INTRODUCTION.

In presenting to the public the Gazetteer and Directory of Lincoln and Welland Counties, the publisher desires to return his sincere thanks to all who have so kindly aided him in obtaining the information it contains. Especially are our thanks due to the several editors of the papers published in the two Counties, for the uniform kindness they have evinced in calling public attention to the author's efforts, and for essential aid in furnishing material for the work. The various township clerks, and many others have placed us under similar obligations, to all of whom we tender our grateful acknowledgements.

That errors have occurred in so great a number of names and dates as are here given is probable; and that names have been omitted which should have been inserted is quite certain. We can only say that we have exercised more than ordinary diligence and care in this difficult and complicated feature of book making. Of such as feel aggrieved in consequence of errors or omissions we beg pardon, and ask the indulgence of the reader in marking such as have been observed in the subsequent reading of the proofs, and which are noted in the *Errata*.

The *Advertisers* represent the leading business men of the two Counties, and we most cheerfully commend them to the patronage of those under whose observation these pages may come.

With thanks to our patrons and friends generally, we leave our work in their hands, trusting it may meet with that favor which earnest endeavor ever wins from a discriminating public.

WM. W. EVANS.

WELLAND
STEAM PRINTING HOUSE.

ESTABLISHED 1863.

THE
Welland Telegraph

AND THE

Canadian Farmer

and Grange Record.

THE TELEGRAPH (a 36 column paper), is published at the office, Hobson Block, Welland (the County Town), every Friday morning, in time for the first mails, and is sent to any address, post-paid, for one year, on receipt of \$1.00. It is the official legal paper, the largest sheet, and the only one printed by steam in the County. Its circulation - which is one-third larger than any other - is guaranteed to be 1,800, and the subscription books are always open to intending advertisers.

AS A MEDIUM OF ADVERTISING IT SPEAKS FOR ITSELF.

THE CANADIAN FARMER & GRANGE RECORD is the only paper of its kind printed in Canada being strictly an Agricultural Journal, with a portion devoted to the interests of the Grange. Through the active support and influence of the Dominion Grange it has succeeded in gaining an extensive circulation among the farming community, the last issue being 6,250 - increasing at the rate of over one hundred a week. It is issued every Wednesday from the above office, and sent to any address, pre-paid on receipt of \$1.50. Size, 27 x 42 inches, containing 36 columns. W. Pemberton Page, Secretary of Dominion Grange, Editor.

The Book & Job Department

STANDS unrivalled. Everything in the printing line, from a Mammoth Poster to the Finest Wedding Card, being executed neatly and expeditiously.

LINCOLN COUNTY

GAZETTEER

LINCOLN COUNTY.

THIS County is bounded on the north by Lake Ontario; on the east by the Niagara river; on the south by Welland and Haldimand counties, and on the west by Wentworth county. It contains twelve municipalities, viz., the townships of Caistor, Clinton, Gainsborough, Grantham, Grimsby, Louth and Niagara; the town of Niagara; the villages of Grimsby, Merritton, and Port Dalhousie; and the city of St. Catharines.

The County is watered by numerous small creeks and streams, some of which afford ample water power for mills and factories. It is also admirably situated for agricultural purposes, the greater portion of it being elevated, on a high table land, having a limestone base with a good depth of soil above it; the surface is generally undulating, forming a succession of hill and dale. Being situated between two large bodies of water, lakes Erie and Ontario, it is less liable to suffer from late and early frosts than many other portions of the Province; hence it has long been celebrated as a fruit raising district.

The County is intersected by the main line of the Great Western Railway, which enters it on the west border, near Jordan Station, and passing through Louth and Grantham, passes out on the south line at Merritton; the Welland Railway, running from Port Dalhousie south and passing out at Merritton, on the south line; and the Niagara Division of the Canada Southern Railway, running from Niagara south to the International Bridge, and leaving the County on its south border near St. Davids. Through this County also runs the Welland Canal, that great work of engineering skill which has overcome the difficulty thrown in the way of the navigation of the great lakes by the Falls of Niagara.

The County of Lincoln originally formed part of the old Niagara District, which was comprised of the present counties of Lincoln, Haldimand and Welland. The Niagara District, in 1817, contained a population of 12,540 inhabitants; in 1824 the number had increased to 17,552; in 1834 to 27,347; in 1839 to 29,953; and in 1848 to 36,534.

The area of the County is 107,501 acres, with a population of 32,709.

TOWNSHIPS.

CAISTOR.

This township is bounded on the north by the townships of Grimsby and Saltfleet; on the east by Gainsborough; on the south by Canborough and Seneca, and on the west by Binbrook. It occupies the south-west corner of the County, and has an area of 32,887 acres, with a population of 1,907.

It is watered by the Chippawa or Welland River and its tributaries. The Twenty Mile Creek washes about five miles of the northern boundary. The surface is generally level, with a soil chiefly clay. It was originally timbered with pine, ash, beech, maple, elm, &c.

There are four post offices in the township, viz., Abingdon, Attercliffe, Caistorville and Warners.

Abingdon is a post village, a little west of the centre, 12 miles from Winona station, and 20 miles from Hamilton. It contains one church (Presb.), the township agricultural hall and fair grounds, a blacksmith shop, wagon shop, two stores, a saw and shingle mill and 50 inhabitants.

The Township Agricultural Hall is a frame building, 30x40, and was erected in 1874 at a cost of \$500. The Township Fair is held here annually.

The saw and shingle mill of Robert A. Shepherd has been established five years, employs five hands and cuts 200,000 feet of lumber and 450 bunches of shingles per annum.

Attercliffe is a post village in the south-east corner, on the Welland River, and is distant 24 miles from St. Catharines, and eight miles from Canfield station, on the G. T. R. The Canada Southern and G. W. R. Air Line roads pass a short distance from

the village. It contains two stores, a cheese factory, wagon shop, tailor shop, hotel, shoe shop, saw, shingle and planing mill, two blacksmith shops and 150 inhabitants.

Oswego Lodge, No. 166, I. O. O. F. was organized in 1874. Richard Ennis, N. G. ; Douglas Roy, R. S. ; meets every Thursday. There are 30 members.

The saw, shingle and planing mill of John W. Tisdale has been established five years, employs three men and turns out 500,000 feet of lumber and 500,000 shingles annually.

The Attercliffe Cheese Factory, of James Crowther, was established in 1878 and consumes the milk of 250 cows.

Caistor Centre is a hamlet about a mile and a half west of Abingdon and contains an M. E. church, a saw and shingle mill, a blacksmith shop and 40 inhabitants. It has no post office, the residents receiving their mail at Abingdon.

The M. E. church is a frame building, seating 200, and was erected in 1873. Services are held at 10.30 a. m. Sunday school at 9.30 a. m. Rev. Mr. Bristol, of Canboro, officiates.

The saw and shingle mill of Cicero Harris has been established 18 or 20 years, and employs four hands.

Caistorville is a post village in the south-west part, on the Chippawa river, eight miles from Canfield station, on the G. T. R., 30 miles from St. Catharines and 20 from Hamilton. It contains two churches (Canada Meth. and M. E.), a saw mill, blacksmith shop, hotel, shoe shop, wagon shop, harness shop, two stores, a cheese factory and 150 inhabitants.

The M. E. church is a frame building, seating 250, and was erected six or seven years ago. Services at 7.30 p. m. Rev. Mr. Adams, of Canboro, officiates.

The Canada Methodist church is a frame building, seating 200. It was erected 20 years ago and is valued at \$1000 including lot. Services at 2.30 p. m. Sunday school at 9 a. m. Prayer meeting Wednesday evening. There are 112 members.

L. O. L. No. 283, was organized 28 or 30 years ago. Joseph McCarter, W. M. ; Andrew Pearson, Sec. Meets Wednesday on or before full moon. There are 30 members.

Royal Black Preceptory of Ireland, No. 419, was organized in 1876. Joseph McCarter, W. M. ; Andrew Pearson, Registrar. Meets second Tuesday in each month. There are 12 members.

Warners is a post village in the south-east part, and contains a store, hotel, blacksmith shop, tin shop and 40 or 50 inhabitants.

Caistor Corners L. O. L. No. 1172, was organized in 1874, John D. Servos, W. M. ; Edmund Lymburner, Sec. Meets Friday on or before full moon. There are 30 members.

The first settler in the township was a negro named Diamond, who settled near the banks of the Welland River in 1778. In 1782 he sold his improvements to Henry Dochstader, an U. E. Loyalist, from New York, whose descendants own the same spot of ground to the present time. The Dochstader family were the first white settlers in the township. In 1794-5-6 John, James, Alexander and Mathew Lymburner settled in the township. In 1817 the township contained 156 inhabitants, one grist and four saw mills. In 1850 it contained 1,047 inhabitants, one grist and five saw mills. Caleb Travis, one of the early settlers, was the father of 24 children, no triplets, and only one pair of twins.

The following information in regard to the early settlers of this township we extract from Page's Atlas of Lincoln and Welland counties.

"Rev. Henry Ryan [an early pioneer] possessed great physical strength. The following are some of the many anecdotes which are told of him :

"Once when paying an Indian for some venison, some time during the war of 1812-15, the money happened to be a piece with the American Eagle on it. The Indian on seeing it yelled, Yankee! Yankee! and with a drawn knife sprang upon Ryan. But quick as a flash, he found himself upon the ground disarmed, and held by Ryan as in a vice. Being compelled to surrender unconditionally, he was ever after, according to his promise then made, Ryan's faithful friend. Ryan was the superintendent of the Methodist Church in the Province during the war. In the spring of 1819, Ryan, Smith and Morse, all removed to the neighborhood of Smithville; and shortly after Ryan and Smith each were prosecuted for marrying. Sentence of banishment for 15 years was passed upon Ryan, which was subsequently revoked; Smith pleaded his own case at the trial, and by his eloquence and ability received an acquittal.

"John Lymburner built the first saw mill, in 1799, on lot No. 6, con. 2, on Moore's creek. The first school house was built of logs, in 1816, on lot No. 2, con. 1; first teacher,—Wilson, known afterwards in the newspapers as 'Nappertandy.' The first white male child born in the township, in the spring of 1819, was the late Jacob Lymburner, son of Matthew Lymburner; and the first

white female child born near the same time, in the township, was Llanah Dochstader, daughter of Joseph Dochstader.

"The early settlers suffered many hardships. Provisions had frequently to be carried on the back from Niagara, along Indian paths, from thirty to forty miles. Sheep and other tender animals, if kept at all, were shut up at night in stables or pens so high and tight, that no wolf or bear could enter. The howling of wolves was nearly as familiar as the crowing of fowls now. Families made their own cloth and garments of flax and wool. Farmers made their own sleighs, cradles, rakes and wooden pitchforks; many of them made their own boots and shoes; and some tanned their own leather. Matrons as well as maidens, would walk ten or twelve miles, with a pail of butter on each arm, to Griffin's store, and return in time to milk the cows."

CLINTON.

This township is bounded on the north by Lake Ontario; on the east by the townships of Louth and Pelham; on the south by Gainsborough, and on the west by Grimsby. It has an area of 25,461 acres, and a population of 2,601.

It is watered by the Twenty Mile, Thirty Mile, Mud, Konkle's and Red Creeks, and other small streams.

"The general face of the township is in easy gentle slopes or moderately rolling, except Mount Dorchester, which is more or less hilly and irregular, and in some places too steep and precipitous for cultivation. The quality of the soil is excellent, yet variable, being composed of sand, sandy loam, clay loam and clay; a large portion of the land on the mountain rests on a limestone base. The whole township is fertile and productive, being well adapted to agriculture and horticulture. At the base of the mountain, some two or three miles south-east of the village of Beamsville, is the curiosity of what is called an 'ice spring,' where ice is found during the greatest heat of summer, but none in the winter. Salina Springs along the 30 Mile Creek were once worked in making salt, but have been abandoned since the war. A lead mine in the western part of the township, about 3 miles from Smithville, was worked about 30 years ago, (the Government appropriating a few hundred dollars to assist it,) but the metal was not obtained in sufficient quantities to be remunerative. The township was finely timbered, principally with oak and pine, but has other varieties

such as beech, maple, elm, ash, hickory, ironwood, and in some parts black walnut, butternut and chestnut."^{*}

The main line of the Great Western Railway passes through the north part from east to west.

"One of the first settlers was William Walker, a Loyalist from Virginia, who with his six sons and four daughters came to the township in 1780 when in its wildest state. All his sons except Thomas afterward went further west. About the same time and soon after came the Henrys, Tuffords, Culpes, Konkles, Berrindger, Buchner, Corwin, Marlett, Clouse, Zimmerman, Adair, Hare,

Overholt, Shultz, House, Hawn, and others, all in the northern part below the mountain, commencing in 1788-9. Along Mud Creek and the 20 were the Books, Teeter, Linderberry, Freese, Zimmerman, Dawdy, Hitchcock, Bartram, Dennis, Johnsons, Cohoe, from N. York and N. Jersey. In 1799, Albright and several of the Mayers, who in 1800-1-2 and following years were followed by the Grobbs, Hipple, Hunsbergers, Wismer, and other Germans from Bucks Co., Pennsylvania.*

The first grist mill was built by Cohoe in 1790, on the Jordan, where Dean's mills now stand. A saw and grist mill was built shortly after by a Mr. Dawdy, on lot No. 1, concession 8. The first school house, used also for religious purposes, was built in 1790, where Beamsville now stands. The first church was built by the Baptists, in 1776, on the present site of Beamsville. Rev. Wm. Holmes was the first resident minister. He preached the first sermon at the house of Staats Overholt, on lot 16, Broken Front, in 1782-3. The place where the house then stood is now some 20 rods in the lake, so great has been the encroachment of the lake upon the land in many places.

In 1835 the township contained 1,779 inhabitants. In 1850 the population had increased to 2,652.

GAINSBOROUGH.

This township is bounded on the north by the townships of Clinton and Grimsby; on the east by Pelham; on the south by Wainfleet, and on the west by Caistor. It has an area of 89,699 acres, and a population of 2,722.

"The land is, as a whole, gently rolling; along the large streams, quite rolling, and in the centre, more level. Several small streams, the largest, the Big Beaver, empty into the Welland River, on the south; and North's creek empties into the 20 Mile creek, on the north. The 16 Mile creek runs through two thirds of the township. The 20 Mile creek ends on lot No. 30, on the north side, running eastwardly some seven miles, where it runs into the township of Clinton. The soil is generally clay and clay loam; along the Welland and the 20 Mile creek, the flats are a rich alluvial. It has been a well timbered township; mostly pine with a large proportion of oak, beech, maple, basswood, ash, elm, hickory and ironwood. The Welland or 'Chippawa' (People without moccasins)

is deep, and on a level with the waters of the Niagara River at its mouth; for when the westerly winds drive the waters of Lake Erie sufficient to swell the waters of Nagara, the waters of the Welland flow up stream sometimes for several hours, the distance of thirty miles, and raising the stream from one to two feet high. Immense quantities of timber are floated down this stream from Caistor, and other places annually. Steam tugboats go nearly as far up the stream as the western boundary of the Township, generally understood as the 'Deep Water' termination."*

A commodious public hall has recently been erected by Walter Misner.

Wellandport was originally known as "The Narrows," so called from a narrow strip of land which here divides the Big Beaver Creek from the Welland River. A mill was erected here in 1816, the first in the south part of the township. The Big Beaver was dammed, and a race made through the village, by which the water from the mill wheel was discharged into the Welland.

The first settlement of this township was made along the Welland River, in the south, and the Jordan in the north. Among

the first settlers was John Dochstader, in 1782, at the south-west angle of the township, who was followed by the Hodges, Dils, McDowell, John Barker, Philip Henry, the Robins, Heaslips and others. Most of the first settlers passed to their new homes in canoes from the mouth of the Welland at Niagara River.

The first school house in the south part was built at Wm Dils' lane, one mile west of Wellandport, the first teacher being — Wilson, *alias* "Nappertandy." The first school house in the north part was built of logs in 1798. The first church was built of logs in 1799, on lot 19 in the sixth concession, by the Presbyterians. The first resident minister was Rev. H. Ryan, in 1809. The first mill was erected at St. Anns in 1794 by a Mr. Snyder.

"In 1788-9, occurred a scarcity of provisions, (at the end of the three years that Government furnished the settlers,) known as the 'Hungry year.' The cry for 'bread! bread!' could not be met; great suffering prevailed throughout the country, many people were compelled to live on roots, the buds and bark of trees, and occasionally game; but ammunition was very scarce, and money to buy it still more so.

"In 1796, a sweeping tornado, generally known as *The Hurricane*, passed through the entire length of the Province, and in the northern parts of Caistor, Gainsborough and Pelham, mowed a swarth of timber from one and a half to two miles wide. In those days, the inhabitants had sometimes their own mills; perhaps a stump or block of wood so hollowed out that the grain was pounded in it sufficiently to make 'horning' or 'mush,' hence they were called 'horning blocks.' Sometimes the exploring settler would run through the forest, until he found some favorite spot for his future home; some of them before chain or compass had entered the Township.*

In 1835 the township contained 1,543 inhabitants. In 1850 the population had increased to 2,133.

The Welland Canal here empties its waters into the lake. This is also the northern terminus of the Welland Railway, which here has a large ele-

vator with a storage capacity of 100,000 bushels. The water power afforded by the canal has been utilized to some extent by the erection of a number of mills and manufactories. A good ship yard is located here which, in prosperous times, employs a large force of men. The harbour is safe and commodious, and here vessels may find refuge in all seasons. The village was settled about the year 1776, and originally laid out by Mr. N. Pawling. It was named after Lord Dalhousie, in gratitude for his exertions in behalf of the Welland Canal. The post office was established in 1830.

Reynoldsville is a small village two miles from St. Catharines, at the base of the mountain, in the south-west corner of the township. It contains a wood pulp mill, saw mill, wagon and blacksmith shop, a manufactory of wall brackets, and 50 inhabitants. There is no post office, the residents receiving their mail at St. Catharines.

Decew Falls is located a short distance from the village, where it falls over the mountain, the stream thence passing through a deep gorge or ravine, forming a scene of magnificence and grandeur which the lover of nature cannot fail to appreciate. On the brow of the mountain is located the reservoir of the St. Catharines Water Works.

The saw mill of B. F. Reynolds employs six men, turning out 200,000 feet of lumber per annum.

The pulp mill of Lossing & Secord employs about a dozen hands in the manufacture of wood pulp from poplar.

The stone building occupied by Messrs. Lossing & Secord was erected in 1811 as a grist mill. The mill stones were purchased in Albany, but the war of 1812 breaking out prevented their reaching their destination till after peace was declared.

The city of **St. Catharines**, the county seat of Lincoln, is beautifully situated, on a level plateau below the mountain, and is the centre of one of the most fertile and thickly settled agricultural districts of the Province. It is the principal point on the Welland Canal, which unites the great chain of lakes, and forms an unbroken line of communication by water from Lake Superior to the Atlantic seaboard. The population is about 13,000, which is steadily augmenting. It is distant from Toronto, by water 83 miles, by rail, 72 miles; from Hamilton, 32 miles; from Niagara Falls, 12 miles; from Buffalo, 35 miles, and from Rochester, 87 miles.

The business streets are lined with many fine blocks and stores, devoted to the varied departments of trade and commerce, while numerous elegant mansions and residences adorn the suburban portions.

St. Catharines contains a large number of fine public buildings, prominent among which may be mentioned the Town Hall, an elegant cut stone building, erected at a cost of \$16,000, having a large uniform addition, used as a Court House and county offices, the aggregate cost of the building being about \$32,000; the Saw Works of R. H. Smith & Co., an extensive stone building; St. Joseph's Convent, the Protestant Orphans Home, the Allan block, Grand Central block, Masonic Temple, H. Wilson & Co.'s Broadway block, the mercantile establishments of Henry Carlisle and Struthers & Co., the Marine Hospital, with many others of lesser note.

In her railway facilities and water communication St. Catharines is rendered easy of access from all points. The Great Western Railway passes through the city from east to west, and is intersected by the Welland Railway, running north and south, parallel with the canal, from lake to lake, connecting with the main line of the G. W. R., the Canada Southern, the G. W. R. Air Line and the Grand Trunk, while by means of the canal the traveler can go or come by steamer in any direction. A daily line of steamers connects the city with all upper and lower ports, while daily communication is also had by steamer with Toronto during the season of navigation.

The city supports two ably managed daily papers, viz., the *News* and the *Journal*, both of which are liberally patronized.

There are 12 churches in the city, representing the usual phases of religious belief, quite a number of which are fine edifices, and finished after the modern styles of church architecture.

The school buildings comprise a collegiate institute, central school and six ward schools, thoroughly officered with an efficient corps of teachers, and liberally patronized. There are besides five separate schools and the St. Joseph's Convent which are also well sustained.

St. Joseph's Convent is a fine, three-story brick building, with mansard roof, located on the corner of Church and James streets. It was erected in 1874, at a cost of \$21,000. An excellent school for young ladies is maintained; there have been some 80 pupils in attendance during the past year. There are 16 sisters in connection with the institution, who also are employed in teaching the separate primary schools.

The enterprise of ship building is one of considerable importance in St. Catharines, although the commercial depression of the last few years has to some extent affected this branch of industry. A very large number of lake vessels and steamers are owned here, and there is no doubt that with the return of better times and the completion of the new canal, this important enterprise will be still more largely extended.

St. Catharines is largely indebted to the Welland Canal for its prosperity, not only in enhancing its commercial importance, but in the building up of a large manufacturing interest, which has been afforded by the unlimited water power furnished by the canal.

The Welland Canal was projected in the year 1818 by the Hon. W. H. Merritt, M. P., and was commenced in 1824. The original design of connecting Lakes Ontario and Erie through the Welland and Niagara Rivers, having failed from the caving in of the work at the deep cut, the Grand River was adopted as the feeder, and the difficulties of the descent were overcome by 39 locks. These locks were of wood 110 by 20 feet. The old works having got out of repair, the canal was enlarged and improved, the size of the locks increased and constructed in a more substantial manner.

"The first lock is at Port Dalhousie, which has ten feet fall, and is of the dimensions of two hundred feet by forty-five; the next, below St. Catharines, has eight feet fall, and is of the same dimensions; then three locks in the city of St. Catharines, with twelve and a half feet fall each; between St. Catharines and Thorold, in-

cluding the latter place, there are twenty locks, five of which have fourteen feet fall each ; and the remainder twelve and a half feet fall each. The last lock is at Allanburg, with eighteen feet fall. These locks are one hundred and fifty feet long by twenty-six and a half wide, and have a general depth of ten feet of water. The Welland Canal is about twenty-six miles in length, and the Grand River feeder is about twenty-two miles in length.*

The new canal is being rapidly pushed to completion and will probably be open to navigation next year (1880).

"At Thorold it diverges to the east of the former line, passing near Homer, and shortening the route to Port Dalhousie by about a mile, debouches at the same place. Besides this saving in distance there will be fewer locks owing to the fall at each lock being greater. The new locks are being made to accommodate vessels of much greater tonnage than formerly, and provision will be made for 14 feet of water on the mitre sills of the locks, in case that 12 feet will be too little. The dimensions of the locks are 240 feet long, 45 feet wide, with at least twelve feet of water on the mitre sill. The new canal will be used for the larger vessels, while the smaller craft will find their way down the old canal. At each lock of the old canal is a noble water privilege, which is still further utilized by means of races, giving rise to a great deal of manufacturing, and which will in time make this the Manchester of the Dominion."†

"St. Catharines is noted far and wide for its Mineral Springs, the healing waters of which are renowned throughout the continent, and their curative effects have been so thoroughly tested in such a variety of instances that the elegant and extensive hotels erected in consequence of the influx of visitors are always filled with tourists, especially from the Southern and South-western States of America. The Artesian Wells, which are now widely known, much resemble the Spas, of Germany, but their curative properties are of a far higher order."†

During the past year an important addition has been made to the improvements of the city, in the opening of the water works, which for emergencies of fire as well as for household purposes has already proved of incalculable advantage. The mains have been laid through the principal streets, a large number of citizens have already taken advantage of the enterprise to secure the boon of

The land upon which St. Catharines now stands, was owned at one time by a Captain Robinson, who was commander of a vessel on Lake Ontario. At least the town took its name from his widow, who brought this with other property, to her second husband, the Hon. Robt. Hamilton, from whom it was purchased, by the Hon. Mr. Merritt. The conveyance from the Hamiltons bears the date of the 27th of March, 1816. It would appear from official returns that during a period of forty years, from 1784 to 1824,—the year in which the canal was commenced, the population of the township of Grantham did not increase more than one dozen families, the returns showing that in 1784 the township contained 236 heads of families, while in 1824 it contained 248 heads. The

amount which Mr. Merritt agreed to pay for a large portion of the land on which St. Catharines now stands was £1,500, or \$6,000. In the year 1819 St. Catharines was visited by a severe conflagration which swept away the forest and such buildings and inflammable material as were within reach. At this period money was much more difficult to obtain than it is now, trade and commerce being carried on almost exclusively by bartering produce for merchandize, and vice versa. So scarce, indeed, was the circulating medium, that the proprietor of the first team of horses owned in the neighborhood, failed in raising \$1.50 on a load of oats, (about 40 bushels) with which to pay the taxes assessed against his property. The property comprising the land between King, Church, Queen and Academy streets, was the year before the Canal was commenced, offered to a man then carrying on business, in exchange for a suit of clothing and a barrel of whiskey, and declined. Now the same property is worth about a million of dollars.

Intimately connected with the rise and progress of the city of St. Catharines, is the name of the late Hon. Wm. Hamilton Merritt, to whose indomitable energy and practical wisdom the country is indebted for the construction of the Welland Canal, that great thoroughfare which has so successfully overcome the barriers which nature had interposed to the intercommunication between the great lakes. His name deserves to be held in honored remembrance, as it doubtless will be, by all future generations, and while the fame of Gens. Brock, Wolf and other military heroes, who sacrificed their lives in defence of their country, have been properly perpetuated by the erection of handsome monuments to their memory, a grateful people should no less honor one who was the means of conferring upon them as great a boon as ever resulted to the country through the achievements of military science; and it is to be hoped that ere many more years elapse a suitable memorial will be erected by the citizens of the Dominion which shall serve to commemorate the name and well earned fame of this distinguished benefactor of his country.

Mr. Merritt was born in Bedford, Mass., July 3, 1793. In 1796 his parents removed to Upper Canada, and settled on the Twelve Mile Creek.

Here, within a few miles of the base of the mountain, and close by the bright waters of Old Ontario, on the banks of the broad and delightful estuary of the "Twelve," surrounded by the towering giants of the forest—the oaks, the walnuts, and the lordly pines—

were the first early impressions of the new land conveyed to the youthful mind of the subject of this Memoir.

Here his earlier years were spent in active industry, helping in the cultivation of the farm and doing his daily part towards the comforts of the house.

The time was not passed, however, without mental improvement, as he attended the log school-house at the "Corners," situated near his subsequent residence. In 1806 he was sent to Burlington, at the head of the lake, and here he attended Mr. Cockerell's school, where he received mathematical instruction, field surveying, etc., etc.

Soon after this his teacher removed to Niagara, under whose direction, and that of the Rev. John Burns, he finished his home education. This was all the classical knowledge he attained, which afterwards was absorbed by the practical routine of active life. At about the age of 16 he entered into partnership with a Mr. Chisholm who had opened a general store near his home. With him he continued until his nineteenth year, when resolving to turn agriculturalist he sold out his interest and went on the homestead farm. While engaged in this peaceful avocation, the war of 1812 broke forth, and compelled him to exchange the ploughshare for the sword. Receiving a commission as Lieutenant he proceeded with his company to Chippawa, placing himself under the command of Col. Clark, of the 2d Lincoln Militia. He took an active part in the war until its close, during eight months of which time he was a prisoner of war. At the close of the war he married and opened a general store at "Shipmans Corners," now St. Catharines, connecting with it the business of a land agent. He also erected a saw and grist mill, distillery and potashery, and commenced the manufacture of salt, so that at this period it is evident his time was fully occupied with trade and improvements.

"In 1818 Mr. Merritt decided upon putting to use an idea which he quietly conceived years before, but always kept prominent in his active brain, and which ultimately resulted in one of the most gigantic and important public works on this continent. A scarcity of water for his mill supply occurred, and was always uncertain in warm weather; so he believed a remedy for this could be found by having a communication with the Chippawa River. Calmly weighing the stupendous results which might yet accrue from the act, he determined to make a rough survey of the ground. There being no regular levelling instrument at hand, he borrowed a water level from Mr. Becket, who kept a small mill at the 'Short

Hills.' With this instrument, and accompanied by Mr. Keefer, DeCew, and other neighbours, they started on their tour of surveying. They commenced at the south branch of the Twelve Mile Creek, now *Allanburgh*, which is about 350 feet above its exit into Lake Ontario—from thence they ran their line for a distance of two miles, due south, to the Chippawa; and upon reckoning up the result of their survey, they found that the dividing ridge or height of land was about thirty feet above the levels. This was the first survey of the Welland Canal made, and of the results which have since transpired, few are unacquainted. It is, however, proper to state that owing to the imperfect instruments with which they conducted the survey, they made a mistake of 30 feet; the actual height being afterwards proved to be 60.

"This survey, although very defective, was sufficient to *move the mountain*; as it drew attention to the question, and set people to consider and talk over the matter, more especially as Mr. Merritt had expressed his firm conviction that the connection between the lakes could be carried out by means of a canal. Mr. Merritt drew up a memorial to the Legislature, to which the names of all the influential settlers were attached, asking for an appropriation to be made for a correct survey. This honourable body voted that the sum of £2,000 be given for a survey of the route, as well as that of the St. Lawrence. So it will be seen that the simple act of a few early settlers laid the foundations for the greatest water ways in the world.

"In interesting the Legislature, Mr. Merritt gained a grand point, and after his departure, he left the plan and papers with Col. Burwell, who took great interest in the idea. Sir Peregrine Maitland was then administrator of the Government, and having fixed his residence at Stamford, not far from the projected route, was a firm friend and supporter of the canal. For the present Mr. Merritt was, however, doomed to disappointment, as the Government Engineer, Mr. Chewitt, surveyed a route for a canal 50 miles long, in a different part of the country, by commencing at the Grand River, and passing through Canboro', Caistor, Gainsboro', and Clinton, as a summit; thence descending towards the Twenty Mile Creek, and proceeding westerly, parallel with Lake Ontario, and terminating in Burlington Bay. The whole affair was as absurd as it was expensive, and happily bore no comparison with Mr. Merritt's route, which was only 28 miles long. Nothing further was done by the Government in 1818, as the available funds were wasted upon Chewitt's impracticable survey; but Mr. Merritt

managed to obtain data, which enabled him to judge of the probable cost of his route. So the subject was postponed in consequence of other troubles in his private affairs.*

Amid the multiplicity of business cares surrounding him, Mr. Merritt kept his darling project constantly in view, and in 1828 a subscription was opened for raising funds to make a survey of the canal. A civil engineer was engaged, who in company with Mr. Merritt, went over the route and arranged the plan, which was printed, with an address to both Provinces, July 12th.

We have not the space to detail at length the many vicissitudes through which the canal project passed, and Mr. Merritt's active part in furthering the scheme, but would refer the reader to that valuable work, from which these facts have been taken, the "Biography of the Hon. W. H. Merritt, M. P.," edited by his son, J. P. Merritt, Esq., in which a full history of the whole project is given, as well as an interesting sketch of the projector, one of the most remarkable men of the times. Suffice it to say that on the 27th of November, 1829, the first vessel passed through the canal amid the plaudits of multitudes of people who were gathered to witness the scene.

In 1832 Mr. Merritt was elected to represent the constituency of Haldimand in Parliament, and served the county in that capacity for several terms. He subsequently was elected legislative councillor by acclamation, and took his seat as such in 1861. During his parliamentary career he exerted a marked influence on the legislation of the country, and every measure calculated to further the best interests of the people, to foster trade and commerce, and build up the varied interests of the country, received his earnest support. After a busy lifetime occupied in every endeavor to advance the interests of the people of the Province, Mr. Merritt passed to his reward on the 5th of July, 1862, regretted and lamented by all who knew him, and of him it may truly be said, "He loved his God, he loved his country, and he did his duty."

The first settlement was made in 1800 by Smith Griffin, who laid out the village in 1825, and after whom it was named. The post office was established in 1825, Smith Griffin being the first postmaster.

In the north-east part of the township, about two miles east of Grimsby, on the lake shore, is located the well known Grimsby Camp Ground, which has become a popular place of resort during the summer season for conventions, excursions, &c., and where is also held the Annual Camp Meeting of the Methodist body. The grounds are nicely laid out, and a large number of handsome cottages have been erected. During the summer season the place has all the conveniences of a town, there being a commodious hotel and re-aurant, a store, telegraph office, &c. It has also a railway station and steamboat landing, where trains and boats call daily.

This township commenced settling about the year 1780. In 1782 John Greene, from New Jersey, settled on lot 10, in the 1st concession, where he erected a grist and saw mill, the first in the township, and ground most of the grain to supply Niagara, Fort Erie, York and Kingston.

The following information in regard to the early settlement of this township we take from Page's Historical Atlas of Lincoln and Welland Counties.

"Capt. Robert Nelles, settled on lot No. 11, con 1, in 1783, his brother Abraham (afterwards Legislative Councillor) in 1784, and William Nelles in 1787. Robert Nelles was a person of strong will, great endurance, was a valiant warrior, and was often employed in carrying despatches during the American Revolution, of a highly confidential character, and under difficult circumstances. On one occasion, the 14th February, 1780, he and four Indians were so driven and surrounded by a superior force of Continentals, that they could only escape by swimming the Oswego River near its mouth. Nelles and one Indian only made good the opposite shore, and escaped, though the bullets whizzed about their heads. Their clothes were in a few minutes frozen on them and no means of drying them except the heat of their bodies, until they got to Fort Niagara. Nelles became a member of parliament in 1803, (in company with Solomon Hill, of Smithville) and lived

at his comfortable residence in Grimsby to a good old age, having filled several places of position and trust.

"From 1784 to 1790, several Loyalists such as Andrew Pettitt, sometimes called Judge Pettitt, and others of the Pettitt family, Smith, Walker, Nixon and others, settled along between the mountain and the lake. In 1787, Richard Griffin, with a family of seven sons and four daughters, from what was then called Nine Partners, N. Y., settled on the Jordan, (20 mile creek) now Smithville.

"Charles Meredith, Thomas Harris, Thomas North, and Lieutenant Monroe, began their improvements soon after. Robert Lounsbury, Dr. Utter, John Beam, Solomon Hill, Wm. Lawrence, John Beamer, from N. Jersey; Peter Bronslaugh, from Virginia; D. Palmer, and others, including the Merritts, from Catskill, in what is known as the 'Merritt settlement,' and some of the McCollums, John Harris Wm. and Thomas Bridgman, along the 20 mile creek. William Walker, from Virginia, obtained lots 1 and 8 in the 6th concession, and 11, 13, 14, 15, 16 and 17 in the 7th concession. His son Ralph settled on the mountain on lot 16, when the road up the mountain was only a zigzag path. Up this path he drove his oxen singly while he carried the yoke and chains; he also carried on his back up the same steep ascent, his provisions, furniture, seed grain, plough, harrow and farm implements of that day. The Muirs and some other families settled in what is now called the Muirs settlement, in 1815. The Coons, Halsteads, Buckbees, St. Johns, and others settled in the south-west part in the 8th and 9th concessions in 1825. Among other early settlers were Lewis, Wilson, Wilcox, Woolverton, Hickson, Lawrence, Milmine, Kitchen, Bell, McIntire, Russ, Palmer, Terryburys and others. Morris Terryburry is said to be the father of twenty-five healthy children, none of them twins or triplets. Smith Griffin was the first merchant in Smithville, and during the war of 1812-15, brought all his goods from Montreal by sleighing, the distance being, as the roads then were, nearly 500 miles. Henry Nelles and William Crooks, were both in the mercantile business in Grimsby village before the war.

"The first regular religious service in the township was the Church of England, performed by Judge Pettitt, in 1787, in his own and occasionally in his neighbors houses, until the building of the log church in 1794, where the stone church now stands on lot No. 11—built in 1812. The second church (Methodist) was built in 1802, on the mountain, 30 mile creek. The first resident

Methodist minister was Rev. Elijah Warren, at Smithville, in 1818. The first resident Church of England minister was Rev. Wm. Sampson, at Grimsby, in 1827. Prior to W. Sampson's incumbency, the Rev. Robert Addison, of Niagara, made pastoral visits to Grimsby. Rev. D. W. Eastman (Presbyterian) was the first resident minister in the township, in 1816. The first school house was made of logs in 1794, a little east of the village of Grimsby. The first white child born in Grimsby was the late William Nixon, Esq., in 1792."

St. Marks Church (Epis) is a stone building, and was erected

in 1792. The transept was erected in 1841-2. Connected with this church are many interesting historic reminiscences of the early history of the country. The church was burned down during the War of 1812, and was subsequently rebuilt. The Americans occupied the town for some months during that eventful period, and a portion of their troops were quartered in this church. The old rifle pits still remain in the cemetery attached, and the marks of axes are still seen on the broad slabs of stone, which were used as blocks for cutting up beef for the troops. Rev. Robert Addison was the first incumbent, who was succeeded in 1829 by Rev. Thos. Creen, Rev. Mr. McMurray, the present rector, succeeding the latter in 1857. The original bell was put up in 1827, and was rung for 50 years, when it was presented to Brock Memorial Church, Queenston, where it is now used. St. Marks has lately been presented with an excellent chime of bells, the gift of Walter Augustus and John Gale Dickson, Esqs. This church contains the oldest records of any church in the Province.
