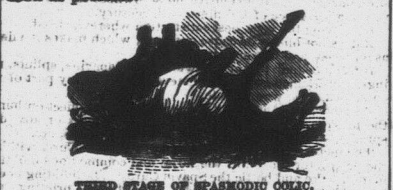

The horse works around to his flanks, mostly at the right side, as if pointing out the seat of the disease, crosses the ground with his forefeet, and will almost strike his belly with his hind foot.

SECOND STAGE OF SPASMODIC COLIC.

The horse heaves at the flanks; and kicks and rolls, and seems much excited, and sometimes acts as though he wished to make water, which he cannot do on account of the urethra being

spasmodically contracted. This symptom need not be treated (as it frequently is), for, as soon as the horse is relieved of the colic, he will pass water freely. Therefore, follow the treatment we give below and relieve the colic as soon as possible.

THIRD STAGE OF SPASMODIC COLIC.

Treatment.—Relieve the pain by giving one ounce sulphuric ether, two ounces of tincture of opium (laudanum), and a pint of raw linseed oil; and if not relieved in an hour, repeat the dose. If there is not relief in a reasonable length of time after the second dose is given, some recommend bleeding from six to ten quarts from the neck-vein, but we think it is rarely necessary to do this. Occasionally walk the horse about to excite the bowels to action.

Another excellent remedy, which is always at hand, is one heaping tablespoonful of saleratus mixed with one pint of milk and given at once. It would be well to try the saleratus first.

Always begin the treatment as soon as possible.

HEAVES—BROKEN WIND.

This disease is readily distinguished by nearly every farmer or any person having much to do with horses.

It is most likely to occur among farmers' horses, owing to the prevailing habit among this class of feeding large quantities of hay to horses possessing a ravenous appetite.

Clover hay when fed in large quantities for a long time is quite certain to produce this disease.

Heaves are never found in racing stables, where the horses are properly fed; consequently, it is not reasonable to attribute the cause to overfeeding with hay and coarse feed.

Treatment.—Turning out on natural pastures or feeding laxative food will relieve mild cases; but severe cases require much care in feeding and watering.

Hay should only be fed at night, and then only a small quantity which is clean and free from slight mold and dust.

The quantity of grain should be increased, and carrots, beets, potatoes, or turnips, should be given occasionally. Water should be given only before eating, and not after, as is the usual custom. Do not put the horse to work for at least one or two hours after eating.

We give a few good recipes in another column for heaves, which, if given in addition to the above care, will usually result in a cure or great relief.

BONE SPAIN

Consists in disease of the bones in the lower and inner part of the hock-joint (inflammation, ulceration, and bony deposit).

For location, see cut. In nearly all cases of lameness in the hind leg the seat of disease will be found to be in the hock-joint, although many persons (not having had experience) locate the difficulty in the hip, simply because they cannot detect any swelling of the hock-joint; but in many of the worst cases there is not seen any swelling or enlargement for a long time, and perhaps never.

Causes.—The causes of spavin are quite numerous, but usually they are spasms, blows, hard work; and, in fact, any cause exciting inflammation of this part of the joint. Hereditary predisposition in horses is a frequent cause.

Symptoms.—The symptoms vary in different cases. In some horses the lameness comes on very gradually, while in others it comes on more rapidly.

It is usually five to eight weeks before any enlargement appears.

There is marked lameness when the horse starts out, but he usually gets over it after driving a short distance, and if allowed to stand for a while will start lame again.

The horse will stand on either leg in resting in the stable, but when he is resting the lame leg, he stands on the toe.

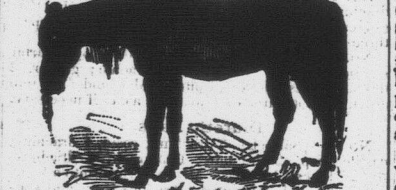

If the joint becomes consolidated the horse will be stiff in the leg, but may not have much pain.

Treatment.—If much heat is found in the spavin, we recommend cold applications to reduce the inflammation; after this has been accomplished, the treatment should begin. Spavin has been considered incurable in the past, until the discovery of Kendall's Spavin Cure, which is now considered by the best veterinary surgeons and the most prominent horse men in this country to be the most important discovery in the veterinary science of the nineteenth century, and as the far-famed remedy is advertised in this supplement, we refer all interested in this subject to the advertisement, as the application of this remedy would, undoubtedly, be the best treatment possible after reducing the heat.

PNEUMONIA (Lung Fever).

Acute congestion of the lungs is always the first stage of this disease, which passes on to active inflammation of the substance of the lungs, while in bronchitis the air passages only are inflamed.

Symptoms.—The horse will oftentimes have a discharge from the nostrils, following a sudden exposure to cold, after being kept in a warm stable, and then the disease is ushered in by a chill, followed by fever, which is increased

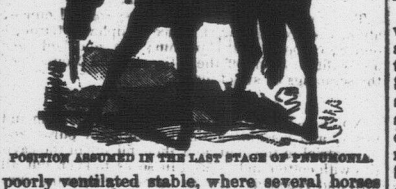

CONSEQUENCE OF INFLAMMATION OF THE LUNGS.

for a short time; cold legs and ears, quick and wiry pulse, quick and difficult breathing, pain in the chest, which is aggravated by coughing; and a quivering of the muscles of the side and breast.

The horse will not eat, and continually stands with his head down, and ears lopped, and will not lie down nor move about; the nostrils are expanded. If the ear is applied to the side of the chest or neck a peculiar creaking noise is heard.

Cause.—Perhaps one of the most frequent causes is a hard or fast drive against a cold wind, after being taken from a warm, tight, and

POSITION ASSUMED IN THE LAST STAGE OF PNEUMONIA.

poorly ventilated stable, where several horses have remained through the night; or some different alteration and sudden change of heat, cold, or moisture in an animal not accustomed to work, or in one not in proper condition to work.

Treatment.—The stable should be a comfortable place, not too cold, and yet well ventilated. Give the horse clothing according to the weather, but do not change from a heavy blanket to a light one, nor to one that is damp. Keep the legs warm with bandages.

Give twenty-five drops of the tincture of acetic root in a cupful of cold water, and repeat the dose every few hours, until five or six doses have been given, which will probably cause the horse to perspire freely. Care should be taken not to allow the horse to stand in a draft of air. Do not bleed, as some recommend.

After the horse has taken sufficient tincture of acetic root, as soon as he seems to have an appetite for food, a pint of gruel should be given, which will probably be given during the day. Great care should be taken not to allow the horse a large amount of food at one time, which would overload the stomach, and might cause a return of the disease. Little and often must be the rule at first, and then the quantity may be increased, when the frequency is diminished. Do not give any hay for several days.

Raw eggs, and other nourishing and stimulating articles, may be given, if the horse shows signs of great weakness. The nourishment should be in a concentrated form, and hay and grass should be kept from the horse for a few days, and then given in quantities small at first, and gradually increased. The horse will lie down until improvement has taken place.

KING-BONE

This is a bony growth on the pastern bones, as shown in the cut, and usually begins in inflammation of the membranes covering the bones at the points giving attachment to ligaments.

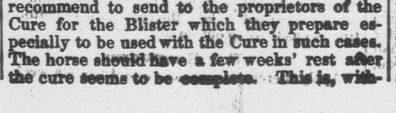

It is the result, generally, of hereditary predisposition, weakness, or of a peculiar formation of the pastern joints, which makes them poorly adapted to hard work.

Symptoms.—The lameness may be very great, if the bone or joint is inflamed to considerable extent, or it may be almost entirely absent.

The lameness usually increases with exercise, or if used on hard or stony ground. The enlargement may be only slight on the inner or outer side of one of the pastern bones, or the whole pastern region may be enlarged.

Treatment.—If the horse is very lame, you will probably find much heat and inflammation in the part, which should be reduced by constant applications of cold water for several hours, and as the cold applications are discontinued, we know of no remedy so liable to effect a cure as the Kendall's Spavin Cure, advertised in this supplement.

In old or bad cases which do not yield to the above treatment so as to show signs of improvement in two or three weeks, we would recommend to send to the proprietors of the Cure for the Blister which they prepare especially to be used with the Cure in such cases. The horse should have a few weeks' rest after the cure seems to be complete. This is, with-

KING-BONE.

1. The joint between the pastern bones.

2. The joint between the lower pastern and the coffin bone.

out doubt, the best treatment that could be given.

RHEUMATISM.

This painful disease is a peculiar form of inflammation of the joints, tendons, and muscles, and often shifts from place to place. In acute rheumatism there is great excitement and fever, with severe pain in the legs and joints of the case, so severe that the horse hardly dares to move from the place he occupies, on account of the extreme pain which it causes. He has an unnatural heat in the feet, as is found.

Cause.—Exposure to a draft of cold air when a horse has been heated, thus suddenly checking perspiration.

Treatment.—Place the horse in a good, comfortable stable, as soon as possible after it is discovered that he is afflicted with acute rheumatism, and commence the following treatment: Give the horse about twenty-five drops of the tincture of acetic root every four hours, until five or six doses have been given.

Cover the horse with a blanket, and give the horse general good care. Give the following powder as soon as the tincture of acetic root has been given: Bicarbonate of soda, four ozs.; sulphur, eight ozs.; saltpetre, powdered, four ozs. Mix, and divide into eight powders, and give two or three times a day, according to the quantity of the case, and repeat, if necessary.

Apply Kendall's Spavin Cure to the joints, or to any part which swells or is tender.

Chronic Rheumatism.—This is a frequent cause of lameness, and it is oftentimes quite difficult to decide fully as to the cause of the lameness.

Treatment.—For this form of the disease, we recommend the same powder as given above for acute rheumatism, only to be continued a longer time, and to apply the Kendall's Spavin Cure to the affected parts. Only a small quantity need be used at a time, but it should be rubbed well down to the skin, and covered with a warm cloth. It should be necessary to continue as long as the horse's condition continues as long. It is also the best external remedy we know of for this disease in man; but it should be used for some time, as the disease, when of long standing, cannot be cured in a few days. It may be applied a small quantity at a time, and continued for one to three or four weeks, if necessary.

VALUABLE SUGGESTIONS.

Health of Horses.—To care for the comfort and health of horses should be the first thing to be considered when building or repairing a horse stable. Pure air and sufficient light should be given in all stables when possible. To secure a constant supply of pure air horses require more cubic space than is generally allowed them, both in height of stable and number of square feet of floor allowed each horse. Proper ventilation is a very important item in the general make-up of the stable. When practicable put windows into the south side of the stable to allow the horses to get the benefit of sunshine.

How to Feed Horses.—The question how to feed horses seems at first thought like one of no importance, but if well considered our readers will find it to be one of very great importance. Want of space will preclude our giving minute direction. Horses used where fast work or travelling on the road is required should not be fed only a small quantity of hay in the morning and at noon, with a good allowance of grain; but at night a much larger quantity of hay may be given with less grain than at morning or noon. The hay used should be sweet and clean, never giving musty or very dusty hay to a horse. Clover hay is very bad for the horse, being quite liable to cause heaves if fed to any considerable extent. Horses used about slow work can be allowed a larger amount of hay. One good feed of six quarts of potatoes once a week, at night, is very valuable. Oats is the grain which is best adapted to the wants of the horse under all circumstances.

Watering Horses.—All horses are quite liable to drink more after getting than is required to replenish the waste; and, besides this, it has been ascertained that, when water is drunk by horses, a large share of it passes directly through the stomach, and on into the large intestines, where no digestion takes place; and that, if a horse is allowed to drink directly after eating, that a portion of the food is carried along with it, which of course can then do no good, but liable to do some injury. Therefore we say, always water horses before feeding, and you will find they will do better, drive better, sweat less, etc., and will drink all that nature demands, as soon as they become accustomed to this habit.

Signs of Intelligence in the Horse.—The head, being the location in which the brain is seated, is the best indicator of the disposition. For signs of temper or intelligence, look at the eye and formation of the head. Breadth and fullness between the ears and eyes is a sign of intelligence, and, with a pleasant eye, indicates a good disposition. A horse with a rounding nose, tapering narrow forehead, and a broad, full face below the eyes, is always treacherous and mischievous.

"A Merciful Man is Merciful to his Beast."

THE HORSE

AND
His Diseases.

A TREATISE:

Giving an index of diseases, and the symptoms, causes, and treatment of each; a table giving all the principal drugs used for the horse, with the ordinary dose; effects and accidents when a poison; a table with an engraving of the horse's teeth at different ages, with prices for setting the age of the horse; a valuable collection of receipts, with much valuable information.

BY B. J. KENDALL, M.D.

65 ENGRAVINGS. 65

PRICE ONLY 25 CENTS.

WHEATON, MASS., Oct. 13, 1880.

Dr. B. J. Kendall & Co.:—
Dear Sir,—Enclosed please find amount charged for one dozen of your books. I think a great deal of the book, and have paid \$6.00 for one that did not like as well, and being in the horse business, I think I can sell lots of them for miles about here, as they come so cheap.

Respectfully,
GRO. A. HUNT.

OFFICE OF WILLIAM TUPPIN,

515 TREMONT ST., BOSTON, MASS., Sept. 2, 1880.

Dr. J. H. Kendall & Co.:—

Gentle,—Enclosed please find 25 cts. for which send me the revised edition of your Horse Book. I have one of the first edition, and consider it more valuable than any other work in the United States published on the same subject.

Yours respectfully,
W. M. TUPPIN.

CHICAGO, IOWA, Feb. 26, 1880.

Dr. B. J. Kendall & Co.:—

Gentle,—I like your Horse Book very much, and think that every horse owner ought to have one, as they need so cheap and yet so reliable. I have a number of different horse books; but yours is so plain and simple and easily understood I prefer it to any of them. Please send me your terms to agents.

Yours truly,
O. W. DOLTON.

OSWEGO, ILL., Feb. 1, 1880.

Dr. B. J. Kendall & Co.:—

Gentle,—I am much pleased with the Horse Book you sent me. I find that the engravings show the positions assumed in diseases better than can be taught in any other way. I also find a number of valuable receipts in it. I would not give my book for a great deal if I could not get another, and I enclose \$1.00, for which please send me five more copies.

Yours truly,
LEONARD BOWMAN.

This little book during the short time since its original publication has been recognized as one of the most reliable authorities on everything pertaining to the condition or treatment of the horse, while its low price places it within the reach of every one who owns or has the care of these animals. The best evidence of its popularity is the immense sale with which it has met with; over 2,000,000 have been published and sold in all parts of the United States. Hundreds of testimonials to the efficacy of the treatment advised can be shown, and in many cases a reference to this book and prompt following of its advice has saved the lives of valuable animals. It is plain and simple in its terms and can be understood by any body. A distinguished veterinary surgeon, who possesses a library comprising the most costly books on the horse, recently said that he would part with almost any one of them sooner than this inexpensive treatise, which comprises so much.

The above valuable book will be given as a premium to new subscribers who pay in advance, and to all old subscribers paying arrears and one year in advance, without extra charge; or it will be sent, post paid, to any address for 25 cents.

Address,
D. G. SMITH, Chatham, N.B.

KENDALL'S SPAVIN CURE

THE SUPERNATURAL MASTERS

The following cases were found in a collection of "The Supernatural Masters" published by the Rev. Mr. Jones, of Boston, in 1840.

And with this I feel very much obliged to you, and I am sure that you will be glad to hear of the success of your medicine.

For some time I have been troubled with a pain in the back, and I have tried many remedies, but without success. I have been told that you had a cure for this, and I have tried your medicine, and I feel very much obliged to you for the cure.

Yours truly,
J. W. HUNT

VALUABLE RECEIPTS

No. 1.—Take equal parts of soft fat, beeswax, linseed-oil, Venice turpentine, and Norway tar; first melt the wax, then add the turpentine, and lastly the oil, stirring until cool. This is excellent for man's sores.

No. 2.—Take of castor oil, Barbadoes nut and soft soap, equal parts of each, well shaken together, stir while cooling, and apply to the horse's hoof 3 or 4 times a week.

No. 3.—Take of castor oil, Barbadoes nut and soft soap, equal parts of each, well shaken together, stir while cooling, and apply to the horse's hoof 3 or 4 times a week.

SADDLE AND HARNESS GALLS

Brushes, Etc.

No. 1.—Tincture of opium, 8 ounces; castor oil, 2 ounces. Mix, and apply twice a day.

No. 2.—Apply directly into the sore.

No. 3.—Tincture of opium, 1 ounce; castor oil, 2 ounces. Mix, and apply twice a day.

The above cut is a good representation of the New Laboratory and Manufactory of B. J. Kendall & Co., Birmingham Falls, Vt., proprietors of the celebrated Kendall's Spavin Cure.

HINTS FOR HORSE OWNERS.

Sunflower Seed for Horses.

The sunflower seed is very healthy feed for the horse, and should be given in quantities about half a pint a day during the winter and spring, which will cause them to have a sleek coat, and will keep them in good health and spirit. It is considered by many who have tried it to be a preventative of heaves, and several have claimed to have cured heaves with it, as well as coughs and distempers. When used for heaves, mix five parts of seed with one of the feed, and use it every day with water, three times a day. Always remember to feed hay and water as you direct in the treatment of heaves in another place.

Hoof Care.

A horse with a poor hoof, runs almost as well as one with a good one. One of the most frequent causes of poor feet is in allowing the blacksmith to pare the hoof too much, especially in the spring, when the hooves should be pared under any circumstances.

Bleeding Horses.

The most effectual method of bleeding a horse is to bleed him in the neck, and he will forget that he does not wish to draw the lead. This may be done in various ways. A stout string twisted around the foreleg, so as to cause some pain, and to stop the circulation for a short time, may have this result. Unhitch the horse from the load, and turn him around rapidly several times until he becomes dizzy. Tie a string around the ear. Give a handful of grass, or a lump of earth or sugar, or if you wish, divert his attention, which will have the effect to divert the attention so the horse will forget his work.

Hoof Destroyed by Feeding Potatoes.

It is claimed by some that bots will not live but a short time if placed in grated potato, and that horses have been relieved from attacks of bots by simply feeding four or six quarts of potatoes. At all events, it is well known that potatoes fed once a week are excellent for horses.

Quantity of Food Required for a Horse.

For ordinary work, a horse of average size should be fed 15 pounds of oats, or other grain feed, and 15 to 18 pounds of good hay; but, if driven on the road, 8 or 9 pounds of hay, morning and noon, and 8 or 10 at night, with the same quantity of grain.

Lice on Cattle, Horses, or Dogs.

To rid an animal of lice, apply a small quantity (the size of an ordinary pill) of mercurial ointment to some part which the animal can not lick.

Charcoal for Stomach.

Place an ear of ripe corn into the fire, and allow it to remain until it has become well charred, and feed this to your horse. It is much better than ordinary charcoal, and will give health and vigor.

Contracted Hoof or Sore Foot.

No. 1.—Take equal parts of soft fat, beeswax, linseed-oil, Venice turpentine, and Norway tar; first melt the wax, then add the turpentine, and lastly the oil, stirring until cool. This is excellent for man's sores.

No. 2.—Take of castor oil, Barbadoes nut and soft soap, equal parts of each, well shaken together, stir while cooling, and apply to the horse's hoof 3 or 4 times a week.

Condition Powders.

No. 1.—Gentian, 4 ounces; sulphur, 2 ounces; castor oil, 2 ounces; mix, and give 1 tablespoonful three times a day.

No. 2.—Gentian, 4 ounces; sulphur, 2 ounces; castor oil, 2 ounces; mix, and give 1 tablespoonful three times a day.

Liniments for Horses.

No. 1.—Olive oil, 1 ounce; turpentine, 1 ounce; mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—Olive oil, 1 ounce; turpentine, 1 ounce; mix, and apply to the horse's hoof 3 or 4 times a week.

Water Farcy.

No. 1.—Saltpetre, 2 ounces; castor oil, 2 ounces; mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—Saltpetre, 2 ounces; castor oil, 2 ounces; mix, and apply to the horse's hoof 3 or 4 times a week.

Healing Preparations.

No. 1.—Carbolic acid, 1 ounce; soft water, 2 pints. Mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—White vitriol, 1 ounce; soft water, 2 pints. Mix, and apply to the horse's hoof 3 or 4 times a week.

To Cure Mange.

No. 1.—Olive oil, 1 ounce; sulphur, 1 ounce; mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—Olive oil, 1 ounce; sulphur, 1 ounce; mix, and apply to the horse's hoof 3 or 4 times a week.

To Grow Hair.

No. 1.—Carbolic acid, 1 ounce; soft water, 2 pints. Mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—White vitriol, 1 ounce; soft water, 2 pints. Mix, and apply to the horse's hoof 3 or 4 times a week.

For Worms.

No. 1.—Castor oil, 2 ounces; turpentine, 2 ounces; mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—Castor oil, 2 ounces; turpentine, 2 ounces; mix, and apply to the horse's hoof 3 or 4 times a week.

Diarrhoea.

No. 1.—Saltpetre, 2 ounces; castor oil, 2 ounces; mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—Saltpetre, 2 ounces; castor oil, 2 ounces; mix, and apply to the horse's hoof 3 or 4 times a week.

Cough Mixture.

No. 1.—Olive oil, 1 ounce; turpentine, 1 ounce; mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—Olive oil, 1 ounce; turpentine, 1 ounce; mix, and apply to the horse's hoof 3 or 4 times a week.

Nasal Gleet.

No. 1.—Carbolic acid, 1 ounce; soft water, 2 pints. Mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—White vitriol, 1 ounce; soft water, 2 pints. Mix, and apply to the horse's hoof 3 or 4 times a week.

To Cure Mange.

No. 1.—Olive oil, 1 ounce; sulphur, 1 ounce; mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—Olive oil, 1 ounce; sulphur, 1 ounce; mix, and apply to the horse's hoof 3 or 4 times a week.

To Grow Hair.

No. 1.—Carbolic acid, 1 ounce; soft water, 2 pints. Mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—White vitriol, 1 ounce; soft water, 2 pints. Mix, and apply to the horse's hoof 3 or 4 times a week.

For Worms.

No. 1.—Castor oil, 2 ounces; turpentine, 2 ounces; mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—Castor oil, 2 ounces; turpentine, 2 ounces; mix, and apply to the horse's hoof 3 or 4 times a week.

For Diarrhoea.

No. 1.—Saltpetre, 2 ounces; castor oil, 2 ounces; mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—Saltpetre, 2 ounces; castor oil, 2 ounces; mix, and apply to the horse's hoof 3 or 4 times a week.

For Ringworm.

No. 1.—Carbolic acid, 1 ounce; soft water, 2 pints. Mix, and apply to the horse's hoof 3 or 4 times a week.

No. 2.—White vitriol, 1 ounce; soft water, 2 pints. Mix, and apply to the horse's hoof 3 or 4 times a week.

FROM COL. L. T. FOSTER.

Washington, D.C., June 11, 1881.

Dr. B. J. Kendall & Co., Genl.—I had a very valuable Hambroian colt which I prized very highly. He had a severe attack of the joint and a small one on the other, which made him very lame. I had him under the charge of two veterinary surgeons, who failed to cure him. I was one day reading the advertisement of your Kendall's Spavin Cure, and I bought a bottle. I took them all and thought I would give the horse a trial. I used it according to directions, and the fourth day the colt could go to work, and the lameness disappeared. I used but one bottle, and the colt has since been sound and healthy. I have since bought two more bottles, and will use them on my other horses. The cure was so remarkable that I let two of my neighbors have the remaining two bottles, who are now using it.

Very Respectfully,
L. T. FOSTER.

FROM A PROMINENT PHYSICIAN.

Washington, D.C., June 11, 1881.

Dr. B. J. Kendall & Co., Genl.—I have a valuable advertisement in your Kendall's Spavin Cure, and having a valuable and speedy horse which had been lame from a severe attack of the joint, I bought a bottle of your Kendall's Spavin Cure, and used it according to directions. The cure was so remarkable that I let two of my neighbors have the remaining two bottles, who are now using it.

Respectfully yours,
